Analysis of Converged Data

Converged data leads to better analysis, which leads to more focused tasking.

- Passive
- CNE / Forensics
- METAWAVE (Warehouse)
- MARINA (Metadata)
- TUBE
- TURBINE
  - Direct, high-level tasking
    - Where active tasking already in use, refine what is collected
    - If no CNE, pursue active collection

**Note:** Our goals for high-level tasking are to relieve the user from needing to know / care about the details. For example, a user should be able to ask for "all details about application X" and not need to know how and where the application keeps files, registry entries, user application data, etc.
