In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs (“CHF”), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in Other assets in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in Payables and accrued expenses and the noncurrent portion of the obligation is recorded in Other noncurrent liabilities in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.
NOTE 9 - RETIREMENT PLANS
The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (“FERS-RAE”), or FERS - Further Revised Annuity Employees (“FERS-FRAE”) depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>

</tbody>
</table>

\(^1\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

\(^2\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

**FERS Normal Costs**

The Postal Service records expenses for FERS normal costs within *Retirement benefits* in the accompanying unaudited *Statements of Operations*.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within *Retirement benefits* in the accompanying *Balance Sheets*.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as *Retirement benefits* in the accompanying unaudited *Statements of Operations*. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.
The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

**NOTE 10 - HEALTH BENEFITS PLANS**

**Active Employees**

The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

**Retirees**

Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.
Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

² Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

**NOTE 11 - WORKERS’ COMPENSATION**

Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

**Workers’ Compensation Liability**

The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>

<td>1.07%</td>
<td>1.91%</td>
</tr>
<tr>
<td>Medical inflation rate</td>
<td>3.50%</td>
<td>2.50%</td>
</tr>
</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.
Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

</tbody>
</table>

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

Lease Accounting Policies

Lease Accounting Policy for Comparative Periods
As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expense.
expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

**Lease Accounting Policy for the Six Months Ended March 31, 2020**

The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.
NOTE 13 - FAIR VALUE MEASUREMENT

The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable</td>
<td>$476</td>
<td>$584</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$11,000</td>
<td>$11,936</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, ("Annual Report") filed with the Postal Regulatory Commission ("PRC") on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States ("GAAP"). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our
Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act (“PAEA”) classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund (“PSRHBGF”). We must coordinate with the U.S. Office of Personnel Management (“OPM”) to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY
The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.
Effects of COVID-19

In March 2020, the World Health Organization ("WHO") declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country's critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers' compensation and retirement benefits expenses.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the "CARES Act"). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.
Three Months Ended March 31, 2020
As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $386 million, or 7.1%, with a volume growth of 12 million pieces, or 0.8%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 604 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers’ compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

Six Months Ended March 31, 2020
As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
- First-Class Mail revenue decrease of $79 million, or 0.6%, with a volume decline of 600 million pieces, or 2.1%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
• Periodicals revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $532 million, or 4.5%, despite a volume decline of 73 million pieces, or 2.2%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

• Workers’ compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
• Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
• Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

• Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
• Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss
In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHBF actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

2 Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

3 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

4 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

</table>

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, **First-Class Mail** generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. **Marketing Mail** generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, **First-Class Mail** generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. **Marketing Mail** generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 33% of our revenue for the three months ended March 31, 2020, which was a 2% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers' needs and have increased our investment in mail and package innovation. However, we also
recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

Furthermore, due to the COVID-19 pandemic our First-Class Mail and Marketing Mail volumes began an accelerated decline in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

Our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail
First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers (“CPI-U”).

For the three months ended March 31, 2020, First-Class Mail revenue increased $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%, compared to the same period last year. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter. For the six months ended March 31, 2020, First-Class Mail revenue decreased $79 million, or 0.6%, and volume declined 600 million pieces, or 2.1%, compared to the same period last year. The change in revenue for both periods was less than the corresponding volume declines due to the January 2020 price increase applicable to certain Market-Dominant services. The most significant factor contributing to the
declining trend in First-Class Mail volume has been the continuing migration from mail to electronic communication and transaction alternatives.

Due to the COVID-19 pandemic, our First-Class Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on First-Class Mail revenue and volume.

Marketing Mail

USPS Marketing Mail (more commonly, Marketing Mail), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as First-Class Mail or Periodicals.

Between 2009 and 2016, Marketing Mail experienced relatively flat volume. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, Marketing Mail revenue decreased $94 million, or 2.5%, and volume declined 604 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, Marketing Mail revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our Marketing Mail volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our Marketing Mail revenue and volume.

Marketing Mail is subject to intense competition, and price increases are currently generally capped at the rate of inflation. Marketing Mail volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used Marketing Mail to mail to more targeted prospects.
Shipping and Packages
The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

¹ Includes Priority Mail, a 1-3 business day delivery service; Priority Mail Express, an overnight delivery service available 365 days per year; and USPS Retail Ground, a retail-only Competitive service priced identically and functionally equivalent to Priority Mail for Zones 1-4.
² Includes Parcel Select, Parcel Return, and Marketing Mail Parcels.
³ Includes First-Class Package Services - Retail and First-Class Package Services - Commercial.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 7.1%, with a volume growth of 0.8%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.5%, despite a volume decline of 2.2%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

Priority Mail Services
Priority Mail Services is our Shipping and Packages subcategory that includes Priority Mail, Priority Mail Express and USPS Retail Ground. Priority Mail and Priority Mail Express services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 46% of the total for the three and six months ended March 31, 2020, and 2019. However, Priority
Mail Services accounted for approximately 19% and 18% of the total Shipping and Packages volume for three and six months ended March 31, 2020, respectively, essentially unchanged compared to the same periods last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 7.0%, on volume growth of 2.2%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 3.4%, despite a volume decline of 1.9%, compared to the same period last year. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**
Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.6%, on volume growth of 3.4%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.3%, despite a volume decline of 0.8%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**
Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 5.9%, despite a volume decline of 0.3%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 6.0%, despite a volume decline of 1.7%, compared to the same period last year. Revenue grew despite the volume declines, largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**
Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 5.2% on a volume decline of 10.7%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 5.3% on a volume decline of 11.1%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**
Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.
For the three months ended March 31, 2020, *International Mail* revenue increased 2.4%, despite a volume decline of 11.7%, compared to the same period last year. For the six months ended March 31, 2020, *International Mail* revenue increased 0.4%, despite a volume decline of 9.1%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked our provision to self-declare rates beginning in July 2020.

**Periodicals**

*Periodicals*, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, *Periodicals* revenue decreased 11.1% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, *Periodicals* revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

*Periodicals* revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The *Periodicals* category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as *Certified Mail*, *PO Box* services, and *Return Receipt* services. Also included in this category are money orders and passport services. Other services revenue decreased 1.2%, and 3.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management's control.

We originally designed our mail processing and distribution network to provide overnight delivery service of *First-Class Mail* within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network's legacy capabilities are not completely aligned to today's mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%, and a further significant decline is expected in 2020.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in *Retirement benefits* and *Retiree Health Benefits*, respectively.
Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

<td><strong>$ 11,685</strong></td>
</tr>
</tbody>
</table>

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

**Workforce Composition**

The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

**Collective Bargaining Agreements**

On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on **April 25, 2020**, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.
In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Employee Health Benefits**

Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**

For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in Compensation.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Thrift Savings Plan**

Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**

The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during,
or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.

Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31,</th>
<th>Six Months Ended March 31,</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td><strong>Total retirement benefits</strong></td>
<td><strong>$ 1,818</strong></td>
<td><strong>$ 1,470</strong></td>
</tr>
</tbody>
</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

² Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**

We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.
Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions. Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

**Retiree Health Benefits**

We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBF has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBF the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBF unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBF amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBF normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBF unfunded liability.

For additional information, see **Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.**

**Workers’ Compensation**

Our employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.
On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers’ compensation obligations, which are relatively predictable, from total workers’ compensation expense in order to determine the non-cash component of workers' compensation expense, a non-GAAP financial measure.

The following table presents the components of workers’ compensation expense, including the cash payments made by DOL on behalf of workers’ compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

<td>(370)</td>
</tr>
<tr>
<td><strong>Total workers’ compensation non-cash expense</strong></td>
<td><strong>2,625</strong></td>
<td><strong>401</strong></td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers’ compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not
include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>

<td><strong>$2,008</strong></td>
<td><strong>$2,000</strong></td>
<td><strong>$4,405</strong></td>
<td><strong>$4,342</strong></td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.
Other Operating Expenses

Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31</th>

</tr>
</tbody>
</table>

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of
operations and to prepare for unexpected contingencies. Much of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBF prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBF normal cost and amortization on PSRHBF, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

**CASH FLOW ANALYSIS**

**Operating Activities**
Cash provided by operating activities decreased $148 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

**Investing Activities**
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

**Financing Activities**
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

**DEBT**
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.
If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations.

On April 1, 2020, we drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the NPA. In order to comply with the annual net increase limit, we must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, we must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

**LIQUIDITY OUTLOOK**

We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - *Retirement Plans*. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - *Health Benefits Plans*, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we will unlikely have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity to continue operating, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.
**PRC Ten-year Review**

In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any “true-up” authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020, and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant.

**2020 and Beyond**

Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

**Legally Required Obligations**

In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately $8.0 billion due on September 30, 2020, we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Capital Investments**

We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately $1.3 billion for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.
**Mitigating Circumstances**

We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

**LEGISLATIVE, REGULATORY AND RELATED MATTERS**

**TASK FORCE ON THE UNITED STATES POSTAL SYSTEM**

As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, "A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service."

**LEGISLATIVE UPDATE**

As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors ("Board") which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors ("Governors"). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

**Legislation**

Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the Families First Coronavirus Response Act, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 27, 2020, the President signed the CARES Act, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the Protect our Post Offices Act, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.
Postal Service Reform
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

Board of Governors Nominations
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee's consideration.

FAIR VALUE MEASUREMENTS

As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS

As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management's Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS

See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.
We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

INTERNAL CONTROLS

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations.

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

ITEM 6. EXHIBITS

CERTIFICATION PURSUANT TO RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service (“Postal Service”);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;

4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting;

5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

FORM 10-Q
For the quarterly period ended March 31, 2020
10-Q Draft - Cover Memo

Significant outstanding items as of the date of this draft:

• Closed financials (currently reconciled with Prelims #2.0)
• RPW (reconciled with new quarterly RPW draft V1.1)
• Contingent liabilities
• Related party transactions
• Confirm no updates to PRC matters: Ten-year review and Institutional Cost case

Other outstanding items:

• Legislative Update - Initial draft is in.
• Other support
• Final formatting, page numbering, table of contents

Highlighting key:

• Yellow: Item or sentence requiring update, confirmation or third-party validation
• Green: Date, number or other reference that requires linking to master or support workbook in Wdesk
• Orange: Entire section awaiting update or third-party deliverable
• Purple: Linked number or reference that requires confirmation of source data
• Blue: Section or paragraph selected for elimination or move to another section; or
• Magenta: Internal comment for reviewers (to be removed when resolved)
UNITED STATES POSTAL REGULATORY COMMISSION  
Washington, D.C. 20268-0001

FORM 10-Q

QUARTERLY REPORT PURSUANT TO 39 U.S.C. § 3654 AND SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended March 31, 2020

UNITED STATES POSTAL SERVICE  
(Exact name of registrant as specified in its charter)

Washington, D.C. 41-0760000  
(State or other jurisdiction of incorporation or organization)  
(I.R.S. Employer Identification No.)

475 L’Enfant Plaza, S.W.  
Washington, D.C. 20260  
(Address of principal executive offices)  
(ZIP Code)

(202) 268-2000  
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.  Yes ☐  No ☐  Not Applicable ☑

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).  Yes ☐  No ☐  Not Applicable ☑

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐  Accelerated filer ☐  Non-accelerated filer ☐
Smaller reporting company ☐  Emerging growth company ☐  Not applicable ☑

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.  ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  Yes ☐  No ☑

Securities registered pursuant to Section 12(b) of the Act:

NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements

The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications

Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement

In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both
interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>
<thead>
<tr>

</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.

Accounting Pronouncements Issued but not Adopted

Accounting Standards Update 2016-13 Financial Instruments - Credit Losses

In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.
Accounting Standards Update 2018-13 Fair Value Measurement

In August 2018, the FASB issued Accounting Standards Update 2018-13 Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement, which has since been codified in ASC 820, Fair Value Measurement ("ASC 820"). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - Fair Value Measurement. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software

In August 2018, the FASB issued Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement, which has since been codified in ASC Subtopic 350-40, Intangibles - Goodwill and Other - Internal-Use Software ("ASC 350-40"). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

NOTE 3 - LIQUIDITY

The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.

Cash

The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - Cash, Cash Equivalents and Restricted Cash for further disclosures pertaining to cash.

The Postal Reorganization Act, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank ("FFB"), a government-owned corporation under the general supervision of the Secretary of the Treasury.

COVID-19 Considerations

In March 2020, the World Health Organization declared a novel strain of coronavirus ("COVID-19") a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The
Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However, the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service may require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

Subsequent Events
The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

Debt
As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities with established terms and conditions by providing two days prior notice. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the Postal Service’s outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance that it could obtain alternative debt financing on comparable terms.
Liquidity Concerns
The Postal Service is constrained by laws and regulations, including the Postal Accountability and Enhancement Act ("PAEA"), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and health and benefits programs for employees and retirees, including the Federal Employees Health Benefit ("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in Note 9 - Retirement Plans. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund ("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred cumulative net losses of $83.1 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and its liquidity concerns, the Postal Service will unlikely have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

Business Model Challenges and Constraints
Market-Dominant services, which accounted for approximately 66% of the Postal Service's annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service's costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service's universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in First-Class Mail are largely the result of changes in consumers' and businesses' use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, Marketing Mail volume has generally been challenged by commercial mailers' increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service's Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets.
and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service’s network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, as a result of the temporary surge in e-commerce growth driven by the COVID-19 pandemic, some of these customers increased their volume to the Postal Service’s network during March 2020 due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers’ compensation programs. Some of these costs have historically increased at a higher rate than inflation.

**Past Due Obligations**
The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

¹ The 2012 to 2016 period amount includes $5.8 billion for 2016, $5.7 billion for 2015, $5.7 billion for 2014, $5.6 billion for 2013 and $11.1 billion for 2012.

² The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

**Mitigating Circumstances**
The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.
NOTE 4 - REVENUE RECOGNITION
The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).

Disaggregation of Revenue
The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

<table>

</tbody>
</table>

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

Satisfaction of Performance Obligations
A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes PO Box services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.
Variable Consideration
The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

Contract Modifications
The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

Principal vs. Agent Consideration
The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

Contract Liabilities
The vast majority of the Postal Service’s contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

</table>

<sup>1</sup>Included within Operating revenue in the accompanying unaudited Statements of Operations.<br>
<sup>2</sup>Included within Operating expenses in the accompanying unaudited Statements of Operations.<br>
<sup>3</sup>Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.<br>
<sup>4</sup>Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.

**NOTE 6 - CASH, CASH EQUIVALENCES AND RESTRICTED CASH**

The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31,</th>
<th>September 30,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>
<td>2019</td>
</tr>
<tr>
<td>Cash and cash equivalents</td>
<td>$ 8,987</td>
<td>$ 8,108</td>
</tr>
<tr>
<td>Restricted cash</td>
<td>472</td>
<td>546</td>
</tr>
<tr>
<td>Total cash, cash equivalents and restricted cash</td>
<td>$ 9,459</td>
<td>$ 8,654</td>
</tr>
</tbody>
</table>

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

**NOTE 7 - PROPERTY AND EQUIPMENT, NET**

Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.

For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.
NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.

Provision for Losses
The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>

</tbody>
</table>

¹ Included within Payables and accrued expenses in the accompanying Balance Sheets.
² Included within Other noncurrent liabilities in the accompanying Balance Sheets.
**Reasonably Possible Contingencies**
The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

**Class Action Litigation**
As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission's ("EEOC") Office of Federal Operations ("OFO") certified the case McConnell v. Brennan (first instituted in 2006 as McConnell v. Potter) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process ("NRP") between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The McConnell case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP's failure to provide a reasonable accommodation, the NRP's wrongful disclosure of medical information, the NRP's creation of a hostile work environment, and the NRP's adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the McConnell case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.

The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

**Other**
The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs ("CHF"), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in Other assets in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in Payables and accrued expenses and the noncurrent portion of the obligation is recorded in Other noncurrent liabilities in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.
NOTE 9 - RETIREMENT PLANS
The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (“FERS-RAE”), or FERS - Further Revised Annuity Employees (“FERS-FRAE”) depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
</tr>
</thead>
<tbody>

</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

**FERS Normal Costs**
The Postal Service records expenses for FERS normal costs within Retirement benefits in the accompanying unaudited Statements of Operations.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

**CSRS and FERS Unfunded Retirement Benefits**
OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as Retirement benefits in the accompanying unaudited Statements of Operations. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.
The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

**NOTE 10 - HEALTH BENEFITS PLANS**

FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

**Active Employees**

The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

**Retirees**

Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.
Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

2 Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

**NOTE 11 - WORKERS’ COMPENSATION**

Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

**Workers’ Compensation Liability**

The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>

<td>1.07%</td>
<td>1.91%</td>
</tr>
<tr>
<td>Medical inflation rate</td>
<td>3.50%</td>
<td>2.50%</td>
</tr>
</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.
Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

Lease Accounting Policies

Lease Accounting Policy for Comparative Periods

As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expense.
expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

**Lease Accounting Policy for the Six Months Ended March 31, 2020**

The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.
NOTE 13 - FAIR VALUE MEASUREMENT

The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable</td>
<td>$ 476</td>
<td>$ 584</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$ 11,000</td>
<td>$ 11,936</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our
Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act (“PAEA”) classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund (“PSRHBF”). We must coordinate with the U.S. Office of Personnel Management (“OPM”) to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY
The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.
**Effects of COVID-19**

In March 2020, the World Health Organization (“WHO”) declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits expenses.

On March 27, 2020, the President signed the *Coronavirus Aid, Relief, and Economic Security Act*, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.
Three Months Ended March 31, 2020
As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $386 million, or 7.1%, with a volume growth of 12 million pieces, or 0.8%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 604 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers’ compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

Six Months Ended March 31, 2020
As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
- First-Class Mail revenue decrease of $79 million, or 0.6%, with a volume decline of 600 million pieces, or 2.1%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
• Periodicals revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $532 million, or 4.5%, despite a volume decline of 73 million pieces, or 2.2%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

• Workers’ compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
• Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
• Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

• Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
• Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss
In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHB actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBH retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

2 Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

3 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

4 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

---

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, First-Class Mail generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, First-Class Mail generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 33% of our revenue for the three months ended March 31, 2020, which was a 2% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers' needs and have increased our investment in mail and package innovation. However, we also
recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

Furthermore, due to the COVID-19 pandemic our First-Class Mail and Marketing Mail volumes began an accelerated decline in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

Our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail
First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers (“CPI-U”).

For the three months ended March 31, 2020, First-Class Mail revenue increased $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%, compared to the same period last year. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter. For the six months ended March 31, 2020, First-Class Mail revenue decreased $79 million, or 0.6%, and volume declined 600 million pieces, or 2.1%, compared to the same period last year. The change in revenue for both periods was less than the corresponding volume declines due to the January 2020 price increase applicable to certain Market-Dominant services. The most significant factor contributing to the
declining trend in *First-Class Mail* volume has been the continuing migration from mail to electronic communication and transaction alternatives.

Due to the COVID-19 pandemic, our *First-Class Mail* volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on *First-Class Mail* revenue and volume.

**Marketing Mail**

*USPS Marketing Mail* (more commonly, *Marketing Mail*), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as *First-Class Mail* or *Periodicals*.

Between 2009 and 2016, *Marketing Mail* experienced relatively flat volume. However, *Marketing Mail* volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, *Marketing Mail* continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, *Marketing Mail* revenue decreased $94 million, or 2.5%, and volume declined 604 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, *Marketing Mail* revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our *Marketing Mail* volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our *Marketing Mail* revenue and volume.

*Marketing Mail* is subject to intense competition, and price increases are currently generally capped at the rate of inflation. *Marketing Mail* volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used *Marketing Mail* to mail to more targeted prospects.
Shipping and Packages

¹ Includes *Priority Mail*, a 1-3 business day delivery service; *Priority Mail Express*, an overnight delivery service available 365 days per year; and *USPS Retail Ground*, a retail-only Competitive service priced identically and functionally equivalent to *Priority Mail for Zones* ¹-⁴.
² Includes *Parcel Select*, *Parcel Return*, and *Marketing Mail Parcels*.
³ Includes *First-Class Package Services - Retail* and *First-Class Package Services - Commercial*.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 7.1%, with a volume growth of 0.8%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.5%, despite a volume decline of 2.2%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

Priority Mail Services

Priority Mail Services is our Shipping and Packages subcategory that includes *Priority Mail*, *Priority Mail Express* and *USPS Retail Ground*. *Priority Mail* and *Priority Mail Express* services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 46% of the total for the three and six months ended March 31, 2020, and 2019. However, Priority
Mail Services accounted for approximately 19% and 18% of the total Shipping and Packages volume for three and six months ended March 31, 2020, respectively, essentially unchanged compared to the same periods last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 7.0%, on volume growth of 2.2%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 3.4%, despite a volume decline of 1.9%, compared to the same period last year. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**

Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.6%, on volume growth of 3.4%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.3%, despite a volume decline of 0.8%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**

Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 5.9%, despite a volume decline of 0.3%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 6.0%, despite a volume decline of 1.7%, compared to the same period last year. Revenue grew despite the volume declines, largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**

Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 5.2% on a volume decline of 10.7%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 5.3% on a volume decline of 11.1%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**

Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.
For the three months ended March 31, 2020, *International Mail* revenue increased 2.4%, despite a volume decline of 11.7%, compared to the same period last year. For the six months ended March 31, 2020, *International Mail* revenue increased 0.4%, despite a volume decline of 9.1%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked our provision to self-declare rates beginning in July 2020.

**Periodicals**

*Periodicals*, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, *Periodicals* revenue decreased 11.1% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, *Periodicals* revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

*Periodicals* revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The *Periodicals* category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as *Certified Mail*, *PO Box* services, and *Return Receipt* services. Also included in this category are money orders and passport services. Other services revenue decreased 1.2%, and 3.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management’s control.

We originally designed our mail processing and distribution network to provide overnight delivery service of *First-Class Mail* within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network’s legacy capabilities are not completely aligned to today’s mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%, and a further significant decline is expected in 2020.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in *Retirement benefits* and *Retiree Health Benefits*, respectively.
Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

<td>74</td>
</tr>
<tr>
<td><strong>Total compensation and benefits</strong></td>
<td><strong>$ 11,804</strong></td>
<td><strong>$ 11,685</strong></td>
</tr>
</tbody>
</table>

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

**Workforce Composition**

The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

**Collective Bargaining Agreements**

On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.
In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Employee Health Benefits**
Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**
For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in Compensation.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Thrift Savings Plan**
Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**
The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during,
or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.

Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>

</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**

We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.
Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions. Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

**Retiree Health Benefits**

We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBF has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBF the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBF unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBF amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBF normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBF unfunded liability.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.

**Workers' Compensation**

Our employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.
On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers’ compensation obligations, which are relatively predictable, from total workers’ compensation expense in order to determine the non-cash component of workers' compensation expense, a non-GAAP financial measure.

The following table presents the components of workers’ compensation expense, including the cash payments made by DOL on behalf of workers’ compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31, 2020</th>

</tr>
<tr>
<td>Total workers’ compensation non-cash expense</td>
<td>$ 2,625 $ 401</td>
<td>$ 2,092 $ 961</td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers’ compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not
include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Highway</td>
<td>$ 1,083</td>

<td>13</td>
<td>23</td>
<td>24</td>
</tr>
<tr>
<td><strong>Total transportation expenses</strong></td>
<td><strong>$ 2,008</strong></td>
<td><strong>$ 2,000</strong></td>
<td><strong>$ 4,405</strong></td>
<td><strong>$ 4,342</strong></td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.
Other Operating Expenses
Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

</tbody>
</table>

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of
operations and to prepare for unexpected contingencies. Much of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBH prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBH normal cost and amortization on PSRHBH, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

**CASH FLOW ANALYSIS**

**Operating Activities**
Cash provided by operating activities decreased $148 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

**Investing Activities**
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

**Financing Activities**
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

**DEBT**
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.
If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations.

On April 1, 2020, we drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the NPA. In order to comply with the annual net increase limit, we must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, we must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

LIQUIDITY OUTLOOK
We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - Retirement Plans. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees’ current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we will unlikely have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity to continue operating, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.
**PRC Ten-year Review**

In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC’s proposed changes to the system still do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any “true-up” authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020, and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant.

**2020 and Beyond**

Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

**Legally Required Obligations**

In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately $8.0 billion due on September 30, 2020, we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Capital Investments**

We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately $1.3 billion for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.
Mitigating Circumstances
We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

LEGISLATIVE, REGULATORY AND RELATED MATTERS

TASK FORCE ON THE UNITED STATES POSTAL SYSTEM
As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, “A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service.”

LEGISLATIVE UPDATE
As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors (“Board”) which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors (“Governors”). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

Legislation
Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the Families First Coronavirus Response Act, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 27, 2020, the President signed the CARES Act, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the Protect our Post Offices Act, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.
Postal Service Reform
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

Board of Governors Nominations
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee’s consideration.

FAIR VALUE MEASUREMENTS
As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS
As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES
The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS
See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.
We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

INTERNAL CONTROLS

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

_The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations._

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF
1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF
2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service (“Postal Service”);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;

4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting; and

5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

Washington, D.C. 20268-0001

FORM 10-Q

QUARTERLY REPORT PURSUANT TO 39 U.S.C. § 3654 AND SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended March 31, 2020

UNITED STATES POSTAL SERVICE
(Exact name of registrant as specified in its charter)

Washington, D.C. 41-0760000
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

475 L’Enfant Plaza, S.W.
Washington, D.C. 20260
(Address of principal executive offices) (ZIP Code)

(202) 268-2000
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐ Not Applicable ☑

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T ($232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐ Not Applicable ☑

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐
Smaller reporting company ☐ Emerging growth company ☐ Not applicable ☑

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☑

Securities registered pursuant to Section 12(b) of the Act:

NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both
interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>
<thead>
<tr>
<th>(in millions)</th>

</tr>
</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.

**Accounting Pronouncements Issued but not Adopted**

**Accounting Standards Update 2016-13 Financial Instruments - Credit Losses**

In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.
**Accounting Standards Update 2018-13 Fair Value Measurement**

In August 2018, the FASB issued Accounting Standards Update 2018-13 *Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement*, which has since been codified in ASC 820, *Fair Value Measurement* (“ASC 820”). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - *Fair Value Measurement*. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

**Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software**

In August 2018, the FASB issued Accounting Standards Update 2018-15 *Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement*, which has since been codified in ASC Subtopic 350-40, *Intangibles - Goodwill and Other - Internal-Use Software* (“ASC 350-40”). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

**NOTE 3 - LIQUIDITY**

The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.

**Cash**

The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - *Cash, Cash Equivalents and Restricted Cash* for further disclosures pertaining to cash.

The *Postal Reorganization Act*, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury.

**COVID-19 Considerations**

In March 2020, the World Health Organization declared a novel strain of coronavirus (“COVID-19”) a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The
Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However, the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service may require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

**Subsequent Events**

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

**Debt**

As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities with established terms and conditions by providing two days prior notice. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the Postal Service’s outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance that it could obtain alternative debt financing on comparable terms.
**Liquidity Concerns**

The Postal Service is constrained by laws and regulations, including the *Postal Accountability and Enhancement Act* ("PAEA"), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and health and benefits programs for employees and retirees, including the Federal Employees Health Benefit ("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in Note 9 - Retirement Plans. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund ("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred cumulative net losses of $83.1 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and its liquidity concerns, the Postal Service will unlikely have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

**Business Model Challenges and Constraints**

Market-Dominant services, which accounted for approximately 66% of the Postal Service’s annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service’s costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service’s universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in *First-Class Mail* are largely the result of changes in consumers' and businesses' use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, *Marketing Mail* volume has generally been challenged by commercial mailers' increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service’s Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets.
and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service’s network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, as a result of the temporary surge in e-commerce growth driven by the COVID-19 pandemic, some of these customers increased their volume to the Postal Service’s network during March 2020 due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers’ compensation programs. Some of these costs have historically increased at a higher rate than inflation.

Past Due Obligations
The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

<sup>1</sup> The 2012 to 2016 period amount includes $5.8 billion for 2016, $5.7 billion for 2015, $5.7 billion for 2014, $5.6 billion for 2013 and $11.1 billion for 2012.

<sup>2</sup> The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

Mitigating Circumstances
The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.
NOTE 4 - REVENUE RECOGNITION

The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).

Disaggregation of Revenue

The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

<table>

</tr>
</tbody>
</table>

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

Satisfaction of Performance Obligations

A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

*First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals* are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes *PO Box* services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, *Registered Mail*, Stamped Envelopes and Cards, Money Orders and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.
**Variable Consideration**
The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

**Contract Modifications**
The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

**Principal vs. Agent Consideration**
The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

**Contract Liabilities**
The vast majority of the Postal Service’s contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

¹ Included within Operating revenue in the accompanying unaudited Statements of Operations.
² Included within Operating expenses in the accompanying unaudited Statements of Operations.
³ Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.
⁴ Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.

NOTE 6 - CASH, CASH EQUIVALENTS AND RESTRICTED CASH
The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
<th>September 30, 2019</th>
<th>September 30, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash and cash equivalents</td>
<td>$ 8,987</td>
<td>$ 8,108</td>
<td>$ 8,795</td>
<td>$ 10,061</td>
</tr>
<tr>
<td>Restricted cash</td>
<td>472</td>
<td>546</td>
<td>366</td>
<td>275</td>
</tr>
<tr>
<td>Total cash, cash equivalents and restricted cash</td>
<td>$ 9,459</td>
<td>$ 8,654</td>
<td>$ 9,161</td>
<td>$ 10,336</td>
</tr>
</tbody>
</table>

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

NOTE 7 - PROPERTY AND EQUIPMENT, NET
Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.

For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.
NOTE 8 - COMMITMENTS AND CONTINGENCIES

**Collective Bargaining Agreements**
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Contingent Liabilities**
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.

**Provision for Losses**
The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>

</tr>
<tr>
<td><strong>Total contingent liabilities</strong></td>
<td><strong>$321</strong></td>
<td><strong>$336</strong></td>
</tr>
</tbody>
</table>

¹ Included within Payables and accrued expenses in the accompanying Balance Sheets.
² Included within Other noncurrent liabilities in the accompanying Balance Sheets.
**Reasonably Possible Contingencies**

The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

**Class Action Litigation**

As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission’s (“EEOC”) Office of Federal Operations (“OFO”) certified the case McConnell v. Brennan (first instituted in 2006 as McConnell v. Potter) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process (“NRP”) between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The McConnell case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP's failure to provide a reasonable accommodation, the NRP's wrongful disclosure of medical information, the NRP's creation of a hostile work environment, and the NRP's adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the McConnell case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.

The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

**Other**

The U.S. is a member of the Universal Postal Union (“UPU”), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as “terminal dues”.

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs (“CHF”), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in *Other assets* in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in *Payables and accrued expenses* and the noncurrent portion of the obligation is recorded in *Other noncurrent liabilities* in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.
NOTE 9 - RETIREMENT PLANS
The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees ("FERS-RAE"), or FERS - Further Revised Annuity Employees ("FERS-FRAE") depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Employee Contributions</td>
<td>Postal Service Contributions</td>
</tr>
<tr>
<td>CSRS</td>
<td>7.0%</td>
<td>—%</td>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

² Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

**FERS Normal Costs**

The Postal Service records expenses for FERS normal costs within *Retirement benefits* in the accompanying unaudited *Statements of Operations*.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within *Retirement benefits* in the accompanying *Balance Sheets*.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as *Retirement benefits* in the accompanying unaudited *Statements of Operations*. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.
The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

NOTE 10 - HEALTH BENEFITS PLANS
FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

Active Employees
The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

Retirees
Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutory and normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.
Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

² Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

**NOTE 11 - WORKERS’ COMPENSATION**

Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

**Workers’ Compensation Liability**

The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>

</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.
Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

**Lease Accounting Policies**

**Lease Accounting Policy for Comparative Periods**

As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expense.
expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

**Lease Accounting Policy for the Six Months Ended March 31, 2020**

The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancellable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.
NOTE 13 - FAIR VALUE MEASUREMENT

The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th></th>
<th>September 30, 2019</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable</td>
<td>$476</td>
<td>$584</td>
<td>$466</td>
<td>$516</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$11,000</td>
<td>$11,936</td>
<td>$11,000</td>
<td>$11,437</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, ("Annual Report") filed with the Postal Regulatory Commission ("PRC") on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our
Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act (“PAEA”) classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund (“PSRHBF”). We must coordinate with the U.S. Office of Personnel Management (“OPM”) to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY

The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.
**Effects of COVID-19**

In March 2020, the World Health Organization (“WHO”) declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits expenses.

On March 27, 2020, the President signed the *Coronavirus Aid, Relief, and Economic Security Act*, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.
Three Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $386 million, or 7.1%, with a volume growth of 12 million pieces, or 0.8%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 604 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers' compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management's control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management's control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

Six Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
- First-Class Mail revenue decrease of $79 million, or 0.6%, with a volume decline of 600 million pieces, or 2.1%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
• **Periodicals** revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $532 million, or 4.5%, despite a volume decline of 73 million pieces, or 2.2%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

• Workers’ compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
• Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
• Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

• Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
• Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

**Non-GAAP Controllable Loss**

In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHB actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>

</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHB retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

2 Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

3 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

4 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

</table>

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, First-Class Mail generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, First-Class Mail generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 33% of our revenue for the three months ended March 31, 2020, which was a 2% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers’ needs and have increased our investment in mail and package innovation. However, we also...
recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

Furthermore, due to the COVID-19 pandemic our First-Class Mail and Marketing Mail volumes began an accelerated decline in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

Our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail
First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers (“CPI-U”).

For the three months ended March 31, 2020, First-Class Mail revenue increased $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%, compared to the same period last year. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter. For the six months ended March 31, 2020, First-Class Mail revenue decreased $79 million, or 0.6%, and volume declined 600 million pieces, or 2.1%, compared to the same period last year. The change in revenue for both periods was less than the corresponding volume declines due to the January 2020 price increase applicable to certain Market-Dominant services. The most significant factor contributing to the
declining trend in First-Class Mail volume has been the continuing migration from mail to electronic communication and transaction alternatives.

Due to the COVID-19 pandemic, our First-Class Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on First-Class Mail revenue and volume.

Marketing Mail
USPS Marketing Mail (more commonly, Marketing Mail), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as First-Class Mail or Periodicals.

Between 2009 and 2016, Marketing Mail experienced relatively flat volume. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, Marketing Mail revenue decreased $94 million, or 2.5%, and volume declined 604 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, Marketing Mail revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our Marketing Mail volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our Marketing Mail revenue and volume.

Marketing Mail is subject to intense competition, and price increases are currently generally capped at the rate of inflation. Marketing Mail volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used Marketing Mail to mail to more targeted prospects.
**Shipping and Packages**

The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

$¹$ Includes *Priority Mail*, a 1-3 business day delivery service; *Priority Mail Express*, an overnight delivery service available 365 days per year; and *USPS Retail Ground*, a retail-only Competitive service priced identically and functionally equivalent to *Priority Mail for Zones* $¹-⁴$.

$²$ Includes *Parcel Select*, *Parcel Return*, and *Marketing Mail Parcels*.

$³$ Includes *First-Class Package Services - Retail* and *First-Class Package Services - Commercial*.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 7.1%, with a volume growth of 0.8%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.5%, despite a volume decline of 2.2%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

**Priority Mail Services**

Priority Mail Services is our Shipping and Packages subcategory that includes *Priority Mail*, *Priority Mail Express* and *USPS Retail Ground*. *Priority Mail* and *Priority Mail Express* services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 46% of the total for the three and six months ended March 31, 2020, and 2019. However, Priority
Mail Services accounted for approximately 19% and 18% of the total Shipping and Packages volume for three and six months ended March 31, 2020, respectively, essentially unchanged compared to the same periods last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 7.0%, on volume growth of 2.2%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 3.4%, despite a volume decline of 1.9%, compared to the same period last year. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**
Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.6%, on volume growth of 3.4%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.3%, despite a volume decline of 0.8%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**
Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 5.9%, despite a volume decline of 0.3%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 6.0%, despite a volume decline of 1.7%, compared to the same period last year. Revenue grew despite the volume declines, largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**
Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 5.2% on a volume decline of 10.7%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 5.3% on a volume decline of 11.1%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**
Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.
For the three months ended March 31, 2020, International Mail revenue increased 2.4%, despite a volume decline of 11.7%, compared to the same period last year. For the six months ended March 31, 2020, International Mail revenue increased 0.4%, despite a volume decline of 9.1%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union (“UPU”), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as “terminal dues”.

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked our provision to self-declare rates beginning in July 2020.

**Periodicals**

*Periodicals* also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, *Periodicals* revenue decreased 11.1% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, *Periodicals* revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

*Periodicals* revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The *Periodicals* category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as *Certified Mail*, *PO Box* services, and *Return Receipt* services. Also included in this category are money orders and passport services. Other services revenue decreased 1.2%, and 3.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management’s control.

We originally designed our mail processing and distribution network to provide overnight delivery service of *First-Class Mail* within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network’s legacy capabilities are not completely aligned to today’s mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%, and a further significant decline is expected in 2020.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in *Retirement benefits* and *Retiree Health Benefits*, respectively.
Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

**Workforce Composition**

The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

**Collective Bargaining Agreements**

On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.
In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO ("NALC"). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Employee Health Benefits**

Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits ("FEHB") Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**

For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in Compensation.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Thrift Savings Plan**

Career employees may participate in the Thrift Savings Plan ("TSP"), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**

The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during,
or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.

Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>

</tr>
</tbody>
</table>

\(^1\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

\(^2\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**

We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.
Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions. Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

**Retiree Health Benefits**

We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBF has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBF the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBF unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBF amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBF normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBF unfunded liability.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.

**Workers’ Compensation**

Our employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.
On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers’ compensation obligations, which are relatively predictable, from total workers’ compensation expense in order to determine the non-cash component of workers' compensation expense, a non-GAAP financial measure.

The following table presents the components of workers’ compensation expense, including the cash payments made by DOL on behalf of workers’ compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>

<td><strong>$961</strong></td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers’ compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not
include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>Three Months Ended March 31, 2020</th>
<th>Six Months Ended March 31, 2020</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>
<td>2019</td>
</tr>
<tr>
<td>Highway</td>
<td>$1,083</td>
<td>$1,100</td>
</tr>
<tr>
<td>Air</td>
<td>773</td>
<td>744</td>
</tr>
<tr>
<td>International</td>
<td>141</td>
<td>143</td>

<tr>
<td>Other</td>
<td>11</td>
<td>13</td>
</tr>
<tr>
<td>Total transportation expenses</td>
<td>$2,008</td>
<td>$2,000</td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.
Other Operating Expenses
Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

</tr>
</tbody>
</table>

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of
operations and to prepare for unexpected contingencies. Much of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBF prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBF normal cost and amortization on PSRHBF, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

CASH FLOW ANALYSIS

Operating Activities
Cash provided by operating activities decreased $148 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

Investing Activities
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

Financing Activities
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

DEBT
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.
If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations.

On April 1, 2020, we drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the NPA. In order to comply with the annual net increase limit, we must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, we must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility's interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

LIQUIDITY OUTLOOK

We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - Retirement Plans. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we will unlikely have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity to continue operating, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.
**PRC Ten-year Review**

In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC’s proposed changes to the system still do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any "true-up" authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020, and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: [https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant](https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant).

**2020 and Beyond**

Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

**Legally Required Obligations**

In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately $8.0 billion due on September 30, 2020, we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Capital Investments**

We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately $1.3 billion for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.
Mitigating Circumstances
We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

LEGISLATIVE, REGULATORY AND RELATED MATTERS

TASK FORCE ON THE UNITED STATES POSTAL SYSTEM
As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, "A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service."

LEGISLATIVE UPDATE
As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors ("Board") which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors ("Governors"). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

Legislation
Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the Families First Coronavirus Response Act, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 27, 2020, the President signed the CARES Act, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the Protect our Post Offices Act, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.
Postal Service Reform
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

Board of Governors Nominations
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee’s consideration.

FAIR VALUE MEASUREMENTS
As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS
As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES
The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS
See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.
We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

INTERNAL CONTROLS

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations.

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

Postmaster General and Chief Executive Officer  
Date: May 7, 2020

/s/Joseph Corbett  
Joseph Corbett  
Chief Financial Officer and Executive Vice President  
Date: May 7, 2020
I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service ("Postal Service");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;

4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting; and

5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

Date: May 7, 2020

CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF
1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF
2002.

I, Joseph Corbett, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service ("Postal Service");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;

4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:

   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting; and

5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:

   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and

   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

Washington, D.C. 20268-0001

FORM 10-Q

QUARTERLY REPORT PURSUANT TO 39 U.S.C. § 3654 AND SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended March 31, 2020

UNITED STATES POSTAL SERVICE
(Exact name of registrant as specified in its charter)

Washington, D.C. 41-0760000
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

475 L’Enfant Plaza, S.W.
Washington, D.C. 20260
(Address of principal executive offices) (ZIP Code)

(202) 268-2000
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐ Not Applicable ☑

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐ Not Applicable ☑

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐
Smaller reporting company ☐ Emerging growth company ☐ Not applicable ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☑

Securities registered pursuant to Section 12(b) of the Act:

NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both
interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.

**Accounting Pronouncements Issued but not Adopted**

**Accounting Standards Update 2016-13 Financial Instruments - Credit Losses**

In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.
Accounting Standards Update 2018-13 Fair Value Measurement
In August 2018, the FASB issued Accounting Standards Update 2018-13 Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement, which has since been codified in ASC 820, Fair Value Measurement (“ASC 820”). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - Fair Value Measurement. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software
In August 2018, the FASB issued Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement, which has since been codified in ASC Subtopic 350-40, Intangibles - Goodwill and Other - Internal-Use Software (“ASC 350-40”). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

NOTE 3 - LIQUIDITY
The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.

Cash
The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - Cash, Cash Equivalents and Restricted Cash for further disclosures pertaining to cash.

The Postal Reorganization Act, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury.

COVID-19 Considerations
In March 2020, the World Health Organization declared a novel strain of coronavirus (“COVID-19”) a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The
Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However, the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service may require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

**Subsequent Events**

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

**Debt**

As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities with established terms and conditions by providing two days prior notice. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the Postal Service's outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance that it could obtain alternative debt financing on comparable terms.
**Liquidity Concerns**
The Postal Service is constrained by laws and regulations, including the *Postal Accountability and Enhancement Act* ("PAEA"), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and health and benefits programs for employees and retirees, including the Federal Employees Health Benefit ("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in Note 9 - Retirement Plans. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund ("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred cumulative net losses of $83.1 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and its liquidity concerns, the Postal Service will unlikely have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

**Business Model Challenges and Constraints**
Market-Dominant services, which accounted for approximately 66% of the Postal Service’s annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service’s costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service’s universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in First-Class Mail are largely the result of changes in consumers' and businesses' use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, Marketing Mail volume has generally been challenged by commercial mailers' increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service’s Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets.
and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service’s network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, as a result of the temporary surge in e-commerce growth driven by the COVID-19 pandemic, some of these customers increased their volume to the Postal Service’s network during March 2020 due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers’ compensation programs. Some of these costs have historically increased at a higher rate than inflation.

**Past Due Obligations**
The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

² The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

**Mitigating Circumstances**
The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations.

The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.
NOTE 4 - REVENUE RECOGNITION

The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).

Disaggregation of Revenue

The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

<table>
<thead>
<tr>

<td><strong>$ 17,492</strong></td>
</tr>
</tbody>
</table>

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

Satisfaction of Performance Obligations

A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

**First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals** are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes **PO Box services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and other goods and services**. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.
**Variable Consideration**

The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

**Contract Modifications**

The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

**Principal vs. Agent Consideration**

The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

**Contract Liabilities**

The vast majority of the Postal Service’s contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

**NOTE 7 - PROPERTY AND EQUIPMENT, NET**

Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.

For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.
NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO ("NPMHU") on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO ("APWU"), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO ("NALC"). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.

Provision for Losses
The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>

</table>

1 Included within Payables and accrued expenses in the accompanying Balance Sheets.
2 Included within Other noncurrent liabilities in the accompanying Balance Sheets.
Reasonably Possible Contingencies
The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

Class Action Litigation
As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission's ("EEOC") Office of Federal Operations ("OFO") certified the case McConnell v. Brennan (first instituted in 2006 as McConnell v. Potter) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process ("NRP") between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The McConnell case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP's failure to provide a reasonable accommodation, the NRP's wrongful disclosure of medical information, the NRP's creation of a hostile work environment, and the NRP's adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the McConnell case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.

The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

Other
The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs ("CHF"), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in Other assets in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in Payables and accrued expenses and the noncurrent portion of the obligation is recorded in Other noncurrent liabilities in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.
NOTE 9 - RETIREMENT PLANS

The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (“FERS-RAE”), or FERS - Further Revised Annuity Employees (“FERS-FRAE”) depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Employee Contributions</td>
<td>Postal Service Contributions</td>
</tr>
<tr>
<td>CSRS</td>
<td>7.0%</td>
<td>—%</td>
</tr>
<tr>
<td>FERS</td>
<td>0.8%</td>

</tbody>
</table>

\(^1\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

\(^2\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

### FERS Normal Costs

The Postal Service records expenses for FERS normal costs within *Retirement benefits* in the accompanying unaudited *Statements of Operations*.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within *Retirement benefits* in the accompanying *Balance Sheets*.

### CSRS and FERS Unfunded Retirement Benefits

OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as *Retirement benefits* in the accompanying unaudited *Statements of Operations*. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.
The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

NOTE 10 - HEALTH BENEFITS PLANS
FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

Active Employees
The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

Retirees
Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.
Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

</tbody>
</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

² Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

**NOTE 11 - WORKERS’ COMPENSATION**

Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

**Workers’ Compensation Liability**

The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers' compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Compensation claims liability:</strong></td>

<td>1.07%</td>
<td>1.91%</td>
</tr>
<tr>
<td>Medical inflation rate</td>
<td>3.50%</td>
<td>2.50%</td>
</tr>
</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.
Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

Capital leases, recorded at historical cost within *Property and equipment, net* in the accompanying *Balance Sheets*, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the *Other operating expense* in the respective *Statements of Operations*.

**Lease Accounting Policies**

**Lease Accounting Policy for Comparative Periods**

As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within *Property and equipment, net* in the accompanying *Balance Sheets*.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in *Other operating
expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

**Lease Accounting Policy for the Six Months Ended March 31, 2020**

The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.
NOTE 13 - FAIR VALUE MEASUREMENT

The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable*</td>
<td>$476</td>
<td>$584</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$11,000</td>
<td>$11,936</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our...
Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act (“PAEA”) classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund (“PSRHBF”). We must coordinate with the U.S. Office of Personnel Management (“OPM”) to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY

The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.
Effects of COVID-19
In March 2020, the World Health Organization (“WHO”) declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits expenses.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.
Three Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $386 million, or 7.1%, with a volume growth of 12 million pieces, or 0.8%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 604 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers’ compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

Six Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
- First-Class Mail revenue decrease of $79 million, or 0.6%, with a volume decline of 600 million pieces, or 2.1%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
Periodicals revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $532 million, or 4.5%, despite a volume decline of 73 million pieces, or 2.2%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers' compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
- Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

- Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
- Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss

In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHB actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

2 Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

3 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

4 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, *First-Class Mail* generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. *Marketing Mail* generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, *First-Class Mail* generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. *Marketing Mail* generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 33% of our revenue for the three months ended March 31, 2020, which was a 2% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers' needs and have increased our investment in mail and package innovation. However, we also...
recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

Furthermore, due to the COVID-19 pandemic our First-Class Mail and Marketing Mail volumes began an accelerated decline in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

Our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail
First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers (“CPI-U”).

For the three months ended March 31, 2020, First-Class Mail revenue increased $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%, compared to the same period last year. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter. For the six months ended March 31, 2020, First-Class Mail revenue decreased $79 million, or 0.6%, and volume declined 600 million pieces, or 2.1%, compared to the same period last year. The change in revenue for both periods was less than the corresponding volume declines due to the January 2020 price increase applicable to certain Market-Dominant services. The most significant factor contributing to the
declining trend in *First-Class Mail* volume has been the continuing migration from mail to electronic communication and transaction alternatives.

Due to the COVID-19 pandemic, our *First-Class Mail* volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on *First-Class Mail* revenue and volume.

**Marketing Mail**

*USPS Marketing Mail* (more commonly, *Marketing Mail*), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as *First-Class Mail* or *Periodicals*.

Between 2009 and 2016, *Marketing Mail* experienced relatively flat volume. However, *Marketing Mail* volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, *Marketing Mail* continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, *Marketing Mail* revenue decreased $94 million, or 2.5%, and volume declined 604 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, *Marketing Mail* revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our *Marketing Mail* volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our *Marketing Mail* revenue and volume.

*Marketing Mail* is subject to intense competition, and price increases are currently generally capped at the rate of inflation. *Marketing Mail* volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used *Marketing Mail* to mail to more targeted prospects.
Shipping and Packages

The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

1 Includes Priority Mail, a 1-3 business day delivery service; Priority Mail Express, an overnight delivery service available 365 days per year; and USPS Retail Ground, a retail-only Competitive service priced identically and functionally equivalent to Priority Mail for Zones 1-4.
2 Includes Parcel Select, Parcel Return, and Marketing Mail Parcels.
3 Includes First-Class Package Services - Retail and First-Class Package Services - Commercial.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 7.1%, with a volume growth of 0.8%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.5%, despite a volume decline of 2.2%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

Priority Mail Services

Priority Mail Services is our Shipping and Packages subcategory that includes Priority Mail, Priority Mail Express and USPS Retail Ground. Priority Mail and Priority Mail Express services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 46% of the total for the three and six months ended March 31, 2020, and 2019. However, Priority
Mail Services accounted for approximately 19% and 18% of the total Shipping and Packages volume for three and six months ended March 31, 2020, respectively, essentially unchanged compared to the same periods last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 7.0%, on volume growth of 2.2%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 3.4%, despite a volume decline of 1.9%, compared to the same period last year. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**
Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.6%, on volume growth of 3.4%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.3%, despite a volume decline of 0.8%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**
Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 5.9%, despite a volume decline of 0.3%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 6.0%, despite a volume decline of 1.7%, compared to the same period last year. Revenue grew despite the volume declines, largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**
Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 5.2% on a volume decline of 10.7%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 5.3% on a volume decline of 11.1%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**
Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.
For the three months ended March 31, 2020, *International Mail* revenue increased 2.4%, despite a volume decline of 11.7%, compared to the same period last year. For the six months ended March 31, 2020, *International Mail* revenue increased 0.4%, despite a volume decline of 9.1%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked our provision to self-declare rates beginning in July 2020.

**Periodicals**

*Periodicals* also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, *Periodicals* revenue decreased 11.1% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, *Periodicals* revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

*Periodicals* revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The *Periodicals* category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as *Certified Mail*, *PO Box* services, and *Return Receipt* services. Also included in this category are money orders and passport services. Other services revenue decreased 1.2%, and 3.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management’s control.

We originally designed our mail processing and distribution network to provide overnight delivery service of *First-Class Mail* within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network’s legacy capabilities are not completely aligned to today’s mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%, and a further significant decline is expected in 2020.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in *Retirement benefits* and *Retiree Health Benefits*, respectively.
Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>

</tr>
</tbody>
</table>

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

**Workforce Composition**

The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

**Collective Bargaining Agreements**

On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.
In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Employee Health Benefits**

Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**

For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in Compensation.

The *CARES Act* offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Thrift Savings Plan**

Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**

The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during,
or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.

Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>

</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**
We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**
OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.
Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions. Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

Retiree Health Benefits
We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBF has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBF the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBF unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBF amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBF normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBF unfunded liability.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.

Workers’ Compensation
Our employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.
On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers’ compensation obligations, which are relatively predictable, from total workers' compensation expense in order to determine the non-cash component of workers' compensation expense, a non-GAAP financial measure.

The following table presents the components of workers’ compensation expense, including the cash payments made by DOL on behalf of workers’ compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

<td>(370)</td>
</tr>
<tr>
<td><strong>Total workers’ compensation non-cash expense</strong></td>
<td><strong>$2,625</strong></td>
<td><strong>$401</strong></td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers’ compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not
include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Highway</td>
<td>$1,083</td>
<td>$1,100</td>
<td>$2,504</td>
<td>$2,422</td>

<td>23</td>
<td>24</td>
</tr>
<tr>
<td><strong>Total transportation expenses</strong></td>
<td><strong>$2,008</strong></td>
<td><strong>$2,000</strong></td>
<td><strong>$4,405</strong></td>
<td><strong>$4,342</strong></td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.
**Other Operating Expenses**

Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31, 2020</th>
<th>Six Months Ended March 31, 2020</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supplies and services</td>

</tr>
<tr>
<td><strong>Total other operating expenses</strong></td>
<td><strong>$2,480</strong></td>
<td><strong>$5,016</strong></td>
</tr>
</tbody>
</table>

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

**LIQUIDITY AND CAPITAL RESOURCES**

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of
operations and to prepare for unexpected contingencies. Much of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBF prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBF normal cost and amortization on PSRHBF, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

CASH FLOW ANALYSIS

Operating Activities
Cash provided by operating activities decreased $148 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

Investing Activities
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

Financing Activities
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

DEBT
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.
If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations.

On April 1, 2020, we drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the NPA. In order to comply with the annual net increase limit, we must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, we must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

LIQUIDITY OUTLOOK
We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - Retirement Plans. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we will unlikely have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity to continue operating, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.
**PRC Ten-year Review**
In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC's proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC's proposed changes to the system still do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any "true-up" authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020, and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant.

**2020 and Beyond**
Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

**Legally Required Obligations**
In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately $8.0 billion due on September 30, 2020, we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Capital Investments**
We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately $1.3 billion for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.
Mitigating Circumstances
We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

LEGISLATIVE, REGULATORY AND RELATED MATTERS

TASK FORCE ON THE UNITED STATES POSTAL SYSTEM
As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, “A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service.”

LEGISLATIVE UPDATE
As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors ("Board") which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors ("Governors"). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

Legislation
Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the Families First Coronavirus Response Act, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 27, 2020, the President signed the CARES Act, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the Protect our Post Offices Act, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.
Postal Service Reform
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

Board of Governors Nominations
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee’s consideration.

FAIR VALUE MEASUREMENTS
As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS
As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES
The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS
See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.
We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

INTERNAL CONTROLS

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations.

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

Joseph Corbett  
Chief Financial Officer and Executive Vice President  
Date: May 7, 2020
CERTIFICATION PURSUANT TO RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service (“Postal Service”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;
4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting;
5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

UNITED STATES POSTAL REGULATORY COMMISSION  
Washington, D.C. 20268-0001  

FORM 10-Q  
QUARTERLY REPORT PURSUANT TO 39 U.S.C. § 3654 AND SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934  

For the Quarterly Period Ended March 31, 2020  

UNITED STATES POSTAL SERVICE  
(Exact name of registrant as specified in its charter)  

Washington, D.C. 41-0760000  
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)  
475 L’Enfant Plaza, S.W.  
Washington, D.C. 20260  
(Address of principal executive offices) (ZIP Code)  

(202) 268-2000  
(Registrant’s telephone number, including area code)  

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐ Not Applicable ☑  

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐ Not Applicable ☑  

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):  

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐  
Smaller reporting company ☐ Emerging growth company ☐ Not applicable ☑  

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐  

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☑  

Securities registered pursuant to Section 12(b) of the Act:

*See accompanying notes to the unaudited financial statements.*
NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both...
interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>
<thead>
<tr>
<th>(in millions)</th>

</tr>
</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.

**Accounting Pronouncements Issued but not Adopted**

**Accounting Standards Update 2016-13 Financial Instruments - Credit Losses**

In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.
**Accounting Standards Update 2018-13 Fair Value Measurement**

In August 2018, the FASB issued Accounting Standards Update 2018-13 *Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement*, which has since been codified in ASC 820, *Fair Value Measurement* (“ASC 820”). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - *Fair Value Measurement*. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

**Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software**

In August 2018, the FASB issued Accounting Standards Update 2018-15 *Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement*, which has since been codified in ASC Subtopic 350-40, *Intangibles - Goodwill and Other - Internal-Use Software* (“ASC 350-40”). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

**NOTE 3 - LIQUIDITY**

The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.

**Cash**

The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - *Cash, Cash Equivalents and Restricted Cash* for further disclosures pertaining to cash.

The *Postal Reorganization Act*, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury.

**COVID-19 Considerations**

In March 2020, the World Health Organization declared a novel strain of coronavirus (“COVID-19”) a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The
Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However, the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service may require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

Subsequent Events
The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

Debt
As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities with established terms and conditions by providing two days prior notice. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the Postal Service's outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance that it could obtain alternative debt financing on comparable terms.
Liquidity Concerns
The Postal Service is constrained by laws and regulations, including the *Postal Accountability and Enhancement Act* ("PAEA"), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and health and benefits programs for employees and retirees, including the Federal Employees Health Benefit ("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in Note 9 - Retirement Plans. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund ("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred cumulative net losses of $83.1 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and its liquidity concerns, the Postal Service will unlikely have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

Business Model Challenges and Constraints
Market-Dominant services, which accounted for approximately 66% of the Postal Service’s annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service’s costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service’s universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in *First-Class Mail* are largely the result of changes in consumers' and businesses' use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, *Marketing Mail* volume has generally been challenged by commercial mailers' increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service’s Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets.
and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service’s network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, as a result of the temporary surge in e-commerce growth driven by the COVID-19 pandemic, some of these customers increased their volume to the Postal Service’s network during March 2020 due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers’ compensation programs. Some of these costs have historically increased at a higher rate than inflation.

**Past Due Obligations**

The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

<table>

1 The 2012 to 2016 period amount includes $5.8 billion for 2016, $5.7 billion for 2015, $5.7 billion for 2014, $5.6 billion for 2013 and $11.1 billion for 2012.

2 The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

**Mitigating Circumstances**

The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.
NOTE 4 - REVENUE RECOGNITION

The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).

Disaggregation of Revenue

The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

<table>

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

Satisfaction of Performance Obligations

A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes PO Box services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.
Variable Consideration
The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

Contract Modifications
The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

Principal vs. Agent Consideration
The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

Contract Liabilities
The vast majority of the Postal Service’s contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

**NOTE 5 - RELATED PARTIES**

As disclosed throughout this report, the Postal Service has significant transactions with other U.S. government entities, which are considered related parties for accounting purposes.

The following table presents related-party assets and liabilities as of March 31, 2020, and September 30, 2019:

<table>
<thead>

1 Included within Operating revenue in the accompanying unaudited Statements of Operations.
2 Included within Operating expenses in the accompanying unaudited Statements of Operations.
3 Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.
4 Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.

NOTE 6 - CASH, CASH EQUIVALENTS AND RESTRICTED CASH
The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>

<td>$ 8,654</td>
<td>$ 9,161</td>
<td>$ 10,336</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

NOTE 7 - PROPERTY AND EQUIPMENT, NET
Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.

For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.
NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.

Provision for Losses
The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>

<td>$ 336</td>
</tr>
</tbody>
</table>

¹ Included within Payables and accrued expenses in the accompanying Balance Sheets.
² Included within Other noncurrent liabilities in the accompanying Balance Sheets.
Reasonably Possible Contingencies
The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

Class Action Litigation
As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission's ("EEOC") Office of Federal Operations ("OFO") certified the case McConnell v. Brennan (first instituted in 2006 as McConnell v. Potter) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process ("NRP") between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The McConnell case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP's failure to provide a reasonable accommodation, the NRP's wrongful disclosure of medical information, the NRP's creation of a hostile work environment, and the NRP's adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the McConnell case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.

The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

Other
The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs ("CHF"), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in Other assets in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in Payables and accrued expenses and the noncurrent portion of the obligation is recorded in Other noncurrent liabilities in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.
NOTE 9 - RETIREMENT PLANS

The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (“FERS-RAE”), or FERS - Further Revised Annuity Employees (“FERS-FRAE”) depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>

<td>240</td>
</tr>
<tr>
<td><strong>Total retirement benefits</strong></td>
<td><strong>$ 1,818</strong></td>
<td><strong>$ 1,470</strong></td>
</tr>
</tbody>
</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

² Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

**FERS Normal Costs**
The Postal Service records expenses for FERS normal costs within Retirement benefits in the accompanying unaudited Statements of Operations.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

**CSRS and FERS Unfunded Retirement Benefits**
OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as Retirement benefits in the accompanying unaudited Statements of Operations. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.
The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

**NOTE 10 - HEALTH BENEFITS PLANS**

FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

**Active Employees**

The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

**Retirees**

Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.
Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

</tbody>
</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

² Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

**NOTE 11 - WORKERS’ COMPENSATION**

Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act ("FECA"), administered by the U.S. Department of Labor’s ("DOL") Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

**Workers’ Compensation Liability**

The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Medical inflation rate</td>
<td>3.50%</td>
<td>2.50%</td>
</tr>
</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service's total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.
Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

</tbody>
</table>

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

Lease Accounting Policies

Lease Accounting Policy for Comparative Periods

As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expense.
expenses in the accompanying unaudited *Statements of Operations* on a straight-line basis over the term of the lease.

**Lease Accounting Policy for the Six Months Ended March 31, 2020**

The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within *Property and equipment, net* in the accompanying *Balance Sheets*. The current and noncurrent portions of finance lease liabilities are included within *Payables and accrued expenses* and *Other noncurrent liabilities*, respectively, within the accompanying *Balance Sheets*. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset’s fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, *Property, Plant, and Equipment - Overall*, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.
NOTE 13 - FAIR VALUE MEASUREMENT
The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable*</td>
<td>$476</td>
<td>$584</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$11,000</td>
<td>$11,936</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, (“Annual Report”) filed with the Postal Regulatory Commission ("PRC") on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our
Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus ("COVID-19") on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act ("PAEA") classifies our products into two broad categories: Market-Dominant and Competitive "products," however, we use the term "services" in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System ("CSRS") and the Federal Employee Retirement System ("FERS"), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund ("PSRHBF"). We must coordinate with the U.S. Office of Personnel Management ("OPM") to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY

The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.
Effects of COVID-19

In March 2020, the World Health Organization ("WHO") declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits expenses.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.
Three Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $386 million, or 7.1%, with a volume growth of 12 million pieces, or 0.8%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 604 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers’ compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

Six Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
- First-Class Mail revenue decrease of $79 million, or 0.6%, with a volume decline of 600 million pieces, or 2.1%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
• Periodicals revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $532 million, or 4.5%, despite a volume decline of 73 million pieces, or 2.2%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

• Workers’ compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
• Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
• Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

• Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
• Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss
In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHBF actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>

\(^1\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHB retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

\(^2\) Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

\(^3\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

\(^4\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, *First-Class Mail* generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. *Marketing Mail* generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, *First-Class Mail* generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. *Marketing Mail* generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 33% of our revenue for the three months ended March 31, 2020, which was a 2% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers’ needs and have increased our investment in mail and package innovation. However, we also...
recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

Furthermore, due to the COVID-19 pandemic our First-Class Mail and Marketing Mail volumes began an accelerated decline in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

Our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail

First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers ("CPI-U").

For the three months ended March 31, 2020, First-Class Mail revenue increased $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%, compared to the same period last year. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter. For the six months ended March 31, 2020, First-Class Mail revenue decreased $79 million, or 0.6%, and volume declined 600 million pieces, or 2.1%, compared to the same period last year. The change in revenue for both periods was less than the corresponding volume declines due to the January 2020 price increase applicable to certain Market-Dominant services. The most significant factor contributing to the
declining trend in First-Class Mail volume has been the continuing migration from mail to electronic communication and transaction alternatives.

Due to the COVID-19 pandemic, our First-Class Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on First-Class Mail revenue and volume.

Marketing Mail

USPS Marketing Mail (more commonly, Marketing Mail), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as First-Class Mail or Periodicals.

Between 2009 and 2016, Marketing Mail experienced relatively flat volume. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, Marketing Mail revenue decreased $94 million, or 2.5%, and volume declined 604 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, Marketing Mail revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our Marketing Mail volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our Marketing Mail revenue and volume.

Marketing Mail is subject to intense competition, and price increases are currently generally capped at the rate of inflation. Marketing Mail volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used Marketing Mail to mail to more targeted prospects.
Shipping and Packages

The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

</table>

\(^1\) Includes Priority Mail, a 1-3 business day delivery service; Priority Mail Express, an overnight delivery service available 365 days per year; and USPS Retail Ground, a retail-only Competitive service priced identically and functionally equivalent to Priority Mail for Zones 1-4.

\(^2\) Includes Parcel Select, Parcel Return, and Marketing Mail Parcels.

\(^3\) Includes First-Class Package Services - Retail and First-Class Package Services - Commercial.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 7.1%, with a volume growth of 0.8%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.5%, despite a volume decline of 2.2%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

**Priority Mail Services**

Priority Mail Services is our Shipping and Packages subcategory that includes Priority Mail, Priority Mail Express and USPS Retail Ground. Priority Mail and Priority Mail Express services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 46% of the total for the three and six months ended March 31, 2020, and 2019. However, Priority
Mail Services accounted for approximately 19% and 18% of the total Shipping and Packages volume for three and six months ended March 31, 2020, respectively, essentially unchanged compared to the same periods last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 7.0%, on volume growth of 2.2%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 3.4%, despite a volume decline of 1.9%, compared to the same period last year. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**

Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.6%, on volume growth of 3.4%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.3%, despite a volume decline of 0.8%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**

Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 5.9%, despite a volume decline of 0.3%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 6.0%, despite a volume decline of 1.7%, compared to the same period last year. Revenue grew despite the volume declines, largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**

Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 5.2% on a volume decline of 10.7%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 5.3% on a volume decline of 11.1%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**

Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.
For the three months ended March 31, 2020, *International Mail* revenue increased 2.4%, despite a volume decline of 11.7%, compared to the same period last year. For the six months ended March 31, 2020, *International Mail* revenue increased 0.4%, despite a volume decline of 9.1%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked our provision to self-declare rates beginning in July 2020.

**Periodicals**

*Periodicals*, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, *Periodicals* revenue decreased 11.1% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, *Periodicals* revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

*Periodicals* revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The *Periodicals* category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as *Certified Mail*, *PO Box* services, and *Return Receipt* services. Also included in this category are money orders and passport services. Other services revenue decreased 1.2%, and 3.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management's control.

We originally designed our mail processing and distribution network to provide overnight delivery service of *First-Class Mail* within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network's legacy capabilities are not completely aligned to today's mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%, and a further significant decline is expected in 2020.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in *Retirement benefits* and *Retiree Health Benefits*, respectively.
Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

</tbody>
</table>

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

**Workforce Composition**

The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

**Collective Bargaining Agreements**

On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO ("NPMHU") on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO ("APWU"), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.
In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Employee Health Benefits**

Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**

For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in **Compensation**.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Thrift Savings Plan**

Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**

The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during,
or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.

Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

<td>$ 1,818</td>
<td>$ 1,470</td>
</tr>
</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**

We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.
Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions. Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

**Retiree Health Benefits**
We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBF has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBF the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBF unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBF amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBF normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBF unfunded liability.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.

**Workers’ Compensation**
Our employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.
On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers’ compensation obligations, which are relatively predictable, from total workers’ compensation expense in order to determine the non-cash component of workers’ compensation expense, a non-GAAP financial measure.

The following table presents the components of workers’ compensation expense, including the cash payments made by DOL on behalf of workers’ compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31, 2020</th>
<th>Six Months Ended March 31, 2020</th>
</tr>
</thead>
<tbody>

<td>(703)</td>
</tr>
<tr>
<td><strong>Total workers’ compensation non-cash expense</strong></td>
<td><strong>$2,625</strong></td>
<td><strong>$2,092</strong></td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers’ compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not
include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>Three Months Ended March 31,</th>
<th>Six Months Ended March 31,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>

<td>11</td>
<td>13</td>
</tr>
<tr>
<td><strong>Total transportation expenses</strong></td>
<td><strong>$2,008</strong></td>
<td><strong>$2,000</strong></td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.
Other Operating Expenses

Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

<tr>
<td><strong>Total other operating expenses</strong></td>
<td><strong>$ 2,480</strong></td>
<td><strong>$ 2,356</strong></td>
</tr>
</tbody>
</table>

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of
operations and to prepare for unexpected contingencies. Much of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBF prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBF normal cost and amortization on PSRHBF, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

**CASH FLOW ANALYSIS**

**Operating Activities**
Cash provided by operating activities decreased $148 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

**Investing Activities**
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

**Financing Activities**
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

**DEBT**
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.
If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations.

On April 1, 2020, we drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the NPA. In order to comply with the annual net increase limit, we must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, we must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

LIQUIDITY OUTLOOK

We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - Retirement Plans. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees’ current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we will unlikely have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity to continue operating, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.
**PRC Ten-year Review**

In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC’s proposed changes to the system still do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any “true-up” authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020, and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant.

**2020 and Beyond**

Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

**Legally Required Obligations**

In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately $8.0 billion due on September 30, 2020, we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Capital Investments**

We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately $1.3 billion for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.
**Mitigating Circumstances**

We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

**LEGISLATIVE, REGULATORY AND RELATED MATTERS**

**TASK FORCE ON THE UNITED STATES POSTAL SYSTEM**

As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, “A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service.”

**LEGISLATIVE UPDATE**

As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors ("Board") which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors ("Governors"). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

**Legislation**

Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the Families First Coronavirus Response Act, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 27, 2020, the President signed the CARES Act, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the Protect our Post Offices Act, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.
Postal Service Reform
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

Board of Governors Nominations
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee’s consideration.

FAIR VALUE MEASUREMENTS

As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS

As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS

See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.
We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

INTERNAL CONTROLS

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations.

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

Date: May 7, 2020
CERTIFICATION PURSUANT TO 
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF 
1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 
2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service (“Postal Service”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;
4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting; and
5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO

In connection with the Quarterly Report of the United States Postal Service (“Postal Service”) on Form 10-Q for the period ended March 31, 2020, (the “Report”), I, Megan J. Brennan, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Postal Service.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO

In connection with the Quarterly Report of the United States Postal Service (“Postal Service”) on Form 10-Q for the period ended March 31, 2020, (the “Report”), I, Joseph Corbett, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Postal Service.

Dated: May 7, 2020

/s/ Joseph Corbett
Joseph Corbett
Chief Financial Officer and Executive Vice President
Significant outstanding items as of the date of this draft:

- Closed financials (currently reconciled with Prelims #2.0)
- RPW (reconciled with new quarterly RPW draft V1.1)
- Contingent liabilities
- Related party transactions
- Confirm no updates to PRC matters: Ten-year review and Institutional Cost case

Other outstanding items:

- Legislative Update - Initial draft is in.
- Other support
- Final formatting, page numbering, table of contents

Highlighting key:

- Yellow: Item or sentence requiring update, confirmation or third-party validation
- Green: Date, number or other reference that requires linking to master or support workbook in Wdesk
- Orange: Entire section awaiting update or third-party deliverable
- Purple: Linked number or reference that requires confirmation of source data
- Blue: Section or paragraph selected for elimination or move to another section; or
- Magenta: Internal comment for reviewers (to be removed when resolved)
UNITED STATES POSTAL REGULATORY COMMISSION
Washington, D.C. 20268-0001

FORM 10-Q

QUARTERLY REPORT PURSUANT TO 39 U.S.C. § 3654 AND SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended March 31, 2020

UNITED STATES POSTAL SERVICE
(Exact name of registrant as specified in its charter)

Washington, D.C. 41-0760000
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

475 L’Enfant Plaza, S.W.
Washington, D.C. 20260
(Address of principal executive offices) (ZIP Code)

(202) 268-2000
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☑ No ☐ Not Applicable ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐ Not Applicable ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐
Smaller reporting company ☐ Emerging growth company ☐ Not applicable ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☑

Securities registered pursuant to Section 12(b) of the Act:

NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both
interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>As reported on September 30, 2019</th>
<th>Adjustments</th>
<th>Balance on October 1, 2019</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.

**Accounting Pronouncements Issued but not Adopted**

**Accounting Standards Update 2016-13 Financial Instruments - Credit Losses**

In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service's valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.
Accounting Standards Update 2018-13 Fair Value Measurement

In August 2018, the FASB issued Accounting Standards Update 2018-13 Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement, which has since been codified in ASC 820, Fair Value Measurement (“ASC 820”). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - Fair Value Measurement. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software

In August 2018, the FASB issued Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement, which has since been codified in ASC Subtopic 350-40, Intangibles - Goodwill and Other - Internal-Use Software (“ASC 350-40”). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

NOTE 3 - LIQUIDITY

The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.

Cash

The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - Cash, Cash Equivalents and Restricted Cash for further disclosures pertaining to cash.

The Postal Reorganization Act, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury.

COVID-19 Considerations

In March 2020, the World Health Organization declared a novel strain of coronavirus (“COVID-19”) a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The
Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However, the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service may require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

**Subsequent Events**

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

**Debt**

As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities with established terms and conditions by providing two days prior notice. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the Postal Service's outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance that it could obtain alternative debt financing on comparable terms.
**Liquidity Concerns**

The Postal Service is constrained by laws and regulations, including the *Postal Accountability and Enhancement Act* ("PAEA"), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and health and benefits programs for employees and retirees, including the Federal Employees Health Benefit ("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in *Note 9 - Retirement Plans*. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund ("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in *Note 10 - Health Benefits Plans*, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred cumulative net losses of $83.1 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and its liquidity concerns, the Postal Service will unlikely have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

**Business Model Challenges and Constraints**

Market-Dominant services, which accounted for approximately 66% of the Postal Service’s annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service’s costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service’s universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in *First-Class Mail* are largely the result of changes in consumers’ and businesses’ use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, *Marketing Mail* volume has generally been challenged by commercial mailers’ increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service’s Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets.
and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service’s network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, as a result of the temporary surge in e-commerce growth driven by the COVID-19 pandemic, some of these customers increased their volume to the Postal Service’s network during March 2020 due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers’ compensation programs. Some of these costs have historically increased at a higher rate than inflation.

**Past Due Obligations**

The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

<table>

¹ The 2012 to 2016 period amount includes $5.8 billion for 2016, $5.7 billion for 2015, $5.7 billion for 2014, $5.6 billion for 2013 and $11.1 billion for 2012.

² The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

**Mitigating Circumstances**

The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.
NOTE 4 - REVENUE RECOGNITION
The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).

Disaggregation of Revenue
The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

<table>

</tbody>
</table>

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

Satisfaction of Performance Obligations
A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes PO Box services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.
Variable Consideration
The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

Contract Modifications
The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

Principal vs. Agent Consideration
The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

Contract Liabilities
The vast majority of the Postal Service’s contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

</table>

\(^1\) Included within Operating revenue in the accompanying unaudited Statements of Operations.
\(^2\) Included within Operating expenses in the accompanying unaudited Statements of Operations.
\(^3\) Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.
\(^4\) Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.

**NOTE 6 - CASH, CASH EQUIVALENTS AND RESTRICTED CASH**

The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
<th>September 30, 2019</th>
<th>September 30, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash and cash equivalents</td>
<td>$8,987</td>
<td>$8,108</td>
<td>$8,795</td>
<td>$10,061</td>
</tr>
<tr>
<td>Restricted cash</td>
<td>472</td>
<td>546</td>
<td>366</td>
<td>275</td>
</tr>
<tr>
<td><strong>Total cash, cash equivalents and restricted cash</strong></td>
<td><strong>$9,459</strong></td>
<td><strong>$8,654</strong></td>
<td><strong>$9,161</strong></td>
<td><strong>$10,336</strong></td>
</tr>
</tbody>
</table>

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

**NOTE 7 - PROPERTY AND EQUIPMENT, NET**

Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.

For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.
NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO ("NPMHU") on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO ("APWU"), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO ("NALC"). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.

Provision for Losses
The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>

</tr>
</tbody>
</table>

¹ Included within Payables and accrued expenses in the accompanying Balance Sheets.
² Included within Other noncurrent liabilities in the accompanying Balance Sheets.
Reasonably Possible Contingencies
The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

Class Action Litigation
As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission's ("EEOC") Office of Federal Operations ("OFO") certified the case McConnell v. Brennan (first instituted in 2006 as McConnell v. Potter) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process ("NRP") between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The McConnell case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP's failure to provide a reasonable accommodation, the NRP's wrongful disclosure of medical information, the NRP's creation of a hostile work environment, and the NRP's adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the McConnell case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.

The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

Other
The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs ("CHF"), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in Other assets in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in Payables and accrued expenses and the noncurrent portion of the obligation is recorded in Other noncurrent liabilities in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.
NOTE 9 - RETIREMENT PLANS

The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan ("TSP"), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees ("FERS-RAE"), or FERS - Further Revised Annuity Employees ("FERS-FRAE") depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
</tr>
</thead>

</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

**FERS Normal Costs**

The Postal Service records expenses for FERS normal costs within *Retirement benefits* in the accompanying unaudited *Statements of Operations*.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within *Retirement benefits* in the accompanying *Balance Sheets*.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as *Retirement benefits* in the accompanying unaudited *Statements of Operations*. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.
The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

NOTE 10 - HEALTH BENEFITS PLANS
FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

Active Employees
The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

Retirees
Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.
Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>

</tbody>
</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

² Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

NOTE 11 - WORKERS’ COMPENSATION
Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

Workers’ Compensation Liability
The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>

<td>1.07%</td>
<td>1.91%</td>
</tr>
<tr>
<td>Medical inflation rate</td>
<td>3.50%</td>
<td>2.50%</td>
</tr>
</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.
Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

Lease Accounting Policies

Lease Accounting Policy for Comparative Periods

As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expense.
expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

Lease Accounting Policy for the Six Months Ended March 31, 2020

The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.
NOTE 13 - FAIR VALUE MEASUREMENT
The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable*</td>
<td>$476</td>
<td>$584</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$11,000</td>
<td>$11,936</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our
Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act (“PAEA”) classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund (“PSRHBF”). We must coordinate with the U.S. Office of Personnel Management (“OPM”) to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY

The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.
Effects of COVID-19
In March 2020, the World Health Organization (“WHO”) declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits expenses.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.
Three Months Ended March 31, 2020
As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $386 million, or 7.1%, with a volume growth of 12 million pieces, or 0.8%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 604 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers’ compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

Six Months Ended March 31, 2020
As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
- First-Class Mail revenue decrease of $79 million, or 0.6%, with a volume decline of 600 million pieces, or 2.1%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
• Periodicals revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $532 million, or 4.5%, despite a volume decline of 73 million pieces, or 2.2%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

• Workers’ compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
• Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
• Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

• Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
• Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss
In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHB actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.
2 Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.
3 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.
4 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, First-Class Mail generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, First-Class Mail generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 33% of our revenue for the three months ended March 31, 2020, which was a 2% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers’ needs and have increased our investment in mail and package innovation. However, we also...
recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

Furthermore, due to the COVID-19 pandemic our First-Class Mail and Marketing Mail volumes began an accelerated decline in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

Our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail
First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers (“CPI-U”).

For the three months ended March 31, 2020, First-Class Mail revenue increased $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%, compared to the same period last year. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter. For the six months ended March 31, 2020, First-Class Mail revenue decreased $79 million, or 0.6%, and volume declined 600 million pieces, or 2.1%, compared to the same period last year. The change in revenue for both periods was less than the corresponding volume declines due to the January 2020 price increase applicable to certain Market-Dominant services. The most significant factor contributing to the
declining trend in First-Class Mail volume has been the continuing migration from mail to electronic communication and transaction alternatives.

Due to the COVID-19 pandemic, our First-Class Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on First-Class Mail revenue and volume.

Marketing Mail

USPS Marketing Mail (more commonly, Marketing Mail), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as First-Class Mail or Periodicals.

Between 2009 and 2016, Marketing Mail experienced relatively flat volume. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, Marketing Mail revenue decreased $94 million, or 2.5%, and volume declined 604 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, Marketing Mail revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our Marketing Mail volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our Marketing Mail revenue and volume.

Marketing Mail is subject to intense competition, and price increases are currently generally capped at the rate of inflation. Marketing Mail volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used Marketing Mail to mail to more targeted prospects.
Shipping and Packages
The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

1 Includes Priority Mail, a 1-3 business day delivery service; Priority Mail Express, an overnight delivery service available 365 days per year; and USPS Retail Ground, a retail-only Competitive service priced identically and functionally equivalent to Priority Mail for Zones 1-4.
2 Includes Parcel Select, Parcel Return, and Marketing Mail Parcels.
3 Includes First-Class Package Services - Retail and First-Class Package Services - Commercial.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 7.1%, with a volume growth of 0.8%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.5%, despite a volume decline of 2.2%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

Priority Mail Services
Priority Mail Services is our Shipping and Packages subcategory that includes Priority Mail, Priority Mail Express and USPS Retail Ground. Priority Mail and Priority Mail Express services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 46% of the total for the three and six months ended March 31, 2020, and 2019. However, Priority
Mail Services accounted for approximately 19% and 18% of the total Shipping and Packages volume for three and six months ended March 31, 2020, respectively, essentially unchanged compared to the same periods last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 7.0%, on volume growth of 2.2%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 3.4%, despite a volume decline of 1.9%, compared to the same period last year. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**

Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.6%, on volume growth of 3.4%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.3%, despite a volume decline of 0.8%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**

Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 5.9%, despite a volume decline of 0.3%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 6.0%, despite a volume decline of 1.7%, compared to the same period last year. Revenue grew despite the volume declines, largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**

Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 5.2% on a volume decline of 10.7%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 5.3% on a volume decline of 11.1%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**

Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.
For the three months ended March 31, 2020, *International Mail* revenue increased 2.4%, despite a volume decline of 11.7%, compared to the same period last year. For the six months ended March 31, 2020, *International Mail* revenue increased 0.4%, despite a volume decline of 9.1%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time:

In February 2020, we officially invoked our provision to self-declare rates beginning in July 2020.

**Periodicals**

*Periodicals*, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, *Periodicals* revenue decreased 11.1% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, *Periodicals* revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

*Periodicals* revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The *Periodicals* category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as *Certified Mail*, *PO Box* services, and *Return Receipt* services. Also included in this category are money orders and passport services. Other services revenue decreased 1.2%, and 3.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management’s control.

We originally designed our mail processing and distribution network to provide overnight delivery service of *First-Class Mail* within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network’s legacy capabilities are not completely aligned to today's mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%, and a further significant decline is expected in 2020.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in *Retirement benefits* and *Retiree Health Benefits*, respectively.
Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

</tbody>
</table>

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

**Workforce Composition**

The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

**Collective Bargaining Agreements**

On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.
In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Employee Health Benefits**

Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**

For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in Compensation.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Thrift Savings Plan**

Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**

The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during,
or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.

Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>

</tbody>
</table>

<sup>1</sup> Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM; to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

<sup>2</sup> Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM; to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**

We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.
Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions. Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

**Retiree Health Benefits**
We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBF has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBF the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBF unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBF amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBF normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBF unfunded liability.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.

**Workers’ Compensation**
Our employees injured on the job are covered by the Federal Employees’ Compensation Act ("FECA"), administered by the U.S. Department of Labor’s ("DOL") Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.
On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers' compensation can be managed through human resource initiatives, safety measures and training. Other workers' compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers' compensation obligations, which are relatively predictable, from total workers' compensation expense in order to determine the non-cash component of workers' compensation expense, a non-GAAP financial measure.

The following table presents the components of workers' compensation expense, including the cash payments made by DOL on behalf of workers' compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>

<td>$401</td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers' compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers' compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers' compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not
include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31,</th>
<th>Six Months Ended March 31,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>
<td>2019</td>
</tr>
<tr>

<td>11</td>
<td>13</td>
</tr>
<tr>
<td><strong>Total transportation expenses</strong></td>
<td><strong>$2,008</strong></td>
<td><strong>$2,000</strong></td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.
Other Operating Expenses

Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

<table>

</tr>
</tbody>
</table>

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of
operations and to prepare for unexpected contingencies. Much of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBFB prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBFB normal cost and amortization on PSRHBFB, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

**CASH FLOW ANALYSIS**

**Operating Activities**
Cash provided by operating activities decreased $148 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

**Investing Activities**
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

**Financing Activities**
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

**DEBT**
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.
If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations.

On April 1, 2020, we drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the NPA. In order to comply with the annual net increase limit, we must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, we must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

LIQUIDITY OUTLOOK

We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - Retirement Plans. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees’ current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we will unlikely have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity to continue operating, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.
In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC’s proposed changes to the system still do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any “true-up” authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020, and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant.

Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately $8.0 billion due on September 30, 2020, we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately $1.3 billion for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.
**Mitigating Circumstances**

We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

**LEGISLATIVE, REGULATORY AND RELATED MATTERS**

**TASK FORCE ON THE UNITED STATES POSTAL SYSTEM**

As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, “A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service.”

**LEGISLATIVE UPDATE**

As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors ("Board") which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors ("Governors"). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

**Legislation**

Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the Families First Coronavirus Response Act, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 27, 2020, the President signed the CARES Act, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the Protect our Post Offices Act, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.
Postal Service Reform
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

Board of Governors Nominations
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee’s consideration.

FAIR VALUE MEASUREMENTS
As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS
As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES
The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS
See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.
We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

**ITEM 4. CONTROLS AND PROCEDURES**

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

**DISCLOSURE CONTROLS**

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

**INTERNAL CONTROLS**

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations.

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

Joseph Corbett  
Chief Financial Officer and Executive Vice President  
Date: May 7, 2020
CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF
1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF
2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service (“Postal Service”);  
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;  
3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;  
4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;  
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;  
   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and  
   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting; and  
5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and  
   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO

In connection with the Quarterly Report of the United States Postal Service ("Postal Service") on Form 10-Q for
the period ended March 31, 2020, (the "Report"), I, Megan J. Brennan, certify, pursuant to 18 U.S.C. Section 1350,
as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange
Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition
and results of operations of the Postal Service.

Dated: May 7, 2020

Highlighting key:

- Yellow: Item or sentence requiring update, confirmation or third-party validation
- Green: Date, number or other reference that requires linking to master or support workbook in Wdesk
- Orange: Entire section awaiting update or third-party deliverable
- Purple: Linked number or reference that requires confirmation of source data
- Blue: Section or paragraph selected for elimination or move to another section; or
- Magenta: Internal comment for reviewers (to be removed when resolved)
UNITED STATES POSTAL SERVICE (Exact name of registrant as specified in its charter)

Washington, D.C. 41-0760000  
(State or other jurisdiction of incorporation or organization)  (I.R.S. Employer Identification No.)

475 L’Enfant Plaza, S.W.  
Washington, D.C. 20260  
(Address of principal executive offices)  (ZIP Code)

(202) 268-2000  
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.  Yes ☐ No ☐ Not Applicable ☑

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).  Yes ☐ No ☐ Not Applicable ☑

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

☐ Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐
☐ Smaller reporting company ☐ Emerging growth company ☐ Not applicable ☑

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.  ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  Yes ☐ No ☑

Securities registered pursuant to Section 12(b) of the Act:

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both
interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>

</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.

**Accounting Pronouncements Issued but not Adopted**

**Accounting Standards Update 2016-13 Financial Instruments - Credit Losses**

In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service's valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.
Accounting Standards Update 2018-13 Fair Value Measurement
In August 2018, the FASB issued Accounting Standards Update 2018-13 Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement, which has since been codified in ASC 820, Fair Value Measurement (“ASC 820”). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - Fair Value Measurement. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software
In August 2018, the FASB issued Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement, which has since been codified in ASC Subtopic 350-40, Intangibles - Goodwill and Other - Internal-Use Software (“ASC 350-40”). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

NOTE 3 - LIQUIDITY
The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.

Cash
The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - Cash, Cash Equivalents and Restricted Cash for further disclosures pertaining to cash.

The Postal Reorganization Act, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury.

COVID-19 Considerations
In March 2020, the World Health Organization declared a novel strain of coronavirus (“COVID-19”) a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The
Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However, the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service may require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

Subsequent Events
The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

Debt
As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities with established terms and conditions by providing two days prior notice. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the Postal Service’s outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance that it could obtain alternative debt financing on comparable terms.
**Liquidity Concerns**

The Postal Service is constrained by laws and regulations, including the *Postal Accountability and Enhancement Act* ("PAEA"), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and health and benefits programs for employees and retirees, including the Federal Employees Health Benefit ("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in Note 9 - Retirement Plans. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund ("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred cumulative net losses of $83.1 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and its liquidity concerns, the Postal Service will unlikely have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

**Business Model Challenges and Constraints**

Market-Dominant services, which accounted for approximately 66% of the Postal Service’s annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service’s costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service’s universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in *First-Class Mail* are largely the result of changes in consumers' and businesses' use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, *Marketing Mail* volume has generally been challenged by commercial mailers' increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service’s Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets.
and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service’s network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, as a result of the temporary surge in e-commerce growth driven by the COVID-19 pandemic, some of these customers increased their volume to the Postal Service’s network during March 2020 due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers’ compensation programs. Some of these costs have historically increased at a higher rate than inflation.

**Past Due Obligations**
The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

</tbody>
</table>

¹ The 2012 to 2016 period amount includes $5.8 billion for 2016, $5.7 billion for 2015, $5.7 billion for 2014, $5.6 billion for 2013 and $11.1 billion for 2012.

² The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

**Mitigating Circumstances**
The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.
NOTE 4 - REVENUE RECOGNITION
The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).

Disaggregation of Revenue
The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

Satisfaction of Performance Obligations
A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes PO Box services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.
**Variable Consideration**  
The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

**Contract Modifications**  
The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

**Principal vs. Agent Consideration**  
The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

**Contract Liabilities**  
The vast majority of the Postal Service’s contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

**NOTE 5 - RELATED PARTIES**

As disclosed throughout this report, the Postal Service has significant transactions with other U.S. government entities, which are considered related parties for accounting purposes.

The following table presents related-party assets and liabilities as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>

</table>

1 Current portion within Receivables, net and noncurrent portion within Other assets in the accompanying Balance Sheets.
2 Amount includes right-of-use assets for operating leases with the General Services Administration ("GSA").
3 Included within Other assets in the accompanying Balance Sheets. See further discussion in Note 13 - Fair Value Measurement.
4 Amount includes liabilities for operating leases with the GSA.
5 Amounts include CSRS, FERS, PSRHB and current workers' compensation obligations as well as payables to other agencies.
6 Amounts include noncurrent workers' compensation obligations.
The following table presents related-party revenue and expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31</th>
<th>Six Months Ended March 31</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

1 Included within Operating revenue in the accompanying unaudited Statements of Operations.
2 Included within Operating expenses in the accompanying unaudited Statements of Operations.
3 Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.
4 Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.

**NOTE 6 - CASH, CASH EQUIVALENTS AND RESTRICTED CASH**

The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
<th>September 30, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash and cash equivalents</td>
<td>$8,987</td>
<td>$8,108</td>
<td>$10,061</td>
</tr>
<tr>
<td>Restricted cash</td>
<td>472</td>

<td>275</td>
</tr>
<tr>
<td>Total cash, cash equivalents and restricted cash</td>
<td>$9,459</td>
<td>$8,654</td>
<td>$10,336</td>
</tr>
</tbody>
</table>

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

**NOTE 7 - PROPERTY AND EQUIPMENT, NET**

Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.

For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.
NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO ("NPMHU") on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO ("APWU"), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO ("NALC"). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.

Provision for Losses
The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>

<td>$ 336</td>
</tr>
</tbody>
</table>

¹ Included within Payables and accrued expenses in the accompanying Balance Sheets.
² Included within Other noncurrent liabilities in the accompanying Balance Sheets.
**Reasonably Possible Contingencies**
The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

**Class Action Litigation**
As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission's ("EEOC") Office of Federal Operations ("OFO") certified the case McConnell v. Brennan (first instituted in 2006 as McConnell v. Potter) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process ("NRP") between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The McConnell case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP's failure to provide a reasonable accommodation, the NRP's wrongful disclosure of medical information, the NRP's creation of a hostile work environment, and the NRP's adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the McConnell case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.

The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

**Other**
The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs ("CHF"), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in *Other assets* in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in *Payables and accrued expenses* and the noncurrent portion of the obligation is recorded in *Other noncurrent liabilities* in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.
NOTE 9 - RETIREMENT PLANS

The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (“FERS-RAE”), or FERS - Further Revised Annuity Employees (“FERS-FRAE”) depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Employee</td>
<td>Postal Service</td>
</tr>
<tr>
<td></td>
<td>Contributions</td>
<td>Contributions</td>
</tr>
<tr>
<td>CSRS</td>
<td>7.0%</td>

<td>240</td>
</tr>
<tr>
<td><strong>Total retirement benefits</strong></td>
<td><strong>$ 1,818</strong></td>
<td><strong>$ 1,470</strong></td>
</tr>
</tbody>
</table>

\(^1\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

\(^2\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

**FERS Normal Costs**

The Postal Service records expenses for FERS normal costs within Retirement benefits in the accompanying unaudited Statements of Operations.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as Retirement benefits in the accompanying unaudited Statements of Operations. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.
The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

**NOTE 10 - HEALTH BENEFITS PLANS**

FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

**Active Employees**

The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

**Retirees**

Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree's length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.
Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>

</tbody>
</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHB F retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

² Expense for the accrual for the annual payment due to the PSRHB F by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

NOTE 11 - WORKERS’ COMPENSATION
Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act ("FECA"), administered by the U.S. Department of Labor’s ("DOL") Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

Workers’ Compensation Liability
The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>

<td>1.07%</td>
<td>1.91%</td>
</tr>
<tr>
<td>Medical inflation rate</td>
<td>3.50%</td>
<td>2.50%</td>
</tr>
</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

Workers’ Compensation Expense
The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

NOTE 12 - LEASES

Postal Service Leases
The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.
Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

</table>

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

Lease Accounting Policies

Lease Accounting Policy for Comparative Periods

As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expense.
expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

**Lease Accounting Policy for the Six Months Ended March 31, 2020**

The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.
NOTE 13 - FAIR VALUE MEASUREMENT

The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable</td>
<td>$476</td>
<td>$584</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$11,000</td>
<td>11,936</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our...
Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act (“PAEA”) classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund (“PSRHBF”). We must coordinate with the U.S. Office of Personnel Management (“OPM”) to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY

The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.
Effects of COVID-19

In March 2020, the World Health Organization (“WHO”) declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits expenses.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.
**Three Months Ended March 31, 2020**

As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $386 million, or 7.1%, with a volume growth of 12 million pieces, or 0.8%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 604 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers' compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management's control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

**Six Months Ended March 31, 2020**

As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
- First-Class Mail revenue decrease of $79 million, or 0.6%, with a volume decline of 600 million pieces, or 2.1%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
• Periodicals revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $532 million, or 4.5%, despite a volume decline of 73 million pieces, or 2.2%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

• Workers’ compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
• Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
• Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

• Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
• Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss
In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHBF actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>

\(^1\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHB retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

\(^2\) Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

\(^3\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

\(^4\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

</table>

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certifed Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, First-Class Mail generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, First-Class Mail generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 33% of our revenue for the three months ended March 31, 2020, which was a 2% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers' needs and have increased our investment in mail and package innovation. However, we also...
recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

Furthermore, due to the COVID-19 pandemic our First-Class Mail and Marketing Mail volumes began an accelerated decline in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

Our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail
First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers (“CPI-U”).

For the three months ended March 31, 2020, First-Class Mail revenue increased $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%, compared to the same period last year. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter. For the six months ended March 31, 2020, First-Class Mail revenue decreased $79 million, or 0.6%, and volume declined 600 million pieces, or 2.1%, compared to the same period last year. The change in revenue for both periods was less than the corresponding volume declines due to the January 2020 price increase applicable to certain Market-Dominant services. The most significant factor contributing to the
declining trend in First-Class Mail volume has been the continuing migration from mail to electronic communication and transaction alternatives.

Due to the COVID-19 pandemic, our First-Class Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on First-Class Mail revenue and volume.

**Marketing Mail**

*USPS Marketing Mail* (more commonly, *Marketing Mail*), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as First-Class Mail or Periodicals.

Between 2009 and 2016, *Marketing Mail* experienced relatively flat volume. However, *Marketing Mail* volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, *Marketing Mail* continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, *Marketing Mail* revenue decreased $94 million, or 2.5%, and volume declined 604 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, *Marketing Mail* revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our *Marketing Mail* volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our *Marketing Mail* revenue and volume.

*Marketing Mail* is subject to intense competition, and price increases are currently generally capped at the rate of inflation. *Marketing Mail* volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used *Marketing Mail* to mail to more targeted prospects.
**Shipping and Packages**

| **Total Shipping and Packages volume** | 1,484  | 1,472  | 3,221 | 3,294 |

1 Includes **Priority Mail**, a 1-3 business day delivery service; **Priority Mail Express**, an overnight delivery service available 365 days per year; and **USPS Retail Ground**, a retail-only Competitive service priced identically and functionally equivalent to Priority Mail for Zones 1-4.

2 Includes **Parcel Select**, **Parcel Return**, and **Marketing Mail Parcels**.

3 Includes **First-Class Package Services - Retail** and **First-Class Package Services - Commercial**.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 7.1%, with a volume growth of 0.8%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.5%, despite a volume decline of 2.2%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

**Priority Mail Services**

Priority Mail Services is our Shipping and Packages subcategory that includes **Priority Mail**, **Priority Mail Express** and **USPS Retail Ground**. **Priority Mail** and **Priority Mail Express** services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 46% of the total for the three and six months ended March 31, 2020, and 2019. However, Priority
Mail Services accounted for approximately 19% and 18% of the total Shipping and Packages volume for three and six months ended March 31, 2020, respectively, essentially unchanged compared to the same periods last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 7.0%, on volume growth of 2.2%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 3.4%, despite a volume decline of 1.9%, compared to the same period last year. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**

Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.6%, on volume growth of 3.4%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.3%, despite a volume decline of 0.8%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three-month period and despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**

Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 5.9%, despite a volume decline of 0.3%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 6.0%, despite a volume decline of 1.7%, compared to the same period last year. Revenue grew despite the volume declines, largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**

Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 5.2% on a volume decline of 10.7%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 5.3% on a volume decline of 11.1%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**

Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.
For the three months ended March 31, 2020, International Mail revenue increased 2.4%, despite a volume decline of 11.7%, compared to the same period last year. For the six months ended March 31, 2020, International Mail revenue increased 0.4%, despite a volume decline of 9.1%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked our provision to self-declare rates beginning in July 2020.

**Periodicals**

Periodicals, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, Periodicals revenue decreased 11.1% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, Periodicals revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

Periodicals revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The Periodicals category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as Certified Mail, PO Box services, and Return Receipt services. Also included in this category are money orders and passport services. Other services revenue decreased 1.2%, and 3.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management's control.

We originally designed our mail processing and distribution network to provide overnight delivery service of First-Class Mail within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network's legacy capabilities are not completely aligned to today's mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%, and a further significant decline is expected in 2020.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in Retirement benefits and Retiree Health Benefits, respectively.
Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>

<td><strong>$ 24,312</strong></td>
<td><strong>$ 24,383</strong></td>
</tr>
</tbody>
</table>

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

**Workforce Composition**

The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

**Collective Bargaining Agreements**

On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.
In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Employee Health Benefits**

Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**

For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in Compensation.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Thrift Savings Plan**

Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**

The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during,
or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.

Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<sup>1</sup> Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

<sup>2</sup> Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**
We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**
OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.
Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions. Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

**Retiree Health Benefits**

We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBF has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBF the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBF unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBF amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBF normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBF unfunded liability.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.

**Workers' Compensation**

Our employees injured on the job are covered by the Federal Employees' Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.
On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers’ compensation obligations, which are relatively predictable, from total workers’ compensation expense in order to determine the non-cash component of workers’ compensation expense, a non-GAAP financial measure.

The following table presents the components of workers’ compensation expense, including the cash payments made by DOL on behalf of workers’ compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>

<td>(370)</td>
</tr>
<tr>
<td><strong>Total workers’ compensation non-cash expense</strong></td>
<td><strong>$2,625</strong></td>
<td><strong>$401</strong></td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers’ compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not
include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31,</th>
<th>Six Months Ended March 31,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>
<td>2019</td>
</tr>
<tr>
<td>Highway</td>
<td>1,083</td>
<td>1,100</td>

<tr>
<td>Other</td>
<td>11</td>
<td>13</td>
</tr>
<tr>
<td><strong>Total transportation expenses</strong></td>
<td>$ 2,008</td>
<td>$ 2,000</td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.
Other Operating Expenses
Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

<table>

</tr>
</tbody>
</table>

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of...
operations and to prepare for unexpected contingencies. Much of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBF prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBF normal cost and amortization on PSRHBF, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

**CASH FLOW ANALYSIS**

**Operating Activities**
Cash provided by operating activities decreased $148 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

**Investing Activities**
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

**Financing Activities**
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

**DEBT**
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.
If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations.

On April 1, 2020, we drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the NPA. In order to comply with the annual net increase limit, we must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, we must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility's interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

**LIQUIDITY OUTLOOK**

We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - Retirement Plans. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we will unlikely have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity to continue operating, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.
**PRC Ten-year Review**

In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC's proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC's proposed changes to the system do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any "true-up" authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020, and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: [https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant](https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant).

**2020 and Beyond**

Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

**Legally Required Obligations**

In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately [$8.0 billion due on September 30, 2020](https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant), we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Capital Investments**

We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately [$1.3 billion](https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant) for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.
Mitigating Circumstances
We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

LEGISLATIVE, REGULATORY AND RELATED MATTERS

TASK FORCE ON THE UNITED STATES POSTAL SYSTEM
As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, “A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service.”

LEGISLATIVE UPDATE
As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors (“Board”) which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors (“Governors”). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

Legislation
Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the Families First Coronavirus Response Act, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 27, 2020, the President signed the CARES Act, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the Protect our Post Offices Act, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.
Postal Service Reform
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

Board of Governors Nominations
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee’s consideration.

FAIR VALUE MEASUREMENTS
As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS
As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES
The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS
See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.
We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

INTERNAL CONTROLS

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations.

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

Joseph Corbett
Chief Financial Officer and Executive Vice President

Date: May 7, 2020
CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF
1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF
2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service (“Postal Service”);

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;

4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting;

5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

Joseph Corbett
Chief Financial Officer and Executive Vice President
The Honorable Kevin McCarthy  
Republican Leader  
United States House of Representatives  
H-232, U.S. Capitol  
Washington, D.C. 20515

The Honorable Mitch McConnell  
Majority Leader  
United States Senate  
S-230, U.S. Capitol  
Washington, D.C. 20510

The Honorable Steven Mnuchin  
Secretary  
United States Department of Treasury  
1500 Pennsylvania Avenue NW  
Washington, D.C. 20220

Dear Leader McCarthy, Majority Leader McConnell, and Secretary Mnuchin:

As you consider legislative priorities in any upcoming stimulus packages to address the coronavirus (COVID-19) pandemic, we urge you to incorporate provisions that will address the needs of the U.S. Postal Service (USPS). Postal management believes that volume and revenue may drop by 50% due to COVID-19. Now is not the time to debate reforms to USPS but rather to provide much needed relief to keep this important service operational.

In March, USPS worked with the Centers for Disease Control and Prevention (CDC) to send a mailer with critical information about COVID-19 and recommendations for every American to prevent the spread of the virus. The Food and Drug Administration (FDA) is currently working on a self-testing nasal swab that must, once available, be efficiently delivered by the Postal Service to 135 million households across the country.

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act, P.L. 116-137) provided $10 billion to the Treasury Department’s Federal Finance Bank (FFB). The FFB has tried to impose operational changes to the Postal Service for years and these authorities were augmented in the CARES Act. USPS has not received a taxpayer appropriation (other than for military/overseas voting and free mail for the blind) since the 1980s but this current crisis warrants that change.

We ask that you consider including the following provisions:

1. A “public service” appropriation of at least $25 billion to the Postal Service to alleviate some of the strain caused by the pandemic.

2. An authorization for a continued “public service” appropriation for the difference between USPS revenue and expenses for the duration of this public health crisis.

3. A mechanism to reimburse the Postal Service for any COVID-19 related leave pay provided by the Families First Coronavirus Response Act (P.L. 116-127).

4. Ensure equal treatment for postal employees in any legislation that authorizes, and funds hazard pay for other front-line workers exposed to health risks related to the COVID-19 virus. Such
legislation should cover postal workers, who face heightened exposure risks to the virus on a daily basis.

Millions of Americans depend on the Postal Service throughout their daily lives but especially during the coronavirus pandemic USPS is serving an important role. Any interruption to service could be detrimental not only to USPS but also to our constituents across the country.

The Honorable Kevin McCarthy
Republican Leader
United States House of Representatives
H-232, U.S. Capitol
Washington, D.C. 20515

The Honorable Mitch McConnell
Majority Leader
United States Senate
S-230, U.S. Capitol
Washington, D.C. 20510

The Honorable Steven Mnuchin
Secretary
United States Department of Treasury
1500 Pennsylvania Avenue NW
Washington, D.C. 20220

Dear Leader McCarthy, Majority Leader McConnell, and Secretary Mnuchin:

As you consider legislative priorities in any upcoming stimulus packages to address the coronavirus (COVID-19) pandemic, we urge you to incorporate provisions that will address the needs of the U.S. Postal Service (USPS). Postal management believes that volume and revenue may drop by 50% due to COVID-19. Now is not the time to debate reforms to USPS but rather to provide much needed relief to keep this important service operational.

In March, USPS worked with the Centers for Disease Control and Prevention (CDC) to send a mailer with critical information about COVID-19 and recommendations for every American to prevent the spread of the virus. The Food and Drug Administration (FDA) is currently working on a self-testing nasal swab that must, once available, be efficiently delivered by the Postal Service to 135 million households across the country.

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act, P.L. 116-137) provided $10 billion to the Treasury Department’s Federal Finance Bank (FFB). The FFB has tried to impose operational changes to the Postal Service for years and these authorities were augmented in the CARES Act. USPS has not received a taxpayer appropriation (other than for military/overseas voting and free mail for the blind) since the 1980s but this current crisis warrants that change.

We ask that you consider including the following provisions:

1. A “public service” appropriation of at least $25 billion to the Postal Service to alleviate some of the strain caused by the pandemic.

2. An authorization for a continued “public service” appropriation for the difference between USPS revenue and expenses for the duration of this public health crisis.

3. A mechanism to reimburse the Postal Service for any COVID-19 related leave pay provided by the Families First Coronavirus Response Act (P.L. 116-127).

4. Ensure equal treatment for postal employees in any legislation that authorizes, and funds hazard pay for other front-line workers exposed to health risks related to the COVID-19 virus. Such
legislation should cover postal workers, who face heightened exposure risks to the virus on a daily basis.

Millions of Americans depend on the Postal Service throughout their daily lives but especially during the coronavirus pandemic USPS is serving an important role. Any interruption to service could be detrimental not only to USPS but also to our constituents across the country.

Sincerely,

Brian Fitzpatrick

General Counsel and
Executive Vice President

Date: May 4, 2020
To ________________:

Due to the impacts of the COVID-19 pandemic, the Postal Service anticipates that many voters will choose to use the mail to participate in upcoming elections, including the 2020 General Election in November. We would like to highlight some key aspects of the Postal Service’s delivery processes to allow you to educate your voters on what to expect when using the mail to vote. We would also highlight some additional recommendations that the Postal Service has regarding how to ensure the efficient and timely handling of Election Mail. These and other matters are discussed in Publication 632, *State and Local Election Mail – User’s Guide*. Publication 632 is attached to this letter, and is also available on our website at https://about.usps.com/election-mail/election-mail-resources.htm, which contains additional election-mail resources.

As an initial matter, the Postal Service offers a variety of mailing services that voters and election officials may utilize to transmit Election Mail (which includes ballots as well as registration cards, absentee-ballot applications, or polling-place notifications). The two main classes of mail that are used for Election Mail are First-Class Mail and USPS Marketing Mail, the latter of which includes the Nonprofit postage rate. These mail classes have different delivery standards and price ranges, and the eligibility for these mail classes depends on a range of requirements including the volume of a given mailing and the mailpiece’s contents, weight, and size. As a general matter, all election materials (including ballots) mailed from individual voters to state or local election officials must be sent by First-Class Mail, whereas some election materials mailed from state or local election officials to voters may be sent by either First-Class Mail or Marketing Mail.

It is important to note that First-Class Mail and Marketing Mail have different delivery standards. Most domestic First-Class Mail is delivered in 2-5 days. Most domestic Marketing Mail is delivered in 3-10 days. These ranges are based on the origin and destination of the mailpiece.

Even if your state law has more permissive deadlines, it is critical that these time periods be kept in mind when informing voters how to successfully participate in an election using the mail, and when state and local election officials are making decisions as to how to send a piece of Election Mail to voters. In particular, voters should be aware of these time periods when determining when to request that an absentee ballot be mailed to them, and when to mail the ballot back to elections officials. For example, if a state law requires completed ballots to be received by election officials by a specified date (such as Election Day) in order to be counted, you should be aware of the possibility that completed ballots mailed shortly before that date may not, in fact, arrive by the state’s deadline. Similarly, if a state law allows a qualified voter to request an absentee ballot shortly before Election Day and requires the state or local election official to mail that ballot to the voter, it is possible that the absentee ballot will not reach the voter before Election Day, depending on the date of the request.

The Postal Service is committed to the efficient and timely processing and delivery of Election Mail in accordance with our delivery standards, and we have developed labeling to provide greater visibility for these mailpieces during Postal Service handling, including the Official Election Mail logo, which is used on all Election Mail; and Tag 191, *Domestic and International Ballots*, which is used specifically for ballots. However, we cannot guarantee a specific delivery date or alter our standards to comport with individual state election laws. To account for our delivery standards and to allow for contingencies (e.g., weather issues or unforeseen events), we recommend that voters mail their marked return ballots at least 1 week before the due date.
established by state law. Similarly, for election materials (such as blank ballots) sent to voters from state or local election officials, we recommend that such officials use First-Class Mail and allow 1 week for delivery.

We also would like to emphasize that the Postal Service will continue to work closely with state and local election officials to ensure that their mailings are prepared and designed in a manner that comports with postal regulations and can be processed efficiently and cost-effectively. Mailpieces that do not adhere to the Postal Service’s requirements may experience longer processing times or other delivery problems. We have assigned election mail coordinators to each locality, and they stand ready to assist and consult with state and local officials concerning the logistics of their mailings and the services that are available, including the use of Intelligent Mail barcodes (which enable tracking of individual mailpieces within the Postal Service’s processing system). Also, mailpiece design analysts will assist election officials in designing and preparing envelopes that are consistent with postal regulations, will increase mailpiece visibility, and will allow officials to receive available postage discounts. To avoid incurring delivery delays and unnecessary costs, we strongly recommend that state and local election officials work with the Postal Service before designing and printing any mailpieces for use in elections to the extent possible.

The Postal Service is proud of our role as an important component of the nation’s democratic process and we remain committed to providing the resources needed to implement a successful election season.

March 23, 2020

Ms. Maria Bonner
Deputy Director
White House Domestic Policy Council
EOP Office of Policy Development
Washington, DC  20504-0002

Dear Deputy Director Bonner:

As a follow-up from our conversation on March 20, 2020, the Postal Service is committed to continuing to fulfill its role as a provider of essential government services, and to assist the Administration in whatever way we can during this national emergency. We are working closely with federal, state, and local authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public. However, we are concerned that the implementation of state and local government actions restricting commercial and personal activities in response to the Coronavirus Disease 2019 (COVID-19) pandemic will inadvertently interfere with operations. This letter provides information concerning the Postal Service’s status and our exemption from these state and local directives, as we are both a provider of essential services and part of the federal government.

Essential Government Service

The Postal Service’s role as a provider of essential government services under federal law is clear. The postal system is used to deliver, among other things, important governmental information and benefits, mail that is essential to the functioning of our economy, elections materials, and packages containing vital necessities. For instance, the Postal Service assists with elections, the Census, and the provision of government benefits, like social security checks. We deliver transactional mail that is essential to the financial services industry and other commercial firms. We deliver medications and other necessary purchases made online. We consistently and continually fulfill our essential function as set forth by statute and Administration policy.

We are mandated by statute to operate “as a basic and fundamental service provided to the people by the Government of the United States, authorized by the Constitution, created by an Act of Congress, and supported by the people.”1 39 U.S.C. §101(a). The Postal Service performs this role as “an independent establishment of the executive branch of the Government of the United States.”2 Pursuant to our statute, we are mandated to provide prompt, reliable, and efficient universal postal services throughout the United States.

In addition to this statutory mandate, the Postal Service carries out an essential function of the federal government and provides critical government services as part of the National Continuity Policy (established for national emergencies pursuant to Presidential Directive and implemented by FEMA).

---

2 Id. § 201.
Specifically, “the delivery of postal services to the American Public” is defined as a Primary Mission Essential Function necessary for the continuation of critical government services.³

As background, Presidential Policy Directive 40 established that “it is the policy of the United States to maintain a comprehensive and effective continuity capability through Continuity of Operations (COOP), Continuity of Government (COG), and Enduring Constitutional Government (ECG) programs, ensuring the resilience and preservation of government structure under the United States Constitution and the continuous performance of National Essential Functions (NEFs) under all conditions.”⁴ National Security Presidential Directive 51 then instructed Executive Departments and Agencies to identify and submit a list of Primary Mission Essential Functions (PMEFs) that the Department or Agency plans in support of the NEFs.⁵ PMEFs are those mission essential government functions that must be continuously performed in order to support or implement the uninterrupted performance of NEFs before, during, and in the aftermath of an emergency.⁶

In addition to the PMEF designation, “postal and shipping workers” are considered essential critical infrastructure workers, as defined in recent guidance issued by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency (CISA).⁷ In its guidance materials issued on March 19, 2020, CISA explained that promoting the ability of essential critical infrastructure workers “to continue to work during periods of community restriction, access management, social distancing, or closure orders/directives is crucial to community resilience and continuity of essential functions.”

White House Guidance further provides that if individuals work in a critical infrastructure industry, as defined by the Department of Homeland Security, they have a responsibility to maintain their normal work schedule, while following CDC guidance to protect individuals’ health at work.⁸

In addition to our employees, the Postal Service relies heavily on our contractors, suppliers, and industry partners. Contractors and suppliers support all aspects of our operations, including in the transportation and delivery of the mail. This network of contractors and suppliers are likewise critical to the provision of this essential function. In addition, our mailing and printing industry partners are vital because they print and mail the critical items that are sent through the mail, and hence ensure

---

³ See List of Validated PMEFs by Department/Agency (available at: https://www.dhs.gov/sites/default/files/publications/list_of_validated_pmefs_by_department_v2_fema.pdf).

that the government and businesses can access the mail. Our industry partners are also important in ensuring the efficiency of our package delivery network, through which we deliver vital necessities, including medicines and other goods. Moreover, the DHS guidance regarding essential critical infrastructure workers is not specific to the Postal Service, but rather extends to postal and shipping workers, including those in the private sector. We believe this reasonably includes our contractors, suppliers, and industry partners.

Given all of the above, we believe it is clear that the Postal Service is exempt from state and local ordinances restricting commercial and personal activities, and that this exemption should also apply as a general matter to our contractors and suppliers who are critical for our operations, and our industry partners who are printing, distributing, and entering items into the postal system. We are already seeing, however, that there is some confusion in the implementation of these ordinances. And the text of several such ordinances does not make clear that the Postal Service, and others in our supply chain, are excluded.

**Supremacy Clause**

The above conclusions are further buttressed by the Supremacy Clause of the United States Constitution, which otherwise limits the ability of state and local laws to affect the performance of federal functions. First, the "intergovernmental immunity" doctrine provides that states and localities are not allowed to directly regulate the actions of any arm of the federal government, unless the federal government clearly and unambiguously submits to state regulation. Second, the "preemption" doctrine provides that state and local laws are preempted by federal law if they seek to regulate an activity that is the subject of a comprehensive federal scheme, or would otherwise frustrate the achievement of the purposes and objectives of federal law.

The U.S. Constitution grants to Congress the enumerated power “to establish post offices and post roads,” a power which “embraces the regulation of the entire Postal System of the country.” As noted above, Congress has in turn established the U.S. Postal Service as an “independent establishment of the executive branch of the Government of the United States” to provide postal services throughout the Nation. To support this mission, Congress delegated to the Postal Service the power “to construct, operate, lease, and maintain buildings, facilities, equipment, and any improvements on any property owned or controlled by it.” Postal facilities serve the basic function

9 U.S. Const. art. 6, cl. 2 (“This Constitution, and the laws of the United States which shall be made in pursuance thereof . . . shall be the supreme law of the land; and the judges in every state shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.”); M’Culloch v. Maryland, 17 U.S. (4 Wheat.) 316, 406 (1819) (“The government of the United States, then, though limited in its powers, is supreme; and its laws, when made in pursuance of the constitution, form the supreme law of the land, ‘anything in the constitution or laws of any state to the contrary notwithstanding.’”)

10 Goodyear Atomic Corp. v. Miller, 486 U.S. 174, 180 (1988) (“It is well settled that the activities of federal installations are shielded by the Supremacy Clause from direct state regulation unless Congress provides ‘clear and unambiguous’ authorization for such regulation.”) (citations omitted).

11 U.S. Const. art. I, § 8, cl. 7.

10 Ex parte Jackson, 96 U.S. 727, 732 (1878).

13 39 U.S.C. § 201. See also id. § 101, 403.

of providing prompt, reliable, and efficient postal services nationwide, and must be maintained in “such character and in such locations, that postal patrons throughout the Nation will, consistent with reasonable economies of postal operations, have ready access to essential postal services.”

Congress also granted comprehensive powers to the Postal Service to direct and maintain its operations, including the right to enter into contracts, and broad personnel rights to hire its own employees and direct the performance of their duties and “to take whatever actions may be necessary to carry out its mission in emergency situations.”

In light of the clear congressional mandate that the Postal Service provide economical and efficient mail service on a nationwide basis – including during times of emergency – courts have consistently found that Congress intended the Postal Service to have broad immunity from state or local regulation. Where local regulation affecting Postal Service operations is inconsistent with postal regulations, courts will deem it to be preempted under the Supremacy Clause as “an unconstitutional obstacle to the accomplishment and execution of the full purposes and objectives of Congress.”

Thus, any state or local law purportedly directing postal employees to follow procedures inconsistent with Postal Service authority presents a clear conflict with federal law, which entrusts the Postal Service with the task of maintaining facilities and operations in accordance with federal law: “Where a postal worker is performing duties pursuant to federal law, a state cannot impose requirements that interfere with the performance of those duties.”

Moreover, the express authority allocated to the Postal Service to “operate” and “maintain” its facilities in the service of providing an efficient network of postal services on a nationwide basis and “to take whatever actions may be necessary to carry out its mission in emergency situations” “leaves no room” for state or local regulatory authority over health or safety matters and evidences a “federal interest . . . so dominant that the federal system will be assumed to preclude enforcement of state law

---

15 Id. §§ 101(a), 403(b)(3).
16 Id. § 401(3).
17 Id. § 1001(e) (“The Postal Service shall have the right, consistent with . . . applicable laws, regulations, and collective-bargaining agreements — (1) to direct officers and employees of the Postal Service in the performance of official duties; . . . (4) to maintain the efficiency of the operations entrusted to it; (5) to determine the methods, means, and personnel by which such operations are to be conducted; . . . and (7) to take whatever actions may be necessary to carry out its mission in emergency situations.”).
on the same subject.” Furthermore, the constitutional enumeration of the postal powers supports the supremacy of the federal interest in this field. Even where express preemption language is absent, any state or local law which “stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress”—such as a local determination to close a postal facility—would be impliedly preempted by conflict.

While it does not specifically invoke the Supremacy Clause, the Attorney General issued a memorandum to all United States Attorneys on March 20, 2020, in which he requested that they communicate with state and local law enforcement partners “to ensure that local law enforcement officials enforcing travel restrictions are aware of the fact that federal employees must be allowed to travel and commute to perform law enforcement and other functions and should not be prevented from doing so, even when travel restrictions are in place.” This is consistent with the fact that the state and local ordinances should not apply to the Postal Service as part of the federal government, even if we were not providing an essential service as defined by the relevant ordinance.

Finally, to the extent that state and local ordinances would impede the Postal Service’s functions, those ordinances are subject to the same preemption analysis regardless of whether the functions are performed by postal employees or contractors. This principle has already been applied to Postal Service contractors.

19 City of Pittsburg, Cal., 661 F.2d at 785 (citing Hines v. Davidowitz, 312 U.S. 52 (1941) (internal quotation marks omitted)). Courts have held this to be true even in the traditionally local area of public safety. City of Hollywood, 974 F.Supp. at 1465 & n.5 (noting in dicta that, public safety concerns being shared equally by both state and federal levels of government, the Postal Service’s interest in a uniform system of facility construction and design would be paramount).

20 City of Pittsburg, Cal., at 785-86 (holding that local criminal trespass ordinance conflicted with Postal Service regulations regarding the manner in which delivery employees performed their duties and was thus preempted by the “Congressional mandate to provide efficient mail delivery service”); cf. U.S. v. City of St. Louis, Branch 343, Nat. Ass’n of Letter Carriers, 597 F.2d 121 (8th Cir. 1979) (holding that a municipal ordinance prohibiting letter carriers from crossing the private property of patrons without their express or implied consent was permissible only because it did not conflict with the same Postal Service regulation).

23 See, e.g., Goodyear Atomic Corp. v. Miller, 486 U.S. 174, 181 (1988) (analyzing Hancock v. Train, 426 U.S. 167 (1976), as “establish[ing] that a federally owned facility performing a federal function is shielded from direct state regulation, even though the federal function is carried out by a private contractor, unless Congress clearly authorizes such regulation.”); United States v. California, 921 F.3d 865, 882 n.7 (9th Cir. 2019) (“For purposes of intergovernmental immunity, federal contractors are treated the same as the federal government itself.”) (citing Goodyear).

24 U.S. Postal Serv. v. Town of Greenwich, Conn., 901 F. Supp. 500, 507 (D. Conn. 1991) (“In the absence of such specific Congressional authorization, the Court finds that the state building code cannot be applied to the lessors of land to the Postal Service and to the contractors hired to construct postal facilities because it conflicts with federal law.”) (citing, inter alia, Hancock, Goodyear, and Leslie Miller).
Conclusion

As stated at the outset, we are committed to continuing to fulfill our role as a provider of essential government services, and we appreciate your consideration of this information. Thank you for your time last Friday and for any assistance you can provide to reinforce the conclusions of this memorandum.

In that regard, please let us know if you have any questions or if additional information would be helpful.

Sincerely,

Thomas J. Marshall
SUMMARY OF USPS-RELATED PROVISIONS OF TAKE RESPONSIBILITY FOR WORKERS & FAMILIES ACT (3/23 HOUSE DRAFT)

I. Appropriation

On page 53 of the draft bill, $20 billion would be appropriated to us “for revenue forgone due to the coronavirus pandemic.” That amount is “to remain available” through FY2022. This language raises two issues on which we could propose technical assistance:

- The “revenue forgone” purpose is too limiting, in the event that some party might later dispute whether we actually lost $20 billion in revenue due to the pandemic. Moreover, the impacts of the pandemic are not limited to revenue loss: we will also incur additional expenses. Hence, we would propose eliminating the phrase or (alternatively) expanding it to “revenue forgone and other impacts.”

- The FY2022 limitation would require us to separately track when these $20 billion are obligated, as opposed to our general revenues, which have no such time limitation. To avoid this administrative complication, we would propose changing the language to “remain available until expended.” This would treat these amounts consistent with the other amounts in the Postal Service Fund.

One issue raised last week concerned the application of § 251(b)(2)(A)(i) of the Balanced Budget and Emergency Deficit Control Act (BBEDCA) to this appropriation, which ordinarily requires a Congressional and a Presidential designation of an emergency appropriation. We had raised a concern with the Presidential designation language, as it could imply that the President could veto our appropriation: a level of control over our funding that he ordinarily does not have. The language of the new draft bill does away with the Presidential designation language and stipulates merely that Congress is designating the funds as an emergency requirement. (The draft bill uses the same approach for other agencies’ appropriations.) But the BBEDCA requirement for Presidential designation would remain operative, even if it is not explicitly invoked. To avoid the potential for Presidential control, we would propose expressly waiving the Presidential designation requirement.

It also appears that the drafters removed boilerplate language about the money having to be “in the Treasury [and] not otherwise appropriated.” We had raised concerns that this might be interpreted to give Treasury discretion over our access to the funds.
II. Borrowing

Section 140001 (page 725) would (1) cancel our outstanding debt; (2) authorize us to borrow $15 billion from Treasury, which Treasury would be required to lend to us; and (3) permanently abolish the $3 billion annual cap on borrowing.

The drafters do not appear to have addressed various concerns that we raised last week. To address those concerns, we would propose the following technical assistance:

- **Clarify that the cancelation of debt is “without penalty,”** to avoid Treasury charging us any pre-payment penalties.

- **Clarify that the $15 billion in new borrowing authority is additional to (not coextensive with) the $15 billion in normal borrowing authority.** While it’s not crystal clear, this appears to be the intent, but given that our available borrowing authority would simultaneously be restored to (also) $15 billion, the language is ambiguous.

- **Clarify that the recent note purchase agreement’s (NPA’s) terms would apply by default (unless we and Treasury agree on other terms).** The draft bill has no language on the terms of borrowing. Given that it also has no deadline for the new borrowing, the borrowing could be indefinitely tied up in negotiations over terms, along the lines of what we have experienced with Treasury in the last year. To forestall that, the bill should apply the recent NPA as a backdrop to any negotiations. We would also go a step further and apply the NPA by default to any borrowing from Treasury (including under the preexisting borrowing statute).

III. Operations (“Prioritization of Delivery…”)

Section 140002 (page 726) would:

a) **Require us to prioritize medical deliveries during the COVID-19 emergency.**

b) **Allow us to establish temporary alternative delivery points.**

c) **Allow us to “institute flexible delivery,”** which is rather amorphous, but which could be interpreted to mean a less-than-six-day delivery schedule, in the event operations or employees are impacted by the pandemic.

These provisions would therefore give the Postal Service temporary authority to enact operational changes to address the impact of the pandemic. The language is very broad, though ambiguous in some respects. For instance, “flexible delivery” is not defined, so disputes could arise.
IV. Other reforms

The draft bill does not include any other subjects covered by our proposal last week, which covered the following topics:

- Medicare integration;
- RHB prefunding repeal and vested liability;
- Interagency and intergovernmental agreements;
- Elimination of pension payments based on our prefunding level;
- Regulatory changes.

V. Financial services

In Division I under Financial Services, the Postal Service is to be used to help implement the “digital dollar wallets” providing emergency stimulus checks to individuals. Post Offices are to be used to help provide access and availability to application and account services for these digital wallets (page 323). We are also supposed to provide ATMs for access to those funds (page 324).

VI. Vote by mail

The vote-by-mail provisions are in Division L (pp. 643-705). The bill has potentially added more costs for the Postal Service through the designation of additional materials as “balloting materials,” which shall be delivered “free of postage” under 39 U.S.C. § 3406. We are entitled to reimbursement for the revenue forgone by operation of 39 U.S.C. § 3406, so the primary effect of these provisions is that they will likely raise our appropriations requests moving forward.

- The principal substantive concern with the bill is that it requires states to send blank ballots to voters who request them as late as 5 days (excluding weekends) before Election Day. For states who send out blank ballots by mail, this deadline will make delivery challenging, especially if Marketing Mail is used. However, the bill also appears to allow states to send blank ballots electronically, and provides that voters can download a ballot if they have not received their ballot within two days before the election, so the “5-day” deadline likely will not prevent voters from being able to cast a ballot. We could work with states to encourage use of FCM for voter requests that are submitted near Election Day, but it would be helpful in this regard if the “5 days” language were changed to “10 days” on p. 655.
• This potential timing problem will not impact the 2020 election. A separate provision states that, in the event of an emergency or disaster, the deadline above will not apply. Instead, state officials will transmit ballots 2 weeks before the election. The bill does not specify if this transmission needs to be by mail, so it is possible that state officials could send the ballots electronically (p. 655-656). This deadline also applies to the regularly scheduled general election for Federal office in November (p. 657). So, at least for this year, timing should not be an issue.

• The delivery of completed ballots by mail will not be a concern, as the bill provides that states must accept all ballots postmarked on or before Election Day.

• The bill requires states to implement a ballot tracking program, but does not require the use of an Intelligent Mail Barcode (IMb). This section does take effect for the November election, so states may be interested in using IMb to help in these efforts (although IMb cannot provide all the required information, such as whether a vote was counted).

• The bill creates a new section of Title 39 for absentee ballots for a federal election, which requires the ballot be carried expeditiously and with postage prepaid by the State or local government (p. 665-671). So, in effect, the cost of most mailed absentee ballots should by covered by the states rather than provided “postage free” by the Postal Service.

• However, some absentee ballots would fall within Section 3406 (and thus must be provided “postage free”). This would apply to ballots for voters who:

  o Are registered to vote and have requested an absentee ballot but not received it at least 2 days before the election;

  o Reside in an area where an emergency or public health emergency has been declared within 5 days of the election and have not requested an absentee ballot;

  o Are hospitalized or expect to be so on election day; or

  o Have a disability.

• The bill includes provisions relating to accommodations on Indian lands (p. 684), as well as new appropriations to the states and the Election Assistance Commissions.
VII. Leave

It appears that this version does not include provisions allowing the Office of Management and Budget to except certain federal employees from the new FMLA and emergency sick leave provisions enacted in the Families First Act last week. It also clarifies and expands aspects of the Families First Act (e.g., specifying that the emergency sick leave is supplemental to any existing sick leave policies).

VIII. Franked mail

This version maintains the Senate version’s language re: Franked Mail – excepting mailings “sent in response to or to address threats to life safety” from the mass mailings prohibition in 39 U.S.C. § 3210(a)(6)(D).
UNited states postal service
PAYMENT TO POSTAL SERVICE FUND

For payment to the “Postal Service Fund”, for revenue forgone due to the coronavirus pandemic, $20,000,000,000, to remain available until expended September 30, 2022. Provided, That such amount is designated by the Congress as being for an emergency requirement pursuant to section 251(b)(2)(A)(i) of the Balanced Budget and Emergency Deficit Control Act of 1985, without regard to any requirement for a Presidential designation under such section.

* * * * *

SEC. 140001. ELIMINATION OF USPS DEBT; ADDITIONAL BORROWING AUTHORITY.

(a) IN GENERAL.—Notwithstanding any other provision of law—

(1) any outstanding debt of the United States Postal Service owed to the Treasury pursuant to sections 2005 and 2011 of title 5, United States Code, on the date of the enactment of this Act is hereby cancelled, without penalty; and

(2) after the date of the enactment of this Act, the United States Postal Service is authorized to borrow money from the Treasury in an amount not to exceed $15,000,000,000 (in addition to any other borrowing in which the Postal Service is authorized to engage) to carry out the duties and responsibilities of the Postal Service, including those under title 39, United States Code, and the Secretary of the Treasury shall lend up to such amount at the request of the Postal Service.

(b) REPEAL OF FISCAL YEAR BORROWING LIMIT.—Section 2005(a)(1) of title 39, United States Code, is amended by striking “In any one fiscal year,” and all that follows through the period.

(c) TERMS OF BORROWING FROM THE TREASURY.—Any purchase by the Secretary of the Treasury of obligations issued by the Postal Service, either pursuant to subsection (a)(2) of this section or pursuant to section 2006 of title 39, United States Code, shall be subject to the terms and conditions of the note purchase agreement between the Postal Service and the Federal Financing Bank in effect on September 29, 2018 (subject to any modifications on which the Postal Service and the Secretary may mutually agree, pursuant to section 2006(a) of title 39, United States Code), except that no expiration date provided in such note purchase agreement shall apply.

SEC. 120003. EARLY VOTING AND VOTING BY MAIL

(a) REQUIREMENTS.—Title III of the Help America Vote Act of 2002 (52 U.S.C. 21081 et seq.) is amended by adding at the end the following new subtitle:
“Subtitle C—Other Requirements”

**SEC. 322. PROMOTING ABILITY OF VOTERS TO VOTE BY MAIL.**

**“(c) METHODS AND TIMING FOR TRANSMISSION OF BALLOTS AND BALLOTING MATERIALS TO VOTERS.—**

**“(2) ENSURING DELIVERY PRIOR TO ELECTION.—**If an individual requests to vote by absentee ballot in an election for Federal office, the appropriate State or local election official shall ensure that the ballot and relating voting materials are received by the individual prior to the date of the election so long as the individual’s request is received by the official not later than 510 days (excluding Saturdays, Sundays, and legal public holidays) before the date of the election, except that nothing in this paragraph shall preclude a State or local jurisdiction from allowing for the acceptance and processing of ballot requests submitted or received after such required period.”

Commented [BDC-WD7]: This change will give states adequate time to allow ballots to reach voters before Election Day.

Lori Rectanus  
Director, Physical Infrastructure Issues  
Government Accountability Office  

RE: U.S. Postal Service: Congressional Action to Enable a Sustainable Business Model Is Essential  
(Draft Report No. GAO-20-385)

Dear Ms. Rectanus:

On behalf of the United States Postal Service, this letter responds to your invitation to comment on the draft of the Government Accountability Office’s (GAO’s) audit report number GAO-20-385, which was transmitted to us for review on March 12.

Following the receipt of your draft report, the onset of the Coronavirus Disease 2019 (COVID-19) pandemic has had profound impacts both on the Nation, and the Postal Service. The pandemic has demonstrated the vital nature of the public services that the Postal Service performs, as Americans are being asked to shelter in place and to work from home. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people, and the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy. The postal sector is also part of the nation’s critical infrastructure. Every day, the men and women of the Postal Service accept, process, transport, and deliver vital mail and packages to all communities in the Nation, including important governmental information and benefits such as Census materials, social security checks, and materials advising the public on COVID-19; materials relating to elections, including ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing vital necessities, including medicines and other goods that sustain us that are purchased online.

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our universal service mission, the pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.

While short-term action by Congress is critical, the Postal Service’s financial situation has long been unsustainable due to a combination of declining mail volumes and an inflexible statutory and regulatory structure that limits our ability to reduce costs and increase revenue. Therefore, Congress must also adopt financial and/or structural reforms to our business model, in order to ensure the Postal Service’s long-term financial viability, as discussed in your report. As discussed below, we generally concur with your discussion of the structural challenges facing the Postal Service and the general policy options for addressing them, albeit with some clarifications.
As an initial matter, we concur with the National Bankruptcy Conference’s thorough legal analysis, which concludes that the Federal bankruptcy laws do not apply to the Postal Service as an entity of the Federal Government. We further agree that attempting to apply a bankruptcy-like legal process meaningfully to the Postal Service would face significant legal hurdles, given that the central flaws in our business model derive from statute. In this regard, bankruptcy is a process to address outstanding debts, not significant future liabilities caused by statutory obligations. To place the Postal Service on a sustainable footing requires not only addressing our unpaid past liabilities, but also, more fundamentally, reform of statutorily determined aspects of our business model. Therefore, as the National Bankruptcy Conference and GAO note (e.g., at page 36 of the draft report), “all roads for [restructuring the Postal Service’s existing and future obligations] lead back to Congress.”

The essential policy issues for Congress can be boiled down to two questions: what does Congress want the Postal Service to do, and how should those mandates be paid for? The former question requires Congress to consider, in particular, the level of universal postal service that is appropriate to meet the evolving needs of the American people (which is particularly important to consider in times like these), and the compensation and benefits structure that should apply to the men and women who provide that essential, fundamental service. The latter question requires Congress to consider how the costs incurred by the Postal Service should be funded, whether through the sale of postal products and services, taxpayer appropriations, or other sources.

Over the past decade, the Postal Service has aggressively pursued opportunities within its control to reduce costs and sustain revenue, some of which are discussed in your report. Yet those opportunities remain insufficient to close the current gap between our costs and revenues. The Postal Service has therefore advocated for financial and structural reforms to our business model to rebalance costs and revenue, and to sustain that balance going forward, by giving the Postal Service greater pricing and product flexibility and greater ability to reduce costs.

The central aspect of our proposal has been to rationalize our post-retirement benefits structure by ensuring that our retiree health benefits program is appropriately integrated with Medicare. As your report notes (on page 13 of the draft), most companies do not offer retiree health benefits, and the number that do has declined over time. What is not specifically mentioned in your report is that, for the minority of employers that do continue to offer a retiree health benefits program, the universal practice is to integrate that program with Medicare. Doing so would wipe out most of the Postal Service’s remaining retiree health benefits prefunding liability. While Medicare integration would shift some cost to Medicare, the increase would be very small when considering the Medicare program as a whole: it would increase Medicare spending by a small fraction of one percent. In addition, other options regarding our retirement benefits would not require taxpayer support, such as changes in liability calculation methods and diversified investment of fund assets.

Beyond these policy issues, GAO also recommends that Congress consider whether to retain the Postal Service’s status as an independent establishment, or to adopt a different institutional structure. We agree with GAO that this topic could logically be part of a comprehensive examination of the Postal Service’s business model by Congress. We understand the purpose of the GAO report is to not make any specific recommendations to Congress in this regard, but simply to lay out the various theoretical and practical effects of various possible institutional forms; our feedback on this matter was offered in the same spirit, and as a part of your intellectual exercise. Ultimately, Congress, with input from our Board of Governors and other interested stakeholders, would need to determine whether changing the Postal Service’s institutional structure is necessary or appropriate to ensure the continued provision of prompt, reliable, and efficient universal postal services to the American people.

Given Congress’s constitutional responsibility over postal services and the critical nature of the postal system to the functioning of the American economy and society, particularly in times like these, Congress would have to address the basic policy questions noted above regardless of whether the Postal Service remains an independent establishment or were recast in some other form. For example, even where
foreign postal operators have been privatized, they remain – uniquely among letter and package delivery providers in their countries – legally obligated to provide universal service under statutory and regulatory conditions that constrain their autonomy over rates and costs. In those countries, privatization processes have involved legislative decisions about service levels, revenue diversification, labor and employment laws, ratemaking authority, governmental assumption of costs (e.g., pension liabilities in Germany and the United Kingdom, as well as operation of the post office network in the United Kingdom), and other taxpayer support (e.g., tax exemptions in various countries, and £ 1.1 billion in appropriated modernization funding in the United Kingdom). The draft report notes that the same was true of the privatization of Conrail in this country. And even established private automobile manufacturers and airlines have required Federal assistance and legal reforms in order to continue operating, pursuant to Congress’s determination of the critical role of those industries in the American economy.

Hence, the core motivation of a sustainable postal service for the nation does not hinge on the provider’s institutional form. Rather, that motivation – and the attendant legislative support – should apply so long as Congress deems postal services necessary to the nation’s current and future needs. That said, it bears noting, when assessing how institutional form can affect institutional incentives, that a Government entity will necessarily prioritize the achievement of its service mission set forth in statute, while a privatized entity would have obligations to its shareholders.

At the same time, it should also be noted that (contrary to pages 34-35 of the draft report), institutional form in itself is not determinative regarding efficiency incentives. Although an independent establishment of the Executive Branch rather than a Government or private corporation, the Postal Service has long been recognized as at the forefront of postal operators – ahead of several cited in the draft report – in terms of operating efficiency. Many of the efficiency gains achieved by corporatized and privatized foreign postal operators in recent years essentially represent efforts to catch up to what the Postal Service has already done for decades (e.g., worksharing and automated delivery-point sequencing) or to keep pace with recent changes that the Postal Service began implementing before them (e.g., consolidation of its processing network and introduction of two-tier wage schedules). For example, the Postal Service was the first postal operator in the world to automate delivery sequencing (Royal Mail and La Poste followed more than a decade later). A change in institutional form is therefore clearly unnecessary to incent the Postal Service to be efficient. In that regard, we consider the drive to operate efficiently to be a part of the DNA of the Postal Service, and that would remain an inherent part of our culture irrespective of our institutional form. For that reason, we do not believe corporatization or privatization would somehow unlock new efficiency potential, or that a change in status to a fully or partially appropriated agency would result in disincentives for us to be efficient. Instead only reform in the laws governing Postal Service’s cost structure can do that, and they would do so whether or not the Postal Service remains an independent establishment or takes on a different form.

Thank you once again for providing us with the opportunity to comment. We would be pleased to assist your office with further information or discussion of this matter if you believe it would be helpful.

Sincerely,

Thomas J. Marshall
General Counsel & Executive Vice President

RE: U.S. Postal Service: Congressional Action to Enable a Sustainable Business Model Is Essential
(Draft Report No. GAO-20-385)

Dear Ms. Rectanus:

On behalf of the United States Postal Service, this letter responds to your invitation to comment on the draft of the Government Accountability Office’s (GAO’s) audit report number GAO-20-385, which was transmitted to us for review on March 12.

Following the receipt of your draft report, the onset of the Coronavirus Disease 2019 (COVID-19) pandemic has had profound impacts both on the Nation, and the Postal Service. The pandemic has demonstrated the vital nature of the public services that the Postal Service performs, as Americans are being asked to shelter in place and to work from home. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people, and the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy. The postal sector is also part of the nation’s critical infrastructure. Every day, the men and women of the Postal Service accept, process, transport, and deliver vital mail and packages to all communities in the Nation, including important governmental information and benefits such as Census materials, social security checks, and materials advising the public on COVID-19; materials relating to elections, including ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing vital necessities, including medicines and other goods that sustain us that are purchased online.

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our universal service mission, the pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.

While short-term action by Congress is critical, the Postal Service’s financial situation has long been unsustainable due to a combination of declining mail volumes and an inflexible statutory and regulatory structure that limits our ability to reduce costs and increase revenue. Therefore, Congress must also adopt financial and/or structural reforms to our business model, in order to ensure the Postal Service’s long-term financial viability, as discussed in your report. As discussed below, we generally concur with your discussion of the structural challenges facing the Postal Service and the general policy options for addressing them, albeit with some clarifications.

USPS-20-1215-A-004886
As an initial matter, we concur with the National Bankruptcy Conference’s thorough legal analysis, which concludes that the Federal bankruptcy laws do not apply to the Postal Service as an entity of the Federal Government. We further agree that attempting to apply a bankruptcy-like legal process meaningfully to the Postal Service would face significant legal hurdles, given that the central flaws in our business model derive from statute. In this regard, bankruptcy is a process to address outstanding debts, not significant future liabilities caused by statutory obligations. To place the Postal Service on a sustainable footing requires not only addressing our unpaid past liabilities, but also, more fundamentally, reform of statutorily determined aspects of our business model. Therefore, as the National Bankruptcy Conference and GAO note (e.g., at page 36 of the draft report), “all roads for [restructuring the Postal Service’s existing and future obligations] lead back to Congress.”

The essential policy issues for Congress can be boiled down to two questions: what does Congress want the Postal Service to do, and how should those mandates be paid for? The former question requires Congress to consider, in particular, the level of universal postal service that is appropriate to meet the evolving needs of the American people (which is particularly important to consider in times like these), and the compensation and benefits structure that should apply to the men and women who provide that essential, fundamental service. The latter question requires Congress to consider how the costs incurred by the Postal Service should be funded, whether through the sale of postal products and services, rates, taxpayer appropriations, or other sources.

Over the past decade, the Postal Service has aggressively pursued opportunities within its control to reduce costs and sustain revenue, some of which are discussed in your report. Yet those opportunities remain insufficient to close the current gap between our costs and revenues. The Postal Service has therefore advocated for financial and structural reforms to our business model to rebalance costs and revenue, and to sustain that balance going forward, by giving the Postal Service greater pricing and product flexibility and greater ability to reduce costs.

The central aspect of our proposal has been to rationalize our post-retirement benefits structure by ensuring that our retiree health benefits program is appropriately integrated with Medicare. As your report notes (on page 13 of the draft), most companies do not offer retiree health benefits, and the number that do has declined over time. What is not specifically mentioned in your report is that, for the minority of employers that do continue to offer a retiree health benefits program, the universal practice is to integrate that program with Medicare. Doing so would wipe out most of the Postal Service’s remaining retiree health benefits prefunding liability. While Medicare integration would shift some cost to Medicare, the increase would be very small when considering the Medicare program as a whole: it would increase Medicare spending by a small fraction of one percent. In addition, other options regarding our retirement benefits would not require taxpayer support, such as changes in liability calculation methods and diversified investment of fund assets.

Beyond these policy issues, GAO also recommends that Congress consider whether to retain the Postal Service’s status as an independent establishment, or to adopt a different institutional structure. We agree with GAO that this topic could logically be part of a comprehensive examination of the Postal Service’s business model by Congress. We understand the purpose of the GAO report is to not make any specific recommendations to Congress in this regard, but simply to lay out the various theoretical and practical effects of various possible institutional forms; our feedback on this matter was offered in the same spirit, and as a part of your intellectual exercise. Ultimately, Congress, with input from our Board of Governors and other interested stakeholders, would need to determine whether changing the Postal Service’s institutional structure is necessary or appropriate to ensure the continued provision of prompt, reliable, and efficient universal postal services to the American people.

Given Congress’s constitutional responsibility over postal services and the critical nature of the postal system to the functioning of the American economy and society, particularly in times like these, Congress would have to address the basic policy questions noted above regardless of whether the Postal Service remains an independent establishment or were recast in some other entity form. For example, even
where foreign postal operators have been privatized, they remain – uniquely among letter and package delivery providers in their countries – legally obligated to provide universal service under statutory and regulatory conditions that constrain their autonomy over rates and costs. In those countries, privatization processes have involved legislative decisions about service levels, revenue diversification, labor and employment laws, ratemaking authority, governmental assumption of costs (e.g., pension liabilities in Germany and the United Kingdom, as well as operation of the post office network in the United Kingdom), and other taxpayer support (e.g., tax exemptions in various countries, and £1.1 billion in appropriated modernization funding in the United Kingdom). The draft report notes that the same was true of the privatization of Conrail in this country. And even established private automobile manufacturers and airlines have required Federal assistance and legal reforms in order to continue operating, pursuant to Congress’s determination of those industries’ critical role in the American economy.

Hence, the core motivation of a sustainable postal service for the nation does not hinge on the provider’s institutional form. Rather, that motivation – and the attendant legislative support – should apply so long as Congress deems postal services necessary to the nation’s current and future needs. That said, it bears noting, when assessing how institutional form can affect institutional incentives, that a Government entity will necessarily prioritize the achievement of its service mission set forth in statute, while a privatized entity would have obligations to its shareholders.

At the same time, it should also be noted that (contrary to pages 34-35 of the draft report), institutional form in itself is not determinative regarding efficiency incentives. Although an independent establishment of the Executive Branch rather than a Government or private corporation, the Postal Service has long been recognized as at the forefront of postal operators – ahead of several cited in the draft report – in terms of operating efficiency. Many of the efficiency gains achieved by corporatized and privatized foreign postal operators in recent years essentially represent efforts to catch up to what the Postal Service has already done for decades (e.g., worksharing and automated delivery-point sequencing) or to keep pace with recent changes that the Postal Service began implementing before them (e.g., consolidation of its processing network and introduction of two-tier wage schedules). For example, the Postal Service was the first postal operator in the world to automate delivery sequencing (Royal Mail and La Poste followed more than a decade later). A change in institutional form is therefore clearly unnecessary to incent the Postal Service to be efficient.

In that regard, and particularly considering the highly competitive nature of the marketplace in which we operate for all of our products, we consider the drive to operate efficiently to be a part of the DNA of the Postal Service, and that would remain an inherent part of our culture irrespective of our institutional form. For that reason, we do not believe corporatization or privatization would somehow unlock new efficiency potential that the Postal Service purportedly lacks under the current structure; only reform in the laws governing Postal Service’s cost structure can do that, and they would do so whether or not the Postal Service remains an independent establishment. Finally, for the reasons noted above, we also do not believe that a change in our status to a more typical federal agency that is more reliant on appropriations fully or partially appropriated agency would result in disincentives for us to be efficient — instead only reform in the laws governing Postal Service’s cost structure can do that, and they would do so whether or not the Postal Service remains an independent establishment or takes on a different form.
Thank you once again for providing us with the opportunity to comment. We would be pleased to assist your office with further information or discussion of this matter if you believe it would be helpful.

Sincerely,

Thomas J. Marshall
General Counsel & Executive Vice President

SUBJECT: Additional Borrowing Authority Under the CARES Act

This memorandum examines the parameters for $10 billion in additional borrowing authority that Congress recently made available to the Postal Service in response to the ongoing Coronavirus Disease 2019 (“COVID-19”) outbreak.

EXECUTIVE SUMMARY

- The new borrowing authority can be accessed only if the Postal Service determines that additional liquidity is necessary to fund operating expenses due to the COVID-19 emergency. Various aspects of this threshold requirement are subject to interpretation: “operating expenses,” “due to,” the degree of necessity, and the timing of the financial need. Because the statute charges the Postal Service with determining necessity, we arguably have primary discretion to interpret and apply this aspect of the statute. In this regard, we have a clear basis to determine, based on our current forecasts concerning the impact of the COVID-19 outbreak on Postal Service volumes, revenues, and liquidity, that receiving this additional $10 billion in full is consistent with the language of the statute; we are therefore legally authorized to request the full amount at any time. Nevertheless, the consent role of the Treasury Department (“Treasury”) means that it could hold up borrowing if it disagrees with the Postal Service’s interpretation, or if it questions the assumptions that the Postal Service is using to make our determination.

- Treasury must agree to the terms and conditions of borrowing. In light of recent experience, Treasury could attempt to condition its assent on conditions that enhance its oversight over Postal Service business decisions, and that even intrude upon the Board’s and the Governors’ discretion to lead the Postal Service. As we have previously advised, such conditions would violate constitutional and statutory parameters. On the other hand, it is possible that the circumstances and scrutiny from Members of Congress could lead Treasury to take a more flexible approach, and our preliminary indications are that Treasury will not insist upon consent rights.
• Borrowing is limited to $10 billion. This limitation applies at all times; it cannot be temporarily exceeded so long as outstanding debt is returned to $10 billion later. Although we could attempt to access the borrowing authority repeatedly so long as we remain within the $10 billion limit, and Treasury could agree with that approach, the statutory language could also give Treasury (and other decision-makers) a reasonable basis to view the borrowing authority as being available only once.

• Under a reasonable interpretation of the statutory language, funds borrowed under the CARES Act cannot be used for capital expenses or to pay principal, interest, or fees on obligations issued under Title 39. Although there is no specific accounting or reporting requirement, Treasury or Congressional stakeholders could insist that the Postal Service demonstrate its compliance with the requirement that borrowed funds be used only for operating expenses.

ANALYSIS

On March 27, 2020, Congress enacted the Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”), Pub. L. No. 116-136. Section 6001(b) of the CARES Act permits the Postal Service to borrow up to $10 billion from the Department of the Treasury, separately from the $15 billion of borrowing authority already available to the Postal Service under 39 U.S.C. § 2005. This additional borrowing authority is subject to a number of conditions, however, the precise import of which are not immediately clear from the statutory text.¹

Section 6001(b) provides as follows:

(b) Additional borrowing authority.—Notwithstanding section 2005 of title 39, United States Code, or any other provision of law, if the Postal Service determines that, due to the COVID-19 emergency, the Postal Service will not be able to fund operating expenses without borrowing money—

(1) the Postal Service may borrow money from the Treasury in an amount not to exceed $10,000,000,000—

(A) to be used for such operating expenses; and

(B) which may not be used to pay any outstanding debt of the Postal Service; and

¹ Because the legislation was negotiated largely behind the scenes by Congressional leaders and the Secretary of the Treasury, there are no committee reports or other normal incidents of legislative history to serve as an interpretive aid. The few floor statements by individual Members of Congress that discuss the Postal Service provisions do so only in general terms, and therefore are of no probative value.
(2) the Secretary of the Treasury may lend up to the amount described in paragraph (1) at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

This provision plainly establishes at least four principal conditions: two prior to borrowing, one concerning the amount of borrowing, and one on the use of borrowed funds. The Postal Service must first determine that it needs to borrow money in order to fund operating expenses due to the COVID-19 emergency. And it must reach mutual agreement with Treasury over the terms and conditions of borrowing. The borrowing is limited to “an amount not to exceed” $10 billion. The borrowed moneys must be used only for “operating expenses,” which cannot include “paying any outstanding debt.” Each condition raises various questions of interpretation.

I. Postal Service Determination of Necessity to Fund Operating Expenses

Under the opening paragraph of Section 6001(b), prior to borrowing any funds, the Postal Service must first determine “that, due to the COVID-19 emergency, the Postal Service will not be able to fund operating expenses without borrowing money.” At least six aspects of this proviso are noteworthy.

First, the term “operating expenses” is not defined, but given the term’s usage in a related context, “operating expenses” should be construed as distinct from “capital expenses.” Specifically, the term “operating expenses” is used in the Postal Service’s longstanding borrowing statute. Currently, that provision caps the net increase in borrowing “for the purpose of capital improvements and . . . for the purpose of defraying operating expenses” at $3 billion per fiscal year. 39 U.S.C. § 2005(a). Prior to the enactment of the Postal Accountability and Enhancement Act of 2006 (PAEA), the same sentence set separate annual caps on borrowing used for capital expenses and for operating expenses ($2 billion and $1 billion, respectively). See 39 U.S.C. § 2005(a) (2005). Because Section 6001(b) of the CARES Act relates to the same subject matter as 39 U.S.C. § 2005(a) – a fact recognized by the express citation of the Title 39 provision in CARES Act Section 6001’s “notwithstanding” clause – it is reasonable to construe the two provisions in pari materia: that is, consonant with one another due to their related subject matter. See, e.g., Pasquantino v. United States, 544 U.S. 349, 355 n.2 (2005) (noting that wire- and mail-fraud statutes have been construed in pari materia); Nat’l Fed’n of Fed. Employees, Local 1309 v. Dep’t of Interior, 526 U.S. 86, 105 (1999); 2B Sutherland Statutes & Statutory Construction §§ 51:1-51:2, 53:2 (7th ed. 2020).

Under pre-PAEA 39 U.S.C. § 2005(a), the term “operating expenses” was understood by the Postal Service to mean all expenses other than capital expenses. “Operating expenses” therefore included not only expenses intuitively viewed as related to operations
(e.g., salaries and supplier costs), but also post-retirement benefits expenses and even interest expense on borrowed funds.  

Second, the borrowing of funds is conditioned on the Postal Service “not be[ing] able to fund operating expenses without borrowing money.” This implies that the additional borrowing authority is a true necessity: that is, the Postal Service must borrow money to continue funding its operating expenses, because the other available means of doing so will come up short. That said, access to the borrowing authority can precede an actual inability to fund operating expenses, as the relevant language is phrased in the future tense (“will not be able to fund”).

Third, “due to” is not defined. The plain meaning of this phrase is “because of”: there must be a causal relationship between the inability to fund operating expenses and the COVID-19 emergency. See U.S. Postal Serv. v. Postal Regulatory Comm’n, 640 F.3d 1263, 1267 (D.C. Cir. 2011) (construing “due to” in the statute authorizing exigent price increases). What is less clear is how close the causal nexus must be (and hence the level of proof that must be provided to substantiate that causal nexus). On that question, courts have recognized that “the phrase ‘due to’ is ambiguous. . . . The causal nexus of ‘due to’ has been given a broad variety of meanings in the law ranging from sole and proximate cause at one end of the spectrum to contributing cause at the other.” Id. at 1268 (quoting Kimber v. Thiokol Corp., 196 F.3d 1092, 1100 (10th Cir. 1999)) (brackets, internal quotation marks, and further citation omitted). Thus, it would certainly be possible to read Section 6001(b) as authorizing borrowing to the sole extent that financial strains can be specifically attributed to the COVID-19 emergency and that those strains overrun all other sources of funding. Cf. id. at 1267-68 (describing the Postal Regulatory Commission’s (Commission’s) initially strict application of “due to” in the exigency statute). But “due to” can mean ‘due in part to’ as well as ‘due only to.’ A financial crisis can often result from multiple contributing factors[]. It would not be incorrect to say that [a need for relief] is ‘due to’ [one] factor simply because it is also ‘due to’ other factors as well.

---

2 We are aware of at least two alternative uses of “operating expenses” in relation to the Postal Service. First, in the Postal Service’s periodic financial reports, “operating expenses” encompass all expenses (including depreciation on capital investments) other than interest expense. E.g., U.S. Postal Serv., FY2019 Form 10-K, at 24-39. Second, under the pre-PAEA provision that governed the Governors’ ratemaking authority, rates were required to cover “total estimated costs,” the definition of which, in turn, distinguished operating expenses from depreciation on capital investments, interest and other debt-related expense, and an amount for contingencies. 39 U.S.C. § 3621 (2005). Although an argument could be made for applying a different reading, the permanent borrowing statute (39 U.S.C. § 2005(a)) is clearly more directly relevant to the CARES Act’s borrowing provision than either periodic financial reporting or ratemaking.
Id. at 1268 (emphasis in original). Hence, in the Section 6001(b) context, it could be enough for the Postal Service to face an inability to fund operating expenses because of the COVID-19 emergency as well as other factors.³

Fourth, the inability to fund operating expenses must be “due to the COVID-19 emergency.” The “COVID-19 emergency” is expressly defined in relation to the President's declaration of a national emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. CARES Act § 6001(a)(1). Once the President has rescinded that emergency declaration, then the predicate condition for borrowing could be curtailed. More precisely, to access the CARES Act borrowing authority thereafter, the Postal Service would need to determine that the inability to fund operating expenses remains “due to” emergency conditions prior to rescission.

The Postal Service can certainly argue that, to the extent that mail volumes remain lower and/or costs remain higher at a given point in time than they would have been had the pandemic not occurred, such continuing effects are “due to” the pandemic, even if the emergency declaration has been rescinded. This would justify continued funding under this provision if these continuing effects mean that the Postal Service cannot fund operating expenses without borrowing. That said, assuming that Treasury cooperates in lending money during the COVID-19 emergency, it could decide to stop doing so earlier than the Postal Service believes to be warranted, if Treasury decides that the Postal Service’s inability to fund operating expenses is no longer “due to” the emergency. Such a prospect would resemble the Commission’s decision to truncate the amount of Great-Recession-era losses that the Postal Service was able to recover through an above-inflation rate increase. There, the Commission relied on the “due to” language in the exigency statute discussed above to establish a cut-off point, after which it would no longer deem mail-volume losses to be “due to” the Great Recession. The Commission based this cut-off point on a determination of when the Postal Service theoretically entered a “new normal,” based on macroeconomic indicators and when the Postal Service began to gain an “ability to adjust” its operations at the depth of the recession’s impact. See Order No. 1926, Order Granting

³ In USPS v. PRC, the court remanded the case to the Commission to interpret “due to” in the exigency statute. The Commission subsequently adopted a view close to the stricter end of the interpretive spectrum by requiring the Postal Service to quantify financial impacts attributable to the exigent circumstance rather than to other causes, although it granted that the quantification need not be absolutely precise. See generally Order No. 864, Order Resolving Issues on Remand, PRC Docket No. R2010-4R (Sept. 20, 2011). Key factors in the Commission’s reasoning were the Postal Service’s econometric resources, the scale of relief that it could seek (into the billions of dollars), and the fact that the exigency provision “is not intended as a remedial provision, but rather as a narrow exception to the price cap.” Id. at 44. In the context of borrowing under the CARES Act, the Postal Service’s resources and the scale of relief are comparable to what the Commission considered, and the additional borrowing authority could arguably (albeit not necessarily) be seen as a narrow exception to the Postal Service’s normal borrowing authority. That said, critical differences between the two contexts militate against applying the Commission’s logic here: the CARES Act’s “due to” language is to be applied by the Postal Service itself, not by an external oversight body, and borrowing money that must be repaid (with interest) – unlike a price increase – does not permanently affect any other party’s property interest.
Exigent Price Increase, PRC Docket No. R2013-11 (Dec. 24, 2013), at 83-94.\(^4\) Even if the Postal Service might assert that COVID-19 impacts persist beyond the emergency declaration’s rescission, Treasury, taking a page from the Commission’s book, could nonetheless point not only to the emergency’s formal end, but also impute (however unrealistically) to the Postal Service an “ability to adjust” that renders its inability to fund operating expenses no longer “due to” the emergency.

Fifth, another interpretative ambiguity is the relationship between the necessity determination and the actual amount of borrowing that the Postal Service may request. In particular, the statute requires that the Postal Service determine that we could not fund operating expenses due to the pandemic “without borrowing money,” but does not directly limit the size of the resulting request in any way other than by imposing a $10 billion cap. In this regard, the Postal Service could argue that so long as we demonstrate a need to borrow money, we can borrow the full $10 billion under the statute, and need not justify the precise amount requested within that overall cap. On the other hand, Treasury could argue that while the $10 billion is an overall cap, the statute also is most reasonably read to limit the size of a request to only what is strictly necessary to ensure that operating expenses are funded.

Sixth, all of this analysis is to be conducted as part of a determination by the Postal Service, but the scope of its actual discretion is unclear. Section 6001(b)(2) provides that Treasury “may” – not “must” – lend money requested by the Postal Service. Cf. 39 U.S.C. § 2006(b) (authorizing the Postal Service to “require the Secretary of the Treasury to purchase” up to $2 billion in Postal Service obligations). Treasury could point to this discretionary language as a basis to refuse to lend money on the basis that it disagrees with the Postal Service’s determination of need. As further support, Treasury could contrast the CARES Act language with an earlier House version of the bill, which would have required Treasury to lend moneys requested by the Postal Service. H.R. 6379, 116th Cong. § 140001(a)(2) (2020) (“[T]he Secretary of the Treasury shall lend up to such amount at the request of the Postal Service.”). This mandatory language was abandoned in favor of the discretionary language in the final bill. Given the intense negotiations between Congressional leaders and Treasury that produced the final CARES Act, as well as the attention that the Administration reportedly gave to the postal provisions, this result is almost surely meaningful, rather than accidental. In the end, even if the Postal Service is correct that we have discretion regarding the necessity determination as a legal matter, as a practical matter the Treasury could still refuse to provide the money for other reasons.

---

\(^4\) The Postal Service challenged this cut-off as arbitrary, as macroeconomic indicators did not necessarily correspond to mail-volume trends, and as it made little sense to cut off recovery at the depth of the losses, when the Postal Service had merely begun to adjust but had not yet adequately adjusted. These challenges were unsuccessful. See Alliance for Nonprofit Mailers v. Postal Regulatory Comm’n, 790 F.3d 186, 196 & n.3 (D.C. Cir. 2015); Order No. 2623, Order Resolving Issues on Remand, PRC Docket No. R2013-11R (July 29, 2015) (denying reconsideration), at 15-28, aff’d, U.S. Postal Serv. v. Postal Regulatory Comm’n, 841 F.3d 509 (D.C. Cir. 2016).
In the event that Treasury attempts to second-guess the Postal Service’s determination of need, the Postal Service could point to Congress’s express conferral on the Postal Service of discretion to determine need; if Congress had intended to subject that determination to Treasury’s oversight, it easily could have so provided. Given our recent experience with disagreements over statutory construction, it is possible that we would be unable to persuade Treasury of our interpretation, and resolution of any interagency dispute might ultimately lie with the Office of Legal Counsel (OLC) at the Department of Justice. To minimize the risk of a time-consuming and uncertain dispute, the Board would be well-advised to seek a common understanding with Treasury concerning this aspect of the statute.

While these interpretative issues present room for potential dispute with Treasury, the Postal Service does have a very strong argument that borrowing the full amount of the $10 billion is clearly necessary under the terms of the statute at this time. In this regard, our projections show that the Postal Service will experience a cash shortfall, and hence an inability to fund operating expenses, this calendar year unless the $10 billion is borrowed, and that we will need the full $10 billion to continue operations for as long as possible next fiscal year. This circumstance is a direct result of the precipitous declines in mail volumes that we forecast for Quarter 3 of FY2020, which would not have occurred but for the onset of the pandemic. Therefore, the Postal Service is legally authorized under the statute to request the full $10 billion at this time. While the above-mentioned interpretive issues may complicate our ability to utilize this funding source, we think that such issues are more likely to arise as time passes than they would if we seek these funds now, when the longer-term effects of the pandemic are unclear.

II. Treasury Agreement to Conditions

Under Section 6001(b)(2), any borrowing must be “upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.” As you know, in adopting this language, Congress declined our proposed alternative, which would have allowed for negotiation against a backdrop of default terms from the now-expired note purchase agreement. Without such a backdrop, Treasury could seek to reject our proposed terms and to propose terms that we would view as unlawful, inappropriate, or otherwise undesirable. (Indeed, Treasury’s insistence on such terms is what led to the expiration, rather than the renewal, of the note purchase agreement last year.)

Treasury might argue that, regardless of any disagreement concerning the appropriate terms and conditions of borrowing under Title 39, it has freer rein to propose such terms.

\[5\] The projections show the potential for a cash shortfall by October. However, as noted above, the statute arguably requires capital expenses to be excluded from the determination of necessity. The Postal Service’s projection assumes capital expenses of $2.0 billion over the rest of this fiscal year, and $2.5 billion for next fiscal year. If these capital expenses are excluded, the Postal Service would still experience a cash shortfall this calendar year.
conditions under the CARES Act. As OLC has recognized, the legislative history of the
Title 39 borrowing provision, as well as legislation establishing the Federal Financing Bank
enacted shortly thereafter, is replete with Treasury’s disavowals of any intent to interfere
with the Postal Service’s operational and business decisions. See Scope of Treasury
Department Purchase Rights with Respect to Financing Initiatives of the U.S. Postal
Service, 19 Op. Off. Legal Counsel 238, 245 n.5 (1995); Authority of the Secretary of the
Treasury Regarding Postal Service Bond Offering, 17 Op. Off. Legal Counsel 6, 8-10
(1993). By contrast, the CARES Act contains no such legislative history, and its additional
borrowing authority is expressly distinguished from, rather than subordinate to, the Title 39
borrowing provision. If anything, the contrast between the final CARES Act and the House
bill demonstrates that the “mutual agreement” requirement was intentionally added. See
H.R. 6379, 116th Cong. § 140001(a)(2) (containing no language about terms and
conditions).

That said, any attempt by Treasury to use even this borrowing authority to oversee or
second-guess the Governors’ and Board’s decisions would still vitiate Congress’s intent in
creating the Postal Service to be insulated from direct political control, and hence would
violate constitutional and statutory parameters in the same manner as its prior attempt to
impose such terms on our Title 39 borrowing. In this regard, the absence of any direct
legislative history is simply not a material legal consideration. For reference, I am attaching
our prior memorandum to the Board explaining these constitutional and statutory issues.

Our experience with non-renewal of the note purchase agreement shows that Treasury may
not be swayed by the legal bona fides of our position and may insist on inappropriate terms
regardless. In such an event, we may be able to seek a legal opinion from OLC supporting
our view. Alternatively, Congress clearly expected that Treasury would facilitate borrowing
under Section 6001(b), and any significant delay or lack of cooperation by Treasury could
become a subject of Congressional inquiry and oversight.

III. Amount of Borrowing

Section 6001(b)(1) provides that the borrowing shall be “in an amount not to exceed” $10
billion. In contrast to the Title 39 borrowing provisions, this language does not specify
whether the $10 billion limit applies to the amount of CARES Act borrowing “outstanding at
any one time” or only as of a certain point in time (e.g., the end of a fiscal year), such that
greater amounts can be borrowed so long as the outstanding amount is reduced by the cut-
off time. See 39 U.S.C. § 2005(a)(1) (containing both types of cap). Without further
qualification, however, a plain reading of “not to exceed” indicates that the $10 billion limit
applies at all times; the limit cannot be exceeded temporarily so long as it is met later.

A related question concerns whether the $10 billion is a cap similar to the $15 billion cap on
Title 39 borrowing, meaning that the Postal Service may access the borrowing authority
multiple times (with aggregate borrowing at any one time remaining within the limit), or
whether the statute only authorizes the provision of $10 billion in total. If the latter is true,
another question is whether this borrowing authority can only be accessed in a one-time loan, or if multiple loans are allowed.

Based on existing practice and the uncertain duration of the current emergency, the Postal Service could reasonably take the view that it can repeatedly borrow money within the $10 billion limit. It is possible, however, that Treasury (or OLC, in the event of a dispute) could interpret the CARES Act as providing for a provision of $10 billion in total. A contrast with the Title 39 provision shows that Congress had a template for making the limit apply to an aggregate amount of borrowing “outstanding at any time,” id., which it chose not to use in the CARES Act. This, coupled with the plain meaning of the CARES Act language, arguably indicates that Congress did not intend for the CARES Act borrowing limit to operate in the same manner as the $15 billion borrowing cap. It is also conceivable that Treasury could assert that the statute only authorizes a single loan, based on the fact that the statute refers to a singular “amount” of borrowing, and not a multiple “amount of obligations,” as in Section 2005, though this argument would be weaker.

Ultimately, this question only becomes relevant if we attempt to access the CARES Act borrowing authority a second time. Because of the possibility that we could be denied a second round of borrowing, it would be advisable to seek to borrow the maximum amount available ($10 billion) at the outset, which is advisable in any event given all of the interpretative issues concerning the “due to” language. In addition, it might also be advisable to seek to secure as long of a maturity as is feasible.

IV. Restrictions on the Use of Borrowed Funds

Section 6001(b)(1)(A) and (B) provide that borrowed funds can only be used to fund operating expenses and cannot be used to pay outstanding debt.

As discussed in section I above, it would be consistent with the history of the Postal Service’s permanent borrowing statute to construe the reference to “operating expenses” as excluding capital expenses.

In addition, we think it evident that “debt” means liabilities from borrowing. See 39 U.S.C. § 2001(3) (referring to “debt instruments” in the context of the Title 39 borrowing provisions). However, the limitation on using these additional funds to “pay any outstanding debt” is ambiguous in several respects.

6 One definition of “debt” refers broadly to any “liability” or “specific sum of money due by agreement or otherwise,” such as payments to a supplier or employee for services rendered. See BLACK’S LAW DICTIONARY, “debt” (11th ed. 2019). However, as noted above, it is appropriate to read the terms of the CARES Act consistently with the terms of Title 39’s borrowing provisions. In addition, it is functionally implausible to believe that Congress intended “debt” to refer to the Postal Service’s liabilities generally, since that would mean that the funds borrowed under the CARES Act could be used only to provide liquidity for future operating expenses, and not for expenses already incurred (and thus “outstanding”).
First, it is unclear whether “outstanding debt” includes all payments on borrowed debt, or only payments on principal. On the one hand, to “pay [down] debt” might generally connote payment that has the effect of reducing or eliminating the principal owed. Perhaps for this reason, the Postal Service reports interest expense as a distinct line item in its periodic financial reports. On the other hand, a debt has not been repaid if accrued interest or prepayment fees remain outstanding. Indeed, the statutory language here does not distinguish between principal and other debt, and contextual definitions are broad enough to encompass any amounts (including interest and fees) that are owed under a loan agreement. See 39 U.S.C. § 2001(3); BLACK’S LAW DICTIONARY, “debt.” In our view, the more reasonable construction is that “outstanding debt” includes principal, interest, and any fees arising under a loan agreement.

Second, it is unclear whether “outstanding debt” refers to debt outstanding when the newly borrowed moneys are spent, or only to debt outstanding at the time of enactment. The former reading is more plausible. Other CARES Act provisions, as well as the Title 39 borrowing provisions, use “outstanding” in ways that appear clearly to connote “outstanding at the time of the relevant event,” and in no case “outstanding at the time of enactment.” See CARES Act, Pub. L. No. 116-136, § 4003(c)(1)(A) (requiring rates for certain Treasury loans to be based on “the current average yield on outstanding marketable obligations of the United States of comparable maturity”); 39 U.S.C. § 2006(a) (same).

On a functional level, Congress placed specific conditions on borrowing under the CARES Act that do not apply to borrowing under Title 39, and so a broader reading of CARES Act’s “outstanding debt” preclusion makes sense as an anti-circumvention measure. Otherwise, the Postal Service could borrow under the CARES Act (while eligible) to pay down Title 39 loans, with the newly liberated Title 39 borrowing authority remaining available even after the COVID-19 emergency had ended. To the extent that Congress was seeking to foreclose that possibility, as the language of the statute indicates that it was, the concern applies equally whether moneys are borrowed under Title 39 before or after the date of enactment.

Third, it is unclear whether “any outstanding debt” means only debt acquired under other authorities (i.e., the Title 39 borrowing provisions), or whether it also precludes using CARES Act borrowing to retire and renew earlier CARES Act debt. Under either reading, the CARES Act would preclude borrowing to repay funds borrowed under Title 39. That much would be consistent with Congress’s apparent concern that the CARES Act borrowing authority remain distinct from Title 39 borrowing.7 The additional question is

---

7 That much is evident from Congress’s decision not to adopt the House’s proposal to cancel all Title 39 debt outstanding on the date of enactment. See H.R. 6379, 116th Cong. § 140001(a)(1). The House bill would then have authorized the Postal Service to borrow $15 billion from Treasury. H.R. 6379, 116th Cong. § 140001(a)(2). In light of the bill’s resetting of outstanding debt to zero, it is unclear whether this additional borrowing authority would have been coextensive with or additional to the $15 billion debt ceiling in 39 U.S.C. § 2005(a).
whether the preclusion extends to repayment of earlier CARES Act debt. On a formal level, the statutory text – “any outstanding debt of the Postal Service,” without further qualification – would plainly include CARES Act debt. Therefore, it arguably would be most prudent for the Postal Service to not use these borrowed funds in such a manner. However, on a functional level, we could argue that precluding the use of these funds to pay outstanding CARES Act debt would make little sense. So long as all relevant borrowing meets the CARES Act criteria, using new borrowing to repay old debt merely consolidates (a) the use of cash to repay an old loan and (b) attainment of new cash by acquiring a new loan. If emergency circumstances remain such that repayment of the old loan would deprive the Postal Service of cash needed to fund operating expenses, then we would immediately qualify for a new loan under the CARES Act. Neither activity would be inconsistent with the CARES Act’s purposes on its own, and so there is no apparent reason why they should be precluded in combination. Therefore, despite the facial breadth of “any outstanding debt,” it would be reasonable to construe the preclusion as limited to borrowing under Title 39, not under the CARES Act.

In sum, it is reasonable to construe the CARES Act as prohibiting borrowed funds from being used for either capital expenses or the payment of any principal, interest, or fees arising from obligations issued under Title 39. As noted earlier, however, the CARES Act gives Treasury the discretion to refuse to lend, or to limit its lending, to the Postal Service if it disagrees with the Postal Service’s interpretation of the law. It would be advisable to seek a common understanding with Treasury about these legal questions, to the extent possible.

Finally, the statute does not explicitly specify any accountability for the use of borrowed funds. It is unclear at this time whether current Treasury leadership (or Congress) will insist on such an accounting.8

CONCLUSION

On its face, the statute imposes conditions on borrowing but gives the Postal Service discretion to determine when and to what extent additional borrowing is needed. But given Treasury’s discretion and the requirement to attain Treasury’s agreement on borrowing terms, Treasury could simply refuse to lend if it disagrees with the Postal Service’s interpretation, desires accountability for the use of funds, or insists on terms of its choosing (regardless of their legality or acceptability to the Postal Service). The only checks on Treasury are Congressional oversight and potential OLC resolution of a legal dispute.

Please let me know if you have any questions or concerns. Of course, the situation regarding our financial situation is very fluid, so if conditions change in a way that warrants

8 According to the Corporate Treasury office, Treasury historically did not insist on a rigid accounting of the Postal Service’s use of pre-PAEA borrowing authority, and the Postal Service thus had a fairly free hand to characterize the use of borrowed funds vis-à-vis the statute’s distinct annual caps.
material revision of the analysis in this memorandum, we will reexamine our analysis and advise you accordingly.

The United States Postal Service

Mission Statement adopted by the Board of Governors on April 1, 2020

A. Our History

The United States Postal Service has a storied history as the institution of our Government guaranteeing safe and secure communication among and between the Government and the American people.

Many are familiar with our history, which began with the Second Continental Congress and Benjamin Franklin in 1775 and continued in 1787 when the Postal Clause of the U.S. Constitution empowered Congress to establish post offices and post roads. Congress exercised those powers with the passage of The Post Office Act of 1792, which made the Postal Service a permanent fixture of the Federal Government. The Act included provisions to facilitate freedom of the press, the privacy of personal correspondence, and expand the nation’s physical infrastructure, all vital to our nation’s growth and prosperity.

These principles and objectives endure. While radio, television and the Internet have irrevocably altered our information-gathering habits, postal correspondence remains the most secure and resilient form of communication, providing the American People with a delivery infrastructure vital to our National Security.

The USPS retains the largest physical and logistical infrastructure of any non-military government institution, providing an indispensable foundation supporting an ever changing and evolving nationwide communication network. Capitalizing on its expertise in scheduling and high-volume sorting, the USPS also serves a vital role enabling digital commerce.

B. Our Mission

• To serve the American people and, through the universal service obligation, bind our nation together by maintaining and operating our unique, vital and resilient infrastructure.
To provide trusted, safe and secure communications and services between our Government and the American people, businesses and their customers, and the American people with each other.

To serve all areas of our nation, making full use of evolving technologies.

C. Carrying Out Our Mission

To meet this Mission we will:

- Remain an integral part of the United States Government, providing all Americans with universal and open access to our unrivalled delivery and storefront network.

- Maintain and enhance our reputation and role as a trusted face of the federal government in every community and provide all levels of government with access to our network and services.

- Provide frequent, reliable, safe and secure delivery of mail, packages and other communications to all Americans.

- Use technology, innovation and where appropriate private sector partnerships, to optimize and adapt our network, operations and business model to meet the changing needs of our customers and delivery recipients, while maintaining our core mission.

- Operate in a modern, efficient and effective manner that allows us to minimize what we charge for our services, consistent with meeting, in a fair way, our obligations to our current and retired employees and other stakeholders.

- Remain an employer of choice, able to attract retain and develop high quality employees that possess the skills necessary to excel in a rapidly changing business environment.

Ms. Megan J. Brennan
Postmaster General and Chief Executive Officer
United States Postal Service
475 L’Enfant Plaza, S.W.
Room 4012
Washington, D.C. 20260

Dear Ms. Brennan:

We write with urgent concern about the immediate financial condition and needs of the U.S. Postal Service in light of the coronavirus emergency and resulting decline in economic activity. This crisis has jeopardized the Postal Service’s ability to continue providing essential service to every American. We ask that you provide information as soon as possible to ensure that Congress and the public are fully informed about this matter.

On March 20, the Postal Service notified our Committees that due to the coronavirus crisis, it will “run out of cash due to a potential decline in revenue of $8-$10 billion and may have to limit or cease operations by the end of this fiscal year.” The Postal Service subsequently provided revenue projections indicating that it could lose up to $12.6 billion in revenues this fiscal year. During the coronavirus pandemic, the Postal Service is incurring additional costs as it continues to provide safe deliveries and services to every member of the public, including cleaning and disinfecting facilities, purchasing critical supplies, and training staff on new procedures, in addition to regular operating costs. Meanwhile, the Postal Service continues to provide universal service in every community across the country, delivering medications, emergency information, home supplies, and more.

On March 27, Congress passed the CARES Act (P.L. 116-136), which authorizes the Department of the Treasury to provide a $10 billion loan to the Postal Service “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The Secretary of the Treasury retains the discretion to make that loan and set terms, which must be mutually agreed upon by the Postal Service.

We strongly urge the Postal Service to assert its proper authorities with regard to the finances and management of the Postal Service and ensure that this loan is made in a timely manner and under conditions acceptable to the Postal Service.

Given the urgent need to fully understand the Postal Service’s financial condition, we ask that you produce the following information by April 6, 2020:

1. The most recent financial estimates regarding the Postal Service’s finances through the end of the fiscal year, under expected economic conditions, including: projected revenue, expenses, emergency expenses, and cash-on-hand. Such
estimates should include information about the attendant economic assumptions. We request that you send a copy of the estimates that will be used in discussions with the Treasury Department about borrowing, and continue to send updated estimates as necessary;

2. A clear public statement from the Postal Service regarding its expected financial condition, to inform its customers about its revenues, expenses, and expected solvency; and

3. A statement of the amount of funds the Postal Service intends to request from the Treasury Department under the CARES Act, including the terms requested by the Postal Service for the authorized loan.

Thank you for your attention to this urgent matter. Please direct all questions and correspondence to our staffs at (202) 225-5051 and (202) 224-2627.

Sincerely,

Carolyn B. Maloney
Chairwoman
House Committee on Oversight and Reform

Gary C. Peters
Ranking Member
Senate Committee on Homeland Security and Governmental Affairs

Gerald E. Connolly
Chairman
House Subcommittee on Government Operations

Tom Carper
Ranking Member
Permanent Subcommittee on Investigations

Stephen F. Lynch
Chairman
House Subcommittee National Security

Brenda Lawrence
Member
House Committee on Oversight and Reform
Enclosure

cc: The Honorable Ron Johnson, Chairman
    Senate Committee on Homeland Security and Governmental Affairs

    The Honorable Rob Portman, Chairman
    Senate Permanent Subcommittee on Investigations

    The Honorable Jody B. Hice, Ranking Member
    House Subcommittee on National Security
Responding to Committee Document Requests

1. In complying with this request, produce all responsive documents that are in your possession, custody, or control, whether held by you or your past or present agents, employees, and representatives acting on your behalf. Produce all documents that you have a legal right to obtain, that you have a right to copy, or to which you have access, as well as documents that you have placed in the temporary possession, custody, or control of any third party.

2. Requested documents, and all documents reasonably related to the requested documents, should not be destroyed, altered, removed, transferred, or otherwise made inaccessible to the Committees.

3. In the event that any entity, organization, or individual denoted in this request is or has been known by any name other than that herein denoted, the request shall be read also to include that alternative identification.

4. The Committees’ preference is to receive documents in electronic form (i.e., CD, memory stick, thumb drive, or secure file transfer) in lieu of paper productions.

5. Documents produced in electronic format should be organized, identified, and indexed electronically.

6. Electronic document productions should be prepared according to the following standards:

   a. The production should consist of single page Tagged Image File (“TIF”), files accompanied by a Concordance-format load file, an Opticon reference file, and a file defining the fields and character lengths of the load file.

   b. Document numbers in the load file should match document Bates numbers and TIF file names.

   c. If the production is completed through a series of multiple partial productions, field names and file order in all load files should match.

   d. All electronic documents produced to the Committees should include the following fields of metadata specific to each document, and no modifications should be made to the original metadata:

      BEGDOC, ENDDOC, TEXT, BEGATTACH, ENDATTACH, PAGECOUNT, CUSTODIAN, RECORDTYPE, DATE, TIME, SENTDATE, SENTTIME, BEGINDATE, BEGINTIME, ENDDATE, ENDTIME, AUTHOR, FROM, CC, TO, BCC, SUBJECT, TITLE, FILENAME, FILEEXT, FILESIZE, DATECREATED, TIMECREATED, DATELASTMOD, TIMELASTMOD,
INTMSGID, INTMSGHEADER, NATIVELINK, INTFILPATH, EXCEPTION, BEGATTACH.

7. Documents produced to the Committees should include an index describing the contents of the production. To the extent more than one CD, hard drive, memory stick, thumb drive, zip file, box, or folder is produced, each should contain an index describing its contents.

8. Documents produced in response to this request shall be produced together with copies of file labels, dividers, or identifying markers with which they were associated when the request was served.

9. When you produce documents, you should identify the paragraph(s) or request(s) in the Committees’ letter to which the documents respond.

10. The fact that any other person or entity also possesses non-identical or identical copies of the same documents shall not be a basis to withhold any information.

11. The pendency of or potential for litigation shall not be a basis to withhold any information.

12. In accordance with 5 U.S.C. § 552(d), the Freedom of Information Act (FOIA) and any statutory exemptions to FOIA shall not be a basis for withholding any information.

13. Pursuant to 5 U.S.C. § 552a(b)(9), the Privacy Act shall not be a basis for withholding information.

14. If compliance with the request cannot be made in full by the specified return date, compliance shall be made to the extent possible by that date. An explanation of why full compliance is not possible shall be provided along with any partial production.

15. In the event that a document is withheld on the basis of privilege, provide a privilege log containing the following information concerning any such document: (a) every privilege asserted; (b) the type of document; (c) the general subject matter; (d) the date, author, addressee, and any other recipient(s); (e) the relationship of the author and addressee to each other; and (f) the basis for the privilege(s) asserted.

16. If any document responsive to this request was, but no longer is, in your possession, custody, or control, identify the document (by date, author, subject, and recipients), and explain the circumstances under which the document ceased to be in your possession, custody, or control.

17. If a date or other descriptive detail set forth in this request referring to a document is inaccurate, but the actual date or other descriptive detail is known to you or is otherwise apparent from the context of the request, produce all documents that would be responsive as if the date or other descriptive detail were correct.
18. This request is continuing in nature and applies to any newly-discovered information. Any record, document, compilation of data, or information not produced because it has not been located or discovered by the return date shall be produced immediately upon subsequent location or discovery.

19. All documents shall be Bates-stamped sequentially and produced sequentially.

20. Two sets of each production shall be delivered, one set to the Majority Staff and one set to the Minority Staff. When documents are produced to the Committee on Oversight and Reform, production sets shall be delivered to the Majority Staff in Room 2157 of the Rayburn House Office Building and the Minority Staff in Room 2105 of the Rayburn House Office Building. When documents are produced to the Committee on Financial Services, production sets shall be delivered to the Majority Staff in Room 2129 of the Rayburn House Office Building and the Minority Staff in Room 4340 of the O’Neill House Office Building. When documents are produced to the Permanent Select Committee on Intelligence, production sets shall be delivered to Majority and Minority Staff in Room HVC-304 of the Capital Visitor Center.

21. Upon completion of the production, submit a written certification, signed by you or your counsel, stating that: (1) a diligent search has been completed of all documents in your possession, custody, or control that reasonably could contain responsive documents; and (2) all documents located during the search that are responsive have been produced to the Committee.

Definitions

1. The term “document” means any written, recorded, or graphic matter of any nature whatsoever, regardless of how recorded, and whether original or copy, including, but not limited to, the following: memoranda, reports, expense reports, books, manuals, instructions, financial reports, data, working papers, records, notes, letters, notices, confirmations, telegrams, receipts, appraisals, pamphlets, magazines, newspapers, prospectuses, communications, electronic mail (email), contracts, cables, notations of any type of conversation, telephone call, meeting or other inter-office or intra-office communication, bulletins, printed matter, computer printouts, teletypes, invoices, transcripts, diaries, analyses, returns, summaries, minutes, bills, accounts, estimates, projections, comparisons, messages, correspondence, press releases, circulars, financial statements, reviews, opinions, offers, studies and investigations, questionnaires and surveys, and work sheets (and all drafts, preliminary versions, alterations, modifications, revisions, changes, and amendments of any of the foregoing, as well as any attachments or appendices thereto), and graphic or oral records or representations of any kind (including without limitation, photographs, charts, graphs, microfiche, microfilm, videotape, recordings and motion pictures), and electronic, mechanical, and electric records or representations of any kind (including, without limitation, tapes, cassettes, disks, and recordings) and other written, printed, typed, or other graphic or recorded matter of any kind or nature, however produced or reproduced, and whether preserved in writing, film, tape, disk, videotape, or otherwise. A document bearing any notation not a
part of the original text is to be considered a separate document. A draft or non-identical copy is a separate document within the meaning of this term.

2. The term “communication” means each manner or means of disclosure or exchange of information, regardless of means utilized, whether oral, electronic, by document or otherwise, and whether in a meeting, by telephone, facsimile, mail, releases, electronic message including email (desktop or mobile device), text message, instant message, MMS or SMS message, message application, or otherwise.

3. The terms “and” and “or” shall be construed broadly and either conjunctively or disjunctively to bring within the scope of this request any information that might otherwise be construed to be outside its scope. The singular includes plural number, and vice versa. The masculine includes the feminine and neutral genders.

4. The term “including” shall be construed broadly to mean “including, but not limited to.”

5. The term “Company” means the named legal entity as well as any units, firms, partnerships, associations, corporations, limited liability companies, trusts, subsidiaries, affiliates, divisions, departments, branches, joint ventures, proprietorships, syndicates, or other legal, business or government entities over which the named legal entity exercises control or in which the named entity has any ownership whatsoever.

6. The term “identify,” when used in a question about individuals, means to provide the following information: (a) the individual’s complete name and title; (b) the individual’s business or personal address and phone number; and (c) any and all known aliases.

7. The term “related to” or “referring or relating to,” with respect to any given subject, means anything that constitutes, contains, embodies, reflects, identifies, states, refers to, deals with, or is pertinent to that subject in any manner whatsoever.

8. The term “employee” means any past or present agent, borrowed employee, casual employee, consultant, contractor, de facto employee, detailee, fellow, independent contractor, intern, joint adventurer, loaned employee, officer, part-time employee, permanent employee, provisional employee, special government employee, subcontractor, or any other type of service provider.

9. The term “individual” means all natural persons and all persons or entities acting on their behalf.
April 3, 2020

Ms. Megan J. Brennan
Postmaster General and Chief Executive Officer
United States Postal Service
475 L’Enfant Plaza, S.W.
Room 4012
Washington, D.C. 20260

Dear Ms. Brennan:

We write with urgent concern about the immediate financial condition and needs of the U.S. Postal Service in light of the coronavirus emergency and resulting decline in economic activity. This crisis has jeopardized the Postal Service’s ability to continue providing essential service to every American. We ask that you provide information as soon as possible to ensure that Congress and the public are fully informed about this matter.

On March 20, the Postal Service notified our Committees that due to the coronavirus crisis, it will “run out of cash due to a potential decline in revenue of $8-$10 billion and may have to limit or cease operations by the end of this fiscal year.” The Postal Service subsequently provided revenue projections indicating that it could lose up to $12.6 billion in revenues this fiscal year. During the coronavirus pandemic, the Postal Service is incurring additional costs as it continues to provide safe deliveries and services to every member of the public, including cleaning and disinfecting facilities, purchasing critical supplies, and training staff on new procedures, in addition to regular operating costs. Meanwhile, the Postal Service continues to provide universal service in every community across the country, delivering medications, emergency information, home supplies, and more.

On March 27, Congress passed the CARES Act (P.L. 116-136), which authorizes the Department of the Treasury to provide a $10 billion loan to the Postal Service “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The Secretary of the Treasury retains the discretion to make that loan and set terms, which must be mutually agreed upon by the Postal Service.

We strongly urge the Postal Service to assert its proper authorities with regard to the finances and management of the Postal Service and ensure that this loan is made in a timely manner and under conditions acceptable to the Postal Service.

Given the urgent need to fully understand the Postal Service’s financial condition, we ask that you produce the following information by April 6, 2020:

1. The most recent financial estimates regarding the Postal Service’s finances through the end of the fiscal year, under expected economic conditions, including: projected revenue, expenses, emergency expenses, and cash-on-hand. Such
estimates should include information about the attendant economic assumptions. We request that you send a copy of the estimates that will be used in discussions with the Treasury Department about borrowing, and continue to send updated estimates as necessary;

2. A clear public statement from the Postal Service regarding its expected financial condition, to inform its customers about its revenues, expenses, and expected solvency; and

3. A statement of the amount of funds the Postal Service intends to request from the Treasury Department under the CARES Act, including the terms requested by the Postal Service for the authorized loan.

Thank you for your attention to this urgent matter. Please direct all questions and correspondence to our staffs at (202) 225-5051 and (202) 224-2627,

Sincerely,

Carolyn B. Maloney  
Chairwoman  
House Committee on Oversight and Reform

Gary C. Peters  
Ranking Member  
Senate Committee on Homeland Security and Governmental Affairs

Gerald E. Connolly

Stephen F. Lynch  
Chairman  
House Subcommittee National Security

Brenda Lawrence  
Member  
House Committee on Oversight and Reform
Enclosure

cc: The Honorable Ron Johnson, Chairman
    Senate Committee on Homeland Security and Governmental Affairs

    The Honorable Rob Portman, Chairman
    Senate Permanent Subcommittee on Investigations

    The Honorable Jody B. Hice, Ranking Member
    House Subcommittee on National Security
Responding to Committee Document Requests

1. In complying with this request, produce all responsive documents that are in your possession, custody, or control, whether held by you or your past or present agents, employees, and representatives acting on your behalf. Produce all documents that you have a legal right to obtain, that you have a right to copy, or to which you have access, as well as documents that you have placed in the temporary possession, custody, or control of any third party.

2. Requested documents, and all documents reasonably related to the requested documents, should not be destroyed, altered, removed, transferred, or otherwise made inaccessible to the Committees.

3. In the event that any entity, organization, or individual denoted in this request is or has been known by any name other than that herein denoted, the request shall be read also to include that alternative identification.

4. The Committees’ preference is to receive documents in electronic form (i.e., CD, memory stick, thumb drive, or secure file transfer) in lieu of paper productions.

5. Documents produced in electronic format should be organized, identified, and indexed electronically.

6. Electronic document productions should be prepared according to the following standards:

   a. The production should consist of single page Tagged Image File (“TIF”), files accompanied by a Concordance-format load file, an Opticon reference file, and a file defining the fields and character lengths of the load file.

   b. Document numbers in the load file should match document Bates numbers and TIF file names.

   c. If the production is completed through a series of multiple partial productions, field names and file order in all load files should match.

   d. All electronic documents produced to the Committees should include the following fields of metadata specific to each document, and no modifications should be made to the original metadata:

      BEGDOC, ENDDOC, TEXT, BEGATTACH, ENDATTACH, PAGECOUNT, CUSTODIAN, RECORDTYPE, DATE, TIME, SENTDATE, SENTTIME, BEGINDATE, BEGINTIME, ENDDATE, ENDTIME, AUTHOR, FROM, CC, TO, BCC, SUBJECT, TITLE, FILENAME, FILEEXT, FILESIZE, DATECREATED, TIMECREATED, DATELASTMOD, TIMELASTMOD,
7. Documents produced to the Committees should include an index describing the contents of the production. To the extent more than one CD, hard drive, memory stick, thumb drive, zip file, box, or folder is produced, each should contain an index describing its contents.

8. Documents produced in response to this request shall be produced together with copies of file labels, dividers, or identifying markers with which they were associated when the request was served.

9. When you produce documents, you should identify the paragraph(s) or request(s) in the Committees’ letter to which the documents respond.

10. The fact that any other person or entity also possesses non-identical or identical copies of the same documents shall not be a basis to withhold any information.

11. The pendency of or potential for litigation shall not be a basis to withhold any information.

12. In accordance with 5 U.S.C.§ 552(d), the Freedom of Information Act (FOIA) and any statutory exemptions to FOIA shall not be a basis for withholding any information.

13. Pursuant to 5 U.S.C. § 552a(b)(9), the Privacy Act shall not be a basis for withholding information.

14. If compliance with the request cannot be made in full by the specified return date, compliance shall be made to the extent possible by that date. An explanation of why full compliance is not possible shall be provided along with any partial production.

15. In the event that a document is withheld on the basis of privilege, provide a privilege log containing the following information concerning any such document: (a) every privilege asserted; (b) the type of document; (c) the general subject matter; (d) the date, author, addressee, and any other recipient(s); (e) the relationship of the author and addressee to each other; and (f) the basis for the privilege(s) asserted.

16. If any document responsive to this request was, but no longer is, in your possession, custody, or control, identify the document (by date, author, subject, and recipients), and explain the circumstances under which the document ceased to be in your possession, custody, or control.

17. If a date or other descriptive detail set forth in this request referring to a document is inaccurate, but the actual date or other descriptive detail is known to you or is otherwise apparent from the context of the request, produce all documents that would be responsive as if the date or other descriptive detail were correct.
18. This request is continuing in nature and applies to any newly-discovered information. Any record, document, compilation of data, or information not produced because it has not been located or discovered by the return date shall be produced immediately upon subsequent location or discovery.

19. All documents shall be Bates-stamped sequentially and produced sequentially.

20. Two sets of each production shall be delivered, one set to the Majority Staff and one set to the Minority Staff. When documents are produced to the Committee on Oversight and Reform, production sets shall be delivered to the Majority Staff in Room 2157 of the Rayburn House Office Building and the Minority Staff in Room 2105 of the Rayburn House Office Building. When documents are produced to the Committee on Financial Services, production sets shall be delivered to the Majority Staff in Room 2129 of the Rayburn House Office Building and the Minority Staff in Room 4340 of the O’Neill House Office Building. When documents are produced to the Permanent Select Committee on Intelligence, production sets shall be delivered to Majority and Minority Staff in Room HVC-304 of the Capital Visitor Center.

21. Upon completion of the production, submit a written certification, signed by you or your counsel, stating that: (1) a diligent search has been completed of all documents in your possession, custody, or control that reasonably could contain responsive documents; and (2) all documents located during the search that are responsive have been produced to the Committee.

**Definitions**

1. The term “document” means any written, recorded, or graphic matter of any nature whatsoever, regardless of how recorded, and whether original or copy, including, but not limited to, the following: memoranda, reports, expense reports, books, manuals, instructions, financial reports, data, working papers, records, notes, letters, notices, confirmations, telegrams, receipts, appraisals, pamphlets, magazines, newspapers, prospectuses, communications, electronic mail (email), contracts, cables, notations of any type of conversation, telephone call, meeting or other inter-office or intra-office communication, bulletins, printed matter, computer printouts, teletypes, invoices, transcripts, diaries, analyses, returns, summaries, minutes, bills, accounts, estimates, projections, comparisons, messages, correspondence, press releases, circulars, financial statements, reviews, opinions, offers, studies and investigations, questionnaires and surveys, and work sheets (and all drafts, preliminary versions, alterations, modifications, revisions, changes, and amendments of any of the foregoing, as well as any attachments or appendices thereto), and graphic or oral records or representations of any kind (including without limitation, photographs, charts, graphs, microfiche, microfilm, videotape, recordings and motion pictures), and electronic, mechanical, and electric records or representations of any kind (including, without limitation, tapes, cassettes, disks, and recordings) and other written, printed, typed, or other graphic or recorded matter of any kind or nature, however produced or reproduced, and whether preserved in writing, film, tape, disk, videotape, or otherwise. A document bearing any notation not a
part of the original text is to be considered a separate document. A draft or non-identical copy is a separate document within the meaning of this term.

2. The term “communication” means each manner or means of disclosure or exchange of information, regardless of means utilized, whether oral, electronic, by document or otherwise, and whether in a meeting, by telephone, facsimile, mail, releases, electronic message including email (desktop or mobile device), text message, instant message, MMS or SMS message, message application, or otherwise.

3. The terms “and” and “or” shall be construed broadly and either conjunctively or disjunctively to bring within the scope of this request any information that might otherwise be construed to be outside its scope. The singular includes plural number, and vice versa. The masculine includes the feminine and neutral genders.

4. The term “including” shall be construed broadly to mean “including, but not limited to.”

5. The term “Company” means the named legal entity as well as any units, firms, partnerships, associations, corporations, limited liability companies, trusts, subsidiaries, affiliates, divisions, departments, branches, joint ventures, proprietorships, syndicates, or other legal, business or government entities over which the named legal entity exercises control or in which the named entity has any ownership whatsoever.

6. The term “identify,” when used in a question about individuals, means to provide the following information: (a) the individual’s complete name and title; (b) the individual’s business or personal address and phone number; and (c) any and all known aliases.

7. The term “related to” or “referring or relating to,” with respect to any given subject, means anything that constitutes, contains, embodies, reflects, identifies, states, refers to, deals with, or is pertinent to that subject in any manner whatsoever.

8. The term “employee” means any past or present agent, borrowed employee, casual employee, consultant, contractor, de facto employee, detailee, fellow, independent contractor, intern, joint adventurer, loaned employee, officer, part-time employee, permanent employee, provisional employee, special government employee, subcontractor, or any other type of service provider.

9. The term “individual” means all natural persons and all persons or entities acting on their behalf.

1 Other consists of FCM, Marketing Mail, International, ground packages, and various other non market-dominant products
2 Non-NSA PRS stopped sending volume through PRS during FY19 because they could not keep contractual volume ratios; however, PS Amendment 7 gave Amazon new rates and ratios to facilitate continuation
3 Figures are QTD through December 2019

Overall in FY19, NSAs drove 41% of revenue and 39% of volume with Amazon, creating $680M in contribution

Additional context on recent and existing NSAs with Amazon:
- Parcel Select – signed in 2014, expires October 2023. Covers both Parcel Select Heavyweight and PRS
- Priority Mail (PM 150) – signed 2016, expires May 2020; Successor under negotiation
- First-Class Outbound – signed 2018, expires January 2021
- Transportation for Merchants – signed in 2015, expired 2019; Covers PM and FCPS; new contract under negotiation
- FCPS 38 lapsed in FY19 and successor was not pursued

Re: Fundraising Campaign Using the U.S. POSTAL SERVICE and USPS Trademarks

Dear Ms. Muller:

We are writing regarding End Citizens United’s recent fundraising campaign that uses the U.S. POSTAL SERVICE, USPS, USPS’s Long Life Vehicle (“LLV”), and the USPS Sonic Eagle logo trademarks (collectively, the “USPS Marks”). On or about April 8, 2020, End Citizens United launched a fundraising campaign that prominently features the USPS Marks and seeks to raise $30,000 for use in connection with future advertisements that presumably will feature the USPS Marks. A copy of the April 8, 2020 fundraising email and a subsequent fundraising email from ECU are enclosed. United States Postal Service (“USPS”) is concerned that these fundraising emails and End Citizens United’s contemplated advertisements are likely to cause confusion about whether USPS sponsored or approved this campaign and/or the contemplated advertisements. Avoiding any appearance of political partisanship is vital to the achievement of USPS’s mission of service to the American people. See, e.g., De Gallo v. Parent, 557 F.3d 59, 73 (1st Cir. 2009); see also 18 U.S.C. § 1913. A public perception that USPS either supports or endorses End Citizens United or its political activities thus raises significant public policy and legal concerns for USPS.

As you surely know, USPS owns the USPS Marks, and it has numerous incontestable trademark registrations for them, including U.S. Registration Nos. 2423574, 2709084, 2709131, 3774838, 3774839, 5829577, 5124485, 5124486, and 5124487. As a result of
USPS’s longstanding use of the USPS Marks, the marks are famous, and the public has come
to rely on the USPS Marks to identify USPS’s products and services, as well as the products
and services of companies that are sponsored by or affiliated with USPS. As you also know,
USPS has not sponsored or approved of End Citizens United’s fundraising campaign or
advertisements, and End Citizens United does not have USPS’s authorization or consent to
use the USPS Marks. As a result, any use of the USPS Marks by End Citizens United that is
likely to cause confusion violates state and federal law.

Of course, USPS recognizes that End Citizens United has the right to refer to USPS and use
the USPS Marks consistent with free speech principles under the doctrine of nominative
trademark fair use. That doctrine only applies, however, when (1) a party’s use of
another’s trademark is necessary to describe the trademark owner’s services; (2) the party
used only so much of another’s trademarks as is reasonably necessary; and (3) the party
has not done anything to suggest sponsorship or endorsement by the trademark owner or to
inaccurately describe the relationship between the parties. See Century 21 Real Estate Corp.
v. Lendingtree, Inc., 425 F.3d 211, 222 (3d Cir. 2005); New Kids on the Block v. News Am.
Publ’g, Inc., 971 F.2d 302, 308 (9th Cir. 1992).

End Citizen United’s past and contemplated future use is unlikely to meet all three of these
requirements. As an initial matter, the use of the USPS LLV design and the USPS Sonic
Eagle logo is more than is necessary to reference the USPS. See Toyota Motor Sales,
U.S.A., Inc. v. Tabari , 610 F.3d 1171, 1181 (9th Cir. 2010) (holding use of stylized mark
and logo was more use of the mark than necessary). Additionally, the fundraising emails
(and likely any future advertisements) focus on increasing funding to USPS and this focus,
when combined with the use of USPS’s trademarks, exacerbates the likelihood of confusion
as to whether USPS sponsored or approved of the End Citizens United’s communications.
The likelihood of confusion is further compounded by the absence of any disclaimer of an
affiliation or sponsorship by USPS, see Toyota Motor Sales, 610 F.3d at 1182, especially
when End Citizens United disclaims an affiliation with others, such as political candidates and
candidate’s committees. In light of the foregoing, End Citizens United is not entitled to use
the USPS Marks under the guise of nominative fair use.

Therefore, USPS respectfully requests that End Citizens United either:

1. Cease and desist its use of the USPS Marks and all other trademarks owned by USPS
   in connection with its fundraising efforts and its advertisements; or

2. Agree to the following in connection with its fundraising or advertising:
a. End Citizens United will not use any USPS logos or designs under any circumstance;

b. End Citizens United’s use of the USPS Marks in plain text (i.e., not in bold or italics) and be in the same size, font, and color as surrounding text;

c. End Citizens United will include the following prominent disclaimer in connection with all uses of USPS Marks: “United States Postal Service is not associated or affiliated with End Citizens United and has not sponsored or approved of this communication”;¹ and

d. While USPS believes that 2(a)-(c) are reasonably calculated to reduce the likelihood of confusion, it is possible that certain uses of the USPS Marks still could be likely to cause confusion, and End Citizens United will cooperate with any additional reasonable requests from USPS to address USPS’s concerns with any future uses of the USPS Marks.

As we hope this letter makes clear, USPS is not trying to prevent End Citizens United from engaging in fundraising or trying to prevent End Citizens United from advocating for its point of view. At the same time, USPS cannot allow its trademarks to be used in a manner that is likely to cause confusion as to USPS’s sponsorship or approval of End Citizens United’s campaigns and advertisements. Accordingly, we respectfully request that End Citizens United confirm in writing that it will comply with the reasonable attempts to prevent confusion detailed above by no later than April __, 2020. Thank you for your prompt attention to this important matter.

¹ The disclaimer should appear at the beginning of any communication in a font that is at least as large as the font used for the USPS Marks. See, e.g., TrafficSchool.com, Inc. v. Edriver Inc., 653 F.3d 820, 828 (9th Cir. 2011) (holding disclaimer in small font at the bottom of the page was ineffective).
Sincerely,

[Insert name]

**Context and History**

Amazon’s Priority Mail Fulfillment proposed Successor Agreement represents a contribution growth opportunity between Amazon’s Fulfillment business and USPS.

Under the successor agreement proposed, $26M of Amazon’s ~$192M Priority Mail Fulfillment business would be discounted. **This NSA represents an effective price increase, while more specifically targeting discounts to win business that UPS currently wins.**

- Historically, USPS discounted >$80M of Priority Mail volume. However, much of this was inelastic (e.g., non-contiguous) and **USPS shifted a majority of this volume to published rates (~50% price increase).**
- USPS prioritized any remaining discounted rates to target UPS’ business with Amazon and take incremental share in high-contribution low-zone low-weight product. **This would represent net new business USPS has not won to-date.**
  - Zones 1-4 (ground zones) saw price decrease of ~5% overall relative to prior NSA
  - Zones 5-8 (air zones) saw price increase of ~18% overall relative to prior NSA

**Contract Structure**

This Priority Mail contract has 2 features to protect USPS interests, grow contribution, and sustain Amazon relationship:

- **Geo-based pricing:** Pricing is based on charging price required to win the business based on the particular lane (e.g., lanes treated as “international” by UPS and FedEx are charged at published rates).
- **Earned discount model:** Amazon will **earn** all incremental discounts by providing USPS with volume that historically has gone to Amazon’s internal network, UPS, or regional carriers. **This is an industry standard aligned to what competitor would do.**
  - Each tier will result in a net growth in both volume and contribution.
  - In instances where volume decline, rates will also decline.

In summary, USPS targeted discounts to maximize revenue in each cell, to win higher contribution low-weights and zones. Prices were created to reflect the competitive landscape. At higher prices USPS would cede volume to UPS, and lose net contribution.

**Competitive intelligence**

During negotiations, Amazon disclosed that they had 85M pieces of “Priority Mail equivalent” volume in 2019. The Postal Service only receives approximately 20% (16M) of Amazon’s “Priority Mail equivalent”.

- **The remaining 69M pieces (up to >$500M revenue) go to competitors** – majority to UPS and Delivery Service Providers
- Amazon’s shipper selection process is executed on a package-by-package **driven by which providers can meet required service standard and then by price offered.**
- USPS is losing business because Priority Mail does not meet Prime-service standard and price has not historically been competitive for non-Prime rated product.
- In particular, **UPS has a stronger Ground offering in terms of reach, price, and reliability** which challenges USPS’ full-network position with Amazon, which is why USPS discounts are critical to winning net new business.

**Discounts were targeted to individual rate-cells to incentivize favorable volume where USPS also has strong service performance.**

**Impact on overall relationship**

Although this contract represents a small portion of Amazon’s total revenue with the Postal Service, it carries implications for the broader Amazon relationship:

- **Amazon prioritized finalizing this NSA over other aspects of its business prior to discussing expanding USPS’ share of business** in the last-mile segment (USPS’ largest business opportunity).
- **Finalization of this contract,** demonstrates the Postal Service’s internal ability to advance customer relationships.

**Financial benefits of this NSA**

This new contract relationship represents:
• **USPS increased annual contribution by ~$25M by shifting 75% of volume from discounted rates to published rates.** Since implementing, USPS has seen limited loss of volume, reinforcing this strategy.

• **USPS agreement creates multi-year contribution opportunity worth between ~$5-9M by targeting discounts to high-contribution, high service performance product where UPS has significant share.**
Fulfilling our Mission – Parcel Select: A Path Forward

Section 1 – How is our market position at risk today? How is COVID shaping that? Our market position is already at risk, and there is an expanding market to grab onto with Parcel Select.

- Articulating the instability perceived by major customers.
- Defining how COVID is making this a near-term opportunity to build long-term opportunity. That we are overall at an inflection point to win the market.
- Describing difficulty to win brick & mortar retail segment with instability – Target, Walmart, CVS, broader healthcare segment. These traditional American companies are trying to grow their online business and want USPS as a partner but they can’t build without certainty in our products. Particularly Parcel Select.
- Pricing competitiveness in the market currently – margins cut to grow density (eg FedEx).
- Cost curves and investments by competitors to drawn down costs by improved operational efficiency and last mile efficiency through retail access/alternate delivery points. Stated strategy by UPS to achieve 97% of US population with x miles of an access point.
- We have limited opportunity to take price without losing business.

Section 2 – What is Parcel Select? Parcel Select is a product that serves broad base of customers directly and indirectly. Growing product with staple retailers.

- Defining the role of Parcel Select in the USPS network.
- Explaining its core customer base. Highlighting the growing role of retailers.
- Evolution and end of FedEx SmartPost, and resulting impact on UPS SurePost therefore impact on USPS.
  - UPS Teamsters specifics – must have SmartPost, under 10#, diversions to UPS ground by address, UPS Ground if Amazon ping to UPS database shows another delivery to blockface win goes to Ground
- Introduce Walmart and Target as Parcel Select DSCF and DDU
- Introduce role of Parcel Select with pharmaceuticals and the estimated volume of pharmaceuticals reaching the US public.

Section 3 – How does Parcel Select function economically? USPS is unique in its ability to offer Parcel Select, building off the USO – and it is one of the core pillars of ensuring equitable access to all Americans.

- Explaining the simple economics around Parcel Select and its contribution / profitability.
- Explaining that the perceived low rates are because customers execute the first and middle mile work themselves, and can choose at what margin they need to operate. Similar to workshare, these customers are able to do the middle-mile more effectively than USPS network.
  - Need to show the cost curves of first and middle mile vs competitors. If we need a “real” example, use Walmart or Target. We can’t win DSCF entry – but we can win DDU entry.
- This product builds on top of USPS existing USO-driven network to create equal access to the economy. And give businesses across the country universal access to deliver product at reasonable prices.
  - Without it, large geographic share of United States could have been left behind from economic opportunities.
- Defining how it feeds the broader network to enable USPS to more profitably serve the American public in both mail and packages. Increasing density across network improves USPS’ ability to serve entire country while increasing overall contribution.
- If we lost Parcel Select business, what is the economic impact on the last mile and what would that do the price we would have to offer for FCPS and Priority to meet PRC required CCs which escalate annually. FCPS and Priority – how much is currently retail vs commercial? How much of FCPS and Priority is from small and mid size businesses. They would essentially be bearing the brunt of pricing USPS out of the Parcel Select business.
- If we quadruple prices, we would be out of Parcel Select business AND this gives UPS and FedEx ability to raise their prices. Their customers are the shippers themselves – small, medium and large businesses that they are consolidating volume for to move to last mile. Show history of UPS and FedEx published price increases over time – they are virtually identical.
- Articulating / Refuting directly the analyst report that has laid belief that Parcel Select was unprofitable. And highlight that the analyst report has been “retracted.”
Section 4 – What are the consequences of price increases to Parcel Select? If prices are raised, it will result in “in-sourcing” and large volumes will leave our network. And the “negative spiral” will ensue.

- Even in a normal environment, raising prices tends to drive volume into alternative network. In some instances, competitors will in-source volume at a loss to build their own density. And once they've build the densities, they will have middle-mile and last-mile advantages to win the entire business. This enables them to create downward pressure on all USPS product.
- As competitors gain density from growing e-commerce market, they are increasingly able to deliver themselves. While USPS prices have increased, competitor cost-to-deliver has decreased. This compromises USPS’ role as the leading B2C package delivered.
- Defining how customer cost curves function. Using FedEx as example of ability to "in-source volumes" and demonstrate how this plays out in real history.
  - Show FedEx volume trends and headlines / Sales tactics graphically – similar to how was done for Amazon.
- Demonstrating the net loss of contribution to overall USPS under price-increase circumstances based on cost curves.
- Summary of the economics/financial shape of FedEx and UPS since Amazon entered the market.

Section 5 – How do cost and competitive dynamics play out when packages quickly leave network? If major volumes leave the network, our costs will largely remain the same and it will set off a spiral of “uncompetitiveness”

- Sharing the role of the “negative spiral” in overall market economics. Defining how costs can’t be taken out quickly enough.
- Articulating the inability to take out costs at scale with lost packages.
- Explaining how the net loss of volume will increase contribution loss to USPS while removing path to sustainability.
- Reiterate impact of this products loss on the pricing pressures on all competitive products. Educate about requirements for escalating cost coverage.....and multiple lawsuits by UPS to increase further.
- USPS plays a critical role in grounding UPS and FedEx’s rates by maintaining accessible and competitive rates to all American businesses. If USPS loses its ability to compete in this space, FedEx and UPS will have significant price latitude to pass on to the American consumer. They tend to move their prices up together so it is likely that in a non-USPS world, American consumers and retailers will suffer from heightened rates.

Section 6 – How is Parcel Select key to the broader USPS business strategy? Who are the Parcel Select customers of today and tomorrow? And what is our strategy to keep and grow each? What is expected marketshare and volume of each? Parcel Select provides foundational volume and contribution that keeps Parcel Select viable to serve the entire economy equitably.

- USPS strategy development and execution timeline for Parcel Select. Strategy, sequence of NSAs ..... Amazon is next in our process.
- Articulating the base case of Amazon economics, relative price increases (~50% is not discounted). How it contributed contribution to USPS even in non-COVID scenarios.
- Defining the size and scope of the relationship. And the future share of business that Amazon is expected to hold onto. (Include: share of unique customers, volume shift, etc..)
- Explaining what is at risk today and how it can be absorbed by competitors and importance of retaining for benefit of serving all customers.
- Walmart strategy and exactly where we stand and the inflection point they are at for their decisions forward. Build to inject with USPS at DDU – or stay with FedEx and do regional injects. What is the growth expectation for Walmart? What is future contribution we leave on the table if we don’t have viable cost and competitive pricing to win this business now. If we don’t win now, we will never earn their DDU business. Walmart is currently 85% FedEx.
- Similar scenario for Target. The big winners from COVID are who we need to win now. Target SFS is UPS and we deliver some LM. DC is done by FedEx.
Section 7 – What is the most viable path forward for USPS to execute our Parcel Select strategy with Amazon? Continuing to serve Amazon volumes at strong margins is a good business decision for USPS.

- Explaining how we can leverage current situation with COVID to gain execute Parcel Select strategy
- Sharing that “locking in” Amazon by using inflection point to asymmetrically win in any negotiations.
- Size of the Amazon share.
- Demonstrating ability to also win net new business by continuing to pursue the package strategy and capturing larger share of business with even broader base of retailers at the DSCF.

Section 8 – Cost of failure. What will be the impact to USPS if we lose Amazon Parcel Select business? What are the economics of building business? What are the predicted economics of major price increases? Continuing to serve Amazon volumes at strong margins is a good business decision for USPS.

- Sharing economic perspective on how a growing Amazon, Walmart, Target, CVS, etc., would drive incremental contribution for USPS.
- Sharing economic perspective on how a major package price increase would drive long-term contribution decline across this entire segment. And the potential impact on American population (e.g., rural package prices surge, affordable access to pharmaceutical shipments, etc.).

Section 9 – What are we asking from the board to move forward?

- Authority to initiate negotiations with Amazon to reset relationship and improve overall relationship in the interest of broader USPS mission.
- Willingness to communicate with broad set of customers about USPS’ commitment to their package business.
- Continued commitment to building the future package strategy vision, to grow contribution and enable USPS to continue on a more contribution positive path forward.

APPENDIX A – What do we need to believe in terms of competitive in-sourcing capabilities?

- Articulating both middle-mile and last-mile capabilities of competitors to insource and at what rate
- Providing additional evidence for the range of believable volume to be lost and at what pace based on both:
  - Bottoms-up van analysis and network investment analysis
  - Overall market trends

Additional tones to layer in:

- Sustainability – one LM delivery provider is better for the planet.
- Social Distancing – one LM delivery provider reduces social contact. Move volume into our DDU, our carriers are already delivery mail.
- Safety – one LM delivery provider reduces accidents, road congestion, reduced wear and tear on city infrastructure
Fulfilling our Mission – Parcel Select: A Path Forward

Section 1 – How is our market position at risk today? How is COVID shaping that? Our market position is already at risk, and there is an expanding market to grab onto with Parcel Select.

- Articulating the instability perceived by major customers.
- Defining how COVID is making this a near-term opportunity to build long-term opportunity. That we are overall at an inflection point to win the market.
- Describing difficulty to win brick & mortar retail segment with instability – Target, Walmart, CVS, broader healthcare segment. These traditional American companies are trying to grow their online business and want USPS as a partner but they can’t build without certainty in our products. Particularly Parcel Select.
- Pricing competitiveness in the market currently – margins cut to grow density (eg FedEx).
- Cost curves and investments by competitors to drawn down costs by improved operational efficiency and last mile efficiency through retail access/alternate delivery points. Stated strategy by UPS to achieve 97% of US population with x miles of an access point.
- We have limited opportunity to take price without losing business.

Section 2 – What is Parcel Select? Parcel Select is a product that serves broad base of customers directly and indirectly. Growing product with staple retailers.

- Defining the role of Parcel Select in the USPS network.
- Explaining its core customer base. Highlighting the growing role of retailers.
- Evolution and end of FedEx SmartPost, and resulting impact on UPS SurePost therefore impact on USPS.
  - UPS Teamsters specifics – must have SmartPost, under 10#, diversions to UPS ground by address, UPS Ground if Amazon ping to UPS database shows another delivery to blockface win goes to Ground
- Introduce Walmart and Target as Parcel Select DSCF and DDU
- Introduce role of Parcel Select with pharmaceuticals and the estimated volume of pharmaceuticals reaching the US public.

Section 3 – How does Parcel Select function economically? USPS is unique in its ability to offer Parcel Select, building off the USO – and it is one of the core pillars of ensuring equitable access to all Americans.

- Explaining the simple economics around Parcel Select and its contribution / profitability.
- Explaining that the perceived low rates are because customers execute the first and middle mile work themselves, and can choose at what margin they need to operate. Similar to workshare, these customers are able to do the middle-mile more effectively than USPS network.
  - Need to show the cost curves of first and middle mile vs competitors. If we need a “real” example, use Walmart or Target. We can’t win DSCF entry – but we can win DDU entry.
- This product builds on top of USPS existing USO-driven network to create equal access to the economy. And give businesses across the country universal access to deliver product at reasonable prices.
  - Without it, large geographic share of United States could have been left behind from economic opportunities.
- Defining how it feeds the broader network to enable USPS to more profitably serve the American public in both mail and packages. Increasing density across network improves USPS’ ability to serve entire country while increasing overall contribution.
- If we lost Parcel Select business, what is the economic impact on the last mile and what would that do the price we would have to offer for FCPS and Priority to meet PRC required CCs which escalate annually. FCPS and Priority – how much is currently retail vs commercial? How much of FCPS and Priority is from small and mid size businesses. They would essentially be bearing the brunt of pricing USPS out of the Parcel Select business.
- If we quadruple prices, we would be out of Parcel Select business AND this gives UPS and FedEx ability to raise their prices. Their customers are the shippers themselves – small, medium and large businesses that they are consolidating volume for to move to last mile. Show history of UPS and FedEx published price increases over time – they are virtually identical.
- Articulating / Refuting directly the analyst report that has laid belief that Parcel Select was unprofitable. And highlight that the analyst report has been “retracted.”
Section 4 – What are the consequences of price increases to Parcel Select? If prices are raised, it will result in “in-sourcing” and large volumes will leave our network. And the “negative spiral” will ensue.

- Even in a normal environment, raising prices tends to drive volume into alternative network. In some instances, competitors will in-source volume at a loss to build their own density. And once they’ve build the densities, they will have middle-mile and last-mile advantages to win the entire business. This enables them to create downward pressure on all USPS product.
- As competitors gain density from growing e-commerce market, they are increasingly able to deliver themselves. While USPS prices have increased, competitor cost-to-deliver has decreased. This compromises USPS’ role as the leading B2C package delivered.
- Defining how customer cost curves function. Using FedEx as example of ability to “in-source volumes” and demonstrate how this plays out in real history.
  - Show FedEx volume trends and headlines / Sales tactics graphically – similar to how was done for Amazon.
- Demonstrating the net loss of contribution to overall USPS under price-increase circumstances based on cost curves.
- Summary of the economics/financial shape of FedEx and UPS since Amazon entered the market.

Section 5 – How do cost and competitive dynamics play out when packages quickly leave network? If major volumes leave the network, our costs will largely remain the same and it will set off a spiral of “uncompetitiveness”

- Sharing the role of the “negative spiral” in overall market economics. Defining how costs can’t be taken out quickly enough.
- Articulating the inability to take out costs at scale with lost packages.
- Explaining how the net loss of volume will increase contribution loss to USPS while removing path to sustainability.
- Reiterate impact of this products loss on the pricing pressures on all competitive products. Educate about requirements for escalating cost coverage.....and multiple lawsuits by UPS to increase further.
- USPS plays a critical role in grounding UPS and FedEx’s rates by maintaining accessible and competitive rates to all American businesses. If USPS loses its ability to compete in this space, FedEx and UPS will have significant price latitude to pass on to the American consumer. They tend to move their prices up together so it is likely that in a non-USPS world, American consumers and retailers will suffer from heightened rates.

Section 6 – How is Parcel Select key to the broader USPS business strategy? Who are the Parcel Select customers of today and tomorrow? And what is our strategy to keep and grow each? What is expected marketshare and volume of each? Parcel Select provides foundational volume and contribution that keeps Parcel Select viable to serve the entire economy equitably.

- USPS strategy development and execution timeline for Parcel Select. Strategy, sequence of NSAs ..... Amazon is next in our process.
- Articulating the base case of Amazon economics, relative price increases (~50% is not discounted). How it contributed contribution to USPS even in non-COVID scenarios.
- Defining the size and scope of the relationship. And the future share of business that Amazon is expected to hold onto. (Include: share of unique customers, volume shift, etc.)
- Explaining what is at risk today and how it can be absorbed by competitors and importance of retaining for benefit of serving all customers.
- Walmart strategy and exactly where we stand and the inflection point they are at for their decisions forward. Build to inject with USPS at DDU – or stay with FedEx and do regional injects. What is the growth expectation for Walmart? What is future contribution we leave on the table if we don’t have viable cost and competitive pricing to win this business now. If we don’t win now, we will never earn their DDU business. Walmart is currently 85% FedEx.
- Similar scenario for Target. The big winners from COVID are who we need to win now. Target SFS is UPS and we deliver some LM. DC is done by FedEx.
Section 7 – What is the most viable path forward for USPS to execute our Parcel Select strategy with Amazon? Continuing to serve Amazon volumes at strong margins is a good business decision for USPS.

- Explaining how we can leverage current situation with COVID to gain execute Parcel Select strategy
- Sharing that “locking in” Amazon by using inflection point to asymmetrically win in any negotiations.
- Size of the Amazon share.
- Demonstrating ability to also win net new business by continuing to pursue the package strategy and capturing larger share of business with even broader base of retailers at the DSCF.

Section 8 – Cost of failure. What will be the impact to USPS if we lose Amazon Parcel Select business? What are the economics of building business? What are the predicted economics of major price increases? Continuing to serve Amazon volumes at strong margins is a good business decision for USPS.

- Sharing economic perspective on how a growing Amazon, Walmart, Target, CVS, etc., would drive incremental contribution for USPS.
- Sharing economic perspective on how a major package price increase would drive long-term contribution decline across this entire segment. And the potential impact on American population (e.g., rural package prices surge, affordable access to pharmaceutical shipments, etc.).

Section 9 – What are we asking from the board to move forward?

- Authority to initiate negotiations with Amazon to reset relationship and improve overall relationship in the interest of broader USPS mission.
- Willingness to communicate with broad set of customers about USPS’ commitment to their package business.
- Continued commitment to building the future package strategy vision, to grow contribution and enable USPS to continue on a more contribution positive path forward.

APPENDIX A – What do we need to believe in terms of competitive in-sourcing capabilities?

- Articulating both middle-mile and last-mile capabilities of competitors to insource and at what rate
- Providing additional evidence for the range of believable volume to be lost and at what pace based on both:
  - Bottoms-up van analysis and network investment analysis
  - Overall market trends

Additional tones to layer in:

- Sustainability – one LM delivery provider is better for the planet.

In early 2019, USPS management defined a strategy for the last-mile product (Parcel Select) to: (1) re-invigorate legacy relationships while guaranteeing contribution and (2) expand to a broader base of retailers like Walmart and Target. As Parcel Select volumes declined for the first time, management saw this strategy as key to growing contribution and maintaining the resilience of the package business.

As this strategy was implemented, the public narrative around USPS’ last-mile pricing created uncertainty for many customers (customers like Walmart have asked their attorneys to assess risk of doing business with USPS). Other customers, like the Department of Veterans Affairs, are exposed if any major pricing changes occur. This uncertainty has compromised the ability to grow this high contribution business.

COVID-19 has introduced tailwinds as competitors have faltered in delivering consistently. Customers, like Target, have re-discovered USPS as a reliable carrier and are considering investing in a last-mile partnership. In a time of national crisis, USPS has lived into its mission of binding the nation together.

Because customers solidify network planning well in advance of peak season, the next two months are a time-limited opportunity to secure existing contribution and lay a path to growth.

Failure to execute the strategy will give time for competitors to adapt to the new normal. In this scenario, USPS will lose share in package business and management’s efforts to close the deficit will be hampered.

The following articulates the Parcel Select strategy’s business case and value to the American public.
1 Introduction

Purpose of this memo
The objective of this document is to brief the Board of Governors on the ongoing Parcel Select (last-mile) strategy and its value to the Postal Service and to the American public.

Management requests authority to continue execution of the Parcel Select strategy.

The role of our package business
In 2019, packages generated $22.7B of revenue and $7.4B of contribution for the Postal Service. The contribution from the package business helps fund the Universal Service Obligation and enables USPS to deliver on its mission to serve all Americans, not only those in cities and affluent neighborhoods. As mail volumes decline, packages have been and will continue to be critical to the financial health of USPS.

Brief overview of Parcel Select as a last-mile network product
USPS serves customers with two product types: full-network (First-Class Package Service, Priority Mail) and last-mile (Parcel Select). Parcel Select generates $6.8B in revenue and $3.3B in contribution.

In the last-mile space, USPS partners either with consolidators (like UPS or DHL) or works directly with retailers (like Walmart or CVS) to carry out the last mile delivery. Last mile customers deliver their packages to either a USPS sortation facility or to a Delivery Unit (Post Office). USPS then executes the last mile. USPS’ last mile product has supported a vibrant and competitive American package market.

The Postal Service is facing headwinds in the last mile space
Legacy carriers like UPS and FedEx built their businesses on the high margin B2B market. With the growth of e-commerce, they have heavily invested to transform their networks to capture the lower margin and high-growth B2C market. Operating profitable B2C networks requires unprecedented densities for these carriers, and they initially relied on USPS’ last mile product to support their expansion. However, due to consistent price increases, these customers are building their own networks and pursuing volume at lower margins. As a result, in 2019 USPS Parcel Select volumes declined for the first time.

FedEx announced publicly it will end its partnership with USPS. FedEx told USPS they were leaving for one reason: “the price was too high.”

COVID-19 has accelerated e-commerce penetration for most retail businesses
As a result of the COVID-19 pandemic, all retailers are shifting their business models to catch the wave of a turbocharged e-commerce landscape. Online sales have grown ~50%, and Parcel Select volumes
have increased 30-40% vs prior year. While the current growth in package volumes is a temporary spike, a significant portion of the new volumes will persist even as Americans’ lives return to a “new normal.”

*We are at an inflection point in our Parcel Select strategy*

Many retailers – including Target, Walmart, and pharmaceutical companies – need to provide ‘fast and free’ shipping to be competitive online. Retailers operate with thin margins, and require both affordable and stable price points for their shipping. They are ready to invest in the Postal Service relationship by developing cost-effective networks that bring their product to our facilities.

However, these network investments represent substantial capital outlays, with multi-year payback periods. To justify the investment, our customers need operational and price certainty. The recent public narrative around USPS calls into question both our price stability and near-term operational viability. Customers have voiced that a USPS partnership comes with risk: price volatility, operational unpredictability (e.g., reduction in delivery days), and possibility of a total withdrawal from packages.

We need to move with pace. Given current market conditions, customers are reluctantly relying on the Postal Service because our competition has been unable to react to the new normal introduced by COVID-19. While other carriers have wavered operationally, our customers and the American public have been reminded that the United States Postal Service is a force uniting America.

2 Overview of our Parcel Select customer base

Shippers access Parcel Select in two ways.

1. Indirectly using consolidators like DHL, FedEx, UPS, or Pitney Bowes who do the first and middle mile for the customer and pass the package to the Postal Service at the Delivery Unit (Post Office). These relationships support a broad base of shippers from small storefronts to critical government services like the Department of Veteran’s Affairs.
2. Directly by bringing their product to USPS facilities. Examples of these customers include: Walmart, Amazon, and Target.

**Indirect partnerships** bring end-shippers to USPS via mixed-network solutions, where USPS executes the last mile. UPS and FedEx have a non-exclusive relationship and use USPS when it is economical. Pitney Bowes and DHL almost exclusively use USPS to execute their last mile.

- Very few customers have the density to drop at a plant or a post office directly. Instead, many large brick and mortar retailers use partners to access our network, including: Macy’s, Gap, Kohl’s, Victoria’s Secret, Bath & Body Works and Walgreens.
- Companies like QVC, HSN, General Motors, and Unilever also access our network indirectly.
- Using this model, USPS delivers for more than 20,000 businesses across the United States.

**Direct partnerships** bring packages directly to the USPS network like consolidators. These partnerships require significant capital investments from customers. **Potential new customers** need operational and price stability as soon as possible to prepare mid-term capital plans and near-term plans for peak 2021.

- Walmart is piloting Parcel Select in Florida and was considering building its network around USPS in order to compete with e-commerce players. They have indicated USPS has favorable economics, superior service, excellent customer experience, and nimble support relative to FedEx. *They are now concerned with USPS viability and have their teams assessing the risk.* Before making further investments, *they will assess our operational and price viability.*
- Target was planning to pilot a direct Parcel Select relationship with USPS. Target has historically partnered indirectly with USPS through UPS.
• **Amazon** is the largest legacy partner and has voiced desire to continue building the relationship. They remain concerned about the risk of a relationship with USPS.

• USPS has ongoing conversations with **Home Depot, Staples, and Chewy.com** (PetSmart).

Across both direct and indirect partnerships, USPS plays a particularly crucial role in pharmaceuticals. Since March 14, **USPS has made more than 20M pharmaceutical deliveries through Parcel Select.** Customers include: US Department of Veteran Affairs, Humana, CVS, Walgreens, and Costco.

### 3 The economics of Parcel Select

In 2019 alone, Parcel Select contributed $6.8B of revenue and $3.3B in contribution. Every Parcel Select relationship is profitable. A majority of packages entered at a Post Office cover their cost by 1.5 to 2 times.

There is significant public discourse on the business case for Parcel Select pricing. Many arguments that pricing is below cost appear tied to an erroneous 2017 Citibank report 1 which has been disproven by USPS management. CitiBank indicated USPS would need to increase prices by 50% in order to break-even, but was based on a flawed set of assumptions.

*CitiBank has retracted its analysis – with the lead analyst publicly stating “I’d love to say it wasn’t a mistake.”*

Parcel Select is high-contribution because the marginal cost to deliver to a residence is quite low when the Postal Service would already drive by every address due to its Universal Service Obligation. Parcel Select is actually a key way for USPS to improve contribution from each stop. This is particularly important as the number of delivery points have grown, while overall network volumes have dropped.

### 4 Pricing Overview for Parcel Select

To retain and grow business in the last mile, USPS must price competitively. This means pricing below the customer’s alternative (self-delivery or another carrier) while maximizing USPS contribution.

---

1 Citi published a report entitled “The Free Shipping Tax” on April 18, 2017. In this article it indicated that Parcel Select prices would need to increase 50% in order to break-even. The analyst used an incorrect number based on the floor of the institutional cost coverage, as opposed to the actual institutional cost coverage figure.

• As with all competitive products, published prices are established and approved by the Board of Governors. The Board of Governors approved moderate price increases for both Parcel Select Lightweight and Parcel Select Heavyweight in 2019 for FY2020.

• Today, ~60% of Parcel Select volume is charged at published rates (no NSA discounts). This means that, for a majority of customers, price changes take effect almost immediately.

• When necessary to win new business, USPS uses Negotiated Service Agreements to discount from published rates to be competitive with what the market will bear. These discounts are tied to published rate increases.

Today, competitors’ costs to deliver are decreasing for several reasons:

• Improved density – More people are getting more packages. This makes routes more profitable.

• Lower and reduced labor costs – UPS, FedEx, and Amazon use flex and contract drivers to reduce cost.

• Significant multi-year capital investments – Competitors investing to improve efficiency in package sortation, automate facilities, and develop last-mile residential networks.

• New innovations – Competitors building low-cost delivery alternatives such as retail access points and lockers.

The below exhibit demonstrates how competitor’s costs-to-deliver the last-mile vary based on both density (number of packages on a route) and by underlying cost structures (labor rates). Over the past five years, these curves have consistently shifted downwards. In parallel, USPS consistently increased price, leading to a point of “diseconomy” for Parcel Select customers.

From FY16, across all of Parcel Select, USPS published prices ~38%.

</tbody>
</table>

In 2019, FedEx publicly indicated that it would fully insource Parcel Select volumes, discontinue its SmartPost product, and expand to offer Sunday delivery. FedEx told USPS management:

“This decision was based on pure economics. The service was excellent.”
This indicates prices were not competitive. In April of 2020, USPS saw a 34% decline in FedEx volume. **USPS is on track to lose ~$1.1B in revenue and ~$600M in contribution by 2022.**

Even in a strong relationship like UPS, there are significant headwinds to consider. In particular, the union agreement between Teamsters and UPS state:

- UPS is required to in-source any time there are two packages going to same address.
- UPS SurePost product (its Parcel Select product) is tied in the UPS Teamster’s contract to the existence of the FedEx SmartPost product. FedEx has announced the cessation and rebranding of the FedEx SmartPost product. **We believe this will be a major point in upcoming 2022 Teamster negotiation and puts ~$1.4B in revenue and ~$750M in contribution.**

### 5 Implications of a Significant Price Increase

If USPS were to raise Parcel Select prices by anywhere from 0.5-4 times current published pricing, we would rapidly price ourselves “out of the market.” Management has assessed that the entire $3.3B of annual contribution would be at risk. Under extreme price increase scenarios, customers would in-source or divert volumes to alternative carriers within a year.

</tbody>
</table>

In the event of a significant price increase, we expect the following scenarios would likely occur:

- **USPS would lose $1.3B of contribution from Amazon within 1 year.** Volume would shift into Amazon Delivery Service Provider network and UPS network (already has $8B of Amazon business).
- **USPS would lose the UPS relationship and the contribution guarantee established in contract.** UPS would sunset its relationship with the Postal Service and in-source significant volumes to Ground network by activating “peak operations”. Under current peak operations, UPS is able to absorb 20M units / day. In-sourcing SurePost would only require absorbing 2M units / day.
- **FedEx would maintain its current course of decline, which was driven by USPS pricing and might accelerate in-sourcing plans.**
- **Partners like DHL and Pitney Bowes would become immediately uncompetitive in the market.** They would likely be unable to find a replacement delivery partner, and would sell-off their assets while pulling out of this business.

Forcing Parcel Select volumes out of Postal Service network will effectively cede USPS competitive package business. A significant price change would:

---

1 Source: Volume and revenue figures from Business Customer Intelligence. Contribution is estimated based on partner volume and inject profile.
• Result in rapid in-sourcing of volume that would fundamentally change competitor cost structures. Competitors will quickly be able to poach the First Class Package Service and Priority Mail volume from increasingly insecure and nervous customer base.
• Drive heightened levels of insecurity into full-network customers and retail partners.
• Significantly disrupt the ongoing operations of many small / medium businesses as well as the aforementioned retailers.

Additional impacts of major price increases include:
• **Disproportionate impact to the pharmaceutical sector at a time** when these services are more critical than ever. In particular, customers like the Department of Veterans Affairs, Walgreens, or ExpressScripts would see price increases in <1 month.
• **Loss of USPS as the price anchor in the market for all business and all consumers.** Rural Americans would likely absorb the greatest price increases.⁴

6 Labor and cost implications of rapid package volume loss.

In the event of rapid losses of Parcel Select volumes, the Postal Service would need to remove costs as a result of lost revenue. These variable costs are directly tied to American jobs.

Currently, the Postal Service has the ability to lay off its non-career workforce for lack of work, as well as a portion of its career bargaining unit work force depending on the union. The loss of Parcel Select volume would equate to approximately 55,961,000 bargaining unit work hours or the removal of ~28,000 non-career jobs.

Notably, the Postal Service’s universal service obligation means that a reduction in workload associated with a loss of package volume may not translate to dollar-for-dollar cost savings. The Postal Service will still incur the fixed costs of servicing the nation’s delivery points, albeit with reduced revenue per delivery point.

This average wage-rate increase would negatively impact all USPS economics across both market dominant and domestic competitive product.

[Additional information in Appendix D on labor economics associated with package volume loss]

7 Parcel Select commercial strategy

Since early 2019, USPS management has been implementing an updated Parcel Select strategy:

• **Part 1. Expanding the product to serve as the “great equalizer” for brick and mortar retailers** as they build their e-commerce business (Walmart, Target).
• **Part 2. Executing a sequence of negotiations with all three >$1B Parcel Select customers – UPS, FedEx, and Amazon** to secure long-term commitments.
• **Part 3. Building flexible pricing agreements with DHL and Pitney Bowes** to give them tools to win competitive business and build 100% last-mile USPS partnerships.

⁴ This narrative is reinforced by the significant lobbying efforts that UPS undertakes to challenge existing pricing, with a push to force USPS to allocate more costs to its parcel business and force up prices.
For all components, USPS is maximizing contribution by pricing to what the market will bear:

- Competitive market analysis to surgically set pricing by weight and entry point
- Implemented dimension-weight pricing element

7.1 **Expanding Parcel Select to large retailers.**

As traditional retailers expanded e-commerce businesses, USPS launched a “great equalizer” mission.

**Walmart** signed an agreement in December 2019 and became the first major retailer to begin developing a network around USPS Delivery Units. This agreement laid the foundation for USPS to win net-new business – Walmart is 85% FedEx today. **However, this relationship is at immediate risk if USPS cannot provide certainty to customer.**

- **Walmart account is worth ~$10M today but has an upwards potential of >$100M – all of which currently goes to competitors.**
- **Walmart has capital plans to build a sort center network to enter packages at the Post Office. They can only do this with both operational and pricing certainty as significant capital investment will be required by Walmart to execute this strategy to align their network to our network.**
- **If Walmart program scales, it will meet the 2-day service expectation of consumers with no membership fee and increase access to e-commerce for low income Americans.**
- **By leveraging the USPS Parcel Select product, Walmart can now compete with Amazon’s seven day a week delivery offering.**

**Target** has been in ongoing negotiations and solution development work with USPS for over a year. USPS has not secured the business and lost the business to UPS’ competitive bids in late 2019. Target now has plans to pilot a program similar to Walmart by September 2020.

Many retailers are interested in building relationship at USPS sortation plants (one step “up” from the post office). Currently, USPS is cost-disadvantaged due to automation and operational capacity constraints in these facilities.

- **As part of management’s package strategy, network investments would enable USPS to develop a competitive product for a broader customer base including: Staples, Office Depot, and Home Depot.**
- **The Postal Service is trying to win new business in this mid-network product. However, customers say USPS’ price is not competitive and build solutions with FedEx and UPS instead.**

7.2 **Executing a sequence of negotiations with UPS, FedEx, and Amazon.**

At the beginning of 2019, the Postal Service initiated a reset of the largest Parcel Select customers.

- **UPS negotiations (concluded in June 2019) created a new relationship with UPS and blueprinted a new overall approach to Parcel Select customers:**
  - **Growth is a requirement** for discounts and decline results in a reversion to published rates
  - **Rate certainty is provided** with growth requirements.
  - **Sunday product is available at a premium.**
  - **Commitment to give USPS 100% of UPS Mail Innovations (Parcel Select Lightweight).**
- **FedEx negotiations faced headwinds given plan to in-source volumes. USPS exercised FedEx termination clause in September 2019. Post NSA termination notice, USPS entered into**
negotiations with the goal of winning Sunday delivery and retaining suburban and rural SmartPost volume:
- FedEx requested discounts on Parcel Select Lightweight and discounts in Heavyweight.
- FedEx was unwilling to commit volumes and USPS management concluded negotiations.
- Amazon negotiations were planned to begin in early 2020, with intent of solidifying the growth relationship in alignment with UPS agreement. [NOTE – Deep Dive in Section 8].

7.3 Building flexible pricing agreements with DHL and Pitney Bowes.

DHL and Pitney Bowes are consolidators like UPS, however they do not have last-mile capabilities. They build custom solutions and use USPS for the last mile.
- Both partners indicated new customers could be won if there was an “alternative price” that could be employed at Postal Service management’s discretion.
- Alternative price program enables partners to cite “net new” or “at risk” business and to request improved rates to increase likelihood of winning business (for example, USPS and Pitney Bowes are actively collaborating to win BarkBox as a customer – a $5M opportunity).

8 Opportunity to build a growing partnership with Amazon.

Amazon is USPS’ largest customer. In FY19, it generated $3.9B in revenue across all business. In Parcel Select, it generated $2.6B in revenue and $1.3B in contribution. It generated more contribution than any other customer by almost 2 times.

In early 2020, USPS prepared to initiate Amazon negotiations following the conclusion of FedEx negotiations. There are two foundational components to the ongoing relationship reset:
1. Guaranteeing contribution certainty for USPS’ existing business in exchange for price increase certainty on non-discounted (or published rate) volume.
2. Winning business currently going to other carriers at and expanding overall relationship.

Component 1. Guaranteeing contribution for USPS

USPS has an opportunity to guarantee multiple years of contribution in exchange for price increase certainty on non-discounted volume.

Management recommends aggressively leveraging Amazon’s most-recent request for price increase certainty to execute the Parcel Select strategy and establish high-consequence volume commitments.

Amazon is looking to engage in negotiations as quickly as possible, to facilitate their own network planning. This is to USPS’ advantage, as it represents a significant departure from how Amazon traditionally operates. The opportunity to create this contribution security is time-limited, and it is critical to move swiftly while USPS has an outsized role in enabling business continuity.

Proposed terms would align, in principle, with UPS agreement.

Exhibit: Potential Terms to Improve Amazon NSA and Secure Contribution Certainty

<table>
<thead>
<tr>
<th>Term</th>
<th>Opening Ask</th>
<th>Similar NSA Examples</th>
<th>Improvement on current Amazon NSA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commitment length</td>
<td>3-5 years, 1 year termination notice</td>
<td>FedEx and UPS</td>
<td>NO guaranteed contribution commitments today</td>
</tr>
</tbody>
</table>
Decline Penalty | Move all Parcel Select volume to published pricing if growth falls below commitments. | UPS | This would capture significant contribution in event Amazon began to withdraw.
---|---|---|---
Geo-segments | Align price to relative competitive market price. | UPS | Maximizes contribution by aligning to customer economics.
Volume Growth Tiers | Volume growth calculated on rolling 4Q basis. | Volume tiers for FedEx Growth tiers for UPS NSA | Ensures revenue increase of up to $3B+ over 3 years.
Rapid volume reduction | Volume volatility in a 5-digit ZIP removes discounts. | UPS FedEx (ZIP level) | Incentivizes operational consistency.

Component 2. Building new business.
Since peak 2019, Amazon has needed additional capacity and entered new volume at USPS’ sortation facilities at published rates (no discounts). As they continue to invest in their own fulfillment capabilities, they are looking for a long-term sortation partner beyond temporary “capacity augmentation”.

Currently, they see significant opportunity to transfer volumes currently won by other carriers if negotiations can commence. These negotiations are nascent, but represent an opportunity to begin to retake share of the business, **USPS has fallen from 60% of share to 30% of share today in 3 years.**

What happens if neither component is executed?
Amazon is expected to grow to 70% of the e-commerce market by 2024. Failure to retain or grow this relationship represents a significant opportunity-cost in terms of both retaining and growing contribution.

If UPS cannot guarantee contribution from Amazon in exchange for certainty (Component 1), it will lose a majority of Amazon’s volume in a post-COVID world. Amazon will be forced to in-source and reduce USPS’ total share of volume. **This likely represents a loss of ~$1.0B in annual contribution by FY2023.** This business would continue to decline as Amazon scaled alternative solutions until USPS only provided the most-rural deliveries (<6-7% of volume today).

If Component 2 is not executed, USPS has an **opportunity-cost which would limit the overall potential to retake share of Amazon’s business and to grow as amazon grows.** (Note: **UPS currently has $8B of revenue** with Amazon and has been investing to expand this relationship).

9 Request of the Board of Governors to move forward with Parcel Select strategy

USPS management intends to continue moving forward swiftly with implementation of Parcel Select strategy. Consistently, customers look to secure their operational plans well in-advance of peak and require certainty by early summer. Pausing strategy implementation would be a decision to cede growth in the overall business in the mid-term, and accept near-term contribution loss.

Any major price increases for USPS customers will result in a limited near-term contribution windfall lasting less than one year. Extreme price increases would make initiating “peak operations” profitable for all competitors, and they would quickly absorb volumes at reduced margins, mitigating any near-term windfall contribution. **USPS will ultimately see an annual loss of ~$3.3B in contribution, and will lose the opportunity to further grow business.**
Without this strategy, package volumes will resume their decline as competitors adapt to the new normal. In parallel, USPS’ fiscal deficit will grow.

Management requests the following from the Board of Governors:

- Continued support of the package strategy to sustain course towards financial sustainability.
- Authority to sustain current course parcel select strategy and proceed with customer negotiations.
- Serve as a voice to customers and communicate USPS will stand by their businesses as they grow their package business.
- Provide outreach to CEOs of Target and Walmart to provide certainty.
10 Appendix A – Additional information on competitor in-sourcing capabilities

Amazon has been aggressively insourcing volume with Amazon Logistics, sending 2B+ packages in FY19, which primarily cuts into USPS’ share:

<table>
<thead>
<tr>

Major USPS last-mile competitors (UPS, FedEx and Amazon Logistics) are all currently making investments to increase capacity and network capabilities. While FedEx is not building out capabilities for <1lb parcels (or currently taking a large share of Amazon), UPS and AMZL have investments that suggest expanded capacity across both lightweight and heavyweight parcels.

**UPS has the capability to absorb a majority of USPS-Amazon volume in the near future with limited incremental investment.**

- **Major investments in new and expanded facilities will increase UPS daily capacity by ~3-5M pieces per day in 2020:**
  - 1 new regional super-hub in Harrisburg, PA with ability to process up to 100K packages per hour.
  - 2 new super-hubs in Tacoma, WA & Ontario, CA with ability to process ~50K packages per hour.
  - 3 new automated sortation & distribution centers with ability to process at least ~20K packages per hour.
  - Transition to ~100% sortation automation increases efficiency by 30%.

- **Ability to handle incremental volume in the last mile will require significant expansion of workforce (+100K temporary workers employed during peak) and delivery fleet (+25%)**

USPS management has assessed the multi-year contribution impact based on the following go-forward Amazon scenarios:

a) Contribution harvest strategy through rate increases while maintaining NSA.
b) Steady-state contract status with steady contribution decline.
c) Contractually “locked-in” state to grow contribution.
   - C1: Maintain minimum 0% volume growth (“no decline”) to keep NSA pricing
   - C2: Maintain low 5% volume growth to steal share from competitors
   - C3: Maintain strong 15% volume growth in line with Amazon’s e-commerce growth
d) Increase published prices to 4X and terminate Amazon NSA; volume shifts to Amazon insourcing and competitors but USPS does not win back significant volume through other Parcel Select customer (UPS)

Note: USPS includes Priority Mail Express, Priority Mail, First-Class Package Service, First-Class Mail Parcels, Standard Post, Parcel Select, Parcel Select Lightweight, PRS, Standard Mail Parcels, BPM Parcels, Library Mail and Media Mail.

5 Colography, for parcels less than 70 pounds. Note: The delivery chart above includes all network and last mile parcels and credits each company based on which company delivers the parcel to final destination. Some of these products may have traversed the networks of these other carriers prior to entry into the Postal Service’s network for delivery. For USPS these views include Priority Mail Express, Priority Mail, First-Class Package Service, First-Class Mail Parcels, Standard Post, Parcel Select, Parcel Select Lightweight, PRS, and Standard Mail Parcels. USPS excludes BPM Parcels, Library Mail. For the delivery view, USPS volume includes SurePost and SmartPost volume. The origin view reflects volume that originates with the shipper.
13 Appendix D: Labor Implications

In the event of rapid losses of package volumes triggered by major price increases, the Postal Service would need to remove costs as a result of the lost revenue. These variable costs are directly tied to American jobs. These stable jobs would be compromised at a time of significant economic decline.

- The loss of Parcel Select volume would equate to approximately 55,961,000 bargaining unit work hours.

<table>
<thead>
<tr>

</table>

- Currently, the Postal Service has the ability to lay off its non-career workforce for lack of work, as well as a portion of its career bargaining unit work force depending on the union.

- Notably, the Postal Service’s universal service obligation means that a reduction in workload associated with a loss of package volume may not translate to dollar-for-dollar cost savings. The Postal Service will still incur the fixed costs of servicing the nation’s delivery points, albeit with reduced revenue per delivery point.

- In some cases (APWU Clerks and Mail Handlers, for example), there are not enough employees (career and non-career) eligible for layoff to capture all of the savings from the reduction in work hours associated with the loss of competitive package volume. The Postal Service would have to
wait for excess employees to attrit out (or consider seeking and negotiating a VERA) in order to capture further savings.

- While non-career employees may be let go relatively quickly for lack of work, the union(s) will no doubt challenge any attempt to eliminate a wide swath of the workforce. Furthermore, for those employee crafts (Clerks, Mail Handlers) where it would be necessary to lay off career employees to capture the savings, there are a number of contractual steps the Postal Service must take before implementing a layoff.

- From an operational standpoint, the practicality of eliminating the most flexible component of the Postal Service’s workforce would also need to be considered and weighed against potential cost savings. Moreover, the employees who remain on the rolls (i.e., who are protected from layoff) will be the most expensive, most senior employees, so cost per remaining work hour will increase.

For the reasons above, it would not be possible to reduce these costs at a pace that is commensurate with the revenue lost. Therefore, USPS’ cash position would be further negatively impacted by a radical loss of volumes.
Fulfilling our Mission: Path forward for Parcel Select

"Neither snow, nor rain, nor heat, nor gloom of night stays these couriers from the swift completion of their appointed rounds"

14 Appendix E: Indirect Parcel Select Customers ..................................................................................18

In early 2019, USPS management defined a strategy for Parcel Select to (1) reinvigorate legacy partnerships while securing contribution and (2) win new customers. As Parcel Select volumes declined for the first time, this strategy became critical to maintaining the resilience of the package business.

USPS management intends to continue moving forward swiftly with implementation of Parcel Select strategy. Consistently, customers look to secure their operational plans well in-advance of peak and require certainty by early summer. Pausing strategy implementation would be a decision to cede growth in the overall business in the mid-term, and accept near-term contribution loss.

In the interest of a financially healthy Postal Service, USPS management requests the following from the Board of Governors:

- Continued support of the package strategy to sustain course towards financial sustainability.
- Authority to sustain current course of the parcel select strategy and proceed with customer negotiations.
- Willingness to call and assure customers that USPS will be a partner to their businesses as they grow packages.
- Provide outreach to CEOs of Target and Walmart, Target and Amazon to provide certainty.

USPS-20-1215-A-004977
1 Introduction

Purpose of this memo
The objective of this document is to brief the Board of Governors on the ongoing Parcel Select (last-mile) strategy and its value to the Postal Service and to the American public.

Management requests authority to continue execution of the Parcel Select strategy.

The role of our package business
In 2019, packages generated $22.7B of revenue and $7.4B of contribution for the Postal Service. The contribution from the package business helps fund the Universal Service Obligation and enables USPS to deliver on its mission to serve all Americans, not only those in cities and affluent neighborhoods. As mail volumes decline, packages have been and will continue to be critical to the financial health of USPS. Without packages, USPS financial position would degrade.

Brief overview of Parcel Select as a last-mile network product
USPS serves customers with two product types: full-network (First-Class Package Service, Priority Mail) and last-mile (Parcel Select). In 2019, Parcel Select generated $6.8B in revenue and $3.3B in contribution.

In the last-mile space, USPS works either with consolidators (like UPS or DHL) or works directly with retailers (like Walmart or CVS) to carry out the last mile delivery. For the most part, last-mile customers deliver their packages to a Delivery Unit (Post Office), and manages the last mile to the address.

The Postal Service is facing headwinds in the last mile space
Legacy carriers like UPS and FedEx built their businesses on a high margin B2B market. With the growth of e-commerce, they heavily invested to transform their networks to capture the lower margin and high-growth B2C market. Operating profitable B2C networks requires unprecedented densities for these carriers, and they initially relied on USPS Parcel Select to support their expansion. However, due to consistent USPS price increases, these customers built their own networks and pursued delivering volume themselves. As a result, in 2019 Parcel Select volumes declined for the first time.

FedEx announced publicly it will end its partnership with USPS. FedEx told USPS they were leaving for one reason: “the price was too high.”

COVID-19 has accelerated e-commerce penetration for most retail businesses
As a result of the COVID-19 pandemic, retailers are shifting their business models to catch the wave of a turbocharged e-commerce landscape. Online sales have grown ~50%, and Parcel Select volumes have
increased 30-40% vs. prior year. While the current growth in package volumes is a temporary spike, a significant portion of the new volumes may persist even as Americans’ lives return to a “new normal.”

We are at an inflection point in our Parcel Select strategy
Many retailers – including Target, Walmart, and pharmaceutical companies – need to provide ‘fast and free’ shipping to be competitive online. Retailers’ business models have thin margins, and require both affordable and stable price points for their shipping. They are ready to invest in the Postal Service relationship by developing cost-effective networks that bring their product to our facilities.

However, these network investments represent substantial capital outlays, with multi-year payback periods. To justify the investment, our customers need operational and price certainty. The recent political narrative around USPS calls into question both our price stability and our near-term operational viability. Customers have told management that a USPS partnership now comes with new risks: price volatility, operational unpredictability, and legislation to limit USPS to mail delivery only.

We need to move quickly. While other carriers have wavered operationally, our customers and the American public have been reminded that the United States Postal Service is a force uniting America. This is the moment to hold fast to our Parcel Select strategy – make clear the Board’s competitive business strategy and proceed with negotiations to secure our future.

2 Overview of our Parcel Select customer base
Shippers access Parcel Select in two ways.

1. Indirectly using consolidators like DHL, FedEx, UPS, or Pitney Bowes who do the first and middle mile for the customer and pass the package to the Postal Service at the Delivery Unit (Post Office). These relationships support a broad base of shippers from small storefronts to critical government services like the Department of Veteran’s Affairs.

2. Directly by bringing their product to USPS facilities. Examples of these customers include: Walmart, Amazon, and Target.

Indirect partnerships bring end-shippers to USPS via mixed-network solutions, where USPS executes the last mile. UPS and FedEx have a non-exclusive relationship and use USPS when it is economical. Pitney Bowes and DHL almost exclusively use USPS to execute their last mile.

- Very few customers have the density to drop at a plant or a post office directly. Instead, many large brick and mortar retailers use partners to access our network, including: Macy’s, Gap, Kohl’s, Victoria’s Secret, Bath & Body Works and Walgreens.
- Companies like QVC, HSN, General Motors, and Unilever also access our network indirectly.
- Using this model, USPS delivers for more than 20,000 businesses across the United States.
Direct partnerships bring packages directly to the USPS network like consolidators. These partnerships require significant capital investments from customers. Potential new customers need operational and price stability as soon as possible to prepare mid-term capital plans and near-term plans for peak 2021.

- Walmart is piloting Parcel Select in Florida and was considering building its network around USPS in order to compete with e-commerce players. They have indicated USPS has favorable economics, superior service, excellent customer experience, and nimble support relative to FedEx. They are now concerned with USPS’ price stability and scalability of this pilot program. They have their staff assessing the risk before making further investments.

- Target was planning to pilot a direct Parcel Select relationship with USPS. Target has historically partnered indirectly with USPS through UPS.

- Amazon is the largest legacy partner and stated it wants to continue building the relationship. Due to the administration’s recent comments about “Internet companies” and their relationship with the US Postal Service, they remain concerned about the risk associated with USPS. Amazon for the first time in our relationship reduced volume in 2019 by XX% driven in part by their concerns about their ability to meet their customer promise through USPS. They have demonstrated that they can and will pull away business from us to mitigate risk.

- USPS is in ongoing conversations with Home Depot, Staples, and Chewy.com (PetSmart).

Across both direct and indirect partnerships, USPS Parcel Select plays a particularly crucial role in pharmaceuticals. Since March 14, USPS has made more than 20M Parcel Select pharmaceutical deliveries. Customers include: US Department of Veteran Affairs, Humana, CVS, Walgreens, and Costco.

3 The economics of Parcel Select

In 2019 alone, Parcel Select contributed $6.8B of revenue and $3.3B in contribution. Every Parcel Select NSA is profitable. A majority of packages entered at a Post Office cover their cost by 1.5 to 2 times.

There is significant political discourse on the business case for Parcel Select pricing. Many arguments that pricing is below cost appear tied to a 2017 Citibank report that was wrong. Citibank indicated that USPS would need to increase price by 50% in order to break even – but it was based on incorrect assumptions. This article has since been disproven by both Business Insider and USPS management.
USPS management informed the White House Domestic Policy Advisor in 2017 of the CitiBank retraction.

*CitiBank has retracted its analysis – with the lead analyst publicly stating “I’d love to say it wasn’t a mistake.”*

Parcel Select is high-contribution because the marginal cost to deliver to a residence is quite low when the Postal Service would already drive by every address due to its Universal Service Obligation. Parcel Select is actually a key way for USPS to improve contribution from each stop. This is particularly important as the number of delivery points have grown, while overall network volumes have dropped.

### 4 Pricing Overview for Parcel Select

To retain and grow business in the last mile, USPS must price competitively. This means pricing below the customer’s alternative (self-delivery or another carrier) while maximizing USPS contribution.

- As with all products, published prices are established and approved by the Board of Governors. The Board approved moderate price increases for both Parcel Select Lightweight (12.3%, 4.2%) and Heavyweight (9.9%, 2.2%) for FY2019 and FY2020 respectively.
- Today, ~60% of Parcel Select volume is charged at published rates (no NSA discounts). This means that, for a majority of customers, price changes take effect almost immediately.
- When necessary to win new business, USPS uses Negotiated Service Agreements to be competitive with what the market will bear. These discounts are tied to published rate increases.

Today, competitors’ costs to deliver are decreasing for several reasons:

- **Improved density** – More people are getting more packages. This makes routes more profitable.
- **Lower labor costs** – UPS, FedEx, and Amazon use flex and contract drivers to reduce cost.
- **Significant multi-year capital investments** – Competitors investing to improve efficiency in package sortation, automate facilities, and develop last-mile residential networks.
- **New innovations** – Competitors building low-cost delivery alternatives such as retail access points and lockers.
The exhibit to the left demonstrates how competitors’ costs-to-deliver the last-mile vary based on both density (number of packages on a route) and by underlying cost structures (labor rates). Over the past five years, these curves have consistently shifted downwards. In parallel, USPS consistently increased price, leading to a point of “diseconomy” for Parcel Select customers.

From FY16, across all of Parcel Select, USPS published prices increased ~38%.

In 2019, FedEx publicly indicated that it would fully insource Parcel Select volumes, discontinue its SmartPost product, and expand to offer Sunday delivery. FedEx told USPS management:

“This decision was based on pure economics. The service was excellent.”

This indicates prices were not competitive. In April of 2020, USPS saw a 34% decline in FedEx volume. USPS is on track to lose ~$1.1B in revenue and ~$600M in contribution by 2022.

Even in a strong relationship like UPS, there are significant headwinds to consider. In particular, the union agreement between Teamsters and UPS state:

- UPS is required to in-source any time there are two packages going to same address.
- UPS SurePost product (its Parcel Select product) is tied in the UPS Teamster’s contract to the existence of the FedEx SmartPost product. FedEx has announced the cessation and rebranding of the FedEx SmartPost product. We believe this will be a major point in upcoming 2022 Teamster negotiation and puts ~$1.4B in revenue and ~$750M in contribution at risk.

5 Implications of a Significant Price Increase

If USPS were to raise Parcel Select prices by anywhere from 0.5-4 times current published pricing, we would rapidly price ourselves “out of the market.” Management has assessed that the entire $3.3B of annual contribution would be at risk. Under extreme price increase scenarios, customers would in-source or divert volumes to alternative carriers within a year.

Commented [KSJ-WD2]: Better to have volume changes to SPLY. For Jan 20, show % to SPLY through March 2020
In the event of a significant price increase, we expect the following scenarios would likely occur:

- **Amazon**: USPS would lose $1.3B of contribution within 1 year. Volume would shift into Amazon Delivery Service Provider’s and UPS’ networks (already has $8B of Amazon business).<sup>4</sup>
- **UPS**: USPS would lose the relationship and the contribution guarantee established in contract. UPS would sunset its relationship with the Postal Service and in-source significant volumes to Ground network by activating “peak operations.”
- **FedEx**: would maintain its current course of decline and might accelerate in-sourcing plans.
- **Partners like DHL and Pitney Bowes** would become immediately uncompetitive in the market. They would likely be unable to find a replacement delivery partner, and would sell their assets.

Losing Parcel Select business effectively cedes the package market while disproportionately exposing small and medium businesses:

- All customers will become wary of relying on USPS as a shipping solution.
- Small & Medium businesses that pay published rates will be disproportionately impacted.
- UPS and FedEx will in-source all their packages. Their cost-to-deliver will rapidly fall, and they will actively pursue USPS’ Priority Mail and First Class Package Service volumes, and will win.

USPS has the most pricing flexibility in low-density regions where competitors have the highest cost to deliver. However this flexibility is tenuous and constrained because:

- Unilateral price increases would impact all Lightweight volume regardless of geography
- Even lowest-density areas are facing downwards price pressures and are at-risk as competitors unlock new models like flex drivers or access points (previously described)

---

Additional impacts of major price increases include:

- **Disproportionate impact to the pharmaceutical sector at a time** when these services are more critical than ever. In particular, customers like the Department of Veterans Affairs, Walgreens, or ExpressScripts would see price increases in <1 month.

- **Loss of USPS as the price anchor in the market for all business and all consumers.** Rural Americans would likely absorb the greatest price increases.\(^5\) If USPS exited packages, UPS and FedEx would have the ability to take exorbitant price increases in an oligopolistic fashion.

- **Rapid loss of volume and loss of contribution would further impact USPS’ cash position.**

6 **Labor and cost implications of rapid package volume loss.**

In the event of rapid losses of Parcel Select volumes, the Postal Service would need to remove costs as a result of lost revenue. These variable costs are directly tied to American jobs.

Currently, the Postal Service has the ability to lay off its non-career workforce for lack of work, as well as a portion of its career bargaining unit work force depending on the union. The loss of Parcel Select volume would equate to approximately 55,961,000 bargaining unit work hours or the removal of ~28,000 non-career jobs.

Notably, the Postal Service’s universal service obligation means that a reduction in workload associated with a loss of package volume may not translate to dollar-for-dollar cost savings. The Postal Service will still incur the fixed costs of servicing the nation’s delivery points, albeit with reduced revenue per delivery point.

This average wage-rate increase would negatively impact all USPS economics across both market dominant and domestic competitive product.

[Additional information in Appendix D on labor economics associated with package volume loss]

7 **Parcel Select commercial strategy**

Since early 2019, USPS management has been implementing an updated Parcel Select strategy:

- **Part 1. Expanding the product to serve as the “great equalizer” for brick and mortar retailers** as they build their e-commerce business (Walmart, Target).
- **Part 2. Executing a sequence of negotiations with all three >$1B Parcel Select customers** – UPS, FedEx, and Amazon to secure long-term commitments.
- **Part 3. Building flexible pricing agreements with DHL and Pitney Bowes to give them tools to win competitive business** and build 100% last-mile USPS partnerships.

For all components, USPS is maximizing contribution by pricing to what the market will bear:

- Competitive market analysis to surgically set pricing by weight and entry point.
- Dimension-weight pricing element.

---

\(^5\) This narrative is reinforced by the significant lobbying efforts that UPS undertakes to challenge existing pricing, with a push to force USPS to allocate more costs to its parcel business and force up prices.
7.1 Expanding Parcel Select to large retailers.

As traditional retailers expanded e-commerce businesses, USPS launched a “great equalizer” mission.

Walmart signed an agreement in December 2019 and became the first major retailer to begin developing a network around USPS Delivery Units. This agreement laid the foundation for USPS to win net-new business – Walmart currently ships 85% of volume with FedEx today. However, this relationship is at immediate risk if USPS cannot provide certainty to customer.

- Walmart account is worth ~$10M today but has an upwards potential of >$100M – all of which currently goes to competitors.
- Walmart has capital plans to build a sort center network to enter packages at the Post Office. They can only do this with both operational and pricing certainty as significant capital investment will be required by Walmart to execute this strategy to align their network to our network.
- If Walmart program scales, it will meet the 2-day service expectation of consumers with no membership fee and increase access to e-commerce for low income Americans.
- By leveraging the USPS Parcel Select product, Walmart can now compete with Amazon’s seven day a week delivery offering.

Target has been in ongoing negotiations and solution development work with USPS for over a year. USPS has not secured the business and lost the business to UPS’ competitive bids in late 2019. Target now has plans to pilot a program similar to Walmart by September 2020.

Many retailers are interested in building relationship at USPS sortation plants (one step “up” from the post office). Currently, USPS is cost-disadvantaged due to capacity constraints in these facilities.

- As part of management’s package strategy, network investments would enable USPS to develop a competitive product for a broader customer base including: Staples, Office Depot, and Home Depot.
- The Postal Service is trying to win new business in this mid-network product. However, customers say USPS’ price is not competitive and build solutions with FedEx and UPS instead.

7.2 Executing a sequence of negotiations with UPS, FedEx, and Amazon.

At the beginning of 2019, the Postal Service initiated a reset of the largest Parcel Select customers.

- UPS negotiations (concluded in June 2019) created a new relationship with UPS and blueprinted a new overall approach to Parcel Select customers:
  - Growth is a requirement for discounts and decline results in a reversion to published rates
  - Rate certainty is provided with growth requirements.
  - Sunday product is available at a premium.
  - Commitment to give USPS 100% of UPS Mail Innovations (Parcel Select Lightweight).

- FedEx negotiations faced headwinds given plan to in-source volumes. USPS exercised FedEx termination clause in September 2019. Post termination notice, USPS entered into negotiations with the goal of winning Sunday delivery and retaining suburban and rural SmartPost volume:
  - FedEx requested discounts on Parcel Select Lightweight and discounts in Heavyweight.
  - FedEx was unwilling to commit volumes and USPS management concluded negotiations.

- Amazon negotiations were planned to begin in early 2020, with intent of solidifying the growth relationship in alignment with UPS agreement. [NOTE – Deep Dive in Section 8].
7.3 Building flexible pricing agreements with DHL and Pitney Bowes.

DHL and Pitney Bowes are consolidators like UPS, however they do not have last-mile capabilities. They build custom solutions and use USPS for the last mile.

- Both partners indicated new customers could be won if there was an “alternative price” that could be employed at Postal Service management’s discretion.
- Alternative price program enables partners to cite “net new” or “at risk” business and to request improved rates to increase likelihood of winning business (for example, USPS and Pitney Bowes are actively collaborating to win BarkBox as a customer – a $5M opportunity).

8 Opportunity to build a growing partnership with Amazon.

Amazon is USPS’ largest customer. In FY19, it generated $3.9B in revenue across all business. In Parcel Select, it generated $2.6B in revenue and $1.3B in contribution. It generated more contribution than any other customer by almost 2 times.

In early 2020, USPS prepared to initiate Amazon negotiations following the conclusion of FedEx negotiations. There are two foundational components to the ongoing relationship reset:

1. Guaranteeing contribution certainty for USPS’ existing business in exchange for price increase certainty on non-discounted (or published rate) volume.
2. Winning new business currently going to other carriers at and expanding overall relationship.

Component 1. Guaranteeing contribution for USPS

USPS has an opportunity to guarantee multiple years of contribution in exchange for price increase certainty on non-discounted volume.

Management recommends aggressively leveraging Amazon’s most-recent request for price increase certainty to execute the Parcel Select strategy and establish high-consequence volume commitments.

Amazon is looking to engage in negotiations as quickly as possible, to facilitate their own network planning. This is to USPS’ advantage, as it represents a significant departure from how Amazon traditionally operates. The opportunity to create this contribution security is time-limited, and it is critical to move swiftly while USPS has an outsized role in enabling business continuity.

Proposed terms would align, in principle, with UPS agreement.

Exhibit: Potential Terms to Improve Amazon NSA and Secure Contribution Certainty

<td>Volume growth calculated on rolling 4Q basis.</td>
<td>Volume tiers for FedEx</td>
<td>Ensures revenue increase of up to $3B+ over 3 years</td>
</tr>
</tbody>
</table>
Component 2. Building new business.

Since peak 2019, Amazon has needed additional capacity and entered new volume at USPS’ sortation facilities at published rates (no discounts). As they continue to invest in their own fulfillment capabilities, they are looking for a long-term sortation partner beyond temporary “capacity augmentation”.

Currently, they see significant opportunity to transfer volumes currently won by other carriers if negotiations can commence. These negotiations are nascent, but represent an opportunity to begin to retake share of the business, **USPS has fallen from 60% of share to 30% of share today in 3 years.**

What happens if neither component is executed?

Amazon is expected to grow to 70% of the e-commerce market by 2024. Failure to retain or grow this relationship represents a significant opportunity-cost in terms of both retaining and growing contribution. If USPS cannot guarantee contribution from Amazon in exchange for price certainty, it will lose a majority of Amazon’s volume. Amazon will be forced to in-source. This represents a loss of $1.0B in annual contribution by FY2023. This business would continue to decline as Amazon scaled alternative solutions until USPS only provided the rural deliveries (~6-7% of volume today).

If Component 2 is not executed, **USPS would lose the opportunity** to retake lost Amazon business (Note: **UPS currently has $8B of revenue** with Amazon).

9 Request of the Board of Governors to move forward with Parcel Select strategy

USPS management intends to continue moving forward swiftly with implementation of Parcel Select strategy. Consistently, customers look to secure their operational plans well in-advance of peak and require certainty by early summer. Pausing strategy implementation would be a decision to cede growth in the overall business in the mid-term, and accept near-term contribution loss.

Any major price increases for USPS customers will result in a limited near-term contribution windfall lasting less than one year. Extreme price increases would make initiating “peak operations” profitable for all competitors, and they would quickly absorb volumes at reduced margins, mitigating any near-term windfall contribution. **USPS will ultimately see an annual loss of ~$3.3B in contribution, and will lose the opportunity to further grow business. Further, the overall package business would be compromised, and USPS would see its deficit grow and its cash position degenerate quicker than projected.**

In the interest of a financially healthy Postal Service, USPS management requests the following from the Board of Governors:

- Continued support of the package strategy to sustain course towards financial sustainability.
- Authority to sustain current course parcel select strategy and proceed with customer negotiations.
- Call customers and tell them USPS will stand by their businesses as they grow packages.
• Provide outreach to CEOs of Target and Walmart, Target and Amazon to provide certainty.
10 Appendix A: Additional information on competitor in-sourcing capabilities

Amazon has been aggressively insourcing volume with Amazon Logistics, sending 2B+ packages in FY19, which primarily cuts into USPS’ share:

<table>
<thead>
<tr>
<th></th>

</tbody>
</table>

Major USPS last-mile competitors (UPS, FedEx and Amazon Logistics) are all currently making investments to increase capacity and network capabilities. While FedEx is not building out capabilities for <1lb parcels (or currently taking a large share of Amazon), UPS and AMZL have investments that suggest expanded capacity across both lightweight and heavyweight parcels.

UPS has the capability to absorb a majority of USPS-Amazon volume in the near future with limited incremental investment.

- **Major investments in new and expanded facilities will increase UPS daily capacity by ~3-5M pieces per day in 2020:**
  - 1 new regional super-hub in Harrisburg, PA with ability to process up to 100K packages per hour.
  - 2 new super-hubs in Tacoma, WA & Ontario, CA with ability to process ~50K packages per hour.
  - 3 new automated sortation & distribution centers with ability to process at least ~20K packages per hour.
  - Transition to ~100% sortation automation increases efficiency by 30%.

- **Ability to handle incremental volume in the last mile will require significant expansion of workforce (+100K temporary workers employed during peak) and delivery fleet (+25%)**
USPS management has assessed the multi-year contribution impact based on the following go-forward Amazon scenarios:

a) Contribution harvest strategy through rate increases while maintaining NSA.

b) Steady-state contract status with steady contribution decline.

c) Contractually “locked-in” state to grow contribution.
   - C1: Maintain minimum 0% volume growth (“no decline”) to keep NSA pricing
   - C2: Maintain low 5% volume growth to steal share from competitors
   - C3: Maintain strong 15% volume growth in line with Amazon’s e-commerce growth

d) Increase published prices to 4X and terminate Amazon NSA; volume shifts to Amazon insourcing and competitors but USPS does not win back significant volume through other Parcel Select customer (UPS)

Appendix D: Labor Implications

In the event of rapid losses of package volumes triggered by major price increases, the Postal Service would need to remove costs as a result of the lost revenue. These variable costs are directly tied to American jobs. These stable jobs would be compromised at a time of significant economic decline.

- The loss of Parcel Select volume would equate to approximately 55,961,000 bargaining unit work hours.

- Currently, the Postal Service has the ability to lay off its non-career workforce for lack of work, as well as a portion of its career bargaining unit work force depending on the union.

- Notably, the Postal Service’s universal service obligation means that a reduction in workload associated with a loss of package volume may not translate to dollar-for-dollar cost savings. The Postal Service will still incur the fixed costs of servicing the nation’s delivery points, albeit with reduced revenue per delivery point.

- In some cases (APWU Clerks and Mail Handlers, for example), there are not enough employees (career and non-career) eligible for layoff to capture all of the savings from the reduction in work hours associated with the loss of competitive package volume. The Postal Service would have to
wait for excess employees to attrit out (or consider seeking and negotiating a VERA) in order to capture further savings.

- While non-career employees may be let go relatively quickly for lack of work, the union(s) will no doubt challenge any attempt to eliminate a wide swath of the workforce. Furthermore, for those employee crafts (Clerks, Mail Handlers) where it would be necessary to lay off career employees to capture the savings, there are a number of contractual steps the Postal Service must take before implementing a layoff.

- From an operational standpoint, the practicality of eliminating the most flexible component of the Postal Service’s workforce would also need to be considered and weighed against potential cost savings. Moreover, the employees who remain on the rolls (i.e., who are protected from layoff) will be the most expensive, most senior employees, so cost per remaining work hour will increase.

For the reasons above, it would not be possible to reduce these costs at a pace that is commensurate with the revenue lost. Therefore, USPS’ cash position would be further negatively impacted by a radical loss of volumes.
14 Appendix E: Indirect Parcel Select Customers

Customers with >$1M in indirect Parcel Select in FY19, by consolidator

Across DHL, FedEx, UPS, and Pitney Bowes/Newgistics, 265 distinct customers had >$1M in indirect Parcel Select spend in FY19, driving $2.2B in revenue for USPS.

In early 2019, USPS management defined a strategy for Parcel Select to (1) reinvigorate legacy partnerships while securing contribution and (2) win new customers. As Parcel Select volumes declined for the first time, this strategy became critical to maintaining the resilience of the package business.

USPS management intends to continue moving forward swiftly with implementation of Parcel Select strategy. Consistently, customers look to secure their operational plans well in-advance of peak and require certainty by early summer. Pausing strategy implementation would be a decision to cede growth in the overall business in the mid-term, and accept near-term contribution loss.

In the interest of a financially healthy Postal Service, USPS management requests the following from the Board of Governors:

- Continued support of the package strategy to sustain course towards financial sustainability.
- Authority to sustain current course of the parcel select strategy and proceed with customer negotiations.
- Willingness to call and assure customers that USPS will be a partner to their businesses as they grow packages.
- Provide outreach to CEOs of Walmart, Target and Amazon to provide certainty.
1 Introduction

Purpose of this memo
The objective of this document is to brief the Board of Governors on the ongoing Parcel Select (last-mile) strategy and its value to the Postal Service and to the American public.

Management requests authority to continue execution of the Parcel Select strategy.

The role of our package business
In FY2019, packages generated $22.7B of revenue and $7.4B of contribution for the Postal Service. The contribution from the package business helps fund the Universal Service Obligation and enables USPS to deliver on its mission to serve all Americans, not only those in cities and affluent neighborhoods. As mail volumes decline, packages have been and will continue to be critical to the financial health of USPS. Without packages, USPS financial position would degrade.

Brief overview of Parcel Select as a last-mile network product
USPS serves customers with two product types: full-network (First-Class Package Service, Priority Mail) and last-mile (Parcel Select). In FY2019, Parcel Select generated $6.8B in revenue and $3.3B in contribution.

In the last-mile space, USPS works either with consolidators (like UPS or DHL) or works directly with retailers (like Walmart or CVS) to carry out the last mile delivery. For the most part, last-mile customers deliver their packages to a Delivery Unit (Post Office), and manages the last mile to the address.

The Postal Service is facing headwinds in the last mile space
Legacy carriers like UPS and FedEx built their businesses on a high margin B2B market. With the growth of e-commerce, they heavily invested to transform their networks to capture the lower margin and high-growth B2C market. Operating profitable B2C networks requires unprecedented densities for these carriers, and they initially relied on USPS Parcel Select to support their expansion. However, due to consistent USPS price increases, these customers built their own networks and pursued delivering volume themselves. As a result, in 2019 Parcel Select volumes declined for the first time.

On May 30, 2019, FedEx announced publicly it will end its partnership with USPS. FedEx told USPS they were leaving for one reason: “the price was too high.”

COVID-19 has accelerated e-commerce penetration for most retail businesses
As a result of the COVID-19 pandemic, retailers are shifting their business models to catch the wave of a turbocharged e-commerce landscape. Online sales have grown ~50%, and Parcel Select volumes have
increased 20-30% vs. prior year. While the current growth in package volumes is a temporary spike, a significant portion of the new volumes may persist even as Americans’ lives return to a “new normal.”

We are at an inflection point in our Parcel Select strategy
Many retailers – including Target, Walmart, and pharmaceutical companies – need to provide ‘fast and free’ shipping to be competitive online. Retailers’ business models have thin margins, and require both affordable and stable price points for their shipping. They are ready to invest in the Postal Service relationship by developing cost-effective networks that bring their product to our facilities.

However, these network investments require substantial capital outlays, with multi-year payback periods. To justify the investment, our customers need operational and price certainty. The recent political narrative around USPS calls into question both our price stability and our near-term operational viability. Customers have told management that a USPS partnership now comes with new risks: price volatility, operational unpredictability, and legislation to limit USPS to mail delivery only.

We need to move quickly. While other carriers have wavered operationally, our customers and the American public have been reminded that the United States Postal Service is a force uniting America. This is the moment to make clear the Board’s competitive business strategy and proceed with negotiations to secure our future.

2 Overview of our Parcel Select customer base
Shippers access Parcel Select in two ways.
1. Indirectly using consolidators like DHL, FedEx, UPS, or Pitney Bowes who do the first and middle mile for the customer and deliver the package to the Postal Service at the Delivery Unit (Post Office). These relationships support a broad base of shippers from small storefronts to critical government services like the Department of Veteran’s Affairs.
2. Directly by bringing their product to USPS facilities. Examples of these customers include: Walmart, Amazon, and Target.

Indirect partnerships bring end-shippers to USPS via mixed-network solutions, where USPS executes the last mile. UPS and FedEx have a non-exclusive relationship and use USPS when it is economical. Pitney Bowes and DHL almost exclusively use USPS to execute their last mile.

- Very few customers have the density to drop at a plant or a post office directly. Instead, many large brick and mortar retailers use partners to access our network, including: Macy’s, Gap, Kohl’s, Victoria’s Secret, Bath & Body Works and Walgreens.
- Companies like QVC, HSN, General Motors, and Unilever also access our network indirectly.
- Using this model, USPS delivers for more than 20,000 businesses across the United States.

---

1 During the period between Mar 14 and May 1, BCI – CDM data.
Direct partnerships bring packages directly to the USPS network like consolidators. These partnerships require significant capital investments from customers. Potential new customers need operational and price stability as soon as possible to prepare mid-term capital plans and near-term plans for peak 2020.

- **Walmart** is piloting Parcel Select in Florida and was considering building its network around USPS in order to compete with e-commerce players. They have indicated USPS has favorable economics, superior service, excellent customer experience, and nimble support relative to FedEx. *They are now concerned with USPS’ price stability and scalability of this pilot program. They have their staff assessing the risk before making further investments.*

- **Target** was planning to pilot a direct Parcel Select relationship with USPS. Target has historically partnered indirectly with USPS through UPS.

- **Amazon** is the largest legacy partner and stated it wants to continue building the relationship. Due to the administration’s recent comments about “Internet companies” and their relationship with the US Postal Service, *they remain concerned about the risk associated with USPS.* Amazon for the first time in our relationship reduced volume in 2019 by ~10% driven in part by their concerns about their ability to meet their customer promise through USPS. They have demonstrated that they can and will pull away business from us to mitigate risk.

- **USPS** is in ongoing conversations with **Home Depot, Staples, and Chewy.com** (PetSmart).

Across both direct and indirect partnerships, USPS Parcel Select plays a particularly crucial role in pharmaceuticals. Since March 14, USPS has made more than 20M Parcel Select pharmaceutical deliveries. Customers include: US Department of Veteran Affairs, Humana, CVS, Walgreens, and Costco.

### 3 The economics of Parcel Select

In 2019 alone, Parcel Select contributed $6.8B of revenue and $3.3B in contribution. Every Parcel Select NSA is profitable. Packages entered at a Post Office cover their attributable cost by 1.5 to 2 times.

There is significant political discourse on the business case for Parcel Select pricing. Many arguments that pricing is below cost appear tied to a 2017 Citibank report that was wrong.² Citibank indicated that USPS would need to increase price by 50% in order to break even – but it was based on incorrect assumptions. This article was also disproven by both Business Insider² and USPS management. USPS management

---

¹ Citi published a report entitled “The Free Shipping Tax” on April 18, 2017. In this article it indicated that Parcel Select prices would need to increase 50% in order to break-even. The analyst used an incorrect number based on the floor of the institutional cost coverage, as opposed to the actual institutional cost coverage figure.

² Citibank indicated that USPS would need to increase price by 50% in order to break even – but it was based on incorrect assumptions.
informed the White House Domestic Policy Advisor Andrew Bremberg in 2017 that the CitiBank report was inaccurate and detailed the inaccuracies.

_CitiBank admitted it used erroneous assumptions in its analysis – with the lead analyst publicly stating “I’d love to say it wasn’t a mistake.”_

Parcel Select is high-contribution because the marginal cost to deliver to a residence is quite low when the Postal Service would already drive by every address due to its Universal Service Obligation. Parcel Select is actually a key way for USPS to improve contribution from each stop. This is particularly important as the number of delivery points have grown, while overall network volumes have dropped.

4 **Pricing Overview for Parcel Select**

To retain and grow business in the last mile, USPS must price competitively. This means pricing below the customer’s alternative (self-delivery or another carrier) while maximizing USPS contribution.

- **As with all products, published prices are established and approved by the Board of Governors.** The Board approved moderate price increases for both Parcel Select Lightweight (12.3%, 4.2%) and Parcel Select DDU Heavyweight (9.9%, 2.0%) for FY2019 and FY2020 respectively.
- **Today, ~56% of Parcel Select volume is charged at published rates (no NSA discounts).** This means that, for a majority of customers, price changes take effect almost immediately.

<table>
<thead>
<tr>
<th>The majority of Parcel Select revenue is earned at published prices and is not discounted</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Rural and lightweight volume is not discounted.</td>
</tr>
<tr>
<td>• Discounts are applied to locations with greater delivery density to incentivize use of USPS last-mile</td>
</tr>
</tbody>
</table>

- **When necessary to win new business, USPS uses Negotiated Service Agreements to be competitive with what the market will bear. These discounts are tied to published rate increases.**

**Today, competitors’ costs to deliver are decreasing for several reasons:**

- **Improved density** – More people are getting more packages. This makes routes more profitable.
- **Lower labor costs** – UPS$^3$, FedEx, and Amazon use flex and contract drivers to reduce cost.
- **Significant multi-year capital investments** – Competitors investing to improve efficiency in package sortation, automate facilities, and develop last-mile residential networks.

---

• *New innovations* – Competitors building low-cost delivery alternatives such as retail access points and lockers

The exhibit to the left demonstrates how competitor’s costs-to-deliver the last-mile vary based on both density (number of packages on a route) and by underlying cost structures (labor rates). Over the past five years, these curves have consistently shifted downwards. In parallel, USPS consistently increased price, leading to a point of “diseconomy” for some Parcel Select customers. From FY2016 to FY2020, USPS raised Parcel Select Prices ~38%.

In 2019, FedEx publicly indicated that it would fully insource Parcel Select volumes, discontinue its SmartPost product, and expand to offer Sunday delivery. FedEx told USPS management:

“This decision was based on pure economics. The service was excellent.”

**USPS is on track to lose ~$1.1B in revenue and ~$600M in contribution by 2022.** USPS terminated the NSA in September 2019, and all remaining volumes with FedEx will begin to be charged at published rates – they will lose their discounts.

Even in a strong relationship like UPS, there are significant headwinds to consider. In particular, the union agreement between Teamsters and UPS state:

• UPS is required to in-source any time there are two packages going to same address.
• UPS SurePost product (its Parcel Select product) is tied in the UPS Teamster’s contract to the existence of the FedEx SmartPost product. FedEx has announced the cessation of the FedEx
SmartPost product. We believe this will be a major point in upcoming 2022 Teamster negotiation and puts ~$1.4B in revenue and ~$750M in contribution at risk.

5 Implications of a Significant Price Increase

If USPS were to raise Parcel Select prices by anywhere from 0.5-4 times current published pricing, we would rapidly price ourselves “out of the market.” Management has assessed that the entire $3.3B of annual contribution would be at risk. Under extreme price increase scenarios, customers would in-source or divert volumes to alternative carriers within a year.

</table>

In the event of a significant price increase, we expect the following scenarios would likely occur:

- **Amazon**: USPS would lose $1.3B of contribution within 1 year. Volume would shift into Amazon Delivery Service Provider’s and UPS’ networks (already has $8B of Amazon business).
- **UPS**: USPS would lose the relationship and the contribution guarantee established in contract. UPS would sunset its relationship with the Postal Service and in-source significant volumes to Ground network by activating “peak operations.”
- **FedEx**: would maintain its current course of decline and might accelerate in-sourcing plans. Their rates will increase in September 2020, as their NSA expires.
- **Partners like DHL and Pitney Bowes would become immediately uncompetitive in the market.** They would likely be unable to find a replacement delivery partner, and would sell their assets.

4 Source: Volume and revenue figures from Business Customer Intelligence. Contribution is estimated based on partner volume and inject profile.
Losing Parcel Select business effectively cedes the package market while disproportionately exposing small and medium businesses:

- All customers will become wary of relying on USPS as a shipping solution.
- Small & Medium businesses that pay published rates will be disproportionately impacted.
- UPS and FedEx will in-source all their packages. Their cost-to-deliver will rapidly fall, and they will actively pursue USPS’ Priority Mail and First Class Package Service volumes, and will win.

USPS has the most pricing flexibility in low-density regions where competitors have the highest cost to deliver. However this flexibility is tenuous and constrained because:

- Unilateral price increases would impact all Lightweight volume regardless of geography
- Even lowest-density areas are facing downwards price pressures and are at-risk as competitors unlock new models like flex drivers or access points (previously described)

Additional impacts of major price increases include:

- **Disproportionate impact to the pharmaceutical sector at a time** when these services are more critical than ever. In particular, customers like the Department of Veterans Affairs, Walgreens, or ExpressScripts would **see price increases in <1 month**.
- **Loss of USPS as the price anchor in the market for all business and all consumers**. Rural Americans would likely absorb the greatest price increases.\(^6\) If USPS exited packages, UPS and FedEx would have the ability to take exorbitant price increases in an oligopolistic fashion.
- **Rapid loss of volume and loss of contribution would further impact USPS’ cash position.**

6 **Labor and cost implications of rapid package volume loss.**

In the event of rapid losses of Parcel Select volumes, the Postal Service would need to remove costs at a rate commensurate with the lost revenue. These variable costs are directly tied to American jobs.

These stable jobs would be compromised at a time of significant economic decline. A significant number of non-career employees (City Carrier Assistants (CCA), Rural Carrier Assistants (RCA), and Postal Support Employees (PSE)) would have their positions eliminated immediately as the lower wage non-career employees would have to be contractually reduced before impacting career employees.

In addition, management would see a net reduction in the CCAs in excess of cap agreed to with the unions. These lower-cost carriers were permitted contingent on Sunday volume. These lower-cost carriers support overall operations seven days a week, and reduction in CCAs would impact overall cost structure for mail and packages.

[Additional information in Appendix D on labor economics associated with package volume loss]

7 **Parcel Select commercial strategy**

Since early 2019, USPS management has been implementing an updated Parcel Select strategy:

\(^6\) This narrative is reinforced by the significant lobbying efforts that UPS undertakes to challenge existing pricing, with a push to force USPS to allocate more costs to its parcel business and force up prices.
• Part 1. Expanding the product to serve as the “great equalizer” for brick and mortar retailers as they build their e-commerce business (Walmart, Target).

• Part 2. Executing a sequence of negotiations with all three >$1B Parcel Select customers – UPS, FedEx, and Amazon to secure long-term commitments.

• Part 3. Building flexible pricing agreements with DHL and Pitney Bowes to give them tools to win competitive business and build 100% last-mile USPS partnerships.

For all components, USPS is maximizing contribution by pricing to what the market will bear:

• Competitive analysis to surgically price Parcel Select by entry point, time of day, and weight.

• Dimension-weight pricing element.

• Sophisticated ZIP-level pricing to match market elasticities.

7.1 Expanding Parcel Select to large retailers.

As traditional retailers expanded e-commerce businesses, USPS launched a “great equalizer” mission.

Walmart signed an agreement in December 2019 and became the first major retailer to begin developing a network around USPS Delivery Units. This agreement laid the foundation for USPS to win net-new business – Walmart currently ships 85% of volume with FedEx today. However, this relationship is at immediate risk if USPS cannot provide certainty to customer.

• Walmart account is worth ~$10M today but has an upwards potential of >$100M – all of which currently goes to competitors.

• Walmart has capital plans to build a sort center network to enter packages at the Post Office. They can only do this with both operational and pricing certainty as significant capital investment will be required by Walmart to execute this strategy to align their network to our network.

• If Walmart program scales, it will meet the 2-day service expectation of consumers with no membership fee and increase access to e-commerce for low income Americans.

• By leveraging the USPS Parcel Select product, Walmart can now compete with Amazon’s seven day a week delivery offering.

Target has been in ongoing negotiations and solution development work with USPS for over a year. USPS has not secured the business and lost the business to UPS’ competitive bids in late 2019. Target now has plans to pilot a program similar to Walmart by September 2020.

Many retailers are interested in building relationship at USPS destinatng sortation plants (one step “up” from the post office). Currently, USPS is cost-disadvantaged due to capacity constraints in these facilities.

• As part of management’s package strategy, network investments would enable USPS to develop a competitive product for a broader customer base including: Staples, Office Depot, and Home Depot.

• The Postal Service is trying to win new business in this mid-network product. However, customers say USPS’ price is not competitive and build solutions with FedEx and UPS instead.

7.2 Executing a sequence of negotiations with UPS, FedEx, and Amazon.

At the beginning of 2019, the Postal Service initiated a reset of the largest Parcel Select customers.
• UPS negotiations (concluded in June 2019) created a new relationship with UPS and blueprinted a new overall approach to Parcel Select customers:
  o Growth is a requirement for discounts and decline results in a reversion to published rates
  o Rate caps provided with growth requirements.
  o Sunday product is available at a premium.
  o Commitment to give USPS 100% of UPS Mail Innovations – a $610M business for USPS (Parcel Select Lightweight).

• FedEx negotiations faced headwinds given plan to in-source volumes. USPS exercised FedEx termination clause in September 2019. Post termination notice, USPS entered into negotiations with the goal of winning Sunday delivery and retaining suburban and rural SmartPost volume:
  o FedEx requested discounts on Parcel Select Lightweight and discounts in Heavyweight.
  o FedEx was unwilling to commit volumes and USPS management concluded negotiations.

• Amazon negotiations were planned to begin in early 2020, with intent of solidifying the growth relationship in alignment with UPS agreement. [NOTE – Deep Dive in Section 8].

7.3 Building flexible pricing agreements with DHL and Pitney Bowes.

DHL and Pitney Bowes are consolidators like UPS, however they do not have last-mile capabilities. They build custom solutions and use USPS for the last mile.

• Both partners indicated new customers could be won if there was an “alternative price” that could be employed at Postal Service management’s discretion.

• Alternative price program lets partners request improved rates to win hard-to-win or at-risk business (for example, USPS and Pitney Bowes are actively collaborating to win BarkBox as a customer – a $5M opportunity).

8 Opportunity to build a growing partnership with Amazon.

Amazon is USPS’ largest customer. In FY19, it generated $3.9B in revenue across all business. In Parcel Select, it generated $2.6B in revenue and $1.3B in contribution. It generated more contribution than any other customer by almost 2 times.

In early 2020, USPS prepared to initiate Amazon negotiations following the conclusion of FedEx negotiations. There are two foundational components to the ongoing relationship reset:

1. Component 1. Guaranteeing contribution certainty for USPS’ existing business in exchange for price increase non-discounted (or published rate) volume.
2. Component 2. Building new Amazon business currently going to other carriers and expanding overall relationship.

Component 1. Guaranteeing contribution for USPS

USPS has an opportunity to guarantee multiple years of contribution in exchange for price increase caps on non-discounted volume.

Management recommends aggressively leveraging Amazon’s most-recent request for price increase caps to execute the Parcel Select strategy and establish high-consequence volume commitments.

Amazon is looking to engage in negotiations as quickly as possible, to facilitate their own network planning. This is to USPS’ advantage, as it represents a significant departure from how Amazon traditionally operates. The opportunity to create this contribution security is time-limited, and it is critical to move swiftly while USPS has an outsized role in enabling business continuity.

Proposed terms would align, in principle, with UPS agreement.
### Exhibit: Potential Terms to Improve Amazon NSA and Secure Contribution Certainty

<table>
<thead>
<tr>
<th>Term</th>

</tr>
<tr>
<td>Rapid volume reduction</td>
<td>Volume volatility in a 5-digit ZIP removes discounts.</td>
<td>UPS FedEx (ZIP level)</td>
<td>Incentivizes operational consistency</td>
</tr>
</tbody>
</table>

**Component 2. Building new Amazon business.**

Since peak 2019, Amazon has needed additional capacity and entered new volume at USPS’ destinating sortation facilities at published rates (no discounts). As they continue to invest in their own fulfillment capabilities, they are looking for a long-term sortation partner beyond temporary “capacity augmentation”.

Currently, they see significant opportunity to transfer volumes currently won by other carriers if negotiations can commence. These negotiations are nascent, but represent an opportunity to begin to retake share of the business, **USPS has fallen from 60% of share to 30% of share today in 3 years.**

**What happens if neither component is executed?**

Amazon may grow to 70% of the e-commerce market by 2024. Failure to retain or grow this relationship represents a significant opportunity-cost in terms of both retaining and growing contribution.

If USPS cannot guarantee contribution from Amazon in exchange for price certainty, it will lose a majority of Amazon’s volume. Amazon will be forced to in-source. **This represents a loss of ~$1.0B in annual contribution by FY2023.** This business would continue to decline as Amazon scaled alternative solutions until USPS only provided the rural deliveries (<6-7% of volume today).

If Component 2 is not executed, **USPS would lose the opportunity** to retake lost Amazon business (Note: **UPS currently has $8B of revenue** with Amazon).
9 Request of the Board of Governors to move forward with Parcel Select strategy

USPS management intends to continue moving forward swiftly with implementation of Parcel Select strategy. Consistently, customers look to secure their operational plans well in-advance of peak and require certainty by early summer. Pausing strategy implementation would be a decision to cede growth in the overall business in the mid-term, and accept near-term contribution loss.

Any major price increases for USPS customers will result in a limited near-term contribution windfall lasting less than one year. Extreme price increases would make initiating “peak operations” profitable for all competitors, and they would quickly absorb volumes at reduced margins, mitigating any near-term windfall contribution. **USPS will ultimately see an annual loss of ~$3.3B in contribution, and will lose the opportunity to further grow business. Further, the overall package business would be compromised, and USPS would see its deficit grow and its cash position degenerate quicker than projected.**

In the interest of a financially healthy Postal Service, USPS management requests the following from the Board of Governors:

- Continued support of the package strategy to sustain course towards financial sustainability.
- Authority to sustain current course of the parcel select strategy and proceed with customer negotiations.
- Willingness to call and assure customers that USPS will be a partner to their businesses as they grow packages.
- Provide outreach to CEOs of Walmart, Target and Amazon to provide certainty.

10 Appendix A: Additional information on competitor in-sourcing capabilities

Amazon has been aggressively insourcing volume with Amazon Logistics, sending 2B+ packages in FY19, which primarily cuts into USPS’ share:

</tr>
</tbody>
</table>

Major USPS last-mile competitors (UPS, FedEx and Amazon Logistics) are **all currently making investments** to increase capacity and network capabilities. While FedEx is not building out capabilities for <1lb parcels (or currently taking a large share of Amazon), UPS and AMZL have investments that suggest expanded capacity across both lightweight and heavyweight parcels.

**UPS has the capability to absorb a majority of USPS-Amazon volume in the near future with limited incremental investment.**
• Major investments in new and expanded facilities will increase UPS daily capacity by ~3-5M pieces per day in 2020:
  o 1 new regional super-hub in Harrisburg, PA with ability to process up to 100K packages per hour.
  o 2 new super-hubs in Tacoma, WA & Ontario, CA with ability to process ~50K packages per hour.
  o 3 new automated sortation & distribution centers with ability to process at least ~20K packages per hour.
  o Transition to ~100% sortation automation increases efficiency by 30%.
• Ability to handle incremental volume in the last mile will require significant expansion of workforce (+100K temporary workers employed during peak) and delivery fleet (+25%)
USPS management has assessed the multi-year contribution impact based on the following go-forward Amazon scenarios:

a) Contribution harvest strategy through rate increases of ~50% of PSLW while maintaining NSA.
b) Steady-state contract status with steady contribution decline and standard rate increases.
c) Contractually “locked-in” state to grow contribution.
   - C1: Maintain minimum 0% volume growth (“no decline”) to keep NSA pricing
   - C2: Maintain low 5% volume growth to steal share from competitors
   - C3: Maintain strong 15% volume growth in line with Amazon’s e-commerce growth
d) Increase published prices to 4X and terminate Amazon NSA; volume shifts to Amazon insourcing and competitors but USPS does not win back significant volume through other Parcel Select customer (UPS)

13 Appendix D: Labor Implications

In the event of rapid losses of package volumes triggered by major price increases, the Postal Service would need to remove costs as a result of the lost revenue. These variable costs are directly tied to American jobs. These stable jobs would be compromised at a time of significant economic decline.

- The loss of Parcel Select volume would equate to approximately 55,961,000 bargaining unit work hours.

- Currently, the Postal Service has the ability to lay off its non-career workforce for lack of work, as well as a portion of its career bargaining unit work force depending on the union.

- Notably, the Postal Service’s universal service obligation means that a reduction in workload associated with a loss of package volume may not translate to dollar-for-dollar cost savings. The Postal Service will still incur the fixed costs of servicing the nation’s delivery points, albeit with reduced revenue per delivery point.

- In some cases (APWU Clerks and Mail Handlers, for example), there are not enough employees (career and non-career) eligible for layoff to capture all of the savings from the reduction in work hours associated with the loss of competitive package volume. The Postal Service would have to
wait for excess employees to attrit out (or consider seeking and negotiating a VERA) in order to capture further savings.

- While non-career employees may be let go relatively quickly for lack of work, the union(s) will no doubt challenge any attempt to eliminate a wide swath of the workforce. Furthermore, for those employee crafts (Clerks, Mail Handlers) where it would be necessary to lay off career employees to capture the savings, there are a number of contractual steps the Postal Service must take before implementing a layoff.

- From an operational standpoint, the practicality of eliminating the most flexible component of the Postal Service’s workforce would also need to be considered and weighed against potential cost savings. Moreover, the employees who remain on the rolls (i.e., who are protected from layoff) will be the most expensive, most senior employees, so cost per remaining work hour will increase.

For the reasons above, it would not be possible to reduce these costs at a pace that is commensurate with the revenue lost. Therefore, USPS’ cash position would be further negatively impacted by a radical loss of volumes.
14 Appendix E: Indirect Parcel Select Customers

Customers with >$1M in indirect Parcel Select in FY19, by consolidator

Across DHL, FedEx, UPS, and Pitney Bowes/Newgistics, 265 distinct customers had >$1M in indirect Parcel Select spend in FY19, driving $2.2B in revenue for USPS.

In early 2019, USPS management defined a strategy for Parcel Select to (1) reinvigorate legacy partnerships while securing contribution and (2) win new customers. As Parcel Select volumes declined for the first time in 2019 after years of growth for the first time, this strategy became critical to maintaining the resilience of the package business.

USPS management intends to continue moving forward swiftly with implementation of Parcel Select strategy. Consistently, customers look to secure their operational plans well in-advance of peak and require certainty by early summer. Pausing strategy implementation would be a decision to cede growth in the overall business in the mid-term, and accept near-term contribution loss.

In the interest of a financially healthy Postal Service, USPS management requests the following from the Board of Governors:

- Continued support of the package strategy to sustain course towards financial sustainability and maximize package and overall USPS profitability.
- Authority to Concurrence with our plans to sustain current course of the parcel select strategy and proceed with customer negotiations.
- Willingness to call and assure customers that USPS will be a partner to their businesses as they grow packages.
Provide outreach to CEOs of Walmart, Target and Amazon to provide certainty.

1 Introduction

Purpose of this memo
The objective of this document is to brief the Board of Governors on the ongoing Parcel Select (last-mile) strategy and its value to the Postal Service and to the American public.

Management requests concurrence authority to continue execution of the Parcel Select strategy.

The role of our package business
In FY2019, packages generated $22.7B of revenue and $7.4B of contribution for the Postal Service. The contribution from the package business helps fund the Universal Service Obligation and enables USPS to deliver on its mission to serve all Americans, not only those in cities and affluent neighborhoods. As mail volumes decline, packages have been and will continue to be critical to the financial health of USPS. Without packages, USPS financial position would degrade.

Brief overview of Parcel Select as a last-mile network product
USPS serves customers with two product types: full-network (First-Class Package Service, Priority Mail) and last-mile (Parcel Select). In FY2019, Parcel Select generated $6.8B in revenue and $3.3B in contribution.

In the last-mile space, USPS works either with consolidators (like UPS or DHL) or works directly with retailers (like Walmart or CVS) to carry out the last mile delivery. For the most part, last-mile customers deliver their packages to a Delivery Unit (Post Office), and manages the last mile to the address.

The Postal Service is facing headwinds in the last mile space
Legacy carriers like UPS and FedEx built their businesses on a high margin B2B market. With the growth of e-commerce, they heavily invested to transform their networks to capture the lower margin and high-growth B2C market. Operating profitable B2C networks requires unprecedented densities for these carriers, and they initially relied on USPS Parcel Select to support their expansion. However, due to growth in package density that improve economies and to consistent USPS parcel select price increases, these customers built their own networks and pursued delivering volume themselves. Amazon also in-sourced and contracted out to other delivery companies for volume that USPS previously delivered. As a result, in 2019 Parcel Select volumes declined for the first time.
On May 30, 2019, FedEx announced publicly it will end its partnership with USPS insource substantially all of the volume that they have historically given to USPS to deliver the last mile. FedEx told USPS they were leaving for one main reason: “the price was too high.”

COVID-19 has accelerated e-commerce penetration for most retail businesses
As a result of the COVID-19 pandemic, retailers are shifting their business models to catch the wave of a turbocharged e-commerce landscape. Online sales have grown ~50%, and Parcel Select volumes have increased about 40-50 vs. prior year. While the current level of growth in package volumes is a temporary spike, a significant portion of the new volumes may persist following the recession even as Americans’ lives return to a “new normal.”

We are at an inflection point in our Parcel Select strategy
Many retailers – including Target, Walmart, and pharmaceutical companies – need to provide ‘fast and free’ shipping to be competitive online. Retailers’ business models have thin margins, and require both affordable and stable price points for their shipping. They are ready to invest in the Postal Service relationship by developing cost-effective networks that bring their product to our facilities.

However, these network investments require substantial capital outlays, with multi-year payback periods. To justify the investment, our customers need operational and price certainty. The recent political narrative around USPS calls into question both our price stability and our near-term operational viability. Customers have told management that a USPS partnership now comes with new risks: price volatility, operational unpredictability, and legislation to limit USPS to deliver mail only.

We need to move quickly. While other carriers have wavered operationally, our customers and the American public have been reminded that the United States Postal Service is a force uniting America. This is the moment to make clear the Board’s competitive business strategy and proceed with negotiations to secure our future.

2 Overview of our Parcel Select customer base
Shippers access Parcel Select in two ways.
1. Indirectly using consolidators like DHL, FedEx, UPS, or Pitney Bowes who do the first and middle mile for the customer and deliver the package to the Postal Service at the Delivery Unit (Post Office). These relationships support a broad base of shippers from small storefronts to critical government services like the Department of Veteran’s Affairs.
2. Directly by bringing their product to USPS facilities. Examples of these customers include: Walmart, Amazon, and Target.

Indirect partnerships bring end-shippers to USPS via mixed-network solutions, where USPS executes the last mile. UPS and FedEx have a non-exclusive relationship and use USPS when it is economical. Pitney Bowes and DHL almost exclusively use USPS to execute their last mile.

- Very few customers have the density to drop at a plant or a post office directly. Instead, many large brick and mortar retailers use partners to access our network, including: Macy’s, Gap, Kohl’s, Victoria’s Secret, Bath & Body Works and Walgreens.
- Companies like QVC, HSN, General Motors, and Unilever also access our network indirectly.
- Using this model, USPS delivers for more than 20,000 businesses across the United States.

1 During the period between Mar 14 and May 1, BCI – CDM data.
Direct partnerships bring packages directly to the USPS network like consolidators. These partnerships require significant capital investments from customers. Potential new customers need operational and price stability as soon as possible to prepare mid-term capital plans and near-term plans for peak 2020.

- Walmart is piloting Parcel Select in Florida and was considering building its network around USPS in order to compete with e-commerce players. They have indicated USPS has favorable economics, superior service, excellent customer experience, and nimble support relative to FedEx. They are now concerned with USPS’ price stability and scalability of this pilot program. They have their staff assessing the risk before making further investments.

- Target was planning to pilot a direct Parcel Select relationship with USPS. Target has historically partnered indirectly with USPS through UPS.

- Amazon is the largest legacy partner and stated it wants to continue building the relationship. Due to the administration’s recent comments about “Internet companies” and their relationship with the US Postal Service, they remain concerned about the risk associated with USPS. Amazon for the first time in our relationship reduced volume in 2019 by ~10% driven in part by their concerns about their ability to meet their customer promise through USPS. They have demonstrated that they can and will pull away business from us to mitigate risk.

- USPS is in ongoing conversations with Home Depot, Staples, and Chewy.com (PetSmart).

Across both direct and indirect partnerships, USPS Parcel Select plays a particularly crucial role in pharmaceuticals. Since March 14, USPS has made more than 20M Parcel Select pharmaceutical deliveries. Customers include: US Department of Veteran Affairs, Humana, CVS, Walgreens, and Costco.

3 The economics of Parcel Select

In 2019 alone, Parcel Select contributed $6.8B of revenue and $3.3B in contribution. Every Parcel Select NSA is profitable. Packages entered at a Post Office cover their attributable cost by 1.5 to 2 times.

There is significant political discourse on the business case for Parcel Select pricing. Many arguments that pricing is below cost appear tied to a 2017 Citibank report that was wrong. Citibank indicated that USPS would need to increase price by 50% in order to break even – but it was based on incorrect assumptions. This article was also disproven by both Business Insider and USPS management. USPS management
informed the White House Domestic Policy Advisor Andrew Bremberg in 2017 that the CitiBank report was inaccurate and detailed the inaccuracies.

*CitiBank admitted it used erroneous assumptions in its analysis – with the lead analyst publicly stating “I’d love to say it wasn’t a mistake.”*

Parcel Select is high-contribution because the marginal cost to deliver to a residence is quite low when the Postal Service would already drive by every address due to its Universal Service Obligation. Parcel Select is actually a key way for USPS to improve contribution from each stop. This is particularly important as the number of delivery points have grown, while overall network volumes have dropped.

4 Pricing Overview for Parcel Select

To retain and grow business in the last mile, USPS must price competitively. This means pricing below the customer’s alternative (self-delivery or another carrier) while maximizing USPS contribution.

- As with all products, published prices are established and approved by the Board of Governors. The Board approved moderate price increases for both Parcel Select Lightweight (12.3%, 4.2%) and Parcel Select DDU Heavyweight (9.9%, 2.0%) for FY2019 and FY2020 respectively. The 2020 price increase was lower than 2019 as we saw volumes drop in 2019 for the first time, after taking over 30% increase in parcel select pricing over the last 5 years.
- Today, ~56% of Parcel Select volume is charged at published rates (no NSA discounts). This means that, for a majority of customers, published price changes take effect almost immediately.
- When necessary to win new business, USPS uses Negotiated Service Agreements to be competitive with what the market will bear. These discounts are tied to published rate increases.

Today, competitors’ costs to deliver are decreasing for several reasons:

- Improved density – More people are getting more packages. This lowers the per package cost of delivery and makes routes more profitable.
• **Lower labor costs** – UPS³, FedEx, and Amazon use some flex and contract drivers to reduce cost.
• **Significant multi-year capital investments** – Competitors investing to improve efficiency in package sortation, automate facilities, and develop last-mile residential networks.
• **New innovations** – Competitors building low-cost delivery alternatives such as retail access points and lockers.

The exhibit below to the left demonstrates how competitor’s costs-to-deliver the last-mile vary based on both density (number of packages on a route) and by underlying cost structures (labor rates). Over the past five years, these curves have consistently shifted downwards. In parallel, USPS consistently increased price, leading to a point of “diseconomy” for some Parcel Select customers. From FY2016 to FY2020, USPS raised Parcel Select Prices ~38%. I’d add a cost line for our attributable costs in the cost curves below.

In 2019, FedEx publicly indicated that it would fully insource Parcel Select volumes, discontinue its SmartPost product [is this defined?], and expand to offer Sunday delivery. FedEx told USPS management:

“This decision was based on pure economics. The service was excellent.”

USPS is on track to lose ~$1.1B in **FedEx** revenue and ~$600M in contribution by 2022. USPS terminated the NSA in September 2019, and all remaining volumes with FedEx will begin to be charged

---

at published rates – they will lose their discounts. We may consider additional price increases as FedEx has indicated they are leaving anyway.

Even in a strong relationship like UPS, there are significant headwinds to consider. In particular, the union agreement between Teamsters who deliver for the UPS and UPS state:

- UPS is required to in-source any time there are two packages going to same address.
- UPS SurePost product (its Parcel Select product) The Parcel Select volume that UPS has us deliver is dependent on NSA pricing. Also, the Teamsters agreement allows UPS to continue using Parcel Select with us as long as FedEx continues using us for Parcel Select. As mentioned earlier FedEx is eliminating their Parcel Select ties to us tied in the UPS Teamster’s contract to the existence of the FedEx SmartPost product. FedEx has announced the cessation of the FedEx SmartPost product. We believe this will be a major point in upcoming 2022 Teamster negotiation and puts ~$1.4B in revenue and ~$750M in contribution at risk. [If THIS IS ALREADY IN THE Teamsters contract then why would UPS still be able to continue using parcel select UNTIL THE CURRENT CONTRACT EXPIRES—SEEMS LIKE IF IT'S IN THE CONTRACT, THAT COULD HAPPEN SOONER?]

5 Implications of a Significant Price Increase

If USPS were to raise Parcel Select prices by anywhere from 0.5–4 times current published pricing, we would rapidly price ourselves “out of the market.” Management has assessed that the entire $3.3B of annual contribution would be at risk. Under extreme price increase scenarios, customers would in-source or divert volumes to alternative carriers within a year. While we would likely get more very short-term revenue and contribution after a steep price increase, we would have little to no volume and revenue in the medium to long term. We would effectively kill this product, and harm our reputation as a valued package delivery organization.

</table>
In the event of a significant price increase, we expect the following scenarios would likely occur:

- **Amazon**: USPS would lose $1.3B of contribution within 1 year very quickly, likely in 1-2 years depending on the size of the price increase. Volume would shift into Amazon Delivery Service Provider’s and UPS’ networks (UPS already has $8B of Amazon business).

- **UPS**: USPS would lose the relationship and the contribution guarantee established in their NSA contract. UPS would sunset its relationship with the Postal Service and in-source significant volumes to its Ground network by activating “peak operations.”

- **FedEx**: would maintain its current course of decline and might accelerate in-sourcing plans. Their rates will increase in September 2020, as their NSA expires.

- **Partners like DHL and Pitney Bowes**: would become immediately uncompetitive in the market. They would likely be unable to find a replacement delivery partner, and would exit the business or partner with another last mile delivery Company sell their assets.

Losing the Parcel Select business effectively cedes the package market while disproportionately exposing small and medium businesses:

- All customers will become wary of relying on USPS as a shipping solution.
- Small & Medium businesses that pay published rates will be disproportionately impacted.
- UPS and FedEx will in-source all their packages. Their cost-to-deliver will rapidly fall, and they will actively pursue USPS’ Priority Mail and First Class Package Service network businesses volumes, and will win.

USPS has the most pricing flexibility in low-density regions where competitors have the highest cost to deliver. However, this flexibility is tenuous and constrained because:

- Unilateral price increases would impact all Lightweight volume regardless of geography. [again, I don’t agree with this concept. We only have a handful of PS customers, and we could do NSA’s if it would benefit us.]
- Even lowest-density areas are facing downwards price pressures and are at-risk as competitors unlock new models like flex drivers or access points (previously described).

Additional impacts of major price increases include:

- **Disproportionate impact to the pharmaceutical sector at a time** when these services are more critical than ever. In particular, customers like the Department of Veterans Affairs, Walgreens, or Express Scripts would see price increases in <1 month.

---

• Loss of USPS as the **price anchor in the market for a competitive option for all business and all consumers**. Rural Americans would likely absorb the greatest price increases. If USPS exited packages, UPS and FedEx would have the ability to take exorbitant price increases in an oligopolistic fashion.

• Rapid loss of volume and loss of contribution would further impact USPS' cash position.

6 **Labor and cost implications of rapid package volume loss.**

In the event of rapid losses of Parcel Select volumes, the Postal Service would need to remove costs at a rate commensurate with the lost revenue. These variable costs are directly tied to postal employees. [there would still be American jobs, in other Companies]American jobs.

These stable jobs would be compromised at a time of significant economic decline. A significant number of non-career employees (City Carrier Assistants (CCA), Rural Carrier Assistants (RCA), and Postal Support Employees (PSE)) would have their positions eliminated immediately as the lower wage non-career employees would have to be contractually reduced before impacting career employees.

In addition, management would see a net reduction in the CCAs in excess of cap agreed to with the unions. These lower-cost carriers were permitted contingent on Sunday volume. These lower-cost carriers support overall operations seven days a week, and reduction in CCAs would impact overall cost structure for mail and packages.

[Additional information in Appendix D on labor economics associated with package volume loss]

7 **Parcel Select commercial strategy**

Since early 2019, USPS management has been implementing an updated Parcel Select strategy:

• Part 1. Expanding the product to serve as the “great equalizer” for brick and mortar retailers as they build their e-commerce business (Walmart, Target).

• Part 2. Executing a sequence of negotiations with all three >$1B Parcel Select customers – UPS, FedEx, and Amazon to secure long-term commitments.

• Part 3. Building flexible pricing agreements with DHL and Pitney Bowes to give them tools to win competitive business and build 100% last-mile USPS partnerships.

For all components, USPS is maximizing contribution by pricing to what the market will bear:

• Competitive analysis to surgically price Parcel Select by entry point, time of day, and weight.

• Dimension-weight pricing element.

• Sophisticated ZIP-level pricing to match market elasticities.

7.1 **Expanding Parcel Select to large retailers.**

As traditional retailers expanded e-commerce businesses, USPS launched a “great equalizer” mission.

---

6 This narrative is reinforced by the significant lobbying efforts that UPS undertakes to challenge existing pricing, with a push to force USPS to allocate more costs to its parcel business and force up prices.
Walmart signed an agreement in December 2019 and became the first major retailer to begin developing a network around USPS Delivery Units. This agreement laid the foundation for USPS to win net-new business – Walmart currently ships 85% of volume with FedEx today. However, this relationship is at immediate risk if USPS cannot provide certainty to customer.

- Walmart account is worth ~$10M today but has an upwards potential of >$100M – all of which currently goes to competitors.
- Walmart has capital plans to build a sort center network to enter packages at the Post Office. They can only do this with both operational and pricing certainty as significant capital investment will be required by Walmart to execute this strategy to align their network to our network.
- If Walmart program scales, it will meet the 2-day service expectation of consumers with no membership fee and increase access to e-commerce for low income Americans.
- By leveraging the USPS Parcel Select product, Walmart can now compete with Amazon’s seven day a week delivery offering.

Target has been in ongoing negotiations and solution development work with USPS for over a year. USPS has not secured the business and lost the business to UPS’ competitive bids in late 2019. Target now has plans to pilot a program similar to Walmart by September 2020.

Many retailers are interested in building relationship at USPS destinating sortation plants (one step “up” from the post office). Currently, USPS is cost-disadvantaged due to capacity constraints in these facilities.

- As part of management’s package strategy, network investments would enable USPS to develop a competitive product for a broader customer base including: Staples, Office Depot, and Home Depot.
- The Postal Service is trying to win new business in this mid-network product. However, customers say USPS’ price is not competitive and build solutions with FedEx and UPS instead.

7.2 Executing a sequence of negotiations with UPS, FedEx, and Amazon.

At the beginning of 2019, the Postal Service initiated a reset of the largest Parcel Select customers.

- **UPS negotiations** (concluded in June 2019) created a new relationship with UPS and blueprinted a new overall approach to Parcel Select customers:
  - Growth is a requirement for discounts and decline results in a reversion to published rates
  - Rate caps provided with growth requirements.
  - Sunday product is available at a premium.
  - Commitment to give USPS 100% of UPS Mail Innovations – a $610M business for USPS (Parcel Select Lightweight).

- **FedEx negotiations** faced headwinds given plan to in-source volumes. USPS exercised FedEx termination clause in September 2019. Post termination notice, USPS entered into negotiations with the goal of winning Sunday delivery and retaining suburban and rural SmartPost volume:
  - FedEx requested discounts on Parcel Select Lightweight and discounts in Heavyweight.
  - FedEx was unwilling to commit volumes and USPS management concluded negotiations.

- **Amazon negotiations** were planned to begin in early 2020, with intent of solidifying the growth relationship in alignment with UPS agreement. [NOTE – Deep Dive in Section 8].
7.3 Building flexible pricing agreements with DHL and Pitney Bowes.

DHL and Pitney Bowes are consolidators like UPS, however they do not have last-mile capabilities. They build custom solutions and use USPS for the last mile.

- Both partners indicated new customers could be won if there was an “alternative price” that could be employed at Postal Service management’s discretion.
- Alternative price program lets partners request improved rates to win hard-to-win or at-risk business (for example, USPS and Pitney Bowes are actively collaborating to win BarkBox as a customer – a $5M opportunity).

8 Opportunity to build a growing partnership with Amazon.

Amazon is USPS’ largest customer. In FY19, it generated $3.9B in revenue across all business. In Parcel Select, it generated $2.6B in revenue and $1.3B in contribution. It generated more contribution than any other customer by almost 2 times.

In early 2020, USPS prepared to initiate Amazon negotiations following the conclusion of FedEx negotiations. There are two foundational components to the ongoing relationship reset:

1. Component 1. Guaranteeing contribution certainty for USPS’ existing business in exchange for price increase non-discounted (or published rate) volume-price cap agreement on published rates.
2. Component 2. Building new Amazon business currently going to other carriers and expanding overall relationship.

Component 1. Guaranteeing contribution for USPS

USPS has an opportunity to get volume commitments for multiple years, effectively locking in years of contribution in exchange for price increase caps on non-discounted volume, establishing price caps for published prices. We get certainty on sustained contribution and Amazon gets certainty that their non-NSA prices will go up no more than a certain percentage each year.

Management recommends aggressively leveraging Amazon’s most recent request for price increase caps to execute the Parcel Select strategy and establish high-consequence volume commitments.

Amazon is looking to engage in negotiations as quickly as possible, to facilitate their own network planning. This is to USPS’s advantage, as it represents a significant departure from how Amazon traditionally operates. The opportunity to create this contribution security is time-limited, and it is critical to move swiftly while USPS has an outsized role in enabling business continuity.

Proposed terms would align, in principle, with UPS agreement.

Exhibit: Potential Terms to Improve Amazon NSA and Secure Contribution Certainty

<table>
<thead>
<tr>
<th>Term</th>
<th>Opening Ask</th>
<th>Similar NSA Examples</th>
<th>Improvement on current Amazon NSA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commitment length</td>
<td>3-5 years, 1 year termination notice</td>
<td>FedEx and UPS</td>
<td>Maintains commitment length and termination relationship</td>
</tr>
<tr>
<td>Decline Penalty for volume declines</td>
<td>Move all Parcel Select volume to published pricing if growth falls below commitments.</td>
<td>UPS</td>
<td>In the event Amazon is unable to meet their contractual commitments, they would experience a &gt;40% rate increase as prices shifted from discounted rates to published rates.</td>
</tr>
</tbody>
</table>

Commented [Cj-WD1]: Table below: The first two ideas are understandable, I don’t and therefore BOG likely won’t really get the rest of the table. We should either be more high level (We are trading price cap for volume commitments and leave it at that) or more detailed and provide more explanation as to how this works. I vote the former.

Commented [Cj-WD2]: The table in the other attachment to your 2:30 Email is far better worded, edited, etc. Did someone cut the wrong table into this document, or is it possible this is an old document that Jakki circulated this afternoon? I am confused.
<table>
<thead>
<tr>
<th>Component 2. Building new Amazon business</th>
</tr>
</thead>
<tbody>
<tr>
<td>Since <strong>December peak 2019</strong>, Amazon has needed additional capacity and entered new volume at USPS’ destinat...</td>
</tr>
</tbody>
</table>

Currently, they see significant opportunity to transfer volumes currently won by other carriers if negotiations can commence. These negotiations are nascent, but represent an opportunity to begin to **retake share of the business**, **grow our business**, USPS has fallen from 60% of share to 30% of share today in 3 years.

**What happens if neither component is executed?**

Amazon may grow to 70% of the e-commerce market by 2024. Failure to retain or grow this relationship represents a significant opportunity-cost in terms of both retaining and growing contribution.

If USPS cannot guarantee volumes contribution from Amazon in exchange for price certainty, it may lose a majority of Amazon’s volume. Amazon will be forced to in-source or move volume to more predictable partners. **This represents a loss of ~$1B in annual contribution by FY2023.** This business would continue to decline as Amazon scaled alternative solutions until USPS only provided the rural deliveries (<6-7% of volume today).

If Component 2 is not executed, USPS would lose the opportunity to retake lost Amazon business (Note: **UPS currently has $8B of revenue** with Amazon).

9 Request of the Board of Governors to move forward with Parcel Select strategy

USPS management intends to continue moving forward swiftly with implementation of Parcel Select strategy. Consistently, customers look to secure their operational plans well in advance of peak and require certainty by early summer. Pausing strategy implementation would be a decision to cede growth in the overall business in the mid-term, and accept near-term contribution loss.

Any major price increases for USPS customers will result in a limited near-term contribution windfall lasting less than one year, **1-2 years at most.** Extreme price increases would make initiating “peak operations” profitable for all competitors, and they would quickly absorb volumes at reduced margins, mitigating any near-term windfall contribution. **USPS will ultimately see an annual loss of ~$3.3B in contribution, and will lose the opportunity to further grow business.** Further, the overall package

---

**Commented [CJ-WD3]:** One guarantees volumes, not contribution. This change could made throughout.

**Commented [CJ-WD4]:** This slow loss of contribution seems at odds with the earlier statements about how fast they can in-source.

**Commented [CJ-WD5]:** We have said this before. This memo is very redundant, and not organized well. We seem to make the same points 3-5 times in wordy explanations. I would not recommend giving this to the BOG.

**Commented [CJ-WD6]:** Another issue—we start this discussion of excessive price taking defined as 50% to 400%. Then numerous times in the paper we say what will happen if we take these high price increases. Surely a 50% increase will cause different consequences than a 400%, but we don’t differentiate.
business would be compromised, and USPS would see its deficit grow and its cash position
degenerate quicker than projected.

In the interest of a financially healthy Postal Service, USPS management requests the following from the
Board of Governors:

- Continued support of the package strategy to sustain course towards financial sustainability.
- **Agreement Authority** to sustain current course of the parcel select strategy and proceed with
customer negotiations.
- Willingness to call and assure customers that USPS will be a partner to their businesses as they
grow packages.
- Provide outreach to CEOs of Walmart, Target and Amazon to provide certainty.

10 Appendix A: Additional information on competitor in-sourcing capabilities

Amazon has been aggressively insourcing volume with Amazon Logistics, sending 2B+ packages in
FY19, which primarily cuts into USPS’ share.

<table>
<thead>
<tr>
<th>FY17</th>
<th>FY18</th>
<th>F19</th>

</tr>
</tbody>
</table>

Major USPS last-mile competitors (UPS, FedEx and Amazon Logistics) are *all currently making*
investments to increase capacity and network capabilities. While FedEx is not building out capabilities
for <1lb parcels (or currently taking a large share of Amazon), UPS and AMZL have investments that
suggest expanded capacity across both lightweight and heavyweight parcels.

**UPS has the capability to absorb a majority of USPS-Amazon volume in the near future with
limited incremental investment.**

- Major investments in new and expanded facilities will increase UPS daily capacity by ~3-5M pieces per day in 2020:
  - 1 new regional super-hub in Harrisburg, PA with ability to process up to 100K packages
    per hour.
  - 2 new super-hubs in Tacoma, WA & Ontario, CA with ability to process ~50K packages
    per hour.
  - 3 new automated sortation & distribution centers with ability to process at least ~20K
    packages per hour.
  - Transition to ~100% sortation automation increases efficiency by 30%.

Commented [CJ-WD8]: Begs the question, why will they stop insourcing? 22% to 51% in two years!

Commented [CJ-WD9]: Would be more impactful if we had tables of numbers in here and elsewhere. Very
difficult to understand all the text with numbers in each paragraph. For example, here show our total volumes from
AMZ, and subtract out available capacity showing that the available capacity exceeds our current volumes.
• Ability to handle incremental volume in the last mile will require significant expansion of workforce and UPS has the demonstrated capacity to do so (They hired +100K temporary workers employed during peak) and delivery fleet (+25%)
USPS management has assessed the multi-year contribution impact based on the following go-forward Amazon scenarios:

a) Contribution harvest strategy through rate increases of ~50% of PSLW while maintaining NSA.

b) Steady-state contract status with steady contribution decline and standard rate increases.

c) Contractually “locked-in” state to grow contribution.
   
   o C1: Maintain minimum 0% volume growth ("no decline") to keep NSA pricing
   o C2: Maintain low 5% volume growth to steal share from competitors
   o C3: Maintain strong 15% volume growth in line with Amazon’s e-commerce growth

d) Increase published prices to 4X and terminate Amazon NSA; volume shifts to Amazon insourcing and competitors but USPS does not win back significant volume through other Parcel Select customer (UPS)
Appendix B: Total air and ground parcels, market share

Note: USPS includes Priority Mail Express, Priority Mail, First-Class Package Service, First-Class Mail Parcels, Standard Post, Parcel Select, Parcel Select Lightweight, PHS, Standard Mail Parcels, BPM Parcels, Library Mail. For the delivery view, USPS volume includes SurePost and SmartPost volume. The origin view reflects volume that originates with the shipper.

Colography, for parcels less than 70 pounds.

**Commented [Cj-WD12]:** AMZ 2019 revenue is 1,409M yest it's $2.6B for AMZ Parcel Select in the body of this memo.
Appendix D: Labor Implications

In the event of rapid losses of package volumes triggered by major price increases, the Postal Service would need to remove costs as a result of the lost revenue. These variable costs are directly tied to American jobs. These stable jobs would be compromised at a time of significant economic decline.

- The loss of Parcel Select volume would equate to approximately 55,961,000 bargaining unit work hours.

<table>
<thead>
<tr>
<th></th>
<th>Work Hours</th>

<td>37,465</td>
</tr>
</tbody>
</table>

- Currently, the Postal Service has the ability to lay off its non-career workforce for lack of work, as well as a portion of its career bargaining unit work force depending on the union.

- Notably, the Postal Service’s universal service obligation means that a reduction in workload associated with a loss of package volume may not translate to dollar-for-dollar cost savings. The Postal Service will still incur the fixed costs of servicing the nation’s delivery points, albeit with reduced revenue per delivery point.

- In some cases (APWU Clerks and Mail Handlers, for example), there are not enough employees (career and non-career) eligible for layoff to capture all of the savings from the reduction in work hours associated with the loss of competitive package volume. The Postal Service would have to
wait for excess employees to attrit out (or consider seeking and negotiating a VERA) in order to capture further savings.

- While non-career employees may be let go relatively quickly for lack of work, the union(s) will no doubt challenge any attempt to eliminate a wide swath of the workforce. Furthermore, for those employee crafts (Clerks, Mail Handlers) where it would be necessary to lay off career employees to capture the savings, there are a number of contractual steps the Postal Service must take before implementing a layoff.

- From an operational standpoint, the practicality of eliminating the most flexible component of the Postal Service’s workforce would also need to be considered and weighed against potential cost savings. Moreover, the employees who remain on the rolls (i.e., who are protected from layoff) will be the most expensive, most senior employees, so cost per remaining work hour will increase.

For the reasons above, it would not be possible to reduce these costs at a pace that is commensurate with the revenue lost. Therefore, USPS’ cash position would be further negatively impacted by a radical loss of volumes.
### Appendix E: Indirect Parcel Select Customers

Customers with >$1M in indirect Parcel Select in FY19, by consolidator

Across DHL, FedEx, UPS, and Pitney Bowes/Newgistics, 265 distinct customers had >$1M in indirect Parcel Select spend in FY19, driving $2.2B in revenue for USPS.

Brief on Amazon-USPS Relationship

Context
During the April 7th White House Coronavirus Task Force Briefing, President Trump made a number of statements about the United States Postal Service and its unprofitability being tied to the relationship with Amazon and other internet companies. This document outlines a response to many of those key statements and provides background on the current customer relationship with Amazon.

Fact-checking Statements
1. **The demise of the Postal Service is “internet companies, [like AMAZON] ... that give their [packages] to the Postal Service”**
   - While Amazon is the USPS’ largest package customer ($3.9B of revenue in FY19), it represents <10% of USPS total annual revenue, and is a high-contribution relationship (>150% cost coverage in its largest product relationship).
   - Additionally, other marketplace partners (eBay and Etsy) represent high-contribution partnerships worth >$1B in revenue.
   - Further, UPS, as a competitor, has priced its full-network product competitively to compete against USPS to win Amazon business while also sustaining relatively consistent profit margins year-over-year.

2. **“They lose money every time they deliver a package, for Amazon or internet companies.”**
   - FY 19 contribution from Amazon was $1.6B. Revenue was $3.9B
   - USPS derives incremental margin dollars from every parcel, for every product, for every customer. Package business (both last-mile and full-network) represents a net improvement in profitability for USPS versus a detractor.
   - USPS net unprofitability is tied more closely to its unfunded governmental mandates that drive down net profitability
     - Unfunded universal service obligation to deliver to all addresses 6-days / week and to fund operations only through mail and package sales.
     - Expectation to charge equitable prices for all of the United States and to not increase prices relative to the operational cost to serve a highly-urban or highly-rural region.
     - Requirements that no other private company or federal agency is required to meet. For example: pre-funding retirement.

3. **“If they raised prices by a little [...] or a lot, you’d find that the Post Office could make money or break even.”**
   - USPS had the largest price increases in recent history from 2018-2019 including ~10% price increases for Parcel Select (product that Amazon, UPS, and FedEx use most heavily). In addition to regular January price increase, USPS introduced an additional charge for large parcels (DIM-weight) in June 2019. This had significant impact to Amazon effective rates.
   - Historical relationships with customers have consistently shown that raising prices would only drive them to our competitors. USPS would see a net contribution loss with a significant share of its package business if prices were to be raised significantly. USPS competitors could take share in these instances.
   - In the past year, competitors have increasingly insourced the share of B2C volume they deliver themselves. FedEx has walked away from USPS, indicating Parcel Select prices were no longer economical relative to self-delivery.
4. “These are independent Boards, ... appointed by other administrations ... they’re sort of long-term”
   • The Board of Governors serve 7-year terms, at a maximum of 2 terms. Additionally, all current members of the Board of Governors (less the Postmaster General and Deputy Postmaster General) were appointed by President Trump with the advice and consent of the US Senate.
   • The Postal Regulatory Commission is a Federal Agency composed of five Commissioners appointed by the President of the United States with advice and consent of the senate. President Trump appointed 2 of the 5 current serving Commissioners.

5. “They have to raise prices, but this Postal Commission won’t do it”
   • The Postal Regulatory Commission regulates Negotiated Service Agreements. In relationship to these agreements, its core objective is to ensure that all contracts with discounted rates are profitable.

Overview of Business with Amazon

Amazon views USPS as a key business partner, relying on USPS to deliver ~30% (1.54B packages) of its total volume in FY19. USPS is competitively positioned in the market to serve Amazon for several reasons: USPS’ ability to flex its internal network to handle large amounts of volume and provide capacity relief, its full 7-day delivery operating model, and its unique advantage of having access to every home and mailbox in the United States. Amazon has relied on USPS to pioneer innovative shipping solutions, such as Sunday, Same-Day, and grocery deliveries, which enable Amazon to remain at the forefront of the eCommerce space. Amazon has continually expressed desire to build off its successful history with USPS and establish a long-term partnership.

Amazon is USPS’ largest commercial customer at ~$3.9B rev/yr. Amazon declined in FY19 but volumes are up in FY20. USPS business with Amazon falls under two primary business units: Amazon Fulfillment Network (AFN) and Merchant Fulfillment Network (MFN). With AFN, Amazon picks, packs, and ships orders from its fulfillment centers. Most AFN volume is partial network products (e.g. Parcel Select). MFN refers to sellers receiving orders through Amazon.com, but shipping their products directly from their homes, businesses, or warehouses. Most MFN volume is full network products (e.g. Priority Mail, FCPS).

The majority of revenue and volume from Amazon is through AFN, driven by Parcel Select products:

Amazon Relationship is at an Inflection Point

Comparing Amazon to other major Parcel Select NSAs, we see that Amazon is not only our largest customer, but also one with strength and growth, not achieved through heavy discounting.

Currently, USPS and Amazon are entering negotiations to expand partnership, introduce increased operational stability, and secure multi-year contribution. This partnership is critical in both near-term and long-term as mail volumes continue to decline, to bolstering the USPS’ contribution and revenue position.

Recent developments have put at risk ongoing negotiations and compromises high contribution relationship with Amazon.

In the light of recent developments, Amazon has asked for clarifications on USPS’ financial position. Specifically, they asked for information on how the CARE Act stimulus may require USPS to prioritize medical and pharmaceutical deliveries in exchange for funding. Additionally, after the Board of Governor’s meeting last week, Amazon inquired about USPS’ borrowing resolution and economic viability during the COVID-19 pandemic.
A teleconference was held on April 9, 2020 with Amazon leadership. During this meeting, Amazon stated their concerns about US Postal Service’s short and long term pricing and therefore our viability to them as continued shipping partner.

Amazon was particularly concerned about published price uncertainty for the following products:

1) Parcel Select LW (48% of Amazon’s total Parcel Select volume). **Note: This product is not discounted.**
2) Parcel Select HW (Zips not covered in NSA)
3) Priority Mail. **Note: new Priority Mail NSA covers ~25% of ZIPS with NSA pricing, and leaves ~75% to published rates.**

Amazon made it very clear that the USPS is alone, globally, among their partners in having this pricing uncertainty. This creates huge risk and make it difficult to plan. Additionally, Amazon is concerned that any stimulus from the Treasury will come with stipulations, causing concern and further risk. To combat this, Amazon is looking for operational certainty on the following:

- What does the USPS look like in the new few weeks, the next few months and the next several years?
- What does a fully functional Postal Service look like, including operating days?

<table>
<thead>
<tr>
<th>Date of Price Change Implementation</th>
<th>Price Change % for Published Parcel Select</th>
<th>Summary Reasoning for Price Change</th>
</tr>
</thead>
</table>
| Jan 2014                            | DDU: 5.1%  
DSCF: 5.6%  
DNDC: 5.1%  
PSLW: 10.1% | Existence of a strong customer base supports the cause for a price increase in order to maximize revenue, enhance profitability, and promote even volume distribution across the network. |
| April 2015                          | PSHW: 8.0%  
PSLW: 9.8% | Increase prices in rural areas and cost coverage while balancing increased competition in lightweight class. |
| Jan 2016                            | PSHW: 4.9%  
PSLW: 23.5% | Increase PSLW profitability and stay in alignment with FCPS pricing, as they are both underpriced products. Combined machinable/NMO to disregard in pricing. Price increase for contract PSHW greatest in rural areas. |
| Jan 2017                            | PSHW: 3.5%  
PSLW: 8.0% | UPS and FedEx are pulling volume back from PSHW to deliver themselves in concentrated markets. Still a belief that PSLW is underpriced. |
| Jan 2018                            | PSHW: 4.9%  
PSLW: 7.0% | 4.9% chosen as fits under 5% increase cap in contracts. More scope to increase PSLW price and still preserves PSLW and FCPS relationship, while taking advantage of robust PSLW growth last year. Belief that despite Amazon and UPS competition, the market can bear this increase. |
| Jan 2019                            | PSHW: 9.3%  
PSLW: 12.3% | Belief that PSLW still underpriced in the market, and matches price increase for FCPS in low zones.  
PSHW price is increased but most volume is covered under NSAs with price caps, thus increase will not impact significant volume except in undiscounted ZIPs (low delivery density areas).  
Introducing extension of dimensional weighting to >1 ft³ packages. |
| Jun 2019                            | Introduction of DIM | Introduction of DIM pricing, charging higher weight pricing for oversized and underweight packages requiring non-machinable costing equivalent to heavier weights. |
| Jan 2020                            | PSHW: 2.5%  
PSLW: 4.2% | Enhanced last mile capabilties and aggressive pricing of competitors and, diminishes growth so price modest price increases.  
PSHW price increase in particular is low to protect volume, which is at risk of migration to in-sourcing and self-delivery by major users. |

Note: [2018 volume data in positions on the curve need to be validated]

Note: USPS costs are based on large parcel delivery and have not been updated since 2015
1. Summary of the Agreement

Amazon’s Priority Mail Fulfillment proposed Successor Agreement represents a contribution growth opportunity. This NSA will result in higher contribution than the expiring NSA, and higher contribution than a scenario in which no NSA was in place.

Under the successor agreement proposed, $26M of Amazon’s ~$192M Priority Mail Fulfillment business would be discounted and the rest would be charged at published rates. This NSA represents <1% of total Amazon business.

This NSA represents an effective price increase from the arrangements in the current NSA that expires on May 1, 2020 while more specifically targeting discounts to retain business and win business that UPS currently wins.

- USPS increased annual contribution by ~$25M by shifting 75% of volume (non-contiguous) from discounted rates to published rates.
- USPS agreement creates multi-year contribution opportunity worth between ~$5-9M by targeting discounts to high-contribution, high service performance product where UPS has significant share.

### Competitive intelligence

During negotiations, Amazon disclosed that they had 85M pieces of “Priority Mail equivalent” volume in 2019. The Postal Service only receives approximately 20% (16M) of Amazon’s “Priority Mail equivalent”.

- The remaining 69M pieces (up to >$500M revenue) go to competitors - majority to UPS and Delivery Service Providers.
- USPS is losing business because Priority Mail does not meet Prime-service standard and price has not historically been competitive for non-Prime rated product.

Discounts were targeted to individual rate-cells to incentivize favorable volume where USPS also has strong service performance.

### Contract Structure

This Priority Mail contract has 2 features to protect USPS interests, grow contribution, and sustain the Amazon relationship:

- Geo-based pricing: Pricing is based on charging price required to win the business based on the particular lane.
- Earned discount model: Amazon will earn all incremental discounts by providing USPS with volume that historically has gone to Amazon’s internal network, UPS, or regional carriers. This is an industry standard aligned to what competitor would do. In instances where volumes decline, discounts also decline.

Prices were created to reflect the competitive landscape. At higher prices USPS would cede volume to UPS and lose net contribution.

2. Market opportunity: changes to consumer behavior and competitive dynamics introduced by COVID
The COVID pandemic has already begun, and will continue to, permanently make changes to the e-commerce and broader retail landscape. Online sales are up over 25% according to Bloomberg[1] - with outsized growth in online grocery, pharmacy, mass retail and Amazon. Key trends that will likely have long lasting impact beyond COVID:

- Increase in prescriptions by mail – USPS CVS shipping up over 800K / week vs. ~40K / week pre-COVID. USPS consumers are being forced to become more comfortable with home-drug-delivery.

- Conversion of brick and mortar stores to fulfillment centers to accommodate online orders (e.g. Nordstrom predicting online orders to cause 15-20% increase in SFS volumes). This new shipping infrastructure will subsist beyond the crisis.

- Similar to large retailers, SMBs are forced to accelerate infrastructure development to bring services and product online. SMB survivors and winners of COVID will have built deeper e-commerce presences

- E-commerce enablers (e.g., eBay, Shopify, Shippo, Etsy ) are taking share of e-commerce market and increasing their role in influencing shipping as they help new e-commerce shippers enter the online market. Adoption of these platforms will persist post-COVID as consumers gain fluency with how to use them to buy and sell goods in new ways.

- Mass retailers Walmart and Target benefitting from slowdowns in Amazon shipping and reduction of Amazon’s 2-day inventory (mostly focused on essentials). This has enabled them to expand their customer base (Walmart seeing a surge in orders, increasing density and growing viability of its DDU inject model with USPS).

- Accelerated adoption of online grocery (Transactions increasing ~60%, Instacart hiring 300K workers, significant VC inflows)

This is a moment when the weakening business models (e.g. brick and mortar department store chains) risk failure, the ‘strong will get stronger,’ and winners for the next decade will emerge. In this time of both crisis and opportunity, companies large and small are looking for a reliable partner they can count on. Just like in a ‘peak’ period, performance and partnership now can make or break a relationship. We have received over 40 inquiries about USPS financial viability – our customers are looking for engagement and certainty during a time characterized by turbulence and unpredictability.

Our competitors are using this moment to go after new business, and ride the rising tide of volume growth to improve their density and their margins. In a virtuous cycle, these improved margins will fund more aggressive customer acquisition tactics and lower prices. By contrast, if we lose customers during this period, we enter a negative cycle, as we will have less volume and contribution to cover our costs, and will be forced to raise prices. In this context, securing profitable new business is vital.

3. Competitor sales tactics during the COVID crisis

Fedex

The talking points are verbatim and captured from three FedEx sellers. Last 3 weeks at Monday Sales meeting the main topic is FedEx Campaign against USPS. Each FedEx Rep. services/manages approx. 200 customers (as well as prospecting for new ones on a daily basis). They claim this is a “new” reason to contact every present & potential customer

FedEx talking points:
- “Everyone knows the USPS has been having financial difficulties for years”
- “Now (as with other companies over the years) it is coming to an end”
- “It’s clear that the current Administration is not fond of the way the USPS does business”
- “Now we believe this will be the end of the USPS as we know it”
- “The USPS will NOT go away, however, it most likely will go thru a major restructure”
- “It’s more likely to just continue to do mail, and get out of the Package business entirely”
- “News of this has been all over the media, with NO official response from the USPS”
- “This should tell you something”
- “Think about it: Do you even know who your USPS account manager is? No! Because that is not their model”
- “The USPS Sells you, but only supplies account management support to very large customers”

USPS-20-1215-A-005051
- “You do not want to be stuck without a partner to deliver your parcels/packages”
- “FedEx can onboard you now (quickly) without service interruption, so you do not have to wait until the last minute”
- “Imagine being stuck with filled orders, but without a partner to deliver them”
- “You can avoid the rush and change your delivery partner now”

UPS questions financials:
“We are getting very pointed questions internally (as well as from our shared customers) about the press of the Postal Service’s adverse operational impacts as early as this summer”.

Upgrade your UPS My Choice® Membership
More than ever, you need visibility and control of your home deliveries.

With a premium UPS My Choice membership you get all the benefits you’re used to, plus you can do all of the following as many times as you need without the fees basic members would pay:

- Redirect a package to a more convenient location
- Reschedule a package to be delivered on a different day
- Upgrade UPS SurePost® package to UPS® Ground, ensuring delivery by UPS instead of your regular mail

Get 2 Months FREE
Use code CTJT03DX6 (no credit card necessary)
4. Ongoing Amazon efforts & negotiations timeline

In midst of COVID surge, like with other key customers (eBay, Walmart, etc.), USPS engaging frequently with Amazon to:

- Support surging volumes and capture net new business for USPS
- Share mutual operational changes as demand and capacity shift quickly

In parallel, USPS and Amazon are in ongoing conversations to discuss mid-term considerations (next 12-18 months). In particular, Amazon negotiating team is working to analyze two specific questions:

1. How can Amazon’s request for rate security in the mid-term be used to secure long-term volume and contribution certainty?
2. What net new business does USPS have the opportunity to win away from UPS by extending DSCF rates to Amazon?

Expected timeline for conversations and analyses:

- Amazon negotiating team is preparing to share general negotiating stance for these items by April 17th to receive input from leadership
- Objective would be to share updated plan with April S&I to receive approval to proceed
- Specific economic terms and constraints will be developed by end of April
- Formal negotiations and “opening ask” extended in written-offer by May 8th
Following up on this project, our team is putting together the requested analysis and I would like to try to set a time to provide either or both of you with a quick briefing on where we are and where we are headed. Is there a convenient time later this afternoon or tomorrow morning to discuss all of this?

UNITED STATES POSTAL SERVICE
(Exact name of registrant as specified in its charter)

Washington, D.C. 41-0760000
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

475 L’Enfant Plaza, S.W.
Washington, D.C. 20260
(Address of principal executive offices) (ZIP Code)

(202) 268-2000
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐ Not Applicable ☑

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T ($232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐ Not Applicable ☑

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐
Smaller reporting company ☐ Emerging growth company ☐ Not applicable ☑

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☑

Securities registered pursuant to Section 12(b) of the Act:

Title of each class Trading Symbol(s) Name of each exchange on which registered
Not applicable Not applicable Not applicable

The number of shares of common stock outstanding as of May 7, 2020: N/A

NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both
interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>
<thead>
<tr>
<th>(in millions)</th>

</tr>
</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.

**Accounting Pronouncements Issued but not Adopted**

**Accounting Standards Update 2016-13 Financial Instruments - Credit Losses**

In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.
**Accounting Standards Update 2018-13 Fair Value Measurement**

In August 2018, the FASB issued Accounting Standards Update 2018-13 *Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement*, which has since been codified in ASC 820, *Fair Value Measurement* ("ASC 820"). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service's fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in *Note 13 - Fair Value Measurement*. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

**Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software**

In August 2018, the FASB issued Accounting Standards Update 2018-15 *Intangibles - Goodwill and Other - Internal-Use Software* (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement, which has since been codified in ASC Subtopic 350-40, *Intangibles - Goodwill and Other - Internal-Use Software* ("ASC 350-40"). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

**NOTE 3 - LIQUIDITY**

The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.

**Cash**

The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See *Note 6 - Cash, Cash Equivalents and Restricted Cash* for further disclosures pertaining to cash.

The *Postal Reorganization Act*, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank ("FFB"), a government-owned corporation under the general supervision of the Secretary of the Treasury.

**COVID-19 Considerations**

In March 2020, the World Health Organization declared a novel strain of coronavirus ("COVID-19") a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The
Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However, the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

Given these COVID-19 considerations, the Postal Service requires an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults. While the COVID-19 disruption is expected to be temporary, its depth and duration remain uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. Assuming the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, and through additional defaults, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020, at least May 2021.

Subsequent Events
The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

Debt
As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities with established terms and conditions by providing two days prior notice. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.
The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the Postal Service’s outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance that it could obtain alternative debt financing on comparable terms.

**Liquidity Concerns**

The Postal Service is constrained by laws and regulations, including the *Postal Accountability and Enhancement Act* ("PAEA"), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and health and benefits programs for employees and retirees, including the Federal Employees Health Benefit ("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in *Note 9 - Retirement Plans*. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund ("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in *Note 10 - Health Benefits Plans*, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred cumulative net losses of $83.1 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and its liquidity concerns, the Postal Service will unlikely may not have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

**Business Model Challenges and Constraints**

Market-Dominant services, which accounted for approximately 66% of the Postal Service’s annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service’s costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service’s universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in *First-Class Mail* are largely the result of changes in consumers’ and businesses’ use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue.
Flat volume between 2009 and 2016, beginning in 2017, Marketing Mail volume has generally been challenged by commercial mailers’ increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service’s Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service’s network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, as a result of the temporary surge in e-commerce growth driven by the COVID-19 pandemic, some of these customers increased their volume to the Postal Service’s network during March 2020 due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers’ compensation programs. Some of these costs have historically increased at a higher rate than inflation.

**Past Due Obligations**

The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

<table>

² The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

**Mitigating Circumstances**

The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as an additional injection of liquidity, provided by either the U.S. government or other sources, and legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.
The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.

**NOTE 4 - REVENUE RECOGNITION**

The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).

**Disaggregation of Revenue**

The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

<table>

</tbody>
</table>

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

**Satisfaction of Performance Obligations**

A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

*First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals* are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes *PO Box services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders* and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service...
have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.

**Variable Consideration**

The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

**Contract Modifications**

The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

**Principal vs. Agent Consideration**

The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

**Contract Liabilities**

The vast majority of the Postal Service’s contract liabilities consist of **Deferred revenue-prepaid postage** and prepaid **PO Box** and Caller Service fees. **Deferred revenue-prepaid postage** is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as **Deferred revenue-prepaid postage** in its balance sheet. Stamp sales and metered postage account for the majority of **Deferred revenue-prepaid postage**. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid **PO Box** and Caller Service fees consist of the payments received from customers for **PO Box** fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid **PO Box** and Caller Service fees within **Other current liabilities** in the accompanying **Balance Sheets**. Revenue is recognized over time as customers use the **PO Box** and Caller Services over the terms of their contracts.
The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

</tbody>
</table>

1. Included within Operating revenue in the accompanying unaudited Statements of Operations.
2. Included within Operating expenses in the accompanying unaudited Statements of Operations.
3. Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.
4. Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.
NOTE 6 - CASH, CASH EQUIVALENTS AND RESTRICTED CASH

The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31,</th>
<th>September 30,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>
<td>2019</td>
</tr>
<tr>
<td>Cash and cash equivalents</td>
<td>$8,987</td>
<td>$8,108</td>
</tr>
<tr>
<td>Restricted cash</td>
<td>472</td>
<td>546</td>
</tr>
<tr>
<td><strong>Total cash, cash equivalents and restricted cash</strong></td>
<td><strong>$9,459</strong></td>
<td><strong>$8,654</strong></td>
</tr>
</tbody>
</table>

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

NOTE 7 - PROPERTY AND EQUIPMENT, NET

Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.

For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million, respectively, and impairment charges were de minimis, respectively. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million, respectively, and impairment charges were de minimis, respectively. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.

NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements

On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.
Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.

Provision for Losses
The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>

<tr>
<td><strong>Total contingent liabilities</strong></td>
<td><strong>$321</strong></td>
<td><strong>$336</strong></td>
</tr>
</tbody>
</table>

1 Included within Payables and accrued expenses in the accompanying Balance Sheets.
2 Included within Other noncurrent liabilities in the accompanying Balance Sheets.

Reasonably Possible Contingencies
The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

Class Action Litigation
As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission’s (“EEOC”) Office of Federal Operations (“OFO”) certified the case McConnell v. Brennan (first instituted in 2006 as McConnell v. Potter) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process (“NRP”) between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers’ compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The McConnell case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP’s failure to provide a reasonable accommodation, the NRP’s wrongful disclosure of medical information, the NRP’s creation of a hostile work environment, and the NRP’s adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.
In 2015, the Administrative Judge assigned to handle the McConnell case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.

The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

Other

The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as “terminal dues”.

In September 2019, the UPU members had a special meeting – known as the Extraordinary Congress – to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs ("CHF"), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in Other assets in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in Payables and accrued expenses and the noncurrent portion of the obligation is recorded in Other noncurrent liabilities in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.

NOTE 9 - RETIREMENT PLANS

The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan ("TSP"), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.
CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees ("FERS-RAE"), or FERS - Further Revised Annuity Employees ("FERS-FRAE") depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Employee Contributions</strong></td>
<td><strong>Postal Service Contributions</strong></td>
</tr>
<tr>
<td>CSRS</td>
<td>7.0%</td>
</tr>
<tr>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

² Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.
**FERS Normal Costs**
The Postal Service records expenses for FERS normal costs within *Retirement benefits* in the accompanying unaudited *Statements of Operations*.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within *Retirement benefits* in the accompanying *Balance Sheets*.

**CSRS and FERS Unfunded Retirement Benefits**
OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as *Retirement benefits* in the accompanying unaudited *Statements of Operations*. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM's calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within *Retirement benefits* in the accompanying *Balance Sheets*. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

**NOTE 10 - HEALTH BENEFITS PLANS**
FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

**Active Employees**
The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month
Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

**Retirees**
Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.

Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.
The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

2 Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

**NOTE 11 - WORKERS’ COMPENSATION**

Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act ("FECA"), administered by the U.S. Department of Labor’s ("DOL") Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

**Workers’ Compensation Liability**

The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>

<td>1.07%</td>
<td>1.91%</td>
</tr>
<tr>
<td>Medical inflation rate</td>
<td>3.50%</td>
<td>2.50%</td>
</tr>
</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.
Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

</table>

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

Lease Accounting Policies

Lease Accounting Policy for Comparative Periods

As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expense.
expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

**Lease Accounting Policy for the Six Months Ended March 31, 2020**

The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.
NOTE 13 - FAIR VALUE MEASUREMENT

The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within *Property and equipment, net* are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between *Level 1* and *Level 2* assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone install</td>
<td>$ 476</td>
<td>$ 584</td>
</tr>
<tr>
<td>Payment receivable</td>
<td>$ 11,000</td>
<td>$ 11,936</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.*

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered *Level 2* inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered *Level 3* inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following *Management’s Discussion and Analysis of Financial Condition and Results of Operations* and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service ("Postal Service," “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, ("Annual Report") filed with the Postal Regulatory Commission ("PRC") on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States ("GAAP"). These results are not necessarily indicative
of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus ("COVID-19") on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act ("PAEA") classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System ("CSRS") and the Federal Employee Retirement System ("FERS"), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund ("PSRHBF"). We must coordinate with the U.S. Office of Personnel Management ("OPM") to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY

The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.
**Effects of COVID-19**

In March 2020, the World Health Organization ("WHO") declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty likely continue during the second half of fiscal year 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in late March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits liabilities and expenses.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, and through additional defaults, we expect that we will have sufficient liquidity to continue to operate through AprilMay 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.
Three Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $386 million, or 7.1%, with a volume growth of 12 million pieces, or 0.8%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce in late March 2020 resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 604 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections, partially offsetting the decrease in Marketing Mail.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers' compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM's preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

Six Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
• **First-Class Mail** revenue decrease of $79 million, or 0.6%, with a volume decline of 600 million pieces, or 2.1%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and

• **Periodicals** revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $532 million, or 4.5%, despite a volume decline of 73 million pieces, or 2.2%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

• Workers’ compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;

• Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;

• Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and

• Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 *Leases*, which has since been codified in Accounting Standards Codification (“ASC”) 842, *Leases* (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower *International Mail* volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

• Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and

• Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

**Non-GAAP Controllable Loss**

In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHB actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHB retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

² Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

³ Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

⁴ Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail, over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, First-Class Mail generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, First-Class Mail generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 33% of our revenue for the three months ended March 31, 2020, which was a 2% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus
on our customers’ needs and have increased our investment in mail and package innovation. However, we also recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

Furthermore, due to the COVID-19 pandemic our First-Class Mail and Marketing Mail volumes began an accelerated decline in late March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

Our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density. However, as a result of the temporary surge in e-commerce growth driven by the COVID-19 pandemic, some of these customers increased their volume to our network during March 2020 due to their delivery capacity constraints.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail
First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers ("CPI-U").

For the three months ended March 31, 2020, First-Class Mail revenue increased $89 million, or 1.4%, despite a volume decline of 29 million pieces, or 0.2%, compared to the same period last year. Revenue growth was the result of decennial mailings associated with the 2020 U.S. Census, otherwise revenue and volume would have each declined during the quarter. For the six months ended March 31, 2020, First-Class Mail revenue decreased
$79 million, or 0.6%, and volume declined 600 million pieces, or 2.1%, compared to the same period last year. The change in revenue for both periods was less than the corresponding volume declines due to the January 2020 price increase applicable to certain Market-Dominant services. The most significant factor contributing to the declining trend in First-Class Mail volume has been the continuing migration from mail to electronic communication and transaction alternatives.

Due to the COVID-19 pandemic, our First-Class Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on First-Class Mail revenue and volume.

Marketing Mail
USPS Marketing Mail (more commonly, Marketing Mail), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as First-Class Mail or Periodicals.

Between 2009 and 2016, Marketing Mail experienced relatively flat volume. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail continued its volume decline through the remainder. Marketing Mail volume has generally been challenged by commercial mailers’ increasing use of digital and mobile advertising, exacerbated by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first half of 2019.

For the three months ended March 31, 2020, Marketing Mail revenue decreased $94 million, or 2.5%, and volume declined 604 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, Marketing Mail revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our Marketing Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our Marketing Mail revenue and volume.

Marketing Mail is subject to intense competition, and price increases are currently generally capped at the rate of inflation. Marketing Mail volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used Marketing Mail to mail to more targeted prospects.
**Shipping and Packages**

The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

¹ Includes **Priority Mail**, a 1-3 business day delivery service; **Priority Mail Express**, an overnight delivery service available 365 days per year; and **USPS Retail Ground**, a retail-only Competitive service priced identically and functionally equivalent to **Priority Mail** for Zones 1-4.

² Includes **Parcel Select**, **Parcel Return**, and **Marketing Mail Parcels**.

³ Includes **First-Class Package Services - Retail** and **First-Class Package Services - Commercial**.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 7.1%, with a volume growth of 0.8%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce in late March 2020 resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.5%, despite a volume decline of 2.2%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce in late March 2020 resulting from the COVID-19 pandemic.

**Priority Mail Services**

Priority Mail Services is our Shipping and Packages subcategory that includes **Priority Mail**, **Priority Mail Express** and **USPS Retail Ground**. **Priority Mail** and **Priority Mail Express** services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 46% of the total for the three and six months ended March 31, 2020, and 2019. However, Priority
Mail Services accounted for approximately 19% and 18% of the total Shipping and Packages volume for three and six months ended March 31, 2020, respectively, essentially unchanged compared to the same periods last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 7.0%, on volume growth of 2.2%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 3.4%, despite a volume decline of 1.9%, compared to the same period last year. Revenue grew at a greater rate than volume for the three-month period, and grew despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

Parcel Services
Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.6%, on volume growth of 3.4%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.3%, despite a volume decline of 0.8%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce in late March 2020 from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three-month period, and grew despite the volume decline for the six-month period, largely due to the January 2020 price increases applicable to Competitive services.

First-Class Package Services
Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 5.9%, despite a volume decline of 0.3%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 6.0%, despite a volume decline of 1.7%, compared to the same period last year. Revenue grew despite the volume declines, largely due to the January 2020 price increases applicable to Competitive services.

Package Services
Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 5.2% on a volume decline of 10.7%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 5.3% on a volume decline of 11.1%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

International Mail
Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.
For the three months ended March 31, 2020, International Mail revenue increased 2.4%, despite a volume decline of 11.7%, compared to the same period last year. For the six months ended March 31, 2020, International Mail revenue increased 0.4%, despite a volume decline of 9.1%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union (“UPU”), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as “terminal dues”.

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked our provision of the new remuneration system to self-declare rates beginning in July 2020.

**Periodicals**

Periodicals, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, Periodicals revenue decreased 11.1% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, Periodicals revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

Periodicals revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The Periodicals category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as Certified Mail, PO Box services, and Return Receipt services. Also included in this category are money orders and passport services. Other services revenue decreased 1.2%, and 3.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management’s control.
