Reflecting widespread news:

**Suicide blast wave UAV's, shook the world + Pictures**

Starting with the nuclear negotiations, America and its allies are trying to bring the negotiations between Iran and the six countries involved in Iran's missile. With this explanation, according to the News of the World and Iranophobia volume due to the impact that this has on public opinion, it seems that the problem of throughput Iranian UAVs will be a pretext for greed will become the new West.

Mshrq- of war

ever since the nuclear negotiations, the world media to some news from Iran have shown greater sensitivity. During this time the news is always a hot topic for the media, world news, news Iranian UAVs.

Several times in the past, as reflected by the UAV's news was published in the media world, together with an overview of the output of news websites in the world today, with broad reflections about yesterday's suicide UAV test was met. Interesting because some of the expressions used in the title of this news, totally biased been selected.

1:46 P.M. Iran’s army tests suicide drone in drills

Iran’s army has deployed a suicide drone for the first time in massive ongoing military drills near the strategic Strait of Hormuz at the entrance to the Persian Gulf.

Gen. Ahmad Reza Pourdastan, the army’s chief commander of ground forces, is quoted by Iranian state media Saturday as calling the unmanned aircraft “a mobile bomb.” The drone, named Yashir according to one Iranian newspaper, has been designed to plunge into aerial and ground targets, as well as ships.

The six-day military exercise is being carried out over 257,000 square kilometers (99,000 square miles) in the northern part of the Indian Ocean, Sea of Oman and the eastern part of the Persian Gulf, through which one-fifth of the world’s oil supply passes. (AP)
World War III: UAV suicide in South West Asia after Iran could change the equation

Home Arab News newspaper in Arabic continue Iranophobia among the strange phrase "arms race" is used; the words are to be used when the subject of this belligerent show:
Tehran using UAV suicide, increased arms race

Starting with the nuclear negotiations, America and its allies are trying to bring the Iranian missile talks between Iran and six countries have. With this explanation, according to the News of the World and Iranophobia volume due to the impact that this has on public opinion, it seems that the problem of throughput Iranian UAVs will be a pretext for greed will become the new West.

What's the difference UAV suicide by a cruise missile?

Smart Missile Cruise Missile itself is much more expensive but lower prices by the UAV operator's control but also as a team and as an observatory aims to activate the clock back Tvhva dive Brh.vly ability cruise missile is in sky.

There is no difference Batfavt

The photos are irrelevant foreign expertise and bring to news archive!

If Iran really does not need to UAV UAV missile strike after his suicide. New UAV missile with a quarter or less can cost four or more rocket was fired at high speeds and accuracy. I think a lot of things are not useful. Andazshv same rocket mass production, we are better!
