**Superscript Concrete Note**

**1. CONCRETE**

- **Type:** Ordinary Concrete
- **Strength:** 3000 psi
- **Mix Design:** Designated by the Architect
- **Placement:** According to the approved placement schedule
- **Curing:** Performed as per the manufacturer's recommendations
- **Embedment:** Met all requirements as specified in the drawings

**2. Steel Bar Information**

- **Bar Diameter:** 1/2" and 3/4"
- **Bar Spacing:** 6" on center
- **Bar Embedment:** Met all requirements as specified in the drawings

**3. General Information**

**Notes on Double Corrosion Protection Rod Anchors**

1. All rod anchors must be installed in accordance with the approved drawings.
2. Ensure proper embedment depth as per the design specifications.
3. Verify the compatibility of the protection rods with the concrete grade.
4. Curing procedures must be strictly followed to avoid corrosion.
5. Slab reinforcement must be checked for adherence to the project's structural requirements.
