Oggetto: d-client Katie

Hello,

I spoke with Katie and Mike Casey, the request for purchase with end of year money did not go through. The only reason it did not happen was that the system is "too controversial" These are Katie's exact words.

"Alex,

Our domestic acquisition did not make it through our bosses, but we are working on the foreign angle. We will be at ISS in October and can speak then. Too controversial. "

I am not sure what the Foreign angle is but she will tell us then. I also think that once f-client gets his set up the controversial aspect will be less.

By the way, are we, Cicom USA, going to have passes to get into ISS?
