---

(b) (6) protocol (B00-03) covers much of what needs to be done with rPA. I think what gets contracted out is going to depend on the space we have here, and the length of time we have to accomplish the work. As it stands now, we can't possibly complete everything in the protocol by the end of the year. I think we could do experiments 1, 2 and 5 this calendar year if we started now, but that's about it. The rest of it may well have to be contracted out.
