New York Times Sunday Magazine, 19 June 2011

Proud to sponsor a terrorist's worst nightmare.

The objective of everyone attending the 2011 Aspen Security Forum, July 27-30, is to ensure that those who threaten our society never sleep easy.

i2 shares this objective. Which is why we're sponsoring the Aspen Security Forum.

With 350,000 users, in 4,500 organizations, in 150 countries, we are the leading provider of intelligence and investigation management software for law enforcement, defense, national security and commercial organizations.

Our users face huge challenges – including aviation and maritime security, border policing, cyber crime, critical infrastructure and mass transit protection – and they count on us to provide effective solutions.

i2 develops capabilities that allow users to leverage actionable intelligence and knowledge across their organization to help investigate, predict, prevent and defeat crime and terrorism. At home and abroad.

Accelerating Your Mission.

i2 Clarity Platform

i2's technology empowers government agencies and private sector businesses to investigate, predict, disrupt and defeat the world's most sophisticated criminal and terrorist activities. We enable our users to be more effective by providing not just information, but the insights to answer critical questions and take action.

By merging the Analysis and COPLINK product lines, the i2 Clarity Platform has become an enterprise-class intelligence system that aggregates investigative, analytical, operational and command level capabilities and tools. This creates an ergonomic environment that works across all phases of the investigative and analytical process and breaks down silos by integrating human sensor networks with digital sensor networks, across agencies at a local, national and global level – generating actionable intelligence for more rapid decision making.

The i2 Clarity Platform features:

- Massively scalable and secure architecture
- Native Analyst's Notebook plug-in to leverage the value of current i2 charts while protecting investments in software and training
- Detachable/untethered architecture for use in the field
- All source data acquisition and analysis within a web-based collaborative framework
- Unmatched Always-on-Analytics including Point-of-Need alerting
- Server side analytics unleash the potential of your data
- Smarter data mining tools provide increased accuracy as a result of ever-expanding data volume, data sources and data types
- Open API's enable the i2 Clarity Platform to integrate within a wider enterprise infrastructure
- Native Node connectivity helps to not simply connect the dots, but connect the right dots

With relevant intelligence delivered to the point of need, the i2 Clarity Platform is the one solution you can rely on to deliver the right information to the right people at the right time – so you can achieve your mission.

i2's proven technologies are central to the ability of governments to protect citizens. The other essential aspect of protection is the proactive protection of citizens' privacy and civil liberties.

Cyber

Connecting the Cyber World
with the Real World

Part of the i2 Clarity Platform, i2's *Cyber* solution is a post-incident analytic platform that brings together large volumes of data from numerous sources to link cyber criminal activity with real-world entities. Take the "anonymous" out of cyber investigations.

.

The i2 *Cyber* platform utilizes powerful post-incident analysis to perform attribution, correlate links and entities involved in attacks, make real-world connections and expose network vulnerabilities. It can help identify advanced persistent threats and shut down cyber perpetrators. i2's *Cyber* solution accomplishes this by employing:

- Rich extraction, analysis and visualization capabilities that turn large quantities of cyber data into actionable intelligence
- Rapid pattern analysis that quickly identifies characteristics and bad actors in attacks
- Social network analysis capability that identifies distribution of power and communication patterns in cyber networks
- Sophisticated analytical database for managing and analyzing multi-source data
- Data sharing and layering to pool cyber investigative data with other data sources

Cyber is used worldwide by intelligence agencies, governments, military and defense agencies, law enforcement and commercial enterprises to perform a wide range of cyber analysis

- Attribution of attacks and bad actors through IP and DNS resolution and geo-spatial mapping
- Social network analysis of BotNets and other cyber attack networks
- IT Network analysis and vulnerability mapping
- Spam, phishing and malware identification
- Insider threats and data exfiltration
- Track and analyze advanced persistent threats

"Before mapping in [i2's] Cyber [solution], I had difficulty understanding the interactions in thousands of spreadsheet lines."

Analyst François Blanchard
Sûreté du Québec

Open Source Information

Enhance intelligence with integrated Open Source Information

More information

CONTACT US

The i2 Clarity Platform pulls all available data to provide analysts access to information quickly and easily. i2 understands the importance of Open Source in today's MULTI-INT fusion strategies, that is why we have partnered with trusted open source information providers to offer more comprehensive insights into individuals and organizations involved with terrorism, violent groups threatening the homeland and high risk international profiles.

Key Benefits:

Counterterrorism Analysis IntelCenter solution (CTAS)

When an attack occurs, analysts subscribing to the CTAS will quickly receive an Intel Center intelligence feed in the form of an *Analyst's Notebook* chart via e-mail. This chart adds over 16 years of counter terrorism research and analytical experience to your intelligence product. The solution combines an *Analyst's Notebook* populated with a terrorism icon palette, an annual subscription that delivers regularly updated link charts on terrorist and rebel groups operating around the world, along with access to the IntelCenter database.

LEARN MORE ABOUT INTELCENTER'S COUNTERTERRORISM OPEN SOURCE INFORMATION

Homeland Security Open Source - ISVG solution (HSOSS)

HSOSS enables analysts to easily add homeland security focused open source information to existing data resources by delivering an *iBase* database with the latest OSINT on violent groups threatening our homeland. HSOSS adds more than 120 human coders to the analytical arsenal and over 7 years of information on violent groups linked to militia violence, radical islamist terrorist and homegrown threats, radical violent environmental rights movements, anti-immigration violence and more.

LEARN MORE ABOUT THE INSTITUTE FOR THE STUDY OF VIOLENT GROUPS' OPEN SOURCE INFORMATION

Risk Intelligence Analysis World-Check solution (RIAS)

With the right click of a mouse from within the *Analyst's Notebook* environment, analysts can tap into their *iBase* and add open source information on suspicious people and businesses linked to extremely high risk activities world-wide. RIAS exploits the knowledge gathered by 350 experienced full time researchers fluent in more than 50 languages and working 24/7 across the world to deliver the most up to date information on individuals linked to narco-drug trafficking, arms dealing, money laundering and much more.

Counterterrorism Analysis-IntelCenter

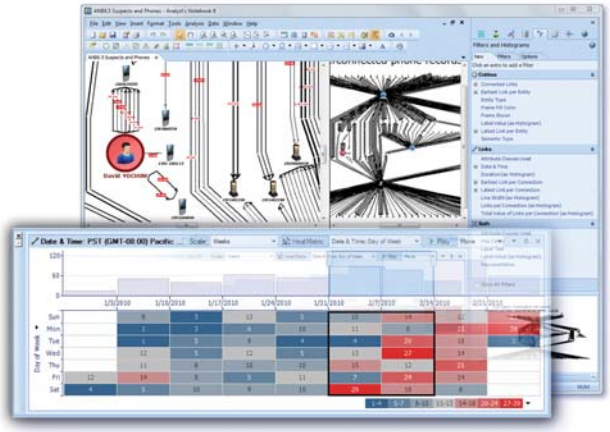
Accelerating Your Mission.

i2 and IntelCenter's Counterterrosim Analysis solution is designed specifically to assist counterterrorism professionals in reliably assessing the significance of terrorist developments and quickly producing, accurate and actionable intelligence products. As the organizational structure of groups around the world is in a state of constant flux, having a clear understanding of the interconnectivity of the various entities and the latest terrorist threats helps analysts gain a complete situational awareness of the threat environment.

The Counterterrorism Analysis solution combines i2's industry-leading *Analyst's Notebook* with IntelCenter's intelligence products. *Analyst's Notebook* delivers the richest assisted analysis and visualization capabilities and comes pre-packaged with a vetted IntelCenter Terrorism Palette as well as an annual subscription to the respected IntelCenter Terrorist & Rebel Link Analysis feed (TR-LAF).

Deliver rich actionable intelligence faster with *Analyst's Notebook*:

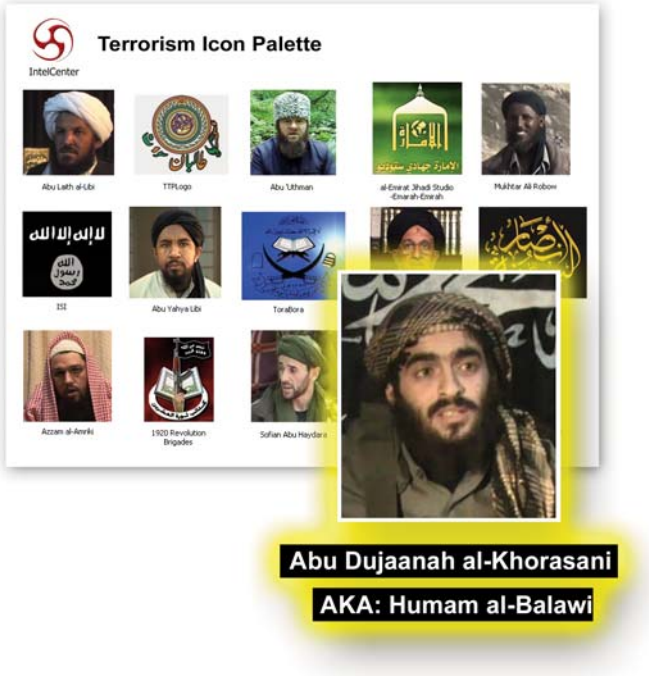
- Supports the dynamic thought process of analysts with multiple methods of representing information within a chart including geospatial, association, temporal, spreadsheet and statistical views
- Enables performance of sophisticated analysis easily for social network analysis, commodity flow, telephone records, financial records and more
- Communicates complex cases with intuitive briefing charts and reports that capture and organize supporting data



Analyst's Notebook delivers rich actionable intelligence faster

Enhance situational awareness with IntelCenter's Terrorism Palette

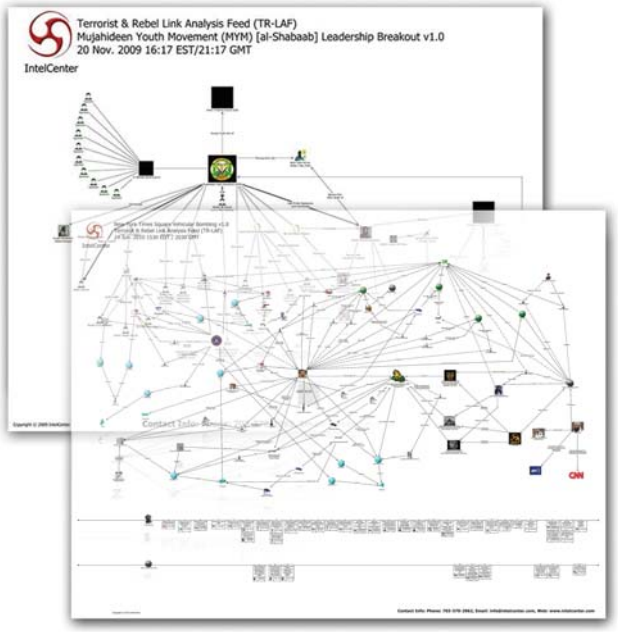
- Incorporate preloaded facial identification icons and terrorist and rebel group logos into *Analyst's Notebook* charts
- Visually represent top leaders of over a dozen terrorist groups as well as other prominent figures
- Easily search and incorporate preloaded icons to represent rebel and terrorist group logos, including logos for media arms and military wings



PART OF THE INTELLIGENCE-LED OPERATIONS PLATFORM

Reliably assess the significance of developments with IntelCenter's intelligence feed

- Leverage the power of IntelCenter's Terrorist & Rebel Link Analysis Feed (TR-LAF) with regularly updated link analysis charts on the most significant terrorist and rebel groups operating around the world as well as charts focused on major attacks within hours of them happening
- View intelligence feed information as native *Analyst's Notebook* charts or download as PDF files
- Enhance intelligence by incorporating information from IntelCenter's intelligence feed into your existing link charts or use them to get a head-start on new charts you need to create



Reliably assess the significance of developments with IntelCenter's intelligence feed

Stay updated with latest intelligence

- Receive link charts within hours of a major terrorist incident
- Continuous delivery of updated charts as situations develop
- Use IntelCenter charts as a platform to build your own

Strengthen intelligence with enhanced visualization

- Facial identification icons strengthen briefings and presentations
- Quarterly IntelCenter Terrorism Palette updates ensure users receive latest intelligence
- Icons are pre-populated with alternative name spellings and aliases to avoid duplications and enhanced accuracy

A comprehensive solution to strengthen the fight against terrorism.
