On April 22, 2013, the protection (first phase) has been installed on the spent fuel pool. The protection for the skimmer surge tank hatch cover (found on April 18, 2013) has also been installed. To prepare for the second phase of protection installation on the spent fuel pool, the steel beam truss debris, etc. which interfere with the work will be removed.
Before the debris in the surrounding area of the spent fuel pool was removed.

Protection installed on the spent fuel pool (first phase).

Protection for the skimmer surge tank hatch cover.
