Keeping our employees safe. The essential services we provide are only possible due to the collective and individual efforts of the men and women who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, the COVID-19 Command Response team at Headquarters is working closely with HHS, CDC, and other public health officials to receive their latest guidance on appropriate workplace practices. We are adjusting our policies accordingly, and
are continually sharing the latest information throughout our organization. Specific actions we have taken include:

- Updating our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements. We have been actively encouraging any employee who feels sick to stay home. To facilitate their ability to do so, we have entered into MOUs with our unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19, and have expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country. While we have taken these steps on our own initiative, we are also working tirelessly to implement the leave provisions recently enacted by Congress into federal law.

- Working to overcome the challenges in the supply chain to ensure that our employees have ready access to hand sanitizer, and that they receive surgical masks and gloves upon request. This is a matter of the highest priority for the Postal Service. We have already shipped 15 million masks throughout the country to ensure that they are available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- Reinforcing workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and “cough/sneeze” barriers. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries.

- Updating our cleaning policies to ensure that all cleaning occurs in a manner consistent with CDC guidance relating to this pandemic.

- Expanding the use of telework for those employees who are able to perform their jobs remotely.

- Issuing a daily cadence of communications to employees to ensure they have the latest information and guidance.

Keeping our customers safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to continue to provide service effectively and safely. As noted above, we are reinforcing workplace behaviors to ensure that contact between our employees and customers reflect the best guidance regarding healthy interactions, social distancing and risk minimization. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and
employing floor tape to ensure that customers waiting in line can maintain the appropriate
distance from one another, and from the retail counter.

**Network integrity/continuity of operations.** The Postal Service is undertaking all reasonable
measures to minimize impacts to our customers. We are actively monitoring all aspects of our
business operations and functions, and we are highly confident in our ability to process and
deliver the nation’s mail and packages throughout this emergency. We do not expect significant
disruption or degradation in the services we provide, though we do anticipate that we may need
to adjust local operations at times to account for contingencies and local conditions, which may
have temporary service impacts. If, for some reason, we need to curtail or adjust operations in
a particular facility or area, activation of localized continuity of operations plans will be
implemented to provide required support – similar to planning we implement in the wake of
hurricanes, flooding, wildfires and other disruptive events. Following our normal protocol, we
began daily operational assessments and responses as the situation in China was first
identified. We also are coordinating organization-wide efforts to respond to evolving conditions,
and to anticipate and prepare for customer and community needs throughout the country.

**All-government emergency response.** The Postal Service is playing an integral role in national
emergency response and preparedness. The Postal Service is participating in the National
Response Coordination Center (NRCC) headed by the Federal Emergency Management
Agency (FEMA), and will continue to assist FEMA and other agencies in the whole-of-
government response to the pandemic. The Postal Service has unique capabilities in this
regard, given our role as the most frequent touchpoint between the American people and the
federal government through our nationwide retail and delivery network. For instance, we have
leveraged our network to communicate CDC guidance to the public, both by displaying CDC
posters in our retail facilities, by providing key information through our digital message boards in
our large Post Offices, and by working with the Administration to help design and deliver a
postcard from the President to every American household that relays the CDC guidance and
includes an imbedded code that links to the CDC’s website. Further, we have also donated
and delivered 500,000 N-95 masks (which are different from the surgical ask that our
employees utilize) that were in excess of our needs to the Department of Health and Human
Services for the Strategic National Stockpile for distribution to hospitals and other critical uses.

**Open channel of communications.** While our team is focused on our employees, our
customers, and execution of our core mission, we also recognize that Members of Congress are
interacting daily with constituents about their needs and want to provide the most current
information. Our government relations team will continue to be in frequent contact with you and
your staffs to provide updates concerning our plans and thinking, as events dictate. That said, if
you have questions, issues or concerns, you can leverage [Government Relations e-mail here].
Please place COVID-19 in the subject line. We have established a dedicated team to monitor
that site and to respond to any inquiries expeditiously.

The lives of the American public have changed dramatically over the last several weeks, and it
is during difficult times when the true value of the Postal Service to the nation is most evident.
One of our strengths as an organization is our stabilizing role in a crisis: the American people
take confidence from our regular, daily role in their community and in their lives. As we adapt to
the challenges posed by COVID-19, we will continually strive to earn the trust and confidence of
the public and our employees, and deliver for the nation.
Please let me know if you have any questions or concern regarding this letter, and please let me
know if there are any other ways that the Postal Service can support you during these difficult
times.

[Robert M. Duncan]                                      [Megan J. Brennan]
Dear Representative/Senator ___,

I am writing to share with you the actions the United States Postal Service is taking to meet the needs of the public and to protect our employees as our nation responds to the COVID-19 pandemic.

The Postal Service Board of Governors and management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as more and more Americans are being asked to shelter in place and to work from home. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people, and the continued provision of postal services is designated both as an essential function under federal law during times of emergency and as part of the nation’s critical infrastructure. Every day, the men and women of the Postal Service accept, process, transport, and deliver vital mail and packages, including important governmental information and benefits such as Census materials, social security checks, and materials advising the public on COVID-19; materials relating to elections, including ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing vital necessities, including medicines and other goods purchased online.

To ensure that we continue providing this critical government service, we have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services. We intend to act calmly and consistently based upon the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials as we provide our vital service.

In this regard, the specific measures we are implementing in response to the COVID-19 outbreak include the following:

**Keeping our employees safe.** The essential services we provide are only possible due to the collective and individual efforts of the men and women who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. the public and our employees, and deliver for the nation.
Please let me know if you have any questions or concern regarding this letter, and please let me know if there are any other ways that the Postal Service can support you during these difficult times.

[Robert M. Duncan]  [Megan J. Brennan]
Dear Representative ___,

I am writing to apprise you of actions the United States Postal Service is taking to meet the needs of the public as the nation responds to the COVID-19 pandemic. I also want to apprise you of the significant financial challenges we face that are being significantly exacerbated by the effect that the pandemic is having on the economy and on our business. Those financial challenges threaten our ability to remain liquid and to continue to provide the essential public service as a part of this nation’s critical infrastructure.

While Americans contend with social distancing and quarantines, we want to assure you that the mail continues to be a safe and reliable means of communication and package delivery. As you hear from constituents, we hope the following information will be useful to you and your staff in addressing any questions or concerns.

Our board and management team, and the 630,000 men and women of the Postal Service, are highly focused on our mission of service to the nation, sustaining America’s economic activity, and providing postal delivery services to the public. The Postal Service operates by statute as a “basic and fundamental service” provided by the Federal Government to the American people, and the continued provision of postal services is designated as an essential function under federal law during times of emergency and as part of the nation’s critical infrastructure. The postal system is used to deliver, among other things, important governmental information and benefits, including Census materials, social security checks, and materials advising the public on COVID-19; materials relating to elections, including ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing vital necessities, including medicines and other goods purchased online.

However, the economic downturn caused by the coronavirus is beginning to erode the volume and revenue of the United States Postal Service. Without emergency funding, we estimate that the Postal Service could run out of cash and may have to limit or cease operation by the end of the fiscal year. We urge support for the Postal Service provisions contained in draft House stimulus bill which includes $20B of emergency funding and debt forgiveness of $15B.

To ensure that we continue providing this critical government service, we have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for our residential and business customers throughout this national emergency, and to ensuring that the American public can confidently depend upon our mail and shipping channel.

In this regard, we would like to share with you some measures we are implementing in response to the COVID-19 outbreak:
Keeping our employees safe. Our ability to deliver and function starts with the health and well-being of our employees. We are working closely with the Department of Health and Human Services, the Centers for Disease Control and Prevention (CDC), and other public health officials to ensure that we have their latest guidance. We are sharing the latest information throughout our organization, via video, e-mail, internal newsletter, stand-up talks and through our HR functions – and we will continue to do so. We are encouraging healthy behaviors and protocols including frequent hand washing, use of sanitizers, and additional cleaning of workspaces, and are encouraging any employee who feels they are sick to stay home. We have worked with our postal unions to temporarily expand leave options for our employees. To date, there have been relatively few employees who have tested positive for COVID-19.

Keeping our customers safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are additionally reinforcing workplace behaviors to ensure that contact with our customers reflects the best guidance regarding healthy interactions, social distancing and risk minimization. To reduce health risks, we also are temporarily modifying customer signature requirements. We are also adapting procedures to ensure that we are able to serve all locations effectively and without interruption. We intend to act calmly and consistently based upon the advice of the medical and public health professionals.

Network integrity/continuity of operations. We are actively monitoring all aspects of our business operations and functions, and we are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect disruption or degradation in the services we provide. If, for some reason, we need to curtail operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support—similar to planning we implement in the wake of strong hurricanes, flooding, wildfire and other disruptive events. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified. We also are coordinating organization-wide efforts to respond to evolving conditions, and to anticipate and prepare for customer and community needs throughout the country.

Business impacts. The Postal Service is undertaking all reasonable measures to minimize impacts to our business customers. We have experienced only minor operational limitations, almost entirely related to international flow of mail resulting from logistical constraints. With regard to our overall business, we are seeing some changes due to the fact that many more people are now working from home or spending more time in the home. For instance, we are recording higher package volumes as people order more items for delivery. While we have seen no immediate change in mail volumes in the past months, we did see significant mail volume declines last week, and anticipate that the impacts of expected economic retrenchment may have a significant impact on our mail volumes in the near future.

All-government Emergency response. The Postal Service continues to play an integral role in national emergency response and preparedness. Given the public facing nature of the Postal Service, our large retail network, and our role as a frequent touchpoint...
between the American people and the federal government, we have been doing our part to message to our customers and the communities we serve by displaying the relevant CDC posters in our Post Office lobbies, and using the digital message boards (available in our larger Post Offices) to convey health and safety messaging in a more interactive format. We also worked with the Administration to help design and deliver a postcard from the President of the United States to every American household that includes an imbedded code that links to the CDC’s website. Further, we have committed 500,000 N95 masks to Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses.

Open channel of communications. While our team is focused on our employees, our customers, and execution of our core mission, we also recognize that Members of Congress are interacting daily with constituents about their needs and to provide the most current information. Our government relations team will continue to be in frequent contact and to provide accurate updates concerning our plans and thinking, as events dictate. If you do have questions, issues or concerns, I ask that you leverage [Government Relations e-mail here]. Please place COVID-19 in the subject line. We have established a dedicated team to get you answers promptly.

All this said, it would be irresponsible of us if we did not also convey to you that the COVID-19 pandemic presents an existential threat to the future of the Postal Service. In that regard, however, the economic downturn caused by the coronavirus is beginning to erode the volume and revenue of the United States Postal Service. Without emergency funding, we estimate that the Postal Service could run out of cash and may have to limit or cease operation by the end of this fiscal year. We urge support for the Postal Service provisions contained in draft House stimulus bill which includes $20B of emergency funding and debt forgiveness of $15B.

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of our strengths as an organization is our stabilizing role in a crisis. When the men and women of the Postal Service deliver after a natural disaster, it is often the first sign of a return to normalcy. The public takes confidence from our regular, daily role in their community and in their lives.

As we adapt to the challenges posed by COVID-19, we will continually strive to earn the trust and confidence of the public, bind the nation together, and with your help meet the needs of America’s communities, and deliver for the nation.

We want to express our sincere gratitude to you for your support for the Postal Service, and for your continued leadership and dedication as we all confront the realities of this pandemic.

[Robert M. Duncan] [Megan J. Brennan]
Dear Representative ____,

I am writing to share with you all of the actions the United States Postal Service is taking to meet the needs of the public as the nation responds to the COVID-19 pandemic. I also want to apprise you of the significant financial challenges we face that are being significantly exacerbated by the effect that the pandemic is having on the economy and on our business. Those financial challenges threaten our ability to remain liquid and to continue to provide the essential public service as a part of this nation’s critical infrastructure.

While Americans contend with social distancing and quarantines, we want to assure you that the mail continues to be a safe and reliable means of communication and package delivery. As you hear from constituents, we hope the following information will be useful to you and your staff in addressing any questions or concerns.

Our board and management team, and the 630,000 men and women of the Postal Service, are highly focused on our mission of service to the nation, sustaining America’s economic activity, and providing postal delivery services to the public. The Postal Service operates by statute as a “basic and fundamental service” provided by the Federal Government to the American people, and the continued provision of postal services is designated as an essential function under federal law during times of emergency and as part of the nation’s critical infrastructure. The postal system is used to deliver, among other things, important governmental information and benefits, including Census materials, social security checks, and materials advising the public on COVID-19; materials relating to elections, including ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing vital necessities, including medicines and other goods purchased online.

To ensure that we continue providing this critical government service, we have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for our residential and business customers throughout this national emergency, and to ensuring that the American public can confidently depend upon our mail and shipping channel.

In this regard, we would like to share with you some measures we are implementing in response to the COVID-19 outbreak:

§ Keeping our employees safe. Our ability to deliver and function starts with the health and well-being of our employees. We are working closely with the Department of Health and Human Services, the Centers for Disease Control and Prevention (CDC), and other public health officials to ensure that we have their latest guidance. We are sharing the
latest information throughout our organization, via video, e-mail, internal newsletter, stand-up talks and through our HR functions – and we will continue to do so. We are encouraging healthy behaviors and protocols including frequent hand washing, use of sanitizers, and additional cleaning of workspaces, and are encouraging any employee who feels they are sick to stay home. We have worked with our postal unions to temporarily expand leave options for our employees. To date, there have been relatively few employees who have tested positive for COVID-19.

Keeping our customers safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are additionally reinforcing workplace behaviors to ensure that contact with our customers reflects the best guidance regarding healthy interactions, social distancing and risk minimization. To reduce health risks, we also are temporarily modifying customer signature requirements. We are also adapting procedures to ensure that we are able to serve all locations effectively and without interruption. We intend to act calmly and consistently based upon the advice of the medical and public health professionals.

Network integrity/continuity of operations. We are actively monitoring all aspects of our business operations and functions, and we are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect disruption or degradation in the services we provide. If, for some reason, we need to curtail operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of strong hurricanes, flooding, wildfire and other disruptive events. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified. DRAFT – PMG Letter to Leadership re COVID-19 v10:

DATE

The Honorable ____
XXX
XX
X

Dear Representative/Senator ____,

I am writing to share with you the actions the United States Postal Service is taking to meet the needs of the American public and to protect our employees and customers as our nation responds to the Coronavirus Disease 2019 (COVID-19) pandemic, and to also inform you of the serious impacts that the pandemic is having on the Postal Service’s financial condition. The pandemic has resulted in a near-term liquidity crisis that requires immediate action by Congress to ensure the Postal Service’s continued ability to provide our critical services. Our bipartisan Board of Governors has unanimously approved a set of recommendations for short-term financial relief to counteract the direct impacts of the pandemic on the Postal Service, which this letter explains in detail.

Postal Service Response to the Pandemic

The Board and Postal Service management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as Americans shelter in place, work from home, or otherwise practice social distancing. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people. In addition, the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy, and the postal sector is also designated by the Department of Homeland Security as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the men and women of the Postal Service accept, process, transport, and deliver important mail and vital packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online.

The Board has also been holding meetings and briefings at regular intervals to receive the latest information and provide strategic direction to management on responding to the pandemic. We have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services, both today and in the future. As we provide our vital service, we have been adjusting our policies and operating procedures in a manner consistent with the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials.
In this regard, the specific measures we have implemented in response to the COVID-19 outbreak include the following:

Keeping our employees safe. The essential services we provide are only possible due to the collective and individual efforts of the dedicated public servants who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, the COVID-19 Command Response team at Headquarters is working closely with HHS, CDC, and other public health officials to receive their latest guidance on appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include the following:

- Updated our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements. We have been actively encouraging any employee who feels sick to stay home. To facilitate their ability to do so, we entered into MOUs even in advance of the Families First Coronavirus Response Act with our unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19. We expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country. While we have taken these steps on our own initiative, we have also ensured that employees will also receive the emergency leave authorized by the Families First Coronavirus Response Act, in addition to what they otherwise have accrued.

- Worked to overcome the challenges in the supply chain to ensure that our employees have ready access to hand sanitizer, and that they receive surgical masks and gloves upon request. This has been a matter of the highest priority for the Postal Service throughout the pandemic. We have shipped over 18 million masks throughout the country to ensure that they are available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- Reinforced workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing, and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and “cough/sneeze” barriers. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries. We are strongly encouraging the use of facial coverings in those environments where social distancing is difficult to maintain, and will continue to evaluate our policies in that regard in light of the evolving circumstances.

- Updated our cleaning policies to ensure that all cleaning in our facilities occurs in a manner consistent with CDC guidance relating to this pandemic.

- Expanded the use of telework for those employees who are able to perform their jobs remotely.
• Issued and continue to issue a daily cadence of communications to employees to ensure they have the latest information and guidance.

Keeping our customers safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to continue to provide service effectively and safely. As noted above, we are reinforcing workplace behaviors to ensure that contact between our employees and customers reflect the best guidance regarding healthy interactions, social distancing, and risk minimization. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and employing floor tape to ensure that customers waiting in line can maintain the appropriate distance from one another, and from the retail counter.

Network integrity/continuity of operations. The Postal Service is undertaking all reasonable measures to minimize impacts to our customers. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified, and are coordinating organization-wide efforts to respond to evolving conditions, and to anticipate and prepare for customer and community needs throughout the country. We are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect significant lasting disruption or degradation in the services we provide in the domestic market, though we do anticipate that adjusting local operations in certain areas may be necessary to account for absent employees and other local contingencies, and that such adjustments will likely have temporary service impacts. If, for some reason, we need to curtail or adjust operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of hurricanes, flooding, wildfires and other disruptive events. In addition, given the impact of the pandemic on the availability of transportation, we have also been required to temporarily adjust our service standards for certain of our package products, and we have had to curtail operations to some foreign destinations where transportation is unavailable.

All-government emergency response. The Postal Service is playing an integral role in national emergency response and preparedness. The Postal Service is participating in the National Response Coordination Center (NRCC) headed by the Federal Emergency Management Agency (FEMA), and will continue to assist FEMA and other agencies in the whole-of-government response to the pandemic. The Postal Service has unique capabilities in this regard, because of our role as the most frequent touchpoint between the American people and the federal government through our nationwide retail and delivery network. For instance, we have leveraged our network to communicate CDC guidance to the public, both by displaying CDC posters in our retail facilities, by providing key information through our digital message boards in our large Post Offices, and by working with the Administration to help design and deliver a postcard from the President to every American household that relayed the key CDC guidance and that informed the recipients about the CDC’s COVID-19 specific website.

Further, we have also donated and delivered 500,000 N-95 masks (which are different from the masks that our employees utilize) that were in excess of our needs to the Department of Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses. Additionally, we are prepared to assist as necessary with the distribution of other personal protective equipment as a part of the Administration’s pandemic response. Finally, we will be delivering information concerning the stimulus checks that were provided as a part of the
CARES Act, and we will also be delivering the physical checks to those who will not be receiving them through direct deposit.

**Impact of the Pandemic on the Postal Service’s Financial Condition**

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our essential universal service mission, the COVID-19 pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.

Our projections of the impact of the COVID-19 pandemic are grounded in three knowns and a significant number of unknowns. The three knowns include what is currently happening with mail volumes, the impact of the last recession (i.e., the Great Recession) on the Postal Service’s volume after GDP growth resumed, and what mailers are communicating to the Postal Service regarding their short-term plans.

The first known is what is currently happening with mail volumes. We are seeing a significant decline across mail products, with growth in packages. All percentages describe the change in mail volume from the same period last year. During the first week of the COVID-impact (March 16-March 21), the Postal Service saw total delivered mail volume (consisting of letters and flats) decline by 5.3%, and these declines have accelerated significantly since then, as follows:

- The week of March 22nd total delivered mail volume declined by 7.5%
- The week of March 29th total delivered mail volume declined by 24.2%
- The week of April 5th total delivered mail volume declined by 32.2%.

**UPDATE FOR ADDITIONAL WEEKS?**

Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (March 16-March 21), the Postal Service saw delivered package volume decline by 1.0%, but since then packages have grown significantly, as follows:

- The week of March 22nd total delivered package volume grew by 5.0%
- The week of March 29th total delivered package volume increased by 11.8%
- The week of April 5th total delivered package volume increased by 20.7%.

**UPDATE FOR ADDITIONAL WEEKS?**

However, package growth cannot fully counteract the impact of the mail volume declines we are experiencing. In addition, although package growth has accelerated, our current projection is that this trend will not continue and we will likely have declines in packages in the upcoming months. The reasons for this belief are as follows:

- First, some of our customers are already expressing concerns about what they are reading concerning our financial condition and stability, and are pursuing alternatives to move and deliver their products.
- Second, the significant decline in GDP and the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
• Third, package growth will also be likely be impacted by supply chain disruptions across the system, as shortages due to production and transportation disruptions, not only in the U.S, but throughout the world, ripple through the economy, thus reducing package volume.

• Finally, much of the package growth seen in recent weeks was fueled by consumers stocking up on basic needed household items and stockpiling food. Much of this spending was funneled through e-commerce because consumers did not want to physically shop in stores. As consumers reach higher inventory levels of household staples, repeat purchasing will decline. Additionally, as society begins to open up, many (but not all) consumers will return to shopping in stores.

The known impacts experienced by the Postal Service during and after the last recession in 2008-2009 also influence our analysis. During the Great Recession, the Postal Service lost significant mail volume that never returned; total volumes experienced a steep downward step between 2007 and 2009 and thereafter returned to a more gradual decline that has continued ever since. Prior to the recession, the Postal Service had total mail volume of 212B pieces in FY2007. After the recession, the Postal Service had 168B pieces within the system in FY2011, a decline of 20.7% of total mail volume. Mail volume declined by 43.9B pieces and $9.2B in total revenue were lost during this period, with $6.8 billion of revenue lost in 2009 alone.

The final known factor is what mailers are telling us about their short-term plans. For the most part, major mailers are expecting a slow-down in mailing due to the economic impact across the economy. Advertisers have reduced spending, which is having a significant effect on marketing mail, with marketing mail volume down 42.5% in the most recent week.

There are three significant components to the COVID-19 impact that are unknown and make the effects of the pandemic on mail volumes extremely difficult to quantify:

• Depth of the short-term impact during Calendar Q2 and Q3. Specifically, how bad will economic conditions get?

• Duration of the economic impact. This is directly tied to how long the economy remains shuttered and will have a significant influence on FY2021 volumes and revenues.

• Volume levels to which mail returns after the pandemic is concluded. This will influence our financial outlook in future years. It is possible that many companies never return to business and that some portion of our volume will be permanently lost to digital alternatives. (As noted previously, after the Great Recession, a large portion of mail volume never returned and we suffered a permanent decline from FY2007 levels of over 20%).

Each of these components will ultimately be influenced by the degree to which GDP declines in the coming months, the increase in the unemployment rate and the persistence of higher unemployment levels, declines in business and consumer confidence and investment spending (which often significantly lag the beginning of an “official” recovery), and the timing of the reopening of segments of the economy. None of these elements are known or can be predicted with any real degree of certainty at this time. The estimates for GDP decline are diverse, with a recent survey of economists by the Wall Street Journal reporting a median decline in GDP of 26.5% in Postal Quarter 3 (April – June, 2020). In addition, the same survey of economists suggests a median projection for the unemployment rate by June 2020 of 13%. To put that

1 WSJ Survey of Economists - https://www.wsj.com/graphics/econsurvey/
GDP loss in perspective, the Great Recession caused a 3.3% decline in GDP in FY2009; the median decline in GDP projected for this quarter (April – September 2020) is 7 times worse than the worst quarter GDP experienced in the last recession.

These GDP and unemployment projections, when considered in light of the Postal Service’s financial results during the Great Recession, and the most recent volume decline information, have led us to the following initial estimates for the next 18 months, and for the longer-term:

- **Short-term impact - Postal Q3 & Q4 (April – September)**
  - We expect a significant short-term impact for the remainder of FY2020 due to the economic impact of COVID-19 which will cause projected declines of approximately 50% in volumes in Q3 and 57% in Q4, based on the speed at which volume has already declined, the GDP and unemployment projections estimated by economists and information communicated by mailers.

- **Medium-term impact - Fiscal Year 2021 (October 2020 – September 2021)**
  - As time moves forward and the economic lock-down begins to lessen, we project a gradual return of volumes beginning in Q1, FY 2021, to about 60% of the corresponding pre-COVID levels in Q1.
  - For the rest of FY 2021, we estimate that volumes will gradually return to about 74% of pre-COVID volume levels. As noted, current projections by economists suggest the economic impact of the pandemic will be worse than the Great Recession (when we permanently lost over 20% of volumes).
  - For the entirety of FY 2021, we estimate that total volume will be approximately 70% of pre-COVID volume levels.

- **Long-term impact - Fiscal Year 2022 and beyond**
  - The longer-term projection suggests a return to a “new normal” of about 75% of pre-COVID volume levels, which is slightly worse than the last recession when we returned to a new normal of approximately 80% of pre-recession volumes. We then expect the long-term gradual secular volume declines that we were experiencing prior to the pandemic will resume for the next 10 years.

All of these volume assumptions are dependent on many facets of the COVID-19 disruption that are as yet unknown. For example, the longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return could be less than currently projected. Likewise, if the economic lock-down retreats in the coming weeks and businesses return to normal quickly, it is possible that the volume levels could be greater than these projections. Ultimately, given the significant uncertainty concerning these matters, our projections, while severe, should not be considered a worst case, because it is conceivable that the impact of COVID-19 on mail volumes could be even more dire than we are anticipating.

Based on these projections, it is expected that the Postal Service’s financial condition will worsen significantly compared to previous estimates. Our current projections, which are based upon the assumptions set forth herein, indicate that the Postal Service will be essentially illiquid in **September 2020** if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than one payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers’ compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and
our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term note that was available to us under our existing statutory borrowing authority. A portion of this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

We are in discussions with the Treasury regarding the borrowing authority in the CARES Act, including the terms and conditions that would apply to such borrowing. We anticipate that this borrowing will be provided to us and that we will be required to borrow the full $10 billion that is available, for the reasons noted herein.

However, even with this additional $10B, the Postal Service will continue to face a liquidity crisis in the near-term. Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current projections, we will run out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections, directly due to the COVID-19 pandemic.

The Postal Service will continue to take aggressive action to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. However, due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act, our ability to significantly reduce expenses in the short-run is limited. For instance, any savings associated with reduced workhours are diminished because the new leave provisions of the Families First Coronavirus Relief Act have added additional costs to the Postal Service that are estimated to be approximately $600M-$900M, depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying the pandemic, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.

**Legislative Relief Sought from Congress**

There is an immediate need for Congress to give the Postal Service relief to address the direct impacts that the COVID-19 pandemic has had and will have on our financial condition, so that we can ensure our continued ability to operate in the near term. To address the impacts of the pandemic, we seek the following four items from Congress:

- $25B in funds to cover the estimated COVID-19 losses over the next two years;
- $25B in funds for modernization, to address the long-term undercapitalization of the Postal Service that has been exacerbated by the pandemic, which will help the Postal
Service weather the longer term economic impacts to our business resulting from the pandemic and ensure that our critical infrastructure will be ready to support the Nation for current and future needs;

- Satisfaction of our $14.4B in outstanding debt to the Federal Financing Bank
- Unrestricted borrowing authority up to $25B, by consolidating our existing borrowing authority of $15B under Title 39 of the United States Code, and $10B under the CARES Act, based on streamlined procedures, and by eliminating the $3B annual borrowing limitation.

As noted above, we estimate that the impact of COVID-19 will increase our net losses over the next 18 months by approximately $23B. Our request for $25B is intended to cover these losses, with a small cushion to account for contingencies, and hence to ensure our continued ability to operate in the near term. In this regard, our projections are not the worst case that could happen: in fact, we are not sure where the bottom is in terms of volume declines. As a result, it is important to build in some cushion to help ensure we remain liquid.

The longer-term impact of COVID-19 is estimated at almost $55B. In particular, the severe impact that the pandemic will have on our cash flows over the longer-term, due to the permanent shift in volumes, will exacerbate the fact that we are severely undercapitalized, by requiring us to further defer critically important capital investments. Modernizing our operations and infrastructure, such as through the purchase of new delivery vehicles, automated mail processing equipment, and other capital investments, is essential to our ability to continue providing our vital services to the American people in a prompt, reliable, and efficient manner. We therefore are requesting $25B to address the impact that the pandemic will have on our ability to modernize our critical operations infrastructure. This will not only have a direct benefit to the American people in terms of ensuring our ability to provide our services, but will also act as a stimulus to the economy as our Nation recovers from the pandemic, as these funds will be used to purchase goods from suppliers in the private sector.

Finally, eliminating our current debt and creating a streamlined borrowing process moving forward will give the Postal Service immediate financial relief, as well as critical flexibility to ensure our continued ability to operate in the short-term. We propose that future borrowings from Treasury or the Federal Financing Bank occur through the framework of the note purchase agreement through which we borrowed funds from Federal Financing Bank for the past two decades. The note purchase agreement provided a streamlined mechanism for such borrowings, and gives the Postal Service needed certainty as to its ability to readily access cash. In addition, the agreement sets forth reasonable and appropriate terms and conditions that protects the interests of both the Postal Service and Treasury.

While this immediate action by Congress is critical to ensuring that we can withstand the direct impacts of the pandemic in the near term, it is important to note that it will not resolve the fundamental problems with the Postal Service’s business model, or restore the Postal Service to longer-term financial stability. In fact, this short-term relief will only allow us to maintain operations until 2023, if provided in full.

The Postal Service operates under a statutory and regulatory structure that does not give us sufficient flexibility to reduce costs and increase revenue to meet the challenges of the secular decline in the use of the mail. The Board also believes that it is important that Congress
eventually act to address these business model issues, to ensure that the Postal Service can be financially stable over the next 10 years, though to be clear this is not something we are seeking immediately. That said, within the next 12-18 months, the Board also recommends that Congress will need to enact financial reforms that give us greater pricing and product flexibility, as well as the ability to address our retiree health benefits program, which is not properly integrated with Medicare, and our unaffordable pension payment obligations. Absent such reforms, which we believe have broad support among postal stakeholders, it would be necessary for the Board to adopt more significant and controversial structural reforms to ensure our ability to survive over the next 10 years.

**Conclusion**

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of our strengths as an organization is our stabilizing role in a crisis: the American people take confidence from our regular, daily role in their community and in their lives. The Postal Service remains committed to providing our critical services to the American, both today and for the years to come. The legislative recommendations discussed herein are presented with this goal in mind, and are fully endorsed by our bipartisan Board of Governors in a unanimous fashion.

Please let me know if you have any questions regarding this letter, and on behalf of the entire Board of Governors and the Postal Service we look forward to continuing to work with you and the Administration to protect and strengthen the Postal Service.

[Megan J. Brennan]
Dear Representative/Senator,

FINANCIAL IMPACTS ON THE POSTAL SERVICE AS A RESULT OF THE PANDEMIC, AND CORRESPONDING REQUEST FOR RELIEF

I am writing this White Paper is drafted, to share with you the actions the United States Postal Service is taking to meet the needs of the American public and to protect our employees and customers as our nation responds to the Coronavirus Disease 2019 (COVID-19) pandemic, and to also inform you of the serious impacts that the pandemic is having on the Postal Service's financial condition. The pandemic has resulted in a near-term liquidity crisis that requires immediate action by Congress to ensure the Postal Service's continued ability to provide our critical services. Our bipartisan Board of Governors has unanimously approved a set of recommendations for short-term financial relief to counteract the direct impacts of the pandemic on the Postal Service, which this letter explains in detail.

Postal Service Response to the Pandemic

The Board and Postal Service management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as Americans shelter in place, work from home, or otherwise practice social distancing. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people. In addition, the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy, and the postal sector is also designated by the Department of Homeland Security as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the men and women of the Postal Service accept, process, transport, and deliver important mail and vital packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online.

The Board has also been holding meetings and briefings at regular intervals to receive the latest information and provide strategic direction to management on responding to the pandemic. We have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services, both today and in the future. As we provide our vital service, we have been adjusting our policies and operating procedures in a manner consistent with the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials.
In this regard, the specific measures we have implemented in response to the COVID-19 outbreak include the following:

**Keeping our employees safe.** The essential services we provide are only possible due to the collective and individual efforts of the dedicated public servants who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, the COVID-19 Command Response team at Headquarters is working closely with HHS, CDC, and other public health officials to receive their latest guidance on appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include the following:

- Updated our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements. We have been actively encouraging any employee who feels sick to stay home. To facilitate their ability to do so, we entered into MOUs even in advance of the Families First Coronavirus Response Act with our unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19. We expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country. While we have taken these steps on our own initiative, we have also ensured that employees will also receive the emergency leave authorized by the Families First Coronavirus Response Act, in addition to what they otherwise have accrued.

- Worked to overcome the challenges in the supply chain to ensure that our employees have ready access to hand sanitizer, and that they receive surgical masks and gloves upon request. This has been a matter of the highest priority for the Postal Service throughout the pandemic. We have shipped over 18 million masks throughout the country to ensure that they are available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- Reinforced workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing, and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and “cough/sneeze” barriers. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries. We are strongly encouraging the use of facial coverings in those environments where social distancing is difficult to maintain, and will continue to evaluate our policies in that regard in light of the evolving circumstances.

- Updated our cleaning policies to ensure that all cleaning in our facilities occurs in a manner consistent with CDC guidance relating to this pandemic.

- Expanded the use of telework for those employees who are able to perform their jobs remotely.
• Issued and continue to issue a daily cadence of communications to employees to ensure they have the latest information and guidance.

Keeping our customers safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to continue to provide service effectively and safely. As noted above, we are reinforcing workplace behaviors to ensure that contact between our employees and customers reflect the best guidance regarding healthy interactions, social distancing, and risk minimization. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and employing floor tape to ensure that customers waiting in line can maintain the appropriate distance from one another, and from the retail counter.

Network integrity/continuity of operations. The Postal Service is undertaking all reasonable measures to minimize impacts to our customers. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified, and are coordinating organization-wide efforts to respond to evolving conditions, and to anticipate and prepare for customer and community needs throughout the country. We are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect significant lasting disruption or degradation in the services we provide in the domestic market, though we do anticipate that adjusting local operations in certain areas may be necessary to account for absent employees and other local contingencies, and that such adjustments will likely have temporary service impacts. If, for some reason, we need to curtail or adjust operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of hurricanes, flooding, wildfires and other disruptive events. In addition, given the impact of the pandemic on the availability of transportation, we have also been required to temporarily adjust our service standards for certain of our package products, and we have had to curtail operations to some foreign destinations where transportation is unavailable.

All-government emergency response. The Postal Service is playing an integral role in national emergency response and preparedness. The Postal Service is participating in the National Response Coordination Center (NRCC) headed by the Federal Emergency Management Agency (FEMA), and will continue to assist FEMA and other agencies in the whole-of-government response to the pandemic. The Postal Service has unique capabilities in this regard, because of our role as the most frequent touchpoint between the American people and the federal government through our nationwide retail and delivery network. For instance, we have leveraged our network to communicate CDC guidance to the public, both by displaying CDC posters in our retail facilities, by providing key information through our digital message boards in our large Post Offices, and by working with the Administration to help design and deliver a postcard from the President to every American household that relayed the key CDC guidance and that informed the recipients about the CDC’s COVID-19 specific website.

Further, we have also donated and delivered 500,000 N-95 masks (which are different from the masks that our employees utilize) that were in excess of our needs to the Department of Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses. Additionally, we are prepared to assist as necessary with the distribution of other personal protective equipment as a part of the Administration’s pandemic response. Finally, we will be delivering information concerning the stimulus checks that were provided as a part of the CARES
Act, and we will also be delivering the physical checks to those who will not be receiving them through direct deposit.

Impact of the Pandemic on the Postal Service’s Financial Condition

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our essential universal service mission, the COVID-19 pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.

Our projections of the impact of the COVID-19 pandemic are grounded in three knowns and a significant number of unknowns. The three knowns include what is currently happening with mail volumes, the impact of the last recession (i.e., the Great Recession) on the Postal Service’s volume after GDP growth resumed, and what mailers are communicating to the Postal Service regarding their short-term plans.

The first known is what is currently happening with mail volumes. We are seeing a significant decline across mail products, with growth in packages. All percentages describe the change in mail volume from the same period last year. During the first week of the COVID-impact (March 16-March 21), the Postal Service saw total delivered mail volume (consisting of letters and flats) decline by 5.3%, and these declines have accelerated significantly since then, as follows:

- The week of March 22nd total delivered mail volume declined by 7.5%
- The week of March 29th total delivered mail volume declined by 24.2%
- The week of April 5th total delivered mail volume declined by 32.2%.

Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (March 16-March 21), the Postal Service saw delivered package volume decline by 1.0%, but since then packages have grown significantly, as follows:

- The week of March 22nd total delivered package volume grew by 5.0%
- The week of March 29th total delivered package volume increased by 11.8%
- The week of April 5th total delivered package volume increased by 20.7%.

However, package growth cannot fully counteract the impact of the mail volume declines we are experiencing. In addition, although package growth has accelerated, our current projection is that this trend will not continue and we will likely have declines in packages in the upcoming months. The reasons for this belief are as follows:

- First, some of our customers are already expressing concerns about what they are reading concerning our financial condition and stability, and are pursuing alternatives to move and deliver their products.
- Second, the significant decline in GDP and the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
- Third, package growth will also be likely be impacted by supply chain disruptions across the system, as shortages due to production and transportation disruptions, not only in
the U.S, but throughout the world, ripple through the economy, thus reducing package volume.

- Finally, much of the package growth seen in recent weeks was fueled by consumers stocking up on basic needed household items and stockpiling food. Much of this spending was funneled through e-commerce because consumers did not want to physically shop in stores. As consumers reach higher inventory levels of household staples, repeat purchasing will decline. Additionally, as society begins to open up, many (but not all) consumers will return to shopping in stores.

The known impacts experienced by the Postal Service during and after the last recession in 2008-2009 also influence our analysis. During the Great Recession, the Postal Service lost significant mail volume that never returned; total volumes experienced a steep downward step between 2007 and 2009 and thereafter returned to a more gradual decline that has continued ever since. Prior to the recession, the Postal Service had total mail volume of 212B pieces in FY2007. After the recession, the Postal Service had 168B pieces within the system in FY2011, a decline of 20.7% of total mail volume. Mail volume declined by 43.9B pieces and $9.2B in total revenue were lost during this period, with $6.8 billion of revenue lost in 2009 alone.

The final known factor is what mailers are telling us about their short-term plans. For the most part, major mailers are expecting a slow-down in mailing due to the economic impact across the economy. Advertisers have reduced spending, which is having a significant effect on marketing mail, with marketing mail volume down 42.5% in the most recent week.

There are three significant components to the COVID-19 impact that are unknown and make the effects of the pandemic on mail volumes extremely difficult to quantify:

- **Depth** of the short-term impact during Calendar Q2 and Q3. Specifically, how bad will economic conditions get?
- **Duration** of the economic impact. This is directly tied to how long the economy remains shuttered and will have a significant influence on FY2021 volumes and revenues.
- **Volume levels** to which mail returns after the pandemic is concluded. This will influence our financial outlook in future years. It is possible that many companies never return to business and that some portion of our volume will be permanently lost to digital alternatives. (As noted previously, after the Great Recession, a large portion of mail volume never returned and we suffered a permanent decline from FY2007 levels of over 20%).

Each of these components will ultimately be influenced by the degree to which GDP declines in the coming months, the increase in the unemployment rate and the persistence of higher unemployment levels, declines in business and consumer confidence and investment spending (which often significantly lag the beginning of an “official” recovery), and the timing of the reopening of segments of the economy. None of these elements are known or can be predicted with any real degree of certainty at this time. The estimates for GDP decline are diverse, with a recent survey of economists by the Wall Street Journal reporting a median decline in GDP of 26.5% in Postal Quarter 3 (April – June, 2020). In addition, the same survey of economists suggests a median projection for the unemployment rate by June 2020 of 13%. To put that GDP loss in perspective, the Great Recession caused a 3.3% decline in GDP in FY2009; the median decline in GDP projected for this quarter (April – September 2020) is 7 times worse than the worst quarter GDP experienced in the last recession.

---

1 WSJ Survey of Economists - https://www.wsj.com/graphics/econsurvey/
These GDP and unemployment projections, when considered in light of the Postal Service’s financial results during the Great Recession, and the most recent volume decline information, have led us to the following initial estimates for the next 18 months, and for the longer-term:

- **Short-term impact - Postal Q3 & Q4 (April – September)**
  - We expect a significant short-term impact for the remainder of FY2020 due to the economic impact of COVID-19 which will cause projected declines of approximately 50% in volumes in Q3 and 57% in Q4, based on the speed at which volume has already declined, the GDP and unemployment projections estimated by economists and information communicated by mailers.

- **Medium-term impact - Fiscal Year 2021 (October 2020 – September 2021)**
  - As time moves forward and the economic lock-down begins to lessen, we project a gradual return of volumes beginning in Q1, FY 2021, to about 60% of the corresponding pre-COVID levels in Q1.
  - For the rest of FY 2021, we estimate that volumes will gradually return to about 74% of pre-COVID volume levels. As noted, current projections by economists suggest the economic impact of the pandemic will be worse than the Great Recession (when we permanently lost over 20% of volumes).
  - For the entirety of FY 2021, we estimate that total volume will be approximately 70% of pre-COVID volume levels.

- **Long-term impact - Fiscal Year 2022 and beyond**
  - The longer-term projection suggests a return to a “new normal” of about 75% of pre-COVID volume levels, which is slightly worse than the last recession when we returned to a new normal of approximately 80% of pre-recession volumes. We then expect the long-term gradual secular volume declines that we were experiencing prior to the pandemic will resume for the next 10 years.

All of these volume assumptions are dependent on many facets of the COVID-19 disruption that are as yet unknown. For example, the longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return could be less than currently projected. Likewise, if the economic lock-down retreats in the coming weeks and businesses return to normal quickly, it is possible that the volume levels could be greater than these projections. Ultimately, given the significant uncertainty concerning these matters, our projections, while severe, should not be considered a worst case, because it is conceivable that the impact of COVID-19 on mail volumes could be even more dire than we are anticipating.

Based on these projections, it is expected that the Postal Service’s financial condition will worsen significantly compared to previous estimates. Our current projections, which are based upon the assumptions set forth herein, indicate that the Postal Service will be essentially illiquid in **September 2020** if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than one payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers’ compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term note that was available to us under our existing statutory borrowing authority. A portion of
this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

We are in discussions with the Treasury regarding the borrowing authority in the CARES Act, including the terms and conditions that would apply to such borrowing. We anticipate that this borrowing will be provided to us and that we will be required to borrow the full $10 billion that is available, for the reasons noted herein.

However, even with this additional $10B, the Postal Service will continue to face a liquidity crisis in the near-term. Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current projections, we will run out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections, directly due to the COVID-19 pandemic.

The Postal Service will continue to take aggressive action to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. However, due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act, our ability to significantly reduce expenses in the short-run is limited. For instance, any savings associated with reduced workhours are diminished because the new leave provisions of the Families First Coronavirus Relief Act have added additional costs to the Postal Service that are estimated to be approximately $600M-$900M, depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying the pandemic, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.

Legislative Relief Sought from Congress

There is an immediate need for Congress to give the Postal Service relief to address the direct impacts that the COVID-19 pandemic has had and will have on our financial condition, so that we can ensure our continued ability to operate in the near term. To address the impacts of the pandemic, we seek the following four items from Congress:

- $25B in funds to cover the estimated COVID-19 losses over the next two years;
- $25B in funds for modernization, to address the long-term undercapitalization of the Postal Service that has been exacerbated by the pandemic, which will help the Postal Service weather the longer term economic impacts to our business resulting from the pandemic and ensure that our critical infrastructure will be ready to support the Nation for current and future needs;
• Satisfaction of our $14.4B in outstanding debt to the Federal Financing Bank

• Unrestricted borrowing authority up to $25B, by consolidating our existing borrowing authority of $15B under Title 39 of the United States Code, and $10B under the CARES Act, based on streamlined procedures, and by eliminating the $3B annual borrowing limitation.

As noted above, we estimate that the impact of COVID-19 will increase our net losses over the next 18 months by approximately $23B. Our request for $25B is intended to cover these losses, with a small cushion to account for contingencies, and hence to ensure our continued ability to operate in the near term. In this regard, our projections are not the worst case that could happen: in fact, we are not sure where the bottom is in terms of volume declines. As a result, it is important to build in some cushion to help ensure we remain liquid.

The longer-term impact of COVID-19 is estimated at almost $55B. In particular, the severe impact that the pandemic will have on our cash flows over the longer-term, due to the permanent shift in volumes, will exacerbate the fact that we are severely undercapitalized, by requiring us to further defer critically important capital investments. Modernizing our operations and infrastructure, such as through the purchase of new delivery vehicles, automated mail processing equipment, and other capital investments, is essential to our ability to continue providing our vital services to the American people in a prompt, reliable, and efficient manner. We therefore are requesting $25B to address the impact that the pandemic will have on our ability to modernize our critical operations infrastructure. This will not only have a direct benefit to the American people in terms of ensuring our ability to provide our services, but will also act as a stimulus to the economy as our Nation recovers from the pandemic, as these funds will be used to purchase goods from suppliers in the private sector.

Finally, eliminating our current debt and creating a streamlined borrowing process moving forward will give the Postal Service immediate financial relief, as well as critical flexibility to ensure our continued ability to operate in the short-term. We propose that future borrowings from Treasury or the Federal Financing Bank occur through the framework of the note purchase agreement through which we borrowed funds from Federal Financing Bank for the past two decades. The note purchase agreement provided a streamlined mechanism for such borrowings, and gives the Postal Service needed certainty as to its ability to readily access cash. In addition, the agreement sets forth reasonable and appropriate terms and conditions that protects the interests of both the Postal Service and Treasury.

While this immediate action by Congress is critical to ensuring that we can withstand the direct impacts of the pandemic in the near term, it is important to note that it will not resolve the fundamental problems with the Postal Service’s business model, or restore the Postal Service to longer-term financial stability. In fact, this short-term relief will only allow us to maintain operations until 2023, if provided in full.

The Postal Service operates under a statutory and regulatory structure that does not give us sufficient flexibility to reduce costs and increase revenue to meet the challenges of the secular decline in the use of the mail. The Board also believes that it is important that Congress eventually act to address these business model issues, to ensure that the Postal Service can be financially stable over the next 10 years, though to be clear this is not something we are seeking immediately. That said, within the next 12-18 months, the Board also recommends that Congress will need to enact financial reforms that give us greater pricing and product flexibility, as well as the ability to address our retiree health benefits program, which is not properly integrated with Medicare, and our
unaffordable pension payment obligations. Absent such reforms, which we believe have broad support among postal stakeholders, it would be necessary for the Board to adopt more significant and controversial structural reforms to ensure our ability to survive over the next 10 years.

Conclusion

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of our strengths as an organization is our stabilizing role in a crisis: the American people take confidence from our regular, daily role in their community and in their lives. The Postal Service remains committed to providing our critical services to the American, both today and for the years to come. The legislative recommendations discussed herein are presented with this goal in mind, and are fully endorsed by the Bipartisan Board of Governors in a unanimous fashion.

Please let us know if you have any questions regarding this letter, and on behalf of the entire Board of Governors and the entire Postal Service we look forward to continuing to work with you and the Administration to protect and strengthen the Postal Service.

[Megan J. Brennan]
Dear XXXXX,

I am writing to share with you the actions the United States Postal Service is taking to meet the needs of the American people and to keep our communities safe as our nation responds to the COVID-19 pandemic.

The Postal Service and our 630,000 employees are a part of every State and community throughout the United States, and we remain highly focused on our mission of binding our nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as more and more Americans are being asked to shelter in place and to work from home. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people, and the continued provision of postal services is designated both as an essential function under federal law during times of emergency and as part of the nation's critical infrastructure. Every day, the men and women of the Postal Service accept, process, transport, and deliver vital mail and packages, including important governmental information and benefits such as Census materials, social security checks, and materials advising the public on COVID-19; materials relating to elections, including ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing vital necessities, including medicines and other goods purchased online.

To ensure that we continue providing this critical government service, we have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses in all communities throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services. We intend to act calmly and consistently based upon the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials as we provide our vital service.

In this regard, the specific measures we are implementing in response to the COVID-19 outbreak include the following:

Keeping our employees safe. The essential services we provide are only possible due to the collective and individual efforts of the men and women who work for the Postal Service; our employees are also, of course, members of your States and communities. We are doing everything that we can to protect the health and safety of our employees while they are performing their critical jobs in your communities, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, we are working closely with HHS,
CDC, and other public health officials to receive their latest guidance on appropriate workplace practices, and are adjusting our policies accordingly. Among other things, we have updated our leave policies to ensure that employees have the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place provisions. We are working to overcome the challenges in the supply chain to ensure that our employees have access to hand sanitizer, and receive surgical masks and gloves upon request. We have also updated our cleaning policies to ensure that all of our facilities are cleaned in a manner consistent with CDC guidance.

Keeping the public safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to continue to provide service effectively and safely. We are reinforcing workplace behaviors to ensure that contact amongst our employees and with members of the public reflect the best guidance regarding healthy interactions, social distancing and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and “cough/sneeze” barriers. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and employing floor tape to ensure that customers waiting in line can maintain the appropriate distance from one another, and from the retail counter. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries.

Network integrity/continuity of operations. The Postal Service is conducting organization-wide efforts to respond to evolving operating conditions, and to anticipate and prepare for customer and community needs throughout the country. We are actively monitoring all aspects of our business operations and functions, and we are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect significant disruption or degradation in the services we provide, though we do anticipate that we may need to adjust local operations at times to account for contingencies and local impacts, which may have temporary service impacts. If, for some reason, we need to curtail or adjust operations in a particular facility or community, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of hurricanes, flooding, wildfires and other disruptive events.

All-government emergency response. The Postal Service is also playing an integral role in the Federal Government’s national emergency response, and wants to assist all levels of government in any way we can in response to the pandemic. The Postal Service is participating in the National Response Coordination Center (NRCC) headed by the Federal Emergency Management Agency (FEMA). The Postal Service has unique capabilities in supporting an all-government response, given our public-facing retail and delivery network that serves all residents in communities throughout the nation. For instance, we have leveraged our network to communicate CDC guidance to the public, both by displaying CDC posters in our retail facilities, by providing key information through our digital message boards in our large Post Offices, and by working with the Administration to help design and deliver a postcard from the President to every American household that relays the CDC guidance and includes an imbedded code that links to the CDC’s website. We have also donated and delivered 500,000 N-95 masks (which are different from the surgical ask that our employees utilize) that were in
excess of our needs to the Department of Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses.

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of our strengths as an organization is our stabilizing role in a crisis: the American people take confidence from our regular, daily role in their community and in their lives. As we adapt to the challenges posed by COVID-19, the Postal Service is committed to serving the needs of each community in our nation.

Please let me know if you have any questions or concern regarding this letter, and please let me know if there are any other ways that the Postal Service can support you during these difficult times.

As we adapt to the challenges posed by COVID-19, the Postal Service is committed to serving the needs of each community in our nation.

Please let me know if you have any questions or concern regarding this letter, and please let me know if there are any other ways that the Postal Service can support you during these difficult times.

[Megan J. Brennan]
Thank you, Chairman Duncan, for your kind remarks.

Good morning everyone. Thank you for joining us.

I’d like to begin by adding my thanks – and my admiration and respect – for the men and women of the Postal Service.

The Postal Service is very proud of the tremendous commitment shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure.

Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages.

This mail includes critical materials such as Census information, absentee ballots, sustaining necessities and prescription medications.

This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.
In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services, and we are honored to continue to serve that role today.

This mission has never been more important, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

It is more clear than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.

Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service.

In that regard, throughout the nation, in community after community, we have seen expressions of gratitude for the work our employees do each and every day to deliver for America.
We have seen hundreds of notes, posters, yard signs, and sidewalk chalk drawings thanking our employees for their work.

We are deeply grateful to the public for these many uplifting messages of support – it means a lot to all of us in the Postal Service.

[PAUSE]

That said, I am saddened to also inform you that many of our employees have been exposed to COVID, and many have become ill as a result. While most have and will recover, a number have succumbed to the virus.

It is incredibly difficult for us in the Postal Service to lose friends and colleagues in this way. I would like to express my deepest condolences and sympathies to the families, friends and coworkers of those who have fallen.

It says a lot about our employees – and all those throughout the country working in essential services roles – that they do the heroic work of keeping the nation functioning. We take some comfort in knowing that because we keep delivering, the public is better able to shelter-in-place and to reduce the spread of COVID-19.

[PAUSE]

However, as we continue to perform our vital mission, the national decline in economic activity has led to a rapid drop in mail volumes and a
significant loss in needed revenues, which threatens our ongoing ability to provide our essential federal service.

The immediate concern facing policymakers is how to maintain these essential postal services amid the dramatic and unanticipated mail volume declines that are a result of the COVID-19 pandemic, to ensure continued service to the American people in the near term.

[PAUSE]

Several weeks ago, I provided a briefing to members and staff of the House Oversight and Government Reform Committee, and separately to the Chairman of our Senate Oversight Committee.

For scheduling reasons, members of my team likewise provided similar briefings to staff of the minority leader of our Senate Oversight Committee and to other interested Congressional stakeholder.

In our briefings, based upon the data that was available to us at the time, we provided Congress with our financial projections that we anticipate will directly result from the impact of COVID-19, both in the short and longer term, and we described the devastating impacts that we believe the pandemic will have on our business.

We also provided Congress with our immediate legislative request to help the Postal Service to deal with those direct impacts of the pandemic.
While we continue to evaluate the data as we fight through the pandemic each week, our fundamental conclusions which formed the basis of our legislative request remain unchanged.

The stark reality is that the pandemic will cause extreme near-term and long-term implications from the steep decline in revenue we will suffer this year, and in the coming years, that endanger our ability to fulfill our universal service mission, absent Congressional intervention.

It is inescapable that we are at a critical juncture in the life of the Postal Service – at a time when America needs the Postal Service to sustain communities and play a vital in the economic recovery.

For that reason, we presented to Congress our request for immediate relief to address the direct impacts to our business from the COVID-19 pandemic.

We seek a significant appropriation to help offset the volume and revenue losses resulting from the pandemic over the next 18 months; a modernization grant to help us update our infrastructure so that we can survive this situation and confront future ones over the longer term, and which can serve as a catalyst as America’s economy emerges from the pandemic; and unrestricted access to borrowing.

Based upon our review of the business landscape, it is certain that immediate funding is necessary to sustain the Postal Service and to mitigate the impacts of the pandemic, and that is our focus right now.
We will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.

[PAUSE]

To be clear, however, while short-term action by Congress to address the liquidity crisis caused by the pandemic is critical, it is also true that the Postal Service faces long-standing financial challenges stemming from a broken business model that is imposed upon us by law and that leaves us financially unsustainable.

While we do not believe that our business model challenges can be thoughtfully resolved in the midst of the current COVID-19 crisis, it is a situation which we will ultimately need to confront.

Mail volumes continue to decline, but our ability to adjust to such volume declines is hampered by an inflexible statutory and regulatory structure that imposes legally mandated, unaffordable costs on us that we are prohibited from reducing, and yet we also lack the autonomy to diversify our products or to control our pricing.

Therefore, Congress must also adopt financial and/or structural reforms to our business model, in order to ensure the Postal Service’s long-term viability.
At the appropriate time, we will seek additional reform measures to fix our business model and to make us sustainable long-term.

The financial relief provided from these additional reforms, along with the immediate relief that we are requesting now that is directly related to the pandemic, will provide the Postal Service with positive cash flow over the next ten years.

In the interim, as the Congress and the Administration take steps to support businesses and industries around the country, we strongly encourage action to shore up the finances of the Postal Service, enabling us to continue to fulfill our indispensable mission during the pandemic, and to play an effective role in the nation’s economic recovery.

(PAUSE)

I would like to close, as I opened, by again extending my gratitude for the heroism and commitment of the men and women of the Postal Service, who continue to serve the American public during this pandemic.

It is an honor and a privilege to work alongside all of my postal colleagues and to share in our mission of service to the nation, which binds us all together.

Thank you.

And with that, I’ll turn it back over to Chairman Duncan.
Thank you, Chairman Duncan, for your kind remarks.

Good morning everyone. Thank you for joining us.

I’d like to begin by adding my thanks – and my admiration and respect – for the men and women of the Postal Service.

Postal employees embody the spirit of public service as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure.

The 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages throughout this country.

This items we handle include supplies that sustain us, prescription medications, benefit checks and other critical materials such as medical information, financial statements, absentee ballots and Census surveys.

This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.
In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services—a mission proudly accepted each and every day.

This mission has never been more important, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

It is more clear than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.

A recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service.

This is a credit to the men and women of the Postal Service who go to work every day to serve their communities.
Throughout the nation, in community after community, we have seen expressions of gratitude for the work our employees do to deliver for America.

We have seen hundreds of notes, posters, yard signs, and sidewalk chalk drawings thanking our employees for their work.

We are deeply grateful to the public for these many uplifting messages of support – it means a lot to all of us in the Postal Service.

[PAUSE]

That said, I am saddened to also inform you that a number of our employees have become ill with the virus and some have succumbed to it.

I would like to express my deepest condolences and sympathies to the families, friends and coworkers of those who have died.

Hopefully, they can take some comfort in knowing that because we keep delivering, the public is better able to shelter-in-place and to reduce the spread of COVID-19.

It says a lot about our employees – and all those throughout the country working in essential services roles – that they do the heroic work of keeping the nation functioning.

[PAUSE]
However, as we continue to perform our vital mission, the national decline in economic activity has led to a rapid drop in mail volumes and a significant loss in needed revenues which we anticipate will deepen, and which threatens our ongoing ability to provide our essential federal service.

The immediate concern is how to maintain these essential postal services amid the dramatic and unanticipated mail volume declines that are and will result from the COVID-19 pandemic, to ensure continued service to the American people in the near term.

[PAUSE]

Several weeks ago, I provided a briefing to members and staff of the House Oversight and Government Reform Committee, and separately to the Chairman and Ranking Member of our Senate Oversight Committee.

In our briefings, based upon the data that was available to us at the time, we provided Congress with our financial projections that we anticipate will directly result from the impact of COVID-19, both in the short and longer term, and we described the devastating impacts that we believe the pandemic will have on our business.

We also provided Congress with our immediate legislative request to help the Postal Service to deal with those direct impacts of the pandemic.
While we continue to evaluate the data as we fight through the pandemic each week, our fundamental conclusions which formed the basis of our legislative request remain unchanged.

The stark reality is that the pandemic will cause extreme near-term and long-term implications from the steep decline in revenue we will suffer this year, and in the coming years, that endanger our ability to fulfill our universal service mission, absent Congressional intervention.

It is inescapable that we are at a critical juncture in the life of the Postal Service – at a time when America needs the Postal Service to sustain communities and play a vital in the economic recovery.

Our request of Congress is for immediate relief to address the direct impacts to our business from the COVID-19 pandemic.

We seek a significant appropriation to help offset the volume and revenue losses resulting from the pandemic over the next 18 months.

We also request a modernization grant to help us update our infrastructure so that we can weather the longer term economic impacts of the pandemic and position the Postal Service to maintain and update our critical infrastructure to continue to support the nation.

Modernizing our infrastructure has an added benefit of serving as a catalyst as America’s economy emerges from the pandemic.
Finally, we seek unrestricted access to borrowing.

Based upon our review of the business landscape, it is certain that immediate funding is necessary to sustain the Postal Service and to mitigate the impacts of the pandemic, and that is our focus right now.

We will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.

[PAUSE]

To be clear, however, while short-term action by Congress to address the liquidity crisis caused by the pandemic is critical, it is also true that the Postal Service faces long-standing financial challenges stemming from a broken business model that is imposed upon us by law and that leaves us financially unsustainable.

While we do not believe that our business model challenges can be thoughtfully resolved in the midst of the current COVID-19 crisis, it is a situation which policy makers will ultimately need to confront.

Mail volumes continue to decline, but our ability to adjust to such volume declines is hampered by an inflexible statutory and regulatory structure that imposes legally mandated, unaffordable costs on us that we are prohibited
from reducing, and yet we also lack the autonomy to diversify our products or to control pricing for products that generate the majority of our revenue.

To ensure the long-term viability of the Postal Service, Congress must adopt reforms to our business model, which, along with the immediate relief that we are requesting now that is directly related to the pandemic, will provide the Postal Service with positive cash flow over the next ten years.

In the interim, as the Congress and the Administration take steps to support businesses and industries around the country, we strongly encourage action to shore up the finances of the Postal Service, enabling us to continue to fulfill our indispensable mission during the pandemic, and to play an effective role in the nation’s economic recovery.

[PAUSE]

As many of you know, Governor David C. Williams announced his resignation from the Board of Governors, effective April 30, 2020.

I worked with Governor Williams during his time on the Board, and in his prior capacity as the Inspector General for the Postal Service, and I always appreciated his passion, his perspective, and his creativity.

I thank him for his service and wish him the best.
Also, I would like to send my heartfelt congratulation to Louis DeJoy, who will succeed me to become the 75th Postmaster General of the United States.

Louis will bring the tremendous business acumen and insights that he has acquired over a very successful 35-year business career.

I know that he is excited about the opportunity, extremely focused, and very committed to the long-term success of the Postal Service.

I can assure you that I will do everything I can to support Louis and ensure a seamless transition, and I am confident that he will be very successful in the role.

(PAUSE)

I would like to close, as I opened, by again extending my gratitude to the men and women of the Postal Service for the vital service they continue to provide to the American public during this pandemic, and I thank you for all of the support you have provided me during my postal career.

It is a privilege to work alongside all of my postal colleagues and to share in our ongoing mission of service to the nation.

And with that, I’ll turn it back over to Chairman Duncan.
Thank you, Chairman Duncan, for your kind remarks.

Good morning everyone. Thank you for joining us.

I’d like to begin by adding my thanks – and my admiration and respect – for the men and women of the Postal Service.

The Postal Service is very proud of the tremendous commitment shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure.

Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages.

This mail includes critical materials such as Census information, absentee ballots, sustaining necessities and prescription medications.

This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.
In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services, and we are honored to continue to serve that role today.

This mission has never been more important, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

It is more clear than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.

Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service.

In that regard, throughout the nation, in community after community, we have seen expressions of gratitude for the work our employees do each and every day to deliver for America.
We have seen hundreds of notes, posters, yard signs, and sidewalk chalk drawings thanking our employees for their work.

We are deeply grateful to the public for these many uplifting messages of support – it means a lot to all of us in the Postal Service.

[PAUSE]

That said, I am saddened to also inform you that many of our employees have been exposed to COVID, and many have become ill as a result. While most have and will recover, a number have succumbed to the virus.

It is incredibly difficult for us in the Postal Service to lose friends and colleagues in this way. I would like to express my deepest condolences and sympathies to the families, friends and coworkers of those who have fallen.

It says a lot about our employees – and all those throughout the country working in essential services roles – that they do the heroic work of keeping the nation functioning. We take some comfort in knowing that because we keep delivering, the public is better able to shelter-in-place and to reduce the spread of COVID-19.

[PAUSE]

However, as we continue to perform our vital mission, the national decline in economic activity has led to a rapid drop in mail volumes and a
significant loss in needed revenues, which threatens our ongoing ability to provide our essential federal service.

The immediate concern facing policymakers is how to maintain these essential postal services amid the dramatic and unanticipated mail volume declines that are a result of the COVID-19 pandemic, to ensure continued service to the American people in the near term.

[PAUSE]

Several weeks ago, I provided a briefing to members and staff of the House Oversight and Government Reform Committee, and separately to the Chairman of our Senate Oversight Committee.

For scheduling reasons, members of my team likewise provided similar briefings to staff of the minority leader of our Senate Oversight Committee and to other interested Congressional stakeholder.

We also provided Congress with our immediate legislative request, to help the Postal Service deal with the direct impacts of the pandemic. The request was unanimously approved by our Board of Governors.

We seek a significant appropriation to help offset the volume and revenue losses resulting from the pandemic over the next 18 months.
We also request modernization funding so that we can weather the longer term economic impacts of the pandemic and position the Postal Service to maintain and update our critical infrastructure to continue to support the nation.

Modernizing our infrastructure has an added benefit of serving as a catalyst as America’s economy opens up.

Finally, we seek unrestricted access to borrowing.

(PAUSE)

While we continue to evaluate the data as we fight through the pandemic each week, our fundamental conclusions which formed the basis of our legislative request remain unchanged.

Based upon our review of the business landscape, it is certain that immediate funding is necessary to sustain the Postal Service and to mitigate the impacts of the pandemic.

That is our focus right now.

We will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.
To be clear, however, while short-term action by Congress to address the liquidity crisis caused by the pandemic is necessary, it is also true that the Postal Service faces long-standing financial challenges stemming from a broken business model that is imposed upon us by law and that leaves us financially unsustainable.

While we do not believe that our business model challenges can be thoughtfully resolved in the midst of the current crisis, it is a situation which policy makers will need to confront in the immediate future.

Mail volumes continue to decline, but our ability to adjust to such volume declines is hampered by an inflexible statutory and regulatory structure that imposes legally mandated, unaffordable costs on us.

We are prohibited from reducing these costs, and yet we also lack the autonomy to diversify our products or to control pricing for products that generate the majority of our revenue.

To ensure the long-term viability of the Postal Service, Congress must adopt reforms to our business model along with the immediate relief that we are requesting now that is directly related to the pandemic.

These combined actions by Congress, along with continued management initiatives to drive greater efficiency and increase profitable revenue, will provide the Postal Service with positive cash flow over the next ten years.
As the Congress and the Administration take steps to support businesses and industries around the country, we strongly encourage action to shore up the finances of the Postal Service and enable us to continue to fulfill our indispensable mission and to play an effective role in the nation’s economic recovery.

[PAUSE]

I join the Chairman in thanking David Williams for his service on the Board and wish him the best.

Also, I would like to send my heartfelt congratulations to Louis DeJoy, who will succeed me to become the 75th Postmaster General of the United States.

Louis will bring the business acumen and insights that he has acquired over a successful 35-year professional career.

I can assure you that I will do everything I can to support Louis and ensure a seamless transition.

I also know postal employees throughout the organization will support Louis in his efforts to uphold and preserve the Postal Service’s cherished role in our nation.

(PAUSE)
I would like to close, as I opened, by again extending my gratitude to the men and women of the Postal Service for the vital service they continue to provide to the American public.

It has been my privilege to work alongside all of my postal colleagues and to share in our ongoing mission of service to the nation.

I thank you for all of the support you have provided me during my postal career.

And with that, I'll turn it back over to Chairman Duncan.
Thank you, Chairman Duncan

Good morning everyone.

I also want to express my deep condolences to the families, friends and coworkers of our postal colleagues that have passed as result of COVID-19. My thoughts and prayers are with you.

I would also add my thanks – and my admiration and respect – for the men and women of the Postal Service.

Postal employees embody the spirit of public service as they continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure.

The 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages throughout this country.

We deliver supplies that sustain us, prescription medications, benefit checks and other critical materials such as medical information, financial statements, absentee ballots, and Census surveys.

This fundamental service which our employees provide is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.
The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the nation with prompt, secure, and affordable mail and package delivery services—a mission proudly accepted each and every day.

This mission has never been more important, and it is clearer than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.

A recent survey by the Pew Research Center shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service.

This is a credit to the men and women of the Postal Service who go to work every day to serve their communities.

As Chairman Duncan mentioned, throughout the nation, in community after community, we have seen expressions of gratitude for the work our employees do to deliver for America.

We are deeply grateful to the public for these many uplifting messages of support—it makes clear to us that the Postal Service matters to the American people.
Several weeks ago, I provided a briefing to members and staff of the House Committee on Oversight and Government Reform, and separately to the Chairman and Ranking Member of the Senate Committee on Homeland Security and Governmental Affairs, on our financial projections that we anticipate will directly result from the impact of COVID-19, both in the short and longer term.

In our briefings, based upon the data that was available to us at the time, we described the significant impacts that we believe the pandemic will have on our business.

The stark reality is that the pandemic will cause meaningful near-term and long-term implications from the steep decline in revenue we will suffer this year, and in the coming years, that endanger our ability to fulfill our universal service mission, absent Congressional intervention.

We also provided Congress with our immediate legislative request, to help the Postal Service deal with the direct impacts of the pandemic. The request was unanimously approved by our Board of Governors.

We seek a significant appropriation to help offset the volume and revenue losses resulting from the pandemic over the next 18 months.
We also request modernization funding so that we can weather the longer term economic impacts of the pandemic and position the Postal Service to maintain and update our critical infrastructure to continue to support the nation.

I also know postal employees throughout the organization will support him in his efforts to uphold and preserve the Postal Service’s cherished role in our nation.

(PAUSE)

I would like to close, as I opened, by again extending my gratitude to the men and women of the Postal Service for the vital service they continue to provide to the American public.

It is a privilege to work alongside all of my postal colleagues and to share in our ongoing mission of service to the nation.

I thank you for all of the support you have provided me during my postal career.

And with that, I'll turn it back over to Chairman Duncan.
Thank you, Chairman Duncan, for your kind remarks.

Good morning everyone.

I also want to express my deep condolences to the families, friends and coworkers of our postal colleagues that have passed as result of COVID-19. My thoughts and prayers are with you.

I would also add my thanks – and my admiration and respect – for the men and women of the Postal Service.

Postal employees embody the spirit of public service as they continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure.

The 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages throughout this country.

We convey supplies that sustain us, prescription medications, benefit checks and other critical materials such as medical information, financial statements, absentee ballots, and Census surveys.
This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the nation with prompt, secure, and affordable mail and package delivery services--a mission proudly accepted each and every day.

This mission has never been more important, and it is more clear than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.

A recent survey by the Pew Research Center shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service.

This is a credit to the men and women of the Postal Service who go to work every day to serve their communities.

As Chairman Duncan mentioned, throughout the nation, in community after community, we have seen expressions of gratitude for the work our employees do to deliver for America.
We are deeply grateful to the public for these many uplifting messages of support – It makes clear to us that the Postal Service matters to the American people.

[PAUSE]

Several weeks ago, I provided a briefing to members and staff of the House Committee on Oversight and Government Reform, and separately to the Chairman and Ranking Member of the Senate Committee on Homeland Security and Governmental Affairs, on.

In our briefings, based upon the data that was available to us at the time, we provided Congress with our financial projections that we anticipate will directly result from the impact of COVID-19, both in the short and longer term.

In our briefings, based upon the data that was available to us at the time, we described the significant impacts that we believe the pandemic will have on our business.

We also provided Congress with our immediate legislative request to help the Postal Service to deal with those direct impacts of the pandemic.

While we continue to evaluate the data as we fight through the pandemic each week, our fundamental conclusions which formed the basis of our legislative request remain unchanged.
The stark reality is that the pandemic will cause meaningful near-term and long-term implications from the steep decline in revenue we will suffer this year, and in the coming years, that endanger our ability to fulfill our universal service mission, absent Congressional intervention.

We are at a critical juncture in the life of the Postal Service—at a time when America needs the Postal Service to sustain communities and play a vital role in the economic recovery.

We also provided Congress with our immediate legislative request, to help the Postal Service deal with those direct impacts of the pandemic. The request was unanimously approved by our Board of Governors. Our request of Congress is for immediate relief to address the direct impacts to our business from the COVID-19 pandemic.

We seek a significant appropriation to help offset the volume and revenue losses resulting from the pandemic over the next 18 months.

We also request a modernization fundinggrant to help us update our infrastructure so that we can weather the longer term economic impacts of the pandemic and position the Postal Service to maintain and update our critical infrastructure to continue to support the nation.

Modernizing our infrastructure has an added benefit of serving as a catalyst as America’s economy opens up.

Finally, we seek unrestricted access to borrowing.
While we continue to evaluate the data as we fight through the pandemic each week, our fundamental conclusions which formed the basis of our legislative request remain unchanged. Based upon our review of the business landscape, it is certain that immediate funding is necessary to sustain the Postal Service and to mitigate the impacts of the pandemic.

That is our focus right now.

We will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.

[PAUSE]

To be clear, however, while short-term action by Congress to address the liquidity crisis caused by the pandemic is necessary, it is also true that the Postal Service faces long-standing financial challenges stemming from a broken business model that is imposed upon us by law and that leaves us financially unsustainable.

While we do not believe that our business model challenges can be thoughtfully resolved in the midst of the current crisis, it is a situation which policy makers will ultimately need to confront in the immediate future.
Mail volumes continue to decline, but our ability to adjust to such volume declines is hampered by an inflexible statutory and regulatory structure that imposes legally mandated, unaffordable costs on us.

We are prohibited from reducing these costs, and yet we also lack the autonomy to diversify our products or to control pricing for products that generate the majority of our revenue.

To ensure the long-term viability of the Postal Service, Congress must adopt reforms to our business model—along with the immediate relief that we are requesting now that is directly related to the pandemic.

These combined actions by Congress will provide the Postal Service with positive cash flow over the next ten years.

As the Congress and the Administration take steps to support businesses and industries around the country, we strongly encourage action to shore up the finances of the Postal Service and enable us to continue to fulfill our indispensable mission and to play an effective role in the nation’s economic recovery.

[PAUSE]

I join the Chairman in thanking David Williams for his service on the Board and wish him the best.
Also, I would like to send my heartfelt congratulations to Louis DeJoy, who will succeed me to become the 75th Postmaster General of the United States.

Louis will bring the business acumen and insights that he has acquired over a successful 35-year professional career.

As Louis remarked yesterday, he has a great appreciation for the Postal Service and our dedicated employees who faithfully execute our mission, which he characterized as “the heart and soul” of this institution.

I could not agree with him more, and I can assure you that I will do everything I can to support Louis and ensure a seamless transition.

I also know postal employees throughout the organization will support him in his efforts to uphold and preserve the Postal Service’s cherished role in our nation.

(PAUSE)

I would like to close, as I opened, by again extending my gratitude to the men and women of the Postal Service for the vital service they continue to provide to the American public.

Thank you, Chairman Duncan, for your kind remarks.

Good morning everyone. Thank you for joining us.

I also want to express my deep condolences to the families, friends and coworkers of our postal colleagues that have passed as result of COVID-19. My thoughts and prayers are with you.

I’d like to begin by adding my thanks – and my admiration and respect – for the men and women of the Postal Service.

Postal employees embody the spirit of public service as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure.

The 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages throughout this country.

This items we handle include supplies that sustain us, prescription medications, benefit checks and other critical materials such as medical information, financial statements, absentee ballots, and Census surveys.

Commented [MT]-[WD1]: We use deliver in the previous paragraph, and I also want to use a broader term so that it encompasses all of our craft employees.
This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.

In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services—a mission proudly accepted each and every day.

This mission has never been more important, and as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

It is more clear than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.
A recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service.

This is a credit to the men and women of the Postal Service who go to work every day to serve their communities.

As Chairman Duncan mentioned, throughout the nation, in community after community, we have seen expressions of gratitude for the work our employees do to deliver for America.

We have seen hundreds of notes, posters, yard signs, and sidewalk chalk drawings thanking our employees for their work.

We are deeply grateful to the public for these many uplifting messages of support – it means a lot to all of us in the Postal Service. It makes’s clear to us that, the Postal Service matters to the American people.

[PAUSE]

That said, I am saddened to also inform you that a number of our employees have become ill with the virus and some have___succumbed to it.

I would like to express my deepest condolences and sympathies to their families, friends, and coworkers of those who have died.
Hopefully, they can take some comfort in knowing that because we keep delivering, the public is better able to shelter-in-place and to reduce the spread of COVID-19.

It says a lot about our employees—and all those throughout the country working in essential services roles—that they do the heroic work of keeping the nation functioning.

[PAUSE]

However, as we continue to perform our vital mission, the national decline in economic activity has led to a rapid drop in mail volumes and a significant loss in needed revenues which we anticipate will deepen, and which threatens our ongoing ability to provide our essential federal service.

The immediate concern is how to maintain these essential postal services amid the dramatic and unanticipated mail volume declines that are and will result from the COVID-19 pandemic, to ensure continued service to the American people in the near term.

[PAUSE]

Several weeks ago, I provided a briefing to members and staff of the House Committee on Oversight and Government Reform, and separately to the Chairman and Ranking Member of our Senate Oversight Committee on Homeland Security and Governmental Affairs.
In our briefings, based upon the data that was available to us at the time, we provided Congress with our financial projections that we anticipate will directly result from the impact of COVID-19, both in the short and longer term.

We described the significant devastating impacts that we believe the pandemic will have on our business.

We also provided Congress with our immediate legislative request to help the Postal Service to deal with those direct impacts of the pandemic.

While we continue to evaluate the data as we fight through the pandemic each week, our fundamental conclusions which formed the basis of our legislative request remain unchanged.

The stark reality is that the pandemic will cause significant meaningful extreme near-term and long-term implications from the steep decline in revenue we will suffer this year, and in the coming years, that endanger our ability to fulfill our universal service mission, absent Congressional intervention.

It is inescapable that we are at a critical juncture in the life of the Postal Service – at a time when America needs the Postal Service to sustain communities and play a vital role in the economic recovery.

Our request of Congress is for immediate relief to address the direct impacts to our business from the COVID-19 pandemic.
We seek a significant appropriation to help offset the volume and revenue losses resulting from the pandemic over the next 18 months.

We also request a modernization grant to help us update our infrastructure so that we can weather the longer term economic impacts of the pandemic and position the Postal Service to maintain and update our critical infrastructure to continue to support the nation.

Modernizing our infrastructure has an added benefit of serving as a catalyst as America’s economy opens up emerges from the pandemic.

Finally, we seek unrestricted access to borrowing.

Based upon our review of the business landscape, it is certain that immediate funding is necessary to sustain the Postal Service and to mitigate the impacts of the pandemic, and

That is our focus right now.

We will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.

[PAUSE]
To be clear, however, while short-term action by Congress to address the liquidity crisis caused by the pandemic is necessary, it is also true that the Postal Service faces long-standing financial challenges stemming from a broken business model that is imposed upon us by law and that leaves us financially unsustainable.

While we do not believe that our business model challenges can be thoughtfully resolved in the midst of the current COVID-19 crisis, it is a situation which policy makers will ultimately need to confront.

Mail volumes continue to decline, but our ability to adjust to such volume declines is hampered by an inflexible statutory and regulatory structure that imposes legally mandated, unaffordable costs on us.

Costs that we are prohibited from reducing, and yet we also lack the autonomy to diversify our products or to control pricing for products that generate the majority of our revenue.

To ensure the long-term viability of the Postal Service, Congress must adopt reforms to our business model, which, along with the immediate relief that we are requesting now that is directly related to the pandemic.

These combined actions by Congress, will provide the Postal Service with positive cash flow over the next ten years.
Along with the immediate relief that we are requesting now that is directly related to the pandemic, will provide the Postal Service with positive cash flow over the next ten years.

In the interim, as the Congress and the Administration take steps to support businesses and industries around the country, we strongly encourage action to shore up the finances of the Postal Service, enabling us to continue to fulfill our indispensable mission and to play an effective role in the nation’s economic recovery.

Enabling us to continue to fulfill our indispensable mission during the pandemic, and to play an effective role in the nation’s economic recovery.

[PAUSE]

As many of you know, Governor David C. Williams announced his resignation from the Board of Governors, effective April 30, 2020. I join the Chairman in thanking David Williams for his service on the Board and wish him the best.

I worked with David Governor Williams during his time on the Board, and in his prior capacity as the Inspector General for the Postal Service, and I always appreciated his passion, his perspective, and his creativity.

I thank him for his service and wish him the best.
Also, I would like to send my heartfelt congratulations to Louis DeJoy, who will succeed me to become the 75th Postmaster General of the United States.

Louis will bring the tremendous business acumen and insights that he has acquired over a very successful 35-year professional business career.

As Louis remarked yesterday, he has a great appreciation for the Postal Service and our dedicated employees who faithfully execute our mission, which he characterized as “the heart and soul” of this institution.

I could not agree with him more, and I know that he is excited about the opportunity, extremely focused, and very committed to the long-term success of the Postal Service.

I can assure you that I will do everything I can to support Louis and ensure a seamless transition, and I am confident that he will be very successful in the role. I know postal employees throughout the organization will support him in his efforts to upholding and preserve the Postal Service’s cherished role in our nation.

(PAUSE)

I would like to close, as I opened, by again extending my gratitude to the men and women of the Postal Service for the vital service they continue to provide to the American public during this pandemic, and
It is a privilege to work alongside all of my postal colleagues and to share in our ongoing mission of service to the nation.

I thank you for all of the support you have provided me during my postal career.

And with that, I’ll turn it back over to Chairman Duncan.
Thank you, Chairman Duncan, for your kind remarks.

Good morning everyone.

I also want to express my deep condolences to the families, friends and coworkers of our postal colleagues that have passed as result of COVID-19. My thoughts and prayers are with you.

I would also add my thanks – and my admiration and respect – for the men and women of the Postal Service.

Postal employees embody the spirit of public service as they continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure.

The 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages throughout this country.

We convey supplies that sustain us, prescription medications, benefit checks and other critical materials such as medical information, financial statements, absentee ballots, and Census surveys.
This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the nation with prompt, secure, and affordable mail and package delivery services—a mission proudly accepted each and every day.

This mission has never been more important, and it is more clear than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.

U.S. Postal Service to Deliver Face Coverings to Every American Household

Historic Delivery of 650 Million Face Coverings is in Partnership with the White House Coronavirus Task Force, the Department of Health and Human Services and a Consortium of Textile Manufacturers

WASHINGTON — The U.S. Postal Service today announced it will distribute 650 million reusable cotton face coverings on behalf of the Department of Health and Human Services (HHS) to every residential delivery point in America, beginning in areas which HHS has identified as experiencing high transmission rates of COVID-19 and to workers providing essential services throughout the nation during this pandemic.

This unprecedented undertaking is being done in partnership with the White House Coronavirus Task Force, the Department of Health and Human Services (HHS) and a consortium of textile manufacturers. Project: America Strong sub-task force within the Federal Emergency Management Agency (FEMA) Unified Command Structure, is complementing the Administration’s whole-of-nation response to COVID-19.

The first shipments are expected to reach U.S. households as early as April xx.

“The United States Postal Service is proud to partner with the White House Coronavirus Task Force, the Department of Health and Human Services and a consortium of textile manufacturers in delivering on this critical national initiative,” said Postmaster General and CEO Megan J. Brennan. “Our organization is uniquely suited to undertake this historic mission of delivering face coverings to every American household in the fight against the COVID-19 virus. Our employees have been providing essential service to the American people throughout this crisis delivering vital goods and services and serving as a lifeline for millions of people as this pandemic tragedy has unfolded. Today, we stand ready to deliver, as we have for 240 years, to the American public to help our country combat the pandemic.”

The Postal Service will utilize its unrivaled distribution network to deliver the face coverings. Letter carriers, rural carriers and others will deliver one pack of five face coverings to each residential delivery point and PO Box. The packs will arrive labeled with a generic Postal Service barcode, not a specific address, and will include HHS instructions on proper use.

HHS will determine the delivery points and timetable by counties within select geographic areas. Orleans and Jefferson parishes in Louisiana will be the first areas to receive face coverings, followed by King County, WA; Wayne County, MI, and New York.

The Postal Service provides a vital public service that is a part of this nation’s critical infrastructure.

The Postal Service receives no tax dollars for operating expenses and relies on the sale of postage, products and services to fund its operations.

Draft - Reactive Media Statement

The United States Postal Service is proud to partner with the White House Coronavirus Task Force, the Department of Health and Human Services (HHS), and a consortium of textile manufacturers in delivering on this critical national initiative of distributing xxx million reusable cotton face coverings to every household in America, beginning in some of the areas experiencing the highest transmission rates of COVID-19.

The packs will arrive labeled with a generic Postal Service barcode, not a specific address, and HHS instructions on proper use. They will include five reusable face cloths, which can be used up to 15 times each.

This effort will be rolled out in phases with HHS determining the order of delivery locations. Today’s announcement is another example of the Postal Service’s critical role in delivering for America during the COVID-19 crisis. With our unrivaled network, which includes 630,000 employees, 31,000 Post Offices and delivery 6 days a week to 160 million addresses, the Postal Service is uniquely positioned to provide nationwide support during this historic crisis.

Recently, the Postal Service also strongly encouraged its employees to follow additional CDC recommendations, advising people to wear cloth face coverings in public settings where other social distancing measures are difficult to maintain. We continue to follow the strategies and measures of the CDC.

Commented [KRC1]: This paragraph does not seem to fit with the main purpose of this statement and takes away from the effort. Also, if the media sees carriers and clerks in the area not wearing face coverings, this message probably won't land well.
FINANCIAL IMPACTS ON THE POSTAL SERVICE AS A RESULT OF THE PANDEMIC, AND CORRESPONDING REQUEST FOR RELIEF

This White Paper is drafted to share with you the actions the United States Postal Service is taking to meet the needs of the American public and to protect our employees and customers as our nation responds to the Coronavirus Disease 2019 (COVID-19) pandemic, and to also inform you of the serious impacts that the pandemic is having on the Postal Service’s financial condition. The pandemic has resulted in a near-term liquidity crisis that requires immediate action by Congress to ensure the Postal Service’s continued ability to provide our critical services. Our bipartisan Board of Governors has unanimously approved a set of recommendations for short-term financial relief to counteract the direct impacts of the pandemic on the Postal Service, which this White Paper explains in detail.

Postal Service Response to the Pandemic

The Board and Postal Service management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as Americans shelter in place, work from home, or otherwise practice social distancing. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people. In addition, the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy, and the postal sector is also designated by the Department of Homeland Security as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the men and women of the Postal Service accept, process, transport, and deliver important mail and vital packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online.

The Board has also been holding meetings and briefings at regular intervals to receive the latest information and provide strategic direction to management on responding to the pandemic. We have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services, both today and in the future. As we provide our vital service, we have been adjusting our policies and operating procedures in a manner consistent with the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials.

In this regard, the specific measures we have implemented in response to the COVID-19 outbreak include the following:

Keeping our employees safe. The essential services we provide are only possible due to the collective and individual efforts of the dedicated public servants who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, the COVID-19 Command Response team at Headquarters is working closely with HHS, CDC, and other public health officials to receive their latest guidance on
appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include the following:

- Updated our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements. We have been actively encouraging any employee who feels sick to stay home. To facilitate their ability to do so, we entered into MOUs even in advance of the Families First Coronavirus Response Act with our unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19. We expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country. While we have taken these steps on our own initiative, we have also ensured that employees will also receive the emergency leave authorized by the Families First Coronavirus Response Act, in addition to what they otherwise have accrued.

- Worked to overcome the challenges in the supply chain to ensure that our employees have ready access to hand sanitizer, and that they receive surgical masks and gloves upon request. This has been a matter of the highest priority for the Postal Service throughout the pandemic. We have shipped over 18 million masks throughout the country to ensure that they are available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- Reinforced workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing, and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and “cough/sneeze” barriers. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries. We are strongly encouraging the use of facial coverings in those environments where social distancing is difficult to maintain, and will continue to evaluate our policies in that regard in light of the evolving circumstances.

- Updated our cleaning policies to ensure that all cleaning in our facilities occurs in a manner consistent with CDC guidance relating to this pandemic.

- Expanded the use of telework for those employees who are able to perform their jobs remotely.

- Issued and continue to issue a daily cadence of communications to employees to ensure they have the latest information and guidance.

Keeping our customers safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to
continue to provide service effectively and safely. As noted above, we are reinforcing workplace behaviors to ensure that contact between our employees and customers reflect the best guidance regarding healthy interactions, social distancing, and risk minimization. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and employing floor tape to ensure that customers waiting in line can maintain the appropriate distance from one another, and from the retail counter.

Network integrity/continuity of operations. The Postal Service is undertaking all reasonable measures to minimize impacts to our customers. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified, and are coordinating organization-wide efforts to respond to evolving conditions, and to anticipate and prepare for customer and community needs throughout the country. We are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect significant lasting disruption or degradation in the services we provide in the domestic market, though we do anticipate that adjusting local operations in certain areas may be necessary to account for absent employees and other local contingencies, and that such adjustments will likely have temporary service impacts. If, for some reason, we need to curtail or adjust operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of hurricanes, flooding, wildfires and other disruptive events. In addition, given the impact of the pandemic on the availability of transportation, we have also been required to temporarily adjust our service standards for certain of our package products, and we have had to curtail operations to some foreign destinations where transportation is unavailable.

All-government emergency response. The Postal Service is playing an integral role in national emergency response and preparedness. The Postal Service is participating in the National Response Coordination Center (NRCC) headed by the Federal Emergency Management Agency (FEMA), and will continue to assist FEMA and other agencies in the whole-of-government response to the pandemic. The Postal Service has unique capabilities in this regard, because of our role as the most frequent touchpoint between the American people and the federal government through our nationwide retail and delivery network. For instance, we have leveraged our network to communicate CDC guidance to the public, both by displaying CDC posters in our retail facilities, by providing key information through our digital message boards in our large Post Offices, and by working with the Administration to help design and deliver a postcard from the President to every American household that relayed the key CDC guidance and that informed the recipients about the CDC’s COVID-19 specific website.

Further, we have also donated and delivered 500,000 N-95 masks (which are different from the masks that our employees utilize) that were in excess of our needs to the Department of Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses. Additionally, we are prepared to assist as necessary with the distribution of other personal protective equipment as a part of the Administration’s pandemic response. Finally, we will be delivering information concerning the stimulus checks that were provided as a part of the CARES Act, and we will also be delivering the physical checks to those who will not be receiving them through direct deposit.

Impact of the Pandemic on the Postal Service's Financial Condition

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our essential universal service mission, the COVID-19 pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.
Our projections of the impact of the COVID-19 pandemic are grounded in three knowns and a significant number of unknowns. The three knowns include what is currently happening with mail volumes, the impact of the last recession (i.e., the Great Recession) on the Postal Service’s volume after GDP growth resumed, and what mailers are communicating to the Postal Service regarding their short-term plans.

The first known is what is currently happening with mail volumes. We are seeing a significant decline across mail products, with growth in packages. All percentages describe the change in mail volume from the same period last year. During the first week of the COVID-impact (March 16-March 21), the Postal Service saw total delivered mail volume (consisting of letters and flats) decline by 5.3%, and these declines have accelerated significantly since then, as follows:

- The week of March 22nd total delivered mail volume declined by 7.5%
- The week of March 29th total delivered mail volume declined by 24.2%
- The week of April 5th total delivered mail volume declined by 32.2%.

Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (March 16-March 21), the Postal Service saw delivered package volume decline by 1.0%, but since then packages have grown significantly, as follows:

- The week of March 22nd total delivered package volume grew by 5.0%
- The week of March 29th total delivered package volume increased by 11.8%
- The week of April 5th total delivered package volume increased by 20.7%.

However, package growth cannot fully counteract the impact of the mail volume declines we are experiencing. In addition, although package growth has accelerated, our current projection is that this trend will not continue and we will likely have declines in packages in the upcoming months. The reasons for this belief are as follows:

- First, some of our customers are already expressing concerns about what they are reading concerning our financial condition and stability, and are pursuing alternatives to move and deliver their products.
- Second, the significant decline in GDP and the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
- Third, package growth will also be likely be impacted by supply chain disruptions across the system, as shortages due to production and transportation disruptions, not only in the U.S, but throughout the world, ripple through the economy, thus reducing package volume.
- Finally, much of the package growth seen in recent weeks was fueled by consumers stocking up on basic needed household items and stockpiling food. Much of this spending was funneled through e-commerce because consumers did not want to physically shop in stores. As consumers reach higher inventory levels of household staples, repeat purchasing will decline. Additionally, as society begins to open up, many (but not all) consumers will return to shopping in stores.
The known impacts experienced by the Postal Service during and after the last recession in 2008-2009 also influence our analysis. During the Great Recession, the Postal Service lost significant mail volume that never returned; total volumes experienced a steep downward step between 2007 and 2009 and thereafter returned to a more gradual decline that has continued ever since. Prior to the recession, the Postal Service had total mail volume of 212B pieces in FY2007. After the recession, the Postal Service had 168B pieces within the system in FY2011, a decline of 20.7% of total mail volume. Mail volume declined by 43.9B pieces and $9.2B in total revenue were lost during this period, with $6.8 billion of revenue lost in 2009 alone.

The final known factor is what mailers are telling us about their short-term plans. For the most part, major mailers are expecting a slow-down in mailing due to the economic impact across the economy. Advertisers have reduced spending, which is having a significant effect on marketing mail, with marketing mail volume down 42.5% in the most recent week.

There are three significant components to the COVID-19 impact that are unknown and make the effects of the pandemic on mail volumes extremely difficult to quantify:

- **Depth** of the short-term impact during Calendar Q2 and Q3. Specifically, how bad will economic conditions get?
- **Duration** of the economic impact. This is directly tied to how long the economy remains shuttered and will have a significant influence on FY2021 volumes and revenues.
- **Volume levels** to which mail returns after the pandemic is concluded. This will influence our financial outlook in future years. It is possible that many companies never return to business and that some portion of our volume will be permanently lost to digital alternatives. (As noted previously, after the Great Recession, a large portion of mail volume never returned and we suffered a permanent decline from FY2007 levels of over 20%).

Each of these components will ultimately be influenced by the degree to which GDP declines in the coming months, the increase in the unemployment rate and the persistence of higher unemployment levels, declines in business and consumer confidence and investment spending (which often significantly lag the beginning of an “official” recovery), and the timing of the reopening of segments of the economy. None of these elements are known or can be predicted with any real degree of certainty at this time. The estimates for GDP decline are diverse, with a recent survey of economists by the Wall Street Journal reporting a median decline in GDP of 26.5% in Postal Quarter 3 (April – June, 2020). In addition, the same survey of economists suggests a median projection for the unemployment rate by June 2020 of 13%. To put that GDP loss in perspective, the Great Recession caused a 3.3% decline in GDP in FY2009; the median decline in GDP projected for this quarter (April – September 2020) is 7 times worse than the worst quarter GDP experienced in the last recession.

These GDP and unemployment projections, when considered in light of the Postal Service’s financial results during the Great Recession, and the most recent volume decline information, have led us to the following initial estimates for the next 18 months, and for the longer-term:

- **Short-term impact - Postal Q3 & Q4 (April – September)**
  - We expect a significant short-term impact for the remainder of FY2020 due to the economic impact of COVID-19 which will cause projected declines of approximately 50% in volumes in Q3 and 57% in Q4, based on the speed at

---

1 WSJ Survey of Economists - https://www.wsj.com/graphics/econsurvey/
which volume has already declined, the GDP and unemployment projections estimated by economists and information communicated by mailers.

- Medium-term impact - Fiscal Year 2021 (October 2020 – September 2021)
  - As time moves forward and the economic lock-down begins to lessen, we project a gradual return of volumes beginning in Q1, FY 2021, to about 60% of the corresponding pre-COVID levels in Q1.
  - For the rest of FY 2021, we estimate that volumes will gradually return to about 74% of pre-COVID volume levels. As noted, current projections by economists suggest the economic impact of the pandemic will be worse than the Great Recession (when we permanently lost over 20% of volumes).
  - For the entirety of FY 2021, we estimate that total volume will be approximately 70% of pre-COVID volume levels.

- Long-term impact - Fiscal Year 2022 and beyond
  - The longer-term projection suggests a return to a “new normal” of about 75% of pre-COVID volume levels, which is slightly worse than the last recession when we returned to a new normal of approximately 80% of pre-recession volumes. We then expect the long-term gradual secular volume declines that we were experiencing prior to the pandemic will resume for the next 10 years.

All of these volume assumptions are dependent on many facets of the COVID-19 disruption that are as yet unknown. For example, the longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return could be less than currently projected. Likewise, if the economic lock-down retreats in the coming weeks and businesses return to normal quickly, it is possible that the volume levels could be greater than these projections. Ultimately, given the significant uncertainty concerning these matters, our projections, while severe, should not be considered a worst case, because it is conceivable that the impact of COVID-19 on mail volumes could be even more dire than we are anticipating.

Based on these projections, it is expected that the Postal Service’s financial condition will worsen significantly compared to previous estimates. Our current projections, which are based upon the assumptions set forth herein, indicate that the Postal Service will be essentially illiquid in **September 2020** if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than one payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers’ compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term note that was available to us under our existing statutory borrowing authority. A portion of this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

We are in discussions with the Treasury regarding the borrowing authority in the CARES Act, including the terms and conditions that would apply to such borrowing. We anticipate that this borrowing will be provided to us and that we will be required to borrow the full $10 billion that is available, for the reasons noted herein.
However, even with this additional $10B, the Postal Service will continue to face a liquidity crisis in the near-term. Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current projections, we will run out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections, directly due to the COVID-19 pandemic.

The Postal Service will continue to take aggressive action to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. However, due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act, our ability to significantly reduce expenses in the short-run is limited. For instance, any savings associated with reduced workhours are diminished because the new leave provisions of the Families First Coronavirus Relief Act have added additional costs to the Postal Service that are estimated to be approximately $600M-$900M, depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying the pandemic, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.

**Legislative Relief Sought from Congress**

There is an immediate need for Congress to give the Postal Service relief to address the direct impacts that the COVID-19 pandemic has had and will have on our financial condition, so that we can ensure our continued ability to operate in the near term. To address the impacts of the pandemic, we seek the following four items from Congress:

- $25B in funds to cover the estimated COVID-19 losses over the next two years;
- $25B in funds for modernization, to address the long-term undercapitalization of the Postal Service that has been exacerbated by the pandemic, which will help the Postal Service weather the longer term economic impacts to our business resulting from the pandemic and ensure that our critical infrastructure will be ready to support the Nation for current and future needs;
- Satisfaction of our $14.4B in outstanding debt to the Federal Financing Bank
- Unrestricted borrowing authority up to $25B, by consolidating our existing borrowing authority of $15B under Title 39 of the United States Code, and $10B under the CARES Act, based on streamlined procedures, and by eliminating the $3B annual borrowing limitation.
As noted above, we estimate that the impact of COVID-19 will increase our net losses over the next 18 months by approximately $23B. Our request for $25B is intended to cover these losses, with a small cushion to account for contingencies, and hence to ensure our continued ability to operate in the near term. In this regard, our projections are not the worst case that could happen; in fact, we are not sure where the bottom is in terms of volume declines. As a result, it is important to build in some cushion to help ensure we remain liquid.

The longer-term impact of COVID-19 is estimated at almost $55B. In particular, the severe impact that the pandemic will have on our cash flows over the longer-term, due to the permanent shift in volumes, will exacerbate the fact that we are severely undercapitalized, by requiring us to further defer critically important capital investments. Modernizing our operations and infrastructure, such as through the purchase of new delivery vehicles, automated mail processing equipment, and other capital investments, is essential to our ability to continue providing our vital services to the American people in a prompt, reliable, and efficient manner. We therefore are requesting $25B to address the impact that the pandemic will have on our ability to modernize our critical operations infrastructure. This will not only have a direct benefit to the American people in terms of ensuring our ability to provide our services, but will also act as a stimulus to the economy as our Nation recovers from the pandemic, as these funds will be used to purchase goods from suppliers in the private sector.

Finally, eliminating our current debt and creating a streamlined borrowing process moving forward will give the Postal Service immediate financial relief, as well as critical flexibility to ensure our continued ability to operate in the short-term. We propose that future borrowings from Treasury or the Federal Financing Bank occur through the framework of the note purchase agreement through which we borrowed funds from Federal Financing Bank for the past two decades. The note purchase agreement provided a streamlined mechanism for such borrowings, and gives the Postal Service needed certainty as to its ability to readily access cash. In addition, the agreement sets forth reasonable and appropriate terms and conditions that protects the interests of both the Postal Service and Treasury.

While this immediate action by Congress is critical to ensuring that we can withstand the direct impacts of the pandemic in the near term, it is important to note that it will not resolve the fundamental problems with the Postal Service’s business model, or restore the Postal Service to longer-term financial stability. In fact, this short-term relief will only allow us to maintain operations until 2023, if provided in full.

The Postal Service operates under a statutory and regulatory structure that does not give us sufficient flexibility to reduce costs and increase revenue to meet the challenges of the secular decline in the use of the mail. The Board also believes that it is important that Congress eventually act to address these business model issues, to ensure that the Postal Service can be financially stable over the next 10 years, though to be clear this is not something we are seeking immediately. That said, within the next 12-18 months, the Board also recommends that Congress will need to enact financial reforms that give us greater pricing and product flexibility, as well as the ability to address our retiree health benefits program, which is not properly integrated with Medicare, and our unaffordable pension payment obligations. Absent such reforms, which we believe have broad support among postal stakeholders, it would be necessary for the Board to adopt more significant and controversial structural reforms to ensure our ability to survive over the next 10 years.

**Conclusion**

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of
our strengths as an organization is our stabilizing role in a crisis: the American people take confidence from our regular, daily role in their community and in their lives. The Postal Service remains committed to providing our critical services to the American, both today and for the years to come. The legislative recommendations discussed herein are presented with this goal in mind, and are fully endorsed by the bipartisan Board of Governors in a unanimous fashion.

Please let us know if you have any questions regarding this White Paper. The Board of Governors and the entire Postal Service look forward to continuing to work with you and the Administration to protect and strengthen the Postal Service.
DRAFT – WHITE PAPER for Leadership re COVID-19 v10:

FINANCIAL IMPACTS ON THE POSTAL SERVICE AS A RESULT OF THE PANDEMIC, AND CORRESPONDING REQUEST FOR RELIEF

This White Paper is drafted to share with you the actions the United States Postal Service is taking to meet the needs of the American public and to protect our employees and customers as our nation responds to the Coronavirus Disease 2019 (COVID-19) pandemic, and to also inform you of the serious impacts that the pandemic is having on the Postal Service’s financial condition. The pandemic has resulted in a near-term liquidity crisis that requires immediate action by Congress to ensure the Postal Service’s continued ability to provide our critical services. Our bipartisan Board of Governors has unanimously approved a set of recommendations for short-term financial relief to counteract the direct impacts of the pandemic on the Postal Service, which this White Paper explains in detail.

Postal Service Response to the Pandemic

The Board and Postal Service management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as Americans shelter in place, work from home, or otherwise practice social distancing. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people. In addition, the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy, and the postal sector is also designated by the Department of Homeland Security as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the men and women of the Postal Service accept, process, transport, and deliver important mail and vital packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online.

The Board has also been holding meetings and briefings at regular intervals to receive the latest information and provide strategic direction to management on responding to the pandemic. We have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services, both today and in the future. As we provide our vital service, we have been adjusting our policies and operating procedures in a manner consistent with the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials.

In this regard, the specific measures we have implemented in response to the COVID-19 outbreak include the following:

Keeping our employees safe. The essential services we provide are only possible due to the collective and individual efforts of the dedicated public servants who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, the COVID-19 Command Response team at Headquarters is working closely with HHS, CDC, and other public health officials to receive their latest guidance on
appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include the following:

- Updated our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements. We have been actively encouraging any employee who feels sick to stay home. To facilitate their ability to do so, we entered into MOUs even in advance of the Families First Coronavirus Response Act with our unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19. We expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country. While we have taken these steps on our own initiative, we have also ensured that employees will also receive the emergency leave authorized by the Families First Coronavirus Response Act, in addition to what they otherwise have accrued.

- Worked to overcome the challenges in the supply chain to ensure that our employees have ready access to hand sanitizer, and that they receive surgical masks and gloves upon request. This has been a matter of the highest priority for the Postal Service throughout the pandemic. We have shipped over 18 million masks throughout the country to ensure that they are available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- Reinforced workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing, and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and “cough/sneeze” barriers. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries. We are strongly encouraging the use of facial coverings in those environments where social distancing is difficult to maintain, and will continue to evaluate our policies in that regard in light of the evolving circumstances.

- Updated our cleaning policies to ensure that all cleaning in our facilities occurs in a manner consistent with CDC guidance relating to this pandemic.

- Expanded the use of telework for those employees who are able to perform their jobs remotely.

- Issued and continue to issue a daily cadence of communications to employees to ensure they have the latest information and guidance.

**Keeping our customers safe.** The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to
continue to provide service effectively and safely. As noted above, we are reinforcing workplace behaviors to ensure that contact between our employees and customers reflect the best guidance regarding healthy interactions, social distancing, and risk minimization. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and employing floor tape to ensure that customers waiting in line can maintain the appropriate distance from one another, and from the retail counter.

**Network integrity/continuity of operations.** The Postal Service is undertaking all reasonable measures to minimize impacts to our customers. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified, and are coordinating organization-wide efforts to respond to evolving conditions, and to anticipate and prepare for customer and community needs throughout the country. We are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect significant lasting disruption or degradation in the services we provide in the domestic market, though we do anticipate that adjusting local operations in certain areas may be necessary to account for absent employees and other local contingencies, and that such adjustments will likely have temporary service impacts. If, for some reason, we need to curtail or adjust operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of hurricanes, flooding, wildfires and other disruptive events. In addition, given the impact of the pandemic on the availability of transportation, we have also been required to temporarily adjust our service standards for certain of our package products, and we have had to curtail operations to some foreign destinations where transportation is unavailable.

**All-government emergency response.** The Postal Service is playing an integral role in national emergency response and preparedness. The Postal Service is participating in the National Response Coordination Center (NRCC) headed by the Federal Emergency Management Agency (FEMA), and will continue to assist FEMA and other agencies in the whole-of-government response to the pandemic. The Postal Service has unique capabilities in this regard, because of our role as the most frequent touchpoint between the American people and the federal government through our nationwide retail and delivery network. For instance, we have leveraged our network to communicate CDC guidance to the public, both by displaying CDC posters in our retail facilities, by providing key information through our digital message boards in our large Post Offices, and by working with the Administration to help design and deliver a postcard from the President to every American household that relayed the key CDC guidance and that informed the recipients about the CDC’s COVID-19 specific website.

Further, we have also donated and delivered 500,000 N-95 masks (which are different from the masks that our employees utilize) that were in excess of our needs to the Department of Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses. Additionally, we are prepared to assist as necessary with the distribution of other personal protective equipment as a part of the Administration’s pandemic response. Finally, we will be delivering information concerning the stimulus checks that were provided as a part of the CARES Act, and we will also be delivering the physical checks to those who will not be receiving them through direct deposit.

**Impact of the Pandemic on the Postal Service’s Financial Condition**

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our essential universal service mission, the COVID-19 pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.
Our projections of the impact of the COVID-19 pandemic are grounded in three knowns and a significant number of unknowns. The three knowns include what is currently happening with mail volumes, the impact of the last recession (i.e., the Great Recession) on the Postal Service’s volume after GDP growth resumed, and what mailers are communicating to the Postal Service regarding their short-term plans.

The first known is what is currently happening with mail volumes. We are seeing a significant decline across mail products, with growth in packages. All percentages describe the change in mail volume from the same period last year. During the first week of the COVID-impact (March 16-March 21), the Postal Service saw total delivered mail volume (consisting of letters and flats) decline by 5.3%, and these declines have accelerated significantly since then, as follows:

- The week of March 22nd total delivered mail volume declined by 7.5%
- The week of March 29th total delivered mail volume declined by 24.2%
- The week of April 5th total delivered mail volume declined by 32.2%

Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (March 16-March 21), the Postal Service saw delivered package volume decline by 1.0%, but since then packages have grown significantly, as follows:

- The week of March 22nd total delivered package volume grew by 5.0%
- The week of March 29th total delivered package volume increased by 11.8%
- The week of April 5th total delivered package volume increased by 20.7%

However, package growth cannot fully counteract the impact of the mail volume declines we are experiencing. In addition, although package growth has accelerated, our current projection is that this trend will not continue and we will likely have declines in packages in the upcoming months. The reasons for this belief are as follows:

- First, some of our customers are already expressing concerns about what they are reading concerning our financial condition and stability, and are pursuing alternatives to move and deliver their products.
- Second, the significant decline in GDP and the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
- Third, package growth will also be likely be impacted by supply chain disruptions across the system, as shortages due to production and transportation disruptions, not only in the U.S, but throughout the world, ripple through the economy, thus reducing package volume.
- Finally, much of the package growth seen in recent weeks was fueled by consumers stocking up on basic needed household items and stockpiling food. Much of this spending was funneled through e-commerce because consumers did not want to physically shop in stores. As consumers reach higher inventory levels of household staples, repeat purchasing will decline. Additionally, as society begins to open up, many (but not all) consumers will return to shopping in stores.
The known impacts experienced by the Postal Service during and after the last recession in 2008-2009 also influence our analysis. During the Great Recession, the Postal Service lost significant mail volume that never returned; total volumes experienced a steep downward step between 2007 and 2009 and thereafter returned to a more gradual decline that has continued ever since. Prior to the recession, the Postal Service had total mail volume of 212B pieces in FY2007. After the recession, the Postal Service had 168B pieces within the system in FY2011, a decline of 20.7% of total mail volume. Mail volume declined by 43.9B pieces and $9.2B in total revenue were lost during this period, with $6.8 billion of revenue lost in 2009 alone.

The final known factor is what mailers are telling us about their short-term plans. For the most part, major mailers are expecting a slow-down in mailing due to the economic impact across the economy. Advertisers have reduced spending, which is having a significant effect on marketing mail, with marketing mail volume down 42.5% in the most recent week.

There are three significant components to the COVID-19 impact that are unknown and make the effects of the pandemic on mail volumes extremely difficult to quantify:

- **Depth** of the short-term impact during Calendar Q2 and Q3. Specifically, how bad will economic conditions get?
- **Duration** of the economic impact. This is directly tied to how long the economy remains shuttered and will have a significant influence on FY2021 volumes and revenues.
- **Volume levels** to which mail returns after the pandemic is concluded. This will influence our financial outlook in future years. It is possible that many companies never return to business and that some portion of our volume will be permanently lost to digital alternatives. (As noted previously, after the Great Recession, a large portion of mail volume never returned and we suffered a permanent decline from FY2007 levels of over 20%).

Each of these components will ultimately be influenced by the degree to which GDP declines in the coming months, the increase in the unemployment rate and the persistence of higher unemployment levels, declines in business and consumer confidence and investment spending (which often significantly lag the beginning of an “official” recovery), and the timing of the reopening of segments of the economy. None of these elements are known or can be predicted with any real degree of certainty at this time. The estimates for GDP decline are diverse, with a recent survey of economists by the Wall Street Journal reporting a median decline in GDP of 26.5% in Postal Quarter 3 (April – June, 2020). In addition, the same survey of economists suggests a median projection for the unemployment rate by June 2020 of 13%. To put that GDP loss in perspective, the Great Recession caused a 3.3% decline in GDP in FY2009; the median decline in GDP projected for this quarter (April – September 2020) is 7 times worse than the worst quarter GDP experienced in the last recession.

These GDP and unemployment projections, when considered in light of the Postal Service’s financial results during the Great Recession, and the most recent volume decline information, have led us to the following initial estimates for the next 18 months, and for the longer-term:

- **Short-term impact - Postal Q3 & Q4 (April – September)**
  - We expect a significant short-term impact for the remainder of FY2020 due to the economic impact of COVID-19 which will cause projected declines of approximately 50% in volumes in Q3 and 57% in Q4, based on the speed at

---

1 WSJ Survey of Economists - https://www.wsj.com/graphics/econsurvey/
which volume has already declined, the GDP and unemployment projections estimated by economists and information communicated by mailers.

- **Medium-term impact - Fiscal Year 2021 (October 2020 – September 2021)**
  - As time moves forward and the economic lock-down begins to lessen, we project a gradual return of volumes beginning in Q1, FY 2021, to about 60% of the corresponding pre-COVID levels in Q1.
  - For the rest of FY 2021, we estimate that volumes will gradually return to about 74% of pre-COVID volume levels. As noted, current projections by economists suggest the economic impact of the pandemic will be worse than the Great Recession (when we permanently lost over 20% of volumes).
  - For the entirety of FY 2021, we estimate that total volume will be approximately 70% of pre-COVID volume levels.

- **Long-term impact - Fiscal Year 2022 and beyond**
  - The longer-term projection suggests a return to a “new normal” of about 75% of pre-COVID volume levels, which is slightly worse than the last recession when we returned to a new normal of approximately 80% of pre-recession volumes. We then expect the long-term gradual secular volume declines that we were experiencing prior to the pandemic will resume for the next 10 years.

All of these volume assumptions are dependent on many facets of the COVID-19 disruption that are as yet unknown. For example, the longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return could be less than currently projected. Likewise, if the economic lock-down retreats in the coming weeks and businesses return to normal quickly, it is possible that the volume levels could be greater than these projections. Ultimately, given the significant uncertainty concerning these matters, our projections, while severe, should not be considered a worst case, because it is conceivable that the impact of COVID-19 on mail volumes could be even more dire than we are anticipating.

Based on these projections, it is expected that the Postal Service’s financial condition will worsen significantly compared to previous estimates. Our current projections, which are based upon the assumptions set forth herein, indicate that the Postal Service will be essentially illiquid in September 2020 if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than one payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers’ compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term note that was available to us under our existing statutory borrowing authority. A portion of this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

We are in discussions with the Treasury regarding the borrowing authority in the CARES Act, including the terms and conditions that would apply to such borrowing. We anticipate that this borrowing will be provided to us and that we will be required to borrow the full $10 billion that is available, for the reasons noted herein.
However, even with this additional $10B, the Postal Service will continue to face a liquidity crisis in the near-term. Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current projections, we will run out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections, directly due to the COVID-19 pandemic.

The Postal Service will continue to take aggressive action to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. However, due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act, our ability to significantly reduce expenses in the short-run is limited. For instance, any savings associated with reduced workhours are diminished because the new leave provisions of the Families First Coronavirus Relief Act have added additional costs to the Postal Service that are estimated to be approximately $600M-$900M, depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying the pandemic, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.

**Legislative Relief Sought from Congress**

There is an immediate need for Congress to give the Postal Service relief to address the direct impacts that the COVID-19 pandemic has had and will have on our financial condition, so that we can ensure our continued ability to operate in the near term. To address the impacts of the pandemic, we seek the following four items from Congress:

- $25B in funds to cover the estimated COVID-19 losses over the next two years;

- $25B in funds for modernization, to address the long-term undercapitalization of the Postal Service that has been exacerbated by the pandemic, which will help the Postal Service weather the longer term economic impacts to our business resulting from the pandemic and ensure that our critical infrastructure will be ready to support the Nation for current and future needs;

- Satisfaction of our $14.4B in outstanding debt to the Federal Financing Bank

- Unrestricted borrowing authority up to $25B, by consolidating our existing borrowing authority of $15B under Title 39 of the United States Code, and $10B under the CARES Act, based on streamlined procedures, and by eliminating the $3B annual borrowing limitation.
As noted above, we estimate that the impact of COVID-19 will increase our net losses over the next 18 months by approximately $23B. Our request for $25B is intended to cover these losses, with a small cushion to account for contingencies, and hence to ensure our continued ability to operate in the near term. In this regard, our projections are not the worst case that could happen: in fact, we are not sure where the bottom is in terms of volume declines. As a result, it is important to build in some cushion to help ensure we remain liquid.

The longer-term impact of COVID-19 is estimated at almost $55B. In particular, the severe impact that the pandemic will have on our cash flows over the longer-term, due to the permanent shift in volumes, will exacerbate the fact that we are severely undercapitalized, by requiring us to further defer critically important capital investments. Modernizing our operations and infrastructure, such as through the purchase of new delivery vehicles, automated mail processing equipment, and other capital investments, is essential to our ability to continue providing our vital services to the American people in a prompt, reliable, and efficient manner. We therefore are requesting $25B to address the impact that the pandemic will have on our ability to modernize our critical operations infrastructure. This will not only have a direct benefit to the American people in terms of ensuring our ability to provide our services, but will also act as a stimulus to the economy as our Nation recovers from the pandemic, as these funds will be used to purchase goods from suppliers in the private sector.

Finally, eliminating our current debt and creating a streamlined borrowing process moving forward will give the Postal Service immediate financial relief, as well as critical flexibility to ensure our continued ability to operate in the short-term. We propose that future borrowings from Treasury or the Federal Financing Bank occur through the framework of the note purchase agreement through which we borrowed funds from Federal Financing Bank for the past two decades. The note purchase agreement provided a streamlined mechanism for such borrowings, and gives the Postal Service needed certainty as to its ability to readily access cash. In addition, the agreement sets forth reasonable and appropriate terms and conditions that protects the interests of both the Postal Service and Treasury.

While this immediate action by Congress is critical to ensuring that we can withstand the direct impacts of the pandemic in the near term, it is important to note that it will not resolve the fundamental problems with the Postal Service’s business model, or restore the Postal Service to longer-term financial stability. In fact, this short-term relief will only allow us to maintain operations until 2023, if provided in full.

The Postal Service operates under a statutory and regulatory structure that does not give us sufficient flexibility to reduce costs and increase revenue to meet the challenges of the secular decline in the use of the mail. The Board also believes that it is important that Congress eventually act to address these business model issues, to ensure that the Postal Service can be financially stable over the next 10 years, though to be clear this is not something we are seeking immediately. That said, within the next 12-18 months, the Board also recommends that Congress will need to enact financial reforms that give us greater pricing and product flexibility, as well as the ability to address our retiree health benefits program, which is not properly integrated with Medicare, and our unaffordable pension payment obligations. Absent such reforms, which we believe have broad support among postal stakeholders, it would be necessary for the Board to adopt more significant and controversial structural reforms to ensure our ability to survive over the next 10 years.

**Conclusion**

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of
our strengths as an organization is our stabilizing role in a crisis: the American people take confidence from our regular, daily role in their community and in their lives. The Postal Service remains committed to providing our critical services to the American, both today and for the years to come. The legislative recommendations discussed herein are presented with this goal in mind, and are fully endorsed by the bipartisan Board of Governors in a unanimous fashion.

Please let us know if you have any questions regarding this White Paper. The Board of Governors and the entire Postal Service look forward to continuing to work with you and the Administration to protect and strengthen the Postal Service.
This White Paper is drafted to share with you the actions the United States Postal Service is taking to meet the needs of the American public and to protect our employees and customers as our nation responds to the Coronavirus Disease 2019 (COVID-19) pandemic, and to also inform you of the serious impacts that the pandemic is having on the Postal Service's financial condition. The pandemic has resulted in a near-term liquidity crisis that requires immediate action by Congress to ensure the Postal Service’s continued ability to provide our critical services. Our bipartisan Board of Governors has unanimously approved a set of recommendations for short-term financial relief to counteract the direct impacts of the pandemic on the Postal Service, which this White Paper explains in detail.

Postal Service Response to the Pandemic

The Board and Postal Service management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as Americans shelter in place, work from home, or otherwise practice social distancing. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people. In addition, the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy, and the postal sector is also designated by the Department of Homeland Security as part of the nation's critical infrastructure. Six days per week, and in some instances seven, the men and women of the Postal Service accept, process, transport, and deliver important mail and vital packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online.

The Board has also been holding meetings and briefings at regular intervals to receive the latest information and provide strategic direction to management on responding to the pandemic. We have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services, both today and in the future. As we provide our vital service, we have been adjusting our policies and operating procedures in a manner consistent with the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials.

In this regard, the specific measures we have implemented in response to the COVID-19 outbreak include the following:

Keeping our employees safe. The essential services we provide are only possible due to the collective and individual efforts of the dedicated public servants who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, the COVID-19 Command Response team at Headquarters is working closely with HHS, CDC, and other public health officials to receive their latest guidance on
appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include the following:

- Updated our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements. We have been actively encouraging any employee who feels sick to stay home. To facilitate their ability to do so, we entered into MOUs even in advance of the Families First Coronavirus Response Act with our unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19. We expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country. While we have taken these steps on our own initiative, we have also ensured that employees will also receive the emergency leave authorized by the Families First Coronavirus Response Act, in addition to what they otherwise have accrued.

- Worked to overcome the challenges in the supply chain to ensure that our employees have ready access to hand sanitizer, and that they receive surgical masks and gloves upon request. This has been a matter of the highest priority for the Postal Service throughout the pandemic. We have shipped over 18 million masks throughout the country to ensure that they are available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- Reinforced workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing, and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and "cough/sneeze" barriers. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries. We are strongly encouraging the use of facial coverings in those environments where social distancing is difficult to maintain, and will continue to evaluate our policies in that regard in light of the evolving circumstances.

- Updated our cleaning policies to ensure that all cleaning in our facilities occurs in a manner consistent with CDC guidance relating to this pandemic.

- Expanded the use of telework for those employees who are able to perform their jobs remotely.

- Issued and continue to issue a daily cadence of communications to employees to ensure they have the latest information and guidance.

Keeping our customers safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to
continue to provide service effectively and safely. As noted above, we are reinforcing workplace behaviors to ensure that contact between our employees and customers reflect the best guidance regarding healthy interactions, social distancing, and risk minimization. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and employing floor tape to ensure that customers waiting in line can maintain the appropriate distance from one another, and from the retail counter.

Network integrity/continuity of operations. The Postal Service is undertaking all reasonable measures to minimize impacts to our customers. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified, and are coordinating organization-wide efforts to respond to evolving conditions, and to anticipate and prepare for customer and community needs throughout the country. We are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect significant lasting disruption or degradation in the services we provide in the domestic market, though we do anticipate that adjusting local operations in certain areas may be necessary to account for absent employees and other local contingencies, and that such adjustments will likely have temporary service impacts. If, for some reason, we need to curtail or adjust operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of hurricanes, flooding, wildfires and other disruptive events. In addition, given the impact of the pandemic on the availability of transportation, we have also been required to temporarily adjust our service standards for certain of our package products, and we have had to curtail operations to some foreign destinations where transportation is unavailable.

All-government emergency response. The Postal Service is playing an integral role in national emergency response and preparedness. The Postal Service is participating in the National Response Coordination Center (NRCC) headed by the Federal Emergency Management Agency (FEMA), and will continue to assist FEMA and other agencies in the whole-of-government response to the pandemic. The Postal Service has unique capabilities in this regard, because of our role as the most frequent touchpoint between the American people and the federal government through our nationwide retail and delivery network. For instance, we have leveraged our network to communicate CDC guidance to the public, both by displaying CDC posters in our retail facilities, by providing key information through our digital message boards in our large Post Offices, and by working with the Administration to help design and deliver a postcard from the President to every American household that relayed the key CDC guidance and that informed the recipients about the CDC’s COVID-19 specific website.

Further, we have also donated and delivered 500,000 N-95 masks (which are different from the masks that our employees utilize) that were in excess of our needs to the Department of Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses. Additionally, we are prepared to assist as necessary with the distribution of other personal protective equipment as a part of the Administration’s pandemic response. Finally, we will be delivering information concerning the stimulus checks that were provided as a part of the CARES Act, and we will also be delivering the physical checks to those who will not be receiving them through direct deposit.

Impact of the Pandemic on the Postal Service’s Financial Condition

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our essential universal service mission, the COVID-19 pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.
Our projections of the impact of the COVID-19 pandemic are grounded in three knowns and a significant number of unknowns. The three knowns include what is currently happening with mail volumes, the impact of the last recession (i.e., the Great Recession) on the Postal Service’s volume after GDP growth resumed, and what mailers are communicating to the Postal Service regarding their short-term plans.

The first known is what is currently happening with mail volumes. We are seeing a significant decline across mail products, with growth in packages. All percentages describe the change in mail volume from the same period last year. During the first week of the COVID-impact (March 16-March 21), the Postal Service saw total delivered mail volume (consisting of letters and flats) decline by 5.3%, and these declines have accelerated significantly since then, as follows:

- The week of March 22nd total delivered mail volume declined by 7.5%
- The week of March 29th total delivered mail volume declined by 24.2%
- The week of April 5th total delivered mail volume declined by 32.2%.

Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (March 16-March 21), the Postal Service saw delivered package volume decline by 1.0%, but since then packages have grown significantly, as follows:

- The week of March 22nd total delivered package volume grew by 5.0%
- The week of March 29th total delivered package volume increased by 11.8%
- The week of April 5th total delivered package volume increased by 20.7%.

However, package growth cannot fully counteract the impact of the mail volume declines we are experiencing. In addition, although package growth has accelerated, our current projection is that this trend will not continue and we will likely have declines in packages in the upcoming months. The reasons for this belief are as follows:

- First, some of our customers are already expressing concerns about what they are reading concerning our financial condition and stability, and are pursuing alternatives to move and deliver their products.
- Second, the significant decline in GDP and the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
- Third, package growth will also be likely be impacted by supply chain disruptions across the system, as shortages due to production and transportation disruptions, not only in the U.S, but throughout the world, ripple through the economy, thus reducing package volume.
- Finally, much of the package growth seen in recent weeks was fueled by consumers stocking up on basic needed household items and stockpiling food. Much of this spending was funneled through e-commerce because consumers did not want to physically shop in stores. As consumers reach higher inventory levels of household staples, repeat purchasing will decline. Additionally, as society begins to open up, many (but not all) consumers will return to shopping in stores.
The known impacts experienced by the Postal Service during and after the last recession in 2008-2009 also influence our analysis. During the Great Recession, the Postal Service lost significant mail volume that never returned; total volumes experienced a steep downward step between 2007 and 2009 and thereafter returned to a more gradual decline that has continued ever since. Prior to the recession, the Postal Service had total mail volume of 212B pieces in FY2007. After the recession, the Postal Service had 168B pieces within the system in FY2011, a decline of 20.7% of total mail volume. Mail volume declined by 43.9B pieces and $9.2B in total revenue were lost during this period, with $6.8 billion of revenue lost in 2009 alone.

The final known factor is what mailers are telling us about their short-term plans. For the most part, major mailers are expecting a slow-down in mailing due to the economic impact across the economy. Advertisers have reduced spending, which is having a significant effect on marketing mail, with marketing mail volume down 42.5% in the most recent week.

There are three significant components to the COVID-19 impact that are unknown and make the effects of the pandemic on mail volumes extremely difficult to quantify:

- **Depth** of the short-term impact during Calendar Q2 and Q3. Specifically, how bad will economic conditions get?
- **Duration** of the economic impact. This is directly tied to how long the economy remains shuttered and will have a significant influence on FY2021 volumes and revenues.
- **Volume levels** to which mail returns after the pandemic is concluded. This will influence our financial outlook in future years. It is possible that many companies never return to business and that some portion of our volume will be permanently lost to digital alternatives. (As noted previously, after the Great Recession, a large portion of mail volume never returned and we suffered a permanent decline from FY2007 levels of over 20%).

Each of these components will ultimately be influenced by the degree to which GDP declines in the coming months, the increase in the unemployment rate and the persistence of higher unemployment levels, declines in business and consumer confidence and investment spending (which often significantly lag the beginning of an “official” recovery), and the timing of the reopening of segments of the economy. None of these elements are known or can be predicted with any real degree of certainty at this time. The estimates for GDP decline are diverse, with a recent survey of economists by the Wall Street Journal reporting a median decline in GDP of 26.5% in Postal Quarter 3 (April – June, 2020). In addition, the same survey of economists suggests a median projection for the unemployment rate by June 2020 of 13%. To put that GDP loss in perspective, the Great Recession caused a 3.3% decline in GDP in FY2009: the median decline in GDP projected for this quarter (April – September 2020) is 7 times worse than the worst quarter GDP experienced in the last recession.

These GDP and unemployment projections, when considered in light of the Postal Service’s financial results during the Great Recession, and the most recent volume decline information, have led us to the following initial estimates for the next 18 months, and for the longer-term:

- **Short-term impact - Postal Q3 & Q4 (April – September)**
  - We expect a significant short-term impact for the remainder of FY2020 due to the economic impact of COVID-19 which will cause projected declines of approximately 50% in volumes in Q3 and 57% in Q4, based on the speed at

---

1 WSJ Survey of Economists - https://www.wsj.com/graphics/econsurvey/
which volume has already declined, the GDP and unemployment projections estimated by economists and information communicated by mailers.

- **Medium-term impact - Fiscal Year 2021 (October 2020 – September 2021)**
  - As time moves forward and the economic lock-down begins to lessen, we project a gradual return of volumes beginning in Q1, FY 2021, to about 60% of the corresponding pre-COVID levels in Q1.
  - For the rest of FY 2021, we estimate that volumes will gradually return to about 74% of pre-COVID volume levels. As noted, current projections by economists suggest the economic impact of the pandemic will be worse than the Great Recession (when we permanently lost over 20% of volumes).
  - For the entirety of FY 2021, we estimate that total volume will be approximately 70% of pre-COVID volume levels.

- **Long-term impact - Fiscal Year 2022 and beyond**
  - The longer-term projection suggests a return to a “new normal” of about 75% of pre-COVID volume levels, which is slightly worse than the last recession when we returned to a new normal of approximately 80% of pre-recession volumes. We then expect the long-term gradual secular volume declines that we were experiencing prior to the pandemic will resume for the next 10 years.

All of these volume assumptions are dependent on many facets of the COVID-19 disruption that are as yet unknown. For example, the longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return could be less than currently projected. Likewise, if the economic lock-down retreats in the coming weeks and businesses return to normal quickly, it is possible that the volume levels could be greater than these projections. Ultimately, given the significant uncertainty concerning these matters, our projections, while severe, should not be considered a worst case, because it is conceivable that the impact of COVID-19 on mail volumes could be even more dire than we are anticipating.

Based on these projections, it is expected that the Postal Service’s financial condition will worsen significantly compared to previous estimates. Our current projections, which are based upon the assumptions set forth herein, indicate that the Postal Service will be essentially illiquid in **September 2020** if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than one payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers’ compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term note that was available to us under our existing statutory borrowing authority. A portion of this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

We are in discussions with the Treasury regarding the borrowing authority in the CARES Act, including the terms and conditions that would apply to such borrowing. We anticipate that this borrowing will be provided to us and that we will be required to borrow the full $10 billion that is available, for the reasons noted herein.
However, even with this additional $10B, the Postal Service will continue to face a liquidity crisis in the near-term. Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current projections, we will run out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections, directly due to the COVID-19 pandemic.

The Postal Service will continue to take aggressive action to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. However, due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act, our ability to significantly reduce expenses in the short-run is limited. For instance, any savings associated with reduced workhours are diminished because the new leave provisions of the Families First Coronavirus Relief Act have added additional costs to the Postal Service that are estimated to be approximately $600M-$900M, depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying the pandemic, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.

Legislative Relief Sought from Congress

There is an immediate need for Congress to give the Postal Service relief to address the direct impacts that the COVID-19 pandemic has had and will have on our financial condition, so that we can ensure our continued ability to operate in the near term. To address the impacts of the pandemic, we seek the following four items from Congress:

- $25B in funds to cover the estimated COVID-19 losses over the next two years;

- $25B in funds for modernization, to address the long-term undercapitalization of the Postal Service that has been exacerbated by the pandemic, which will help the Postal Service weather the longer term economic impacts to our business resulting from the pandemic and ensure that our critical infrastructure will be ready to support the Nation for current and future needs;

- Satisfaction of our $14.4B in outstanding debt to the Federal Financing Bank

- Unrestricted borrowing authority up to $25B, by consolidating our existing borrowing authority of $15B under Title 39 of the United States Code, and $10B under the CARES Act, based on streamlined procedures, and by eliminating the $3B annual borrowing limitation.
As noted above, we estimate that the impact of COVID-19 will increase our net losses over the next 18 months by approximately $23B. Our request for $25B is intended to cover these losses, with a small cushion to account for contingencies, and hence to ensure our continued ability to operate in the near term. In this regard, our projections are not the worst case that could happen: in fact, we are not sure where the bottom is in terms of volume declines. As a result, it is important to build in some cushion to help ensure we remain liquid.

The longer-term impact of COVID-19 is estimated at almost $55B. In particular, the severe impact that the pandemic will have on our cash flows over the longer-term, due to the permanent shift in volumes, will exacerbate the fact that we are severely undercapitalized, by requiring us to further defer critically important capital investments. Modernizing our operations and infrastructure, such as through the purchase of new delivery vehicles, automated mail processing equipment, and other capital investments, is essential to our ability to continue providing our vital services to the American people in a prompt, reliable, and efficient manner. We therefore are requesting $25B to address the impact that the pandemic will have on our ability to modernize our critical operations infrastructure. This will not only have a direct benefit to the American people in terms of ensuring our ability to provide our services, but will also act as a stimulus to the economy as our Nation recovers from the pandemic, as these funds will be used to purchase goods from suppliers in the private sector.

Finally, eliminating our current debt and creating a streamlined borrowing process moving forward will give the Postal Service immediate financial relief, as well as critical flexibility to ensure our continued ability to operate in the short-term. We propose that future borrowings from Treasury or the Federal Financing Bank occur through the framework of the note purchase agreement through which we borrowed funds from Federal Financing Bank for the past two decades. The note purchase agreement provided a streamlined mechanism for such borrowings, and gives the Postal Service needed certainty as to its ability to readily access cash. In addition, the agreement sets forth reasonable and appropriate terms and conditions that protects the interests of both the Postal Service and Treasury.

While this immediate action by Congress is critical to ensuring that we can withstand the direct impacts of the pandemic in the near term, it is important to note that it will not resolve the fundamental problems with the Postal Service’s business model, or restore the Postal Service to longer-term financial stability. In fact, this short-term relief will only allow us to maintain operations until 2023, if provided in full.

The Postal Service operates under a statutory and regulatory structure that does not give us sufficient flexibility to reduce costs and increase revenue to meet the challenges of the secular decline in the use of the mail. The Board also believes that it is important that Congress eventually act to address these business model issues, to ensure that the Postal Service can be financially stable over the next 10 years, though to be clear this is not something we are seeking immediately. That said, within the next 12-18 months, the Board also recommends that Congress will need to enact financial reforms that give us greater pricing and product flexibility, as well as the ability to address our retiree health benefits program, which is not properly integrated with Medicare, and our unaffordable pension payment obligations. Absent such reforms, which we believe have broad support among postal stakeholders, it would be necessary for the Board to adopt more significant and controversial structural reforms to ensure our ability to survive over the next 10 years.

Conclusion

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of
our strengths as an organization is our stabilizing role in a crisis: the American people take confidence from our regular, daily role in their community and in their lives. The Postal Service remains committed to providing our critical services to the American, both today and for the years to come. The legislative recommendations discussed herein are presented with this goal in mind, and are fully endorsed by the bipartisan Board of Governors in a unanimous fashion.

Please let us know if you have any questions regarding this White Paper. The Board of Governors and the entire Postal Service look forward to continuing to work with you and the Administration to protect and strengthen the Postal Service.
DRAFT – WHITE PAPER for Leadership re COVID-19 v10:

FINANCIAL IMPACTS ON THE POSTAL SERVICE AS A RESULT OF THE PANDEMIC, AND CORRESPONDING REQUEST FOR RELIEF

This White Paper is drafted to share with you the actions the United States Postal Service is taking to meet the needs of the American public and to protect our employees and customers as our nation responds to the Coronavirus Disease 2019 (COVID-19) pandemic, and to also inform you of the serious impacts that the pandemic is having on the Postal Service’s financial condition. The pandemic has resulted in a near-term liquidity crisis that requires immediate action by Congress to ensure the Postal Service’s continued ability to provide our critical services. Our bipartisan Board of Governors has unanimously approved a set of recommendations for short-term financial relief to counteract the direct impacts of the pandemic on the Postal Service, which this White Paper explains in detail.

Postal Service Response to the Pandemic

The Board and Postal Service management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as Americans shelter in place, work from home, or otherwise practice social distancing. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people. In addition, the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy, and the postal sector is also designated by the Department of Homeland Security as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the men and women of the Postal Service accept, process, transport, and deliver important mail and vital packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online.

The Board has also been holding meetings and briefings at regular intervals to receive the latest information and provide strategic direction to management on responding to the pandemic. We have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services, both today and in the future. As we provide our vital service, we have been adjusting our policies and operating procedures in a manner consistent with the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials.

In this regard, the specific measures we have implemented in response to the COVID-19 outbreak include the following:

Keeping our employees safe. The essential services we provide are only possible due to the collective and individual efforts of the dedicated public servants who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, the COVID-19 Command Response team at Headquarters is working closely with HHS, CDC, and other public health officials to receive their latest guidance on
appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include the following:

- **Updated our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements.** We have been actively encouraging any employee who feels sick to stay home. To facilitate their ability to do so, we entered into MOUs even in advance of the Families First Coronavirus Response Act with our unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19. We expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country. While we have taken these steps on our own initiative, we have also ensured that employees will also receive the emergency leave authorized by the Families First Coronavirus Response Act, in addition to what they otherwise have accrued.

- **Worked to overcome the challenges in the supply chain to ensure that our employees have ready access to hand sanitizer, and that they receive surgical masks and gloves upon request.** This has been a matter of the highest priority for the Postal Service throughout the pandemic. We have shipped over 18 million masks throughout the country to ensure that they are available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- **Reinforced workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing, and risk minimization.** We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and “cough/sneeze” barriers. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries. We are strongly encouraging the use of facial coverings in those environments where social distancing is difficult to maintain, and will continue to evaluate our policies in that regard in light of the evolving circumstances.

- **Updated our cleaning policies to ensure that all cleaning in our facilities occurs in a manner consistent with CDC guidance relating to this pandemic.**

- **Expanded the use of telework for those employees who are able to perform their jobs remotely.**

- **Issued and continue to issue a daily cadence of communications to employees to ensure they have the latest information and guidance.**

**Keeping our customers safe.** The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to
continue to provide service effectively and safely. As noted above, we are reinforcing workplace behaviors to ensure that contact between our employees and customers reflect the best guidance regarding healthy interactions, social distancing, and risk minimization. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and employing floor tape to ensure that customers waiting in line can maintain the appropriate distance from one another, and from the retail counter.

**Network integrity/continuity of operations.** The Postal Service is undertaking all reasonable measures to minimize impacts to our customers. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified, and are coordinating organization-wide efforts to respond to evolving conditions, and to anticipate and prepare for customer and community needs throughout the country. We are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect significant lasting disruption or degradation in the services we provide in the domestic market, though we do anticipate that adjusting local operations in certain areas may be necessary to account for absent employees and other local contingencies, and that such adjustments will likely have temporary service impacts. If, for some reason, we need to curtail or adjust operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of hurricanes, flooding, wildfires and other disruptive events. In addition, given the impact of the pandemic on the availability of transportation, we have also been required to temporarily adjust our service standards for certain of our package products, and we have had to curtail operations to some foreign destinations where transportation is unavailable.

**All-government emergency response.** The Postal Service is playing an integral role in national emergency response and preparedness. The Postal Service is participating in the National Response Coordination Center (NRCC) headed by the Federal Emergency Management Agency (FEMA), and will continue to assist FEMA and other agencies in the whole-of-government response to the pandemic. The Postal Service has unique capabilities in this regard, because of our role as the most frequent touchpoint between the American people and the federal government through our nationwide retail and delivery network. For instance, we have leveraged our network to communicate CDC guidance to the public, both by displaying CDC posters in our retail facilities, by providing key information through our digital message boards in our large Post Offices, and by working with the Administration to help design and deliver a postcard from the President to every American household that relayed the key CDC guidance and that informed the recipients about the CDC’s COVID-19 specific website.

Further, we have also donated and delivered 500,000 N-95 masks (which are different from the masks that our employees utilize) that were in excess of our needs to the Department of Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses. Additionally, we are prepared to assist as necessary with the distribution of other personal protective equipment as a part of the Administration's pandemic response. Finally, we will be delivering information concerning the stimulus checks that were provided as a part of the CARES Act, and we will also be delivering the physical checks to those who will not be receiving them through direct deposit.

**Impact of the Pandemic on the Postal Service’s Financial Condition**

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our essential universal service mission, the COVID-19 pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.
Our projections of the impact of the COVID-19 pandemic are grounded in three knowns and a significant number of unknowns. The three knowns include what is currently happening with mail volumes, the impact of the last recession (i.e., the Great Recession) on the Postal Service’s volume after GDP growth resumed, and what mailers are communicating to the Postal Service regarding their short-term plans.

The first known is what is currently happening with mail volumes. We are seeing a significant decline across mail products, with growth in packages. All percentages describe the change in mail volume from the same period last year. During the first week of the COVID-impact (March 16-March 21), the Postal Service saw total delivered mail volume (consisting of letters and flats) decline by 5.3%, and these declines have accelerated significantly since then, as follows:

- The week of March 22nd total delivered mail volume declined by 7.5%
- The week of March 29th total delivered mail volume declined by 24.2%
- The week of April 5th total delivered mail volume declined by 32.2%.

Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (March 16-March 21), the Postal Service saw delivered package volume decline by 1.0%, but since then packages have grown significantly, as follows:

- The week of March 22nd total delivered package volume grew by 5.0%
- The week of March 29th total delivered package volume increased by 11.8%
- The week of April 5th total delivered package volume increased by 20.7%.

However, package growth cannot fully counteract the impact of the mail volume declines we are experiencing. In addition, although package growth has accelerated, our current projection is that this trend will not continue and we will likely have declines in packages in the upcoming months. The reasons for this belief are as follows:

- First, some of our customers are already expressing concerns about what they are reading concerning our financial condition and stability, and are pursuing alternatives to move and deliver their products.
- Second, the significant decline in GDP and the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
- Third, package growth will also be likely be impacted by supply chain disruptions across the system, as shortages due to production and transportation disruptions, not only in the U.S, but throughout the world, ripple through the economy, thus reducing package volume.
- Finally, much of the package growth seen in recent weeks was fueled by consumers stocking up on basic needed household items and stockpiling food. Much of this spending was funneled through e-commerce because consumers did not want to physically shop in stores. As consumers reach higher inventory levels of household staples, repeat purchasing will decline. Additionally, as society begins to open up, many (but not all) consumers will return to shopping in stores.
The known impacts experienced by the Postal Service during and after the last recession in 2008-2009 also influence our analysis. During the Great Recession, the Postal Service lost significant mail volume that never returned; total volumes experienced a steep downward step between 2007 and 2009 and thereafter returned to a more gradual decline that has continued ever since. Prior to the recession, the Postal Service had total mail volume of 212B pieces in FY2007. After the recession, the Postal Service had 168B pieces within the system in FY2011, a decline of 20.7% of total mail volume. Mail volume declined by 43.9B pieces and $9.2B in total revenue were lost during this period, with $6.8 billion of revenue lost in 2009 alone.

The final known factor is what mailers are telling us about their short-term plans. For the most part, major mailers are expecting a slow-down in mailing due to the economic impact across the economy. Advertisers have reduced spending, which is having a significant effect on marketing mail, with marketing mail volume down 42.5% in the most recent week.

There are three significant components to the COVID-19 impact that are unknown and make the effects of the pandemic on mail volumes extremely difficult to quantify:

- **Depth** of the short-term impact during Calendar Q2 and Q3. Specifically, how bad will economic conditions get?
- **Duration** of the economic impact. This is directly tied to how long the economy remains shuttered and will have a significant influence on FY2021 volumes and revenues.
- **Volume levels** to which mail returns after the pandemic is concluded. This will influence our financial outlook in future years. It is possible that many companies never return to business and that some portion of our volume will be permanently lost to digital alternatives. (As noted previously, after the Great Recession, a large portion of mail volume never returned and we suffered a permanent decline from FY2007 levels of over 20%).

Each of these components will ultimately be influenced by the degree to which GDP declines in the coming months, the increase in the unemployment rate and the persistence of higher unemployment levels, declines in business and consumer confidence and investment spending (which often significantly lag the beginning of an “official” recovery), and the timing of the reopening of segments of the economy. None of these elements are known or can be predicted with any real degree of certainty at this time. The estimates for GDP decline are diverse, with a recent survey of economists by the Wall Street Journal reporting a median decline in GDP of 26.5% in Postal Quarter 3 (April – June, 2020). In addition, the same survey of economists suggests a median projection for the unemployment rate by June 2020 of 13%. To put that GDP loss in perspective, the Great Recession caused a 3.3% decline in GDP in FY2009; the median decline in GDP projected for this quarter (April – September 2020) is 7 times worse than the worst quarter GDP experienced in the last recession.

These GDP and unemployment projections, when considered in light of the Postal Service’s financial results during the Great Recession, and the most recent volume decline information, have led us to the following initial estimates for the next 18 months, and for the longer-term:

- **Short-term impact - Postal Q3 & Q4 (April – September)**
  - We expect a significant short-term impact for the remainder of FY2020 due to the economic impact of COVID-19 which will cause projected declines of approximately 50% in volumes in Q3 and 57% in Q4, based on the speed at

1 WSJ Survey of Economists - https://www.wsj.com/graphics/econsurvey/
which volume has already declined, the GDP and unemployment projections estimated by economists and information communicated by mailers.

- **Medium-term impact - Fiscal Year 2021 (October 2020 – September 2021)**
  - As time moves forward and the economic lock-down begins to lessen, we project a gradual return of volumes beginning in Q1, FY 2021, to about 60% of the corresponding pre-COVID levels in Q1.
  - For the rest of FY 2021, we estimate that volumes will gradually return to about 74% of pre-COVID volume levels. As noted, current projections by economists suggest the economic impact of the pandemic will be worse than the Great Recession (when we permanently lost over 20% of volumes.
  - For the entirety of FY 2021, we estimate that total volume will be approximately 70% of pre-COVID volume levels.

- **Long-term impact - Fiscal Year 2022 and beyond**
  - The longer-term projection suggests a return to a “new normal” of about 75% of pre-COVID volume levels, which is slightly worse than the last recession when we returned to a new normal of approximately 80% of pre-recession volumes. We then expect the long-term gradual secular volume declines that we were experiencing prior to the pandemic will resume for the next 10 years.

All of these volume assumptions are dependent on many facets of the COVID-19 disruption that are as yet unknown. For example, the longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return could be less than currently projected. Likewise, if the economic lock-down retreats in the coming weeks and businesses return to normal quickly, it is possible that the volume levels could be greater than these projections. Ultimately, given the significant uncertainty concerning these matters, our projections, while severe, should not be considered a worst case, because it is conceivable that the impact of COVID-19 on mail volumes could be even more dire than we are anticipating.

Based on these projections, it is expected that the Postal Service’s financial condition will worsen significantly compared to previous estimates. Our current projections, which are based upon the assumptions set forth herein, indicate that the Postal Service will be essentially illiquid in **September 2020** if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than one payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers’ compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term note that was available to us under our existing statutory borrowing authority. A portion of this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

We are in discussions with the Treasury regarding the borrowing authority in the CARES Act, including the terms and conditions that would apply to such borrowing. We anticipate that this borrowing will be provided to us and that we will be required to borrow the full $10 billion that is available, for the reasons noted herein.
However, even with this additional $10B, the Postal Service will continue to face a liquidity crisis in the near-term. Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current projections, we will run out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections, directly due to the COVID-19 pandemic.

The Postal Service will continue to take aggressive action to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. However, due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act, our ability to significantly reduce expenses in the short-run is limited. For instance, any savings associated with reduced workhours are diminished because the new leave provisions of the Families First Coronavirus Relief Act have added additional costs to the Postal Service that are estimated to be approximately $600M-$900M, depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying the pandemic, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.

**Legislative Relief Sought from Congress**

There is an immediate need for Congress to give the Postal Service relief to address the direct impacts that the COVID-19 pandemic has had and will have on our financial condition, so that we can ensure our continued ability to operate in the near term. To address the impacts of the pandemic, we seek the following four items from Congress:

- **$25B in funds to cover the estimated COVID-19 losses over the next two years;**

- **$25B in funds for modernization, to address the long-term undercapitalization of the Postal Service that has been exacerbated by the pandemic, which will help the Postal Service weather the longer term economic impacts to our business resulting from the pandemic and ensure that our critical infrastructure will be ready to support the Nation for current and future needs;**

- **Satisfaction of our $14.4B in outstanding debt to the Federal Financing Bank**

- **Unrestricted borrowing authority up to $25B, by consolidating our existing borrowing authority of $15B under Title 39 of the United States Code, and $10B under the CARES Act, based on streamlined procedures, and by eliminating the $3B annual borrowing limitation.**
As noted above, we estimate that the impact of COVID-19 will increase our net losses over the next 18 months by approximately $23B. Our request for $25B is intended to cover these losses, with a small cushion to account for contingencies, and hence to ensure our continued ability to operate in the near term. In this regard, our projections are not the worst case that could happen: in fact, we are not sure where the bottom is in terms of volume declines. As a result, it is important to build in some cushion to help ensure we remain liquid.

The longer-term impact of COVID-19 is estimated at almost $55B. In particular, the severe impact that the pandemic will have on our cash flows over the longer-term, due to the permanent shift in volumes, will exacerbate the fact that we are severely undercapitalized, by requiring us to further defer critically important capital investments. Modernizing our operations and infrastructure, such as through the purchase of new delivery vehicles, automated mail processing equipment, and other capital investments, is essential to our ability to continue providing our vital services to the American people in a prompt, reliable, and efficient manner. We therefore are requesting $25B to address the impact that the pandemic will have on our ability to modernize our critical operations infrastructure. This will not only have a direct benefit to the American people in terms of ensuring our ability to provide our services, but will also act as a stimulus to the economy as our Nation recovers from the pandemic, as these funds will be used to purchase goods from suppliers in the private sector.

Finally, eliminating our current debt and creating a streamlined borrowing process moving forward will give the Postal Service immediate financial relief, as well as critical flexibility to ensure our continued ability to operate in the short-term. We propose that future borrowings from Treasury or the Federal Financing Bank occur through the framework of the note purchase agreement through which we borrowed funds from Federal Financing Bank for the past two decades. The note purchase agreement provided a streamlined mechanism for such borrowings, and gives the Postal Service needed certainty as to its ability to readily access cash. In addition, the agreement sets forth reasonable and appropriate terms and conditions that protects the interests of both the Postal Service and Treasury.

While this immediate action by Congress is critical to ensuring that we can withstand the direct impacts of the pandemic in the near term, it is important to note that it will not resolve the fundamental problems with the Postal Service’s business model, or restore the Postal Service to longer-term financial stability. In fact, this short-term relief will only allow us to maintain operations until 2023, if provided in full.

The Postal Service operates under a statutory and regulatory structure that does not give us sufficient flexibility to reduce costs and increase revenue to meet the challenges of the secular decline in the use of the mail. The Board also believes that it is important that Congress eventually act to address these business model issues, to ensure that the Postal Service can be financially stable over the next 10 years, though to be clear this is not something we are seeking immediately. That said, within the next 12-18 months, the Board also recommends that Congress will need to enact financial reforms that give us greater pricing and product flexibility, as well as the ability to address our retiree health benefits program, which is not properly integrated with Medicare, and our unaffordable pension payment obligations. Absent such reforms, which we believe have broad support among postal stakeholders, it would be necessary for the Board to adopt more significant and controversial structural reforms to ensure our ability to survive over the next 10 years.

Conclusion

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of
our strengths as an organization is our stabilizing role in a crisis: the American people take confidence from our regular, daily role in their community and in their lives. The Postal Service remains committed to providing our critical services to the American, both today and for the years to come. The legislative recommendations discussed herein are presented with this goal in mind, and are fully endorsed by the bipartisan Board of Governors in a unanimous fashion.

Please let us know if you have any questions regarding this White Paper. The Board of Governors and the entire Postal Service look forward to continuing to work with you and the Administration to protect and strengthen the Postal Service.
This White Paper is drafted to share with you the actions the United States Postal Service is taking to meet the needs of the American public and to protect our employees and customers as our nation responds to the Coronavirus Disease 2019 (COVID-19) pandemic, and to also inform you of the serious impacts that the pandemic is having on the Postal Service's financial condition. The pandemic has resulted in a near-term liquidity crisis that requires immediate action by Congress to ensure the Postal Service’s continued ability to provide our critical services. Our bipartisan Board of Governors has unanimously approved a set of recommendations for short-term financial relief to counteract the direct impacts of the pandemic on the Postal Service, which this White Paper explains in detail.

Postal Service Response to the Pandemic

The Board and Postal Service management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as Americans shelter in place, work from home, or otherwise practice social distancing. We operate by statute as a "basic and fundamental service" provided by the Federal Government to the American people. In addition, the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy, and the postal sector is also designated by the Department of Homeland Security as part of the nation's critical infrastructure. Six days per week, and in some instances seven, the men and women of the Postal Service accept, process, transport, and deliver important mail and vital packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online.

The Board has also been holding meetings and briefings at regular intervals to receive the latest information and provide strategic direction to management on responding to the pandemic. We have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. We are fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our mailing and shipping services, both today and in the future. As we provide our vital service, we have been adjusting our policies and operating procedures in a manner consistent with the advice of the Department of Health and Human Services (HHS), the Centers for Disease Control (CDC), and other public health officials.

In this regard, the specific measures we have implemented in response to the COVID-19 outbreak include the following:

Keeping our employees safe. The essential services we provide are only possible due to the collective and individual efforts of the dedicated public servants who work for the Postal Service. We are doing everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To achieve this goal, the COVID-19 Command Response team at Headquarters is working closely with HHS, CDC, and other public health officials to receive their latest guidance on
appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include the following:

- Updated our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements. We have been actively encouraging any employee who feels sick to stay home. To facilitate their ability to do so, we entered into MOUs even in advance of the Families First Coronavirus Response Act with our unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19. We expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country. While we have taken these steps on our own initiative, we have also ensured that employees will also receive the emergency leave authorized by the Families First Coronavirus Response Act, in addition to what they otherwise have accrued.

- Worked to overcome the challenges in the supply chain to ensure that our employees have ready access to hand sanitizer, and that they receive surgical masks and gloves upon request. This has been a matter of the highest priority for the Postal Service throughout the pandemic. We have shipped over 18 million masks throughout the country to ensure that they are available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- Reinforced workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing, and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and “cough/sneeze” barriers. We have also changed our delivery procedures to ensure the appropriate social distancing between our letter carriers and customers, such as by eliminating the customer signature requirement for certain deliveries. We are strongly encouraging the use of facial coverings in those environments where social distancing is difficult to maintain, and will continue to evaluate our policies in that regard in light of the evolving circumstances.

- Updated our cleaning policies to ensure that all cleaning in our facilities occurs in a manner consistent with CDC guidance relating to this pandemic.

- Expanded the use of telework for those employees who are able to perform their jobs remotely.

- Issued and continue to issue a daily cadence of communications to employees to ensure they have the latest information and guidance.

Keeping our customers safe. The CDC, the World Health Organization, as well as the U.S. Surgeon General have all said that there is very low risk that this virus is being spread through mail, which should be a comfort to the public. We are also adapting procedures to ensure that we are able to
continue to provide service effectively and safely. As noted above, we are reinforcing workplace behaviors to ensure that contact between our employees and customers reflect the best guidance regarding healthy interactions, social distancing, and risk minimization. We are additionally taking steps to ensure that customers can safely come to our retail facilities, such as by limiting the number of individuals who can be in a lobby at any one time, and employing floor tape to ensure that customers waiting in line can maintain the appropriate distance from one another, and from the retail counter.

Network integrity/continuity of operations. The Postal Service is undertaking all reasonable measures to minimize impacts to our customers. Following our normal protocol, we began daily operational assessments and responses as the situation in China was first identified, and are coordinating organization-wide efforts to respond to evolving conditions, and to anticipate and prepare for customer and community needs throughout the country. We are highly confident in our ability to process and deliver the nation’s mail and packages throughout this emergency. We do not expect significant lasting disruption or degradation in the services we provide in the domestic market, though we do anticipate that adjusting local operations in certain areas may be necessary to account for absent employees and other local contingencies, and that such adjustments will likely have temporary service impacts. If, for some reason, we need to curtail or adjust operations in a particular facility or area, activation of localized continuity of operations plans will be implemented to provide required support – similar to planning we implement in the wake of hurricanes, flooding, wildfires and other disruptive events. In addition, given the impact of the pandemic on the availability of transportation, we have also been required to temporarily adjust our service standards for certain of our package products, and we have had to curtail operations to some foreign destinations where transportation is unavailable.

All-government emergency response. The Postal Service is playing an integral role in national emergency response and preparedness. The Postal Service is participating in the National Response Coordination Center (NRCC) headed by the Federal Emergency Management Agency (FEMA), and will continue to assist FEMA and other agencies in the whole-of-government response to the pandemic. The Postal Service has unique capabilities in this regard, because of our role as the most frequent touchpoint between the American people and the federal government through our nationwide retail and delivery network. For instance, we have leveraged our network to communicate CDC guidance to the public, both by displaying CDC posters in our retail facilities, by providing key information through our digital message boards in our large Post Offices, and by working with the Administration to help design and deliver a postcard from the President to every American household that relayed the key CDC guidance and that informed the recipients about the CDC’s COVID-19 specific website.

Further, we have also donated and delivered 500,000 N-95 masks (which are different from the masks that our employees utilize) that were in excess of our needs to the Department of Health and Human Services for the Strategic National Stockpile for distribution to hospitals and other critical uses. Additionally, we are prepared to assist as necessary with the distribution of other personal protective equipment as a part of the Administration’s pandemic response. Finally, we will be delivering information concerning the stimulus checks that were provided as a part of the CARES Act, and we will also be delivering the physical checks to those who will not be receiving them through direct deposit.

Impact of the Pandemic on the Postal Service’s Financial Condition

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our essential universal service mission, the COVID-19 pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.
Our projections of the impact of the COVID-19 pandemic are grounded in three knowns and a significant number of unknowns. The three knowns include what is currently happening with mail volumes, the impact of the last recession (i.e., the Great Recession) on the Postal Service’s volume after GDP growth resumed, and what mailers are communicating to the Postal Service regarding their short-term plans.

The first known is what is currently happening with mail volumes. We are seeing a significant decline across mail products, with growth in packages. All percentages describe the change in mail volume from the same period last year. During the first week of the COVID-impact (March 16-March 21), the Postal Service saw total delivered mail volume (consisting of letters and flats) decline by 5.3%, and these declines have accelerated significantly since then, as follows:

- The week of March 22nd total delivered mail volume declined by 7.5%
- The week of March 29th total delivered mail volume declined by 24.2%
- The week of April 5th total delivered mail volume declined by 32.2%.

Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (March 16-March 21), the Postal Service saw delivered package volume decline by 1.0%, but since then packages have grown significantly, as follows:

- The week of March 22nd total delivered package volume grew by 5.0%
- The week of March 29th total delivered package volume increased by 11.8%
- The week of April 5th total delivered package volume increased by 20.7%.

Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (March 16-March 21), the Postal Service saw delivered package volume decline by 1.0%, but since then packages have grown significantly, as follows:

- The week of March 22nd total delivered package volume grew by 5.0%
- The week of March 29th total delivered package volume increased by 11.8%
- The week of April 5th total delivered package volume increased by 20.7%.

However, package growth cannot fully counteract the impact of the mail volume declines we are experiencing. In addition, although package growth has accelerated, our current projection is that this trend will not continue and we will likely have declines in packages in the upcoming months. The reasons for this belief are as follows:

- First, some of our customers are already expressing concerns about what they are reading concerning our financial condition and stability, and are pursuing alternatives to move and deliver their products.
- Second, the significant decline in GDP and the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
- Third, package growth will also be likely be impacted by supply chain disruptions across the system, as shortages due to production and transportation disruptions, not only in the U.S, but throughout the world, ripple through the economy, thus reducing package volume.
- Finally, much of the package growth seen in recent weeks was fueled by consumers stocking up on basic needed household items and stockpiling food. Much of this spending was funneled through e-commerce because consumers did not want to physically shop in stores. As consumers reach higher inventory levels of household staples, repeat purchasing will decline. Additionally, as society begins to open up, many (but not all) consumers will return to shopping in stores.
The known impacts experienced by the Postal Service during and after the last recession in 2008-2009 also influence our analysis. During the Great Recession, the Postal Service lost significant mail volume that never returned; total volumes experienced a steep downward step between 2007 and 2009 and thereafter returned to a more gradual decline that has continued ever since. Prior to the recession, the Postal Service had total mail volume of 212B pieces in FY2007. After the recession, the Postal Service had 168B pieces within the system in FY2011, a decline of 20.7% of total mail volume. Mail volume declined by 43.9B pieces and $9.2B in total revenue were lost during this period, with $6.8 billion of revenue lost in 2009 alone.

The final known factor is what mailers are telling us about their short-term plans. For the most part, major mailers are expecting a slow-down in mailing due to the economic impact across the economy. Advertisers have reduced spending, which is having a significant effect on marketing mail, with marketing mail volume down 42.5% in the most recent week.

There are three significant components to the COVID-19 impact that are unknown and make the effects of the pandemic on mail volumes extremely difficult to quantify:

- **Depth** of the short-term impact during Calendar Q2 and Q3. Specifically, how bad will economic conditions get?
- **Duration** of the economic impact. This is directly tied to how long the economy remains shuttered and will have a significant influence on FY2021 volumes and revenues.
- **Volume levels** to which mail returns after the pandemic is concluded. This will influence our financial outlook in future years. It is possible that many companies never return to business and that some portion of our volume will be permanently lost to digital alternatives. (As noted previously, after the Great Recession, a large portion of mail volume never returned and we suffered a permanent decline from FY2007 levels of over 20%).

Each of these components will ultimately be influenced by the degree to which GDP declines in the coming months, the increase in the unemployment rate and the persistence of higher unemployment levels, declines in business and consumer confidence and investment spending (which often significantly lag the beginning of an “official” recovery), and the timing of the reopening of segments of the economy. None of these elements are known or can be predicted with any real degree of certainty at this time. The estimates for GDP decline are diverse, with a recent survey of economists by the Wall Street Journal reporting a median decline in GDP of 26.5% in Postal Quarter 3 (April – June, 2020). In addition, the same survey of economists suggests a median projection for the unemployment rate by June 2020 of 13%. To put that GDP loss in perspective, the Great Recession caused a 3.3% decline in GDP in FY2009; the median decline in GDP projected for this quarter (April – September 2020) is 7 times worse than the worst quarter GDP experienced in the last recession.

These GDP and unemployment projections, when considered in light of the Postal Service’s financial results during the Great Recession, and the most recent volume decline information, have led us to the following initial estimates for the next 18 months, and for the longer-term:

- **Short-term impact - Postal Q3 & Q4 (April – September)**
  o We expect a significant short-term impact for the remainder of FY2020 due to the economic impact of COVID-19 which will cause projected declines of approximately 50% in volumes in Q3 and 57% in Q4, based on the speed at

---

1 WSJ Survey of Economists - https://www.wsj.com/graphics/econsurvey/
which volume has already declined, the GDP and unemployment projections estimated by economists and information communicated by mailers.

- Medium-term impact - Fiscal Year 2021 (October 2020 – September 2021)
  - As time moves forward and the economic lock-down begins to lessen, we project a gradual return of volumes beginning in Q1, FY 2021, to about 60% of the corresponding pre-COVID levels in Q1.
  - For the rest of FY 2021, we estimate that volumes will gradually return to about 74% of pre-COVID volume levels. As noted, current projections by economists suggest the economic impact of the pandemic will be worse than the Great Recession (when we permanently lost over 20% of volumes).
  - For the entirety of FY 2021, we estimate that total volume will be approximately 70% of pre-COVID volume levels.

- Long-term impact - Fiscal Year 2022 and beyond
  - The longer-term projection suggests a return to a “new normal” of about 75% of pre-COVID volume levels, which is slightly worse than the last recession when we returned to a new normal of approximately 80% of pre-recession volumes. We then expect the long-term gradual secular volume declines that we were experiencing prior to the pandemic will resume for the next 10 years.

All of these volume assumptions are dependent on many facets of the COVID-19 disruption that are as yet unknown. For example, the longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return could be less than currently projected. Likewise, if the economic lock-down retreats in the coming weeks and businesses return to normal quickly, it is possible that the volume levels could be greater than these projections. Ultimately, given the significant uncertainty concerning these matters, our projections, while severe, should not be considered a worst case, because it is conceivable that the impact of COVID-19 on mail volumes could be even more dire than we are anticipating.

Based on these projections, it is expected that the Postal Service’s financial condition will worsen significantly compared to previous estimates. Our current projections, which are based upon the assumptions set forth herein, indicate that the Postal Service will be essentially illiquid in September 2020 if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than one payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers' compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term note that was available to us under our existing statutory borrowing authority. A portion of this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

We are in discussions with the Treasury regarding the borrowing authority in the CARES Act, including the terms and conditions that would apply to such borrowing. We anticipate that this borrowing will be provided to us and that we will be required to borrow the full $10 billion that is available, for the reasons noted herein.
However, even with this additional $10B, the Postal Service will continue to face a liquidity crisis in the near-term. Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current projections, we will run out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections, directly due to the COVID-19 pandemic.

The Postal Service will continue to take aggressive action to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. However, due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act, our ability to significantly reduce expenses in the short-run is limited. For instance, any savings associated with reduced workhours are diminished because the new leave provisions of the Families First Coronavirus Relief Act have added additional costs to the Postal Service that are estimated to be approximately $600M-$900M, depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying the pandemic, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.

**Legislative Relief Sought from Congress**

There is an immediate need for Congress to give the Postal Service relief to address the direct impacts that the COVID-19 pandemic has had and will have on our financial condition, so that we can ensure our continued ability to operate in the near term. To address the impacts of the pandemic, we seek the following four items from Congress:

- $25B in funds to cover the estimated COVID-19 losses over the next two years;

- $25B in funds for modernization, to address the long-term undercapitalization of the Postal Service that has been exacerbated by the pandemic, which will help the Postal Service weather the longer term economic impacts to our business resulting from the pandemic and ensure that our critical infrastructure will be ready to support the Nation for current and future needs;

- Satisfaction of our $14.4B in outstanding debt to the Federal Financing Bank

- Unrestricted borrowing authority up to $25B, by consolidating our existing borrowing authority of $15B under Title 39 of the United States Code, and $10B under the CARES Act, based on streamlined procedures, and by eliminating the $3B annual borrowing limitation.
As noted above, we estimate that the impact of COVID-19 will increase our net losses over the next 18 months by approximately $23B. Our request for $25B is intended to cover these losses, with a small cushion to account for contingencies, and hence to ensure our continued ability to operate in the near term. In this regard, our projections are not the worst case that could happen: in fact, we are not sure where the bottom is in terms of volume declines. As a result, it is important to build in some cushion to help ensure we remain liquid.

The longer-term impact of COVID-19 is estimated at almost $55B. In particular, the severe impact that the pandemic will have on our cash flows over the longer-term, due to the permanent shift in volumes, will exacerbate the fact that we are severely undercapitalized, by requiring us to further defer critically important capital investments. Modernizing our operations and infrastructure, such as through the purchase of new delivery vehicles, automated mail processing equipment, and other capital investments, is essential to our ability to continue providing our vital services to the American people in a prompt, reliable, and efficient manner. We therefore are requesting $25B to address the impact that the pandemic will have on our ability to modernize our critical operations infrastructure. This will not only have a direct benefit to the American people in terms of ensuring our ability to provide our services, but will also act as a stimulus to the economy as our Nation recovers from the pandemic, as these funds will be used to purchase goods from suppliers in the private sector.

Finally, eliminating our current debt and creating a streamlined borrowing process moving forward will give the Postal Service immediate financial relief, as well as critical flexibility to ensure our continued ability to operate in the short-term. We propose that future borrowings from Treasury or the Federal Financing Bank occur through the framework of the note purchase agreement through which we borrowed funds from Federal Financing Bank for the past two decades. The note purchase agreement provided a streamlined mechanism for such borrowings, and gives the Postal Service needed certainty as to its ability to readily access cash. In addition, the agreement sets forth reasonable and appropriate terms and conditions that protects the interests of both the Postal Service and Treasury.

While this immediate action by Congress is critical to ensuring that we can withstand the direct impacts of the pandemic in the near term, it is important to note that it will not resolve the fundamental problems with the Postal Service’s business model, or restore the Postal Service to longer-term financial stability. In fact, this short-term relief will only allow us to maintain operations until 2023, if provided in full.

The Postal Service operates under a statutory and regulatory structure that does not give us sufficient flexibility to reduce costs and increase revenue to meet the challenges of the secular decline in the use of the mail. The Board also believes that it is important that Congress eventually act to address these business model issues, to ensure that the Postal Service can be financially stable over the next 10 years, though to be clear this is not something we are seeking immediately. That said, within the next 12-18 months, the Board also recommends that Congress will need to enact financial reforms that give us greater pricing and product flexibility, as well as the ability to address our retiree health benefits program, which is not properly integrated with Medicare, and our unaffordable pension payment obligations. Absent such reforms, which we believe have broad support among postal stakeholders, it would be necessary for the Board to adopt more significant and controversial structural reforms to ensure our ability to survive over the next 10 years.

Conclusion

The lives of the American public have changed dramatically over the last several weeks, and it is during difficult times when the true value of the Postal Service to the nation is most evident. One of
our strengths as an organization is our stabilizing role in a crisis: the American people take confidence from our regular, daily role in their community and in their lives. The Postal Service remains committed to providing our critical services to the American, both today and for the years to come. The legislative recommendations discussed herein are presented with this goal in mind, and are fully endorsed by the bipartisan Board of Governors in a unanimous fashion.

Please let us know if you have any questions regarding this White Paper. The Board of Governors and the entire Postal Service look forward to continuing to work with you and the Administration to protect and strengthen the Postal Service.

NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-
of-use ("ROU") asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within *Other operating expenses* or *Transportation*, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, *Leases* ("ASC 840"), with related ASC 840 disclosures provided in *Note 12 - Leases*.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>

</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s *Statement of Operations* or *Statement of Cash Flows* and did not have any impact on the Postal Service’s *Statement of Changes in Net Deficiency*. See *Note 12 - Leases* and *Item 4. Controls and Procedures* for additional disclosures pertaining to ASC 842.
Accounting Pronouncements Issued but not Adopted

Accounting Standards Update 2016-13 Financial Instruments - Credit Losses
In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-13 Fair Value Measurement
In August 2018, the FASB issued Accounting Standards Update 2018-13 Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement, which has since been codified in ASC 820, Fair Value Measurement (“ASC 820”). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - Fair Value Measurement. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software
In August 2018, the FASB issued Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement, which has since been codified in ASC Subtopic 350-40, Intangibles - Goodwill and Other - Internal-Use Software (“ASC 350-40”). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

NOTE 3 - LIQUIDITY
The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.
Cash

The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - Cash, Cash Equivalents and Restricted Cash for further disclosures pertaining to cash.

The Postal Reorganization Act, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank ("FFB"), a government-owned corporation under the general supervision of the Secretary of the Treasury.

COVID-19 Considerations

In March 2020, the World Health Organization declared a novel strain of coronavirus ("COVID-19") a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service and has continued to process and deliver mail and packages during the pandemic as a part of the nation’s critical infrastructure.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the "CARES Act"). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However, the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic will increase its net operating loss by more than $22.0 billion over the next eighteen months, and by over $54.0 billion over the longer term, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service will require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity will continue to worsen if the nation experiences a prolonged period of disruption.

Subsequent Events

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with
this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the
deferral for the remainder of calendar year 2020.

The Postal Service drew $3.4 billion on a revolving credit facility with the FFB, that survived the expiration of the
under a Note Purchase Agreement ("NPA"). This borrowing transpired in early April 2020, prior to that revolving
credit facility’s expiration. This credit facility has a maximum term of up to one year and its interest rate was
determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding
request.

**Debt**

As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and
floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal
Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by
September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing
debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities
with established terms and conditions by providing two days prior notice. These note arrangements and credit
line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date
and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the
Postal Service’s outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a
contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit
until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance
that it could obtain alternative debt financing on comparable terms.

**Liquidity Concerns**

The Postal Service is constrained by laws and regulations, including the *Postal Accountability and
Enhancement Act* ("PAEA"), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and
health and benefits programs for employees and retirees, including the Federal Employees Health Benefit
("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers.
Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits
under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in *Note 9 -
Retirement Plans*. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund
("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated
retiree health benefits attributable to active employees' current year of service, and amortization payments for
full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in
*Note 10 - Health Benefits Plans*, are unlike expenses imposed on most other federal entities or private-sector
businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred
cumulative net losses of $82.9 billion from 2007 through March 31, 2020.

**Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory
change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and
its liquidity concerns, the Postal Service will be unlikely to have sufficient liquidity to meet all of its existing legal
obligations when due while also reducing its debt and making the critical infrastructure investments that have
been deferred in recent years.**
In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

**Business Model Challenges and Constraints**

Market-Dominant services, which account for approximately 66% of the Postal Service's annual operating revenues, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service's costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service's universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services. Specifically, declines in First-Class Mail are largely the result of changes in consumers' and businesses' use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, Marketing Mail volume has generally been challenged by commercial mailers' increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first half of 2019.

The Postal Service's Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service have recently begun diverting volume from the Postal Service’s network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers' compensation programs. Some of these costs have historically increased at a higher rate than inflation.

**Past Due Obligations**

The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

---
### Mitigating Circumstances

The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. **Irrespective of** Notwithstanding the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service's status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.

### NOTE 4 - REVENUE RECOGNITION

The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

Satisfaction of Performance Obligations
A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes PO Box services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.
Variable Consideration
The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

Contract Modifications
The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

Principal vs. Agent Consideration
The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

Contract Liabilities
The vast majority of the Postal Service’s contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

1 Included within Operating revenue in the accompanying unaudited Statements of Operations.
2 Included within Operating expenses in the accompanying unaudited Statements of Operations.
3 Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.
4 Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.

**NOTE 6 - CASH, CASH EQUIVALENTS AND RESTRICTED CASH**

The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash and cash equivalents</td>
<td>$8,987</td>
<td>$8,108</td>
</tr>
<tr>
<td>Restricted cash</td>
<td>472</td>
<td>546</td>
</tr>
<tr>
<td>Total cash, cash equivalents</td>
<td>$9,459</td>
<td>$8,654</td>
</tr>
<tr>
<td></td>
<td>2019</td>

</tr>
<tr>
<td>Restricted cash</td>
<td>366</td>
<td>275</td>
</tr>
<tr>
<td>Total cash, cash equivalents</td>
<td>$9,161</td>
<td>$10,336</td>
</tr>
</tbody>
</table>

**Restricted cash** represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. **Restricted cash** also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

**NOTE 7 - PROPERTY AND EQUIPMENT, NET**

Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.
For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.

NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO ("NPMHU") on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.
**Provision for Losses**

The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>

<td>$ 336</td>
</tr>
</tbody>
</table>

\(^1\) Included within *Payables and accrued expenses* in the accompanying *Balance Sheets*.

\(^2\) Included within *Other noncurrent liabilities* in the accompanying *Balance Sheets*.

**Reasonably Possible Contingencies**

The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

**Class Action Litigation**

As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission's ("EEOC") Office of Federal Operations ("OFO") certified the case *McConnell v. Brennan* (first instituted in 2006 as *McConnell v. Potter*) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process ("NRP") between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The *McConnell* case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP’s failure to provide a reasonable accommodation, the NRP’s wrongful disclosure of medical information, the NRP’s creation of a hostile work environment, and the NRP’s adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the *McConnell* case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO’s order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.
The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

**NOTE 9 - RETIREMENT PLANS**

The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the *Employee Retirement Income Security Act of 1974*, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under *Title 5, Section 8334(a)(1)* of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within *Compensation and benefits* in the accompanying unaudited *Statements of Operations*. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within *Compensation and benefits* in the accompanying *Balance Sheets*.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (“FERS-RAE”), or FERS - Further Revised Annuity Employees (“FERS-FRAE”) depending on whether their date of hire was before, during, or after calendar year 2013, respectively.
The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th>March 31, 2020</th>
<th>March 31, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Employee</strong></td>
<td><strong>Postal Service</strong></td>
</tr>
<tr>
<td>Contributions</td>
<td>Contributions</td>
</tr>
<tr>
<td>----------------</td>
<td>------------------</td>
</tr>
<tr>
<td>CSRS</td>

</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.
2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

The Postal Service’s total liability for retirement benefits was $9.8 billion and $8.4 billion at March 31, 2020, and September 30, 2019, respectively.

**FERS Normal Costs**

The Postal Service records expenses for FERS normal costs within Retirement benefits in the accompanying unaudited Statements of Operations.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as Retirement benefits in the accompanying unaudited Statements of Operations. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.
In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from OPM’s original projections due to changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.6 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

NOTE 10 - HEALTH BENEFITS PLANS

FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

Active Employees
The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

Retirees
Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it
defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.

Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

**NOTE 11 - WORKERS’ COMPENSATION**

Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

**Workers’ Compensation Liability**

The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.
Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.

The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>

</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.
The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged **as a pass-through** based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within **Other operating expenses** in the accompanying unaudited **Statements of Operations**.

Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within **Transportation** in the accompanying unaudited **Statements of Operations**.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See **Note 5 - Related Parties** for additional information on related party transactions.
The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

</tbody>
</table>

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

**Lease Accounting Policies**

**Lease Accounting Policy for Comparative Periods**
As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

**Lease Accounting Policy for the Six Months Ended March 31, 2020**
The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.
As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.

NOTE 13 - FAIR VALUE MEASUREMENT
The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.
The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable*</td>
<td>$ 476</td>
<td>$ 584</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$ 11,000</td>
<td>$ 11,936</td>
</tr>
</tbody>
</table>

* The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service ("Postal Service," "USPS," "we," "our" and "us"). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, ("Annual Report") filed with the Postal Regulatory Commission ("PRC") on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.
Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These statements risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The *Postal Accountability and Enhancement Act* (“PAEA”) classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund (“PSRHBF”). We must coordinate with the U.S. Office of Personnel Management (“OPM”) to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as *Informed Delivery*. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.
As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY
The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.

Effects of COVID-19
In March 2020, the World Health Organization (“WHO”) declared COVID-19 a global pandemic, which has since spread throughout the U.S. New federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, products that sustain us, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Furthermore, the anticipated weakness in the U.S. economy due to the pandemic has resulted in significant interest rate declines, which have caused an increase in certain of our noncontrollable operating expenses.
On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3 billion annual limit on new borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided under favorable terms.

We estimate that the COVID-19 pandemic will increase our net operating loss by more than $22.0 billion over the next eighteen months, and by over $54.0 billion over next ten years, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

Three Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $369 million, or 2.1%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $351 million, or 6.5%, with a volume growth of 16 million pieces, or 1.1%, driven largely by the January 2020 price increases applicable to certain Competitive services and e-commerce growth resulting from COVID-19; and
- First-Class Mail revenue increase of $109 million, or 1.7%, despite a volume decline of 63 million pieces, or 0.4%. Revenue growth was the result of the January 2020 price increases applicable to certain First-Class Mail services.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 605 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 50 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.6 billion, or 13.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers’ compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $145 million, or 9.9%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
• Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.3 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

**Six Months Ended March 31, 2020**

As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, increased $9 million, and was essentially flat, compared to the same period last year. The increase in operating revenue was due to an increase in Shipping and Packages revenue of $497 million, or 4.2%, despite a volume decline of 68 million pieces, or 2.1%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services. The increase in operating revenue was largely offset by the following:

• *Marketing Mail* revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 in the second quarter, as the pandemic affected many of our commercial customers;
• *First-Class Mail* revenue decrease of $59 million, or 0.5%, with a volume decline of 634 million pieces, or 2.2%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
• *Periodicals* revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.4 billion, or 3.5%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

• Workers’ compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
• Retirement benefits expense increase of $274 million, or 9.3%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $122 million, or 2.5%, due to increased spending on rent and utilities, and supplies and services; and
• Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards
Codification ("ASC") 842, Leases ("ASC 842"), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

- Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
- Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.0 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss
In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHBF actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.

The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056.
2 Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.
3 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM.
4 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period.

Our controllable loss decreased $33 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $369 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $76 million.
Our controllable loss increased $250 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first quarter of 2020.

The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

</table>

\(^1\) Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.

\(^2\) Excludes Marketing Mail Parcels.

\(^3\) Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.

\(^4\) Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.

\(^5\) Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, First-Class Mail generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of
our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, First-Class Mail generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 32% of our revenue for the three months ended March 31, 2020, which was a 1% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers' needs and have increased our investment in mail and package innovation. However, we also recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. Furthermore, due to the COVID-19 pandemic our First-Class Mail volume began to decline significantly in March 2020, and it may never fully recover. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically shown revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

However, our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert additional volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19.
We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

**First-Class Mail**

*First-Class Mail*, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of *First-Class Mail*, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because *First-Class Mail* is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers (“CPI-U”).

For the three months ended March 31, 2020, *First-Class Mail* revenue increased $109 million, or 1.7%, despite a volume decline of 63 million pieces, or 0.4%, compared to the same period last year. For the six months ended March 31, 2020, *First-Class Mail* revenue decreased $59 million, or 0.5%, and volume declined 634 million pieces, or 2.2%, compared to the same period last year. The most significant factor contributing to the declining trend in *First-Class Mail* volume was the continuing migration from mail to electronic communication and transaction alternatives. The increase in revenue and decline in volume for the three months ended March 31, 2020, as well as revenue declining at a slower rate than volume for the six months ended March 31, 2020, are due to the January 2020 price increase applicable to Market-Dominant services.

**Marketing Mail**

USPS *Marketing Mail* (more commonly, *Marketing Mail*), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as *First-Class Mail* or *Periodicals*.

Between 2009 and 2016, *Marketing Mail* experienced relatively flat volume. However, *Marketing Mail* volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, *Marketing Mail* continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, *Marketing Mail* revenue decreased $94 million, or 2.5%, and volume declined 605 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, *Marketing Mail* revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our *Marketing Mail* volume began to decline significantly in March 2020, and it may never fully recover. A protracted...
loss in customer demand for our services will continue to have a material effect on our Marketing Mail revenue and volume.

Marketing Mail is subject to intense competition, and price increases are currently generally capped at the rate of inflation. Marketing Mail volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used Marketing Mail to mail to more targeted prospects.

Shipping and Packages
The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

</table>

¹ Includes Priority Mail, a 1-3 business day delivery service; Priority Mail Express, an overnight delivery service available 365 days per year; and USPS Retail Ground, a retail-only Competitive service priced identically and functionally equivalent to Priority Mail for Zones 1-4.

² Includes Parcel Select, Parcel Return, and Marketing Mail Parcels.

³ Includes First-Class Package Services - Retail and First-Class Package Services - Commercial.

Our Shipping and Packages category has historically shown revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday retail shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 6.5%, with a volume growth of 1.1%, compared to the same period last year. The volume increased due to growth in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.2%, despite a volume decline of 2.1%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by e-commerce growth resulting from the COVID-19 pandemic.
**Priority Mail Services**

Priority Mail Services is our Shipping and Packages subcategory that includes *Priority Mail, Priority Mail Express* and *USPS Retail Ground*. *Priority Mail* and *Priority Mail Express* services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 45% of the total for the three and six months ended March 31, 2020, compared to approximately 46% for the same period last year. However, Priority Mail Services accounted for approximately 18% of the total Shipping and Packages volume for both the three months ended March 31, 2020, a 1% decrease from the same period last year, and approximately 18% of the total Shipping and Packages volume for the six months ended March 31, 2020, essentially unchanged from the same period last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 3.7%, despite a volume decline of 1.1%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 1.9%, despite a volume decline of 3.5%, compared to the same period last year. Revenue grew despite the volume declines for the periods due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**

Our Parcel Services subcategory includes Competitive services *Parcel Select* and *Parcel Return*, as well as Market-Dominant *USPS Marketing Mail Parcels* (more commonly, *Marketing Mail Parcels*). *Parcel Select* and *Parcel Return* services largely consist of last-mile deliveries, offered to large bulk shippers that perform more of the sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.0%, on volume growth of 2.7%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.0%, despite a volume decline of 1.0%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to e-commerce growth from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three months ended March 31, 2020, and despite the volume decline for the six months ended March 31, 2020, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**

Our First-Class Package Services subcategory includes the competitively priced *First-Class Package Service - Retail*, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and *First-Class Package Service - Commercial*, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels at the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.
For the three months ended March 31, 2020, First-Class Package Services revenue increased 10.8%, on volume growth of 4.1%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 8.3%, on volume growth of 0.4%, compared to the same period last year. Revenue grew greater than volume largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**

Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 2.4% on a volume decline of 8.8%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 4.0% on a volume decline of 9.9%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**

Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. "Outbound" services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but "inbound" services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.

For the three months ended March 31, 2020, International Mail revenue increased 3.2%, despite a volume decline of 9.8%, compared to the same period last year. For the six months ended March 31, 2020, International Mail revenue increased 0.8%, despite a volume decline of 8.5%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

**Periodicals**

Periodicals, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, Periodicals revenue decreased 10.7% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, Periodicals revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

Periodicals revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have depressed this business. The Periodicals category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as Certified Mail, PO Box services, and Return Receipt services. Also included in this category are money orders and passport services. Other services revenue increased 1.5%, but decreased 1.8% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management’s control.
We originally designed our mail processing and distribution network to provide overnight delivery service of First-Class Mail within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network’s legacy capabilities are not completely aligned to today’s mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in Retirement benefits and Retiree Health Benefits, respectively.

Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

</tr>
</tbody>
</table>

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments, approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.
Workforce Composition

The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

Collective Bargaining Agreements

On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The contract includes modest general wage increases over the life of the agreement with a COLA base month of July 2019, a reduction in our share of health insurance premiums, increased flexibility to use mail handler assistant employees, elimination of non-career casual employees, and enhanced benefits for non-career mail handler assistant employees. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The contract includes modest general wage increases over the life of the agreement with a COLA base month of July 2018, a reduction in our share of health insurance premiums, and wage improvements for postal support employees. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Employee Health Benefits

Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended
March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**
For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in *Compensation*.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020.

**Thrift Savings Plan**
Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**
The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during, or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.
Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>

<tr>
<td>Total retirement benefits</td>
<td>$1,615</td>
<td>$1,470</td>
</tr>
</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 9.9% and 9.3% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**

Our expense for FERS normal costs is reported within Retirement benefits in the accompanying unaudited Statements of Operations. We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.7% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS. Accordingly, we have accrued $404 million and $809 million for the three and six months ended March 31, 2020, for the CSRS amortization expense. Likewise, we have accrued $265 million and $530 million for the three and six months ended March 31, 2020, for the FERS amortization expense.
Our expense for CSRS and FERS unfunded retirement benefits amortization is reported within *Retirement benefits* in the accompanying unaudited *Statements of Operations*.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 11.5% and 11.7% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher OPM projected annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the original projected amounts, due to changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

**Retiree Health Benefits**

We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBFB has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBFB the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBFB unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBFB amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBFB normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBFB unfunded liability.

For additional information, see *Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees*.

**Workers’ Compensation**

Our employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of
changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.

On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers' compensation obligations, which are relatively predictable, from total workers' compensation expense in order to determine the non-cash component of workers' compensation expense, a non-GAAP financial measure.

The following table presents the components of workers' compensation expense, including the cash payments made by DOL on behalf of workers' compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>

<td>(370)</td>
</tr>
<tr>
<td><strong>Total workers’ compensation non-cash expense</strong></td>
<td><strong>$2,625</strong></td>
<td><strong>$401</strong></td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers’ compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.
**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within *Transportation* but in *Compensation and benefits* for employee costs and in *Other operating expenses* for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>Three Months Ended March 31,</th>
<th>Six Months Ended March 31,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>

<td>11</td>
<td>13</td>
</tr>
<tr>
<td><strong>Total transportation expenses</strong></td>
<td><strong>$2,008</strong></td>
<td><strong>$2,000</strong></td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see *Note 2 - Recent Accounting Pronouncements* for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.

**Other Operating Expenses**
Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

</tbody>
</table>

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

**LIQUIDITY AND CAPITAL RESOURCES**

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover.

Notwithstanding our $15.0 billion statutory debt limit, and $3 billion annual limitation on new borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided under favorable terms.

We estimate that the COVID-19 pandemic will increase our net operating loss by more than $22.0 billion over the next eighteen months, and by over $54.0 billion over the next ten years, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if the Postal Service is
unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of operations and to prepare for unexpected contingencies. Over half of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBF prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBF normal cost and amortization on PSRHBF, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

**CASH FLOW ANALYSIS**

**Operating Activities**
Cash provided by operating activities decreased $147 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

**Investing Activities**
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

**Financing Activities**
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

**DEBT**
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.
In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.

If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations for the foreseeable future.

We drew $3.4 billion in early April 2020, on a revolving credit facility with the FFB that survived the expiration of the NPA in early April 2020, prior to that facility’s expiration. This revolving credit facility has a maximum term of up to one year and its interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

LIQUIDITY OUTLOOK

We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - Retirement Plans. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees’ current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we will unlikely have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.
With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.

**PRC Ten-year Review**

In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC’s proposed changes to the system still do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any “true-up” authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020 and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant.

**2020 and Beyond**

Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-
Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

**Legally Required Obligations**
In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately **$7.6 billion due on September 30, 2020**, we expect to pay the DOL approximately **$1.3 billion** in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The **CARES Act** offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately **$1.16 billion**. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Capital Investments**
We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately **$1.3 billion** for the remainder of 2020, and an additional **$11.0 billion** for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.

**Mitigating Circumstances**
We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

**LEGISLATIVE, REGULATORY AND RELATED MATTERS**

**TASK FORCE ON THE UNITED STATES POSTAL SYSTEM**
As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a **Task Force on the United States Postal Service** (“Task Force”), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task
Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent pursuant to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, “A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service.”

**LEGISLATIVE UPDATE**

As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors (“Board”) which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors (“Governors”). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

**Legislation**

Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the *Families First Coronavirus Response Act*, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, or if a school/child care is closed, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 26, 2020, the President signed the *CARES Act*, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6379, the *Take Responsibility for Workers and Families Act*, introduced on March 23, 2020, would provide $25.0 billion to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic, eliminate debt owed to the FFB and authorize us to borrow money from the U.S. Treasury in an amount not to exceed $15.0 billion to carry out our duties and responsibilities. The bill was referred to the House Committees on Appropriations, Budget and Ways & Means.

H.R. 6425, the *Protect our Post Offices Act*, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.

**Postal Service Reform**

The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

**Board of Governors Nominations**

On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee’s consideration.

**THIRD-PARTY SERVICE ORGANIZATION’S CYBER INTRUSION INCIDENT**
As previously reported, in October 2019, a third-party service organization that we use for our metered postage revenue experienced a ransomware attack. We are reliant on certain information from this third-party service provider to record such revenue. In response to this event, the third-party service provider informed us that it is conducting an investigation and found no evidence that the data provided by the service provider and that we use was impacted by the ransomware attack.

We also conducted an investigation and performed procedures to determine whether the attack impacted our reported revenue amounts, financial reporting systems or our information technology environment. We have concluded that the incident did not result in a material impact to our financial results for the six months ended March 31, 2020, or the year ended September 30, 2019.

FAIR VALUE MEASUREMENTS

As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS

As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS

See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.

We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

INTERNAL CONTROLS

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations.

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover.

CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service ("Postal Service");

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;

4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting; and

5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO

In connection with the Quarterly Report of the United States Postal Service ("Postal Service") on Form 10-Q for the period ended March 31, 2020, (the “Report”), I, Megan J. Brennan, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Postal Service.

Dated: May 7, 2020

Postmaster General and Chief Executive Officer
CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO

In connection with the Quarterly Report of the United States Postal Service ("Postal Service") on Form 10-Q for
the period ended March 31, 2020, (the "Report"), I, Joseph Corbett, certify, pursuant to 18 U.S.C. Section 1350,
as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities
Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial
condition and results of operations of the Postal Service.

Dated: May 7, 2020

/s/Joseph Corbett
Joseph Corbett
Chief Financial Officer and Executive Vice President
Significant outstanding items as of the date of this draft:

- Closed financials (currently reconciled with Prelims #2.0)
- RPW (reconciled with RPW draft V2.0, then adjusted in Other for post-close Mail-in-Transit entry)
- Contingent liabilities
- Workers compensation (initial review complete)
- FERS and CSRS content tailored (impact from Board of Actuaries discount rate decision on CSRS and FERS is reflected in document and financials)
- Finalizing COVID-19 impact (particularly on liquidity)
- Related party transactions

Other outstanding items:

- Legislative Update - Initial draft is in.
- Other support
- Final formatting, page numbering, table of contents

Highlighting key:

- Yellow: Item or sentence requiring update, confirmation or third-party validation
- Green: Date, number or other reference that requires linking to master or support workbook in Wdesk
- Orange: Entire section awaiting update or third-party deliverable
- Purple: Linked number or reference that requires confirmation of source data
- Blue: Section or paragraph selected for elimination or move to another section; or
- Magenta: Internal comment for reviewers (to be removed when resolved)
UNITED STATES POSTAL SERVICE

(Exact name of registrant as specified in its charter)

Washington, D.C. 41-0760000
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

475 L’Enfant Plaza, S.W.
Washington, D.C. 20260
(Address of principal executive offices) (ZIP Code)

(202) 268-2000
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ¨ No ¨ Not Applicable þ

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T ($232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ¨ No ¨ Not Applicable þ

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ¨ Accelerated filer ¨ Non-accelerated filer þ
Smaller reporting company ¨ Emerging growth company ¨ Not applicable þ

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ¨
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  Yes   ☐ No ☑

NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-to-use asset.

Quarter II, 2020 Report on Form 10-Q - United States Postal Service
of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both interest and amortization expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>As reported on September 30, 2019</th>

</tr>
</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.
Accounting Pronouncements Issued but not Adopted

Accounting Standards Update 2016-13 Financial Instruments - Credit Losses
In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-13 Fair Value Measurement
In August 2018, the FASB issued Accounting Standards Update 2018-13 Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement, which has since been codified in ASC 820, Fair Value Measurement (“ASC 820”). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - Fair Value Measurement. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software
In August 2018, the FASB issued Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement, which has since been codified in ASC Subtopic 350-40, Intangibles - Goodwill and Other - Internal-Use Software (“ASC 350-40”). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

NOTE 3 - LIQUIDITY
The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.
Cash
The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - Cash, Cash Equivalents and Restricted Cash for further disclosures pertaining to cash.

The Postal Reorganization Act, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury.

COVID-19 Considerations
In March 2020, the World Health Organization declared a novel strain of coronavirus ("COVID-19") a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the "CARES Act"). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service may require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

Subsequent Events
The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with
this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the
deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6
billion. One half of these deferred payments would be due by December 31, 2021, and the other half by
December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the
expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the
Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit
facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the
credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on
the market rates of similar instruments as of the day of the funding request.

Debt
As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and
floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal
Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by
September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing
debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities
with established terms and conditions by providing two days prior notice. These note arrangements and credit
line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date
and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the
Postal Service’s outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a
contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit
until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance
that it could obtain alternative debt financing on comparable terms.

Liquidity Concerns
The Postal Service is constrained by laws and regulations, including the Postal Accountability and
Enhancement Act (“PAEA”), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and
health and benefits programs for employees and retirees, including the Federal Employees Health Benefit
(“FEHB”) program, CSRS and FERS, which the Office of Personnel Management (“OPM”) administers.
Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits
under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in Note 9 -
Retirement Plans. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund
(“PSRHBF”) and mandated certain obligations for paying normal costs, the present value of the estimated
retiree health benefits attributable to active employees’ current year of service, and amortization payments for
full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in
Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector
businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred
cumulative net losses of $82.9 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory
change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and
its liquidity concerns, the Postal Service will be unlikely to have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

**Business Model Challenges and Constraints**

Market-Dominant services, which accounted for approximately 66% of the Postal Service’s annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service's costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service's universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in First-Class Mail are largely the result of changes in consumers’ and businesses' use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, Marketing Mail volume has generally been challenged by commercial mailers’ increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service's Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service's network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, during March 2020, some of these customers increased their volume to the Postal Service’s network due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers’ compensation programs. Some of these costs have historically increased at a higher rate than inflation.

**Past Due Obligations**
The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

² The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

Mitigating Circumstances

The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.

NOTE 4 - REVENUE RECOGNITION

The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).
**Disaggregation of Revenue**

The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

</tbody>
</table>

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

**Satisfaction of Performance Obligations**

A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

*First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals* are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes *PO Box* services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, *Registered Mail*, Stamped Envelopes and Cards, Money Orders and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.
Variable Consideration
The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

Contract Modifications
The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

Principal vs. Agent Consideration
The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

Contract Liabilities
The vast majority of the Postal Service’s contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

</tbody>
</table>

1 Included within Operating revenue in the accompanying unaudited Statements of Operations.
2 Included within Operating expenses in the accompanying unaudited Statements of Operations.
3 Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.
4 Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.

**NOTE 6 - CASH, CASH EQUIVALENTS AND RESTRICTED CASH**

The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31,</th>
<th>September 30,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>
<td>2019</td>
</tr>
<tr>
<td>Cash and cash equivalents</td>
<td>$8,987</td>
<td>$8,108</td>
</tr>
<tr>
<td>Restricted cash</td>
<td>472</td>
<td>546</td>
</tr>
<tr>
<td>Total cash, cash equivalents and restricted cash</td>
<td>$9,459</td>
<td>$8,654</td>
</tr>
</tbody>
</table>

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

**NOTE 7 - PROPERTY AND EQUIPMENT, NET**

Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.
For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.

NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.
**Provision for Losses**

The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>

</tbody>
</table>

¹ Included within Payables and accrued expenses in the accompanying Balance Sheets.

² Included within Other noncurrent liabilities in the accompanying Balance Sheets.

**Reasonably Possible Contingencies**

The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

**Class Action Litigation**

As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission's ("EEOC") Office of Federal Operations ("OFO") certified the case *McConnell v. Brennan* (first instituted in 2006 as *McConnell v. Potter*) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process ("NRP") between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The *McConnell* case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP's failure to provide a reasonable accommodation, the NRP's wrongful disclosure of medical information, the NRP's creation of a hostile work environment, and the NRP's adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the *McConnell* case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.
The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

**Other**

The U.S. is a member of the Universal Postal Union (“UPU”), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as “terminal dues”.

In September 2019, the UPU members had a special meeting — known as the Extraordinary Congress — to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs (“CHF”), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in *Other assets* in the accompanying unaudited *Balance Sheet* at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in *Payables and accrued expenses* and the noncurrent portion of the obligation is recorded in *Other noncurrent liabilities* in the accompanying unaudited *Balance Sheet* at March 31, 2020, respectively.

**NOTE 9 - RETIREMENT PLANS**

The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the *Employee Retirement Income Security Act of 1974*, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.
The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees ("FERS-RAE"), or FERS - Further Revised Annuity Employees ("FERS-FRAE") depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>March 31, 2019</th>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.
FERS Normal Costs
The Postal Service records expenses for FERS normal costs within Retirement benefits in the accompanying unaudited Statements of Operations.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

CSRS and FERS Unfunded Retirement Benefits
OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as Retirement benefits in the accompanying unaudited Statements of Operations. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

NOTE 10 - HEALTH BENEFITS PLANS
FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

Active Employees
The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the
allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

**Retirees**
Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree's length of federal civilian service occurring on or after July 1, 1971. Each participant's share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.

Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.
The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056.

2 Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current

NOTE 11 - WORKERS’ COMPENSATION
Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers' eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

Workers’ Compensation Liability
The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>

</tr>
<tr>
<td>Medical inflation rate</td>
<td>3.50%</td>
<td>2.50%</td>
</tr>
</tbody>
</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

**NOTE 12 - LEASES**

**Postal Service Leases**

The Postal Service holds lessee positions in real property leases as well as lessee positions embedded in service contracts involving rights to use transportation equipment and facilities.

Real property leases support retail, delivery, mail processing, maintenance, administrative and support activities. The non-cancellable base terms of these leases typically range from one to five years, with one or more options to renew for additional five-year terms. The lease terms for these arrangements generally range from one to thirty years including any renewal options that are reasonably certain to be exercised. Additionally, certain real property leases contain purchase and termination options. At the commencement of most real property lease arrangements, the Postal Service is not reasonably certain if it will exercise such options. Real property leases include certain variable lease payments associated with non-lease components, such as...
common area maintenance costs, and non-lease components such as real estate taxes, which are generally charged as a pass-through based on actual amounts incurred by the lessor. The Postal Service records costs associated with real property leases within Other operating expenses in the accompanying unaudited Statements of Operations.

Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

Lease Accounting Policies

Lease Accounting Policy for Comparative Periods

As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.
The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

Lease Accounting Policy for the Six Months Ended March 31, 2020
The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.
The discount rates used in net present value calculations are determined based on the Postal Service’s incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.

**NOTE 13 - FAIR VALUE MEASUREMENT**

The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within *Property and equipment, net* are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.

For the three and six months ended March 31, 2020, no significant transfers between *Level 1* and *Level 2* assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th>September 30, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable*</td>
<td>$</td>
<td>476 $</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$</td>
<td>11,000 $</td>
</tr>
</tbody>
</table>

* The carrying amount is included within *Other assets* (which includes items in addition to the revenue forgone installment receivable) in the accompanying *Balance Sheets*.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered *Level 2* inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered *Level 3* inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

**ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**CAUTIONARY STATEMENTS**
The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act (“PAEA”) classifies our products into two broad categories: Market-Dominant and Competitive “products,” however, we use the term “services” in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund (“PSRHBF”). We must coordinate with the U.S. Office of Personnel Management (“OPM”) to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.
We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY

The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.

Effects of COVID-19

In March 2020, the World Health Organization (“WHO”) declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.

Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.
Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits expenses.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

**Three Months Ended March 31, 2020**

As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $351 million, or 6.5%, with a volume growth of 16 million pieces, or 1.1%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $109 million, or 1.7%, despite a volume decline of 63 million pieces, or 0.4%. Revenue growth was the result of the January 2020 price increases applicable to certain First-Class Mail services.

The above increases in operating revenue were partially offset by a decrease in Marketing Mail revenue of $94 million, or 2.5%, with a volume decline of 605 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 50 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in Operating Expenses, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:
• Workers' compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management's control, as the COVID-19 pandemic weighed on the U.S. economy;
• Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management's control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
• Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
• Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM's preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

Six Months Ended March 31, 2020
As more fully described below in Operating Revenue and Volume, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

• Marketing Mail revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
• First-Class Mail revenue decrease of $59 million, or 0.5%, with a volume decline of 634 million pieces, or 2.2%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
• Periodicals revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.
The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $497 million, or 4.2%, despite a volume decline of 68 million pieces, or 2.1%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers' compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management's control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management's control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
- Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

- Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
- Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss
In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHB actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

\(^1\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056.

\(^2\) Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

\(^3\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

\(^4\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, First-Class Mail generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, First-Class Mail generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 32% of our revenue for the three months ended March 31, 2020, which was a 1% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.
Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers’ needs and have increased our investment in mail and package innovation. However, we also recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. Furthermore, due to the COVID-19 pandemic our First-Class Mail volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

However, our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail

First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers (“CPI-U”).
For the three months ended March 31, 2020, First-Class Mail revenue increased $109 million, or 1.7%, despite a volume decline of 63 million pieces, or 0.4%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Mail revenue decreased $59 million, or 0.5%, and volume declined 634 million pieces, or 2.2%, compared to the same period last year. The most significant factor contributing to the declining trend in First-Class Mail volume was the continuing migration from mail to electronic communication and transaction alternatives. The increase in revenue and decline in volume for the three months ended March 31, 2020, as well as revenue declining at a slower rate than volume for the six months ended March 31, 2020, are due to the January 2020 price increase applicable to Market-Dominant services.

Due to the COVID-19 pandemic, our First-Class Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on First-Class Mail revenue and volume.

Marketing Mail

USPS Marketing Mail (more commonly, Marketing Mail), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as First-Class Mail or Periodicals.

Between 2009 and 2016, Marketing Mail experienced relatively flat volume. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, Marketing Mail revenue decreased $94 million, or 2.5%, and volume declined 605 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, Marketing Mail revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our Marketing Mail volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our Marketing Mail revenue and volume.

Marketing Mail is subject to intense competition, and price increases are currently generally capped at the rate of inflation. Marketing Mail volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used Marketing Mail to mail to more targeted prospects.

Shipping and Packages

The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

\(^1\) Includes *Priority Mail*, a 1-3 business day delivery service; *Priority Mail Express*, an overnight delivery service available 365 days per year; and *USPS Retail Ground*, a retail-only Competitive service priced identically and functionally equivalent to *Priority Mail* for Zones 1-4.

\(^2\) Includes *Parcel Select*, *Parcel Return*, and *Marketing Mail Parcels*.

\(^3\) Includes *First-Class Package Services - Retail* and *First-Class Package Services - Commercial*.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 6.5%, with a volume growth of 1.1%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.2%, despite a volume decline of 2.1%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

**Priority Mail Services**

Priority Mail Services is our Shipping and Packages subcategory that includes *Priority Mail*, *Priority Mail Express* and *USPS Retail Ground*. *Priority Mail* and *Priority Mail Express* services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 45% of the total for the three and six months ended March 31, 2020, compared to approximately 46% for the same period last year. However, Priority Mail Services accounted for approximately 18% of the total
Shipping and Packages volume for both the three months ended March 31, 2020, a 1% decrease from the same period last year, and approximately 18% of the total Shipping and Packages volume for the six months ended March 31, 2020, essentially unchanged from the same period last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 3.7%, despite a volume decline of 1.1%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 1.9%, despite a volume decline of 3.5%, compared to the same period last year. Revenue grew despite the volume declines for the periods due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**

Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.0%, on volume growth of 2.7%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.0%, despite a volume decline of 1.0%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three months ended March 31, 2020, and despite the volume decline for the six months ended March 31, 2020, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**

Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 10.8%, on volume growth of 4.1%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 8.3%, on volume growth of 0.4%, compared to the same period last year. Revenue grew greater than volume largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**

Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 2.4% on a volume decline of 8.8%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 4.0% on a volume decline of 9.9%, compared to the same period last year. Revenue declined at a slower rate
than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**

Our *International Mail* category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. "Outbound" services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of *International Mail* revenue, but "inbound" services are the opposite, generating two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.

For the three months ended March 31, 2020, *International Mail* revenue increased 3.2%, despite a volume decline of 9.8%, compared to the same period last year. For the six months ended March 31, 2020, *International Mail* revenue increased 0.8%, despite a volume decline of 8.5%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union ("UPU"), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as "terminal dues".

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked its provision to self-declare rates beginning in July 2020.

**Periodicals**

*Periodicals*, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, *Periodicals* revenue decreased 10.7% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, *Periodicals* revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

*Periodicals* revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The *Periodicals* category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as *Certified Mail*, *PO Box services*, and *Return Receipt* services. Also included in this category are money orders and passport services. Other services revenue decreased 0.4%, and 2.8% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management’s control.
We originally designed our mail processing and distribution network to provide overnight delivery service of First-Class Mail within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network’s legacy capabilities are not completely aligned to today’s mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in Retirement benefits and Retiree Health Benefits, respectively.

Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

</table>

**Compensation**

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

**Work Hours**

For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.
As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

Workforce Composition
The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

Collective Bargaining Agreements
On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Employee Health Benefits
Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

Social Security
For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in Compensation.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

Thrift Savings Plan
Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

Retirement Benefits
The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during, or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.

Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

2 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.
Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**

We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions. Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

**Retiree Health Benefits**
We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHB has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHB the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHB unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHB amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHB normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHB unfunded liability.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.

**Workers’ Compensation**

Our employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.

On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers' compensation obligations, which are relatively predictable, from total workers' compensation expense in order to determine the non-cash component of workers' compensation expense, a non-GAAP financial measure.
The following table presents the components of workers’ compensation expense, including the cash payments made by DOL on behalf of workers’ compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>

<tr>
<td><strong>Total workers’ compensation non-cash expense</strong></td>
<td>$2,625</td>
<td>$401</td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers’ compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management’s control.

The combined costs of new workers’ compensation cases and revaluation of existing workers’ compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers’ compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.
Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.

The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31,</th>
<th>Six Months Ended March 31,</th>

</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.

**Other Operating Expenses**

Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

Quarter II, 2020 Report on Form 10-Q - United States Postal Service-49
Vehicle maintenance service          152   160   310   320  
Rural carrier equipment maintenance  142   139   299   298  
Fuel - delivery vehicles             129   106   260   248  
Miscellaneous other                  260   234   500   503  

Total other operating expenses       $2,480 $2,356 $5,016 $4,894

Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of operations and to prepare for unexpected contingencies. Over half of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBF prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments
due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBF normal cost and amortization on PSRHBF, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

**CASH FLOW ANALYSIS**

**Operating Activities**
Cash provided by operating activities decreased $147 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.

**Investing Activities**
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

**Financing Activities**
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

**DEBT**
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank (“FFB”), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement (“NPA”) with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.
If we are unable to renew or replace the NPA with the FFB, we have no assurance that we could obtain alternative debt financing on comparable terms. However, we believe that we will be able to maintain adequate liquidity through existing and new financing arrangements, as necessary and allowed by statute, to fund our operations.

On April 1, 2020, we drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the NPA. In order to comply with the annual net increase limit, we must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, we must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility's interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

**LIQUIDITY OUTLOOK**

We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in *Note 9 - Retirement Plans*. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in *Note 10 - Health Benefits Plans*, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we may not have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC's ten-year review (discussed below), which would allow additional pricing flexibility.
Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.

**PRC Ten-year Review**

In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC’s proposed changes to the system still do not include the elimination of the CPI-U price cap. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any “true-up” authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020 and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the PRC website: https://www.prc.gov/press-releases/prc-revises-proposals-second-rulemaking-modify-rate-system-classes-market-dominant.

**2020 and Beyond**

Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

**Legally Required Obligations**

In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately $7.6 billion due on September 30, 2020, we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the
remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

Capital Investments
We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately $1.3 billion for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.

Mitigating Circumstances
We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

LEGISLATIVE, REGULATORY AND RELATED MATTERS

TASK FORCE ON THE UNITED STATES POSTAL SYSTEM
As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, “A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service.”

LEGISLATIVE UPDATE
As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors ("Board") which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors ("Governors"). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

**Legislation**
Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the *Families First Coronavirus Response Act*, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 26, 2020, the President signed the *CARES Act*, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the *Protect our Post Offices Act*, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.

**Postal Service Reform**
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

**Board of Governors Nominations**
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee's consideration.

**FAIR VALUE MEASUREMENTS**

As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in *Item 1. Financial Statements, Notes to Unaudited Financial Statements*. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See *Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement*.

**RELATED PARTY TRANSACTIONS**

As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see *Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties*.

**CRITICAL ACCOUNTING POLICIES AND ESTIMATES**
The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS

See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.

We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.
DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

INTERNAL CONTROLS

We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations. In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF 1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service (“Postal Service”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;
4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting; and
5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and
   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

Form 10-Q
For the quarterly period ended March 31, 2020
10-Q Draft - Cover Memo

significant outstanding items as of the date of this draft:

- Closed financials (currently reconciled with Prelims #2.0)
- RPW (reconciled with RPW draft V2.0, then adjusted in Other for post-close Mail-in-Transit entry)
- Contingent liabilities
- Workers compensation (initial review complete)
- FERS and CSRS content tailored (impact from Board of Actuaries discount rate decision on CSRS and FERS is reflected in document and financials)
- Finalizing COVID-19 impact (particularly on liquidity)
- Related party transactions

other outstanding items:

- Legislative Update - Initial draft is in.
- Other support
- Final formatting, page numbering, table of contents

highlighting key:

- Yellow: Item or sentence requiring update, confirmation or third-party validation
- Green: Date, number or other reference that requires linking to master or support workbook in Wdesk
- Orange: Entire section awaiting update or third-party deliverable
- Purple: Linked number or reference that requires confirmation of source data
- Blue: Section or paragraph selected for elimination or move to another section; or
- Magenta: Internal comment for reviewers (to be removed when resolved)
Draft April 21, 2020 (3.3)

UNITED STATES
POSTAL REGULATORY COMMISSION
Washington, D.C. 20268-0001

FORM 10-Q

QUARTERLY REPORT PURSUANT TO 39 U.S.C. § 3654 AND SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended March 31, 2020

UNITED STATES POSTAL SERVICE
(Exact name of registrant as specified in its charter)

Washington, D.C. 41-07860300
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

475 L'Enfant Plaza, S.W.
Washington, D.C. 20260
(Address of principal executive offices) (ZIP Code)

(202) 268-2000
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐ Not Applicable ☒

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every interactive Data File required to be submitted and posted pursuant to rule 405 of Regulation S-T ($232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐ Not Applicable ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

☐ Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☒
☐ Smaller reporting company ☐ Emerging growth company ☐ Not applicable ☒

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Securities registered pursuant to Section 12(b) of the Act

NOTES TO UNAUDITED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Interim Financial Statements
The accompanying unaudited interim financial statements of the United States Postal Service (the “Postal Service”) have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of the U.S. Securities and Exchange Commission Regulation S-X. These financial statements should be read in conjunction with the Postal Service’s financial statements for the year ended September 30, 2019, included in its Annual Report on Form 10-K (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019, and do not include all information and footnotes which are normally included in the Annual Report. Except as otherwise specified, all references to years are to fiscal years beginning October 1 and ending September 30, and quarters are quarters within fiscal years 2020 and 2019.

In the opinion of management, the accompanying unaudited interim financial statements reflect all material adjustments, including recurring adjustments, necessary to fairly present the financial position as of March 31, 2020, the results of operations for the three and six months ended March 31, 2020, and 2019, the changes in net deficiency for the six months ended March 31, 2020, and 2019, and cash flows for the six months ended March 31, 2020, and 2019. Operating results for the three and six months ended March 31, 2020, are not necessarily indicative of the results that may be expected for all of 2020. Mail volume and revenue are historically greatest in the first quarter of the year, which includes the holiday mailing season.

Reclassifications
Certain reclassifications have been made to the financial statements for the three and six months ended March 31, 2019, as well as subsequent footnotes, to conform to the current period presentation. Specifically, certain retirement benefit expenses have been reclassified from Compensation and benefits and separately identified as Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations. In addition, unfunded retirement benefits amortization expenses associated with the Civil Service Retirement System (“CSRS”) and the Federal Employee Retirement System (“FERS”) have been reclassified from Unfunded retirement benefits amortization to Retirement benefits within Operating expenses in the accompanying unaudited Statements of Operations.

The liabilities associated with these retirement benefits have also been reclassified from Compensation and benefits and separately identified as Retirement benefits within Current liabilities in the balance sheets. In addition, the unfunded retirement benefits liabilities associated with CSRS and FERS have been reclassified from Unfunded retirement benefits to Retirement benefits within Current liabilities in the balance sheets. Corresponding reclassifications have been made within Changes in current assets and liabilities in the accompanying unaudited Statements of Cash Flows.

These reclassifications had no effect on previously reported total operating expenses, loss from operations or net loss. See Note 9 - Retirement Plans for further disclosure pertaining to retirement benefits.

NOTE 2 - RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Accounting Pronouncement
In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”). The new standard requires an entity to record most leases in its balance sheets but continue to recognize expenses in its statements of operations in a manner similar to current accounting practices. The new standard requires a lessee to recognize a lease liability for the obligation to make lease payments and a right-of-use (“ROU”) asset for the right to use the underlying asset for the lease term. Expenses associated with operating leases are recognized on a straight-line basis and include embedded interest and amortization components. The Postal Service recognizes expenses associated with operating leases as rent expense or transportation expense within Other operating expenses or Transportation, respectively, in the statements of operations. The Postal Service recognizes expenses associated with finance leases (formerly capital leases under previous guidance) with both interest and amortization
expenses and presents these separately in the statements of operations. As such, finance leases generally have higher expenses in the earlier periods of the lease term.

The Postal Service adopted ASC 842 for its 2020 fiscal year (beginning October 1, 2019). In connection with the adoption of ASC 842, the Postal Service has made necessary changes to relevant policies, processes, information systems and internal controls. For transition purposes, the Postal Service has elected the option not to restate comparative financial statements under the modified retrospective transition model. This option allows the application of the standard to all leases in effect as of the effective date (October 1, 2019) or commencing thereafter, without any restatement impact on the comparative financial statement balances. Accordingly, all comparative financial statements enclosed herein are presented in accordance with the previous ASC 840, Leases (“ASC 840”), with related ASC 840 disclosures provided in Note 12 - Leases.

In implementing ASC 842, the Postal Service has elected the package of practical expedients which permits carrying forward historical accounting positions around lease identification, lease classification and initial direct costs for all leases commencing prior to October 1, 2019. The Postal Service has also made a policy election to not separate the lease and non-lease components for all types of underlying assets and to exclude its short-term leases from the ROU asset and lease liability balances.

The Postal Service adopted ASC 842 on October 1, 2019. The implementation of ASC 842 resulted in an opening balance sheet adjustment, as of October 1, 2019, to recognize $4.4 billion in right-of-use assets and lease liabilities relating to operating leases as follows:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

The implementation of ASC 842 did not have a material impact on the Postal Service’s Statement of Operations or Statement of Cash Flows and did not have any impact on the Postal Service’s Statement of Changes in Net Deficiency. See Note 12 - Leases and Item 4. Controls and Procedures for additional disclosures pertaining to ASC 842.

**Accounting Pronouncements Issued but not Adopted**

**Accounting Standards Update 2016-13 Financial Instruments - Credit Losses**

In June 2016, the FASB issued Accounting Standards Update 2016-13 Financial Instruments - Credit Losses, which has since been codified in ASC 326, Financial Instruments - Credit Losses (“ASC 326”). The new standard requires entities to measure expected credit losses on financial instruments and other commitments by replacing the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates.

The Postal Service intends to adopt ASC 326 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service’s valuation of its receivables. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.
Accounting Standards Update 2018-13 Fair Value Measurement
In August 2018, the FASB issued Accounting Standards Update 2018-13 Fair Value Measurement: Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement, which has since been codified in ASC 820, Fair Value Measurement (“ASC 820”). The new standard modifies the disclosure requirements for fair value measurements by adding, modifying or removing certain disclosures.

The Postal Service intends to adopt ASC 820 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The standard is applicable to the Postal Service's fair value measurements of its revenue forgone installment receivable and its long-term debt, as described further in Note 13 - Fair Value Measurement. Under ASC 820, certain disclosures are required to be applied on a retrospective basis and others on a prospective basis. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software
In August 2018, the FASB issued Accounting Standards Update 2018-15 Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) - Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement, which has since been codified in ASC Subtopic 350-40, Intangibles - Goodwill and Other - Internal-Use Software (“ASC 350-40”). This is an update to a standard the FASB issued in April 2015 for entities evaluating the accounting for fees paid by a customer in a cloud computing (hosting) arrangement by providing guidance for determining when such arrangement includes a software license.

If a cloud computing arrangement includes a license for internal-use software, then the software license is accounted for by the customer in accordance with ASC 350-40. This generally means that an intangible asset is recognized for the software license and, to the extent that the payments attributable to the software license are made over time, a liability also is recognized. If a cloud computing arrangement does not include a software license, the entity should account for the arrangement as a service contract. This generally means that the fees associated with the hosting element (service) of the arrangement are expensed as incurred.

The Postal Service intends to adopt ASC 350-40 for its 2021 fiscal year (beginning October 1, 2020) and the quarters therein. The Postal Service is currently evaluating the impact of adopting this standard on its financial statements and related disclosures.

NOTE 3 - LIQUIDITY
The Postal Service’s liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity.

Cash
The Postal Service generates its cash almost entirely through the sale of postal products and services. As of March 31, 2020, and September 30, 2019, the Postal Service held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. See Note 6 - Cash, Cash Equivalents and Restricted Cash for further disclosures pertaining to cash.

The Postal Reorganization Act, as amended by Public Laws 101-227 and 109-435 (the "PRA"), authorizes the Postal Service to raise cash through the issuance of debt obligations. The Postal Service is limited by statute to annual net increases in debt of $3.0 billion calculated as of the end of each fiscal year, and total debt of $15.0 billion. In 1974, the Postal Service began issuing debt through individual debt agreements to the Federal Financing Bank ("FFB"), a government-owned corporation under the general supervision of the Secretary of the Treasury.

COVID-19 Considerations
In March 2020, the World Health Organization declared a novel strain of coronavirus ("COVID-19") a global pandemic, which has since spread throughout the U.S. Given its mandate to provide universal postal services to the nation, the Postal Service provides an essential service as part of the nation’s critical infrastructure and has continued to process and deliver mail and packages during the pandemic.

The Postal Service expects the COVID-19 pandemic to have a material effect on its financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The
Postal Service relies on the sale of postal products and services to fund its operations, and these sales declined significantly in late March 2020 as a result of the pandemic, and the impact has continued to worsen since then. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding the $15.0 billion statutory debt limit, and the $3.0 billion limit on annual borrowing, the CARES Act allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon. However the Postal Service has no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

The Postal Service estimates that the COVID-19 pandemic may increase its net operating loss by more than $22.0 billion over the next eighteen months, threatening its ability to operate. If the Postal Service is able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, it expects that it will have sufficient liquidity to continue operations through April 2021. However, if the Postal Service is unable to secure this $10.0 billion in financing, it expects to be able to continue to operate only through September 2020.

Given these COVID-19 considerations, the Postal Service may require an additional injection of liquidity, provided by either the U.S. government or other sources, or through additional defaults, to remain a going concern. While the COVID-19 disruption is expected to be temporary, its duration remains uncertain, and the Postal Service expects that its liquidity may continue to worsen if the nation experiences a prolonged period of disruption.

Subsequent Events
The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, the Postal Service began deferring these payments in April 2020, and intends to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

On April 1, 2020, the Postal Service drew $3.4 billion on a revolving credit facility with the FFB that survived the expiration of the Note Purchase Agreement (“NPA”). In order to comply with the annual net increase limit, the Postal Service must repay $400 million from this credit facility by September 30, 2020. Given that the credit facility has a maximum term of up to one year, the Postal Service must repay any outstanding balance of the credit facility by April 1, 2021. The credit facility’s interest rate was determined by the U.S. Treasury based on the market rates of similar instruments as of the day of the funding request.

Debt
As of both March 31, 2020, and September 30, 2019, the Postal Service had a combination of fixed-rate and floating-rate notes outstanding with various maturities totaling $11.0 billion. As of March 31, 2020, the Postal Service’s statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with the annual debt net increase limit.

In 1999, the Postal Service entered into the NPA with the FFB to establish standardized procedures for issuing debt. Under the NPA, the Postal Service was able to issue a series of notes and revolving credit line facilities with established terms and conditions by providing two days prior notice. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of the Postal Service’s outstanding debt as of March 31, 2020, all of which was issued under the NPA. As a contractual matter, the FFB continued to lend to the Postal Service under each commitment and line of credit until it expired. If the Postal Service is unable to renew or replace the NPA with the FFB, it has no assurance that it could obtain alternative debt financing on comparable terms.
Liquidity Concerns
The Postal Service is constrained by laws and regulations, including the Postal Accountability and Enhancement Act (“PAEA”), which restrict revenue sources and mandate certain expenses.

The Postal Service is required, either by law or by union contract, to participate in U.S. government pension and health and benefits programs for employees and retirees, including the Federal Employees Health Benefit ("FEHB") program, CSRS and FERS, which the Office of Personnel Management ("OPM") administers. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under CSRS and FERS, as well as FERS normal costs, described in greater detail below and in Note 9 - Retirement Plans. Additionally, the PAEA established the Postal Service Retiree Health Benefits Fund ("PSRHBF") and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees' current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail below and in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.

The Postal Service reported operating expenses of approximately $80 billion in 2019 and has incurred cumulative net losses of $82.9 billion from 2007 through March 31, 2020.

Notwithstanding the challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, the Postal Service projects continuing annual net losses in the future. As a result of these losses and its liquidity concerns, the Postal Service will be unlikely to have sufficient liquidity to meet all of its existing legal obligations when due while also reducing its debt and making the critical infrastructure investments that have been deferred in recent years.

In the event that circumstances leave the Postal Service with insufficient liquidity, it would likely be required to implement additional contingency plans to ensure that its primary mission is fulfilled and that mail deliveries continue. These measures may require the Postal Service to prioritize payments to the FFB, employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as has been done in the past.

Business Model Challenges and Constraints
Market-Dominant services, which accounted for approximately 66% of the Postal Service’s annual operating revenues in 2019, are currently subject to a price cap as measured by the Consumer Price Index for All Urban Consumers ("CPI-U"). However, the Postal Service’s costs are not similarly constrained. A large portion of its cost structure cannot be altered expeditiously due to the Postal Service’s universal service obligation. Further, the number of delivery points continues to grow by approximately one million per year, which drives up delivery costs. When combined with the impact of lower mail volume, the average number of pieces delivered per delivery point per day has decreased from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a decline of approximately 39%, and a further significant decline is expected in 2020.

Many employee and retiree benefit costs are mandated by law and cannot be altered without legislative change. Under current law, the Postal Service is generally unable to increase prices sufficiently to offset increased costs, and is likewise constrained by law from reducing many of its costs or from pursuing many alternate sources of revenue.

Aside from its universal service obligation, a significant factor contributing to Postal Service losses is the ongoing decline in the volume of Market-Dominant products and services, and those declines are being exacerbated by the COVID-19 pandemic. Specifically, declines in First-Class Mail are largely the result of changes in consumers’ and businesses’ use of mail resulting from the continuing migration to electronic communication and transactional alternatives, which have taken place over the last decade and are expected to continue. After experiencing relatively flat volume between 2009 and 2016, beginning in 2017, Marketing Mail volume has generally been challenged by commercial mailers’ increasing use of digital and mobile advertising, and more recently by the COVID-19 pandemic, although this class has benefited from strong political and election mail volumes, particularly in the second half of 2018 and the first quarter of 2019.

The Postal Service’s Shipping and Packages category has historically provided revenue and volume growth as a result of its successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition
which significantly impacts both revenue and volume. Certain major customers of the Postal Service had begun diverting volume from the Postal Service's network by in-sourcing last-mile delivery. Competitors in the package delivery market are aggressively pricing their products and services in order to fill their networks and grow package density. However, during March 2020, some of these customers increased their volume to the Postal Service's network due to their delivery capacity constraints.

Because the Postal Service provides its services primarily through its employees, its costs are heavily concentrated in wages and benefits for both current employees and retirees. These costs are significantly impacted by contractual wage increases, employee health benefit premium increases, and statutorily mandated retirement and workers' compensation programs. Some of these costs have historically increased at a higher rate than inflation.

Past Due Obligations
The following table presents the total expenses accrued but unpaid by the Postal Service as of September 30, 2019, related to retiree health benefits, CSRS and FERS and the fiscal years in which the accruals were recorded:

¹ The 2012 to 2016 period amount includes $5.8 billion for 2016, $5.7 billion for 2015, $5.7 billion for 2014, $5.6 billion for 2013 and $11.1 billion for 2012.
² The 2012 to 2016 period amount includes $247.6 million for 2016, $240.9 million for 2015 and $6.7 million for 2014.

Mitigating Circumstances
The Postal Service continues to pursue strategies within its control to increase operational efficiency and improve liquidity. The Postal Service has managed capital in recent years by spending what it believed was essential to maintain its existing facilities and service levels, to ensure employee safety and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade its facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Irrespective of the challenges resulting from the COVID-19 pandemic, aggressive management of the business operations, as well as legislative and regulatory reforms that will enable it to increase revenue and reduce costs, will all be necessary to restore the Postal Service to financial health.

The Postal Service’s status as an independent establishment of the executive branch that does not receive tax dollars for its operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from the Postal Service and the many businesses that provide the printing and mailing services that it supports. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent the Postal Service from significantly curtailing or ceasing operations. The Postal Service continues to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges it faces and the legislative and regulatory changes that are required to restore its financial stability.

NOTE 4 - REVENUE RECOGNITION
The Postal Service generates the majority of its revenue from contracts associated with the processing and delivery of different types of mail and packages, both domestically and internationally, which generally occur over a relatively short period of time (e.g., several days).
Disaggregation of Revenue
The following table summarizes the Postal Service’s disaggregated operating revenue for the three and six months ended March 31, 2020, and 2019, by each service category:

<table>

</tbody>
</table>

* Prior period amounts for certain service categories include reclassifications of amounts amongst service categories to conform to current period presentation. These reclassifications are immaterial for each affected category, and had no effect on total operating revenue for the period.

Satisfaction of Performance Obligations
A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied.

First-Class Mail, Marketing Mail, Shipping and Packages, International Mail and Periodicals are categorized as Mailing and Shipping services for purposes of satisfying performance obligations. The Postal Service recognizes revenue for Mailing and Shipping services as it fulfills its obligation to process and deliver each mailpiece and the customer mail sender/recipient receives and consumes the benefits of these services.

Other revenue includes PO Box services, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and other goods and services. The Postal Service recognizes revenue for the majority of these services over time as the customer receives and consumes the benefits of the service. The revenue for a small portion of certain goods or services in this service category is recognized at a point in time when the goods or services are provided to the customer.

The vast majority of the Postal Service’s contracts include only one performance obligation. However, if a contract is separated into more than one performance obligation, the total transaction price for each performance obligation is allocated in an amount based on the estimated relative stand-alone selling prices of the promised goods or services underlying each performance obligation. The majority of the goods or services sold by the Postal Service have observable stand-alone sales prices. Further, payment for the majority of the goods and services is received up front.

If the Postal Service were unable to complete delivery to the destination point, another entity would not need to re-perform the entire portion of delivery already performed by the Postal Service. Accordingly, control from the Postal Service to the customer transfers over time for the vast majority of services the Postal Service offers, and revenue is recognized based on the progress of the completion of the performance obligations.

Variable Consideration
The Postal Service offers certain contracts to its customers that contain various types of customer incentives or other provisions that can either increase or decrease the transaction price. Customer incentives include discounts, money back guarantees, rebates, refunds or incentive payments. The other provisions include performance
penalties. The Postal Service uses the expected value approach to estimate variable consideration to which it expects to be entitled.

**Contract Modifications**
The Postal Service considers contract modifications to exist when the modification either creates new enforceable rights and obligations or alters the existing arrangement. Contract modifications do not add distinct services; they are typically used to change the prices that the Postal Service charges its customer for existing services. These contract modifications are accounted for prospectively as the remaining performance obligations are executed.

**Principal vs. Agent Consideration**
The Postal Service utilizes third parties to assist with the transportation of mailpieces between different points as part of the delivery process. Based on its evaluation of the transfer of control model, the Postal Service has determined that it acts as the principal rather than the agent within these arrangements.

**Contract Liabilities**
The vast majority of the Postal Service's contract liabilities consist of Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees. Deferred revenue-prepaid postage is an estimate of postage that has been sold, but not yet used by customers. The Postal Service recognizes revenue over time as the Postal Service delivers mailpieces. Because payments for postage are collected in advance of the satisfaction of related performance obligations, the Postal Service defers and reports this unearned revenue as Deferred revenue-prepaid postage in its balance sheet. Stamp sales and metered postage account for the majority of Deferred revenue-prepaid postage. The liability also includes an estimate for mail that is in-transit within the Postal Service network.

The prepaid PO Box and Caller Service fees consist of the payments received from customers for PO Box fees at the beginning of their contracts. The Postal Service defers and reflects this unearned revenue as prepaid PO Box and Caller Service fees within Other current liabilities in the accompanying Balance Sheets. Revenue is recognized over time as customers use the PO Box and Caller Services over the terms of their contracts.

The following table presents the balances of the Postal Service’s contract liabilities, including Deferred revenue-prepaid postage and prepaid PO Box and Caller Service fees, as of March 31, 2020, and September 30, 2019, respectively:

**NOTE 5 - RELATED PARTIES**

As disclosed throughout this report, the Postal Service has significant transactions with other U.S. government entities, which are considered related parties for accounting purposes.

The following table presents related-party assets and liabilities as of March 31, 2020, and September 30, 2019:

<table>
<thead>

\(^1\) Included within Operating revenue in the accompanying unaudited Statements of Operations.
\(^2\) Included within Operating expenses in the accompanying unaudited Statements of Operations.
\(^3\) Represents interest imputed on the revenue forgone installment receivable as well as interest generated on U.S. Treasury instruments and other cash equivalents held with the Federal Reserve Bank of New York. Included within Interest and investment income in the accompanying unaudited Statements of Operations.
\(^4\) Incurred on debt issued to the FFB, and included within Interest expense in the accompanying unaudited Statements of Operations.

**NOTE 6 - CASH, CASH EQUIVALENCES AND RESTRICTED CASH**

The following table provides a reconciliation of Cash and cash equivalents and Restricted cash reported in the balance sheets as of March 31, 2020, and 2019, respectively, and as of September 30, 2019, and 2018, respectively (to disclose the opening balances), that sum to the totals of the same such amounts presented in the accompanying unaudited Statements of Cash Flows for the six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>March 31,</th>
<th>September 30,</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2020</td>
<td>2019</td>
</tr>
<tr>
<td>Cash and cash equivalents</td>
<td>$ 8,987</td>
<td>$ 8,108</td>
</tr>
<tr>
<td>Restricted cash</td>
<td>472</td>
<td>546</td>
</tr>
<tr>
<td>Total cash, cash equivalents and restricted cash</td>
<td>$ 9,459</td>
<td>$ 8,654</td>
</tr>
</tbody>
</table>

Restricted cash represents Postal Service cash that is not available for general use. This includes cash originated from forfeitures or seizures related to consumer fraud or other criminal activity related to the mail and either held for third-party beneficiaries or awaiting disposition. Restricted cash also includes funds for use in restricted activities such as congressional appropriation for Postal Service obligations to the PRC and the United States Postal Service Office of Inspector General, or that are otherwise restricted.

The Postal Service holds its Cash and cash equivalents and Restricted cash with the Federal Reserve Bank of New York and invests its excess cash, when available, in highly-liquid, short-term investments issued by the U.S. Department of the Treasury.

**NOTE 7 - PROPERTY AND EQUIPMENT, NET**

Assets within Property and equipment, net in the accompanying Balance Sheets are recorded at cost, which includes the interest on borrowings used to finance construction of major capital additions, less allowances for depreciation and amortization. Interest capitalized during both the three and six months ended March 31, 2020, and 2019, was not significant. Fixed assets are depreciated over estimated useful lives ranging from 3 to 40 years using the straight-line method.

The net book values of assets classified as held for sale were approximately $6 million and $10 million as of March 31, 2020, and September 30, 2019, respectively, and are included within Property and equipment, net in the accompanying Balance Sheets.

For the three months ended March 31, 2020, and 2019, depreciation and amortization expense was $423 million and $424 million respectively, and impairment charges were de minimis. For the six months ended March 31, 2020, and 2019, depreciation and amortization expense was $854 million and $841 million respectively, and impairment charges were de minimis. These items are included within Other operating expenses in the accompanying unaudited Statements of Operations.
NOTE 8 - COMMITMENTS AND CONTINGENCIES

Collective Bargaining Agreements
On January 22, 2020, the Postal Service reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in the Postal Service’s legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), which established the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.

In September 2019, the Postal Service agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The Postal Service and the NALC will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

Contingent Liabilities
The Postal Service’s contingent liabilities consist primarily of claims resulting from labor and employment matters; asset retirement obligations and environmental matters; property damage and injuries on Postal Service properties; and issues arising from Postal Service contracts, personal claims and traffic accidents. Each quarter, the Postal Service evaluates each claim to determine its potential liability. If the Postal Service determines that an unfavorable outcome from a new claim is both probable and reasonably estimable, it records a liability for the amount. Preexisting claims are also reviewed and adjusted quarterly for resolutions or revisions to prior estimates based on new facts and circumstances.

The Postal Service is from time to time involved in other litigation incidental to the conduct of its business, none of which is expected to be material to its financial condition or operations.

 Provision for Losses
The Postal Service has made adequate provision for probable losses arising from all claims. The following table presents contingent liabilities by current and noncurrent portions and by category, as of March 31, 2020, and September 30, 2019:

<table>
<thead>
<tr>
<th>(in millions)</th>
<th>March 31, 2020</th>

<td>$336</td>
</tr>
</tbody>
</table>

1 Included within Payables and accrued expenses in the accompanying Balance Sheets.
2 Included within Other noncurrent liabilities in the accompanying Balance Sheets.
Reasonably Possible Contingencies
The Postal Service does not accrue for contingencies which it deems reasonably possible of an unfavorable outcome. These ranged in amount from approximately $175 million to $1.0 billion at March 31, 2020, and from approximately $150 million to $1.0 billion at September 30, 2019.

Class Action Litigation
As previously reported, on January 14, 2010, the Equal Employment Opportunity Commission's (“EEOC”) Office of Federal Operations (“OFO”) certified the case McConnell v. Brennan (first instituted in 2006 as McConnell v. Potter) as a class action against the Postal Service, with the class consisting of permanent-rehabilitation and limited-duty Postal Service employees who the Postal Service assessed under the National Reassessment Process (“NRP”) between the dates of May 5, 2006, and July 1, 2011. The Postal Service utilized the NRP to ensure employees receiving workers' compensation benefits were placed in jobs consistent with their abilities, and that records regarding employees injured on the job were correct.

The McConnell case alleges violations of the Rehabilitation Act of 1973 resulting from the NRP's failure to provide a reasonable accommodation, the NRP's wrongful disclosure of medical information, the NRP's creation of a hostile work environment, and the NRP's adverse impact on disabled employees. The class is seeking injunctive relief and damages of an uncertain amount.

In 2015, the Administrative Judge assigned to handle the McConnell case granted in-part both the Class Agent's and the Postal Service's motions for summary judgment. In her decision, the Administrative Judge found that the NRP violated the Rehabilitation Act. The Postal Service appealed this decision to the OFO, and the OFO denied this appeal in 2018. The Postal Service implemented the OFO's order, and notified all class members of their right to file an individual claim for relief. Class members were allowed thirty days to submit claims to the Postal Service's National Equal Employment Opportunity Investigative Services Office. The claims submission deadline has now passed and the dispute process for individual claims is currently underway before a newly assigned EEOC Administrative Judge.

The class members have the right to pursue individual claims. Should they be successful in establishing liability and damages, the ultimate outcome in this case could have a material impact on the Postal Service's financial results.

Other
The U.S. is a member of the Universal Postal Union (“UPU”), a specialized agency of the United Nations that facilitates the exchange of international mail. The Postal Service is the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as “terminal dues”.

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow the Postal Service to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, the Postal Service officially invoked its provision to self-declare rates beginning in July 2020, creating an obligation to pay the UPU the amount of 40 million Swiss Francs (“CHF”), or approximately $41 million, based on the prevailing exchange rate on March 31, 2020. This amount will be payable over five years in annual increments of 8 million CHF, with the first payment due between July and December 2020.

The Postal Service considers the right to self-declare rates as an intangible asset recorded in Other assets in the accompanying unaudited Balance Sheet at March 31, 2020, and its amortization starts in July 2020 when the self-declared rates are in effect. The current portion of the obligation is recorded in Payables and accrued expenses and the noncurrent portion of the obligation is recorded in Other noncurrent liabilities in the accompanying unaudited Balance Sheet at March 31, 2020, respectively.
NOTE 9 - RETIREMENT PLANS

The majority of career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, which OPM administers. These plans provide retirement, death and disability benefits for eligible employees based on specific eligibility and participation requirements, vesting periods and benefit formulas. Each employee’s participation in either plan is based on the starting date of employment with the Postal Service or another U.S. government entity.

As government-sponsored benefit plans, CSRS and FERS are not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended. Likewise, because the Postal Service cannot direct the costs, benefits or funding requirements of these plans, it accounts for program expenses under multiemployer plan accounting rules. As such, the Postal Service records required contributions to the plans as an expense in the period in which each contribution is due. For FERS, the Postal Service contributes to the plan an amount established by OPM as the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service, which is considered the FERS normal cost. As further discussed below, the Postal Service is not required to pay the normal cost for those employees who participate in CSRS.

Career employees may also participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. The Postal Service’s TSP expenses relate only to its contributions for FERS employees who participate in the TSP.

CSRS provides a basic annuity plan benefit to employees hired before January 1, 1984. CSRS Offset provides Social Security benefits in addition to its basic annuity plan for employees hired between January 1, 1984, and January 1, 1987. CSRS and CSRS Offset employees may also participate in the TSP, although the Postal Service does not match contributions for these participants.

The PAEA suspended the Postal Service’s employer contributions to CSRS that would otherwise have been required under Title 5, Section 8334(a)(1) of the U.S. Code, although CSRS employees continue to contribute to the plan.

Effective January 1, 1987, FERS covers employees hired since December 31, 1983, and FERS employees are covered by an annuity, Social Security and TSP benefits. For FERS employees who participate in TSP, the Postal Service contributes 1% of basic pay and matches voluntary employee contributions up to an additional 4% of basic pay. The Postal Service recognizes Social Security and TSP expenses as they are incurred and records them within Compensation and benefits in the accompanying unaudited Statements of Operations. A liability is established for any contribution due and unpaid at the end of each reporting period and is included within Compensation and benefits in the accompanying Balance Sheets.

FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (“FERS-RAE”), or FERS - Further Revised Annuity Employees (“FERS-FRAE”) depending on whether their date of hire was before, during, or after calendar year 2013, respectively.

The following table presents the employee and employer contributions, as a percentage of employee basic pay, during the three and six months ended March 31, 2020, and 2019:

</tbody>
</table>

\(^1\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

\(^2\) Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

**FERS Normal Costs**

The Postal Service records expenses for FERS normal costs within *Retirement benefits* in the accompanying unaudited *Statements of Operations*.

The Postal Service makes payments for FERS normal costs in accordance with its bi-weekly payroll cycle. The employer contributions and employee withholdings not yet remitted to OPM were $209 million and $157 million at March 31, 2020, and September 30, 2019, respectively, and were recorded as a current liability within *Retirement benefits* in the accompanying *Balance Sheets*.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies the Postal Service regarding its revaluation of unfunded CSRS and FERS liabilities. OPM calculates these obligations using Postal Service-specific demographics data and government-wide economic assumptions. The Postal Service records these expenses as *Retirement benefits* in the accompanying unaudited *Statements of Operations*. These amounts may be significantly impacted by changes in actuarial assumptions used to revalue the unfunded liabilities.

In October 2019, OPM provided the Postal Service with an actuarial report indicating the projected annual amortization payments due September 30, 2020, would be $1.6 billion for the CSRS obligation and $1.1 billion for the FERS obligation.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. The Postal Service has estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, the Postal Service accrued additional CSRS and FERS amortization expenses during the three months ended March 31, 2020, to reflect the proportional adjustment between the original OPM estimate and the updated Postal Service estimate as a result of these changes. The Postal Service expects to receive invoices from OPM for the actual amounts due September 30, 2020, during the fourth quarter of 2020, and these invoices may differ from the estimated projections due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.
The amounts the Postal Service has accrued for CSRS and FERS unfunded retirement benefits but has not yet paid are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets. Those accrued but unpaid amounts were approximately $9.8 billion and $8.2 billion at March 31, 2020, and September 30, 2019, respectively.

NOTE 10 - HEALTH BENEFITS PLANS
FEHB Program covers nearly all career employees and also covers non-career employees and retirees who meet certain eligibility requirements. OPM administers FEHB and allocates the cost of funding the program to participating U.S. government employers. Separate from FEHB, the Postal Service offers its own healthcare plan to certain non-career employees who are ineligible for FEHB.

Active Employees
The Postal Service paid 71.9% of healthcare premium costs during both the three months ended March 31, 2020, and 2019. The Postal Service paid 72.0% and 72.3% of healthcare premium costs during the six months ended March 31, 2020, and 2019, respectively. Although OPM determines the actual FEHB premium costs, the allocation of these costs between the Postal Service and most of its employees is determined through agreements with Postal Service labor unions.

Postal Service employee health benefits expense (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Postal Service employee health benefits expense was approximately $1.3 billion for each of the three-month periods ended March 31, 2020, and 2019. Postal Service employee health benefits expense was approximately $2.6 billion for each of the six-month periods ended March 31, 2020, and 2019. These expenses are included within Compensation and benefits in the accompanying unaudited Statements of Operations.

Retirees
Postal Service retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits. The Postal Service is required to contribute to the PSRHBF an amount estimated to be equal to the employer portion of FEHB insurance premiums for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service (normal cost). The Postal Service is also required to contribute an amount sufficient to fully amortize the unfunded liability of the PSRHBF by 2056. These amounts are based, in part, on each current and prospective retiree’s length of federal civilian service occurring on or after July 1, 1971. Each participant’s share of premium costs is set by law and is not subject to negotiation with Postal Service labor unions. The Postal Service cannot direct the costs, benefits or funding requirements of the plans. Therefore, it accounts for program expenses using multiemployer plan accounting rules by recording contributions to the plans that will be required by OPM as an expense in the period in which the contributions are due.

The PAEA required the Postal Service to prefund retiree health benefits during years 2007 through 2016 by paying statutorily specified annual amounts ranging from $1.4 billion to $5.8 billion, totaling $54.8 billion, into the PSRHBF, which began paying the Postal Service’s share of retiree health benefit premiums in 2017. The Postal Service remains obligated to fund the $33.9 billion in statutorily required PSRHBF prefunding payments that it defaulted on for the years 2012 through 2016, as well as the normal cost and amortization payments of $10.7 billion and $2.6 billion, respectively, that it did not pay for the years 2017 through 2019. As of the date of this report, the Postal Service has not been assessed any penalties associated with these non-payments. The cumulative amount of statutorily specified, normal cost and amortization PSRHBF obligations the Postal Service has accrued is $49.7 billion as of March 31, 2020, inclusive of the $47.2 billion that was unpaid as of September 30, 2019. Given that OPM considers these amounts to be due and payable, the Postal Service reflects the cumulative unpaid amount as a current liability within Retiree health benefits in the accompanying Balance Sheets.

As required by PAEA, OPM annually performs an actuarial valuation for the purpose of developing a payment schedule for the Postal Service to fund the remaining unfunded PSRHBF obligation in annual payments through the year 2056. Based on preliminary calculations provided by OPM, the amortization payment due September 30, 2020, is estimated to be $900 million.
Furthermore, the Postal Service is obligated to pay the estimated normal cost of retiree health benefits attributable to the service of its employees during the most recent year. Based on preliminary calculations provided by OPM, the Postal Service has estimated the normal cost payment, also due by September 30, 2020, to be $4.0 billion.

The Postal Service expects to receive the invoice from OPM for with the actual amounts due during the fourth quarter of 2020 and these may differ from the original projected amounts due to changes in discount rates, actuarial assumptions and experience as of the calculation date.

The following table details retiree health benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>

</tbody>
</table>

1 Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

2 Expense for the accrual for the annual payment due to the PSRHBF by September 30 of the respective year, based on information provided by OPM, for the actuarially determined normal cost of retiree health benefits for current employees.

**NOTE 11 - WORKERS’ COMPENSATION**
Postal Service employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. The Postal Service reimburses DOL for all workers’ compensation benefits paid to or on behalf of Postal Service employees, plus an administrative fee.

**Workers’ Compensation Liability**
The Postal Service records a liability for its workers’ compensation obligations for employees who have been injured on the job and are eligible for benefits, or their qualified survivors. Both the current and noncurrent portions of the workers’ compensation liability are recorded in the accompanying Balance Sheets. The Postal Service uses an estimation model that utilizes four generally accepted actuarial valuation techniques based upon past claim-payment experience and exposure to claims as measured by total employee hours worked.

Changes in the liability are primarily attributable to the combined impacts of routine changes in actuarial assumptions, new compensation and medical cases, the progression of existing cases and changes in discount (interest) and inflation rates, including long-term COLA rates for compensation claims, and medical rates for medical claims. These rates are updated as of the balance sheet date and factored into the model.

To determine the fair value of the liability each quarter, the Postal Service first estimates the future total cost of workers’ compensation claims based on the dates of claim-related injuries, frequency or severity of the injuries, the pattern of historical payments to beneficiaries and the expected trend in future costs. The Postal Service then calculates the amount that would need to be invested at current discount (interest) rates to fully fund the future total cost of claims, and this calculated present value is the recorded value of the workers’ compensation liability.

This liability calculation is highly sensitive to changes in discount rates. For example, a 1% increase in the discount rate would decrease the March 31, 2020, liability and related expense by approximately $2.4 billion. Likewise, a 1% decrease in the discount rate would increase the March 31, 2020, liability and related expense by approximately $3.1 billion.
The following table details the applicable inflation and discount rates for compensation and medical claims used to estimate the workers’ compensation liability as of March 31, 2020, and September 30, 2019:

</table>

As of March 31, 2020, and September 30, 2019, the Postal Service’s total liability for workers’ compensation was approximately $20.0 billion and $18.5 billion, respectively. As of March 31, 2020, and September 30, 2019, the current portion of the liability was approximately $1.3 billion and $1.4 billion, respectively, and the noncurrent portion of the liability was approximately $18.7 billion and $17.1 billion, respectively, as reflected in the accompanying Balance Sheets.

**Workers’ Compensation Expense**

The impacts of changes in discount rates and inflation rates, as well as the actuarial valuation of new cases and revaluation of existing cases, are components of total workers’ compensation expense as recorded in the accompanying unaudited Statements of Operations. In addition, the Postal Service pays an administrative fee to DOL, which is considered a component of workers’ compensation expense.

The following table presents the components of workers’ compensation expense for the three and six months ended March 31, 2020, and 2019:

Transportation equipment leases apply primarily to vehicles, trailers, and aircraft. The non-cancellable base terms of these leases typically range from two to five years, and may include one or more options to renew for an additional one or two years. The lease terms for these arrangements generally range from two to five years including any renewal options the Postal Service is reasonably certain to exercise. Transportation equipment leases do not contain purchase options, however certain of these leases contain termination options. At the commencement of most transportation lease arrangements, the Postal Service is not reasonably certain if it will exercise such termination options. Certain transportation leases contain variable lease payments based on the volume of activity under the contract. The Postal Service records costs associated with transportation leases within Transportation in the accompanying unaudited Statements of Operations.

Postal Service leases do not contain any material residual value guarantees or restrictive covenants.

Sublease income was not material to the financial statements for the three and six months ended March 31, 2020.

Balances disclosed herein include those pertaining to certain related-party transactions. See Note 5 - Related Parties for additional information on related party transactions.

The table below reconciles the undiscounted cash flows for the first five years and the total remaining finance lease liabilities and operating lease liabilities recorded in the accompanying unaudited Balance Sheet as of March 31, 2020:

Capital leases, recorded at historical cost within Property and equipment, net in the accompanying Balance Sheets, were $496 million as of September 30, 2019. Total accumulated amortization related to capital leases was $377 million at September 30, 2019. Amortization expense for capital leases was approximately $33 million and $37 million for the years ended September 30, 2019, and 2018, respectively, and is included within the Other operating expense in the respective Statements of Operations.

Lease Accounting Policies

Lease Accounting Policy for Comparative Periods
As the lessee, the Postal Service classifies leases which have original lease terms greater than one year and that transfer substantially all the risks and rewards of ownership to the Postal Service, as capital leases. These leases are capitalized on the lease commencement date at the lower of the fair value of the leased assets or the present value of the minimum lease payments. The discount rate used to determine the present value is based on average U.S. Treasury rates. Property acquired under a capital lease is amortized over the lease term. Capital leases are included within Property and equipment, net in the accompanying Balance Sheets.

The Postal Service classifies all other lease arrangements in which substantially all risks and rewards of ownership are retained by the lessor as operating leases. Rent expense for operating leases is included in Other operating expenses in the accompanying unaudited Statements of Operations on a straight-line basis over the term of the lease.

Lease Accounting Policy for the Six Months Ended March 31, 2020
The Postal Service determines at the inception of the contract if an arrangement represents a lease or contains lease components. A contract is deemed to represent or include a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Postal Service is assumed to have the right to control the use of the underlying asset if the contract conveys the rights to obtain substantially all of the economic benefits of the underlying asset and the rights to direct how and for what purpose such asset is used during the contract term.

As the lessee, the Postal Service classifies all leases with original lease terms less than one year as short-term leases. The Postal Service classifies all other leases which transfer substantially all the risks and rewards of ownership to the Postal Service as finance leases. Finance lease right-of-use assets are included within Property and equipment, net in the accompanying Balance Sheets. The current and noncurrent portions of finance lease
liabilities are included within Payables and accrued expenses and Other noncurrent liabilities, respectively, within the accompanying Balance Sheets. The Postal Service classifies the remaining leases, not classified as short-term leases or finance leases, as operating leases. The Postal Service considers a lease term to include all non-cancelable periods and renewal periods when the Postal Service is reasonably certain that it will exercise the related renewal option.

For short-term leases, the Postal Service records lease expenses in the statement of operations on a straight-line basis over the lease term.

Leases that do not qualify as short-term are recorded in the balance sheet on the lease commencement date, each as a right-of-use asset and a lease liability.

Lease liabilities are initially measured at the net present value of the lease payments due after the commencement date. For this purpose, lease payments include fixed and in-substance fixed rental payments, variable lease payments that depend on an index or rate, and the price of options that the Postal Service is, at the commencement of the lease, reasonably certain to exercise. Lease liabilities are subsequently increased to reflect the interest accrued and reduced when lease payments are made by the Postal Service.

Right-of-use assets are initially measured at the net present value of the lease payments (including amounts due prior to or on the commencement date), adjusted for the impact of initial direct costs and lease incentives. For finance leases, right-of-use assets are subsequently amortized on a straight-line basis over the shorter of the useful life of the underlying asset or the lease term. For operating leases, right-of-use assets are amortized in such a way that the combination of the interest expense accrued on the lease liability and the asset amortization results in a straight-line expense over the lease term.

Right-of-use assets for operating and finance leases are periodically reviewed for impairment losses, following the same process as for other long-lived assets. Impairment losses on long-lived assets are recorded when events or circumstances indicate that an asset's fair value is less than its carrying value. When such a determination is made, the carrying values of the assets are written down to fair value. The Postal Service uses the long-lived assets impairment guidance in ASC Subtopic 360-10, Property, Plant, and Equipment - Overall, to determine whether a right-of-use asset is impaired, and if so, the amount of the impairment loss to recognize. No impairment losses have been recognized to date.

The discount rates used in net present value calculations are determined based on the Postal Service's incremental borrowing rates on debt outstanding with the FFB at the beginning of each year, which is approximated as the daily U.S. Treasury Yield Curve Rates for the five-year, 10-year, 20-year and 30-year periods, plus a 12.5 basis point spread.

Variable lease payments, except for those based on an index or rate, are recognized as variable lease expenses in the period in which the obligation for those payments are incurred.

**NOTE 13 - FAIR VALUE MEASUREMENT**

The Postal Service defines fair value as the price that would be received upon sale of an asset or the price that would be paid to transfer a liability between unrelated parties.

The carrying amounts of certain current assets and liabilities, including cash, accounts receivable, accounts payable and accrued expenses, approximate fair value due to their short-term nature. Assets within Property and equipment, net are recorded at cost and measured at fair value on a nonrecurring basis if they are determined to be impaired or classified as assets held for sale.

Noncurrent receivables and long-term debt are measured using a fair value hierarchy model. This model prioritizes observable and unobservable inputs used to measure fair value, and consists of three broad levels, as defined in authoritative literature.
For the three and six months ended March 31, 2020, no significant transfers between Level 1 and Level 2 assets or liabilities transpired. The carrying amount and fair value of the revenue forgone installment receivable and long-term debt are presented for disclosure purposes only in the following table:

<table>
<thead>
<tr>
<th></th>
<th>March 31, 2020</th>
<th></th>
<th>September 30, 2019</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Carrying Amount</td>
<td>Fair Value</td>
<td>Carrying Amount</td>
<td>Fair Value</td>
</tr>
<tr>
<td>Revenue forgone installment receivable*</td>
<td>$476</td>
<td>$584</td>
<td>$466</td>
<td>$516</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>$11,000</td>
<td>$11,936</td>
<td>$11,000</td>
<td>$11,437</td>
</tr>
</tbody>
</table>

*The carrying amount is included within Other assets (which includes items in addition to the revenue forgone installment receivable) in the accompanying Balance Sheets.

The revenue forgone installment receivable qualifies as a financial instrument in accordance with authoritative literature. To calculate its fair value, the Postal Service recognizes the imputed interest it is owed as interest income and estimates the value of this receivable using the interest method, which converts future cash flows to a single discounted amount using interest rates for similar assets, which are considered Level 2 inputs. The Postal Service then calculates the net present value of anticipated annual installment payments to be received, discounted by the 20-year U.S. Treasury Constant Maturity Rate, which was 1.15% and 1.94% as of March 31, 2020, and September 30, 2019, respectively.

The long-term debt also qualifies as a financial instrument. Because no active market exists for its debt with the FFB, the Postal Service estimates the fair value of the long-term debt by imputing future payments at discount rates provided by the FFB, considered Level 3 inputs. The weighted averages of the FFB discount rates, based on U.S. Treasury Yield Curve Rates, were 0.36% and 1.79% as of March 31, 2020, and September 30, 2019, respectively.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report describe the principal factors affecting the financial results, liquidity, capital resources and critical accounting estimates of the United States Postal Service (“Postal Service,” “USPS,” “we,” “our” and “us”). Our results of operations may be impacted by risks and uncertainties discussed here and in our Annual Report on Form 10-K for the year ended September 30, 2019, (“Annual Report”) filed with the Postal Regulatory Commission (“PRC”) on November 14, 2019. Such factors, many of which we cannot control or influence, may cause actual results to differ materially from those currently contemplated.

Our operating results for the three and six months ended March 31, 2020, are presented in accordance with accounting principles generally accepted in the United States (“GAAP”). These results are not necessarily indicative of the results to be expected for the year ended September 30, 2020, and should be read in conjunction with our Annual Report. All references to years in this report, unless otherwise stated, refer to fiscal years beginning October 1 and ending September 30. All references to quarters, unless otherwise stated, refer to quarters within fiscal years 2020 and 2019.

Forward-looking statements contained in this report represent our best estimates of known and anticipated trends believed relevant to future operations. However, actual results may differ significantly from current estimates. Certain forward-looking statements included in this report use such words as “may,” “will,” “could,” “expect,” “believe,” “plan,” “estimate,” “project” or other similar terminology. These forward-looking statements, which involve a number of risks and uncertainties, reflect current expectations regarding future events and operating performance as of the date of this report. These risks include, but are not limited to, the effects of the novel strain of coronavirus (“COVID-19”) on our business, financial condition and results of operations. We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
OVERVIEW

With our mandate to provide universal postal services to the nation, we serve retail and commercial customers in the U.S., as well as internationally. Our operations include an extensive and integrated retail, processing, distribution, transportation and delivery network, and we operate throughout the U.S., its possessions and territories. We operate as a single segment and report our performance as such.

The Postal Accountability and Enhancement Act ("PAEA") classifies our products into two broad categories: Market-Dominant and Competitive "products," however, we use the term "services" in this document for consistency with other descriptions of services offered. The statutes under which we operate also establish certain requirements that affect our financial results, including obligations for retirement benefits within the Civil Service Retirement System ("CSRS") and the Federal Employee Retirement System ("FERS"), and obligations for retiree health benefits including funding of the Postal Service Retiree Health Benefits Fund ("PSRHBF"). We must coordinate with the U.S. Office of Personnel Management ("OPM") to address these obligations.

We have successfully implemented initiatives that have reduced the growth in certain costs by billions of dollars while offering new features for customers such as Informed Delivery. However, legal restrictions on pricing, service diversification and operations restrict our ability to cover our costs to provide prompt, reliable and efficient postal services to the nation.

We have established a core set of goals that drive our strategic initiatives and continuous improvement efforts:

1. Deliver a world-class customer experience;
2. Equip, empower and engage employees;
3. Innovate faster to deliver value; and
4. Invest in our future platforms.

As part of these efforts, we aim to achieve long-term financial stability. Our focus on maintaining liquidity and reducing operating expenses reflects current trends, as well as projected future volume of mail and packages. We believe that financial stability is within reach with targeted legislative and regulatory reform to address our overall cost structure and enhance our revenue-generating opportunities as we continue to identify and create innovative and affordable services, and deliver high levels of performance and service. Such financial stability would continue to provide Congress and the executive branch with additional time to address the broader issues regarding our overall cost structure and revenue-generating opportunities.

RESULTS OF OPERATIONS

SUMMARY

The major factors that impact our operating results include overall customer demand, the mix of postal services and contribution associated with those services, volume of mail and packages processed through our network and our ability to manage our cost structure in line with declining levels of mail volume, increased competition in the more labor-intensive Shipping and Packages business and an increasing number of delivery points.

Effects of COVID-19
In March 2020, the World Health Organization ("WHO") declared COVID-19 a global pandemic, which has since spread throughout the U.S. Changing federal, state and local government actions to address the pandemic have been occurring on a daily basis, and government-imposed shelter-in-place and other movement restrictions designed to slow the pace of the outbreak have severely impacted the U.S. economy. We believe the severity and duration of the COVID-19 pandemic is uncertain, and such uncertainty may continue during the second half of 2020.

Our employees provide an essential public service and bind the nation together as a part of the country's critical infrastructure. At least six days per week, and in some instances seven, our employees accept, process, transport, and deliver vital mail and packages like medicine, essential consumer staples, benefits checks, and important information, in every community, to every home and business, and we will continue to do so. As Americans are urged to stay home, the importance of the mail will only grow as our customers, including those in rural areas and senior citizens, will need access to vital communications, essential packages and other necessities.
Shortly after the WHO declaration, we created a dedicated COVID-19 response team to lead our response efforts. All of our employees are considered essential, and their safety is our highest priority. Following strategies recommended by the Centers for Disease Control and Prevention, we have implemented enhanced safety measures to protect the health of our employees.

While we have maintained full operations during the pandemic, travel and logistics restrictions have negatively affected our retail and commercial customers, as well as our suppliers and mail service providers. Many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our mail volumes began to decline significantly in March 2020. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Although the COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes, we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. While the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy. Furthermore, this anticipated economic weakness has resulted in significant interest rate declines, which have caused an increase in certain of our workers’ compensation and retirement benefits expenses.

On March 27, 2020, the President signed the Coronavirus Aid, Relief, and Economic Security Act, enacted as Public Law 116-136 (the “CARES Act”). Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limit on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However, we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, unless we default on additional obligations.

In late March 2020, we restricted business travel and implemented remote work arrangements for certain of our office-based employees. We have also implemented new leave policies for employees who may be affected by illness, quarantines or childcare obligations. These arrangements have not materially affected our ability to maintain our business operations, including the operation of financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

Three Months Ended March 31, 2020

As more fully described below in Operating Revenue and Volume, our operating revenue for the three months ended March 31, 2020, increased $349 million, or 2.0%, compared to the same period last year. The increase in operating revenue was due to the following:

- Shipping and Packages revenue increase of $351 million, or 6.5%, with a volume growth of 16 million pieces, or 1.1%, driven largely by the January 2020 price increases applicable to certain Competitive services and the temporary surge in e-commerce resulting from the COVID-19 pandemic; and
- First-Class Mail revenue increase of $109 million, or 1.7%, despite a volume decline of 63 million pieces, or 0.4%. Revenue growth was the result of the January 2020 price increases applicable to certain First-Class Mail services.
The above increases in operating revenue were partially offset by a decrease in *Marketing Mail* revenue of $94 million, or 2.5%, with a volume decline of 605 million pieces, or 3.4%, largely the result of the COVID-19 pandemic, as many of our commercial customers, especially those with consumer-facing businesses, began to suspend their operations or operate at a lower capacity in March 2020. Political and election mail revenue and volumes increased by approximately $100 million and 50 million pieces, respectively, compared to the same period last year, resulting from the impact of the 2020 primary and general elections.

As more fully described below in *Operating Expenses*, our operating expenses for the three months ended March 31, 2020, increased approximately $2.8 billion, or 14.2%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers' compensation expense increase of approximately $2.2 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $348 million, or 23.7%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $124 million, or 5.3%, due to spending increases in various categories including enhancements to cyber security and information technology;
- Compensation and benefits expense increase of $119 million, or 1.0%, due primarily to contractual wage increases.

The above increases were partially offset by a decrease in retiree health benefits expense of $50 million, or 3.9%, primarily due to the impact of discount rates in effect during October 2019 that were used in OPM’s preliminary annual estimates.

Overall, we reported a net loss of approximately $4.5 billion for the three months ended March 31, 2020, compared to a net loss of approximately $2.1 billion for the same period last year.

**Six Months Ended March 31, 2020**

As more fully described below in *Operating Revenue and Volume*, our operating revenue for the six months ended March 31, 2020, decreased $11 million, which was essentially flat, compared to the same period last year.

The decrease in operating revenue was largely due to the following:

- *Marketing Mail* revenue decrease of $347 million, or 4.1%, with a volume decline of approximately 2.3 billion pieces, or 5.9%, driven by decreases in revenue and volume from political and election mail in the first quarter. Political and election mail revenue and volumes decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019. Furthermore, volume declined due to the COVID-19 pandemic in the second quarter, as the pandemic affected many of our commercial customers;
- *First-Class Mail* revenue decrease of $59 million, or 0.5%, with a volume decline of 634 million pieces, or 2.2%, reflecting the continuing migration from mail to electronic communication and transaction alternatives; and
- *Periodicals* revenue decrease of $57 million, or 9.4%, with a volume decline of 231 million pieces, or 9.8%, driven by the continuing migration to electronic communication and digital advertising.
The decrease in operating revenue was partially offset by an increase in Shipping and Packages revenue of $497 million, or 4.2%, despite a volume decline of 68 million pieces, or 2.1%, as we continued to see revenue growth in this service category during the six-month period driven largely by the January 2020 price increases applicable to certain Competitive services.

As more fully described below in Operating Expenses, our operating expenses for the six months ended March 31, 2020, increased approximately $1.6 billion, or 4.0%, compared to the same period last year. The increase in operating expenses was primarily due to the following:

- Workers' compensation expense increase of approximately $1.1 billion, primarily due to declines in discount rates, outside of management’s control, as the COVID-19 pandemic weighed on the U.S. economy;
- Retirement benefits expense increase of $477 million, or 16.1%, due to revised actuarial assumptions for CSRS and FERS unfunded retirement benefits amortization, which are outside of management’s control, and to increased contribution rates for FERS normal costs, compared to the same period last year;
- Other operating expenses increase of $122 million, or 2.5%, due to spending increases in various categories including enhancements to cyber security and information technology; and
- Transportation expenses increase of $63 million, or 1.5%, primarily resulting from higher air transportation costs, but partially offset by lower international transportation costs. The increase in highway transportation costs was driven by a one-time adjustment for our adoption of Accounting Standards Update 2016-02 Leases, which has since been codified in Accounting Standards Codification (“ASC”) 842, Leases (“ASC 842”), but partially offset by a decrease in the number of miles driven and lower average diesel fuel prices. The decrease in international transportation costs was driven by lower International Mail volumes.

The above increases in operating expenses were partially offset by the following decreases in operating expenses:

- Retiree health benefits expense decrease of $100 million, or 3.9%, primarily due to the impact of discount rate changes in effect during October 2019 that were used in OPM’s preliminary annual estimates; and
- Compensation and benefits expense decrease of $71 million, or 0.3%, primarily due to management’s efforts to align work hours with volume workloads, but partially offset from increases due to contractual wage adjustments.

Overall, we reported a net loss of approximately $5.3 billion for the six months ended March 31, 2020, compared to a net loss of approximately $3.6 billion for the same period last year.

Non-GAAP Controllable Loss
In the day-to-day operation of our business, we focus on costs that can be managed in the course of normal business operations, such as salaries and transportation. We calculate controllable loss, a non-GAAP measure, by excluding items over which we have no control, such as PSRHB actuarial revaluation and amortization expenses, workers’ compensation expenses caused by actuarial revaluation and discount rate changes, and retirement expenses caused by actuarial revaluation. Controllable loss should not be considered a substitute for net loss and other GAAP reporting measures.
The following table reconciles our GAAP net loss to controllable loss for the three and six months ended March 31, 2020, and 2019:

<table>

<sup>1</sup> Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, as calculated by OPM, to amortize the unfunded PSRHBF retirement health benefit obligation. Payments are to be made through 2056 based on OPM invoices.

<sup>2</sup> Net amounts include changes in assumptions, valuation of new claims and revaluation of existing claims, less current year claim payments.

<sup>3</sup> Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded CSRS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made through 2043 based on OPM invoices.

<sup>4</sup> Expense for the accrual for the annual payment due to OPM by September 30 of the respective fiscal year, to amortize the unfunded FERS retirement obligation. The 2020 amounts are based on updated Postal Service estimates resulting from revised actuarial assumptions. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our controllable loss decreased $14 million for the three months ended March 31, 2020, compared to the same period last year. This decrease was largely driven by the $349 million increase in operating revenue, offset by higher other operating expenses of $124 million, higher compensation and benefits expenses of $119 million, and higher FERS normal costs of $75 million.

Our controllable loss increased $270 million for the six months ended March 31, 2020, compared to the same period last year. This increase was largely driven by higher FERS normal costs of $134 million and higher transportation expenses of $63 million, partially offset by lower compensation and benefits expenses of $71 million.

These items are discussed in greater detail in Operating Revenue and Volume and Operating Expenses below.

**OPERATING REVENUE AND VOLUME**

The combined categories of First-Class Mail and Marketing Mail continued to provide the majority of our revenue, despite long-term trends away from traditional paper communication and correspondence to electronic media. Although this migration to electronic media has resulted in significant volume declines in First-Class Mail over the last decade, Marketing Mail volume remained relatively steady between 2009 and 2016. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail resumed its volume decline through the remainder of 2019 and the first half of 2020.
The following table summarizes our operating revenue and volume for the three and six months ended March 31, 2020, and 2019, by each service category:

1 Excludes First-Class Package Service - Retail and First-Class Package Service - Commercial.
2 Excludes Marketing Mail Parcels.
3 Includes Priority Mail, USPS Retail Ground, Parcel Select Mail, Parcel Return Service Mail, Marketing Mail Parcels, Package Service Mail, First-Class Package Service - Retail, First-Class Package Service - Commercial and Priority Mail Express.
4 Revenue includes PO Box services, Certified Mail, Return Receipts, Insurance, Other Ancillary Services, Shipping and Mailing Supplies, Collect on Delivery, Registered Mail, Stamped Envelopes and Cards, Money Orders and Other services.
5 Volume includes Postal Service internal mail and free mail provided to certain congressionally mandated groups.

For the three months ended March 31, 2020, First-Class Mail generated approximately 36% of operating revenue, which was essentially unchanged compared to the same period last year, and approximately 42% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 21% of operating revenue and 50% of our volume, both 1% decreases from the same period last year.

For the six months ended March 31, 2020, First-Class Mail generated approximately 35% of operating revenue, which is essentially unchanged compared to the same period last year, and approximately 40% of our volume, a 1% increase compared to the same period last year. Marketing Mail generated approximately 22% of operating revenue and 52% of our volume, both 1% decreases from the same period last year.

We continued to experience positive revenue results in our Shipping and Packages category, and it represented approximately 32% of our revenue for the three months ended March 31, 2020, which was a 1% increase from the same period last year, and approximately 33% of our revenue for the six months ended March 31, 2020, a 1% increase from the same period last year. Shipping and Packages generated approximately 4% of our volume for both the three and six months ended March 31, 2020, which was relatively unchanged compared to the same period last year.

Although revenue and volume are closely linked to the strength of the U.S. economy and changes in how our customers use the mail, we have proactively targeted opportunities to grow our business. We continue to focus on our customers’ needs and have increased our investment in mail and package innovation. However, we also
recognize that revenue growth is constrained by laws and regulations restricting the types of products, services and pricing we may offer to our customers and the speed with which we can bring new products to market.

We anticipate that First-Class Mail will continue to lose volume in future years with the migration to electronic communication and transactional alternatives resulting from technological changes. Furthermore, due to the COVID-19 pandemic our First-Class Mail volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. To address the long-term trend that such changes have had on our First-Class Mail revenue and volume, we have been working with the mailing industry to slow the decline through mailing promotions and leveraging the high open-and-read rates of, for example, bills and statements for additional customer engagement and education.

We have also focused on providing new services and innovating with Marketing Mail. We have expanded service offerings such as Informed Delivery, which enables customers to preview mail and manage packages scheduled to arrive as a means of merging digital and physical mail, as well as allowing mailers to launch interactive digital campaigns. Additionally, we are focusing on opportunities to pilot new products and innovate with customers and the mail industry to enhance the value of hard-copy communication. We believe these service offerings will further improve the value of both First-Class Mail and Marketing Mail.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. We continue to focus on responding to customers’ needs by implementing solutions and maintaining strategic business partnerships that help us capitalize on the growing e-commerce business.

However, our Shipping and Packages category is subject to intense competition which significantly impacts both revenue and volume. Certain major customers continue to divert volume from our network by in-sourcing the last-mile delivery into their own networks. These customers are also aggressively pricing their products and services in order to fill their networks and grow package density.

The COVID-19 pandemic has caused a recent surge in the nation’s use of e-commerce, resulting in higher Shipping and Packages volumes. However we do not expect the resulting increases in Shipping and Packages revenues to be sustainable or to offset losses in mail service revenue caused by COVID-19. Although the future is uncertain, we believe that the nation’s increased use of e-commerce is likely to plateau in the short term as the effects of the pandemic begin to subside, followed by a longer-term regression of e-commerce caused by a weakened U.S. economy.

We implemented price increases for certain Market-Dominant and Competitive services in January 2019 and 2020. Additionally, we implemented dimensional weighting provisions that amount to price increases for certain Shipping and Packages subcategories in June 2019.

First-Class Mail
First-Class Mail, presented in this report as a mail class and a Market-Dominant service category, includes cards, letters and flats. Prices of First-Class Mail, our most profitable service category, are the same regardless the geographic distance between the origination and delivery points. Because First-Class Mail is classified by law as Market-Dominant, price increases are currently generally subject to a price cap based on the Consumer Price Index for All Urban Consumers ("CPI-U").

For the three months ended March 31, 2020, First-Class Mail revenue increased $109 million, or 1.7%, despite a volume decline of 63 million pieces, or 0.4%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Mail revenue decreased $59 million, or 0.5%, and volume declined 634 million pieces, or 2.2%, compared to the same period last year. The most significant factor contributing to the declining trend in First-Class Mail volume was the continuing migration from mail to electronic communication and transaction alternatives. The increase in revenue and decline in volume for the three months ended March 31, 2020, as well as revenue declining at a slower rate than volume for the six months ended March 31, 2020, are due to the January 2020 price increase applicable to Market-Dominant services.
Due to the COVID-19 pandemic, our First-Class Mail volume began to decline significantly in late March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on First-Class Mail revenue and volume.

Marketing Mail
USPS Marketing Mail (more commonly, Marketing Mail), presented as a mail class and a Market-Dominant service category, generally consists of advertising, newsletters, catalogs, small marketing parcels and other printed matter not required to be processed and delivered as First-Class Mail or Periodicals.

Between 2009 and 2016, Marketing Mail experienced relatively flat volume. However, Marketing Mail volume began to decline at a greater rate beginning in 2017 and continued to decline through the first half of 2018. Aside from a volume rebound between the second half of 2018 through the first quarter of 2019 that was driven by increases in political and election mail associated with the 2018 mid-term elections, Marketing Mail continued its volume decline through the remainder of 2019 and the first half of 2020, exacerbated by the COVID-19 pandemic.

For the three months ended March 31, 2020, Marketing Mail revenue decreased $94 million, or 2.5%, and volume declined 605 million pieces, or 3.4%, compared to the same period last year. For the six months ended March 31, 2020, Marketing Mail revenue decreased $347 million, or 4.1%, and volume declined approximately 2.3 billion pieces, or 5.9%, compared to the same period last year. For the three months ended March 31, 2020, our revenue and volume from political and election mail increased by approximately $100 million and 500 million pieces, respectively, compared to the same period last year, as we began to benefit from the impact of the 2020 elections during the second quarter of 2020. For the six months ended March 31, 2020, our revenue and volume from political and election mail decreased by approximately $140 million and 900 million pieces, respectively, compared to the same period last year, which benefited from the impact of the 2018 mid-term elections during the first quarter of 2019.

Due to the COVID-19 pandemic, many of our commercial customers, especially those with consumer-facing businesses, have been required to suspend their operations or operate at a lower capacity. As a result, our Marketing Mail volume began to decline significantly in March 2020, and it may never fully recover to levels prior to the pandemic. A protracted loss in customer demand for our services will continue to have a material effect on our Marketing Mail revenue and volume.

Marketing Mail is subject to intense competition, and price increases are currently generally capped at the rate of inflation. Marketing Mail volume is somewhat reflective of the cyclical nature of the U.S. economy, although targeted advertising campaigns can stimulate demand for this service, and our customers have used Marketing Mail to mail to more targeted prospects.
**Shipping and Packages**

The following table summarizes our operating revenue and volume for Shipping and Packages for the three and six months ended March 31, 2020, and 2019, by each service subcategory:

</table>

¹ Includes Priority Mail, a 1-3 business day delivery service; Priority Mail Express, an overnight delivery service available 365 days per year; and USPS Retail Ground, a retail-only Competitive service priced identically and functionally equivalent to Priority Mail for Zones 1-4.

² Includes Parcel Select, Parcel Return, and Marketing Mail Parcels.

³ Includes First-Class Package Services - Retail and First-Class Package Services - Commercial.

Our Shipping and Packages category has historically experienced revenue and volume growth as a result of our successful efforts to compete in shipping services, including last-mile e-commerce fulfillment markets and Sunday delivery as well as end-to-end markets. However, this service category is subject to intense competition which significantly impacts both our revenue and volume. Shipping and Packages revenue and volume are historically greatest in the first quarter of the year due to the holiday shipping season.

For the three months ended March 31, 2020, Shipping and Packages revenue increased 6.5%, with a volume growth of 1.1%, compared to the same period last year. The volume increased due to a temporary surge in e-commerce resulting from the COVID-19 pandemic, and revenue outpaced volume increases due to the January 2020 price increases associated with certain Competitive services.

For the six months ended March 31, 2020, Shipping and Packages revenue increased 4.2%, despite a volume decline of 2.1%, compared to the same period last year. The revenue increases were largely due to the January 2020 price increases associated with certain Competitive services. The volume declines largely resulted from intense competition and certain major commercial customers and competitors delivering more of their own packages, compared to the same period last year, offset by the temporary surge in e-commerce resulting from the COVID-19 pandemic.

**Priority Mail Services**

Priority Mail Services is our Shipping and Packages subcategory that includes Priority Mail, Priority Mail Express and USPS Retail Ground. Priority Mail and Priority Mail Express services allow customers the ability to send documents and packages requiring expedited transportation and handling. While Priority Mail Services revenue has historically grown year-over-year, its service offerings are price sensitive and its growth rate has been lower than other Shipping and Packages subcategories due to intense competition.

Priority Mail Services accounted for our largest portion of Shipping and Packages revenue, representing approximately 45% of the total for the three and six months ended March 31, 2020, compared to approximately 46% for the same period last year. However, Priority Mail Services accounted for approximately 18% of the total Shipping
and Packages volume for both the three months ended March 31, 2020, a 1% decrease from the same period last year, and approximately 18% of the total Shipping and Packages volume for the six months ended March 31, 2020, essentially unchanged from the same period last year.

For the three months ended March 31, 2020, Priority Mail Services revenue grew 3.7%, despite a volume decline of 1.1%, compared to the same period last year. For the six months ended March 31, 2020, Priority Mail Services revenue grew 1.9%, despite a volume decline of 3.5%, compared to the same period last year. Revenue grew despite the volume declines for the periods due to the January 2020 price increases applicable to Competitive services.

**Parcel Services**

Our Parcel Services subcategory includes Competitive services Parcel Select and Parcel Return, as well as Market-Dominant USPS Marketing Mail Parcels (more commonly, Marketing Mail Parcels). Parcel Select and Parcel Return services largely consist of last-mile deliveries, offered to large bulk shippers that perform their own sorting before dropping parcels deeper into our network.

For the three months ended March 31, 2020, revenue from Parcel Services increased 9.0%, on volume growth of 2.7%, compared to the same period last year. For the six months ended March 31, 2020, revenue from Parcel Services increased 6.0%, despite a volume decline of 1.0%, compared to the same period last year. This subcategory is primarily a last-mile service that bypasses much of our infrastructure and therefore is one of our lowest-priced package services, and as a result, produces a lower contribution per piece when compared to many of our other services. For the six months ended March 31, 2020, volume declined due to certain major commercial customers delivering more of their own packages. However, for the three months ended March 31, 2020, volume increased due to the temporary surge in e-commerce from the COVID-19 pandemic. Revenue grew at a greater rate than volume for the three months ended March 31, 2020, and despite the volume decline for the six months ended March 31, 2020, largely due to the January 2020 price increases applicable to Competitive services.

**First-Class Package Services**

Our First-Class Package Services subcategory includes the competitively priced First-Class Package Service - Retail, a Competitive service targeted to retail customers for packages weighing up to 13 ounces, and First-Class Package Service - Commercial, a Competitive service targeted to commercial customers for packages weighing up to 16 ounces. This subcategory offers commercial customers that ship primarily lightweight fulfillment parcels the lowest-priced expedited end-to-end tracked package option in the marketplace. First-Class Package Services revenue and volume performance has historically experienced strong increases for the past several years, particularly from our commercial customers. These increases are primarily attributable to growth in e-commerce.

For the three months ended March 31, 2020, First-Class Package Services revenue increased 10.8%, on volume growth of 4.1%, compared to the same period last year. For the six months ended March 31, 2020, First-Class Package Services revenue increased 8.3%, on volume growth of 0.4%, compared to the same period last year. Revenue grew greater than volume largely due to the January 2020 price increases applicable to Competitive services.

**Package Services**

Our Package Services subcategory is a Market-Dominant service that includes both Bound Printed Matter for materials up to 15 pounds and Library and Media Mail for materials up to 70 pounds. For the three months ended March 31, 2020, Package Services revenue decreased 2.4% on a volume decline of 8.8%, compared to the same period last year. For the six months ended March 31, 2020, Package Services revenue decreased 4.0% on a volume decline of 9.9%, compared to the same period last year. Revenue declined at a slower rate than volume for the three and six months ended March 31, 2020, due to the January 2020 price increase applicable to Market-Dominant services.

**International Mail**

Our International Mail category includes several services that enable customers, both domestic and abroad, to send international mail, including postcards, envelopes, flats and packages with either standard or express delivery options. “Outbound” services, which allow customers in the U.S. to send mail and packages to other countries, generate approximately two thirds of International Mail revenue, but “inbound” services are the opposite, generating
two thirds of volume but only a third of the revenue. This is primarily due to the smaller size and lower rates for inbound international e-commerce packages.

For the three months ended March 31, 2020, International Mail revenue increased 3.2%, despite a volume decline of 9.8%, compared to the same period last year. For the six months ended March 31, 2020, International Mail revenue increased 0.8%, despite a volume decline of 8.5%, compared to the same period last year. These revenue increases were largely due to the January 2020 price increases applicable to Competitive services. The declines in both inbound and outbound volume were due to various competitive pricing, political and economic factors.

The U.S. is a member of the Universal Postal Union (“UPU”), a specialized agency of the United Nations that facilitates the exchange of international mail. We are the designated postal operator for the U.S. under the UPU, and payments to the designated postal operator for the delivery of foreign origin letter-post mails are known as “terminal dues”.

In September 2019, the UPU members had a special meeting -- known as the Extraordinary Congress -- to discuss the terminal dues system. During that meeting, UPU members agreed to establish a new remuneration system that will allow us to self-declare rates beginning in July 2020. Other foreign postal operators may also reciprocally apply rates at full-self-declared rates at that time.

In February 2020, we officially invoked its provision to self-declare rates beginning in July 2020.

**Periodicals**

*Periodicals*, also presented as a mail class and a Market-Dominant service category, includes services designed for publishers of newspapers, magazines and other periodical publications whose primary purpose is providing publications to subscribers or other users. For the three months ended March 31, 2020, *Periodicals* revenue decreased 10.7% and volume declined 12.2%, compared to the same period last year. For the six months ended March 31, 2020, *Periodicals* revenue decreased 9.4% and volume declined 9.8%, compared to the same period last year.

*Periodicals* revenue and volume have been in decline for more than a decade as trends in hard-copy reading behavior and shifts of advertising away from print have eroded this business. The *Periodicals* category is not expected to rebound as electronic content continues to grow in popularity with the public.

**Other**

Other services include ancillary services such as *Certified Mail*, PO Box services, and *Return Receipt* services. Also included in this category are money orders and passport services. Other services revenue decreased 0.4%, and 2.8% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**OPERATING EXPENSES**

In an effort to align our resources with anticipated future mail and package volume, we continue to aggressively manage operating expenditures under management's control.

We originally designed our mail processing and distribution network to provide overnight delivery service of *First-Class Mail* within specified delivery areas for a much higher volume of mail than we are required to process and deliver today, and the network's legacy capabilities are not completely aligned to today's mail mix and volumes. Consequently, certain of our processing and distribution facilities continue to operate at less than full capacity. Our challenge to contain costs is also compounded by the increasing number of delivery points, which, when combined with lower mail volume, has resulted in a drop in the average number of pieces delivered per delivery point per day from approximately 5.5 pieces in 2007 to 3.4 pieces in 2019, a reduction of approximately 39%.

**Compensation and Benefits**

Compensation and benefits is our largest operating expense category. These expenses consist of costs related to our active career and non-career employees other than retirement costs associated with U.S. government defined benefit pension programs and retiree health costs which are further discussed in *Retirement benefits* and *Retiree Health Benefits*, respectively.
Overall, our compensation and benefits expenses increased 1.0% for the three months ended March 31, 2020, but decreased 0.3% for the six months ended March 31, 2020, compared to the same periods last year. The following table presents compensation and benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>

</tr>
</tbody>
</table>

Compensation expense increased 0.6% for the three months ended March 31, 2020, but decreased 0.5% for six months ended March 31, 2020, compared to the same periods last year. The activity in both periods represents increases due to contractual wage adjustments and approximately 3.6 million hours attributable to the extra work day due to the leap year, offset by management’s efforts to align work hours with volume workloads.

Work Hours
For the three months ended March 31, 2020, total work hours were approximately 286 million, essentially unchanged compared to the same period last year. However, approximately 3.6 million hours, or 1.3%, were attributable to the extra work day due to the leap year in 2020. Were it not for the extra work day due to the leap year, work hours would have declined for the period.

For the six months ended March 31, 2020, total work hours were approximately 592 million, a decrease of 1.0%, compared to approximately 598 million total work hours for the six months ended March 31, 2019. This decrease was the result of management’s efforts to reduce work hours in line with volume workloads.

As a result of the COVID-19 pandemic, work hours began to decline in late March 2020 due to lower mail volumes and workforce availability, and we expect this trend to continue for the duration of the pandemic.

Workforce Composition
The number of career employees at March 31, 2020, was approximately 496,000, a decrease of approximately 1,500 employees, or 0.3%, compared to the same date a year ago. This decrease primarily reflected natural attrition, continued efforts to align our workforce with declining mail volume, offset by conversions of non-career employees to career status, in accordance with our contractual agreements.

The number of non-career employees at March 31, 2020, was approximately 129,500, a decrease of approximately 10,500 employees, or 7.5%, compared to the same date a year ago. This decrease primarily reflected management’s continued efforts to align our workforce with declining mail volume, and the conversions of non-career employees to career status, in accordance with our contractual agreements.

Collective Bargaining Agreements
On January 22, 2020, we reached a tentative agreement with the National Postal Mail Handlers Union, AFL-CIO (“NPMAHU”) on a new three-year collective bargaining agreement, which the union membership ratified on April 8, 2020. The new contract went into effect on April 25, 2020, and will expire on September 20, 2022.

On March 10, 2020, a three-member arbitration panel reached a decision in our legally mandated binding interest arbitration process with the American Postal Workers Union, AFL-CIO (“APWU”), establishing the terms of a new collective bargaining agreement. The new contract went into effect on March 10, 2020, and will expire on September 20, 2021.
In September 2019, we agreed to extend contract negotiations relating to a new collective bargaining agreement with the National Association of Letter Carriers, AFL-CIO (“NALC”). The previous contract with the NALC expired on September 20, 2019, and negotiations with the NALC are at an impasse. The parties will continue to follow the current agreement until a new contract is reached through the dispute resolution process.

**Employee Health Benefits**

Our expense for employee health benefits (which includes the employer portion of Medicare taxes) is most significantly impacted by the number of employees electing coverage and the premium costs of the selected plans. Our active employees may participate in the Federal Employees Health Benefits (“FEHB”) Program, which OPM administers. Separate from FEHB, we offer our own self-insured healthcare plan to certain non-career employees who are ineligible for FEHB.

Employee health benefits expense increased 3.2% and 0.8% for the three and six months ended March 31, 2020, compared to the same periods last year, driven by average premium increases of 4.0% in calendar year 2020, and partially offset by the lower contribution rate of the employer portion of healthcare premiums that we paid, by management efforts to provide employees with information and tools for selecting the health benefit plans that best meet their needs, and by the small decrease in number of career employees, as previously discussed.

Our share of healthcare premiums for our employees represented 71.9% of the total healthcare premium costs for both the three months ended March 31, 2020, and 2019. Our share of healthcare premiums for our employees represented 72.0% and 72.3% of the total healthcare premium costs for the six months ended March 31, 2020, and 2019, respectively. This decrease in our share of healthcare premium costs for employees during the six-month period was consistent with the terms of our contractual agreements.

**Social Security**

For the three and six months ended March 31, 2020, our Social Security costs increased 1.0% for the three months ended March 31, 2020, but decreased 0.4% for the six months ended March 31, 2020, compared to the same periods last year. These fluctuations were consistent with the general changes in compensation for the period, as described above in Compensation.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

**Thrift Savings Plan**

Career employees may participate in the Thrift Savings Plan (“TSP”), a defined contribution retirement savings and investment plan administered by the Federal Retirement Thrift Investment Board. Our TSP expenses are related only to our contributions for FERS employees who participate in the TSP. For these employees, we contribute 1% of basic pay and match voluntary employee contributions up to an additional 4% of basic pay.

For the three and six months ended March 31, 2020, our TSP matching costs increased 3.9% and 2.8%, respectively, compared to the same periods last year. The increase in expenses correlates to the changing workforce composition of CSRS and FERS employees.

**Retirement Benefits**

The majority of our career employees participate in one of two U.S. government defined benefit pension programs, CSRS and FERS, based on the starting date of their employment with us or another U.S. government employer. We incur normal costs (the amount determined by OPM representing the employer portion of retirement benefits for participating employees and their qualifying survivors, upon retirement, for each employee’s current year of service) for FERS employees; however, by law we do not pay normal costs for CSRS retirement benefits. FERS employees are further categorized as either FERS, FERS - Revised Annuity Employees (FERS - RAE), or FERS - Further Revised Annuity Employees (FERS - FRAE) depending on whether their date of hire was before, during, or after calendar year 2013, respectively. This categorization determines the percentage of basic pay that we are required to contribute for normal cost.
Our retirement benefits expenses consist of three components: 1) FERS normal costs, 2) CSRS unfunded retirement benefits amortization, and 3) FERS unfunded retirement benefits amortization. These retirement benefits expense components are further described in detail in the sections below. The following table presents the retirement benefits expenses for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>

</tr>
<tr>
<td>Total retirement benefits</td>
<td>$1,818</td>
<td>$1,470</td>
</tr>
</tbody>
</table>

¹ Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded CSRS retirement obligation. Payments are to be made through 2043 based on OPM invoices.

² Expense for the accrual for the annual payment due to OPM by September 30 of the respective year, based on information provided by OPM, to amortize the unfunded FERS retirement obligation. Payments are to be made over a 30-year rolling period based on OPM invoices.

Our retirement benefits expenses increased 23.7% and 16.1% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year. This increase was due to rising employer contributions rates for FERS normal cost, as well as increases in the CSRS and FERS unfunded retirement benefits amortization, as discussed below.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 9 - Retirement Plans.

**FERS Normal Costs**

We record our contributions to FERS normal costs as they are incurred. Any unpaid employer amounts at the end of a period, along with any employee amounts withheld but not remitted at the end of a period, are recorded as a current liability within Retirement benefits in the accompanying Balance Sheets.

As determined by OPM, our FERS normal cost contribution rates increased from 13.7% to 14.7% of basic pay for 2020, an increase of 7.3% from the prior year, affecting most of our FERS participants. As a result of this contribution rate increase, FERS normal cost expenses increased 8.6% and 7.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year.

**CSRS and FERS Unfunded Retirement Benefits**

OPM periodically notifies us regarding its revaluation of unfunded CSRS and FERS retirement benefits. The amounts we record as expenses for our unfunded CSRS and FERS liabilities may be significantly impacted by changes in actuarial assumptions used by OPM to revalue the unfunded liabilities.

In October 2019, OPM provided an actuarial report projecting the annual amortization payments due September 30, 2020, to be $1.6 billion for CSRS and $1.1 billion for FERS.

On April 2, 2020, the Board of Actuaries of the CSRS, which oversees OPM’s calculation of actuarial liabilities for CSRS and FERS, lowered the discount rate used to calculate CSRS and FERS unfunded retirement liabilities from 4.25% to 4.0%. We have estimated that the impact of this change in discount rate on the annual CSRS and FERS amortization expense, will result in revised projected amortization payments due September 30, 2020, of approximately $1.8 billion for the CSRS obligation and approximately $1.3 billion for the FERS obligation, increases of $181 million and $226 million, respectively.

Accordingly, we have accrued $495 million and $899 million for the three and six months ended March 31, 2020, for the CSRS amortization expense, reflecting an adjustment of approximately $91 million for the revised assumptions.
Likewise, we have accrued $378 million and $643 million for the three and six months ended March 31, 2020, for the FERS amortization expense, reflecting an adjustment of approximately $113 million for the revised assumptions.

Our CSRS and FERS unfunded retirement benefits amortization expenses increased 45.5% and 28.6% for the three and six months ended March 31, 2020, respectively, compared to the same periods last year, due to higher estimated annual amortization payments resulting from revised actuarial assumptions and discount rate changes.

We expect to receive invoices from OPM for the actual amounts due September 30, 2020, for CSRS and FERS during the fourth quarter of 2020, and the amounts invoiced could differ from the projected amounts, due to further changes in experience, discount rates and/or actuarial assumptions as of the calculation date.

Retiree Health Benefits
We participate in federal employee benefit programs for retiree health benefits. Retirees who participated in FEHB for the five years immediately preceding their retirement may continue to participate in the plan during retirement. Qualifying survivors of retirees are also eligible to receive benefits.

In accordance with PAEA, since the beginning of 2017, the PSRHBF has funded our share of retiree health benefit premiums. Also since 2017, we have been obligated to pay into the PSRHBF the actuarially determined normal costs of retiree health benefits attributable to the service of our employees, as well as the amortization payment for the PSRHBF unfunded liability. Our total retiree health benefits expenses therefore consist of both the normal and the amortization costs. We record the required contributions to the plan as an expense in the period in which each contribution is due.

Based on preliminary calculations provided by OPM in October 2019, we have projected the PSRHBF amortization payment amount due September 30, 2020, to be $900 million, and therefore accrued expenses of $225 million and $450 million for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

Also, based on preliminary calculations provided by OPM in October 2019 using updated discount rate assumptions, we have estimated the amount of our PSRHBF normal cost payment due September 30, 2020, to be $4.0 billion, and therefore accrued expenses of $1.0 billion and $2.0 billion for the three and six months ended March 31, 2020, respectively. We expect to receive the invoice from OPM for the actual amount due during the fourth quarter of 2020 and this may differ from the original projected amount due to changes in discount rates, actuarial assumptions and experience as of the invoice calculation date.

For the three and six months ended March 31, 2020, our total retiree health benefits expenses decreased by $50 million, or 3.9%, and $100 million, or 3.9%, respectively, compared to the same periods last year, all of which was attributable to a decrease in the estimated amortization payment for the PSRHBF unfunded liability.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 10 - Health Benefits Plans, Retirees.

Workers’ Compensation
Our employees injured on the job are covered by the Federal Employees’ Compensation Act (“FECA”), administered by the U.S. Department of Labor’s (“DOL”) Office of Workers’ Compensation Programs, which makes all decisions regarding injured workers’ eligibility for benefits. We are legally mandated to participate in the federal workers’ compensation program. Our workers’ compensation expense reflects the impacts of changes in discount rates, as well as the actuarial valuation of new workers’ compensation cases and revaluation of existing ones. We reimburse the DOL for all workers’ compensation benefits paid to or on behalf of our employees, plus an administrative fee.

On a daily basis we focus on costs that can be managed in the course of normal business operations. Certain aspects of workers’ compensation can be managed through human resource initiatives, safety measures and training. Other workers’ compensation costs cannot be managed in the course of normal business operations and are less predictable, including expenses caused by actuarial revaluation and discount rate changes. We subtract the cash payments made by DOL on behalf of workers’ compensation obligations, which are relatively predictable, from
total workers' compensation expense in order to determine the non-cash component of workers' compensation expense, a non-GAAP financial measure.

The following table presents the components of workers' compensation expense, including the cash payments made by DOL on behalf of workers' compensation obligations, for the three and six months ended March 31, 2020, and 2019:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31,</th>

<td>(370)</td>
</tr>
<tr>
<td><strong>Total workers' compensation non-cash expense</strong></td>
<td><strong>$2,625</strong></td>
<td><strong>$401</strong></td>
</tr>
</tbody>
</table>

For the three months ended March 31, 2020, the portion of workers' compensation expense due to the impact of discount rate changes increased approximately $2.2 billion, compared to the same period last year. For the six months ended March 31, 2020, the portion of workers' compensation expense due to the impact of discount rate changes increased approximately $1.1 billion, compared to the same period last year. These changes are the result of changes in interest rates, outside of management's control.

The combined costs of new workers' compensation cases and revaluation of existing workers' compensation cases increased by $52 million and $14 million for the three and six months ended March 31, 2020, compared to the same periods last year. Changes in actuarial valuation are primarily attributable to the combined impacts of routine changes in actuarial estimation, the progression of existing cases and updated COLA assumptions, which are largely outside of management’s control.

Under FECA, workers' compensation claims for many types of injuries cannot be settled through lump-sum payments, and in some instances with regard to those claims, compensation may be paid over many years. Federal law grants COLA rates to those claims, and these factors result in substantially higher costs to us than would likely result if we managed our own claims. Additionally, since we do not manage the FECA program, we have no ability to control the significant administrative costs associated with managing the claims and payments process.

For additional information, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 11 - Workers’ Compensation.

**Transportation**

Transportation expenses include the costs we incur to transport mail and packages between our facilities, comprising highway, air and international transportation contracts, plus contract delivery services.

With the exception of contract delivery services, our costs to deliver mail and other products to delivery points are not included within Transportation but in Compensation and benefits for employee costs and in Other operating expenses for fuel, vehicle maintenance and repair, and other costs. Furthermore, transportation expenses do not include the compensation and related costs of employees responsible for transporting mail and packages between our facilities.

Variations in the volume and weight of mail transported, the mode of transportation used, and fuel prices have significant impact on transportation expenses.
The components of transportation expenses for the three and six months ended March 31, 2020, and 2019, are presented in the following table:

<table>
<thead>
<tr>
<th></th>
<th>Three Months Ended March 31, 2020</th>
<th></th>

<tr>
<td><strong>Total transportation expenses</strong></td>
<td>$2,008</td>
<td>$2,000</td>
<td>$4,405</td>
<td>$4,342</td>
</tr>
</tbody>
</table>

Overall, transportation expenses increased 0.4% and 1.5% for the three and six months ended March 31, 2020, compared to the same periods last year.

Highway transportation expenses decreased 1.5% for the three months ended March 31, 2020, but increased 3.4% during the six months ended March 31, 2020, compared to the same periods in last year. For the three and six months ended March 31, 2020, highway contract expenses decreased, primarily due to a decrease in the number of miles driven and lower average diesel fuel prices. However, results for the six months ended March 31, 2020, include a one-time adjustment resulting from our adoption of ASC 842, whereby we recorded transportation expenses associated with embedded leases in certain of our transportation contracts during the first quarter of 2020 (see Note 2 - Recent Accounting Pronouncements for additional disclosures regarding our adoption of ASC 842).

Air transportation expenses increased 3.9% for the three months ended March 31, 2020, but decreased 0.6% during the six months ended March 31, 2020, compared to the same periods last year. For the six months ended March 31, 2020, the slight decrease was due primarily to lower volumes and lower average jet fuel prices. However, both volumes and average jet fuel prices rose in the three months ended March 31, 2020, leading to an increase in air transportation expenses for the period.

International transportation expenses are related only to outbound services that allow customers in the U.S. to send mail and packages to other countries. For the three and six months ended March 31, 2020, international transportation expenses decreased 1.4% and 2.9% compared to the same periods last year, primarily due to decreases in our international service volumes.

**Other Operating Expenses**

Other operating expenses for the three and six months ended March 31, 2020, and 2019, are detailed in the following table:

<table>
<thead>
<tr>
<th></th>

</tr>
</tbody>
</table>
Other operating expenses increased by 5.3% and 2.5% for the three and six months ended March 31, 2020, compared to the same periods in the prior year. While these aggregate changes were relatively immaterial, the period-over-period changes in the various components of other operating expenses for the three and six months ended March 31, 2020, were also relatively immaterial.

LIQUIDITY AND CAPITAL RESOURCES

Our liquidity consists of unrestricted cash and cash equivalents plus available borrowing capacity. As of March 31, 2020, and September 30, 2019, we held unrestricted cash and cash equivalents of $9.0 billion and $8.8 billion, respectively. During the six months ended March 31, 2020, our average daily liquidity balance under our statutory borrowing capacity was $12.3 billion, representing approximately 56 days of liquidity available, which we define as liquidity divided by estimated average cash disbursements (including capital expenditures) per calendar day (365 days per year).

We face certain risks caused by the COVID-19 pandemic, including the disruptions to our revenue and business operations, which will have a material effect on our financial condition and results of operations. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected our retail and commercial customers, as well as suppliers and mail service providers. While the disruption is expected to be temporary, its duration remains uncertain. A protracted loss in customer demand for our services is likely to have a material effect on our financial condition, results of operations and liquidity. The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover to levels prior to the pandemic.

Notwithstanding our $15.0 billion statutory debt limit, and $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon. However we have no assurance that the U.S. Treasury will agree to provide such financing or if it will be provided upon favorable terms.

We estimate that the COVID-19 pandemic may increase our net operating loss by more than $22.0 billion over the next eighteen months, threatening our ability to operate. If we are able to borrow the $10.0 billion from the U.S. Treasury as provided by the CARES Act, we expect that we will have sufficient liquidity to continue to operate through April 2021. However, if we are unable to secure this $10.0 billion in financing, we expect to be able to continue to operate only through September 2020, absent additional defaults.

Although our liquidity has generally increased since 2012, it remains insufficient to support an organization with approximately $80 billion in annual operating expenses, to make capital investments necessary for continuity of operations and to prepare for unexpected contingencies. Over half of this liquidity improvement as of March 31, 2020, would not have occurred but for the temporary exigent surcharge, which allowed us to collect a total of $4.6 billion in incremental revenue between January 2014 and April 2016.

Aside from the temporary exigent surcharge, we defaulted on $33.9 billion of statutorily specified PSRHBF prefunding payments from 2012 through 2016, and did not make the approximately $495 million in payments due for FERS unfunded liabilities between 2014 and 2016, or the approximately $21.0 billion in payments due for PSRHBF normal cost and amortization on PSRHBF, CSRS and FERS unfunded liabilities between 2017 and 2019, in order to preserve liquidity, and to ensure that our ability to fulfill our primary universal service mission was not placed at undue risk. The combination of these defaults and non-payments, plus the incremental revenue associated with the temporary exigent surcharge referred to above, and the increased revenue from growth in our Shipping and Packages business, are the primary reasons why our cash and available liquidity has improved.

CASH FLOW ANALYSIS

Operating Activities
Cash provided by operating activities decreased $147 million for the six months ended March 31, 2020, compared to the same period last year, largely the result of timing differences in cash payments for compensation and benefits.
Investing Activities
We invested $741 million in the purchase of property and equipment for the six months ended March 31, 2020, which is an increase of $82 million, or 12.4%, compared to the same period last year. As of the date of this report, the amount of our full year projected capital expenditures is approximately $2.0 billion, which is approximately $300 million less than our original forecast of $2.3 billion. We anticipate that this may further decline if equipment and information technology investments and other programs are deferred to future years as a result of COVID-19.

Financing Activities
Except as described otherwise in this quarterly report, the nature and amounts of our payment obligations under our debt, capital and operating lease agreements, purchase commitments and other liabilities as of March 31, 2020, have not materially changed from those described in our Annual Report.

As of both March 31, 2020, and September 30, 2019, the aggregate principal balance of our outstanding debt was $11.0 billion, consisting of a combination of fixed-rate note and floating-rate notes, all of which we consider long-term debt.

DEBT
As of March 31, 2020, our statutory borrowing capacity was $4.0 billion, of which $1.0 billion would require repayment by September 30, 2020, to comply with our annual debt increase limits. Furthermore, notwithstanding our $15.0 billion statutory debt limit, and the $3.0 billion annual limitation on new borrowing, the CARES Act allows us to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The U.S. Treasury may lend up to this amount at our request, upon terms and conditions mutually agreed upon.

In 1974, we began issuing debt through individual debt agreements to the Federal Financing Bank ("FFB"), a government-owned corporation under the general supervision of the Secretary of the Treasury. In 1999, we entered into a Note Purchase Agreement ("NPA") with the FFB to establish standardized procedures for issuing debt. Under the NPA, we were able to issue a series of notes with established terms and conditions by providing two days prior notice. Also under the NPA, we could make borrowings against two annually renewable revolving credit line facilities. These note arrangements and credit line facilities provided the flexibility to borrow short or long-term, using floating or fixed-rate instruments.

The NPA was extended each year through September 30, 2018, and in shorter increments between that date and August 31, 2019, at which time the NPA expired. This expiration did not affect the terms of any of our outstanding debt as of March 31, 2020, all of which was issued under the NPA.

LIQUIDITY OUTLOOK
We are constrained by laws and regulations, including the PAEA, which restrict revenue sources and mandates certain expenses. Statutorily mandated expenses include amortization payments to provide full funding of retirement benefits under the CSRS and the FERS, as well as FERS normal costs, described in greater detail in Note 9 - Retirement Plans. Additionally, the PAEA established the PSRHBF and mandated certain obligations for paying normal costs, the present value of the estimated retiree health benefits attributable to active employees’ current year of service, and amortization payments for full prefunding of retiree health benefits. These prefunding obligations, described in greater detail in Note 10 - Health Benefits Plans, are unlike expenses imposed on most other federal entities or private-sector businesses that offer such benefits.
We continue to face challenges from the ongoing migration of mail to electronic alternatives, and we are legally limited under current law in how we can price our products and streamline our legacy business model. Our operations will require significant capital investment over the next few years to modernize and improve our processing and delivery infrastructure and update our delivery fleet in order to continue to meet our primary statutory obligation to provide prompt, reliable and efficient postal services to the nation.

Irrespective of our challenges resulting from the COVID-19 pandemic, absent legislative and regulatory change, we project continuing annual net losses in the future. As a result of these losses and our liquidity concerns, we may not have sufficient cash balances to meet all of our existing legal obligations and make all of the critical investments in our infrastructure that are necessary for operational continuity and that have been deferred in recent years.

In the event that circumstances leave us with insufficient liquidity, we may deem it necessary to implement additional contingency plans to ensure that our primary mission is fulfilled and that mail deliveries continue. These measures may require us to prioritize payments to the FFB, our employees and suppliers ahead of some payments to fund retirement and retiree health benefits, as we have done in the past.

With the anticipated continued migration to electronic communication and transactional alternatives, we continue to pursue long-term financial sustainability by focusing on the following items:

1. Continued efforts to control costs and drive efficiencies, innovate to keep mail relevant and generate increased revenue;
2. Postal Service reform legislation that addresses our overall cost structure and enhances our revenue-generating opportunities; and
3. Favorable outcome of the PRC’s ten-year review (discussed below), which would allow additional pricing flexibility.

Although we continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face, we have no assurances that our requests will result in meaningful reform in the foreseeable future.

**PRC Ten-year Review**

In December 2016, the PRC initiated its ten-year review of the system for regulating rates and classes for Market-Dominant products as required by the PAEA. The purpose of the ten-year review was to determine if the system for regulating such rates and classes has achieved the objectives Congress established in the PAEA. As part of this review, the PRC evaluated the CPI-U price cap for our Market-Dominant services.

On December 1, 2017, the PRC announced its initial decision in connection with its ten-year review. The PRC concluded that the rates system has not achieved its objectives and needs to be changed, primarily because it does not enable us to achieve our mission of providing prompt, reliable, and efficient universal postal services to the American people in a financially sustainable manner. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system.

On December 5, 2019, the PRC announced a revised decision in connection with its ten-year review. The PRC’s proposed changes to the system do not include the elimination of the CPI-U price cap; however, its proposal does provide for some additional pricing authority within a price cap system. Moreover, while the revised proposal does include adjustment factors as we had requested to provide more flexibility for the regulatory system to better deal with future exogenous changes, the new proposal no longer includes any “true-up” authority to provide us with a reasonable opportunity to cover all of our costs. We continue to assert that the price cap should be eliminated, and that if the PRC insists on maintaining a price cap that the system must include both a resetting of rates so they are compensable, as well as adjustment factors to ensure the system is sufficiently flexible going forward.

The PRC was expected to issue a final rule after considering the comments and reply comments of any interested stakeholders, which were due no later than February 3, 2020 and March 4, 2020, respectively. As of the date of this report, the PRC has not issued a final rule. Additional information regarding the ten-year review may be found at the

2020 and Beyond
Irrespective of our challenges resulting from the COVID-19 pandemic, we anticipate that given our ongoing liquidity concerns, and without legislative action and regulatory reform, we may not be able to pay all legally required obligations and also invest in much-needed capital expenditures in 2020 and future years that are necessary to ensure our ability to fulfill our primary mission. Furthermore, we believe that continuing productivity improvements alone will not be sufficient to address the challenges presented by declining Market-Dominant volume and revenue, and any future growth in operating revenue would unlikely keep pace with increased costs.

Legally Required Obligations
In addition to our previously discussed obligations for unfunded retirement and retiree health benefits of approximately $7.6 billion due on September 30, 2020, we expect to pay the DOL approximately $1.3 billion in October 2020, representing the workers’ compensation claims paid by DOL for the chargeback year July 1, 2019, to June 30, 2020, plus the estimated administrative fee.

The CARES Act offers certain employers the ability to defer payment of the employer’s share of the Social Security payroll tax on wages incurred from March 27, 2020, through December 31, 2020. In accordance with this provision, we began deferring these payments in April 2020, and intend to continue the deferral for the remainder of calendar year 2020 for an estimated total deferral amount of approximately $1.6 billion. One half of these deferred payments would be due by December 31, 2021, and the other half by December 31, 2022.

Capital Investments
We currently estimate that our required cash outlays for capital investments necessary to ensure that we can continue to perform our universal service obligation will amount to approximately $1.3 billion for the remainder of 2020, and an additional $11.0 billion for years 2021 through 2024, as we plan to invest in a new fleet of delivery vehicles and other appropriate capital assets. Although our future projections include these capital cash outlays, future cash flow from operations alone may not generate the cash needed to enable us to fully fund such necessary capital investments.

Mitigating Circumstances
We continue to pursue strategies within our control to increase operational efficiency and improve liquidity. We have managed capital in recent years by spending only what we believed was essential to maintain our existing facilities and service levels, and to increase efficiencies. However, continued increases in capital investment are necessary to upgrade our facilities, fleet of vehicles and processing equipment in order to remain operationally viable. Aggressive management of the business operations, as well as legislative and regulatory reforms that will enable us to increase revenue and reduce costs, will all be necessary to restore our financial health.

Our status as an independent establishment of the executive branch that does not receive tax dollars for our operations presents unique requirements and restrictions, but also potentially mitigates some of the financial risk that would otherwise be associated with a cash shortfall. With annual total revenue in 2019 of approximately $71 billion, a financially sound Postal Service continues to be vital to U.S. commerce.

The U.S. economy benefits greatly from us and the many businesses that provide the printing and mailing services that we support. Disruption of the mail would cause undue hardship to businesses and consumers as it would significantly inhibit the remittance of payments through the mail, and in the event of a cash shortfall, the U.S. government would likely prevent us from significantly curtailing or ceasing operations. We continue to inform the executive branch, Congress, the PRC and other stakeholders of the immediate and long-term financial challenges we face and the legislative and regulatory changes that are required to restore our financial stability.

LEGISLATIVE, REGULATORY AND RELATED MATTERS

TASK FORCE ON THE UNITED STATES POSTAL SYSTEM
As previously reported, on April 12, 2018, the President issued Executive Order 13829 to establish a Task Force on the United States Postal Service ("Task Force"), to be chaired by the Secretary of the Treasury, as Secretary and as
Chairman of the FFB, or his designee. In accordance with the Executive Order, the Task Force conducted an evaluation of our operations and finances, and submitted its report to the President in August 2018.

There has been no further congressional activity related to the President’s Task Force report on the Postal Service subsequent to the March 12, 2019, Senate Homeland Security and Governmental Affairs Committee hearing titled, “A Path to Sustainability: Recommendations from the President’s Task Force on the United States Postal Service.”

LEGISLATIVE UPDATE
As a self-funded independent establishment of the executive branch, our business model and operations are significantly influenced by congressional oversight and legislation. Additionally, Congress intended for us to be governed by an eleven-member Board of Governors (“Board”) which generally consists of our Postmaster General, Deputy Postmaster General and nine independent governors (“Governors”). The President appoints the Governors with the advice and consent of the Senate. We have five Senate-confirmed Governors currently in office.

Legislation
Several bills introduced in response to the COVID-19 pandemic have financial implications for us.

On March 18, 2020, the President signed the Families First Coronavirus Response Act, enacted as Public Law 116-127, which provides new paid sick leave that may be used by an employee in COVID-19 situations for themselves, or to care for sick family members, as well as Family and Medical Leave Act-protected unpaid and paid leave if a school/child care is closed.

On March 26, 2020, the President signed the CARES Act, which allows the Postal Service to borrow up to an additional $10.0 billion in financing from the U.S. Treasury to fund operating expenses. The law stipulates that the Secretary of Treasury may lend up to this amount at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

H.R. 6425, the Protect our Post Offices Act, introduced on March 31, 2020, would also appropriate $25.0 billion for payment to the Postal Service Fund for revenue forgone due to the COVID-19 pandemic. The bill was referred to the House Committees on Appropriations and Budget.

Postal Service Reform
The 116th Congress has not introduced any major Postal Service reform bills to date. Legislative and regulatory reforms remain critical for us to meet the needs of the American public, and we will continue to work with Congress and all of our stakeholders to enact Postal Service reform legislation.

Board of Governors Nominations
On March 2, 2020, the President submitted to the Senate the nomination of Donald Lee Moak to serve on the Board for a term expiring December 8, 2022. The nomination was referred to the Senate Homeland Security and Governmental Affairs Committee for its consideration. The nomination of William Zollars to serve for a term expiring December 8, 2022, is also pending the committee’s consideration.

FAIR VALUE MEASUREMENTS
As required by authoritative accounting literature, certain fair value disclosures for the periods ended March 31, 2020, and September 30, 2019, are discussed in Item 1. Financial Statements, Notes to Unaudited Financial Statements. We did not recognize gains as a result of valuation measurements during the three and six months ended March 31, 2020. All recognized losses have been incorporated into our financial statements as of March 31, 2020. See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 13 - Fair Value Measurement.

RELATED PARTY TRANSACTIONS
As disclosed throughout this quarterly report, we have significant transactions with other U.S. government entities, which are considered related parties for reporting purposes. For a more detailed description, see Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 5 - Related Parties.
CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with GAAP requires management to make significant judgments and estimates to develop certain amounts reflected and disclosed in the financial statements. In many cases, alternative policies or estimation techniques may be used.

We maintain a thorough process to review the application of accounting policies and to evaluate the appropriateness of the many estimates that are required to prepare the financial statements of a large organization. However, even under optimal circumstances, estimates routinely require adjustment based on changing circumstances and new or better information.

The accounting policies deemed either the most judgmental or which involve the selection or application of alternative accounting policies, and are material to the interim financial statements, are described in Critical Accounting Estimates contained in Management’s Discussion and Analysis of Financial Condition and Results of Operations of the Annual Report. Management normally discusses the development and selection of accounting policies and estimates with the Audit and Finance Committee of the Board.

RECENT ACCOUNTING STANDARDS

See Item 1. Financial Statements, Notes to Unaudited Financial Statements, Note 2 - Recent Accounting Pronouncements, for a description of recently announced accounting standards.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business we are exposed to market risks from changes in commodity prices, certain foreign currency exchange rates and interest rates. Our commodity price risk consists primarily of exposure to changes in prices for diesel fuel, unleaded gasoline and aircraft fuel for transportation of the mail, and fuel for heating facilities. We have foreign currency risk related to the settlement of terminal dues and transit fees with foreign postal administrations for international mail.

We have not used derivative commodity or financial instruments to manage market risk related to commodities, foreign currency exchange or interest rate fluctuations for debt instruments. Additionally, we do not purchase or hold derivative financial instruments for speculative purposes.

We also have provisions in our debt agreements that allow us to prepay our $11.0 billion debt at any time at a price determined by the Secretary of the Treasury, based on prevailing interest rates in the U.S. Treasury market at the time of repayment.

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk in the Annual Report for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Management is responsible for the preparation, integrity and fair presentation of our financial statements.

DISCLOSURE CONTROLS

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in quarterly and annual reports is recorded, processed, summarized, and reported within the time frames specified by PAEA, and that this information is accumulated and communicated to our management, including the Postmaster General and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.
We carried out an evaluation under the supervision and with the participation of management, including the Postmaster General and the Chief Financial Officer, of the effectiveness of the design and operation of disclosure controls and procedures as of March 31, 2020. Based upon and as of the date of the evaluation, the Postmaster General and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

**INTERNAL CONTROLS**
We have made no changes in our internal control over financial reporting during the three months ended March 31, 2020, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a discussion of legal proceedings affecting us, please refer to Item 1. Financial Statements, Notes to Unaudited Financial Statements and Note 8 - Commitments and Contingencies, as well as our Annual Report.

ITEM 1A. RISK FACTORS

The following risk factor supplements Item 1A. Risk Factors of our Annual Report.

The occurrence of a global pandemic or other adverse public health developments could have a material and adverse effect on our business operations, financial condition and results of operations.

In March 2020, the World Health Organization declared COVID-19 a global pandemic, which has since spread throughout the U.S. Given our mandate to provide universal postal services to the nation, we provide an essential service and have continued to process and deliver mail and packages during the pandemic.

We expect the COVID-19 pandemic to have a material effect on our financial condition, results of operations and liquidity. Quarantines, shelter-in-place orders, and travel and logistics restrictions in connection with the outbreak have affected retail and commercial customers, as well as suppliers and mail service providers. The Postal Service relies on the sale of postal products and services to fund its operations, and these sales have declined significantly as a result of the pandemic. The sudden drop in mail volumes, the Postal Service’s most profitable revenue stream, has been steep and may never fully recover to levels prior to the pandemic.

CERTIFICATION PURSUANT TO
RULES 13a-14(a) AND 15d-14(a) UNDER THE SECURITIES AND EXCHANGE ACT OF
1934, AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF
2002.

I, Megan J. Brennan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of the United States Postal Service (“Postal Service”);  
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;  
3. Based on my knowledge, the financial statements and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Postal Service as of, and for, the periods presented in this report;  
4. The Postal Service’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Postal Service and have:
   a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Postal Service, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;  
   b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;  
   c. Evaluated the effectiveness of the Postal Service’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and  
   d. Disclosed in this report any change in the Postal Service’s internal control over financial reporting that occurred during the Postal Service’s most recent fiscal quarter (the Postal Service’s fourth fiscal quarter in the case of an Annual Report) that has materially affected, or is reasonably likely to materially affect, the Postal Service’s internal control over financial reporting; and  
5. The Postal Service’s other certifying officer and I have disclosed based on our most recent evaluation of internal control over financial reporting, to the Postal Service’s independent registered accounting firm and the Audit and Finance Committee of the Postal Service’s Board of Governors:
   a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Postal Service’s ability to record, process, summarize and report financial information; and  
   b. Any fraud, whether or not material, that involves management or other employees who have significant role in the Postal Service’s internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO

In connection with the Quarterly Report of the United States Postal Service ("Postal Service") on Form 10-Q for the period ended March 31, 2020, (the "Report"), I, Megan J. Brennan, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Postal Service.

18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO

In connection with the Quarterly Report of the United States Postal Service (“Postal Service”) on Form 10-Q for the period ended March 31, 2020, (the “Report”), I, Joseph Corbett, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Postal Service.

Dated: May 7, 2020

/s/Joseph Corbett
Joseph Corbett
Chief Financial Officer and Executive Vice President
Over the past month, the men and women of the United States Postal Service have done a heroic job under the most trying of circumstances. Unfortunately, during this same period, they have watched their organization become the centerpiece of a growing partisan battle between policymakers. While a public debate over the needs and role of the Postal Service can certainly be helpful, it is essential that this conversation happen in a spirit of non-partisanship and cooperation.

The Postal Service has always served a non-partisan mission. During my thirty-four year career with the United States Postal Service, the last five as the Postmaster General, it has been my distinct honor to work for an organization that is fully committed to serving all Americans. To achieve that mission, it has been vitally important for there to be no political bias or partiality on the part of the Postal Service.

The Postal Service is led by a Board of Governors, of which I am a member, comprised by law of both Republicans and Democrats who fully share that commitment. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since they took office, I have worked directly with our Governors to take the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Postal Service is proud of the tremendous commitment shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation's critical infrastructure. Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages. This mail includes critical materials such as Census information, absentee ballots, sustaining necessities and prescription medications.

This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

The public's high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service. This standing with Americans of all political persuasions is based in no small part on the Postal Service's nonpolitical nature and universal service mission.

However, as we continue to perform our vital mission, the Postal Service remains saddled with long-standing financial challenges stemming from a broken business model that is imposed upon us by law. We have mandated unaffordable costs that we are prohibited from reducing, and yet we also lack the autonomy to diversify our products or to control our pricing. Now, our
fiscal challenges are only growing as mail volumes and revenues decline precipitously in the midst of this pandemic.

We strongly believe that stakeholders across the political spectrum share an interest in preserving and protecting the Postal Service. While we acknowledge that different stakeholders will have different ideas about how best to accomplish our shared goal, and that reasonable minds may differ, we would hope that such differing views will not get in the way of what should be a cooperative effort. For our part, we will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.
Over the past month, the men and women of the United States Postal Service have done a heroic job under the most trying of circumstances. Unfortunately, during this same period, they have watched their organization become the centerpiece of a growing partisan battle between policymakers. While a public debate over the needs and role of the Postal Service can certainly be helpful, it is essential that this conversation happen in a spirit of non-partisanship and cooperation.

The Postal Service has always served a non-partisan mission. During my thirty-four year career with the United States Postal Service, the last five as the Postmaster General, it has been my distinct honor to work for an organization that is fully committed to serving all Americans. To achieve that mission, it has been vitally important for there to be no political bias or partiality on the part of the Postal Service.

The Postal Service is led by a Board of Governors, of which I am a member, comprised by law of both Republicans and Democrats who fully share that commitment. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since they took office, I have worked directly with our Governors to take the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Postal Service is proud of the tremendous commitment heroism shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages. This mail includes critical materials such as Census information, absentee ballots, sustaining necessities and prescription medications.

This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service. This standing with Americans of all political persuasions is based in no small part on the Postal Service’s nonpolitical nature and universal service mission.

Yet, however, as we continue to perform our vital mission, the Postal Service remains saddled with long-standing financial challenges stemming from a broken business model that is imposed upon us mandated by law. We have legally mandated unaffordable costs that we are prohibited from reducing imposed upon us that we don’t have the freedom to reduce, and yet we also lack the autonomy to diversify our products or to control our pricing. Now, our fiscal
challenges are only growing as mail volumes and revenues decline precipitously in the midst of this pandemic.

We **strongly believe** that stakeholders across the political spectrum share an interest in preserving and protecting the Postal Service. While we **acknowledge** that different stakeholders will have different ideas about how best to accomplish our shared goal, and that reasonable minds may differ, we would hope that such differing views will not get in the way of what should be a cooperative effort. For our part, we will continue to work in a non-partisan manner with policymakers to achieve this goal **and to obtain stabilizing relief from the direct impacts resulting from the pandemic**, and we urge all others with an interest in the Postal Service to do the same.

Over the past month, the men and women of the United States Postal Service have done a heroic job under the most trying of circumstances. Unfortunately, during this same period, they have watched their organization become the centerpiece of a growing partisan battle between policymakers. While a public debate over the needs and role of the Postal Service can be helpful, it is essential that this conversation happen in a spirit of bipartisanship and cooperation.

The Postal Service has always served a non-partisan mission. During my thirty-four year career with the United States Postal Service, the last five as the Postmaster General, it has been my distinct honor to work for an organization that is fully committed to serving all Americans, regardless of their political or other views. We collectively believe at our core that it is vital to achieve the objective of our mission. It is vital for there to be no appearance of political bias or partiality on the part of the Postal Service.

The Postal Service is led by a Board of Governors, of which I am a member, comprised by law of both Republicans and Democrats who fully share that commitment. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since they took office, I have worked directly with our Governors to take the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Board of Governors is proud of the heroism shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages. This mail includes critical materials such as Census information, absentee ballots, and sustaining necessities and prescription medications, including important governmental information such as Census materials and materials advising the public about COVID-19, and benefits checks for social security and stimulus relief; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online.

This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health. Yet during these times when our essential services are most needed, our long-standing and well-known financial challenges that result from the broken business model that is imposed upon us by law are being significantly exacerbated by the onset of the pandemic.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any
The Board therefore strongly believes that interested stakeholders across the political spectrum have a collective interest in protecting and preserving the Postal Service. While we certainly recognize that different stakeholders will have different ideas about how best to accomplish our shared goal, and that reasonable minds may differ, we would hope that such differing views will not get in the way of what should be a cooperative effort.

Placing the Postal Service on a sustainable financial footing in both the near-term and the long-term is a critical issue that, given the broad support for the Postal Service, should be pursued in a spirit of cooperation and unity. For our part, the Board recently approved, through a unanimous vote, a set of recommendations for how to provide short-term financial relief to the Postal Service to address the effects of the pandemic, as well as for how to address the Postal Service’s structural problems over the longer-term. For our part, we will continue to work in a non-partisan manner with the policy-makers to achieve these goals—one goal, and we urge all others with an interest in the Postal Service to do the same.
Over the past month, the men and women of the United States Postal Service have done a heroic job under the most trying of circumstances. Unfortunately, during this same period, they have watched their organization become the centerpiece of a growing partisan battle between policymakers. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service. This standing with Americans of all political persuasions is based in no small part on the Postal Service’s nonpolitical nature and universal service mission.

However, as we continue to perform our vital mission, the Postal Service remains saddled with long-standing financial challenges stemming from a broken business model that is imposed upon us by law. We have legally mandated unaffordable costs that we are prohibited from reducing, and yet we also lack the autonomy to diversify our products or to control our pricing.
Now, our fiscal challenges are only growing as mail volumes and revenues decline precipitously in the midst of this pandemic.

Stakeholders across the political spectrum share an interest in preserving and protecting the Postal Service. While different stakeholders will have different ideas about how best to accomplish our shared goal, and reasonable minds may differ, these differing views should not get in the way of what should be a cooperative effort. For our part, we will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.
Over the past month, the men and women of the United States Postal Service have done a heroic job under the most trying of circumstances. Unfortunately, during this same period, they have watched their organization become the centerpiece of a growing partisan battle between policymakers. While a public debate over the needs and role of the Postal Service can certainly be helpful, it is essential that this conversation happen in a spirit of non-partisanship and cooperation.

The Postal Service has always served a non-partisan mission. During my thirty-four year career with the United States Postal Service, the last five as the Postmaster General, it has been my distinct honor to work for an organization that is fully committed to serving all Americans. To achieve that mission, it has been vitally important for there to be no political bias or partiality on the part of the Postal Service.

The Postal Service is led by a Board of Governors, of which I am a member, comprised by law of both Republicans and Democrats who fully share that commitment. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since they took office, I have worked directly with our Governors to take the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Postal Service is proud of the tremendous commitment shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages. This mail includes critical materials such as Census information, absentee ballots, sustaining necessities and prescription medications.

This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

Since taking office, we have all been committed to taking the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Board is proud of the heroism shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages, including important governmental information such as Census materials and materials advising the public about COVID-19, and benefits checks for social security and stimulus relief; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online. The fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information. Yet during these times when our essential services are most needed, our long-standing and well-known financial challenges are being significantly exacerbated by the onset of the pandemic.

The public’s regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service, and this favorable opinion is shared nearly equally by Republicans and Democrats alike. This standing with Americans of all political persuasions is based in no small part on the Postal Service’s nonpolitical nature and universal service mission.

The Board therefore strongly believes that interested stakeholders across the political spectrum have a collective interest in protecting and preserving the Postal Service. While we certainly recognize that different stakeholders will have different ideas about how best to accomplish our shared goal, we would hope that such differing views will not get in the way of what should be a cooperative effort.

Placing the Postal Service on a sustainable financial footing in both the near-term and the long-term is a critical issue that, given the broad support for the Postal Service, should be pursued in a spirit of cooperation and unity. For our part, the Board recently approved, through a unanimous vote, a set of recommendations for how to provide short-term financial relief to the Postal Service to address the effects of the pandemic, as well as for how to address the Postal Service’s structural problems over the longer-term. We will continue to work in a non-partisan
manner with the policy-makers to achieve these goals, and we urge all others with an interest in
the Postal Service to do the same.

Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since taking office, we have all been committed to taking the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Board is proud of the heroism shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the dedicated men and women of the Postal Service accept, process, transport, and deliver vital mail and packages, including important governmental information such as Census materials and materials advising the public about COVID-19, and benefits checks for social security, military veterans and stimulus relief; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online. The fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information. Yet during these times when our essential services are most needed, our long-standing and well-known financial challenges are being significantly exacerbated by the onset of the pandemic.

The public’s regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service, and this favorable opinion is shared nearly equally by Republicans and Democrats alike. This standing with Americans of all political persuasions is based in no small part on the Postal Service’s nonpolitical nature and universal service mission.

The Board therefore strongly believes that interested stakeholders across the political spectrum have a collective interest in protecting and preserving the Postal Service. While we certainly recognize that different stakeholders will have different ideas about how best to accomplish our shared goal, we would hope that such differing views will not get in the way of what should be a cooperative effort.

Placing the Postal Service on a sustainable financial footing in both the near-term and the long-term is a critical issue that, given the broad support for the Postal Service, should be pursued in a spirit of cooperation and unity. For our part, the Board recently approved, through a unanimous vote, a set of recommendations for how to provide short-term financial relief to the Postal Service to address the effects of the pandemic, as well as for how to address the Postal Service’s structural problems over the longer-term. We will continue to work in a non-partisan manner with the policy-makers to achieve these goals, and we urge all others with an interest in the Postal Service to do the same.
The United States Postal Service is led by a Board of Governors comprised by law of both Republicans and Democrats. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since taking office, we have all been committed to taking the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

We will continue to work in bipartisan manner with the policy-makers to achieve these goals, and we urge all others with an interest in the Postal Service to do the same.
During my thirty four year career with the United States Postal Service, the last five as the Postmaster General, it has been my distinct honor to work for an organization that is fully committed to serving all Americans, regardless of their political or other views. We collectively believe at our core that it is vital to the achievement of our mission that there is no actual or appearance of political bias or partiality on the part of the Postal Service.

The Postal Service is led by a Board of Governors, of which I am a member, comprised by law of both Republicans and Democrats who fully share that commitment. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since they took office, I have worked directly with our Governors to take the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Board is proud of the heroism shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages, including important governmental information such as Census materials and materials advising the public about COVID-19, and benefits checks for social security and stimulus relief; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online. The fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information. Yet during these times when our essential services are most needed, our long-standing and well-known financial challenges that result from the broken business model that is imposed upon us by law are being significantly exacerbated by the onset of the pandemic.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service, and this favorable opinion is shared nearly equally by Republicans and Democrats alike. The United States Postal Service is led by a Board of Governors comprised by law of both Republicans and Democrats. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a very bipartisan manner. Since taking office, we have all been committed to taking the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Board is proud of the heroism shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the dedicated men and women of the Postal Service accept, process, transport, and deliver vital mail and packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online. Yet during these times when our essential services are most needed, our long-standing and well-known financial challenges are being significantly exacerbated by the onset of the pandemic.

The public's regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service, and this favorable opinion is shared nearly equally by Republicans and Democrats alike. This standing with Americans of all political persuasions is based in no small part on the Postal Service’s nonpolitical nature and universal service mission.

The Board therefore strongly believes that interested stakeholders across the political spectrum have a collective interest in protecting and preserving the Postal Service, and that addressing the Postal Service’s financial challenges should not be politicized or turned into yet another forum for partisan politics. While we certainly recognize that different stakeholders will have different ideas about how best to accomplish our shared goal, we would hope that divisive partisanship will not get in the way of what should be a cooperative effort.

Placing the Postal Service on a sustainable financial footing in both the near-term and the long-term is a critical issue that, given the broad support for the Postal Service, should be pursued in a spirit of bipartisan cooperation and unity. Politicizing the Postal Service only weakens the organization and reduces our ability to solve our current problems and to enable the Postal Service to continue to serve all Americans. For our part, the Board recently approved, through a unanimous vote, a set of recommendations for how to provide short-term financial relief to the Postal Service to address the effects of the pandemic, as well as how to address the Postal Service’s structural problems over the longer-term. We will continue to work in bipartisan manner to achieve this goal, and we urge all others with an interest in the Postal Service to do the same.
During my thirty four year career with the United States Postal Service, the last five as the Postmaster General, it has been my distinct honor to work for an organization that is fully committed to serving all Americans, regardless of their political or other views. We collectively believe at our core that it is vital to the achievement of our mission that there is no actual or appearance of political bias or partiality on the part of the Postal Service.

The Postal Service is led by a Board of Governors, of which I am a member, comprised by law of both Republicans and Democrats who fully share that commitment. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since they took office, I have worked directly with our Governors to take the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Board is proud of the heroism shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages, including important governmental information such as Census materials and materials advising the public about COVID-19, and benefits checks for social security and stimulus relief; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online. The fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information. Yet during these times when our essential services are most needed, our long-standing and well-known financial challenges that result from the broken business model that is imposed upon us by law are being significantly exacerbated by the onset of the pandemic.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service, and this favorable opinion is shared nearly equally by Republicans and Democrats alike. This standing with Americans of all political persuasions is based in no small part on the Postal Service’s nonpolitical nature and universal service mission.

The Board therefore strongly believes that interested stakeholders across the political spectrum have a collective interest in protecting and preserving the Postal Service. While we certainly recognize that different stakeholders will have different ideas about how best to accomplish our shared goal, and that reasonable minds may differ, we would hope that such differing views will not get in the way of what should be a cooperative effort.
Placing the Postal Service on a sustainable financial footing in both the near-term and the long-term is a critical issue that, given the broad support for the Postal Service, should be pursued in a spirit of cooperation and unity. For our part, the Board recently approved, through a unanimous vote, a set of recommendations for how to provide short-term financial relief to the Postal Service to address the effects of the pandemic, as well as for how to address the Postal Service’s structural problems over the longer-term. We will continue to work in a non-partisan manner with the policy-makers to achieve these goals, and we urge all others with an interest in the Postal Service to do the same.
The United States Postal Service is led by a Board of Governors comprised by law of both Republicans and Democrats. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a very bipartisan manner. While we certainly recognize that different stakeholders will have different ideas about how best to accomplish our shared goal, we would hope that divisive partisanship will not get in the way of what should be a cooperative effort.

Placing the Postal Service on a sustainable financial footing in both the near-term and the long-term is a critical issue that, given the broad support for the Postal Service, should be pursued in a spirit of bipartisan cooperation and unity. Politicizing the Postal Service only weakens the organization and reduces our ability to solve our current problems and to enable the Postal Service to continue to serve all Americans. For our part, the Board will continue to work in bipartisan manner to achieve this goal, and we urge all others with an interest in the Postal Service to do the same.
The United States Postal Service is led by a Board of Governors comprised by law of both Republicans and Democrats. Our Governors whose members are largely appointed by the President and confirmed by the Senate. Our Board is comprised of both Republicans and Democrats, and the Board takes great pride in operating in a very bipartisan manner. Since taking office, we have all been committed to taking the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The United States Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Board is proud of the heroism shown by our employees during this pandemic, as they by their steadfast determination to continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the dedicated men and women of the Postal Service accept, process, transport, and deliver vital mail and packages, including important governmental information and benefits such as Census materials, social security and stimulus checks, and materials advising the public about COVID-19; materials relating to elections, including absentee ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing sustaining necessities, including medicines and other goods purchased online. Yet during these times when our essential services are most needed, our long-standing and well-known financial challenges are being significantly exacerbated by the onset of the pandemic vital mail and packages. Several weeks ago, our employees delivered a postcard to each household with guidance from the White House Coronavirus Task Force on how to mitigate the spread of COVID-19, and in the coming weeks will deliver millions of economic impact checks and notification letters following the enactment of the CARES Act. The Postal Service is also delivering an increased number of packages as Americans purchase sustaining necessities online, including medicines. In the coming months, millions of Americans will be able to safely and securely exercise their right to vote by receiving and sending ballots through the mail.

The public’s regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service, and this favorable opinion is shared nearly equally by Republicans and Democrats alike. This standing with Americans of all political persuasions is based in no small part on the Postal Service’s nonpolitical nature and universal service mission.

The Board therefore strongly believes that interested stakeholders across the political spectrum have a collective interest in protecting and preserving the Postal Service, and that addressing the Postal Service’s financial challenges should not be politicized or turned into yet another forum for partisan politics. While we certainly recognize that different...
stakeholders will have different ideas about how best to accomplish our shared goal, we would hope that divisive partisanship will not get in the way of what should be a cooperative effort. These financial challenges are long-standing and well-known, but have been significantly exacerbated by the onset of the pandemic. As we recently informed Congress, the pandemic is reducing mail volume at such an accelerated pace that immediate short-term financial relief, in addition to the $10 billion in additional borrowing authority recently authorized by the CARES Act, is necessary to ensure that the Postal Service can continue to serve the essential needs of the American people in the near term. The Board has also unanimously proposed a set of recommendations for how to provide short-term financial relief, as well as how to address the Postal Service’s structural problems over the longer-term.

Placing the Postal Service on a sustainable financial footing in both the near-term and the long-term is a critical issue that, given the broad support for the Postal Service, should be pursued in a spirit of bipartisan cooperation and unity. Politicizing the Postal Service only weakens the organization and reduces our ability to solve our current problems and to enable the Postal Service to continue to serve all Americans. Of course, the Board recognizes that different stakeholders will have different perspectives about the appropriateness of specific policy decisions, but the overall goal of preserving and protecting the Postal Service is one that should unify us all. For our part, the Board will continue to work in bipartisan manner to achieve this goal, and we urges all others with an interest in the Postal Service to do the same.
Explanation of Contribution
Attributable Costs are Similar to Variable or Marginal Costs
Represent the cost that would go away if the entire product went away

**Direct Labor**
- Cost of labor handling a product

**Indirect Cost**
- Supervision, vehicle, equipment, and facility-related costs

**Product Specific**
- Advertising
**Terminology: Institutional Costs**

**Institutional costs include:**
- Common costs not caused by individual products due to the fact we handle multiple products in the same network
- Traditional fixed costs
- Network costs which arise in delivery, transportation, and retail

**Delivery**
- Universal Service Obligations and appropriation rider language requires carriers to traverse core parts of their route daily regardless of volume
- Institutional 53%
- Attributable 47%

**Post Office**
- Maintaining a network of Post Offices in every community regardless of walk-in revenue
- Institutional 67%
- Attributable 33%

**Other**
- Data Collection, PRC, Office of Inspector General (OIG), Federal Employees Retirement System (FERS) Supplemental Liability, Retiree Health Benefit (RHB) Amortization
- Institutional 87%
- Attributable 13%
Attributable/Institutional Cost Breakout

• You may have seen articles discussing the Postal Service’s financial condition, and the possibility that the Postal Service may be forced to cease operations due to a lack of liquidity in the coming months.

• There is no doubt that the COVID-19 pandemic will have significant impacts on Postal Service volumes and revenues. The exact impact is uncertain, because it is dependent on factors such as how long the pandemic lasts, the amount of damage that it does to the American economy and the businesses that use the mail, and the extent to which our customers return to the mail after the pandemic ends. However, in a worst case scenario, we could experience very significant declines in mail volume and revenue both this year and next year.

• That said, as a result of the significant financial challenges that the Postal Service has faced for a number of years due to an inflexible statutory and regulatory structure, the Postal Service has already been taking a number of steps in order to preserve as much liquidity (cash and access to cash) as possible.

• The reason we have been taking those actions is to ensure that we can continue to provide prompt, reliable, and efficient universal postal services to the American people, even if contingencies arise which further threaten our financial condition.

• This is the very reason why the Postal Service has been defaulting on certain legal obligations to prefund retiree health and pension benefits-to preserve cash to ensure we can continue to fulfill our primary mission.

• Through this and other actions, the Postal Service has been able to build and maintain a reasonable level of liquidity of approximately $8 billion, which is benefitting us today. At the same time, because defaulting on legal obligations is not a long-term strategy for financial stability, the Postal Service has also been advocating for statutory and regulatory reforms to our business model.

• Further, on April 1st our Board of Governors authorized us to borrow an additional amount of $3.4 billion from the Department of the Treasury that is available to us under an existing line of credit. We have borrowed the full amount and further enhanced our cash on hand.

• Congress has given the Postal Service some limited emergency borrowing authority to respond to the COVID-19 pandemic. This allows the U.S. Treasury to lend an additional $10 billion to the Postal Service, if we can agree on appropriate terms and conditions.

• The Postal Service will also receive a temporary benefit from Congress’s action to allow employers to delay paying the Social Security tax that will enable us to conserve additional cash of approximately $1.6 billion.

• While the Postal Service appreciates the actions taken by Congress to date, the Postal Service remains concerned that we need additional relief to ensure that we can withstand even the worst case scenario that could directly result from the pandemic, given the highly uncertain nature of the effects that the pandemic will have on the economy.
• Because we entered this crisis with the level of available liquidity that we did, and because of other tools available to us, including those provided by the CARE Act, the Postal Service is in a reasonable position to weather the storm in the near-term.

• Though our financial outlook for future years is highly uncertain given the unprecedented nature of this pandemic, we are working strenuously to obtain further relief in the next COVID-19 stimulus bill to ensure that we have enough resources to weather even a worst case scenario and to position us for financial stability going forward.

• Further, as we consider these issues, it bears mentioning that we believe that policymakers understand the important role of the Postal Service to the Nation. Congress has designated the Postal Service as a “basic and fundamental service” provided by the Government to the American people, and the continued provision of postal services during times of emergency is designated both as an essential function under federal law and as part of the nation’s critical infrastructure.

• There is increased recognition in this time of crisis of the value of the Postal Service’s mission to bind the Nation together. As Americans are urged to stay home, the importance of the mail will only grow as people will need access to the postal system to vote, receive critical communications, and receive essential packages such as prescription drugs and other necessities.

• The Postal Service will continue to pursue those actions within our control to preserve liquidity, and will continue to work with policymakers to ensure that Americans have continued access to this critical government service, both during the course of this emergency and in the years ahead.

Facts / Positions

The grievance challenges management's November 2, 2015 decision to subcontract out, to a third-party contractor, certain types of work - namely, separating, bundling, and working on empty sacks and equipment (referred to as "Sac Vides") - traditionally performed by mail handlers at the Los Angeles International Service Center ("ISC"). The grievance alleges violations including, but not limited to, those arising under Articles 2, 3, 4, 5, 7, 8, 9, 12, 13, 14, 15, 25, 17, 19, 30, 31, and 38 of the applicable collective bargaining agreement ("CBA"); Handbook EL-921; NLRA Sections 8(a)(1), 8(a)(5), and 8(d); and principles of RI-399.

On or about November 2, 2015, pursuant to Article 32 of the CBA, management entered into a contract with a third party to reassigned and perform the Sac Vides work at another facility (the "Contract"). Management entered into the Contract primarily to free up much needed operational space at the ISC where the empty equipment had been stored. Management believed the enlarged operational area would increase mail processing volumes at the ISC. These considerations, management contends, satisfy provisions in Article 32 requiring concern to be given to "public interest, cost, efficiency, availability of equipment, and qualification of employees when evaluating the need to subcontract." The Contract remains in effect.
The Union asserts that management unilaterally entered into the Contract without notifying the Union. Thus, it asserts, the Contract runs afoul of Article 32 and violates the rights of the mail handler craft, including their wages, hours, and working conditions. For example, the Union contends that the Contract eliminates the opportunity for more jobs in the mail handler craft and reduces work and overtime hours for regular mail handler assistants and those employees working on light and limited duty assignments. The Union seeks the total cost of the Contract to the Postal Service as its remedy, or an amount of $1,556,990.31 through present.

Liability for this matter is probable because it is more likely than not that an Arbitrator will find management gave no advance notice to the Union identifying the Article 32 considerations prior to execution of the Contract. Moreover, many arbitrators have considered similar subcontracts to undermining the strength of the bargaining unit and deprive members of work rightfully theirs under the terms of the contract. Thus, it will be difficult to establish that management did not violate the CBA through the Contract.

However, if the Contract is determined to be in violation of the CBA, the Postal Service believes the most likely and maximum reasonable payout would be $974,610.00, or the number of hours at the overtime rate that mail handlers would have worked performing Sac Vides assignments from November 2015 to present. This figure is derived from the approximate number of total working hours the contract employees have spent performing Sac Vides work (3.5 contract employees x 40 hours per week x 4.333 [52 weeks per year / 12 months] x 51 months = 30,940 hours) multiplied by the mail handler overtime rate of $31.50. The Postal Service does not believe the amount sought by the Union -- the approximate $1.6 million cost of the Contract -- will be awarded because the Contract costs include items other than labor, which the Union is not entitled to recover. Thus, recovery of the total Contract cost would unjustly enrich the Union.

This case is set for arbitration on April 20, 2020.

Facts / Positions

Highlighting any revisions made since Report for FY2020 Q1:

New text and [deletion]

I. FACTS AND POSITIONS

On November 18, 2019, a carrier rolled through a stop sign, making a right turn and running into Maya Nainani, a pedestrian. The incident was captured on video by a neighbor’s home security camera. The camera shows the carrier walking around the front of the vehicle to see what happened, and then walking away from the pedestrian without offering any assistance. We understand she did, however, call for emergency help after returning to her vehicle.

II. ASSESSMENT OF LIABILITY

Based on information we have at this time it does not appear we have any defense to liability for this accident.

III. ASSESSMENT OF DAMAGES

We do not yet have complete information to allow for an accurate assessment of the injuries alleged in this case. The SF95 was only just received, and was submitted without any of the supporting documentation. If the description of injuries is accurate, this will be a very costly case. At this point counsel advises that Nainani suffered fractures and a severe brain injury with complications. He reports that she remains in intensive care (since the DOA) with a tracheotomy and is ventilator dependent. According to counsel, medical bills already exceed $2 million. Counsel indicated his belief that Nainani will likely be transferred to a TBI Care Center and then likely transferred to a skilled nursing facility, where she will likely remain for the rest of her life. Nainani was 72 at the time of the accident.

We have requested the actual medical documentation and until it is received we are unable to provide a more accurate valuation of these claims. However, given reported economic damages of $2 million, multiple fractures, a severe TBI, and an unlikelihood Nainani will be able to return to any enjoyment of life, we believe the claim could reach a value of up to $5 million.

Facts / Positions

1. CASE/GRIEVANCE BACKGROUND AND ARGUMENTS OF PARTIES:

This grievance was filed by the APWU on December 14, 2013. The work in question had been contracted to a Mail Consolidation Center (MCC), operated by "New Breed." This work had been performed by "New Breed" since approximately 1997. The APWU contends that once the contract was renewed most recently in April of 2013, that a notice and due consideration pursuant to Article 32 of the National Agreement should have been provided to the Union. The APWU also contended that based on new contractual language contained in the 2011 National Agreement the APWU should have been allowed to competitively compete for the work. Additionally that if the work could have been performed cheaper by the craft, the work should have been performed in house and therefore should not have been contracted out.

It has been management's position that the APWU has offered or established nothing other than a broad based claim of an Article 32 violation. For there to be an obligation to give due consideration to the factors enumerated in Article 32 as it relates to the clerk craft, and to provide notice pursuant to Article 32, it must first be established the work being performed by "New Breed" is clerk work. At no point, from 1997 to present had the APWU filed any jurisdictional claim related to the work in question associated with a new installation/facility, new work, or operational change. It was management's position that the APWU could not lay claim to work, and seize work by way of an Article 32 grievance. Additionally the APWU had not identified specific work they believed rightfully belonged to the clerk craft. The NPMHU intervened.
Management also raised a threshold issue, related to the timeliness of the grievance, in that the APWU filed the grievance in December of 2014 some eight months after the contract renewal.

1. A STATUS OF GRIEVANCE AND SETTLEMENT DISCUSSIONS:

The case was heard in arbitration on October 2, 2015. The arbitrator rendered a decision on December 3, 2015 sustaining the grievance in favor of the APWU, finding a violation of Article 32. However, the arbitrator remanded the case to the RDRC to determine craft jurisdiction of the work. A determination was made in the jurisdictional dispute by Arbitrator Lundberg on January 29, 2018. The issue regarding the proper remedy was remanded back to Arbitrator MacLean and a hearing was held on August 8, 2018. Arbitrator MacLean issued a decision dated September 30, 2018. In his decision, Arbitrator MacLean identified two distinct periods of time for purposes or a damages/remedy calculation. The first period runs from the beginning of the contract (April 1, 2013) through the date that the initial arbitration award was issued sustaining the grievance and finding a violation of Article 32 (December 3, 2015). The total remedy award for this first period of time was set at $2,668,608.00. The second time period ran from the issuance of the January 29, 2018 decision plus six months for staffing transition (July 29, 2018) through the present. The remedy award for this second period of time was set at $23,616 per week until the US Postal Service fully transitions the work to USPS staffing. The US Postal Service continues to work to determine whether the existing facility can be retrofitted to accommodate transition to full Postal Service control or whether an alternate facility is more feasible. That evaluation is ongoing and a completion date is not certain at this time.

On September 17, 2019, Arbitrator MacLean held a telephonic meeting with the parties where he corrected the monetary remedy of his award for initial period April 1, 2013 - December 3, 2015. The arbitrator stated that he made a mistake in adding up the number of weeks of the initial violation; therefore the amount to be paid for initial period April 1, 2013 to December 3, 2015 was corrected from $2,668,608.00 to $3,282,624.00.

April 1, 2013 - December 3, 2015 = $3,282,624.00
July 29, 2018 - Full USPS Staffing = $23,616 per week

2. ASSESSMENT OF LIABILITY: Management previously assessed the liability of this case as probable based on above mentioned ruling and if in the RI-399 process it was determined the work, or part of the work, being performed at the MCC is clerk work. If any of the work was found to be clerk work the likely remedy spans was calculated to be between $0 and $13,225,489. Following the September 30, 2018 ruling by Arbitrator MacLean, liability has been determined against the US Postal Service.

3. ASSESSMENT OF DAMAGES: Previously, the assessment of liability was determined by calculating the number of hours worked by the contractor to perform the work and multiplying those hours by the hourly rate for 36 PS Level 6 clerk. Utilizing that calculation method, damages were assessed at $13,225,490.10 through the end of FY2018, quarter 4.

Now that Arbitrator MacLean has issued his remedy award dated September 30, 2018, damages are assessed as follows:

Damages Period #1: April 1, 2013 - December 3, 2015 = $3,282,624.00
Damages Period #2: July 29, 2018 until Full USPS Staffing x $23,616 per week

July 29, 2018 – December 28, 2018 = 26 weeks
26 weeks x $23,616 per week = $614,016.00

December 29, 2018 - March 29, 2019 = 13 weeks
13 weeks x $23,616 per week = $307,008.00

March 30, 2019 - June 28, 2019 = 13 weeks
13 weeks x $23,616 per week = $307,008.00

June 29, 2019 - September 27, 2019 = 13 weeks
13 weeks x $23,616 per week = $307,008.00

September 28, 2019 - December 27, 2019 = 13 weeks
13 weeks x $23,616 per week = $307,008.00

December 28, 2019 - March 27, 2020 = 13 weeks
13 weeks x $23,616 per week = $307,008.00

$3,282,624 + $614,016.00 + $307,008.00 + $307,008.00 + $307,008.00 + $307,008 + $307,008 = $5,431,680

3.a CONTINUING ACCRUAL OF DAMAGES:

Pursuant to Arbitrator MacLean's September 30, 2018 decision, potential liability continues to accrue quarterly (13 weeks) as follows: $23,616 per week x 13 weeks = $307,008
On September 5, 2014, Arbitrator Stephen Goldberg issued a decision on a National level dispute regarding the assignment of work in POSTPlan post offices (Q11C-4Q-C 12243899). He held that the Postal Service violated the MOU Re: Clerical Work and Article 1.5 by assigning bargaining unit work in Remotely Managed Post Offices (RMPOs) Levels 4 and 6 to Postmasters and Postmaster Reliefs (PMRs).

On September 22, 2014, the parties agreed to an MOU establishing procedures to implement the award. The MOU states, "All clerk work in Level 6 and Level 4 Remotely Managed Post Offices (RMPO) be performed by APWU bargaining unit employees" within 90 days of the MOU. Furthermore, the Postal Service was to create and fill a minimum of 1,700 full-time duty assignments in Level 6 RMPOs. Level 4 RMPOs are to be staffed with one Level 6 Postal Support Employee (PSE). Level 18 offices are to be staffed with a Postmaster and a career employee.

On June 12, 2015, the APWU initiated a Step 4 dispute claiming that, the Postal Service was violating the September 22, 2014, POSTPlan MOU. Specifically, the APWU contended that; 1) PMRs were being improperly employed in EAS Level 18 offices, Level 6 RMPOs, and Level 4 RMPOs; 2) Continued use of PSEs in those offices was a violation of the award and MOU.

This case came to a hearing before Arbitrator Stephen Goldberg on March 7, 2017. On June 7, 2017, Arbitrator Goldberg awarded make-whole monetary relief to employees who were denied clerk work as a result of the Postal Service's failure to staff Level 4 and 6 POSIPlan post offices and Level 18 post offices. The arbitrator directed that the number of hours improperly denied to clerk craft employees shall be determined in the first instance by Postal Service records which show the hours worked by PMRs. However, the Postal Service will have the opportunity to show (and burden of proving) that some of those hours were spent performing work outside the clerk craft jurisdiction, or were spent performing window work in the absence of any trained clerk craft employees to perform that work. The arbitrator ordered a similar remedy for
EAS 18 offices where work was improperly performed by a PSE instead of a career clerk.

Arbitrator Goldberg remanded the case to the parties at the National level to determine a remedy amount in light of his findings, but retained jurisdiction to resolve any matters of interpretation or application. Either party could invoke his retained jurisdiction if they were unable to agree on amounts to be paid within 90 days of the award. The APWU invoked his jurisdiction, and a hearing was scheduled for February 13, 2018. The parties engaged in negotiations regarding a remedy payout, and reached a settlement on February 9, 2018.

II Liability Assessment

In response to a request for information submitted by the APWU, the Postal Service provided the union an excel spreadsheet which included PMR work hours in EAS Level 18 offices and Level 6 and 4 RMPOs, as well as PSE work hours in Level 18 offices and Level 6 and 4 RMPOs from January 1, 2015, through October 18, 2015. This information indicated that violations were occurring. Based on these data, the likelihood that the APWU would prevail in this case was considered probable.

III. Damages Assessment

The potential damages in this case began accruing 90 days from the signing of the POSTplan MOU, on December 21, 2014. We assessed the Maximum Reasonable Payout to be $65.8 M which represented the total number of hours PMR and PSE employees have been improperly used in RMPO Level 4 and 6 and in Level 18 offices multiplied by overtime rate of proper Level 6 career or non-career bargaining unit employee.

PMR (Hours) PSE (Hours) Damages (in $M)
RMPO 4 1,925,774 $46.4
RMPO 6 358,271 223,235 $12.6
EAS 18 42,257 469,902 $6.8
Total: $65.8

We originally judged the most likely payout to be one-tenth of that amount, or $6.6 million, given our view that the available data, alone, did not prove (much less measure) specific violations. The arbitrator's award, however, placed the burden on the Postal Service to prove that hours worked by PMRs in the specific offices were excusable.

In order to comply with Arbitrator Goldberg's award, Headquarters Labor Relations gathered supporting documentation from the field to identify PMR hours that could be excluded from damages.

The documentation raised serious problems. First it indicated that only 15% of the hours could be excluded from back pay. This figure would have led to an award of at least $55 million had a scheduled remedy hearing taken place. Second, it showed that local management had, at times, manipulated data to make it appear that craft employees were performing work in situations where the Postal Service was really improperly using a PMR. Had this information been presented to the arbitrator, he may have chosen to apply a severe penalty, such as time-and-a-half for all hours worked by PMRs (more than $82 million).

On February 9, 2018, the parties entered into a Remedy Agreement for $49.9 million. On February 20, 2020, the APWU provided a list of 9,368
individuals to be paid, totaling $44.9M. The Postal Service is working with the Eagan Accounting Service Center to complete the payments. A timeline for payment has not been determined. In accordance with the settlement, the remaining $5M (10%) is being held to be dispersed at a later date.
The McConnell Class is comprised of "all permanent rehabilitation and limited duty employees of the Postal Service who were subjected to the Postal Service's National Reassessment Process (NRP) between May 5, 2006 and July 1, 2011." The EEOC has categorized the Class claims into five separate issues:

1. Whether the NRP failed to provide reasonable accommodations;
2. Whether the NRP wrongfully disclosed medical information;
3. Whether the NRP created a hostile work environment;
4. Whether the NRP had an adverse impact on disabled employees; and
5. Whether the NRP disparately treated the disabled.

After years of discovery, the parties both moved for summary judgment on the class claims and on the Class Agent, Sandra McConnell's, individual complaint of discrimination. On June 4, 2015, the assigned Equal Employment Opportunity Administrative Judge, Erin Stilp (AJ Stilp), issued an initial Report of Findings without a hearing, and then subsequently issued a Final Report of Findings and Recommendations on the Class and Individual Claims at issue in McConnell (Class and Individual Orders) on September 21, 2015. In her Class Order, AJ Stilp found that the Postal Service rehabilitation and limited-duty employees were discriminated against based on disability when they were subjected to: (1) withdrawals of their reasonable accommodations; (2) hostile work environments; and (3) disclosures of confidential medical information. And in her Individual Order, AJ Stilp found that the Class Agent had been denied a reasonable accommodation under the provisions of the Rehabilitation Act when the Postal Service withdrew her modified job assignment and that she had been subjected to disparate treatment on the basis that she had been targeted for removal from her modified job assignment and she was in fact removed in violation of the Rehabilitation Act.
The Postal Service appealed the Individual and Class Orders and the Class Agent also filed a limited cross-appeal. On September 25, 2017, the EEOC Office of Federal Operations (OFO) issued a decision largely affirming AJ Stilp's June 5, 2015 Class Order, holding that the NRP violated the Rehabilitation Act. On October 30, 2017, the Postal Service moved the OFO for reconsideration of the decision. On March 9, 2018, the OFO denied the Postal Service's motion for reconsideration and reaffirmed AJ Stilp's Order and the September 25, 2017 OFO Order on appeal.

In compliance with the terms of the March 9, 2018 Order, the Postal Service sent notice to all class members informing them either of their right to file an individual claim for relief or, if applicable, that they are being desubsumed from the Class. In response, approximately 29,000 individual claimants submitted a claim for relief with the Postal Service's National EEO Investigative Services Office (NEEOISO). NEEOISO then reviewed all submitted claims and timely issued Final Agency Decisions (FADs) to 28,931 individual claimants. NEEOISO then began processing all timely appealed FADs.

On June 26, 2018, the Class, through Class Agent's Counsel, submitted an Emergency Petition for Enforcement of the March 9, 2018 Order arguing that the Postal Service issued premature FADs. On July 12, 2018, the Class Agent filed an appeal of all FADs issued on the individual claims for relief alleging that the FADs were issued in error and in violation of the EEOC's regulations.

On November 14, 2018, the OFO issued a ruling ordering the Postal Service to vacate all FADs on disputed claims for individual relief within 30 days and to inform the EEOC of its intent to dispute any individual claims for relief within 60 days. The OFO further ordered the Postal Service to provide a copy of the administrative file with the notice of intent to dispute for each disputed claim. Finally, the OFO identified EEOC Administrative Judge Monique Roberts-Draper (AJ Roberts-Draper) as the replacement administrative judge for the McConnell case going forward and tasked AJ Roberts-Draper to start and oversee the individual claim dispute process outlined in the EEOC's Management Directive 110 (MD-110) for the McConnell individual claimants.

Pursuant to the terms of the November 14, 2018 Order, the Postal Service notified the EEOC of its intent to dispute individual claims. On February 11, 2019, Class Agent's Counsel filed a Motion for Entry of Case Management Order and Proposed Case Management Order arguing that: (1) they continue in their role as Class Counsel and have a "continuing role as the representative of all Class Members who have elected to proceed through the relief process"; (2) the Postal Service did not properly notify "all Class Members of their right to file a claim for individual relief"; (3) individual claims should be adjudicated, in batches of 50 claimants selected by Class Agent's Counsel, by special masters appointed by the AJ and paid for by Postal Service, after conducting additional discovery on each claimants' individual claim(s) for relief; and (4) Class Agent's Counsel should be permitted to submit quarterly billing statements for their ongoing attorney's fees and costs to be paid by the Postal Service. The Postal Service opposed the Motion for Entry of Case Management Order and Proposed Case Management Order submitted by Class Agent's Counsel and submitted its own Proposed Case Management Order that follows the procedures set forth in MD-110 Ch. 8, Section 12.

On February 27, 2019, AJ Roberts-Draper entered a Case Management Order denying the proposals submitted by Class Agent's Counsel, largely adopting the Postal Service's proposed Case Management Order. Pursuant to the Case Management Order, the Postal Service must submit a list of names of all class members whose claim for relief it has disputed, or intends to dispute, no later than March 12, 2019. The Order also denied the request by Phase I Class
Agent Counsel, Thomas & Solomon LLP and Kator, Parks, Harris & Weiser, P.L.L.C. to be appointed "class counsel for all class members" and also denied their request that the EEOC appoint special masters to assist in the processing individual claims during the Phase II individual relief process. The Case Management Order further denies Class Agent's Counsel's request to reopen discovery, stating: "[t]here will be no discovery propounded in this matter." If upon receiving the submissions on disputed claims, AJ Roberts-Draper believes that additional information is needed to make a determination, she will issue an order to the parties to meet and confer to determine which party has the information, whether and how it can be produced so as to honor medical confidentiality, and a reasonable schedule for production of the needed documents.

The Case Management Order orders the Postal Service to provide a statement in support of its decision to dispute a class member's claim, attaching all relevant supporting documents or evidence, within 20 calendar days of receipt of the Order, on or before March 19, 2019. The Case Management Order also provides that individual claims may be settled without approval from AJ Roberts-Draper, and "group settlements must be approved pursuant to 29 C.F.R. §1614.204(g)." If the parties' agree to withdrawal of claims, AJ Roberts-Draper must be notified within 10 days of the agreement, and upon receipt of the request for withdrawal AJ Roberts-Draper "will issue an Order dismissing the claim and instructing the Agency to issue a Final Agency Decision with appeal rights to OFO."

On February 28, 2019, Class Agent's Counsel filed a motion for reconsideration of the Case Management Order entered by the AJ. The motion argues that they are "class counsel" and represent "all class members," that AJ Roberts-Draper should reopen discovery, that the Case Management Order "may prove ineffective," and that they will need extensions of time beyond the allotted 20 days to respond to the statements of dispute. The Postal Service opposed the motion and AJ Roberts-Draper denied the motion in full on March 20, 2019.

The Postal Service issued its statements of dispute on March 19, 2019, in accordance with the Scheduling Order. Claimants have begun filing their responses, and it is anticipated that all responses will be filed and pending before the Administrative Judge by the end of July 2019.

AJ Roberts-Draper held a status conference on May 13, 2019, during which she addressed several pending motions. AJ Roberts-Draper partially denied Phase I Class Counsel's request for reproduction of NRP files and ordered them to provide a list of claimants for whom they request NRP files. She reiterated that her ruling was limited and she will not allow discovery and document requests as a part of the individual claims process. Despite AJ Roberts-Draper's ruling, numerous claimants and their representatives have submitted demands for production of documents. The Postal Service has filed objections to the demands for document production.

AJ Roberts-Draper held another status conference on August 6, 2019, during which she ordered all Final Agency Decisions on partially accepted claims be vacated. The Postal Service vacated all partially accepted claims on August 16, 2019 and submitted dispute statements to AJ Roberts-Draper on October 7, 2019.

AJ Roberts-Draper held preliminary ex parte settlement conferences with any interested counsel or claimants during the week of August 19, 2019. During the call with Postal Service counsel, AJ Roberts-Draper indicated that she would like to focus on a potential global resolution and that she would be seeking to try to resolve the case globally. She also indicated that she understood that not all claimants submitted viable claims for relief.
AJ Roberts-Draper held a status conference on November 19, 2019. No rulings were issued and no further guidance on the Phase II process or timeline was provided. The AJ confirmed that there was no plan or capacity for the Commission to decide the approximately 29,000 pending claims, and therefore both the AJ and the Commission remain focused on attempting to resolve the case globally.

AJ Roberts held a status conference on January 24, 2020. During the conference, AJ Roberts-Draper denied a pending Motion for Sanctions against the Postal Service related to partially disputed claims. The Motion for Sanctions was filed by Phase I Class Counsel and counsel for other claimants. In denying the Motion for Sanctions, the AJ admonished Phase I class counsel and other counsel for re-litigating issues and seeking sanctions when the Postal Service did what her order required. AJ Roberts-Draper set a deadline of March 24, 2020 for submission of statements of claims for anyone who had a partially accepted claim, and a deadline of March 31, 2020 for submission of any supplements or corrections to claims. During the week of March 2-6, 2020, AJ Roberts-Draper held ex parte conversations with the Postal Service, counsel for claimants, and pro se claimants, as requested.

To date, three claimants whose claims were accepted by NEEOISO have been paid back pay: Barbara Riggs, Cheryl Polk, and the Class Agent, Sandra McConnell, discussed below. Claimant Riggs was paid $109,881.00 in back pay damages. Riggs’s remaining claims for additional damages are now in the disputed claims process, and she has not been paid interest on her back pay award. Claimant Polk was paid $12,872.18 in back pay damages and $5,181.31 in interest, and her remaining claims for additional damages are in the disputed claims process.

b. The Class Agent’s Individual Claim

On June 4, 2015, the AJ Stilp ruled on the Class Agent, Sandra McConnell’s, individual claim finding that: (1) she was a qualified individual with a disability and when the Postal Service removed her modified position it unlawfully withdrew a reasonable accommodation in violation of the Rehabilitation Act; (2) she demonstrated that the entire class of injured employees, including herself, was targeted for removal; (3) it was unclear from the evidence whether McConnell’s medical diagnosis was shared improperly with management officials; and (4) she failed to present any evidence that she had a fear of being forced to work for Wal-Mart related to the NRP.

AJ Stilp’s June 4, 2015 Order was appealed and on September 25, 2017, the OFO issued an order largely affirming AJ Stilp’s ruling on the Class Agent’s individual claims. The OFO reversed AJ Stilp’s ruling on the Class Agent’s hostile work environment holding that the Class Agent is entitled to seek damages for having been subjected to a hostile work environment.

On July 11, 2018, NEEOISO issued a FAD on Sandra McConnell’s individual claim and awarded her $22,500.00 in compensatory damages as well as back pay damages. McConnell was paid back pay damages in the amount of $28,367.36 and interest in the amount of $25,703.54. On August 10, 2018, Class Agent’s Counsel appealed the compensatory damages award. Ms. McConnell is currently seeking $300,000.00 in compensatory damages for her alleged emotional distress. The Postal Service filed its Response to the appeal on October 9, 2018. To date, the OFO has not issued an order on the Class Agent’s individual appeal.
c. Attorney's Fees

The OFO awarded the Class Agent attorneys' fees and costs incurred during Phase I processing of the class complaint. As part of the compliance process, the OFO ordered the Class Agent to submit a petition for attorneys' fees and costs to the Postal Service's EEO Compliance and Appeals office. The Class Agent submitted a fee petition on April 9, 2018 seeking approximately $18 million in fees, plus $577,000 in costs. The Postal Service engaged two expert witnesses to evaluate the fee petition and issue opinions as to the reasonableness of the requested fees and costs. These experts concluded that the petition seeks excessive hourly rates and includes unreasonable billing practices. On June 7, 2018, the Agency's EEO Compliance and Appeals office issued a FAD awarding Class Counsel $1,532,937.36 in attorneys' fees and $229,257.71 in costs. Payment of attorneys' fees and costs awarded by the FAD was allocated between the two law firms representing the Class Agent. A payment in the amount of $766,478.68 was made to the law firm Kator, Parks, Weiser & Harris PLLC, and payment in the amount of $995,727.39 was made to the law firm Thomas & Solomon LLP.

On July 6, 2018, the Class Agent appealed the FAD on attorneys' fees and costs to the OFO, and the amount of fees and costs ultimately awarded will not be known until a determination of reasonable fees and costs is made by the OFO. The Postal Service's Response to this appeal was filed on December 3, 2018. No decision has issued, and the appeal remains pending before the OFO.

V. Settlement

In September 2015, the parties conducted an in-person mediation with JAMS Mediator Michael Loeb in which Class Counsel initially demanded $18 billion to settle all claims in the McConnell case. The Postal Service did not respond to this outrageous demand; however, Class Counsel subsequently bid against themselves and reduced their settlement demand to $1.9 billion. The Postal Service declined to counter and Mediator Loeb continued to work to reduce Class Counsel's demand. While no further demand was made, Mediator Loeb indicated that Class Counsel was looking for a settlement in the range of $500 million to $1 billion, with the mid-point of $750 million being the target for settlement by Class Counsel. Mediator Loeb also indicated that he believed Class Counsel's bottom point was near $230 million. The Postal Service was unwilling to entertain a settlement in the stated range of $500 million to $1 billion and the mediation was unsuccessful. Other than the recent discussions with AJ Roberts-Draper, no further settlement discussion have taken place in the McConnell case since September 2015.

VI. Potential Monetary Value of the Claims

The Postal Service, in conjunction with its economic expert Economic Research Services (ERS), has monetized the various elements of the class claims. The Postal Service also calculated economic loss accounting for the Department of Labor, Office of Workers' Compensation Programs (OWCP) mitigation, which was previously not included. Additionally, the Postal Service examined claim rates, average damage and attorney's fee awards, and settlement rates from Law Manager, the Law Department's case management system, and EEOC data. It also conducted an in-depth analysis of the NWA subclass, which is addressed below, as well as those individuals whose claims were accepted and given awards in the now-vacated FADs, as well as
response rates and rates of representation in the now-reversed appeals process.

a. Economic Loss Calculations

ERS calculated the economic loss for 9,985 individuals that districts identified as receiving a NWA or a "Part Day No Work Available" determination after reassessment (NWA subclass). ERS limited its economic loss calculation to this NWA subclass because no other class members experienced any lost hours, and therefore, did not experience economic loss. (Please note that while we received a decision allowing damages for the employees who retired or resigned during the class period, we did not update the calculations for that subclass to avoid incurring additional cost of analysis. Totals for awarded back pay will be available as Eagan processes them. An average of $15,283 is used for all individuals experiencing economic loss.)

ERS determined lost earnings for the NWA subclass by first calculating all Leave Without Pay (LWOP) hours for the relevant time period. ERS reviewed actual LWOP records from the pay periods encompassing May 6, 2006 (the start of the class period) through June 26, 2015 (the data available to ERS at the time of this report). All LWOP hours that occurred prior to the pay period in which a district began Phase II of the NRP are excluded. If an employee had LWOP hours in the pay period that the district began Phase II of the NRP and had prior LWOP, then their LWOP hours in the pay period were excluded. In addition, if an employee had no LWOP hours in the pay period corresponding to the end of the class period (July 1, 2011), then ERS excluded all LWOP hours after July 1, 2011. Using this data, ERS forecasted the lost hours, and associated dollar value of those lost hours, from June 27, 2015 through September 30, 2015 (pay period ending October 2, 2015), to estimate losses through the end of FY 2015. This forecast was based on the average LWOP hours per pay period for the 1,511 individuals who had lost hours in the first 14 pay periods of 2015, ending June 26, 2015, valued at each person’s hourly rate as of June 26, 2015. ERS determined that the 9,983 NWA class members lost a total of 20,010,960 hours, valued at $525,850,518.

ERS offset these lost work hours by the amount paid to the employee through workers’ compensation payments made by the OWCP. However, OWCP payments are tax-free, whereas lost earnings are taxable, therefore, ERS grossed-up OWCP payments based on a 20% tax rate (15% federal and 5% state). ERS calculated total grossed-up OWCP payments at $440,399,808. This results in lost earnings minus OWCP mitigation of $85,450,710. Next, ERS calculated interest on lost earnings through the end of FY 2015, for a total mitigated lost earnings plus interest at $95,633,635.

In addition to lost earnings, ERS also calculated economic loss associated with lost annual leave, Thrift Savings Plan (TSP) contributions, and annual leave exchange, through the end of FY 2015 as follows:
- Lost annual leave hours of 1,285,884, valued at $33,741,598;
- Lost TSP contributions, based on lost employer contributions and interest, plus the interest only on the lost employee contribution, valued at $18,726,096;
- Lost annual leave exchange, plus interest, valued at $4,470,862.

ERS calculated total economic loss for the 9,983 NWA subclass members at $152,572,191 or $15,283 per person.

Please note that ERS estimated 1,044,392 hours of lost sick leave, with
an estimated value of $27,404,846. This value is not included in the estimated economic loss calculation because any restored sick leave would not be paid by the Postal Service until the sick leave was actually taken. Therefore, unlike annual leave, the Postal Service does not accrue liability for sick leave, as it is not paid out upon termination of employment.

b. Damage Estimates

Based on ERS’s economic loss calculations, the Postal Service created a damage model. In the model, the Postal Service assumed a 41% claim rate based on the 41% settlement claim rate in the Glover v. Potter class action for the 9,985 NWA employees. The Postal Service then assumes that 3% of the 9,985 potential claims will be successful either initially or on appeal, leaving 279 total successful claims. Using the economic loss of $15,283 per person, the Postal Service calculated its economic loss exposure at $4,263,957. However, the OFO has now ordered the Postal Service to enter into a dispute process with the approximately 29,000 claimants and it remains unclear what the process or outcome will likely be. Therefore, no change has been made to the current damage estimates.

The Postal Service assumed a 23% response rate for the entire class for non-economic compensatory damage claims, excluding those never assessed per AJ Stilp’s order. This is based on the number of claims received to date. The Postal Service assumed that 1,675 of the claims filed will be successful initially or on dispute or appeal and that each successful class member who filed a claim would receive an average award of $13,000 in compensatory damages. This award is based on a comprehensive review of EEOC compensatory damage awards in cases with similar factual scenarios and claims. This results in compensatory damage exposure of $21,775,000. This calculation assumes that 23% of 130,606 class members (approximately 29,428) have filed a claim, that 1,675 of those claims will be successful either initially or on appeal/dispute and that each would receive an average award of $13,000. This average is based on a mixture of initial awards from NEEOISO and other final agency decisions, as well as awards by EEOC administrative judges. It is possible that the OFO will, given the size and notoriety of the overall class claim, award significantly higher average damages for individual claimants. (Please note that AJ Stilp inaccurately identified a class size of 133,582 in her orders discussed above, however, there are in fact 134,606 class members. The Postal Service removed approximately 4,000 class members from this total for the compensatory damages calculation to reach 130,606, based on AJ Stilp's order on the motion to de-subsume.)

Combining the economic loss and compensatory damage exposure results in a total estimated damage exposure of $26,038,957.

The Postal Service then added a 27% attorney's fees award, the average attorney's fees award based on EEO data and industry practice, resulting in an estimated attorney's fee award of $7,030,518. Please note that Class Agent's Counsel is currently arguing on appeal that they represent each member of the class in Phase II and that their contingency fee is 30%, not 27%. The Postal Service then added $17,762,206 for the estimated Phase I attorney's fees awarded to or appealed by Class Counsel in the Class Order.

This results in a total exposure of $50,831,679. Subtracting the $1,762,195 already paid to the attorneys leaves a remaining exposure of approximately $49,069,484.

Please note that Class Agent's Counsel, Kator Parks, was recently awarded
Phase I attorney's fees in a smaller class action, litigated for over two decades, Garcia v. DEA, Case No. 100-2003-08442X. Class Agent's Counsel was awarded under $900,000 for over 20 years of work, including a nine-day liability hearing. However, given the much larger class size in McConnell (100 v. 134,606), the Postal Service anticipates significantly higher fees in this case. Class Agent's Counsel has already been awarded $1,762,195 by NEEOISO and has appealed that award and requested a total award of $17,730,506 on appeal. That appeal is currently pending.

VII. Final Note re: Monetary Evaluation

The monetary evaluation of this case, set out above, reflects a hybrid approach to determining liability in this case based upon discovery and internal analysis of available data as well as AJ Stilp's June 4, 2015 decisions, the 2017 OFO Order, the March 2018 OFO Decision on Reconsideration and information obtained through the claim filing process contemplated under the terms of the March 2018 OFO Decision on Reconsideration, and the November 14, 2018 OFO Order. Based on the facts available as of December 6, 2018, the Postal Service believes that the most likely payout amount in this case ranges from a low end of $49 million to a high end of $750 million, with no one amount more likely than another. The high end of the most likely payout range, $750 million, is based on conversations during the most recent mediation in the case. We have no reason to adjust the maximum reasonable payout amount at this time, as individual claims are still subject to the EEOC's ordered dispute process and subsequent appeals. The dispute process is likely to result in increased successful claims and awards, however, the Postal Service is unable to determine the likely outcome at this time.
As part of the 2010-2015 National Agreement, the parties agreed to the MOU re: Clerk Craft Jobs. The MOU required that the Postal Service conduct an audit of Executive and Administrative Schedule (EAS) positions and determine whether any of those positions perform bargaining unit work. If an EAS position was performing bargaining unit duties, the Postal Service was to return those duties to the APWU bargaining unit. The MOU also required that the Postal Service provide 800 administrative and technical jobs to the APWU bargaining unit. In reaching the 800 APWU bargaining unit jobs required by the MOU, the Postal Service was allowed to count those positions that were returned to the bargaining unit as a result of the audit described above. Ultimately, the audits resulted in the development of 438 AMS Specialist and Mail Flow Controller positions, leaving 362 positions unaccounted for.

On May 19, 2015, the APWU initiated a national-level dispute regarding the Postal Service's non-compliance with the MOU. The case was not added to the CLR at the time because the APWU did not seek a monetary remedy but rather merely the residual positions. When collective bargaining negotiations failed to reach an agreement, the APWU sought to have the Interest Arbitration Panel that decided the 2015-2018 National Agreement consider the issues raised by this case in rendering the new contract (i.e., a prospective remedy, but not back pay). The Panel declined, and the parties next met on the grievance during Q1 of FY 2017, at which time the APWU informed the Postal Service that it was seeking a monetary remedy. The Postal Service then entered the Contingent Liability Report accordingly.

The case came before Arbitrator Stephen Goldberg for a hearing on January 17, 2017. On March 31, 2017, the APWU clarified its demand for monetary damages: $157.9 million. The APWU sought back pay at the top step for level 8 ($39.75/hour) for the period January 1, 2012 through April 30, 2017, based on 2080 hours per year (prorated for 2017) for the 362 bargaining unit positions at issue ($156.6 million). Additionally, the APWU sought $1.3 million in unpaid union dues. The APWU's clarification came in response to a request by the arbitrator for the Union’s damage estimate.
The Postal Service argued that any monetary remedy should be based on compensation for employees who were harmed by placing them in the position they would have been in if all 800 jobs had been created timely.

Arbitrator Goldberg issued an award on April 21, 2017, agreeing with the Postal Service's view that only employees who were harmed by the failure to create all 800 jobs should receive compensation. However, the arbitrator ruled that backpay should date back to August 1, 2013, after he found that the Postal Service had not engaged in good faith efforts to create the remaining 362 positions due after that time.

II. Liability Assessment

The Postal Service did not fulfill its obligation to create 800 administrative and technical bargaining unit jobs and, as expected, the arbitrator held that backpay would be due for those employees who were harmed.

III. Damages Assessment

Based on the arbitral award, we have made the following estimate of the Maximum Reasonable payout. The Postal Service posted 280 Level 6 HR Clerk positions and 82 Level 7 Training Tech positions in the August and September bid cycles.

The employees who bid into the new jobs almost certainly had Level 6 positions before bidding into the new jobs. However, the APWU likely will seek a remedy that includes out-of-schedule premium for all hours included in the backpay award.

Between August 1, 2013 and June 30, 2018, applying the out-of-schedule premium of $13.00 per hour results in $42.6 million in potential liability. In addition, the one-grade difference between Levels 6 and 7 (for the 82 Training Tech positions) adds up to an additional $0.5 million in potential liability.

Furthermore, PSEs would have been converted to career status to backfill the vacancies created by the new positions. Under the worst case scenario, damages would be calculated as the difference between the PSE salary and benefits and the entry level career salary and benefits level from August 1, 2013 through June 30, 2018, or $18.2 million.

Adding $42.6 million, $0.5 million, and $18.2 million, with appropriate rounding up, results in a Maximum Reasonable Payout of $61.4 million.

To calculate the Most Likely Payout, we are estimating that the out-of-schedule premium will be half of the $42.6 million calculated above, or $21.3 million. This estimate is based on the likelihood that the union will receive out-of-schedule pay for some, but not all hours worked. The Postal Service will argue that no out-of-schedule premium is due because the purpose of out of schedule premium is to compensate employees for the inconveniences suffered as a result of having to work outside their bid schedules. None of the employees in this case actually suffered such inconvenience. We are unaware, however, of any arbitral precedent on this issue and we view the union's chance of prevailing on it as equal to ours. We further assume that the back pay based on the one-grade upgrade will equal $0.5 million.

Similarly, for PSEs we assume for purposes of calculating the Most Likely Payout that the actual damages will be half of the Maximum Reasonable Payout, or $9.1 million. This is based on the premise that the affected PSEs would have been otherwise converted to career status at some point between August 1, 2013 and September 30, 2018.

The total estimate for Most Likely Payout is therefore $31.0 million ($21.3
million for career employees bidding on the new positions, $0.5 million for the
82 upgraded employees, and $9.1 million for PSEs who would have been
converted to career status earlier.) Rounding increased the estimated liability
by 0.1 Million in Quarter 4 of FY 2018.

As of November 15, 2017, only 56 positions remained to be filled. For the time
period up to and including November 15, 2017, the liability calculation included
all 362 positions. Between November 15, 2017, and December 31, 2017, the
liability calculation included only the then-remaining 56 positions. Between
January 1, 2018 and March 31, 2018, the liability calculation included only 10
positions that remained unfilled. Between April 1, 2018 and June 31, 2018, the
liability calculation included only five positions that remained to be filled.
Between July 1, 2018 and September 30, 2018, four of the remaining
positions were filled, and the liability calculation includes only those four plus
the one that remained unfilled. For quarter 1 of FY2019, there was still one
position unfilled. In January 2019, the single remaining unfilled position was
filled. Because the liability associated with that position was well under
$100,000, we have not adjusted the most likely or maximum reasonable
payout figures.

Because all of the initial positions have now been filled, the liability calculation
includes the estimated liability through January 2019, and the damages are
capped at this level.

A hearing on remedy was scheduled for March 29-30, 2018, but was
postponed and has not been rescheduled. We estimate that it will take more
than one year to schedule the hearing, hold it, submit post-hearing briefs, and
receive a final award. Thus, we estimate that it will take 1-5 years before there
is a final resolution of this case.
UNION’S POSITION: This grievance claims a violation of Articles 1, 5, 15, 19 and 37. The primary issue surrounds the TACS training for Lead Clerks. The union alleges that the NEA unilaterally modified the required 8 hour training course that was identified in the February 4, 2016 Step 4 settlement. The union alleges that there was no agreement to proceed with a 45 minute training course.

The union also contends that management's decision to not provide the 8-hours of training that was in effect when the Step 4 settlement was signed resulted in EAS performing bargaining unit work. However, Postal Service records indicate that training continued throughout the entire period. The union has failed to establish through the case file that Lead Clerks were not performing TACS duties.

MANAGEMENT’S POSITION: Management’s position is that the modification to the training was not a NEA initiative but rather HQ’s instruction that were distributed nationally on August 1, 2016. The subject grievance was filed the following day on August 2, 2016 citing Article 15.2 Step 3(f) of the National Agreement which reads:

Area-Wide Grievances

Article 15.2 Step 3(f) provides for the Regional Coordinator or National Business Agent to file one grievance directly at Step 3 when the issue involves a new or changed district or area-wide policy, instructions or guidelines.
The intent of this provision is to discourage the filing of multiple local grievances. This type of grievance may be placed at the head of the appropriate arbitration docket.

By definition, the grievance does not fit the definition of an area-wide grievance since we can prove that we were adhering to the HQ’s directive.

Damage Assessment:

The union’s proposed settlement involved pay for all Lead Clerks who were not performing TACS duties since the signing of the Step 4 in February 2016. The union proposed 3 hours a week in F4 offices and 6 hours a week in F1 offices. The amount sought encompasses a timeframe of 202 weeks and 374 F1 clerks and 1123 F4 clerks. The 1497 clerks identified represent all employees with a Lead Clerk occupation code and does not represent employees who are required to be assigned TACS duties.

The "Amount Sought" calculation ($20 million—which increases each quarter) is derived from taking the applicable hourly rate ($26.63), which, in Function 4 offices, generates a weekly claim for $79.29 and, in Function 1 offices, a weekly claim of $159.78, multiplied by 215 weeks. There are 1,013 Function 4 offices and 82 Function 1 offices within the ambit of this grievance.

F4: $79.29 x 215 x 1013 = $17,268,965.55  
F1: $159.78 x 215 x 82 = $2,816,921.14  
Total: $20,085,886.69

In the event that the union is able to proceed past the procedural arguments management will argue that the number of Lead Clerks who are required to be assigned TACS duties is significantly less than 1497; based on the February 4, 2016 settlement signed by the parties. Management would also assert any liability would be limited to a period beginning 14 days prior to the filing of this grievance on August 2, 2016 rather than the February date the union asserts. This number does not take into account any Lead Clerks who have been performing TACS duties during the identified timeframe. We would also be prepared to argue the amount of time daily spent by a Lead Clerk is significantly less than the 3 and 6 hours calculations the union has provided. In the event that the union succeeds with an Article 1.6b argument and a monetary award is made, rough calculations based on employee numbers alone indicate that the damages could reach or exceed one million dollars.

We believe that the APWU will rely heavily on a 12/2/14 arbitration decision from Boston Massachusetts (GATS B10C-4B-C 14150877) which awarded a Lead Clerk 15 minutes a day at the straight time rate of pay for every day going back to when the employee should have received the TACS training. In that case, Arbitrator Holden, stated in her award:

"Management violated the National Agreement by performing bargaining unit work in the Weston Post Office as it relates to TACS (Time Attendance Collection System) time keeping duties.

For remedy Management shall stop performing Level 7 duties; the grievant shall receive the mandatory TACS training; and the grievant shall assume the duties of his job description.

The grievant shall receive straight time back pay from the date he was denied taking the TACS training to the date of this award for time the Weston Branch manager and supervisor did (TACS) bargaining unit work."

This individual received $1,246.19 as settlement.

If the current arbitrator adopts this position, we have 1013 Function 4 lead
clerks and 82 Function 1 lead clerks who should be assigned TACS duties.

- The rate of pay is calculated is $26.63 per hour.
- F4 operations is calculated 15 minutes a day for TACS duties; 1.5 hours per week ($39.95/week)
- F1 operations is calculated 1.5 hour a day for TACS duties; 10.5 hours a week ($279.62/week)
- The calculations begin 8/1/16 through 3/31/20; approximately 192 weeks.
- F4: $7670.40 x 192 weeks = $7,770,115.20; 1013 F4 lead clerks x $7670.40 = $7,770,115.20
- F1: $50,051.98 x 179 weeks = $4,104,262.30; 82 Function 1 lead clerks x $50,051.98 = $4,104,262.30
- Total projected liability=$11,874,377

We feel this is the Maximum Reasonable Payout.

However, it is our position that a monetary award is not appropriate in this case. Rather, because the Settlement Agreement did not establish a timeframe within which the training was to be provided, it is our position that the appropriate award in this case if to direct that the individuals be provided the training that was in effect at the time of the Settlement Agreement. Thus, at this time we feel the Most Likely Payout should be zero.

Concerns with this case:

- On February 8, 2017 Long Island management indicated that their Lead Clerks had access to TACS, but it was 'read-only' access. The TACS Coordinator in the Long Island District has since modified the access so the Lead Clerks could also make adjustments. Despite having their clerks trained and providing them access, we did not fulfill the portion of February 4, 2016 settlement that would have the Lead Clerks adjust rings or run reports.

- Only 22 Lead Clerks in Long Island had TACS access which prompted. A review of the other Districts showed how many Lead Clerks area-wide had TACS access.

- Lead Clerks who do not have access to the TACS program are not in compliance with the February 4, 2016 Step 4 Settlement Agreement. The above chart demonstrates that we have only provided TACS access to approximately 12% of Lead Clerks area-wide in compliance with the February 4, 2016 Agreement.

- In addition individual Districts need to be canvassed to determine how many of the 172 Lead Clerks who have TACS access are being utilized.

- In a pre-arbitration settlement for multiple TACS-use grievances in Boston MA management settled for $340,000.00. In this settlement the union demonstrated that multiple employees were trained in TACS but never assigned TACS duties. As a result of this settlement, the Boston District would not be considered a part of the subject area-wide grievance.

- 842 Clerks were provided the "Lead Clerk System Training" which is the 4.5 hour course. At a minimum we owe these employees an additional 3.5 hours of training to satisfy the 8 hour training that HQ previously stated and is now reiterating is required. The additional training equates to 2,947 hours.

- In addition to the training issues we will need to overcome the fact that lead clerks were never required to obtain TACS access and, therefore not assigned TACS duties. Records show that in the NEA of those employees trained only 12% of all lead clerks have access. Of the 172 lead clerks who have access...
we know that 22 of them were not provided the correct access; read-only rather than the required "write" access. This compromises our position further.

This case was presented before Arbitrator Gudenberg on March 21 and 22, 2017. The parties submitted briefs on April 25, 2017. We typically receive arbitration decisions within 30 days of final receipt of briefs.

Update: Arbitrator Gudenberg decided that the references to the Boston settlement were not admissible since they were clearly defined as non-precedent setting and non-citable. However, in his decision he directed the Service to provide the TACS training records to the union to establish if there is any remedy based on when the training was received and who subsequently is performing the TACS input. The remedy portion of this arbitration is scheduled in May 2018.

Update: We held a remedy hearing on May 2, 2018. The union requested to have Rickey Dean, Manager APWU Contract Compliance testify as a hostile witness. I objected to this request. The arbitrator, noting my objection, allowed the union to attempt to contact Mr. Dean but he was unavailable. We are currently in discussion with the arbitrator to determine what the next steps should be relative to this arbitration. I am pushing for the arbitrator to render a decision based on the case file, his prior decision and the information that was shared at the remedy hearing. The union is pushing for an additional witness, additional information to be presented and to conclude with written briefs.

Update: This case and pending arbitration are currently held under the national level grievance filed on the same issue; GATS Q10C-4Q-C 18273555.

Update: The national level grievance filed on the same issue; GATS Q10C-4Q-C 18273555 was resolved on 9/5/2018.

Update: The advocates for this case have sought a date from the arbitrator to submit written briefs. No response has been received as of March 1, 2019.

Update: The arbitrator sustained the grievance but did not award any remedy. The arbitrator remanded the remedy to the parties on May 14, 2019. Arbitration decision attached.

Update: The APWU proposed a settlement of $25 million for this case. This settlement offer is based on a formula that grossly inflates the amount of time needed to perform TACS duties. Their proposal also compensates every lead clerk (not required), trains every lead clerk with the supervisor TACS training (not required) and does not account for any lead clerks properly performing the TACS work since 2016. The proposal also does not align with the 9/5/18 Step 4 settlement.

**Update FY 2020-Quarter 2:** I reviewed [deletion] a list by name of every office that earns a lead clerk. In offices that only have 1 lead clerk the TACS duties should be assigned to that individual. In plants or large post offices the duties may be assigned to more than 1 lead clerk. I cross-referenced the list of lead clerks with the lead clerks throughout the NEA who have TACS access. If a lead clerk does not have TACS access they cannot perform any of the TACS duties for the office and, by default, management will be performing all of the TACS functions. Knowing this information, the likelihood of going back to arbitration and receiving a decision that doesn't afford the craft any monetary compensation is very slim. The TACS duties have belonged to the clerk craft, in lead clerk offices only, since 2016. My analysis does not take into consideration any lead clerks who have TACS access but have not been assigned the TACS function which would increase our liability. Establishing a most likely payout would require an extensive and time-consuming analysis,
district by district, office by office and employee by employee to determine who, and to what extent, has been performing the TACS functions since 2016. That said, we do have districts who have assigned the TACS functions to the lead clerks which would result in a liability less than what we have currently calculated as our maximum reasonable payout of $11,874,377
Report for FY2020 Q1: New text and [deletion]

I. FACTS

On March 8, 2011, the APWU and the Postal Service agreed to a Global Settlement to resolve longstanding disputes regarding supervisors’ performance of bargaining unit work under Article 1.6. The Global Settlement set forth bargaining unit work hour limits for postmasters and supervisors in Level 18 offices. Under the Global Settlement, in Level 18 offices, a postmaster is permitted to perform no more than 15 hours of bargaining unit work per week. The Global Settlement also provided that "All time the supervisor or Postmaster spends staffing the window during the day will be counted toward the permissible bargaining unit work limits." The parties had an interpretive dispute over this language, which the APWU appealed to arbitration. On March 29, 2013, Arbitrator Shyam Das issued the Global Settlement merits award, finding that "staffing the window" applies to "all time the supervisor or postmaster is covering the window, which, in the absence of a clerk, includes the time the window is open."

On December 5, 2014, the parties signed the Global Settlement Remedy Agreement (GSRA) to resolve outstanding remedy issues surrounding postmasters and supervisors in small offices who were performing bargaining unit work. Employees in most Level 18 offices use computers known as Point of Sale (POS) terminals to conduct transactions at the retail window. In the GSRA, the parties specified that, "In the event that both a clerk and a postmaster/supervisor are staffing the window at the same time, all the time that the postmaster/supervisor is logged into POS (defined to mean the entire period from start of day to end of day) will be counted as bargaining unit work."

The GSRA stipulated that Postal Service Form 1260 (now automated as Web1260) would serve as the document of record for postmasters to record all time performing bargaining unit work. The GSRA provided for a local informal adjustment process if there was a dispute over the amount of bargaining unit work a supervisor performed in a given week, through which clerks could be compensated the appropriate amount in the Postal Service’s Grievance-Arbitration Tracking System (GATS) if the Union could show the...
Postal Service improperly reported the amount of bargaining unit work performed on the Web1260.

When the parties signed the GSRA in 2014, the software on the POS terminals was known as "POS One." Both clerks and postmasters could use POS One to conduct transactions and other business. If a postmaster needed to staff the window and perform retail transactions (i.e., bargaining unit work), he or she would log into POS One by conducting a "start of day." When a postmaster was finished staffing the window, he or she would perform an "end of day" process in POS One, which would close out that particular session, even if it was not the ultimate end of the workday. If a postmaster's session on the window produced more than $100 cash, the end of day process would include a final remittance (or deposit), which required reconciling and taking money out of the retail drawer for eventual deposit to the bank. Once a postmaster conducted the end of day process in POS One, he or she could no longer perform any bargaining unit work in the system without conducting another start of day. The start of day / end of day process could be completed multiple times in a day in POS One by a postmaster.

In 2014, the Postal Service began piloting new software for the POS computer terminals known as Retail Systems Software (RSS). The Postal Service notified the APWU about the RSS deployment in 2014. When the parties met to discuss the RSS in April 2015, the APWU raised a concern that RSS did not have the same functionality as the POS One software. Namely, the APWU correctly observed that the Form 1412 generated in RSS did not indicate the time an employee started his day in the system, making it impossible to track how much time was spent on the window. To address the Union's concerns, the Postal Service modified RSS to add the start time to the Form 1412. Along with that software modification, the Postal Service also added a function known as the Postmaster End of Day (PMEOD) button. The purpose of this button was to make the end of day process for a postmaster more efficient by eliminating the need to make multiple final remittances (deposits) throughout the day. After conducting an end of day using the PMEOD button, if the postmaster later conducted another start of day to enter back into the system, the cash retained from his previous session would roll into the next session. This allowed the postmaster to conduct multiple end of days without risking accounting errors by having to reconcile and pull money out of his or her drawer every time. When a postmaster finished working the window for the day, he or she would conduct a regular end of day and make one final remittance/ deposit.

The Union initiated a national-level dispute over the PMEOD button on December 23, 2015. The Union claimed that the Postal Service "replaced POS [One] with the new RSS system to circumvent the window reporting of bargaining unit work." The Union claimed that the PMEOD button does not accurately reflect the reporting of time spent staffing the window by postmasters performing bargaining unit work, and that the parties' understanding of the end of day process necessarily included multiple steps including a final remittance/ bank deposit. The Union argued that once a postmaster logged into RSS, the entire time from the postmaster's start of day in the system to the time the postmaster conducted a full, final end of day with a remittance/ deposit must be counted as bargaining unit work. In other words, according to the Union, any end of day process using the PMEOD button would not stop the clock.

The case was scheduled for arbitration, and hearings took place on July 13-14, 2017 in front of Arbitrator Shyam Das. The Postal Service argued that the PMEOD button was not created to circumvent the GSRA, but was an efficiency added to allow postmasters to have multiple start of day/ end of day periods in one work day while only requiring one bank deposit. The Postal Service noted that it is undisputed that postmasters can have multiple start of
day/ end of day sessions in a work day. The PMEOD button did not change anything as far as how bargaining unit work was to be recorded or counted under the GSRA.

On December 8, 2017, Arbitrator Das issued an award finding in favor of the APWU. Arbitrator Das concluded that the protections afforded the APWU in the GSRA were “lessened to a meaningful extent” by the Postal Service’s unilateral deployment of the PMEOD button. Arbitrator Das ordered the Postal Service to disable the PMEOD button. Das returned the issue of back pay to the parties to “determine an appropriate remedy that is fair and reasonable taking into account all relevant factors.”

II. ANALYSIS OF LIABILITY

We assess this grievance as "probable." The Postal Service lost this case on the merits, and now must assess damages. It is likely the Postal Service will have to pay some amount of back pay, but the amount is extremely difficult to ascertain for the reasons explained below.

III. ANALYSIS OF DAMAGES

The Union has not specified any amount of damages it is seeking, and has only made vague, unsubstantiated allegations of widespread misuse of the PMEOD button. This case was previously not reported as a contingent liability matter because the parties already have a mutually agreed-upon process for resolving local violations related to the Global Settlement limitations on the performance of bargaining unit work. Any potential back pay issues would have been addressed through that process and individually would not have reached the $1 million threshold. When we assessed the case, we concluded that any back pay issues related to exceeding the 15 hour limitation in Level 18 offices by postmasters, which includes any underreporting of staffing the window should have already been handled through the parties’ agreed-upon informal adjustment process. We reasonably concluded that the damages in this case should not reach over $1 million.

However, in light of the language in Arbitrator Das’ award, a larger back pay remedy than anticipated may occur. Currently, we are still reviewing information to estimate the amount of back pay due with accuracy. Labor Relations is currently conducting a random survey of the 7,404 Level 18 post offices, which requires 200 offices to submit Form 1412s for the liability period to determine whether and how those offices used the Postmaster End of Day Button in the first place. Labor Relations will then have to compare the hard copy Form 1412s to the Web1260 reports to ascertain the accuracy of time reported for postmasters performing bargaining unit work, and whether there was any difference in the hours reported for postmasters performing bargaining unit work and thus a back pay remedy due. This process is completed manually, then the results extrapolated to have a sense of the size of a possible remedy.

We have modified the upper bound of the maximum reasonable payout to $21.3 million dollars. This update is calculated based on a data review which showed that approximately 53% of Level 18 offices (3,935) were found to have misused the PMEOD button and underreported an average of 2 hours of bargaining unit work for each week for the liability period. Under this scenario, the Union would be entitled to compensation at the career straight-time rate for the 2 hours of underreported bargaining unit work per week for each office, which would total $21.3 million in back pay (3,935 Offices X 2.0 Hours X 104 Weeks X $26 Career Straight-time rate = $21.3M).

Regarding the most likely payout, we can reasonably extrapolate the sample to a total of 3,935 total offices impacted to update the most likely payout to
$14.7 million dollars. The respondents in that sample have an average of 1.58 hours per week (rather than the 2 hours used in the maximum reasonable payout scenario above) and an average of 91 weeks of having used the Postmaster End of Day Button. Using a career straight time (ST) rate of $26/hour, the liability would be $14.7 million ($26.00 per hour x 1.58 hours per week x 91 weeks x 3,935 offices).

Due to the fact that the Postmaster End of Day Button was deactivated in December 2017, we are capping the damages in this case to those listed above. If our discussions with the Union regarding remedy identify new considerations that would alter the calculations, we will update the damages as necessary.

***UPDATE***

A hearing on remedy has been scheduled for May 27-28, 2020. However, Labor Relations is continuing discussions to reach a resolution with the union on the remedy prior to the hearing.

#### Facts / Positions

Highlighting any revisions made since Report for FY2020 Q1:

New text and [deletion]

This matter arises out of a motor vehicle accident that occurred on December 16, 2016 in upstate New York. The matter was initially received as an administrative claim in 2017, but based on the approximately $100,000 in medical cost and good prognosis for the plaintiff's recovery that was provided to us at the time it was not assessed as having a potential seven figure value. The matter remained in the administrative stage while the plaintiff's medical condition developed. However, when litigation was filed by plaintiff in December 2018 and was eventually served on and forwarded from the US Attorney's Office to the USPS Law Department in February of 2019, the plaintiff's injuries were alleged to be permanent and his attorney provided us with a $2.3M life care plan, making it clear the matter should be entered into the CLR system.

The plaintiff was a rear seat passenger in a vehicle traveling southbound when a letter carrier operating an LLV traveling northbound attempted to make a left turn into a gas station directly in front of the plaintiff's vehicle resulting in the collision. The carrier was issued a traffic citation for failure to yield the right of way on a left turn and admitted to the investigating police officer that he did not see the plaintiff's vehicle when he made his turn. Therefore, it appears highly probable that the carrier will be found 100% at fault.

The plaintiff, 54 years old, struck his head on the roof of the car on impact. He was transported to the hospital by ambulance complaining of neck pain and he was unable to move his arms and legs. A series of CT scans revealed multiple vertebral fractures in his neck with compression of his spinal cord. He was transported to another hospital for a higher level of care. Plaintiff was hospitalized for one month where he received therapy and pain medication. He was treated for partial paralysis and required a wheelchair for a period of time. Thereafter, he was discharged to a rehabilitation center as an inpatient for six weeks where he continued physical and occupational therapy. After being discharged, plaintiff continued to receive outpatient rehabilitation services for approximately two more months and the prognosis initially appeared positive.

However, Plaintiff alleges his medical condition did not improve, and he now
has medical liens estimated at $400,000. In addition, he has not returned to work and now claims lost wages of at least $150,000. The records provided further indicate he applied for and was approved for Social Security Disability benefits. His current medical reports indicate that he is totally disabled and will require extensive medical care for the rest of his life. His attorney has provided a Life Care plan for future medical treatment and therapy that will cost for approximately $2.3 million.

This action is still in discovery, however, initial discovery and Plaintiff's deposition have taken place. The parties have requested that additional depositions be stayed so the parties can proceed with assessing damages and overall value of the injuries at issue in an effort to prepare for mediation or other settlement discussions. The parties are working to obtain necessary documents and expert opinions for purposes of a mediation or settlement discussion, which would likely occur sometime in mid 2020. The Plaintiff testified in his deposition that he is still in a lot of pain, and though he can get around his house, he needs help doing chores and still uses a wheelchair when he leaves his house. The U.S. Attorney's Office has retained 2 expert witnesses (an internal medicine specialist/hospitalist, and an economist) and 1 litigation consultant specializing in vocational rehabilitation. The internal medicine specialist/hospitalist confirmed the significance and permanence of Plaintiff's injuries. The economist reviewed Plaintiff's life care plan and confirmed that future damages will be significant. The vocational rehabilitation consultant is in the process of performing her review of the Plaintiff's medical records but it is expected that she will determine him to be unemployable. The economist estimates that the total present value of the life care plan is in the $2-3 million range and this estimate does not include pain and suffering, which will also be a significant number.
Northrop Grumman Systems Corp. ("Northrop") filed a civil action in the United States Court of Federal Claims against the Postal Service seeking approximately $180 million in compensation under a procurement contract. In its answer to the complaint, the Department of Justice ("DOJ"), on behalf of the Postal Service, filed a counterclaim for approximately $410 million. Though that counterclaim is reported on a contingent-receivables report, the entire case will be discussed in this contingent-liability report.

In February 2007, the Postal Service awarded a contract to Northrop to supply 100 production units of the Flats Sequencing System ("FSS"). The FSS was intended to be an improvement over existing automation systems because the FSS sorts "flat mail" (e.g., magazines) into delivery or "walk sequence" order. Absent such machinery, carriers must sort flats by hand, which is a time-consuming, expensive process.

Under the original contract schedule, the FSS should have passed its First Article Test ("FAT") by July 2008. The initial FAT was delayed until November - December 2008, and was not successful, as the first article machine failed to satisfy all minimum contract performance requirements. With the cooperation of the Postal Service, Northrop undertook a "replan" effort to address most of the deficiencies. Eventually the FSS passed a modified FAT, and deployment was allowed to proceed. Deployment should have been completed by October 2010 under the original contract schedule, but because of Northrop's inability to pass FAT, deployment was not actually finished until August 2011. Northrop alleges the Postal Service is primarily responsible for the deployment delays because the Postal Service's overzealous oversight interfered with Northrop's design efforts and because the Postal Service demanded design changes over and above what the contract required. The Postal Service contends it did...
not interfere with Northrop’s contractual performance, and that most of the additional work that Northrop was required to perform was necessary in order for the FSS to satisfy minimum performance requirements.

Because the machines were delivered late, the Postal Service was not able to realize the savings (primarily in labor costs) that the FSS would have provided in 2010 and 2011. Given that the Postal Service was forced to incur labor costs that would not have been incurred if Northrop had performed its contract properly, the Postal Service stopped certain payments to Northrop beginning in the summer of 2011, for a total of approximately $63 million ($41 million of which was invoiced by Northrop), to offset the harm caused to the Postal Service. To recover the remainder of the costs of employee hand sorting, the Postal Service filed a counterclaim for $410 million, which included the $63 million offset. In addition to lost labor savings (i.e., delay damages), the Postal Service is also seeking to recover compensation for additional testing costs and for various items of work that were not delivered by Northrop or were not performed in accordance with contract requirements. This was originally calculated to be approximately $20 million, but it was reduced after discovery to approximately $12.5 million. Roughly half of that amount, however, $6.3 million, represents costs that the Postal Service might incur in the future, rather than out-of-pocket expenses, i.e., $4.4 million for Design Warranty Costs (Count VIII) and $1.9 million for Life Cycle Support (Count IX).

Liability Assessments:

Our assessment of the case is that it is reasonably possible that the Postal Service will be liable to Northrop for some constructive changes to the contract. We further assess that it is reasonably possible that Northrop will be liable to the Postal Service for breach of contract, primarily due to the delayed delivery of the FSS machines. In the event that Northrop is found liable for breach of contract, the Postal Service will be entitled to retain the $63 million in withheld payments to the extent it can prove delay damages.

Damages and Receivables Assessments:

Northrop seeks damages of approximately $179 million, consisting of approximately $116 million (exclusive of interest) for more than 50 alleged constructive changes as well as alleged disruption and delay caused by the Postal Service, and approximately $63 million for withheld payments. We estimate the maximum reasonable payout on Northrop’s claims for constructive change orders, delay, and disruption to be in the range of $6 to $14 million (plus $1-2 million interest). If the Postal Service is unable to prevail on its counterclaim (i.e., is unable to substantiate its delay damages in excess of the $63 million it withheld), however, then damages to Northrop would increase substantially -- we would have to remit some or all of the $63 million (plus up to $10 million interest) that was withheld in anticipation of those damages. That would result in total, maximum reasonable damages to Northrop of approximately $89 million, including interest.

Potential damages (receivables) in favor of the Postal Service under the counterclaim were based primarily on the forecasted amount of approximately $393 million to be saved in the 2006 Decision Analysis Report (DAR) supporting the FSS procurement. Our damages expert in this litigation has concluded that the Postal Service’s lost savings, due to the late arrival of the FSS machines, actually totaled approximately $180 million. The main factor accounting for the lower damages figure was the reduction in mail volume since creation of the DAR. We think it is reasonably possible that we will prevail on that counterclaim in its entirety, in which case we would still need to subtract the $63 million in withheld payments from that total.
Accordingly, we estimate the total, maximum reasonable payout (liability) to Northrop to be approximately $89 million and the total, maximum reasonably payout (receivable) to the Postal Service to be approximately $117 million.

Our assessment of the most likely payout continues to evolve and is difficult to quantify, and is informed by information learned during litigation. The court heard oral argument on the parties’ respective dispositive motions during the week of September 10, 2018. We received a decision from the court on the pending dispositive motions on October 17, 2018. The decision was largely favorable for the Postal Service. The court reduced our damages claims by about $600,000 and Northrop's constructive-change claims by approximately $7.4 million. The merits of the parties’ delay claims were not presented in the motions.

The parties conducted a three-day mediation in Washington, DC on May 13-15, 2019, and continued the mediation for one day on June 12, 2019. Settlement offers were exchanged, but the parties were nearly $100 million apart, and we have ended the formal mediation. Northrop reached out to discuss settlement after the mediation, and we met for one day in October 2019, but no progress was made.

The mediation was useful for purposes of assessing the strength of the parties' claims, but has not persuaded us to alter our assessment of the overall "most likely payout" of roughly $20-40 million to Northrop. Our view is that Northrop will likely receive damages in the range of $5 to $10 million (plus interest) on its constructive-change claims, and will likely fail to prove any entitlement to damages on its delay and disruption claims. Whether it can prove its entitlement to the $63 million in withheld payments will depend primarily on whether (and the extent to which) the Postal Service can prove that it suffered lost savings as a result of Northrop's delayed performance. Because of the many hurdles the Postal Service would need to overcome to establish its counterclaim, we think it is reasonable to assess the most likely outcome as requiring the Postal Service to repay a portion (but not all) of such withheld payments. Accordingly, we believe that the overall most likely payout to Northrop should remain in the $20 to $40 million range. As noted above, however, the range of reasonable outcomes remains very wide, from nearly $90 million in Northrop’s favor to nearly $120 million in the Postal Service’s favor.

Trial began [deletion] in Washington, DC on February 3, 2020, and is expected to last for seven weeks (not consecutive). After completion of the first 4 weeks, the court postponed the next trial period due to the current public health crisis. Trial is scheduled to resume on May 4, 2020.

Facts / Positions: This is a patent infringement suit filed on February 28, 2011, by Return Mail, Inc. (RMI) alleging that USPS's One Code Address Change Service (OneCode ACS) infringed RMI's patent that protects a method for processing returned or undeliverable mail items, including steps for obtaining the updated address of the intended recipient. RMI claims that OneCode ACS uses RMI's technology and was introduced only after USPS and RMI failed to come to terms on an agreement for USPS to obtain a license for RMI's product.

In 2007, we initiated an ex parte re-examination proceeding with the U.S. Patent and Trademark Office (PTO) to invalidate the patent. While we were successful in cancelling the original claims, the PTO allowed RMI to add new claims, resulting in the PTO issuing a new patent certificate in January 2011. RMI's lawsuit argues that OneCode ACS infringes on those new claims.

On October 4, 2013, the court issued its opinion constraining the claims. The opinion favors the plaintiff, broadly construes the disputed claims, and almost universally adopts the plaintiff's proposed claim construction. This broad construction of the patent's claims, including one that characterizes the Postal Service as a return-mail provider, will make it easier for the plaintiff to prove infringement. We can still assert several invalidity defenses, such as prior art and obviousness, given the broad interpretation of the patent's claims. However, invalidity may be difficult to prove because the standard of proof for court cases of invalidity is high. If infringement is found and the patents cannot be invalidated, the damages could be substantial, potentially many tens of millions of dollars, if not a hundred million dollars or more since the royalty base could be the millions of times that OneCode ACS has changed a recipient's address. Given such a huge royalty base, even a small royalty rate could result in significant damages. Alternatively, the court could eschew applying a royalty rate in lieu of a license fee but, the license fee itself could also be very substantial. In November 2013, we met with plaintiff's attorneys, Covington and Burling, and they requested over $100 million to settle the case.

Beginning in January 2014, the Postal Service had outside counsel, Finnegan, Henderson, Farabow, Garrett & Dunner, LLP, evaluate the case. Based upon Finnegan's advice, we sought relief in this matter through an alternative forum.
On April 15, 2014, Finnegan filed a petition with the Patent Trial and Appeal Board (Patent Board) to invalidate plaintiff's patent claims at issue in the Court of Federal Claims case. On September 5, RMI submitted a settlement offer in the $55 million dollar range.

In the Court of Federal Claims case, the judge granted a joint motion to stay the matter until the Patent Board rendered its final decision. Subsequently, the Patent Board found the claims are unpatentable as an abstract concept. RMI appealed to the Federal Circuit, which upheld the Patent Board. RMI filed a petition for certiorari with the Supreme Court.

On June 10, 2019, the Supreme Court issued a 6-3 decision ruling that a federal agency, including the Postal Service, is not a "person" entitled to petition for patent review under the America Invents Act. The Court reversed the favorable Federal Circuit decision that upheld the decision of the Patent Board decision, thus reversing the invalidation of RMI's patent.

The Court of Federal Claims lifted the stay. RMI moved to amend its complaint, which the Court granted. Discovery regarding invalidity has begun.

II. Assessment of Liability: We evaluate potential liability as reasonably possible. Though the Supreme Court ruled the government cannot use AIA processes to invalidate a patent, we still have a strong argument that the patent is unpatentable as an abstract idea and that argument was successful before the Patent Board and the Circuit. Other invalidity and non-infringement arguments may also be available.

III. Assessment of Damages: The case has returned to the Court of Federal Claims for further proceedings on RMI's patent infringement claims. Damages could be substantially in excess of current estimates. If liability is found, the Court of Federal Claims will calculate damages using a hypothetical negotiation between the parties based on the value of the technology and the volume of infringed uses. We anticipate discovery will include expert testimony regarding damages. We are likely to increase substantially potential damages after discovery closes, but are unable to do so accurately at this point.

Facts / Positions

I. Facts/Positions: Did the U S Postal Service violate the National Agreement when Management reverted Job ID#s 704462711, 70427840, 70482380, 95683272, 95841479, 95853627, 70429927, 70449020, 70432579, 70425659, and 704255678.

The union contends that Management is in violation of Article 37.3.A, of the National Agreement by failing to post 11 reverted positions. The union contends the posting did not include the reasons for the reversion as required by Article 37.3.a; that management has established a need for the duty assignments due to the continual call of overtime; that the bids should be posted for all unassigned full-time regular employees; that employees from manual letters are being excessed; that IPP employees are being excessed out of their bids to the automation area; that FSS employees are being excessed out of their bids to the automation area; and that management has taken away the rights of employees who have retreat rights to this section.

The union also contends that Management failed to give the union an opportunity for input prior to their decision to revert the bids.

The union was notified and given the opportunity for input prior to reposting the bids. The positions became vacant on various dates and a meeting was held with the Clerk Craft Director. The union was given an opportunity for input by correspondence, phone conversations and in the meeting on February 23, 2011, within twenty (28) days of the positions becoming vacant. The union
was made aware of Management’s desire to repost the bids and/or make some possible changes to the positions and the records show the reason for reverting the positions is listed on the vacancy notice.

This matter that is now being reported as a contingent liability was discovered as the Lakeland District Labor Relations thoroughly reviews the backlog of all grievances pending arbitration which date back to 2009 in order to determine the potential liability in each of the grievances. Many of these grievances, including the grievances that comprise this contingent liability, arose under the former Northern Illinois District before large portions of it were merged with the Lakeland District. When Lakeland inherited these grievances, the files were in poor condition and were not scanned. Therefore, the process to assess and assign potential liability to all of the grievances pending arbitration is quite time consuming and laborious. Additionally, as these grievances did not initially have a $1M or more potential liability, but as they have aged, they have grown in liability.

II. Assessment of Liability

Union’s Position:

The union contends a violation of Article 37.3.A, of the National Agreement by the USPS when it failed to post eleven (11) reverted/vacant positions. The union contends the posting did not include the reasons for the reversions as required by Article 37.3.a; that management has established a need for the duty assignments due to the continual use of overtime in those areas. The union also contends that Management failed to give the union an opportunity for input prior to their decision to revert the bid. As such the bids should be posted for all affected employees and all contractual rights (including retreat rights) be restored.

Union’s Requested Remedy:

Management to post all reverted bids from Posting # 34099 and make it retroactive to 03/01/2011. The successful bidders to be made whole with compensation for out of schedule pay and overtime.

Management’s Position:

Management complied with Article 37.3.A.2 and the JCIM Section 3.A. 2 which outlines the steps Management must take when reverting a vacant duty assignment. Section 3.A.2 of the JCIM states that, In order to comply with Article 37.3.A.2, Management must take the following steps: (1) Give the local union president opportunity for input prior to making the final decision; (2) The final decision to revert the bid must be made within twenty (28) days of the vacancy; (3) A notice must be posted advising of the reversion and the reasons therefore. Management complied with National Agreement and the JCIM by first meeting with the union to discuss the positions which were considered for reversion and solicited input from the union. A meeting was held on February 23, 2011, with the Operations Support Specialist and the Clerk Craft Director.

The union was informed of the date the positions became vacant. The union was also given an opportunity for input by correspondence, phone conversations and in the aforementioned meeting. The union was made aware of Management’s desire to repost the bid and/or make some possible changes to the positions. The Records indicate that the reason for reverting the positions is listed on the vacancy notice.

While the union claimed that unassigned employees could have bid on these positions, Management contends that the union provided no record of these
unassigned employees. Management also contends that the use of overtime does not necessitate reposting the positions, especially when the positions are from various sections.

III. Assessment of Damages

The amount sought and maximum reasonable payout was calculated based on the assumption that the 11 bids will have different schedules than the bids that the successful bidders actually had worked during the relevant time period. Because these employees are full-time and already worked and were paid for full time hours, they would not be entitled to guaranteed hours; instead, they would only be entitled to out-of-schedule pay, which equates to 50% of regular pay. (See Footnote 1)

Consequently, the calculations would be based on 11 positions working 80 hours per pay period (11 positions X 80 hrs. per PP = 880 hours), at the out-of-schedule rate of pay through the present FY / PP, as shown below.

Total hours for FY2011 thru FY2019: 195,360
Total from current FY chart below: 11,440

FY Hrs/PP No. of PP Total Hrs.
2020 880 13 11,440

The current FY20 hours X $12.70 (OOS rate) (FN1) = $145,288.00

Total hours from 2011 thru FY 2019 or 195,360 X the applicable, annual OSS rate (See the chart attached to client report) (See FN1) = $2,375,014.40.

Total hours for FY 2011 thru FY 2019 or 195,360 X the applicable annual OSS rate (see chart attached to client report) (See FN1) = $2,520,302.40.

In summary, the total amount sought for out of schedule pay is $2,520,302.40.

If the grievance is upheld, we expect an arbitrator to also award compensation on the basis of 11 clerks, working outside of their schedules on their off days and potentially awarding Overtime (OT) for the NS days that would have been worked over this time frame. Again, this calculation is based on the assumption that the 11 bids will have a different NS days than the bids that the successful bidders actually had during the relevant time period.

Consequently, the calculations would be based on 11 positions and 2 NS days for 32 hours per pay period (11 positions X 32 hrs. per PP = 352 hours), at the overtime rate of pay through the present FY / PP, as shown below. (See Footnote 2)

Total hours for FY 2011 thru FY 2019: 80,960
Total from current FY chart below: 4,576

FY Hrs/PP No. of PP Total Hrs.
2020 352 13 4,576

The current FY 2020 hours X $38.10 (OT rate) (FN2) = $174,345.60

Total hours from FY2011 thru FY2019 or 80,960 X the applicable annual OT rate (see chart attached to client report) (See FN2) = $2,945,141.76

In summary, the total amount sought for overtime is $3,119,487.36

IV. The maximum reasonable payout was calculated as follows:

If the grievance is upheld, we expect an arbitrator to compensate employees for out-of-schedule premium pay and overtime pay. Even though the union is asking for out-of-schedule, overtime and guarantee pay for conflicting
schedules and non-scheduled days, the clerks are still full-time employees that had been properly compensated for all hours worked, had not been denied overtime opportunities, and had been worked in accordance with Article 8. Because it is highly unlikely that all 11 bids will have schedules and non-scheduled days conflicting with those of the ultimate successful bidders during the relevant time period, Management believes that the most likely payout will be of 1/3 of the total (50% OOS plus 150% OT). As a result the liability we believe would be one or the other. The parties have not entered into any settlement negotiations up through the present time.

Total maximum liability from the OOS and the OT: $5,639,789.76

Therefore, we believe the most likely payout would be as follows in Millions: $1.9 or $5.6

1) The OOS rates of pay are based upon the current end of year schedule pay scales from the National Agreement and the chart above articulates this based upon Level 6 Step H for each end of year pay schedule.

2) The OT rates of pay are based upon the current end of year schedule pay scales from the National Agreement and the chart above articulates this based upon Level 6 Step H for each end of year pay schedule.
1. CASE/GRIEVANCE BACKGROUND AND ARGUMENTS OF PARTIES:
In February of 2011, management needed to address operational changes concerning the transportation of mail. The three Flat Sequencing systems machines became operational, half of the Mail Processing Annex was being closed and more priority mail volume would be worked at the Denver Network Distribution Center (NDC). It was determined that mail for the Denver, Aurora and Arvada station would originate at both the Denver GMF & the NDC. With mail originating at two facilities, there would be a need to change the TTO runs to ensure the timely transportation of the mail. At the time, the GMF had 79 TTOs and 5 Motor Vehicle Operators. It was determined that the current staffing would not be able to timely transport the mail to all stations & branches. Management determined that if the Aurora & Arvada offices were temporarily sub-contracted, there would be staffing to ensure the movement of the mail to the Denver stations and branches and between the three buildings (P&DC, NDC and MPA) Management requested that a temporary highway contract be used to transport the mail to the Aurora & Arvada stations & branches. Management performed the Article 32 considerations for contracting out this work.

1.a STATUS OF GRIEVANCE AND SETTLEMENT DISCUSSIONS
This matter was recently removed from the Contingent Liability Report as part of the FY2019, Quarter 2 report based on the Union's failure to appeal the Step 3 denial. The grievance was denied at Step 3 on March 17, 2014, and through the submission of the FY2019, Quarter 2 Contingent Liability Report, there was no indication that the Union appealed the grievance to arbitration. Article 15 of the National Agreement requires the Union to appeal an adverse Step 3 decision to arbitration within 21 days of receipt of the adverse Step 3 decision. Normally, any appeal to arbitration now would be argued by Management to be untimely. However, the Step 3 denial wasn't sent with Delivery Confirmation or by Certified Mail, and Management did not have any proof the Union ever received the Step 3 denial. As part of the FY2019,
Quarter 2 Contingent Liability Report the decision was made to remove the matter from the Report. After consultation with Colorado Wyoming Labor Relations, Western Area Labor Relations as well as Western Area Law Department, it was determined that sufficient time had passed following the March 17, 2014 Step 3 denial to warrant removal from the CL Report. It was further noted that, if the Union subsequently filed an appeal, management would argue the timeliness issue and evaluate whether to return the matter to the Contingent Liability Report would be appropriate.

Management recently learned that the Union has now filed an appeal to arbitration of the March 17, 2014 Step 3 denial. The appeal to arbitration is dated December 4, 2018. Management intends to argue that the appeal is grossly delinquent and will attempt to have the matter dismissed as untimely. Given the fact that the Union has now filed an appeal, this matter was added back into the Contingent Liability Report for FY2019, Quarter 3.

2. ASSESSMENT OF LIABILITY:

The issue in dispute is whether or not management properly sub-contracted the delivery of the mail. Management feels that the temporary contract was justified and that the Article 32 analysis was done properly at the time. Given the nature of arbitration and arbitral history, it is possible an arbitrator could find in favor of the APWU and return the work to the craft, however, it is unlikely that monetary payment would be made. In addition, returning the work to the APWU will require the Postal Service to hire a minimum of 26 TTO drivers and obtain a minimum of 13 additional tractor-trailers. Clearly, it was more cost effective to subcontract the work. However, the work was subcontracted as a temporary contract, which has now gone on for over 8 years. Management may have difficulty convincing an arbitrator that these contracts are temporary in nature. Based on arbitral history, Management assesses the likelihood that an arbitrator will rule that the temporary contracts were not temporary, and the work should have been given to the Union, as reasonably possible.

3. ASSESSMENT OF DAMAGES:

There are two possible methods for calculating potential damages in this case. First, an arbitrator could award the Union the cost of the contracts. Second, an arbitrator could award the Union the amount that it would have cost to hire and pay 26 new TTO drivers for the time frame at issue.

Damages Calculation Method #1 - Cost of Contract:

If an arbitrator bases an award on the cost of the contracts:

Based on requested remedy parameters and information from Forms 7440 the cost of this contract for 2011 totaled $819,367.69; costs of the contract in 2012 totaled $819,334.96, costs for this contract in 2013 totaled $776,649.97, costs for this contract in 2014 totaled $776,649.97, and the cost of the contract from March 26, 2015 through June 30, 2018 was $943,889.64 per annum. The current quarterly costs of the contract is $290,442.88.

Total Contract Cost to Date is:

$819,367.69 (March 26, 2011 through March 25, 2012)
PLUS $819,334.96 (March 26, 2012 through March 25, 2013)
PLUS $776,649.97 (March 26 2013 through March 25, 2014)
PLUS $776,649.97 (March 26, 2014 through March 25, 2015)
PLUS $835,278 (March 26, 2015 through February 05, 2016)
PLUS $267,702.76 (February 06, 2016 through May 13, 2016)
PLUS $247,110.24 (May 14, 2016 through August 05, 2016)
PLUS $290,442.88 (August 06, 2016 through November 11, 2016)
PLUS $290,442.88 (November 12, 2016 through February 17, 2017)
PLUS $290,442.88 (February 18, 2017 through May 19, 2017)
PLUS $235,972.41 (May 20, 2017 through August 18, 2017)
PLUS $414,918.40 (August 19, 2017 through January 05, 2018)
PLUS $248,951.04 (January 06, 2018 through March 31, 2018)
PLUS $269,696.96 (April 01, 2018 through June 30, 2018)
PLUS $269,696.96 (July 1, 2018 through September 29, 2018)
PLUS $290,442.88 (September 30, 2018 through December 28, 2018)
PLUS $290,442.88 (December 29, 2018 - March 31, 2019)
PLUS $290,442.88 (April 1, 2019 - June 30, 2019)
PLUS $290,442.88 (July 1, 2019 - Sept 30, 2019)
PLUS $290,442.88 (October 1, 2019 - December 31, 2019)
PLUS $290,442.88 (January 1, 2020 - March 31, 2020)

= $8,595,315.28

Damages Calculation Method #2 - Cost of Hiring 26 TTO Drivers:

If an arbitrator bases an award on the cost of hiring 26 new TTO drivers the total cost to date (through March 31, 2020) is $9,439,508.81.

See attached spreadsheet for detailed calculations.

3a. Continuing Accrual of Damages

Continuing Accrual under Damages Calculation Method #1 - Cost of Contract:

Continuing accrual of damages based on the cost of the contract is based on the quarterly estimates listed above for the Damages Calculation Method #1 - Cost of Contract.

Current Contract Cost is $290,442.88 per quarter

Continuing Accrual under Damages Calculation Method #2 - Cost of Hiring 26 TTO Drivers:

Continuing accrual of damages based on the cost of hiring 26 new TTO drivers:

$41,492 (annual salary) divided by 52 weeks = $797.92 per week
$797.92 per week multiplied by 13 weeks per quarter = $10,372.96/quarter
$10,372.96/quarter multiplied by 26 TTO drivers = $269,696.96/quarter
APWU and the Motor Vehicle Craft are aggrieved over the fact that management violated the collective bargaining agreement. Specifically, management entered into HCR 301P1 without notification to the union. The union contends that this is a violation of Article 32.1.C of the Collective Bargaining Agreement. The union further contends that after the decision was made by management to subcontract the transportation work, management failed to show evidence of compliance with the five factors and the provisions of article 32.1.A, and the provisions, language, and spirit of the insourcing Memo found on page 216 of the National Agreement. The case file consists of the moving papers, copies of 301P1 and their supporting documentation.

According to the Step 2, “The 301P1 contract was a rebuild for existing transportation to the 305 area. There were no MVS runs abolished or MVS drivers displaced due to the highway contract being modified.

Based on the findings of District Labor Relations, this is a new contract number however the work is not new. The work is a combination of HCR 301A8 and HCR 301N8. These contracts were in existence and serviced the 305 area when mail was processed at The Athens GMF. On April 18, 2015 the mail was moved to The North Metro P&DC for processing. There was a temporary contract put in place when the mail moved to North Metro P&DC. This contract ran until August 2016 when it was bid as a full time regular contract under the HCR 301P1 number. The work remained the same. There was a provision that required alternative fuel for operation. The contract was divided into two segments. Segment A consist of 3 tractor trailers that operate on compressed natural gas at the rate of $685,126.37 per annum. Segment B consist of 17 straight trucks that are serviced by hybrid electric vehicles at the rate of $2,273,765.40 per annum. This work was never performed by the Motor Vehicle Craft. No violation of Article 32 was found and the grievance was denied.

Assessment of Liability
Request that PVS drivers are to be compensated at an equal amount paid to HCR 301P1, the work being returned to the motor vehicle craft.

- The union is seeking "PVS drivers are to be compensated at an equal
amount paid to HCR 301P1." 301P1 is $685,126.37 on segment A per annum and $2,273,765.40 per annum on segment B. The contract is valid from August 13, 2016 through June 30, 2018 and the work on this contract is to be awarded to the Motor Vehicle Craft.

The liability is ongoing until the end of the contract on June 30, 2018.

Damage Assessment changed due to ongoing liability and calculation adjustment to Segment B of the contract. Segment B contract payout was adjusted to include the amount paid ($1,136,882.70) for the period September 13, 2017 to February 13, 2018. This amount ($1,136,882.70) was added to the amount paid for the period of August 13, 2016 through September 12, 2017 ($1,136,882.70 + $2,273,765.40), for a total of $3,410,648.10. Ongoing liability through to June 30, 2018 for Segment B is $4,275,942.16. Total HCR 301P1 contract liability is $5,564,360.26 (Segment A - $1,288,418.10 + Segment B - $4,275,942.16).

Calculations;
Segment A contract rate is $685,126.37 per annum. If you divide $685,126.37 by 12 months = $57,093.86 per month. 
From August 13, 2016 until August 13, 2017 = $57,093.86 x 12 months = $685,126.32.
September 13, 2017 through February 13, 2018 is 6 months. $57,093.86 x 6 = $342,563.16. $685,126.32 + $342,563.13 = $1,027,689.45 paid so far.
There are four months left in the contract. March 13, 2018 - June 13, 2018 @ $57,093.86 x 4 = $228,375.44 + June 14, 2018 through June 30, 2018 = 17 days. $57,093.86 per month divided by 30 days per month = $1,903.13 per day.
17 days @ $1,903.13 = $32,353.21. Four months @ $228,375.44 + 17 days @ $32,353.21 = $260,728.65 left to be paid on segment A of the contract.

Segment B contract rate is $2,273,765.40 per annum. If you divide $2,273,765.40 by 12 months = $189,480.45 per month.
From August 13, 2016 until August 13, 2017 = $189,480.45 x 12 months = $2,273,765.40.
September 13, 2017 through February 13, 2018 is 6 months. $189,480.45 x 6 = $1,136,882.70. $2,273,765.40 + $1,136,882.70 = $3,410,648.10 paid so far.
There are four months left in the contract. March 13, 2018 - June 13, 2018 @ $189,480.45 x 4 = $757,921.80 + June 14, 2018 through June 30, 2018 = 17 days. $189,480.45 per month divided by 30 days per month = $6,316.02 per day.
17 days @ $6,316.02 = $107,372.26. Four months @ $757,921.80 + 17 days @ $107,372.26 = $865,294.06 left to be paid on segment B of the contract.

Segment A = $57,093.86 left per month = $228,375.44 + 17 days $32,353.21 = $260,728.65
Segment B = $189,480.45 left per month = $757,921.80 + plus 17 days $107,372.26 = $865,294.06

Total left to be paid on this contract is Segment A $260,728.65 + Segment B $865,264.06 = $1,125,992.71

Total paid from August 13, 2016 through February 13, 2018 = $1,027,689.45 on Segment A
Total paid from August 13, 2016 through February 13, 2018 = $3,410,648.10 on Segment B
Total paid A $1,027,689.45 + B $3,410,648.10 = $4,438,337.55 paid through February.

Total liability of the HCR 301P1 contract is $5,564,360.46
On February 26, 2007, the National Association of Letter Carriers (NALC) initiated a national level interpretive dispute alleging the Postal Service has significantly increased the percentage of new deliveries assigned to contract delivery service (CDS). The NALC asserts that the increase constitutes subcontracting that has and will have a "significant impact" on the bargaining unit within the meaning of Article 32.1.B of the Collective Bargaining Agreement. As such, the NALC argues that the Postal Service was required to notify, meet with the NALC, and consider its view in minimizing the impact on the bargaining unit prior to deciding to subcontract the work. The NALC contends that neither the advance notification nor the meeting requirements were satisfied. Finally, the NALC contends that a joint committee (Article 32.2) was not established to address this subcontracting issue.

In March 2011 the NALC provided a list of Highway Contract Routes (HCR) and new deliveries that the union argues should have been converted to city delivery in accordance with the following Memoranda of Understanding: Re: Subcontracting (9/11/2007), Re: Article 32 Committee (9/11/2007) and Re: Assignment of City Delivery (10/22/2008).

Liability Assessment:

This case is assessed as reasonably possible. Given the historical usage of CDS for some deliveries, we believe an arbitrator can conclude there was no violation of Article 32 and there was no substantial impact on the bargaining unit to continue that practice, as any increase was deminimus. Further, the list the NALC provided of allegedly improper contract routes contains only the city and state, route number, number of deliveries and dates of each referenced contract. The NALC has offered no evidence to support their argument that those contracts violated Article 32 or that conversion of these routes to city delivery is required. Nor has the union demonstrated that any of the delivery points on the cited HCR require conversion pursuant to the MOU, Re: Assignment of City Delivery. Additionally, we disagree with the NALC over whether a joint committee on contracting had to be established.

Also, contracting decisions are made locally based on the local circumstances.
As noted above, the assignment of new deliveries nationwide probably will not be viewed as having a significant impact on the city letter carrier craft. Based on the uncertainty of what qualifies as having a "significant impact" as well as the factors legitimately used to make delivery assignments, this case is assessed as having a reasonably possible chance of an unfavorable outcome for the Postal Service.

Damages Assessment:

The damage assessment reflects the fact that certain routes were converted, without payment of damages. To assess potential damages for remaining routes, we totaled the number of possible deliveries to be converted (19,939) and divided that number by the average number of deliveries per city route (609) to determine there are 32 possible city routes. Multiplying the number of routes by 2,080 hours of work per route per year times the fully-loaded overtime rate of pay (41.72) equals approximately $2.8 million per year, or $11.2 million for a 4-year period.

We estimate the most likely damages at $5.5 million and maximum reasonable payout at $11.2 million. Though potential damages are continuing, we are capping damages at the above levels based on the nature of this case and our experience with similar types of cases.
I. FACTS

By letter dated February 2, 2006, the Postal Service notified the American Postal Workers Union (APWU) and the National Postal Mail Handlers Union (NPMHU) that it was considering contracting with a third party provider to provide locations and labor for the receipt, distribution, and dispatch of mail at the Surface Transport Center (STC) in Salt Lake City, Utah. In June 2006, the Postal Service began operations at the Salt Lake City STC. The NPMHU filed a Step 1 grievance in Salt Lake City on October 6, 2006 contending that its employees observed the contract employees (50 in number) performing bargaining unit work. The grievance was denied at Step 2 on February 20, 2007, taking the position that the grievance was untimely as the National Union was notified of the decision to contract the work in February 2006, and that the grievance should have been filed at the National level.

The grievance proceeded through the steps of the grievance procedure where it was referred to Step 4 by the NPMHU on August 8, 2007, and formally appealed to Step 4 on August 15, 2007.

Fifty contract employees work at the STC in Salt Lake City and they perform duties similar to mail handler duties, but the specific work performed by the contract employees has never been performed by postal employees and the contract was solicited due to the fact that the Salt Lake City P&DC does not have sufficient space to house the operation. In addition, timelines established for Postal Service facility procurements require a 24 month cycle. This requirement could not support the aggressive timeline for activation of the STC network. Accordingly, the decision was made to outsource the operation.

The grievance file contains the notification letters referenced above and a
Memorandum of Due Consideration of Article 32 Factors. The Union has claimed that they did not receive the actual contract for the services. The Postal Service responded to the local union’s information requests by stating that, in accordance with the provisions of Article 32, all information requests must be made by the national office (31.3 B). A copy of the contract has been obtained and it is now included in the grievance file.

II. Assessment of Liability

The evidence in the file suggests that the Postal Service complied with the provisions of Article 32 by properly considering the five factors contained in Article 32. Because the Salt Lake City P&DC did not have the space to accommodate the operation, and because of the timelines required to activate the network, the Postal Service should prevail in an Article 32 determination. The Postal Service’s timeliness argument may be defeated because there is no evidence that the Agency followed up the February 2, 2006, letters of consideration with notice to the unions regarding the final decision.

In the decision rendered in national arbitration grievance A8-NA-0510 regarding subcontracting, Arbitrator Mittenthal ruled that the Postal Service’s obligation relates more to the process by which it arrives at a decision than the decision itself. When making the decision to subcontract or use bargaining unit employees, the Postal Service is required to give “due consideration” to public interest, cost, efficiency, availability of equipment, and qualification of employees and these factors are not weighted. According to Arbitrator Mittenthal, “The Postal Service must, in short, make a good faith attempt to evaluate the need for contracting out in terms of the contractual factors. Anything less would fall short of “due consideration.”

Since the issuance of Arbitrator Mittenthal’s decision, the Postal Service has successfully defended decisions to subcontract work and services where it has been shown that proper “due consideration” of the relevant five factors was made. In this grievance, the depth of the analysis that is part of the "Memorandum of Consideration" should convince an arbitrator that the Postal Service made a thoughtful and careful analysis of Article 32’s five factors. Nonetheless, the possibility that an arbitrator would reach a contrary conclusion is more than remote, as there could be factual disputes concerning the space availability in the Salt Lake City P&DC, and alternatives that were available to the Postal Service. Thus, we evaluate liability as reasonably possible.

III. Assessment of Damages

The Union's requested remedy in this grievance is to post 50 mail handlers positions for bid and, absent successful bidders, convert and assign 50 part time flexible employees to the posted assignments. While the union has not requested a "make whole" or monetary remedy at any step of the grievance process, the ability of the union to amend the remedy request at hearing and the hiring of 50 employees could result in a liability exceeding $1 million annually.

The maximum reasonable damages in this case are based on the Level 4 mail handler average OT hourly rate, which increases each year. (We assume that if an arbitrator found that the Postal Service committed an egregious violation he would calculate damages at the overtime, rather than straight time, rate.) No rational arbitrator would award the Union more positions than there were contract employees working under the contract each year it was in place. The formula for calculating maximum reasonable damages for each year from 2006 on is therefore as follows:

Avg. MH OT Hourly Rate x Work Hours Per Year x Number of Contract
Employees Working Under the Contract

The breakdown of damages for each year the contract has been in place is:

2006 - $251,784 ($32.28 hourly OT rate x 520 work hours x 15 contract employees)
2007 - $1,038,648 ($33.29 x 2080 work hours x 15)
2008 - $1,101,672 ($35.31 x 2080 x 15)
2009 - $2,098,387.20 ($36.03 x 2080 x 28)
2010 - $2,136,243.20 ($36.68 x 2080 x 28)
2011 - $2,211,372.80 ($37.97 x 2080 x 28)
2012 - $2,134,641.60 ($38.01 x 2080 x 27)
2013 - $3,961,360 ($38.09 x 2080 x 50)
2014 - $3,999,840 ($38.46 x 2080 x 50)
2015 - $4,158,960 ($39.99 x 2080 x 50)
2016 - $4,252,560 ($40.89 x 2080 x 50)
2017 - $4,320,160 ($41.54 x 2080 x 50)
2018 - $4,370,080 ($42.02 x 2080 x 50)
2019 - $3,148,600 ($43.25 x 2080 x 35)
2020 - $1,610,336 ($44.24 x 1040 x 35)

(Note that for 2006, the work hours are less than 2080 because the contract did not start at the beginning of the year. Additionally, the Postal Service has added more contract employees performing work over the years, further increasing potential damages year over year.) In 2019, the contractor decreased the number of non-supervisory employees working from 50 to 35.

The total maximum reasonable damages for this case are $40,794,645, through the end of Q2 of FY2020, unless the contract terminates earlier.

Based on a variety of factors (e.g., the general reasonableness/need of the outsourcing decision, avoidance of windfall payments to employees, Postal history of resolving these types of grievances), we estimate the most likely payout to be approximately one-sixth the maximum reasonable damages, or approximately $6.8 million. We are setting damages at these levels based on the nature of this case and our experience with similar types of cases.
Background:
HCRs 75241 and 75238 were renewed effective October 3, 2015, and the contract term was October 3, 2015 through June 30, 2019. The grievance file contains a time limit extension, via memorandum, pursuant to Article 15, dated October 6, 2015, between the APWU-Dallas Area Local executive vice-president and Dallas District manager, labor relations in which it was agreed the effective dates were October 10, 2015 through November 6, 2015. The memo provided the extension of time limits included "all grievances that are currently being investigated, grievances awaiting Step 1 meetings, grievances for Step 2 appeals, the scheduling of Step 2 meetings, Letters of Corrections and Additions and Step 3 appeals." In addition, on November 6, 2015 the parties at the local level, Dyrke Shaw, steward/MVS craft director, and Marvin McCallister, supervisor, Tour 2, entered into a subsequent Step 1 extension from November 9, 2015 through November 24, 2015.

Upon review of the Step 1 Grievance Outline Worksheet, Mr. Shaw submitted the worksheet on or about November 19, 2015. The issue in grievance surrounded the renewal of the HCRs. Mr. Shaw and Mr. McCallister met at Step 1 on November 25, 2015. Mr. McCallister denied the grievance, and Mr. Shaw appealed the grievance to Step 2 on or about December 3, 2015. Mr. Shaw and George Joseph, Labor Relations Specialist, met at Step 2 on December 9, 2015 and January 15, 2016, and by letter dated January 25, 2016, Mr. Joseph denied the grievance. As a result, Mr. Shaw appealed the grievance to Step 3 on February 2, 2016. By letter dated March 31, 2016, the grievance was denied at Step 3. APWU appealed the grievance to arbitration on or about April 4, 2016.

APWU Position
APWU contended on or about October 3, 2015, the USPS violated Article 32.2 of the national agreement when it did not notify the union, at the local or national levels, of the renewal of HCRs 75241 and 75238. The union further contended management did not abide by requirements in its decision to restructure the aforementioned routes. The union argued management failed to provide any of the information as required by Article 32.1.C.
Remedy requested: transition the work performed on HCRs 75238 and 75241 to the bargaining unit and pay the drivers on the rolls at the time of the contract renewal, October 3, 2015, all hours the contract drivers spent working HCR 75238 and HCR 75241.

USPS Position
Management, at Step 2, challenged the timeliness of the grievance at Step 1, and this timeliness argument was maintained at Step 3. The parties met at Step 1 one day after the expiration of the extension. The parties at the national level exchanged a disk with nearly 8,000 existing routes for review as provided in the Motor Vehicle Craft Jobs Memorandum of Understanding (MOU). The two HCRs were among the 8000 routes reviewed. The purpose of the review was to identify 600 HCRs to return to the motor vehicle craft. However since the two HCRs had contracts in effect prior to 2015, they were not considered in the determining the 600 routes.

Management contended the HCRs were previously done by contractors, so the bargaining unit employees did not suffer any harm. Management further contend that all the drivers were fully employed for 40 or more hours per week, and in some cases worked extensive overtime. Management argued due to various reasons relative to the nature of the two HCRs, they could not have been insourced to the bargaining unit, and this was substantiated with an analysis which revealed a potential cost of $1.5 million.

Liability Assessment:
Based on management's assessment at Step 2, local management officials had no control over the renewal of these contracts. The decision was made at the area level. USPS was unable to get clarification on determining proper union notification prior to the renewals. Article 32 notification letters were not sent to the union. However, there is evidence that in June 2015, the parties at the national level exchanged a disk with 8000 routes for review. These two HCRs were included on the disk. Management maintained monetary damages should not be awarded or considered because there was no negative impact on the current bargaining unit employees who were working 40 hours per week throughout. Further, area labor relations (Step 3) contended the requirements for contracting out were properly met. It is evident bargaining unit drivers could not assume the work at the same or less expense to the USPS. For example, new equipment and new (additional) employees would have to be incurred to cover the trips.

The liability assessment remains reasonably possible in light of the August 2016 Das Award Case No. Q06C-4Q-C 11182451 ruling against the Postal Service on similar issues.

Damages Assessment:
The contracts remain in effect for four years unless the contractor fails to meet its commitments to the Postal Service.

The union's requested remedy is based on the value of the contract. Value is $2,661,789 (contract rate per year) for driver cost for both contracts combined.

\[
\text{Value} = 2,661,789 \times 4 = 10,647,156
\]

Assessment based on the total estimated driver hours at postal cost (applicable USPS rate of pay) is a more appropriate measure of liability.

Box 15 of the PS Form 5505 accounts for the "Annual Hours". The annual hours estimated for all eight segments equates to 60,000 hours for one year.

The annual salary, effective March 21, 2015, for a Level 8, Step O driver was $59,245. This was the basic rate that was in effect when the contracts were negotiated. $59245/2080 number of annual basic hours (at 40 hours/week) = $28.48 per hour at the straight time rate. This number was rounded up to $28.50 for purposes of the calculations on the Contingent Liability Report.

60,000 hours x $28.50 = Driver cost for 1 year = $1,710,000

The contracts ran for 4 years, $1,710,000 x 4 = $6,840,000.

For both contracts, total hours per year 60,000 x $28.50 (straight time hourly rate of pay for a Level 8, Step O driver) x 4 years = $6,840,000.

If an arbitrator were to assess the remedy at the overtime rate, it will be:

60,000 hours x $42.75 (overtime rate of pay) x 4 years = $10,260,000.

Current Status:

This grievance is open at the arbitration level. No arbitration date has been scheduled.
This case centers on revisions to the promotion pay rules for Mail Handlers found in ELM Section 422.3. On April 17, 2017, the Postal Service proposed revisions to ELM Section 422.323(a)(2) to change the amount of promotional increase employees in Rate Schedule Code (RSC) M7 receive upon a one-grade promotion within RSC M7.

After the new RSC M7 was created in the 2011-2016 National Agreement, necessary changes to the promotion pay rules for Mail Handlers were not promulgated. Because of this lack of action, Mail Handlers in RSC M7 who received a one-grade promotion earned inappropriate and excessive pay increases.

The uniform step increases of RSC M7 make the application of the previous "two times the most prevalent step" promotion pay rule inequitable. RSC M (the old Mail Handler pay schedule) has a "most prevalent step" in Grade 4 of $337; while in RSC M7, the most prevalent step for Grade 4 is $1522. Because of this, application of the "two times the most prevalent step" promotion pay rule in RSC M7 results in much larger and unwarranted promotional pay increases and causes inequities regarding seniority in the Mail Handler craft.

The proposed ELM revisions were meant to correct this inequity. After meeting with the Union, on August 11, 2017, the Postal Service modified its proposed revisions to ELM 422.323(a)(2) as follows:

"The Grade 4 employee receives a promotional increase that brings the salary to the same step in Grade 5. The promoted employee will retain the waiting period step credit that had been earned prior to the promotion in calculating the next step increase date."

In addition to the ELM language change, the Postal Service proposed a "hold
in place" rule that would apply to all employees who were assigned to a Grade 4 position in RSC M7 and subsequently placed in a Grade 5 position. The purpose of the hold in place rule was to correct salary overpayments by holding impacted employees in place in the salary schedule either 52 or 104 weeks, depending into which step the employee was promoted.

On August 25, 2017, the Union filed a national level grievance challenging the Postal Service's proposed ELM revisions. (The grievance did not mention the "hold in place" rule.) The Union argued that the proposed changes must be bargained between the parties and could not be implemented under Article 19. The NPMHU also challenged the Postal Service's assertion that apply the two times the most prevalent step rule results in a windfall for employees promoted in RSC M7.

The Postal Service contends that the revisions made to the promotion pay rule are fair, reasonable, and equitable, and do not violate the National Agreement. The revisions realign the promotion pay rules for Mail Handlers in RSC M7 with the historical financial outcome of Mail Handler promotions.

Although the NPMHU’s grievance was filed on August 25, 2017, the case was added to the report in Q4 FY18 because damages crossed the $1 million contingent liability threshold at that point.

II. LIABILITY ASSESSMENT

We have identified this case as reasonably possible. On one hand, the NALC settled a similar case, and some letter carriers received compensation. On the other hand, the Postal Service gave proper Article 19 notice of the change to the NPMHU, and the Union did not mention or ask for back pay.

III. DAMAGE ASSESSMENT

No specific amount has been claimed by the unions. Determining potential damages for this issue is a two-part calculation. Because the NPMHU’s grievance does not challenge the "hold in place" rule on its face, the most likely payout is assessed as the damages associated with the revision to the promotion pay rule, or $10.2 million. To determine the damages associated with the revision to the promotion pay rule, the salary of each employee who has received a promotion in RSC M7 from October 14, 2017 (the date the change to the rule went into effect) to present was compared to the salary he/she would be earning had he/she been promoted under the previous promotion rules. The damages associated with this action are approximately $10.2 million. Approximately 1,757 Mail Handlers were promoted in RSC M7 since October 2017.

We calculate maximum reasonable damages to include damages associated with the promotion pay revision as well as potential damages associated with the hold in place rule. The "hold in place" damages assessment was determined by evaluating how many employees would have received step increases, if not for the "hold in place" action taken by the Postal Service. For these employees, we multiplied the number of pay periods that would need to be paid at the higher rate (achieved after a step increase) by the average pay period value of the step increase. This figure is approximately $1.1 million. Approximately 539 Mail Handlers were held in place since October, 2017.

Total maximum reasonable damages are therefore $11.3 million (adding the two figures, and then rounding to the nearest 0.1 million) as of FY2020 Q2.

Damages are calculated through March 31, 2020.

Facts / Positions:

New text and [deletion]

On December 27, 2005, Motor Vehicle Service (MVS) employees were provided a standup on subcontracting of MVS functions to Highway Contract Route contractors. Management stated the subcontracting would be done within 60 days.

On January 11, 2007, MVS craft received notice that under Article 12.5.C.5 of the National Agreement, craft would be reassigned. The Fresno MVS craft was abolished effective April 28, 2007. All MVS employees were provided positions within the Fresno Post Office and Plant. The Union argues that National had not been informed of the subcontracting of Fresno MVS work, which is a violation of Article 32.2 of the National Agreement; improper subcontracting; requested information not provided.

Management rebuttal: The employees received written notice on or about January 11, 2007. There is not a copy of the letter on file, but the file references a letter from Rich Sarno, HR Manager to the employees notifying them that their jobs are being abolished. While the employees were given a standup as early as December 2005, there was not formal notification or sharing/exchange of documents with the union at that time because the contract was only a proposal, and nothing in the CBA or the ASM provides that information must be given to the union on a proposal. However, during the time from December 2005 to January 2007, the proposal became a reality.

The Union remedy is for subcontracting of MVS work to cease, and return all drivers to their MVS positions. In addition, the Union will argue that the affected employees should receive the value of the contracts from April 28, 2007 to the present, and ongoing. The value of the contract is $545,156 per year, which is $45,429.67 per month. The accrued liability under this
calculation is $6,996,169.18 at present, using a time period of 154 months.

Another possible assessment of liability would be based upon employees receiving their full salaries from the positions that they lost, which would be 17 MVS employees affected times average annual salary of $57,000, which is $4,750 per month per employee. This amounts to $80,750 per month for all 17 employees. For the 154-month period covered by the grievance, this would be $12,435,500. However, management will argue that the maximum relief should be only out of schedule pay -- the 50% premium that these employees would have earned had they not been transferred to new positions. This would amount to $6,217,750 for the 154-month period at issue (because the employees would have worked Tour 3 and received out of schedule pay). The maximum reasonable payout has been assessed as the amount sought.

All calculations have increased because liability is ongoing and an additional 3 months has been added. These cases have not been scheduled for arbitration and will not be heard in FY2020 Q2.

Facts / Positions:

APWU Grievance: G006 1G-C 06136385

The APWU argues that the flat prep work should be theirs subsequent to the installation of the AI/ATHS in 2006. The APWU is also asking for flat prep work hours for other operations throughout the building. Management's position is that when the AI/ATHS was installed in 2006, the jurisdictional assignment was given to the mail handler craft at the National level.

The local APWU timely challenged this assignment to the mail handler craft through the filing of grievance No. G006-1G-C 06136385, Local No. 2006-241. This case is currently being held in abeyance to the National Level Jurisdictional Dispute that is currently pending regarding the AI/ATHS work assignment determination.

The national level issue is summarized as: Whether the jurisdictional assignment and staffing in regard to the Automatic Induction (AI) and the Automatic Tray Handling System (ATHS) on the AFSM 100 violate the national agreement, RI-399 and the historical application of the jurisdictional rules of the parties.

Since the June 2018 MOU re: RI399, the Postal Service takes the position that this grievance should be withdrawn.

Historical Context:

A similar issue was previously argued in Grievance No. G98C-1G-J 00211029 in 2000 after the assignment of mail handlers as the primary craft for flat prep work on the AFSM 100 installed at the Ft. Myers PDC in the summer of 2000.
The case was heard on the Jurisdictional Arbitration Panel by Arbitrator Edward E. Hales. Arbitrator Hales rendered a decision in August 15, 2013 awarding the flat prep work that was assigned to the mail handlers in the summer of 2000 to the clerk craft. Arbitrator Hales awarded back pay compensation to the clerk craft for the period of 2000-2006 and specifically declined to render an opinion about the flat prep work from 2006 forward due to the installation of new machines. Grievance G98C-1G-J 00211029 was settled in March 2016 for $5.2 Million and completely resolved all liability under the Hales Award and its subsequent non-compliance grievance (G10C-1G-C 13331188) for the period of 2000-2006.

The present contingent liability was filed in 2006 after the installation of the AI/ATHS and covers the flat prep work from 2006-the present.

This dispute was initially held in abeyance pending the jurisdictional dispute over the AI/THS. That dispute was withdrawn with the June 2018 MOU regarding RI 399. The local APWU will not withdraw this dispute in accordance with that MOU. Their claim is this is a Cross Craft grievance, not a Jurisdictional dispute due to Arbitrator Hales award.

Assessment of Liability:

Historically, there is no monetary remedy associated with RI-399 disputes. The process was designed to resolve jurisdictional disputes between the crafts, and thus should not result in monetary remedy when all parties have agreed to resolution of the disputed work through the use of a Jurisdictional Arbitration hearing. By agreeing to this process, LR has taken the position that all parties waive any right to a monetary remedy.

The APWU argues the liability is $42.5 million, primarily due to the fact they believe the flat prep work would have remained theirs subsequent to the installation of the AI/ATHS in 2006. The APWU is also asking for flat prep work hours and other operations throughout the building. Management's position is that when the AI/ATHS was installed in 2006, the jurisdictional assignment was given to the mail handler craft at the National level.

Damages Assessment:

Suncoast LR reviewed actual records to determine the average monthly hours of work for the time periods outlined below. Given no significant changes affecting the average work hours after August 2015, average work hours of 3610 are used to estimate the potential damages after August 2015 to the present in the calculations below.

Segment 1: July 2006 - January 2014
2862 average mailhandler workhours per month on flat prep duties

Segment 2: February 2014 - August 2015
3610 per average mailhandler workhours per month on flat prep duties in Ft. Myers PDC.

If an arbitrator agrees the work remains with the clerk craft despite installation of the AI/ATHS, estimated liability is as follows as of Quarter 4, FY2018 based on continued assumption of 3610 hours per month:

Segment 1: 2862 hours per month X 91 Months (July 2006 thru January 2014) = 260,442 hours X $43.80/hour* = $11,407,360
Segment 2: 3610 hours per month X 74 months (February 2014 thru March 2020) = 267,140 hours X $43.80/hour* = $ 11,700,732

MAXIMUM REASONABLE PAYOUT:

*Overtime pay rate increased to $43.80 due to contractual increase effective September 1, 2018.
In December 2001, the Postal Service established a new Time and Attendance Collection System and Resource Management Database/Integrated Resource Management. Around that time, the American Postal Workers Union (APWU) filed a grievance alleging that the Postal Service violated the Collective Bargaining Agreement, including, but not limited to, Articles 1.2, 1.5, 1.6, 4, 7.2, 19, 35, and 38. The issue in dispute is whether Postal Service has shifted (and is shifting) maintenance work from Electronic Technicians to EAS employees.

In 2000, Arbitrator Goldberg addressed the maintenance levels issue by instructing representatives of the Postal Service and the APWU to meet in Norman, OK to discuss and define the appropriate tasks for the different occupational levels. These meetings proved to be unproductive, and the national case went before Arbitrator Das (Case Nos: Q98C-4Q-C 00183263 and Q98C-4Q-C 01002200). Prior to the award that was eventually issued by Das in 2005, the bargaining unit levels were assessed by the Maintenance Technical Support Center, and a Minimum Skill level was assigned to each task on a Preventive Maintenance Checklist and published as a MMO normally titled Preventive Maintenance Guidelines for (insert the specific equipment). While the 2005 Das award clarified tasks that could be performed by different occupational groups in the Maintenance Craft, it was not all inclusive; the process is still subjective and open to interpretation. The Postal Service and the APWU now review the bulletins using the Article 19 process and when necessary discuss the individual tasks in MMOs. The parties have had success in agreeing to levels before publication. The 2005 Das award is now being used as the standard to evaluate the minimum skill level.

Notably, in May 2002, the Postal Service issued Maintenance Management Order MMO-023-02 addressing the Time Attendance Collection System Interim Maintenance Guidelines and Maintenance Staffing Criteria. The Postal Service assigned the work at issue to Electronic Technicians upon the issuance of this May 2002 MMO. This MMO addressed the maintenance of the hardware itself, and the levels were in accordance with the 2005 Das...
II. Assessment of Liability

Based on the file and information available, liability would have accrued from January 2001 to mid-May 2002. The original contingent liability report assumed continued liability since the deployment of TACS in early 2001. That has been adjusted based on Maintenance Management Order (MMO) MMO-023-02. MMO-023-02 established Preventive Maintenance (PM) guidelines and was published May 13, 2002 allowing staffing of the bargaining unit for performance of PM on the TACS system.

To provide more accurate evaluation of the potential damages we have obtained information on the number of TACS Electronic Badge Readers (EBR) that were deployed shortly after the time period in question. By applying the number of components to the corresponding PM time allowed per MMO-023-02, the total number of hours the bargaining unit may have been harmed can be estimated.

The maximum reasonable payout is estimated to be $6,755,358. The most likely payout can be set at $3.38M based on a number of factors which can be argued but not quantified with absolute numbers. Factors include:

- There is a high likelihood that Maintenance had staffing for maintaining the preceding legacy systems of either Postal Service Data System (PSDS) or Electronic Time Clocks (ETC). As TACS replaced those systems, staffing already existed. In the case of PSDS sites the existing staffing likely exceeded the requirement of TACS.

- The work needed on the TACS system cannot be assumed to have been performed solely as a function of Information Technology (IT). Maintenance was likely involved to a varying extent.

- All systems were not simultaneously deployed. The TACS installation was performed over a period of time.

- Finally, based on past experience the actual damages are negotiated between the parties taking all relevant factors e.g. the legacy staffing, often resulting in a payout 50% or less than the maximum possible.

1/24/18 UPDATE - Because this case has been pending for 17 years without having been scheduled for arbitration, the liability assessment will be changed from "probable" to "reasonably possible." If the case is ever scheduled for arbitration, the liability assessment will be re-evaluated.

<td>Facts / Positions</td>
<td>The Postal Service leases a large property located at 345 W. Saint Paul Avenue, Milwaukee, Wisconsin, which it operates as a processing and distribution center. The Postal Service has leased the property since 1970. Its tenancy extends to at least 2025, and potentially as far as 2040, pursuant to multiple renewal options. Plaintiff in this case is the Postal Service's landlord, 345 Property Owner, LLC. With limited exceptions, the terms of the lease make the Postal Service generally responsible for maintenance of the premises. In April 2018, after a recent tour of the property, Plaintiff sent the Postal Service a letter listing five conditions that the Plaintiff believed to be in need of repair. These included the installation of safety netting under portions of crumbled concrete ceiling, areas of concrete deterioration, and worn roof coating. The Postal Service did not immediately respond to Plaintiff's request for information about the property condition and repair plans. In May 2018, Plaintiff filed a records request under the Freedom of Information Act pursuant to which the Postal Service provided, among other documents, a comprehensive Physical Needs Assessment Report (PNA Report) that it had procured for the property in 2015. In July 2018, Plaintiff's attorney sent the Postal Service a notice of default for failure to maintain the property. Plaintiff filed this lawsuit in Wisconsin Small Claims Court on August 21, 2018, as an action under state statute to evict the Postal Service from the property. Plaintiff alleges that the Postal Service has breached its contractual duty to maintain the property in proper condition, and that it has a right to terminate the contract and take possession of the property. The Postal Service removed the matter to the District Court for the Eastern District of Wisconsin. Plaintiff moved to amend the complaint on May 1, 2019. The amended complaint asserts that the Postal Service's continued possession of the premises amounts to a taking of property without just compensation in violation of the Fifth Amendment of the U.S. Constitution (takings claim). The amended complaint continues to assert a right to evict under state statute, as well as an independent count for breach of contract, and a count for breach of an implied covenant of good faith and fair dealing. Plaintiff does not quantify the amount...</td>

</table>

72  USPS-20-1215-A-009160
of damages sought under any of these theories.

The Law Department's investigation reveals that the Postal Service has been planning and implementing extensive repair and maintenance projects at the property, as recommended in the 2015 PNA Report. This initiative was developed independent of, and well prior to, Plaintiff's March 2018 tour of the property. For the five items that Plaintiff identified, repairs are complete, underway, or imminent.

The Postal Service's basic position is that it has not breached the contract because: (1) the lease grants the Postal Service broad discretion over the timing and manner of repairs; and (2) Postal Service has already repaired, plans to imminently repair, or is otherwise reasonably exercising its maintenance and repair discretion over each of the conditions Plaintiff raises in the complaint (and over the property generally). The Postal Service filed a motion to dismiss on June 12, 2019. On October 9, 2019, the court agreed with the Postal Service, holding that the Postal Service was only obligated to maintain the property in sufficient condition to use as a postal facility, and avoid waste. The court dismissed the complaint without prejudice.

On November 8, 2019, Plaintiff filed a second amended complaint. This complaint asserts that the property is not in adequate condition for Postal Service use. Central to that allegation is a claim that the property's seawall is at risk of collapsing, flooding the property. Plaintiff does not provide any details of why the seawall is at risk of collapse, other than alleging that it has suffered unspecified "structural damage." The Postal Service filed a motion to dismiss the new complaint on December 13th. Plaintiff filed its opposition on January 24th. The Postal Service filed its reply brief on February 14th.

ASSESSMENT OF LIABILITY

Our investigation thus far indicates that the Postal Service is in compliance with the lease and that Plaintiff likely cannot prove breach of contract or a taking of Plaintiff's property. In the first dismissal, the court agreed with the Postal Service's legal theory that it had more limited repair obligations than Plaintiff claimed. Plaintiff's second amended complaint appears significantly weaker. Even if the court does find Plaintiff's breach claims plausible enough to survive a motion to dismiss, the Postal Service is very likely to prevail on summary judgement, based on the facts that we currently know. It is also unlikely that Plaintiff could succeed on its eviction or takings claims, as it did not provide adequate advanced notice of the most serious alleged defect, the seawall, to support eviction.

ASSESSMENT OF DAMAGES

As noted above, Plaintiff amended its complaint in May 2019 to add a takings claim. That claim, if successful, could significantly increase the potential maximum payout. A property owner whose private property has been taken by the government for public use is entitled to just compensation under the Fifth Amendment of the U.S. Constitution. Just compensation generally equates to the property's fair market value. We do not have an estimate of the property's current market value, so it is not possible to estimate with certainty USPS's potential maximum liability if it were to be found liable for a permanent taking of the property. Plaintiff reportedly purchased the property in 2015 for approximately $13.1 million. Accordingly, at this early stage in the proceedings, we estimate that Plaintiff's takings claim carries a potential maximum payout of approximately $13 million. That figure is somewhat speculative, and subject to change as the case proceeds.

Our preliminary assessment is that the risk of damages for this amount is
remote. Even if the court finds that Plaintiff is entitled to damages under a takings theory, federal precedent supports an argument that USPS should be liable for only a temporary taking of the property, for which fair-market rent, rather than purchase value, constitutes just compensation. See Sunshine Dev., Inc., 674 F. Supp. 2d at 628; Allenfield Assocs., 40 Fed. Cl. at 487. This is similar to the damages that would likely be assessed if USPS were found liable on a breach of contract theory, in which case many federal courts have held that when a government-lessee holds over after a lease ends, the landlord is entitled to the reasonable rental value for the holdover period, plus any foreseeable special or consequential damages. 49 Am. Jur. 2d Landlord and Tenant § 278; U.S. Postal Serv. v. Sunshine Dev., Inc., 674 F. Supp. 2d 619, 627 (M.D. Pa. 2009); Prudential Ins. Co. v. United States, 801 F.2d 1295, 1296 n.4, 1300 (Fed. Cir. 1986). Under either approach, the total amount of USPS’s damages will depend on several factors, including the amount of time that USPS is found to be in holdover.

Facts / Positions
The APWU filed a grievance contending that management violated Article 32 of the National Agreement by subcontracting out vehicle shuttling/towing services at the St. Louis Vehicle Maintenance Facility (VMF).

For the past thirty (30) years, Management has utilized local companies such as Mike’s Towing, Bolin, and Gateway to subcontract shuttling/towing services. Indeed, evidence establishes that Management has provided the local union with documentation for the contracts with Mike’s Towing and Bolin since October and November 2001, respectively. These contracts have been continuously utilized from that time until the present. Additionally, evidence demonstrates that management has presented many PS Forms 4541 to the Union to support their use of these contracts.

In March 2010, Ted Nappier, Manager, Vehicle Maintenance, sent a notification via certified mail advising the APWU that, in accordance with Article 32 Section One of the CBA, management performed its due consideration of the requisite five factors to evaluate the need for the St. Louis VMF to subcontract APWU bargaining unit work. Specifically, management provided written notification to the APWU Local President that management decided at the local level to subcontract shuttling/towing services. The evidence establishes that this decision was made consistent with the requirements of Handbook EL-912, Article 32 Subcontracting, Section One, General Principles. Thereafter, beginning in May 2010, Mr. Nappier began subcontracting shuttling/towing services utilizing the National Contract with the

[deletion]
United States Auto Club (USAC) that was negotiated by Postal Headquarters.

In its grievance, the Union contends that Management never met with the local Union President to discuss the shuttling/towing issue, the VMF has always had the resources and manpower to perform shuttling/towing services, and management failed to follow the provisions of Service Bulletin V-03-06. As such, the Union demands that management immediately stop using subcontractors, return all work to the VMF craft, evenly divide the equivalent of all monies paid to shuttling/towing contractors among the employees that were supposedly affected.

Management contends that the Union's grievance is not arbitrable because it is untimely and, in any event, should be barred under the doctrine of Laches due to the Union's failure to promptly act on the alleged violations. In this case, Management argues that after decades of delay in seeking redress, the Union waived its right to contest the subcontracting of this work. [fn.1 - Evidence also demonstrates that the Union was aware that the Coyle and Weather Stations were closed on Saturday and as such, when a vehicle broke down at those times the employees called Mike's towing or a subcontractor to shuttle/tow the vehicle.] Even if this grievance were to proceed, Management believes that it will prevail. Indeed, Management's evidence establishes that it performed the requisite "due consideration" prescribed in Article 32 related to subcontracting work. Management further contends that the Postal Service maintains its rights negotiated within Article 32 to subcontract out bargaining unit work as it deems necessary (Article 3) in support of its operational oversight.

Management also contends that Article 3 Section D provides it with the right to determine the methods, means, and personnel assigned to repair Postal Service vehicles.

In the present case, Management can establish that it followed Article 32 by giving due consideration to public interest, cost, efficiency, availability of equipment, and qualification of employees and then sent a courtesy decision letter to the Union. The VMF manager's consideration of the five factors can be summarized as follows:

Public Interest: Private companies specialize and are professionals at moving vehicles. Over the years, VMF employees have had numerous accidents while moving vehicles. The contractors always use light bars while VMF employees do not.

Cost: The USPS labor cost is $45/hour plus overhead versus $26/hour under the contracts.

Efficiency: The VMF need to move approximately 700-900 vehicles. Contractor shuttling/towing allows more time for the technician to perform maintenance on Postal Vehicles which is consistent with the Postal Service's goal to continually improve the reliability and safety of its fleet.

Availability: The contractor has more equipment available than the VMF. The contractor provides and maintains its own equipment. The VMF employees are needed to make repairs and keep the fleet operational in the most cost effective way possible. Contracting increases in-shop repair time.

Qualification of Employee: The St. Louis VMF employees are qualified to shuttle the vehicle fleet; however, that is not their expertise. The shuttling/towing contract provides for full time shuttling/towing experts who move, shuttle, and tow vehicles as their occupation. The multiple vendors and drivers provided are dedicated to the shuttling and towing of vehicles. While VMF employees are "qualified" to perform the work, the vendor is more qualified. This factor is deemed less important to the overall decision.
Based on these factors, the VMF manager decided to subcontract shuttling/towing of motor vehicles on an as-needed basis. [fn. 2 - The St. Louis VMF’s has always managed shuttling/towing services in a manner promoting the efficiency of the Service via shared responsibility among the various Postal Service crafts as well as subcontractors. Management contends that such duties are not identified as a duty within any particular standard position description and are not the sole right of any particular craft.] Management contends that the "due consideration" process is solely Management's right and does not require Union input or approval.

Finally, the Union claims that management failed to follow the provisions of Service Bulletin V-03-06; however, the evidence demonstrates that this bulletin is only a draft, never implemented, not official, and as such, does not support any management violation.

Beyond the arguments presented by the Union, Management can also establish that VMF employees are being completely utilized at and beyond 40 hours in order to perform their currently assigned duties as outlined in their job descriptions. Accordingly, there has been no reduction in guaranteed work hours or reduction in staffing.

Based on the foregoing, management believes that the risk of loss is remote. However, liability in these grievances is essentially "all or nothing." As such, both the "Amount Sought" and the "Maximum Reasonable Payout" amounts are the full $10,231,222 (rounded) which is calculated based on Management records reflecting the actual monthly amounts expended for contracting services (current record calculation is through January 2020). While this is a continuing alleged violation, the amount of accrual each month/quarter is unpredictable because contracting services are obtained as needed.

Given the remote risk of loss, it is unlikely that management would settle these grievances. However, management believes if this grievance was somehow lost at arbitration, that the "Most Likely Payout" would be based upon the average annual cost paid to the craft to shuttle vehicles during FY2010, 2011, and 2012, multiplied by the past 7.33 years that such shuttling was subcontracted out, or $2,171,073 ($296,190 annual average X 7.33 years = $2,171,073).
Case Name: Class Action, Introduction of the Automatic Induction (AI) enhancement on the AFSM/ATHS machines resulting in reassignment (excessing) of 21 Clerk craft employees to Mail Handler craft, APWU (Palatine P & DC)

Case Number: Grievance No. J00C-1J-C06289694 (Lakeland District, formerly Northern Illinois District)

Facts / Positions: I. Facts/Positions

Highlighting any revisions made since Report for FY2020 Q1:
New text and [deletion]

At the national level, it was decided to install the Automatic Induction (AI) enhancement to the Automatic Flat Sorting Machine/Automatic Tub Handling System (AFSM/ATHS) 100. This changed the staffing matrix on the AFSM/ATHS 100. The change in staffing due to the implementation of the new equipment began on July 7, 2007.

At the Palatine P&DC, there are five (5) AFSM/ATHS 100 machines. Prior to the introduction of the AI, four (4) clerk employees staffed each machine. These machines are run on two (2) tours, seven (7) days a week. The staffing matrix was changed with the AI to three to five (3-5) mail handlers prepping the mail and one (1) clerk monitoring the three (3) feed stations to clear jams. The sweeping duties are performed by the mail handlers. These amounts are in relation to the National Staffing Package for the AI. These were used in the impact statement.

The impact statement contained in the file reflects the review period dates from April 1, 2006, through March 30, 2007. The anticipated date of impact was March 31, 2007.

On or about February 9, 2007, the local APWU was informed that the Palatine P&DC was introducing the AI retrofitted on the AFSM/ATHS 100 machines. Due to this modification and the fact that the duties on the AI belonged to the mail handler craft, clerks would be reassigned (excessed) from the clerk craft to the mail handler craft. Management and the APWU were in talks regarding the number of excessed employees, attrition, posting bids, etc. during this
time.

An original on March 5, 2007, and corrected copy on April 12, 2007, of the impact statement were also exchanged. The adjusted impact statement showed the clerk craft was overstaffed by fifty (50) clerks and forty-one (41) would be excessed into the mail handler craft or outside the facility. The impact was reduced by nine (9) due to expected attrition. The statement showed a savings of 2,296 hours per week.

The APWU union at the headquarters level was notified with a letter dated April 12, 2007, about the deployment of the AFSM/ATHS 100 Automatic Induction at the Palatine P&DC. This letter stated that nine (9) full-time clerks may be attritted from the facility and that forty-one (41) may be excessed outside the craft and/or installation.

On July 7, 2007, management proposed an excessing impact with the implementation of the AI on the AFSM/ATHS 100 machines at the Palatine P&DC. Many employees voluntarily went to the mail handler craft prior to the excessing. Other employees were excessed based on the reduction. In the end, nineteen (19) employees left due to attrition, twenty-one (21) were reassigned (excessed) to other crafts within the installation, and one veteran preference employee was reassigned outside the installation.

The union claims a violation of the National Agreement, Articles 3, 5, 8, 10, 11, 12, 15, 19, 37 and bases this claim on management's numbers used in the equation to determine the amount of clerks to be excessed due to the AI implementation. The union argues that some clerks were excluded from the equation, such as the light/limited duty clerks who are not able to perform their duty assignments and the clerks removed from the rolls based on terminations or transfers. The union argues the inclusion of these clerks would decrease the number excessed. The union contends that no clerk should have been excessed to the mail handler craft. The union requests that all forty-one (41) clerks be returned to the clerk craft, receive out of schedule pay and guaranteed hours.

II. Assessment of Liability

Management's Position: The union is also asking for guaranteed hours. However, excessed employees are still full-time employees and, thus, are already being compensated. Management's contentions are that the AI is a National Level Program. The new duties are assigned to the mail handler craft and the amount of clerks needed has decreased. No new equipment or work has been created or initiated for the clerk craft in the Palatine P&DC. The clerk craft duties do not substantiate the maintaining of these clerks. Overtime does not create positions and arbitrators have upheld this position. The union argues for application of the Labor Scheduler Program, which is a National Program used to establish a staffing package for a facility based on the mail volume and arrival time of the mail. It provides management with the amount of employees needed to perform the necessary functions and how many employees are needed per tour and at what time to maximize efficiency. The Labor Scheduler Program argument was contained in another grievance that was decided over two years ago. Management was successful in defending against this grievance. Article 12 was abided by throughout the process. The APWU was contacted and kept informed, the employees were correctly notified and the positions went away. These employees were unassigned and the Postal Service found other work for them. Even if an arbitrator rules against the Postal Service, the remedy that the union seeks is inappropriate. The employees are working and the excessed employees are at saved grade. The issue would be the schedule difference. The attritted employees volunteered to go and selected their new positions.
III. Assessment of Damages

Based on the fact that full-time employees are not entitled to guaranteed hours, the figures below are only for out-of-schedule pay.

The amount sought and maximum reasonable payout is based upon 41 clerks working 80 hours per pay period (41 clerks x 80 hours per pay period = 3280 hours), during the operative liability period, as shown below. Out of schedule pay is 50% of pay. Consequently the calculations would be based on 41 clerks X 80 hours per pay period, at the applicable out-of-schedule rate of pay, through the present quarter, as referenced below:

Total hours for FY 2007 thru FY 2019: 1,066,000
Total from Current FY chart below: 42,640

FY Hours/Pay Period Number of PP Total Hours
2020 3280 13 42,640

The current FY20 hours X $12.70 (OOS rate) (FN.1) = $541,528

Total hours from FY2007 thru FY2019, or 1,066,000 X the applicable, annual OSS rate (See chart attached to client report)(See FN.1) = $12,566,860.80.

In summary, the amount sought and maximum reasonable payout is based upon the total hours tabulated above, or $13,108,388.80.

If the grievance is upheld, we expect an arbitrator to award compensation on the basis of 21 clerks, versus 41, because although the original impact proposed 41 excessed employees the number was reduced due to unanticipated attrition. Accordingly, the most likely payout is based upon 21 clerks working 80 hours per pay period (21 clerks x 80 hours per pay period = 1680 hours), during the operative liability period, as shown below. Out of schedule pay is 50% of pay. Consequently the calculations would be based on 21 clerks X 80 hours per pay period, at the applicable out-of-schedule rate of pay, through the present quarter, as referenced below:

Total hours for FY 2007 thru FY 2019: 546,000
Total from Current FY chart below: 21,840

FY Hours/Pay Period Number of PP Total Hours
2020 1680 13 21, 840

The current FY20 hours X $12.70 (OOS rate) (FN. 1) = $277,368.00

Total hours from FY2007 thru FY2019, or 546,000 X the applicable, annual OSS rate (See chart attached to client report)(See FN.1) = $6,436,684.80.

The most likely payout would be based upon the total of the hours for FY 2007 through the present, or $6,714,052.80.

Footnote 1 -The OSS rates of pay are based upon the applicable, end of year schedule pay scales from the National Agreement. The chart attached to the client's report articulates this based upon Step H, of either Level 5 or Level 6 (upon conversion), for each end of year pay schedule. The OOS rate utilized in FY2018 Q1 ($12.24) has been adjusted to $12.70 to reflect the current pay schedule which was not available at the time the Q1 report was completed.
Case Name: Mail Transport Equipment Service Center Network (NPMHU)

Facts / Positions:

I. FACTS AND POSITIONS

The Mail Transport Equipment Service Center Network centralizes the operations needed for inventory, repair, maintenance, replacement and distribution of mail transport equipment. These centers were staffed by maintenance craft employees of both the National Postal Mail Handlers Union ("NPMHU" or "Mail Handlers") and the American Postal Workers Union (APWU). After a decision was made to subcontract this work, both the Mail Handlers and the APWU filed grievances alleging violations of Article 32. The Postal Service contends it followed Article 32. The NPMHU case is now at Step 4 of the grievance procedure. The APWU case is not listed on this report because the effect (if any) of the subcontract on the APWU bargaining unit was so negligible that any damages the APWU could possibly recoup would not reach the contingent liability threshold.

II. LIABILITY ASSESSMENT

We have reassessed this case as remote because the Postal Service gave proper notice of the subcontracting to the NPMHU and the Article 32 factors appear to have been taken into account in deciding to subcontract. The union has not provided specific evidence to the contrary.

In addition, Postal Service Operations is undertaking a cost analysis using the new Mail Handler Associate (MHA) rates to determine whether it is appropriate to bring MTESC work back to the bargaining unit. This analysis may make it feasible to bring work back in house and reach a settlement with little to no monetary damages.

III. DAMAGE ASSESSMENT

No specific amount has been claimed by the unions. Approximately 1,377 NPMHU employees have been affected by contracting out the Mail Transport Equipment Service Center (MTESC) work. If the Postal Service is found to be in violation of Article 32, an estimate of the potential damages is calculated as follows:
There are currently 15 MTESCs in operation which use contractors. To calculate the maximum liability, the work hours from these facilities for 2012 and 2013 were used as a baseline, for an average yearly work hour estimate of 2,148,120 hours per year. (The work hours are less in 1998, the starting year of the project, because the 15 facilities did not open all at once.) These hours were multiplied by the average Mail Handler overtime rate for each year the MTESCs have been in existence (since 1998). This results in a maximum theoretical liability of approximately $1.56 billion ($1,560,000,000.00).

(Previously, damages were calculated based solely on one facility - the Greensboro MTESC - which was a pilot facility. These revised calculations reflect the multiple facilities that exist.)

However, if the case were to be lost, there is simply no way an arbitrator would award the Union $1.56 billion, or even half of that number. We estimate damages would be substantially less based on past practice in settling large claims. Given the length of time this case has been pending, we anticipate that an arbitrator would not award damages for every year the Postal Service has incurred liability. Rather, we would anticipate an arbitrator would remand the case back to the parties to determine damages. Based on our experience, it is unlikely these damages would exceed twenty (20) percent of the total liability, for maximum reasonable damages of approximately $312 million.

Because we do not foresee an arbitrator awarding the Union more than $312 million, we cap maximum reasonable damages at this level.

The most likely payout, however, will be between $0 and $1 million. We are confident that if we can settle this case, the Union will not seek monetary damages, or will settle for a nominal amount, in exchange for the Postal Service returning the work to the NPMHU bargaining unit.
Case Name: On Site repair service provided by HP/Compaq under National Maintenance Agreement (Contract # 102591-02-M-0803)

Case Number: Q00T-4Q-C 04012916

Date Filed: 10/20/2003

Amount Sought: [Unknown]

Liability Assessment: Remote

Damages Assessment:
- Most Likely Payout: $11.6 Million
- Maximum Reasonable Payout: $29.1 Million

Law Dept Counsel: McClease, Tiffany N.

Law Dept Reporting Office: HQ Employment and Labor Law

Other Representative for USPS: Rickey Dean, Labor Relations

Facts / Positions:

I. Facts and Positions

The Postal Service entered into a 5-year Information Technology contract with HP/Compaq a National Maintenance Agreement (Contract # 102591-02-M-0803) in October 2003. Thereafter, the American Postal Workers Union (APWU) filed a grievance alleging they were deprived of their rights as contained in Article 32.1.B. The Postal Service renewed the 5-year contract for a third time in October 2013. That contract ended in 2018 and is no longer in effect. The Postal Service subsequently entered into a global enterprise contract with HP that covers a broad range of items and services, most of which would not be considered bargaining unit work and included in this national dispute.

Arbitration has not been scheduled.

II. Assessment of Liability

At this time, we assess the likelihood of an unfavorable outcome in this case as remote, because arbitrators have held that Administrative Computers are under the jurisdiction of the Information Technology employees, and that the bargaining unit is restricted to the mail processing equipment.

III. Assessment of Damages

We do not have data for the work hours involved, but based on our experience in negotiating and litigating these types of grievances, we estimate damages to be approximately forty percent (40%) of the total contract amount of $9,700,000, or $3.88 million. These IT contracts are generally five years in duration, and given that we renewed the contract three times, we have tripled the estimate of damages.

Accordingly, the most likely payout estimate is $11.64 million, and the maximum reasonable payout estimate is $29.1 million. As the contract is no longer in effect, we cap damages at those levels.
I. Facts & Positions

The American Postal Workers Union (APWU) alleges that in May 2004 the Postal Service did not give advance notice for subcontracting at the National level of the installation of Automated Postal Centers (APCs) at 2500 mail facilities. The APWU filed a grievance alleging the Article 32 process was violated.

The Postal Service's position is that installation of retail equipment is not bargaining unit work.

Arbitration has not been scheduled.

II. Assessment of Liability

At this time, we assess the likelihood of an unfavorable outcome in this case as remote. Recently, the Postal Service prevailed in the APPS arbitration concerning the ability to subcontract the installation of a major mail processing system (APPS) under Article 32 of its collective bargaining agreement. The arbitrator found that the work of installing the APPS was not bargaining unit work, so the Postal Service did not violate Article 32 by not assigning the APPS installation to the union. This favorable decision affords the Postal Service greater license to subcontract work that is not bargaining unit work. Based on this clarity in the case law, we have determined that the liability assessment in this case is more appropriately classified as "remote." A more thorough analysis of liability will be made as the case progresses to arbitration and as more information becomes available.

III. Assessment of Damages

The work at issue would involve a one-time commitment of approximately 100 work hours at 2500 facilities at $48 per hour (FY14 ET-10 OT rate) which equals $12.0 million.

We estimate the most likely damages payable in this matter at $6.0 million, and, thus, we cap most likely damages at this amount. This determination of
most likely damages is based on a variety of reasons (e.g., the absence of a significant impact on current employees, the general reasonableness/need of the out-sourcing decision, avoidance of windfall payments to employees, Postal history of resolving these types of grievances, etc.).
I. Facts and Positions

The American Postal Workers Union (APWU) alleges that in August 2005 the Postal Service did not give advance notice for subcontracting at the National level of the installation of Private Branch Exchange telephone systems at mail facilities. The APWU filed a grievance alleging the Article 32 process was deficient. The Postal Service’s position is that installation of telephone equipment is not bargaining unit work.

Arbitration has not been scheduled yet.

II. Liability Assessment

At this time, we assess the likelihood of an unfavorable outcome in this case as remote. Recently, the Postal Service prevailed in a pair of arbitrations concerning the ability to subcontract bargaining unit work under Article 32 of its collective bargaining agreements. In MPI-LAN, which involved the installation of certain wiring related to a postal-wide network upgrade, the subcontracted work represented less than 1% of all work performed by the maintenance craft. Accordingly, the arbitrator found that there was no significant impact to the bargaining unit, and thus no requirement that the Postal Service consult with the union on the decision to subcontract. In APPS, which involved the subcontracting of installation of a major mail processing system, the arbitrator found that the union did not typically perform the kind of installation work at issue, so the Postal Service need not consider whether the work had a significant impact to the bargaining unit. These favorable decisions afford the Service greater license to subcontract if either (a) the work represents only a small portion of overall bargaining unit work (the MPI-LAN arbitration); or (b) the subcontracting involves work not traditionally performed by craft employees - i.e., it is not bargaining unit work (the APPS arbitration).

Based on this clarity in the case law, we have determined that the liability assessment in this case is more appropriately classified as "remote." A more thorough analysis of liability will be made as the case progresses to arbitration and as more information becomes available.

III. Damages Assessment
The work at issue involved a one-time commitment of approximately 200 work hours at 3,000 facilities at $38 per hour (FY05 ET-10 OT rate), which equals $22.8 million. We have set the Maximum Reasonable Payout at $22.8 million, and capped the amount at that level for this one time event.

We set the Most Likely Payout at $1-4 million for this one time event. We believe that we can limit damages to a range of $1 to 4 million for a variety of reasons (e.g., the absence of a significant impact on current employees, the general reasonableness/need of the out-sourcing decision, avoidance of windfall payments to employees, Postal history of resolving these types of grievances, etc.).
The American Postal Workers Union (APWU) alleges that, in June 2001, the Postal Service did not give advance notice for subcontracting at the National level of building and maintenance functions at the Priority Mail Processing Centers (PMPCs). The APWU filed a grievance alleging the Article 32 process was deficient.

The Postal Service’s position is that work was properly outsourced pursuant to Article 32.

Arbitration has not been scheduled.

II. Assessment of Liability

At this time, we assess the likelihood of an unfavorable outcome in this case as reasonably possible because the union’s grievance does not appear to be frivolous, and an arbitrator may find that the grievance has merit. A more thorough analysis of liability will be made as the case progresses to arbitration and as more information becomes available.

III. Assessment of Damages

The work at issue would involve staffing for several years at several PMPC facilities. The original dispute involved 10 PMPC sites, which the calculations reflect. The PMPC transition was required to be completed in January 2002; therefore, the calculations include 2002 through 2020.

Please see the attached spreadsheet (last updated 2/15/19), which was used to calculate damages. With one noted exception, damages were estimated
using an average custodial productivity of 15,000 square feet per custodian and rounding the result to estimate how many custodians would have been staffed in each facility each year. An exception is Phoenix West Valley, which was in-sourced, and the number of custodians staffed when in-sourced was used to estimate staffing during the period of time the facility used contractors to complete the work. Where the facility increased in size, there are two lines reflecting the different sizes. At the bottom of the spreadsheet is Total Employees, which reflects the number of estimated employees by year. Total Annual Cost by Year is the Total Employees multiplied by the Annual Custodial Rate, or yearly salary, for the corresponding pay level by year. Sites where the custodial work was, or is now, performed by Postal employees have "0" entered for that year and partial years have been rounded.

Nashua NH shows no liability because the case was adjudicated in 2006. The remedy was to staff the facility with Postal employees. The Seattle PMPC was never cleaned by contractors.

Custodian Laborers received an upgrade in 2008; therefore, the pay level changes that year from PS-3 to PS-4. Annual Cost by Year is the product of the Total Employees for each year and the Annual Custodial Rate.

Based on the above methodology and factors, the most Reasonable Payout is changed from $85.4M to $89.5M and the Most Likely Payout is changed from $42.7M to $44.8M, accounting for damages calculated through December 2020.

***UPDATE***

In consideration of the age of this case, as well as recent favorable precedent related to subcontracting, we are reassessing this case as "remote."
The American Postal Workers Union (APWU) has withdrawn its grievance (Q98C-4Q-C 01242609) in this matter. The National Postal Mail Handlers Union (NPMHU) alleges the Postal Service improperly contracted out bargaining unit work when it decided to subcontract Terminal Handling Services associated with the FedEx air transportation agreement.

Based on an internal review, the Postal Service had determined that there was a need to outsource ground handling operations at approximately sixty (60) locations. As a result, the Postal Service had contracted PricewaterhouseCoopers to conduct an Article 32 Comparative Analysis of the costs associated with performing ground handling operations in-house versus the estimated costs of contracting those services. The Article 32 Comparative Analysis (CA) was based upon reasonable assumptions, and all computations are valid. Indeed, the financials are based on anticipated costs related to building up and breaking down air cargo containers. The CA indicates that by outsourcing, a cost avoidance of $54 million (undiscounted over seven years) may be realized over the same operation performed in-house.

Upon completion of the CA, on January 10, 2001 the Postal Service entered into a seven-year, $6.36 billion agreement with FedEx to provide air transportation for Priority, Express and First-Class mail. At the time of the agreement, the cost benefit analysis anticipated terminal handling costs for only outgoing volume. Subsequent to the agreement, Operations determined that both originating and destination volume will require terminal handling. About 3/4 of the contracts at issue have already been extended through 2020, the remainder are currently in the process of being extended until then as well.

II. ASSESSMENT OF LIABILITY

We assess the case as remote.

Article 32 of the applicable National Agreements gives management the right
to subcontract, provided we follow the contractual provisions and procedures, and give due consideration to the agreed upon factors. We believe that an arbitrator would find that the record supports that management’s decision was reached following the required Article 32 process and deny the grievance.

III. ESTIMATE OF DAMAGES

As remedy, the NPMHU requests rescission of the decision to contract out the work, termination of the contracts, restoration of all appropriate work to NPMHU represented employees, and that the employees be made whole for lost wages. No specific amount of damages has been claimed, however, based on the DAR and Article 32 comparative analysis, damages could be awarded as specified below.

The calculations below show the new labor cost that would have been incurred by the Postal Service if the work had been awarded to NPMHU bargaining unit employees, who would have otherwise performed the work, instead of the contractor.

For FY02, the internal New Labor costs were as follows: $52 million.  
For FY03, the internal New Labor costs were as follows: $53 million.  
For FY04, the internal New Labor costs were as follows: $55 million.  
For FY05, the internal New Labor costs were as follows: $57 million.  
For FY06, the internal New Labor costs were as follows: $59 million.  
For FY07, the internal New Labor costs were as follows: $59 million.  
For FY08, the internal New Labor costs were as follows: $65 million.  
For FY09, the internal New Labor costs were as follows: $66 million.  
For FY10, the internal New Labor costs were as follows: $68 million.  
For FY11, the internal New Labor costs were as follows: $70 million.  
For FY12, the internal New Labor costs were as follows: $71 million.  
For FY13, the internal New Labor costs were as follows: $71 million.  
For FY14 the internal New Labor costs were as follows: $72 million.  
For FY15 the internal New Labor costs were as follows: $75 million.  
For FY16 Quarter 2 the internal New Labor costs were as follows: $38 million.

The total estimated Most Likely Payout for the period FY02 through FY16 Quarter 1 is $93.1 million. Although damages continue to accrue at the rate of approximately $75 million per year, based on our experience with arbitral awards, and the assessment of “remote” we cap the Maximum Reasonable Payout at $100 million. We believe that it is unlikely that an arbitrator would award more than $100 million.

Despite the APWU’s withdrawal of its grievance, the assessment of damages remain the same given the lack of significant impact this subcontracting decision would have had on the APWU bargaining unit.

If Field Grievance, held in abeyance? No

Law Dept Counsel Breslin, Jennifer S.

Law Dept Reporting Office Eastern
In accordance with the APWU 2010-2015, MOU Re: Motor Vehicle Craft Jobs, the Employer was to designate 600 PVS routes to be assigned to the Motor Vehicle Craft. The Union contends that the USPS failed to convert the runs, which instigated this grievance. The run in question is HCR 151AQ, which is still operating today and consists of 4 shuttle runs from the NDC to the THS Cargo Force at the Pittsburgh Airport. Headquarters Labor Relations was recently consulted with regard to this matter and it was determined that these runs should be converted now.

**UPDATED INFORMATION, FY19 QIV:**
Eastern Area Labor Relations conducted further research on this case since it was first reported. Based upon the new information that was received in FY19 QIV, HQ LR was consulted who advised that this case should be held pending the outcome of national level case Q10V-4Q-C 14256800 that deals with what the definition of "route" encompasses as it relates to Section 2 of Motor Vehicle Crafts Jobs MOU found in the 2010 National Agreement, as it was anticipated that they would be able to reach the agreement to hold the case in abeyance. However, in FY20 QII, the Area LR Specialist has been in communication with the MVS NBA, and as of this report, the NBA has not agreed to hold the case in abeyance. Because the case is not priority scheduled, we have changed the estimated time to resolution from "less than 1 year" to "1 to 5 years." It is the Postal Service's position that we have met our requirement to convert 600 HCR "routes" to PVS in accordance with the MVC Jobs MOU. Therefore, it would not be appropriate to convert HCR 151AQ.

In addition, while this route appeared on the initial list in September 2011, there continued to be ongoing revisions to the list of routes where HCR 151AQ was not listed. The APWU, at the national level, was kept apprised of the ongoing revisions.

**LIABILITY [deletion] ASSESSMENT:** Given the foregoing new information, it has been determined that the liability assessment should be changed from Probable to Reasonably Possible.

**CALCULATION METHODOLOGY:** 4 runs @ 36 hours per week X 52 weeks per grievance filed 2/4/2012 years @1.5 OT rate+= $2,539,309.74.

***Unable to attach FY20 QII Spreadsheet to this online report, but it is included in the paper copy.***

Facts / Positions

For a statement of the facts and the assessments, see the entry for this case in the Contingent Liabilities Report. The claim by Northrop and the counterclaim by the Postal Service will be discussed in one report. The maximum amount of the Postal Service's counterclaim for delay damages was reduced, as stated in the main report.

[Case previously reported as Short-term Liability [Estimated Time to Resolution: Less Than 1 Year]

### Case Name: Administrative Claim of Paul Reed

- **Case Number**: ____
- **Date Filed**: 07/22/2019
- **Amount Sought**: $9.5 Million
- **Liability Assessment**: Probable
- **Damages Assessment**:
  - **Most Likely Payout**: $0.8 Million
  - **Maximum Reasonable Payout**: $1.3 Million
- **Change in Status**:
  - **Additional Facts or Revision in Text**
- **Estimated Time to Resolution**: 1 - 5 Years
On August 14, 2017, a rural carrier associate (RCA) delivered mail to a CBU at an apartment complex. The RCA returned to her LLV and began to reverse when the LLV collided with the front passenger side of a Chevrolet Malibu. The Claimant was a front seat passenger in the Malibu. The RCA reported that the Malibu pulled into the parking lot behind her after she had returned to the LLV and was already in motion. Claimant alleges that the Malibu was in the parking lot and trying to back into a parking spot when the LLV struck it. Claimant also alleges that the RCA was involved in an argument with a resident of the apartments just prior to reversing her vehicle and she was distracted and not paying attention. We are still trying to gather more information regarding the facts of this accident and assignment of fault.

Claimant was 36 years old at the time of this minor accident. No injuries were reported on scene to police and the accident was so minor that only a one page police report was completed. Two weeks after the accident he began seeing an orthopedic surgeon with complaints of pain and severe spasms in his neck and back. Claimant already had a relationship with this surgeon as he treated with him between 2004-2007 and had a spinal surgery with a lumbar disc replacement in 2007. He also had pain injections to his neck during that period of time. Despite this preexisting history, Claimant alleges that his pain was controlled with pain medications and the subject accident made his pain worse and exacerbated his low back issues. MRIs showed multiple bulging discs in the Claimant's neck and back. He tried physical therapy but did not have relief. He then tried lumbar and cervical injections with minimal relief. In July 2018, the Claimant underwent a cervical fusion surgery at two levels, C4-6. Following surgery he continued to complain of pain and severe spasm in the lumbar back. In June 2019 a trial spinal cord stimulator was performed and Claimant alleges that it was successful and a permanent stimulator was implanted on July 22, 2019. We have not received any medical records regarding the permanent stimulator or actual cost.

Claimant claims his current medical expenses total approximately $387,000. We have verified past medical treatment of over $150,000 but do not have the actual cost of the alleged spinal cord stimulator. Plaintiff has retained a financing company to pay for his treatment and according to its lien from July 2019 they estimated treatment costs to total almost $260,000 though this was using estimates for the spinal cord stimulator procedure. Spinal Cord Stimulators also require future maintenance and monitoring and future expenses can be significant. Claimant submitted a certified life care plan asserting future medical costs in the range of $700,000 to $900,000. Based on our experience with Spinal Cord Stimulators, future expenses are highly speculative so if we are found responsible for the stimulator the future expenses should be much lower than claimed. Additionally, this accident was extremely minor and Claimant has a significant past history to include a previous
surgery so we need to review historic MRIs and evaluate the findings pre and post accident. While we will need to know much more about Claimant's medical history to assess this matter, and believe we have a comparative fault argument against the driver of the Malibu, we provide a preliminary most likely payout estimate of $750,000 with a maximum reasonable payout of about 1.3M. We are continuing to request and review records and anticipate with the issues in dispute in this matter any administrative offer we make will be relatively low and therefore the matter will likely end up in litigation. Having come to the conclusion the matter will not settle administratively, the estimated time to resolution for the litigation that will follow will be greater than one year.

**Law Dept Counsel**
Bjurstrom, Stanford M.

**Law Dept Reporting Office**
St. Louis

**Facts / Positions**
On September 6, 2017 RCA Debra Yarborough was travelling west on MLK Jr. Boulevard in Lexington, NC on her way back to the Lexington, NC Postal Office in her privately owned 2017 Jeep. She had completed delivering mail on her assigned route and was on her way back to the Post Office when she drove left of the center line into the oncoming eastbound traffic and hit the operator of a moped, Daquan Monicure, causing him to be...
ejected from the moped and thrown 70 feet from the point of impact. Although Yarborough initially told police that the moped had crossed into her lane of travel, three other witnesses interviewed by police contradicted her statement and advised that Yarborough had crossed the center line and hit Mr. Monicure, never slowing down. An open bottle of alcohol as well as a bottle of muscle relaxers were found in Yarborough's Jeep. She was arrested for DWI at the scene and later charged with Involuntary Manslaughter for which she plead guilty and received a 60 month suspended execution of sentence. Yarborough was terminated by the Postal Service for Failure to Observe Safety Rule and Regulations. The Postal Service is liable for this incident.

Mr. Monicure (22 YO) did not regain consciousness and was pronounced dead at the accident scene. He was observed by EMS to have significant head trauma with an open skull fracture to the left side of his head.

It is unclear at the time of the accident how Mr. Monicure was employed. Although correspondence from counsel for his Estate claims that he was working for a trucking company, there is also information we obtained noting that he worked at Lowe's in some capacity although no W-2's or tax returns have been provided. We recently received an economist's report which calculated Mr. Monicure's wage loss over his lifetime to be $837,134 reduced to present value as required under North Carolina law. The report did not reference any specific earnings of Mr. Monicure but simply used data from the Census Bureau for a male high school graduate. If graduating high school and a few blue collar skill class we know about are all Mr. Monicure has to offer to support a past and present wage history, the wage loss associated with his death might be half as much.

The economist's report also provided a calculation for loss of household activities of $144,239. The report calculated the figure from Mr. Monicure's age at death, 22 YO, to 36 YO. While the Estate's counsel has advised that Mr. Monicure had a 4 YO son at the time of his death, it appears he shared custody of his son with his son's mother and it seems likely he was not playing a large role in his son's life, which could reduce the value of the loss of household activities considerably. Mr. Monicure was also survived by his mother, Jeannette Toppin (the administer of his estate) and by his father John Montague.

Under North Carolina law, a claim may be made under the wrongful death statute by the personal representative. The wrongful death statute allows for recovery of medical expenses incurred by the decedent, as well as funeral expenses. It also provides for the present value of income of the decedent, services and assistance provided by the decedent as well as loss of society, companionship and comfort. The estate is also entitled to recover for the decedent's pain and suffering prior to death (although that does not appear to be a significant issue in this case).

The non-economic damages for his son's loss of Mr. Monicure's society, comfort and companionship is difficult to measure based on what we know at this point. We do know that a young boy has lost his father who was also very young. If the court finds the
decedent and his son had a close relationship, the non-economic damages could be significant.

Based on the information we currently have regarding the decedent, it appears that the most likely payout amount will be near $600,000, but a maximum reasonable payout of up to $1.2 million is reasonably possible.

Although we attempted to engage in settlement discussions with claimant, the amount she sought far exceeded our value of the case. As a result, we denied the claim on November 6, 2019. We recently were served with a complaint filed by the Estate in the US District Court for the Middle District of North Carolina. We expect to file an answer to the complaint in the next 30 days but it will take some time for the litigation to develop.

- **Facts / Positions**: Previously reported as the Administrative Claim of Kelvin Comeaux. Estimated Time to Resolution changed to over 1 year due to the fact that the matter has now entered litigation.

Report for FY2020 Q1:  
**New text and [deletion]**

On March 3, 2018, a Postal Supervisor was operating a Postal Caravan when she tried to turn left at an intersection from the right traffic lane of a two lane road. **Plaintiff was** in the left lane just behind the Postal vehicle and proceeding straight at this intersection. The Postal vehicle crossed into **Plaintiff’s path and struck the Plaintiff’s** vehicle. The accident was witnessed by a police unit on patrol in the area. The police determined that the Postal Supervisor caused the accident and assessed her with improper lane usage; however no citation was issued.

This was a relatively minor accident in that the property damage to the **Plaintiff’s** Chevrolet Tahoe was about $2,500. **Plaintiff (32 years old)** also has a complicated medical history which includes a gunshot wound with resulting injuries to his back, chest, and head. His jaw required a fixation surgery and his medical records reference multiple surgeries following the gunshot. **We requested the historical records administratively but Plaintiff’s attorney would not submit them so at this time we do not yet know the**
extent of his preexisting issues. We intend to obtain them in the litigation. The Plaintiff was disabled and unemployed following his gunshot wound in 2016 although he has told medical providers he was working construction after the accident at issue.

Following the accident, the Plaintiff complained of neck, low back and left shoulder pain. He began conservative treatment including physical therapy. In June 2018, he had an SI joint injection for pain. At the end of July 2018, he then underwent a SI fusion surgery along with a fusion at the C4-6 levels in his cervical spine (neck). Plaintiff was then diagnosed with a left shoulder labral tear and in October 2018, he underwent surgery on his left shoulder to repair the tear.

The Plaintiff alleges that his current medical expenses total approximately $325,000. He also submitted an estimate from a certified life care planner that his future medical costs will be just under $200,000. Discovery has not even begun and there is significant preexisting medical information that we need prior to determining the most likely and maximum reasonable payout values. We think it quite possible that some or all of the Plaintiff's medical issues predated this relatively minor motor vehicle accident, but if we are unable to prove that, judgments in Louisiana tend to be high. Therefore, if the court determines that all of his injuries arose from our accident, the maximum reasonable payment in this case would reach $1 million. The most likely payout we are listing, half of that amount, is only an early estimate at this time.

<td>Jacob Howley</td>
<td>USPS’s work force had increased from 617,700 in fiscal year 2013 to about 630,000 in fiscal year 2019.</td>
<td>This selective period focuses only on an interim increase in headcount, but a fuller perspective (see page 9) shows that headcount remains significantly lower than before the PAEA. Also, it should be mentioned that the USPS has achieved compensation reforms that lower the cost of new hires.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Highlights, p. 1</td>
<td>Sidebar, 1st paragraph</td>
<td>Tony Mazzei, Jacob Howley</td>
<td>While USPS is to be self-sustaining, it lost about $78 billion from fiscal years 2007 through 2019 due primarily to declining mail volumes and increased costs.</td>
<td>Should say “due primarily to declining mail volumes, increased costs, and new, unfunded legislative mandates and constraints.” (That would encompass RHB as well as the price cap and product limitations.)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Highlights, p. 1</td>
<td>Main text, 2nd paragraph</td>
<td>Tony Mazzei, Jacob Howley</td>
<td>To address these challenges, USPS has taken actions such as providing increased self-service options and reducing facility hours.</td>
<td>These are certainly things we’ve done, but hardly the most significant measures. More salient things to mention would be deferring capital investments, rationalizing the mail processing and delivery networks, creating new tiers of employees, utilizing significantly higher levels of non-career employees, and securing approval for a rate surcharge to recover some of the revenue lost during the Great Recession. Despite these efforts, the Postal Service has been forced to default on pension and RHB payments in order to preserve liquidity to maintain operations.</td>

<tr>
<td>1st full para</td>
<td>Steve Nickerson, Jacob Howley</td>
<td>While mail volumes have decreased, USPS’s compensation and benefits costs for current employees have been increasing since 2014.</td>
<td>This implies that USPS has been failing to control costs in line with volumes. But because of the USO, many of our costs are fixed and should not be expected to vary with volume. (E.g., we have to visit nearly every address every day regardless of volume.) And within our cost base, factors outside our control account for inflation, from changes in our benefits due to health-care cost inflation and external actuarial determinations, to step increases, layoff protections, and inflation-based COLAs in labor contracts imposed by arbitrators (or negotiated under the shadow of binding arbitration) and increases in normal cost contributions to the Federal Employees Retirement System (FERS). The draft report later gives context about collective bargaining, arbitration, and the USPS’s cost-reduction efforts. Hence, it might be helpful to either reframe the statement here to make it seem like less of a (potentially blameworthy) contradiction (e.g., “Despite significant cost-reduction efforts, USPS’s compensation and benefits costs have risen even as mail volumes have decreased…”), or else reserve it until after the necessary context has been established.</td>
<td></td>
</tr>
<tr>

<tr>
<td>9</td>
<td>1st full para, last sentence</td>
<td>Steve Nickerson, Tony Mazzei, Jacob Howley</td>
<td>According to USPS, total compensation and benefits costs increased by almost $1 billion in fiscal year 2019 alone.</td>
<td>The increase in compensation and benefits was 2.1%, only slightly higher than CPI growth of 1.7%. Unsurprisingly, given the overlap with general inflation, major drivers of the $1 billion increase in compensation and benefits were the step increases and COLAs in labor contracts imposed by arbitrators (or negotiated under the shadow of binding arbitration).</td>
</tr>
<tr>
<td>9</td>
<td>Footnote 22, 2nd sentence</td>
<td>Renee Sheehy</td>
<td>Non-career employees are generally considered temporary and hired, for example, during times of large mail volume such as holidays.</td>
<td>Replace with “Non-career employees include those with lower-paid positions such as city carrier assistants and postal support employees and temporary employees hired during times of large mail volume such as holidays.” (Many non-career employees are not temporary.)</td>
</tr>
<tr>
<td>11</td>
<td>First full sentence</td>
<td>Jacob Howley</td>
<td>Federal law requires USPS to participate in the Federal Employees Health Benefits Program (FEHBP) which covers current employees and retirees.</td>
<td>Should be expanded: “Federal law requires USPS to participate in the Federal Employees Health Benefits Program (FEHBP), which covers current employees and retirees, as well as federal pension and workers’ compensation programs.” (These programs impose substantially greater costs on the USPS than private-sector counterparts. GAO has previously studied the disparity as to FECA costs.)</td>
</tr>
<tr>
<td>11</td>
<td>Last paragraph</td>
<td>Jacob Howley</td>
<td>USPS’s unfunded liabilities and debt … [were] 226 percent of its fiscal year 2019 revenues. At the end of fiscal year 2019, USPS’s unfunded liabilities and debt totaled … more than double its annual revenues (see figure 2).</td>
<td>Consider eliminating the redundancy between these two sentences: “226 percent” is the same as “more than double.”</td>
</tr>
<tr>
<td>12</td>
<td>First sentence</td>
<td>Tony Mazzei, Jacob Howley</td>
<td>Total unfunded liabilities and debt have risen in part due to USPS not making payments to fund its retiree health and pension benefits.</td>
<td>Some explanation of GAO’s use of “unfunded liabilities” is in order. Also, debt should not be included here: defaulting on benefits payments is not why debt has increased. (Defaults conserve cash; borrowing also increases cash.)</td>

</tr>
<tr>
<td>19</td>
<td>2nd bullet</td>
<td>Jacob Howley</td>
<td>(&quot;new GM&quot;)</td>
<td>Defining this term is unnecessary, because it’s not used anywhere else in the report.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>For example, Royal Mail raised postal rates above the rate of inflation after relaxation of its price cap.</td>
<td>In contrast with the more specific accounts for other countries, this text is vague and belies how dramatic the UK price increases really were. Royal Mail’s price increases were substantially above inflation (basic letter rates rose 30-40% in 2012) and generally rose with inflation thereafter, although I believe the most recent increase was again above-inflation. Some mention should be made of this.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>In France, the postal regulator established a price cap in 2018 of 5 percent annual rate increases (including inflation) for 2019 through 2022 for letter mail and packages considered to be part of universal postal service. This price cap allows La Poste more price flexibility than the previous one.</td>
<td>France actually has a longer history of above-inflation price increases. The 2013-2014 price cap was CPI+1% per year. The 2015-2018 price cap was CPI+3.5% per year, with half of the overall increase front-loaded into the first year.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>Likewise, Australia Post implemented an above-inflation rate increase in January 2020, citing the need to generate revenues to offset growing financial pressures from declining letter mail volume.</td>
<td>Mention should be made of the more dramatic pricing history in Australia. In 2015, Australia Post raised the basic letter rate 16.7% (vs. 5.9% inflation since the prior rate increase). In 2016, it split its letter product, such that the slower service stayed at the same rate, but to get the same level of service, one would pay 42.9% more (vs. 1.8% inflation).</td>
</tr>
<tr>
<td>22</td>
<td>1st bullet</td>
<td>Jacob Howley</td>
<td>Royal Mail and La Poste reduced the number of mail sorting centers by about 40 percent over the past two decades.</td>
<td>This should be double-checked for Royal Mail. According to [this study](p. 12), Royal Mail closed 43% of its mail sorting centers (30 out of 69) between 2008 and 2015 alone, not counting earlier changes in the “past two decades.”</td>
</tr>
<tr>
<td>23</td>
<td>1st bullet</td>
<td>Jacob Howley</td>
<td>For example, Royal Mail has reduced the number of sorting centers from 69 to 37 since 2007, and Deutsche Post officials stated they had streamlined their parcel sorting process and went from 140 parcel sorting centers in 1990 to 34 in 2019.</td>
<td>This point seems to belong with the other posts’ mail-sorting-center consolidations in the earlier “Infrastructure” bullet.</td>

| 33      | Table 1, column 2, row 6 | Renee Sheehy, Jacob Howley | Postal and other revenues, such as logistics or banking. | Replace with “Postal and other revenues, such as logistics or banking and revenues, including increased revenues from services currently mandated to be supplied free or at a discount”  
A private company is even less likely to provide services or discounts for free to the government without reimbursement.  
Also, any of the other models could also have other revenue streams, depending on what Congress allows. This is not unique to a private company. |
| 33      | Bullet point    | Steve Nickerson, Keith Weidner | USPS further stated that changing it to a typical government agency could reduce incentives… | While USPS did not disagree with the statement in the SOF that that changing from the current structure to a full government agency could theoretically have this impact or that other stakeholders might make that argument, we do not agree that our incentive to be efficient would change as a result of our institutional form, whatever that might be. For that reason, GAO should present this as a general criticism that could be levied against such a change in institutional structure by stakeholders, without ascribing it specifically to the Postal Service.  
To the contrary, as a practical matter, the Postal Service has been operating for years in a manner that seeks to drive efficiencies, and it is part of our DNA. Particularly given the alternatives that our customers have to using the Postal Service to send their mail and packages, even if we move to being a typical agency there will still be a strong incentive to keep operations as efficient as possible. Efficient operation is simply a part of our culture.  
Second, even as a theoretical matter, the effect of such a change on Postal Service incentives would depend on the precise statutory structure that Congress creates, |

Recommended Edits / Justification:

- Should revise so that both sentences aren’t “For example.”
- Should also note Presidential control over hiring and firing of Postmasters General, as well as other officials, which the Kappel Commission identified as a source of politicization and discontinuity that hindered efficient, businesslike decision-making. Postal management’s relative independence from direct Presidential control was a major innovation of the Postal Reorganization Act.

- Should cite 39 U.S.C. § 2401. Also, the main text to which this footnote pertains discusses the footing on which Congress placed the USPS in 1970. In that light, it should be mentioned that Congress provided for appropriations to support rural service, which were scaled down to $460 million by the early 1980s. That appropriation remains authorized, but the USPS has not requested it (and Congress has not appropriated it) since the early 1980s.

- While the early 2000s were a challenging time for the Postal Service because of the advertising recession and the volume drop due to September 11 and the anthrax attacks, the Postal Service’s overall financial position

<td>6</td>
<td>2nd paragraph, last sentence</td>
<td>Jacob Howley</td>
<td>PAEA provided USPS additional pricing flexibility for mail products, but balanced this with provisions for increased transparency, oversight, and accountability, among other things.</td>
<td>Should say “PAEA provided USPS with some additional pricing flexibility concerning its competitive products, but also imposed a price cap on most of its volumes and new unfunded mandates and constraints, as well as provisions for increased transparency, oversight, and accountability.” (The draft text makes it seem like we got a largely free hand with pricing, when much of it – particularly for “mail products” – actually became subject to a rigid price cap. And given the constraints’ overwhelming influence on the USPS’s finances since the PAEA, “balanced” gives the wrong impression.)</td>
</tr>
<tr>
<td>6</td>
<td>Final para, 1st sentence</td>
<td>Jacob Howley</td>
<td>Specifically, PAEA gave USPS broader latitude to change postal rates in a more streamlined process that included review by the newly created Postal Regulatory Commission (PRC).</td>
<td>While the USPS got some broader latitude and review was streamlined, it must also be acknowledged that most USPS revenues were subjected to a rigid price cap for at least the first ten years. The price cap is discussed later, but some mention should be made here that the PAEA constrained pricing, in addition to liberalizing it to some small degree. Also, the footnote should cite 39 U.S.C. §§ 3622 and 3632, which set forth the rate-regulation processes.</td>
</tr>
<tr>
<td>7</td>
<td>1st full para</td>
<td>Steve Nickerson, Jacob Howley</td>
<td>USPS’s current business model is not financially sustainable due to declining mail volumes, increased compensation and benefits costs…</td>
<td>Further context should be given to avoid the misimpression that rising costs are the USPS’s fault. Compensation and benefits are largely the result of high-cost federal benefits programs (in which the USPS is legislatively mandated to participate), the requirement for binding arbitration on labor contracts, and the USO mandate. Also, a fourth contributor is missing: the rigid price cap on most USPS revenue, which prevents the USPS from...</td>

| 9        | 1st full para   | Steve Nickerson, Jacob Howley | competitive products collectively are required to cover a PRC-specified minimum of USPS's institutional costs. In addition, USPS is prohibited from providing new non-postal products and services. | - 39 U.S.C. § 3633.  
Also, while the price cap and nonpostal restrictions undoubtedly impact the Postal Service's ability to generate revenue, it is unclear why the report cites the rules that set a price floor for competitive products as having that same effect. |
| 9        | 1st full para   | Renee Sheehy        | While mail volumes have decreased, USPS's compensation and benefits costs for current employees have been increasing since 2014. | This implies that USPS has been failing to control costs in line with volumes. But because of the USO, many of our costs are fixed and should not be expected to vary with volume. (E.g., we have to visit nearly every address every day regardless of volume.) And within our cost base, factors outside our control account for inflation, from changes in our benefits due to health-care cost inflation and external actuarial determinations, to step increases, layoff protections, and inflation-based COLAs in labor contracts imposed by arbitrators (or negotiated under the shadow of binding arbitration) and increases in normal cost contributions to the Federal Employees Retirement System (FERS).  
The draft report later gives context about collective bargaining, arbitration, and the USPS's cost-reduction efforts. Hence, it might be helpful to either reframe the statement here to make it seem like less of a (potentially blameworthy) contradiction (e.g., "Despite significant cost-reduction efforts, USPS's compensation and benefits costs have risen even as mail volumes have decreased..."), or else reserve it until after the necessary context has been established. |
<p>| 9        | 1st full para, sentence 4 | Renee Sheehy        | The number of work hours associated with higher costs—overtime and penalty overtime—have also been increasing. | Add something that acknowledges that overtime can be a less expensive way to achieve work hours than hiring additional staff such as “The number of work hours associated with higher costs—overtime and penalty overtime—have also been increasing, although using |</p>

<td>9</td>
<td>1&lt;sup&gt;st&lt;/sup&gt; full para, last sentence</td>
<td>Steve Nickerson, Tony Mazzei, Jacob Howley</td>
<td>According to USPS, total compensation and benefits costs increased by almost $1 billion in fiscal year 2019 alone.</td>
<td>The increase in compensation and benefits was 2.1%, only slightly higher than CPI growth of 1.7%. Unsurprisingly, given the overlap with general inflation, major drivers of the $1 billion increase in compensation and benefits were the step increases and COLAs in labor contracts imposed by arbitrators (or negotiated under the shadow of binding arbitration).</td>
</tr>
<tr>
<td>9</td>
<td>Footnote 22, 2&lt;sup&gt;nd&lt;/sup&gt; sentence</td>
<td>Renee Sheehy</td>
<td>Non-career employees are generally considered temporary and hired, for example, during times of large mail volume such as holidays.</td>
<td>Replace with &quot;Non-career employees include those with lower-paid positions such as city carrier assistants and postal support employees and temporary employees hired during times of large mail volume such as holidays.&quot; (Many non-career employees are not temporary.)</td>
</tr>
<tr>
<td>11</td>
<td>First full sentence</td>
<td>Jacob Howley</td>
<td>Federal law requires USPS to participate in the Federal Employees Health Benefits Program (FEHBP) which covers current employees and retirees.</td>
<td>Should be expanded: “Federal law requires USPS to participate in the Federal Employees Health Benefits Program (FEHBP), which covers current employees and retirees, as well as federal pension and workers’ compensation programs.” (These programs impose substantially greater costs on the USPS than private-sector counterparts. GAO has previously studied the disparity as to FECA costs.)</td>
</tr>
<tr>
<td>11</td>
<td>Last paragraph</td>
<td>Jacob Howley</td>
<td>USPS’s unfunded liabilities and debt … [were] 226 percent of its fiscal year 2019 revenues.35 At the end of fiscal year 2019, USPS’s unfunded liabilities and debt totaled … more than double its annual revenues (see figure 2).</td>
<td>Consider eliminating the redundancy between these two sentences: “226 percent” is the same as “more than double.”</td>
</tr>
<tr>
<td>12</td>
<td>First sentence</td>
<td>Tony Mazzei, Jacob Howley</td>
<td>Total unfunded liabilities and debt have risen in part due to USPS not making payments to fund its retiree health and pension benefits.</td>
<td>Some explanation of GAO’s use of “unfunded liabilities” is in order. Also, debt should not be included here: defaulting on benefits payments is not why debt has increased. (Defaults conserve cash; borrowing also increases cash.)</td>

<tr>
<td>19</td>
<td>2nd bullet</td>
<td>Jacob Howley</td>
<td>(&quot;new GM&quot;)</td>
<td>Defining this term is unnecessary, because it’s not used anywhere else in the report.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>For example, Royal Mail raised postal rates above the rate of inflation after relaxation of its price cap.</td>
<td>In contrast with the more specific accounts for other countries, this text is vague and belies how dramatic the UK price increases really were. Royal Mail’s price increases were substantially above inflation (basic letter rates rose 30-40% in 2012) and generally rose with inflation thereafter, although I believe the most recent increase was again above-inflation. Some mention should be made of this.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>In France, the postal regulator established a price cap in 2018 of 5 percent annual rate increases (including inflation) for 2019 through 2022 for letter mail and packages considered to be part of universal postal service. This price cap allows La Poste more price flexibility than the previous one.</td>
<td>France actually has a longer history of above-inflation price increases. The 2013-2014 price cap was CPI+1% per year. The 2015-2018 price cap was CPI+3.5% per year, with half of the overall increase front-loaded into the first year.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>Likewise, Australia Post implemented an above-inflation rate increase in January 2020, citing the need to generate revenues to offset growing financial pressures from declining letter mail volume.</td>
<td>Mention should be made of the more dramatic pricing history in Australia. In 2015, Australia Post raised the basic letter rate 16.7% (vs. 5.9% inflation since the prior rate increase). In 2016, it split its letter product, such that the slower service stayed at the same rate, but to get the same level of service, one would pay 42.9% more (vs. 1.8% inflation).</td>
</tr>
<tr>
<td>22</td>
<td>1st bullet</td>
<td>Jacob Howley</td>
<td>Royal Mail and La Poste reduced the number of mail sorting centers by about 40 percent over the past two decades.</td>
<td>This should be double-checked for Royal Mail. According to this study (p. 12), Royal Mail closed 43% of its mail sorting centers (30 out of 69) between 2008 and 2015 alone, not counting earlier changes in the “past two decades.”</td>
</tr>
<tr>
<td>23</td>
<td>1st bullet</td>
<td>Jacob Howley</td>
<td>For example, Royal Mail has reduced the number of sorting centers from 69 to 37 since 2007, and Deutsche Post officials stated they had streamlined their parcel sorting process and went from 140 parcel sorting centers in 1990 to 34 in 2019.</td>
<td>This point seems to belong with the other posts’ mail-sorting-center consolidations in the earlier “Infrastructure” bullet.</td>

| 33      | Table 1, column 2, row 6 | Renee Sheehy, Jacob Howley | Postal and other revenues, such as logistics or banking. | Replace with “Postal and other revenues, such as logistics or banking and revenues, including increased revenues from services currently mandated to be supplied free or at a discount”
A private company is even less likely to provide services or discounts for free to the government without reimbursement.
Also, any of the other models could also have other revenue streams, depending on what Congress allows. This is not unique to a private company. |

| 33      | Bullet point      | Steve Nickerson, Keith Weidner | USPS further stated that changing it to a typical government agency could reduce incentives… | While USPS did not disagree with the statement in the SOF that changing from the current structure to a full government agency could theoretically have this impact or that other stakeholders might make that argument, we do not agree that our incentive to be efficient would change as a result of our institutional form, whatever that might be. For that reason, GAO should present this as a general criticism that could be levied against such a change in institutional structure by stakeholders, without ascribing it specifically to the Postal Service.
To the contrary, as a practical matter, the Postal Service has been operating for years in a manner that seeks to drive efficiencies, and it is part of our DNA. Particularly given the alternatives that our customers have to using the Postal Service to send their mail and packages, even if we move to being a typical agency there will still be a strong incentive to keep operations as efficient as possible. Efficient operation is simply a part of our culture.
Second, even as a theoretical matter, the effect of such a change on Postal Service incentives would depend on the precise statutory structure that Congress creates, |

<td>Highlights, p. 1</td>
<td>Main text, 1st para</td>
<td>Jacob Howley</td>
<td>USPS’s work force had increased from 617,700 in fiscal year 2013 to about 630,000 in fiscal year 2019.</td>
<td>This selective period focuses only on an interim increase in headcount, but a fuller perspective (see page 9) shows that headcount remains significantly lower than before the PAEA. Also, it should be mentioned that the USPS has achieved compensation reforms that lower the cost of new hires.</td>
</tr>
<tr>
<td>Highlights, p. 1</td>
<td>Sidebar, 1st paragraph</td>
<td>Tony Mazzei, Jacob Howley</td>
<td>While USPS is to be self-sustaining, it lost about $78 billion from fiscal years 2007 through 2019 due primarily to declining mail volumes and increased costs.</td>
<td>Should say “due primarily to declining mail volumes, increased costs, and new, unfunded legislative mandates and constraints.” (That would encompass RHB as well as the price cap and product limitations.)</td>
</tr>
<tr>
<td>Highlights, p. 1</td>
<td>Main text, 2nd paragraph</td>
<td>Tony Mazzei, Jacob Howley</td>
<td>To address these challenges, USPS has taken actions such as providing increased self-service options and reducing facility hours.</td>
<td>These are certainly things we’ve done, but hardly the most significant measures. More salient things to mention would be deferring capital investments, rationalizing the mail processing and delivery networks, creating new tiers of employees, utilizing significantly higher levels of non-career employees, and securing approval for a rate surcharge to recover some of the revenue lost during the Great Recession. Despite these efforts, the Postal Service has been forced to default on pension and RHB payments in order to preserve liquidity to maintain operations.</td>
</tr>
<tr>
<td>Highlights, p. 1</td>
<td>Main text, 2nd paragraph</td>
<td>Jacob Howley</td>
<td>However, statutory requirements limit USPS’s ability to make changes in areas such as certain service offerings and its employee compensation and benefits.</td>
<td>Add “pricing” as an area of significant statutory constraint.</td>
</tr>
<tr>
<td>Highlights, p. 2</td>
<td>Sidebar, 1st paragraph</td>
<td>Jacob Howley</td>
<td>“… (2) five countries—Australia, France, Germany, New Zealand, and the United Kingdom. The businesses and countries had</td>
<td>This should probably read “foreign posts in five countries… The business and foreign posts… For each of these businesses and foreign posts…” (The countries</td>

</tr>
<tr>
<td>Highlights, p. 2</td>
<td>Main text, bullet list</td>
<td>Jacob Howley</td>
<td>Bullets should be added for (1) pricing flexibility and (2) government assumption of liabilities. Germany, UK, and France all liberalized their price caps in ways that allowed for significant above-inflation price increases, and Australia Post was allowed to make similar above-inflation price increases. Regarding legacy costs, the UK government assumed Royal Mail’s pension liability and operation of the post office network prior to privatization.</td>
<td></td>
</tr>
<tr>
<td>1</td>
<td>Para 1</td>
<td>Steve Nickerson, Jacob Howley</td>
<td>“its productivity has declined in recent years This would benefit from fuller context. Overall mail volume (hence output) has continued to decline, while the ability to reduce inputs is hampered by the growth in higher-cost-to-deliver packages and continued growth in delivery points. Meanwhile, much of the “low-hanging fruit” in terms of productivity-enhancing measures has already been gleaned in the post-Great-Recession years, and the necessity of deferring capital investment has hindered access to potential new efficiency improvements.</td>
<td></td>
</tr>
<tr>
<td>1</td>
<td>Para 2</td>
<td>Steve Nickerson, Jacob Howley</td>
<td>USPS has been unable to make broad changes…because USPS and its stakeholders…</td>
<td>Should say “Congress has not made broad changes…” Major reforms of the type discussed here require legislation, and the lack of stakeholder consensus bears on Congress’s willingness to make changes more than the USPS’s willingness.</td>
</tr>
<tr>
<td>1</td>
<td>Para 3</td>
<td>Jacob Howley</td>
<td>to be financially self-sustaining by covering its costs, primarily with revenues generated from its postal operations; to be financially self-sustaining by covering its costs, primarily with revenues generated from its postal operations; and to be an independent establishment…</td>
<td>Could cite 39 U.S.C. § 2401 and 39 U.S.C. § 201 (respectively).</td>

<tr>
<td>6</td>
<td>2nd paragraph, last sentence</td>
<td>Jacob Howley</td>
<td>PAEA provided USPS additional pricing flexibility for mail products, but balanced this with provisions for increased transparency, oversight, and accountability, among other things.</td>
<td>Should say “PAEA provided USPS with some additional pricing flexibility concerning its competitive products, but also imposed a price cap on most of its volumes and new unfunded mandates and constraints, as well as provisions for increased transparency, oversight, and accountability.” (The draft text makes it seem like we got a largely free hand with pricing, when much of it – particularly for “mail products” – actually became subject to a rigid price cap. And given the constraints’ overwhelming influence on the USPS’s finances since the PAEA, “balanced” gives the wrong impression.)</td>
</tr>
<tr>
<td>6</td>
<td>Final para, 1st sentence</td>
<td>Jacob Howley</td>
<td>Specifically, PAEA gave USPS broader latitude to change postal rates in a more streamlined process that included review by the newly created Postal Regulatory Commission (PRC).</td>
<td>While the USPS got some broader latitude and review was streamlined, it must also be acknowledged that most USPS revenues were subjected to a rigid price cap for at least the first ten years. The price cap is discussed later, but some mention should be made here that the PAEA constrained pricing, in addition to liberalizing it to some small degree. Also, the footnote should cite 39 U.S.C. §§ 3622 and 3632, which set forth the rate-regulation processes.</td>
</tr>
<tr>
<td>7</td>
<td>1st full para</td>
<td>Steve Nickerson, Jacob Howley</td>
<td>USPS’s current business model is not financially sustainable due to declining mail volumes, increased compensation and benefits costs…</td>
<td>Further context should be given to avoid the misimpression that rising costs are the USPS’s fault. Compensation and benefits are largely the result of high-cost federal benefits programs (in which the USPS is legislatively mandated to participate), the requirement for binding arbitration on labor contracts, and the USO mandate. Also, a fourth contributor is missing: the rigid price cap on most USPS revenue, which prevents the USPS from...</td>

<tr>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>For example, Royal Mail raised postal rates above the rate of inflation after relaxation of its price cap.</td>
<td>In contrast with the more specific accounts for other countries, this text is vague and belies how dramatic the UK price increases really were. Royal Mail’s price increases were substantially above inflation (basic letter rates rose 30-40% in 2012) and generally rose with inflation thereafter, although I believe the most recent increase was again above-inflation. Some mention should be made of this.</td>
<td></td>
</tr>
<tr>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>In France, the postal regulator established a price cap in 2018 of 5 percent annual rate increases (including inflation) for 2019 through 2022 for letter mail and packages considered to be part of universal postal service. This price cap allows La Poste more price flexibility than the previous one.</td>
<td>France actually has a longer history of above-inflation price increases. The 2013-2014 price cap was CPI+1% per year. The 2015-2018 price cap was CPI+3.5% per year, with half of the overall increase front-loaded into the first year.</td>
<td></td>
</tr>
<tr>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>Likewise, Australia Post implemented an above-inflation rate increase in January 2020, citing the need to generate revenues to offset growing financial pressures from declining letter mail volume.</td>
<td>Mention should be made of the more dramatic pricing history in Australia. In 2015, Australia Post raised the basic letter rate 16.7% (vs. 5.9% inflation since the prior rate increase). In 2016, it split its letter product, such that the slower service stayed at the same rate, but to get the same level of service, one would pay 42.9% more (vs. 1.8% inflation).</td>
<td></td>
</tr>
<tr>
<td>22</td>
<td>Jacob Howley</td>
<td>Royal Mail and La Poste reduced the number of mail sorting centers by about 40 percent over the past two decades.</td>
<td>This should be double-checked for Royal Mail. According to this study (p. 12), Royal Mail closed 43% of its mail sorting centers (30 out of 69) between 2008 and 2015 alone, not counting earlier changes in the “past two decades.”</td>
<td></td>
</tr>
<tr>
<td>23</td>
<td>Jacob Howley</td>
<td>For example, Royal Mail has reduced the number of sorting centers from 69 to 37 since 2007, and Deutsche Post officials stated they had streamlined their parcel sorting process and went from 140 parcel sorting centers in 1990 to 34 in 2019.</td>
<td>This point seems to belong with the other posts’ mail-sorting-center consolidations in the earlier “Infrastructure” bullet.</td>

| Page No: 33 | Location on Page | Comment Provided By | Original Text: Postal and other revenues, such as logistics or banking. | Recommended Edits / Justification: Replace with “Postal and other revenues, such as logistics or banking and revenues, including increased revenues from services currently mandated to be supplied free or at a discount”

A private company is even less likely to provide services or discounts for free to the government without reimbursement.

Also, any of the other models could also have other revenue streams, depending on what Congress allows. This is not unique to a private company.

---

| Page No: 33 | Location on Page | Comment Provided By | Original Text: USPS further stated that changing it to a typical government agency could reduce incentives… | Recommended Edits / Justification: While USPS did not disagree with the statement in the SOF that that changing from the current structure to a full government agency could theoretically have this impact or that other stakeholders might make that argument, we do not agree that our incentive to be efficient would change as a result of our institutional form, whatever that might be. For that reason, GAO should present this as a general criticism that could be levied against such a change in institutional structure by stakeholders, without ascribing it specifically to the Postal Service.

To the contrary, as a practical matter, the Postal Service has been operating for years in a manner that seeks to drive efficiencies, and it is part of our DNA. Particularly given the alternatives that our customers have to using the Postal Service to send their mail and packages, even if we move to being a typical agency there will still be a strong incentive to keep operations as efficient as possible. Efficient operation is simply a part of our culture.

Second, even as a theoretical matter, the effect of such a change on Postal Service incentives would depend on the precise statutory structure that Congress creates. |

<tr>
<td>Highlights, p. 1</td>
<td>Main text, 1st para</td>
<td>Jacob Howley</td>
<td>USPS’s work force had increased from 617,700 in fiscal year 2013 to about 630,000 in fiscal year 2019.</td>
<td>This selective period focuses only on an interim increase in headcount, but a fuller perspective (see page 9) shows that headcount remains significantly lower than before the PAEA. Also, it should be mentioned that the USPS has achieved compensation reforms that lower the cost of new hires.</td>
</tr>
<tr>
<td>Highlights, p. 1</td>
<td>Sidebar, 1st paragraph</td>
<td>Tony Mazzei, Jacob Howley</td>
<td>While USPS is to be self-sustaining, it lost about $78 billion from fiscal years 2007 through 2019 due primarily to declining mail volumes and increased costs.</td>
<td>Should say “due primarily to declining mail volumes, increased costs, and new, unfunded legislative mandates and constraints.” (That would encompass RHB as well as the price cap and product limitations.)</td>
</tr>
<tr>
<td>Highlights, p. 1</td>
<td>Main text, 2nd paragraph</td>
<td>Tony Mazzei, Jacob Howley</td>
<td>To address these challenges, USPS has taken actions such as providing increased self-service options and reducing facility hours.</td>
<td>These are certainly things we’ve done, but hardly the most significant measures. More salient things to mention would be deferring capital investments, rationalizing the mail processing and delivery networks, creating new tiers of employees, utilizing significantly higher levels of non-career employees, and securing approval for a rate surcharge to recover some of the revenue lost during the Great Recession. Despite these efforts, the Postal Service has been forced to default on pension and RHB payments in order to preserve liquidity to maintain operations.</td>
</tr>
<tr>
<td>Highlights, p. 1</td>
<td>Main text, 2nd paragraph</td>
<td>Jacob Howley</td>
<td>However, statutory requirements limit USPS’s ability to make changes in areas such as certain service offerings and its employee compensation and benefits.</td>
<td>Add “pricing” as an area of significant statutory constraint.</td>
</tr>
<tr>
<td>Highlights, p. 2</td>
<td>Sidebar, 1st paragraph</td>
<td>Jacob Howley</td>
<td>“… (2) five countries—Australia, France, Germany, New Zealand, and the United Kingdom. The businesses and countries had</td>
<td>This should probably read “foreign posts in five countries… The business and foreign posts… For each of these businesses and foreign posts…” (The countries</td>
</tr>

<td>characteristics similar to USPS… For each of these businesses and countries…”</td>
<td>themselves do not have characteristics similar to the USPS, for instance.)</td>
</tr>
<tr>
<td></td>
<td>Highlights, p. 2 Main text, bullet list</td>
<td>Jacob Howley</td>
<td>Bullets should be added for (1) pricing flexibility and (2) government assumption of liabilities. Germany, UK, and France all liberalized their price caps in ways that allowed for significant above-inflation price increases, and Australia Post was allowed to make similar above-inflation price increases. Regarding legacy costs, the UK government assumed Royal Mail’s pension liability and operation of the post office network prior to privatization.</td>
<td></td>
</tr>
<tr>
<td>1</td>
<td>Para 1</td>
<td>Steve Nickerson, Jacob Howley</td>
<td>“its productivity has declined in recent years</td>
<td>This would benefit from fuller context. Overall mail volume (hence output) has continued to decline, while the ability to reduce inputs is hampered by the growth in higher-cost-to-deliver packages and continued growth in delivery points. Meanwhile, much of the “low-hanging fruit” in terms of productivity-enhancing measures has already been gleaned in the post-Great-Recession years, and the necessity of deferring capital investment has hindered access to potential new efficiency improvements.</td>
</tr>
<tr>
<td>1</td>
<td>Para 2</td>
<td>Steve Nickerson, Jacob Howley</td>
<td>USPS has been unable to make broad changes…because USPS and its stakeholders…</td>
<td>Should say “Congress has not made broad changes…” Major reforms of the type discussed here require legislation, and the lack of stakeholder consensus bears on Congress’s willingness to make changes more than the USPS’s willingness.</td>
</tr>
<tr>
<td>1</td>
<td>Para 3</td>
<td>Jacob Howley</td>
<td>to be financially self-sustaining by covering its costs, primarily with revenues generated from its postal operations; to be financially self-sustaining by covering its costs, primarily with revenues generated from its postal operations; and to be an independent establishment…</td>
<td>Could cite 39 U.S.C. § 2401 and 39 U.S.C. § 201 (respectively).</td>
</tr>
<tr>
<td>4</td>
<td>1st paragraph under “Background”</td>
<td>Jacob Howley</td>
<td>USPS has the mission of providing prompt, reliable, and efficient universal postal service, and federal law requires USPS to “provide postal</td>
<td></td>
</tr>

<td>-----------------------------------</td>
</tr>
<tr>
<td>4</td>
<td>2nd paragraph under &quot;Background&quot;</td>
<td>Jacob Howley</td>
<td>For example, USPS is a key part of the mailing industry, and over time, it has become both a competitor and partner to private companies that also operate in the broader mail and delivery industries. For example, although …</td>
<td>Should revise so that both sentences aren’t “For example.”</td>
</tr>
<tr>
<td>5</td>
<td>Paragraph below Figure 1</td>
<td>Jacob Howley</td>
<td>At that time, Congress was involved in many aspects of the department’s operations, such as selecting postmasters, and setting postal rates and wages. By the late 1960s, the department had several major problems including financial losses, management problems, service breakdowns, and low productivity. Because key postal business decisions were made by Congress through the legislative process, postal management had limited ability to plan and finance department operations and capital investments in accordance with postal needs.</td>
<td>Should also note Presidential control over hiring and firing of Postmasters General, as well as other officials, which the Kappel Commission identified as a source of politicization and discontinuity that hindered efficient, businesslike decision-making. Postal management’s relative independence from direct Presidential control was a major innovation of the Postal Reorganization Act.</td>
</tr>
<tr>
<td>6</td>
<td>1st paragraph, footnote 10</td>
<td>Jacob Howley</td>
<td></td>
<td>Should cite 39 U.S.C. § 2401. Also, the main text to which this footnote pertains discusses the footing on which Congress placed the USPS in 1970. In that light, it should be mentioned that Congress provided for appropriations to support rural service, which were scaled down to $460 million by the early 1980s. That appropriation remains authorized, but the USPS has not requested it (and Congress has not appropriated it) since the early 1980s.</td>
</tr>
<tr>
<td>6</td>
<td>2nd paragraph, sentence 1</td>
<td>Renee Sheehy</td>
<td>“By the early 2000s, USPS faced a bleak financial outlook that put its mission of providing universal postal service at risk.”</td>
<td>Remove sentence. While the early 2000s were a challenging time for the Postal Service because of the advertising recession and the volume drop due to September 11 and the anthrax attacks, the Postal Service’s overall financial position</td>
</tr>

<tr>
<td>---------</td>
<td>-----------------</td>
<td>---------------------</td>
<td>---------------</td>
<td>-----------------------------------</td>
</tr>
<tr>
<td>6</td>
<td>2nd paragraph, last sentence</td>
<td>Jacob Howley</td>
<td>PAEA provided USPS additional pricing flexibility for mail products, but balanced this with provisions for increased transparency, oversight, and accountability, among other things.</td>
<td>Should say “PAEA provided USPS with some additional pricing flexibility concerning its competitive products, but also imposed a price cap on most of its volumes and new unfunded mandates and constraints, as well as provisions for increased transparency, oversight, and accountability.” (The draft text makes it seem like we got a largely free hand with pricing, when much of it – particularly for “mail products” – actually became subject to a rigid price cap. And given the constraints’ overwhelming influence on the USPS’s finances since the PAEA, “balanced” gives the wrong impression.)</td>
</tr>
<tr>
<td>6</td>
<td>Final para, 1st sentence</td>
<td>Jacob Howley</td>
<td>Specifically, PAEA gave USPS broader latitude to change postal rates in a more streamlined process that included review by the newly created Postal Regulatory Commission (PRC).</td>
<td>While the USPS got some broader latitude and review was streamlined, it must also be acknowledged that most USPS revenues were subjected to a rigid price cap for at least the first ten years. The price cap is discussed later, but some mention should be made here that the PAEA constrained pricing, in addition to liberalizing it to some small degree. Also, the footnote should cite 39 U.S.C. §§ 3622 and 3632, which set forth the rate-regulation processes.</td>
</tr>
<tr>
<td>7</td>
<td>1st full para</td>
<td>Steve Nickerson, Jacob Howley</td>
<td>USPS’s current business model is not financially sustainable due to declining mail volumes, increased compensation and benefits costs…</td>
<td>Further context should be given to avoid the misimpression that rising costs are the USPS’s fault. Compensation and benefits are largely the result of high-cost federal benefits programs (in which the USPS is legislatively mandated to participate), the requirement for binding arbitration on labor contracts, and the USO mandate. Also, a fourth contributor is missing: the rigid price cap on most USPS revenue, which prevents the USPS from…</td>

<td>----------------</td>
<td>------------------------------------</td>
</tr>
<tr>
<td>7</td>
<td>2nd full paragraph</td>
<td>Keith Weidner</td>
<td>USPS continues to face decreases in mail volume, its primary revenue source, as online communication and e-commerce have expanded.</td>
<td>raising prices faster than the rate of inflation to stabilize revenue amid volume declines.</td>
</tr>
<tr>
<td>8</td>
<td>Top of page, 1st full sentence</td>
<td>Renee Sheehy</td>
<td>Due in part to USPS’s efforts to expand retail alternatives, USPS began reducing retail hours at selected post offices in 2012, ultimately decreasing retail hours at approximately 13,000 post offices.</td>
<td>It is not clear what is meant by e-commerce in this context. Typically that means purchasing goods over the internet, which has in fact had a positive impact on our volumes by increasing package volume. Replace with “As a compromise effort to right-size the retail network and due in part to USPS’s efforts to expand retail alternatives, USPS began reducing retail hours at selected post offices in 2012, ultimately decreasing retail hours at approximately 13,000 post offices.” The current discussion makes it sound like the hour reductions were completely independent of the earlier plan when in reality it was an alternative approach in a sustained effort to find a way to cut retail costs.</td>
</tr>
<tr>
<td>8</td>
<td>1st para</td>
<td>Steve Nickerson</td>
<td>…but did not fully implement this initiative following opposition from various stakeholders, including postal labor unions.</td>
<td>Delete “including postal labor unions”. Many other stakeholders objected to closing facilities; it seems unfair to single out one group.</td>
</tr>
<tr>
<td>8</td>
<td>1st para</td>
<td>Jacob Howley</td>
<td>The Postal Service has also been able to restrain the growth in the cost of its workforce by obtaining agreements or arbitration decisions with its unions to implement lower-cost classes of employees and expand the use of noncareer employees.</td>
<td></td>
</tr>
<tr>
<td>8</td>
<td>Last bullet on page – second sentence</td>
<td>Jacob Howley</td>
<td>Specifically, USPS is required to provide 6 day a week delivery and to operate postal facilities across the country.</td>
<td>Should cite annual appropriations bill and 39 U.S.C. §§ 101(b) and 403(b)(3).</td>
</tr>
<tr>
<td>9</td>
<td>First bullet</td>
<td>Jacob Howley, Keith Weidner</td>
<td>Postal products and pricing: USPS’s pricing flexibility is limited by a price cap on market-dominant products that generally limits rate increases for these products to inflation. Each competitive product is required to cover its attributable costs, competitive products collectively are required to recover their attributable costs, and</td>
<td>Citations for each sentence (respectively): - 39 U.S.C. § 3622(d)(1)(A), (C). [It should be noted that this price cap applies for at least the first ten years after the PAEA, and may now be modified by the Postal Regulatory Commission if necessary to achieve certain statutory criteria.]</td>

</tbody>
</table>
| 9       | 1st full para    | Steve Nickerson, Jacob Howley | competitive products collectively are required to cover a PRC-specified minimum of USPS’s institutional costs. In addition, USPS is prohibited from providing new non-postal products and services. | - 39 U.S.C. § 3633.  
Also, while the price cap and nonpostal restrictions undoubtedly impact the Postal Service’s ability to generate revenue, it is unclear why the report cites the rules that set a price floor for competitive products as having that same effect. |
| 9       | 1st full para    | Renee Sheehy        | While mail volumes have decreased, USPS’s compensation and benefits costs for current employees have been increasing since 2014. | This implies that USPS has been failing to control costs in line with volumes. But because of the USO, many of our costs are fixed and should not be expected to vary with volume. (E.g., we have to visit nearly every address every day regardless of volume.) And within our cost base, factors outside our control account for inflation, from changes in our benefits due to health-care cost inflation and external actuarial determinations, to step increases, layoff protections, and inflation-based COLAs in labor contracts imposed by arbitrators (or negotiated under the shadow of binding arbitration) and increases in normal cost contributions to the Federal Employees Retirement System (FERS).  
The draft report later gives context about collective bargaining, arbitration, and the USPS’s cost-reduction efforts. Hence, it might be helpful to either reframe the statement here to make it seem like less of a (potentially blameworthy) contradiction (e.g., “Despite significant cost-reduction efforts, USPS’s compensation and benefits costs have risen even as mail volumes have decreased…”), or else reserve it until after the necessary context has been established. |
<p>| 9       | 1st full paragraph, sentence 4 | Renee Sheehy        | The number of work hours associated with higher costs—overtime and penalty overtime—have also been increasing. | Add something that acknowledges that overtime can be a less expensive way to achieve work hours than hiring additional staff such as “The number of work hours associated with higher costs—overtime and penalty overtime—have also been increasing, although using |</p>

<tr>
<td></td>
<td>1st full para,</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>last sentence</td>
<td>Steve Nickerson,</td>
<td>According to USPS, total compensation and</td>
<td>The increase in compensation and benefits was 2.1%, only slightly higher than CPI growth of 1.7%. Unsurprisingly, given the overlap with general inflation, major drivers of the $1 billion increase in compensation and benefits were the step increases and COLAs in labor contracts imposed by arbitrators (or negotiated under the shadow of binding arbitration).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Tony Mazzei, Jacob</td>
<td>benefits costs increased by almost $1 billion in</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Howley</td>
<td>fiscal year 2019 alone.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Footnote 22, 2nd sentence</td>
<td>Renee Sheehy</td>
<td>Non-care employees are generally considered temporary and hired, for example, during times of large mail volume such as holidays.</td>
<td>Replace with “Non-career employees include those with lower-paid positions such as city carrier assistants and postal support employees and temporary employees hired during times of large mail volume such as holidays.” (Many non-career employees are not temporary.)</td>
</tr>
<tr>
<td>11</td>
<td>First full sentence</td>
<td>Jacob Howley</td>
<td>Federal law requires USPS to participate in the Federal Employees Health Benefits Program (FEHBP) which covers current employees and retirees.</td>
<td>Should be expanded: “Federal law requires USPS to participate in the Federal Employees Health Benefits Program (FEHBP), which covers current employees and retirees, as well as federal pension and workers’ compensation programs.” (These programs impose substantially greater costs on the USPS than private-sector counterparts. GAO has previously studied the disparity as to FECA costs.)</td>
</tr>
<tr>
<td>11</td>
<td>Last paragraph</td>
<td>Jacob Howley</td>
<td>USPS’s unfunded liabilities and debt … [were] 226 percent of its fiscal year 2019 revenues. At the end of fiscal year 2019, USPS’s unfunded liabilities and debt totaled … more than double its annual revenues (see figure 2).</td>
<td>Consider eliminating the redundancy between these two sentences: “226 percent” is the same as “more than double.”</td>
</tr>
<tr>
<td>12</td>
<td>First sentence</td>
<td>Tony Mazzei, Jacob</td>
<td>Total unfunded liabilities and debt have risen in part due to USPS not making payments to fund its retiree health and pension benefits.</td>
<td>Some explanation of GAO’s use of “unfunded liabilities” is in order. Also, debt should not be included here: defaulting on benefits payments is not why debt has increased. (Defaults conserve cash; borrowing also increases cash.)</td>
</tr>
</tbody>
</table>

*Recommended Edits / Justification:*

- Regular overtime is less expensive than hiring additional employees.”
- According to USPS, total compensation and benefits costs increased by almost $1 billion in fiscal year 2019 alone.

<th>Recommended Edits / Justification:</th>
</tr>
</thead>
<tbody>
<tr>
<td>13</td>
<td>1st paragraph, 3rd sentence</td>
<td>Jacob Howley</td>
<td>USPS is required to prefund its share of health benefits for its retirees and under PAEA, the first 10 years of prefunding payments were fixed—ranging from $5.4 billion to $5.8 billion annually from fiscal years 2007 to 2016.</td>
<td>It would be different if the USPS were defaulting in order to pay down debt.) In fact, both measures are due to the Board’s decision to maintain cash on hand in furtherance of the USPS’s primary service mission.</td>
</tr>
<tr>
<td>13</td>
<td>1st paragraph, 4th sentence</td>
<td>Jacob Howley</td>
<td>From fiscal years 2007 through 2016, USPS was also required to continue “pay-as-you-go” payments for its share of premiums for current retirees.</td>
<td>Mention should be made of the fact that the USPS is no longer required to pay RHB premiums; these are now paid out of the RHB Fund unless/until it is depleted, whereupon the USPS will resume paying premiums on a pay-as-you-go basis. (See 5 U.S.C. § 8906(g)(2)(A).)</td>
</tr>
<tr>
<td>13</td>
<td>1st paragraph, 6th sentence</td>
<td>Jacob Howley</td>
<td>As we previously reported, survey data we reviewed indicated that most companies do not offer retiree health benefits and that the number of companies providing such benefits is decreasing over time.</td>
<td>Mention should be made of the fact that the rest of the Federal Government’s pension accounts are substantially less well-funded than the USPS’s.</td>
</tr>
<tr>
<td>13</td>
<td>1st paragraph, 2nd to last sentence</td>
<td>Renee Sheehy, Jacob Howley</td>
<td>Many companies that have retained their retiree health benefits have done so by making changes to control costs, including tightening eligibility and restructuring benefits.</td>
<td>Replace with “The few companies that have retained their retiree health benefits have nearly universally done so by requiring eligible participants to enroll in Medicare and by making changes to control costs, including tightening eligibility and restructuring benefits.” Employers that do provide retiree benefits require participation in Medicare, which should be mentioned.</td>
</tr>
<tr>
<td>13</td>
<td>2nd paragraph</td>
<td>Jacob Howley</td>
<td></td>
<td>Mention should be made of the fact that the rest of the Federal Government’s pension accounts are substantially less well-funded than the USPS’s.</td>
</tr>
<tr>
<td>13</td>
<td>overall</td>
<td>Jacob Howley</td>
<td></td>
<td>Mention should be made of the fact that all companies with post-retirement benefits invest those assets in funds that are more diversified and higher-yielding (over the long run, notwithstanding short-term risks) than the low-yield Treasuries in which the USPS’s funds are invested. This reduces the need for annual contributions to the funds.</td>
</tr>

<td>-----------------------------------</td>
</tr>
<tr>
<td>16</td>
<td>1st paragraph and Footnote 48</td>
<td>Renee Sheehy</td>
<td>[large text and the comment is more global]</td>
<td>The footnote discusses work rules and how they can affect productivity, but as a whole the paragraph does not make clear that some changes can increase productivity while others such as wage and benefit cuts have no effect on productivity.</td>
</tr>
<tr>
<td>19</td>
<td>2nd bullet</td>
<td>Jacob Howley</td>
<td>(“new GM”)</td>
<td>Defining this term is unnecessary, because it’s not used anywhere else in the report.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>For example, Royal Mail raised postal rates above the rate of inflation after relaxation of its price cap.</td>
<td>In contrast with the more specific accounts for other countries, this text is vague and belies how dramatic the UK price increases really were. Royal Mail’s price increases were substantially above inflation (basic letter rates rose 30-40% in 2012) and generally rose with inflation thereafter, although I believe the most recent increase was again above-inflation. Some mention should be made of this.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>In France, the postal regulator established a price cap in 2018 of 5 percent annual rate increases (including inflation) for 2019 through 2022 for letter mail and packages considered to be part of universal postal service. This price cap allows La Poste more price flexibility than the previous one.</td>
<td>France actually has a longer history of above-inflation price increases. The 2013-2014 price cap was CPI+1% per year. The 2015-2018 price cap was CPI+3.5% per year, with half of the overall increase front-loaded into the first year.</td>
</tr>
<tr>
<td>21</td>
<td>1st full paragraph</td>
<td>Jacob Howley</td>
<td>Likewise, Australia Post implemented an above-inflation rate increase in January 2020, citing the need to generate revenues to offset growing financial pressures from declining letter mail volume.</td>
<td>Mention should be made of the more dramatic pricing history in Australia. In 2015, Australia Post raised the basic letter rate 16.7% (vs. 5.9% inflation since the prior rate increase). In 2016, it split its letter product, such that the slower service stayed at the same rate, but to get the same level of service, one would pay 42.9% more (vs. 1.8% inflation).</td>
</tr>
<tr>
<td>22</td>
<td>1st bullet</td>
<td>Jacob Howley</td>
<td>Royal Mail and La Poste reduced the number of mail sorting centers by about 40 percent over the past two decades.</td>
<td>This should be double-checked for Royal Mail. According to this study (p. 12), Royal Mail closed 43% of its mail sorting centers (30 out of 69) between 2008 and 2015 alone, not counting earlier changes in the “past two decades.”</td>
</tr>
<tr>
<td>23</td>
<td>1st bullet</td>
<td>Jacob Howley</td>
<td>For example, Royal Mail has reduced the number of sorting centers from 69 to 37 since 2007, and Deutsche Post officials stated they had streamlined their parcel sorting process and went from 140 parcel sorting centers in 1990 to 34 in 2019.</td>
<td>This point seems to belong with the other posts’ mail-sorting-center consolidations in the earlier “Infrastructure” bullet.</td>
</tr>

</tbody>
</table>
| 33      | Table 1, column 2, row 6 | Renee Sheehy, Jacob Howley | Postal and other revenues, such as logistics or banking. | Replace with “Postal and other revenues, such as logistics or banking and revenues, including increased revenues from services currently mandated to be supplied free or at a discount”
<p>|         |                   |                     |                | A private company is even less likely to provide services or discounts for free to the government without reimbursement. |
|         |                   |                     |                | Also, any of the other models could also have other revenue streams, depending on what Congress allows. This is not unique to a private company. |
| 33      | Bullet point     | Steve Nickerson, Keith Weidner | USPS further stated that changing it to a typical government agency could reduce incentives… | While USPS did not disagree with the statement in the SOF that that changing from the current structure to a full government agency could theoretically have this impact or that other stakeholders might make that argument, we do not agree that our incentive to be efficient would change as a result of our institutional form, whatever that might be. For that reason, GAO should present this as a general criticism that could be levied against such a change in institutional structure by stakeholders, without ascribing it specifically to the Postal Service. |
|         |                   |                     |                | To the contrary, as a practical matter, the Postal Service has been operating for years in a manner that seeks to drive efficiencies, and it is part of our DNA. Particularly given the alternatives that our customers have to using the Postal Service to send their mail and packages, even if we move to being a typical agency there will still be a strong incentive to keep operations as efficient as possible. Efficient operation is simply a part of our culture. |
|         |                   |                     |                | Second, even as a theoretical matter, the effect of such a change on Postal Service incentives would depend on the precise statutory structure that Congress creates, |</p>

<tr>
<td>34</td>
<td>2nd bullet</td>
<td>Jacob Howley, Steve Nickerson, Renee Sheehy</td>
<td></td>
<td>Eliminate, unless more substance can be provided to distinguish this model from the status quo. The draft text here does not explain how a government corporation or GSE model would differ in substance from an independent establishment, let alone why the redesignation would increase efficiency incentives. After all, the original idea of reorganizing the USPS as an independent establishment (with material changes in substantive powers and freedoms) was to do the very thing purported here: “providing a public service with a predominantly business nature.” If that is all there is to being a GSE, then that’s the same as what the USPS is today.</td>
</tr>
<tr>
<td>35</td>
<td>1st bullet</td>
<td>Jacob Howley</td>
<td>If USPS were to be a private company—an option that is increasingly common among postal operators in other countries—…</td>
<td>It should be acknowledged that, though increasing, this business model represents only a small handful of the world’s postal operators – even a small handful among industrialized countries.</td>
</tr>
<tr>
<td>35</td>
<td>1st bullet</td>
<td>Keith Weidner</td>
<td>USPS told us that as a private company its primary incentive would be to maximize profits and that, in its view, private shareholders would be most focused on short term financial outcomes</td>
<td>Replace “would” with “could”, consistent with terminology used in the rest of this section</td>
</tr>

</table>
• I’d like to start reviewing the specific information we are sending and make sure all the folks understand what the data represents.
  o Volume information:
    § First Class Single Piece volumes represents the change in mail volume versus last year that is stamped by individuals and entered into mail boxes, as well as meter mail volume that is typically mailed by larger companies that possess a meter. This volume represents approximately 30% of total First Class Mail volume.
    § Entered Presort First Class Mail represents the change in mail volume versus last year that is entered by large commercial mailers into the mail stream. This volume represents approximately 70% of First-Class Mail volume. I will note that this volume also includes one-time mailings of Census, as well as Stimulus checks and notices.
    § Entered USPS Marketing mail represents the change in mail volume versus last year that is entered by large commercial mailers into the mail stream. This mail volume is typically advertising in nature and is dependent upon economic activity. The pandemic has greatly impacted the amount of marketing mail volume within the system.
    § Entered Periodicals represents the change in mail volume versus last year that is entered by large commercial mailers, as well as smaller newspapers. This mail volume includes local and county newspapers, as well as monthly and weekly magazines. This category has proven to be extremely volatile during this pandemic period, and is representative of some of the issues that are occurring within the economy.
    § Total Delivered Mail volume represents the change in total mail volume versus last year that has been delivered. This includes all letter and flat categories, mail and flats.
    § Delivered Package volume represents the change in package volume versus last year that was delivered by the Postal Service. This includes all package mail classes including network volume that has gone through the Postal Service network, as well as last mile product that is entered directly at the Post Office.
    § International and Military Packages represents the change in package volume versus last year that was delivered by the Postal Service.
  o Revenue Information:
    § The revenue data provided is our daily operating sales. This excludes the majority of accounting adjustments which include PiHop (Postage in the Hands of the Public), Mail in transit (which is a measurement of how much mail is still in the system versus delivered) in order to get a sense as to the daily revenue changes.
    § The actual column represents the total cash sales over that week period.
    § The plan column represents the pre-COVID plan amount we expected. This revenue amount includes what we assumed we would earn over this time period in the absence of COVID. This is based on trends, econometric models, price changes, as well as known one-time events, such as the census mailings.
    § The Plan variance column represents the difference between what we actually earned versus what he had planned for in a pre-COVID world. This column represents the impact COVID is having on our business.
    § The Like-Date column represents the total amount of sales for the previous year for the same date range.
    § The Like-date variance column represents the difference between what we actually earned versus the sales level in the previous year.
    § A couple of points I’d like to make on the revenue trends
      • The best way to understand the impact that COVID is having on the Postal Service is to look at the actual versus what we had planned for. The plan incorporates normal volume changes we experience, price changes that have
taken place, the elasticity effects of those price changes, as well as one-time events, such as census.

- While comparing to the previous year is helpful, that will not provide a good sense as to what the actual COVID impact is because all of those items mentioned above weren’t in last year’s data.

- Finally, the bottom section was created to try and isolate those one-time events that we have been able to quantify, specifically census and the stimulus check mailings. We had planned for the census mailings, but we had not planned for the stimulus checks (since that was an unknown event).
  - So, for example, without the stimulus checks we would have been worse-off versus the plan.
  - Similarly, without the stimulus checks and census, we would have been worse-off versus last year.
  - The reason we are isolating these one-time events is to understand how things may look moving forward and the true impact of the economic impact of COVID on the business.

  - Also, I want to make it clear that as time progresses, systems update and data reconciles, so numbers may be updated from previous weeks as our systems get final updates, accounting adjustments are made and data is received from rural offices.

  - We are in the midst of closing the books for the month of April, but from preliminary revenue information we are currently seeing a $225M reduction from last year’s levels which is $380.9M worse than our pre-COVID plan (since revenue growth over last year was planned). The reason for the difference between these two numbers is we had planned for increased revenue associated with the one-time Census mailings which have taken place across the country which generated was approximately $23.7M in revenue in April. In addition, the economic stimulus check mailings led to a one-time increase in revenue of $19.3M for the month of April.

  - We are also beginning to see an increase in expenses due to the impact of COVID. COVID has led to an increase in paid leave versus last year’s levels, as the CARES Act leave policies which are not reimbursable to the Postal Service as it is for all other entities have been utilized by our impacted employees. In addition, the Postal Service has had to shift a significant amount of the volume that used to fly via commercial air carriers to more expensive air cargo networks as commercial air carriers have significantly reduced flights. Finally, we have seen a large increase related to supplies and services to support the purchase of Personal Protective Equipment to support our employees and contract cleaners to sanitize facilities and Post Offices that have had incidences of positive COVID-19 diagnoses present. We are in the midst of quantifying these impacts now for April and do not have the final numbers.

  - In terms of the trends we are seeing right now:
    - So far we have not seen the significant revenue reduction for this first month of the quarter that we projected based on the limited information available at the time we developed the projections.
    - Mail volumes have not declined quite as precipitously as we expected, and package volumes have grown more than anticipated and thus far such growth is continuing.
    - As noted in our letter dated April 17th which articulated our thinking at the time as to how we derived our initial estimates, given the economic uncertainty underlying all of this, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy.
    - The new information will necessitate updates to our forecast, and the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.
The specific new information that has come to light over the last few weeks includes a significant increase in package volumes and revenues as stay at home orders have been put in place across the country and consumers have looked to e-commerce to provide them with goods.

- Much of this growth is also tied to challenges shippers have had across the delivery markets, with some fulfillment organizations not allowing consumers to ship through them and thus these shippers have turned to the Postal Service to continue shipping.

- While this recent growth in packages has provided the organization with some revenue lift and has helped to replace some of the revenue lost on the mail side, we have significant concern that this package growth will only be a short-term lift to our revenues and will not be sustained in the long-run as States reopen their economies and customers return to purchasing goods at stores.

- The likely economic impact of the pandemic on consumer incomes could dampen consumer spending on goods in the future which will also lead to a decrease in packages.

- In addition, we have seen in past recessions that mail volume declines typically are lagged from the beginning of a recession, in particular First Class mail. So we still believe more precipitously mail volume declines are likely.

Tremendous uncertainty underlies any prediction of the future. Given the tremendous uncertainty underlying the economy right now due to the pandemic and its current and eventual impact on mail and package volume and revenue, we will continue to assess our financial condition and inform the committee, but we are not prepared to revise our projections.

LIVE: POTUS holds a roundtable with industry executives
Elizabeth Warren is SOUNDEDING the alarm:

She’s absolutely right -- additional funding would bring the USPS back from the brink of extinction.

But we’re still $19,291 short of our goal to fund our ad campaign to save the USPS.

Democrats are helping us reach this milestone goal by 4X-MATCHING all gifts -- so chip in $5 right NOW:

FUND OUR AD CAMPAIGN: SAVE THE USPS

400%-MATCH: $5 >>
400%-MATCH: $25 >>
400%-MATCH: Custom Amount >>

We’re sick and tired of Trump slashing essential services in favor of Special Interests. The USPS could shut down by June 1st if Trump has his way!

The USPS is the ONLY mail carrier in the country that is required to deliver to every address in the country.

Millions of Americans would be left without essential goods!

So if we fail to meet our goal to launch our national ad campaign to save the USPS, it’ll be a devastating loss.

And Elizabeth Warren will be so disappointed.

So stand with Elizabeth Warren. Help fund our ad campaign — rush $5 now:
Elizabeth Warren is SOUNDED the alarm:

Elizabeth Warren’s latest plan DEMANDS additional funding to save the USPS

She’s absolutely right -- additional funding would bring the USPS back from the brink of extinction.

But we’re still $19,291 short of our goal to fund our ad campaign to save the USPS.

Democrats are helping us reach this milestone goal by 4X-MATCHING all gifts -- so chip in $5 right NOW:

To Whom It May Concern,

This letter is to provide information regarding the functions being performed by the mailing and printing industry in support of the essential government services being provided by the United States Postal Service to the American people.

The Postal Service’s provision of postal services throughout the United States is not affected by State and local government actions that are restricting commercial and personal activities in response to the COVID-19 pandemic. The Postal Service is an entity of the Federal Government, and the provision of postal services to the American people is designated as an essential function under federal law during times of emergency. The postal system is used to deliver, among other things, important governmental information and benefits, mail that is essential to the functioning of our economy, elections materials, and packages containing vital necessities, including medicines and other goods, and is a part of the nation’s critical infrastructure.

Postal and shipping workers, including those in the private sector, are also considered essential critical infrastructure workers under recent guidance issued by the Department of Homeland Security. White House and CDC guidance has also stated that such industries have a special responsibility to maintain normal work schedules.

The functioning of the postal system depends critically on the mailing and printing industry. Members of the mailing and printing industry work with the public and private sector to create, print, and enter essential mail into the postal system. The industry also serves a vital role in ensuring that packages are able to be efficiently shipped from sender to recipient.

Therefore, the Postal Service considers that the continued operations of the mailing and printing industry in enabling the delivery of critical mail and packages is vital to the Postal Service’s continued performance of its essential functions.

Talking points for Concerning Legislative Strategy for the Fourth Stimulus Bill
April 1, 2020

• We need to start preparing immediately for the fourth stimulus bill.

• Based upon everything we have heard, the vote on the fourth stimulus bill, which will originate in the House, will occur on or about April 20, 2020. That is two and one half weeks away.

• In addition, we have a meeting scheduled with Congressman Connelly next week, and we fully expect that he will ask us for our legislative ask.

• Further, Democratic staffers from both our House and Senate Oversight Committees have scheduled an exploratory call with Ron Stroman later this afternoon.

• As an initial matter, we need to agree on what our legislative ask will be.
  o Initial Board approved legislative ask ($44.5B)
  o Subsequent Board approved ask in response to a request from the Speaker ($15B plus elimination of our debt, as the minimum prudent amount necessary to hedge against the substantial risk that the Postal Service will lose all of our liquidity this fiscal year)
  o Support the provisions in the Speaker’s draft bill ($25B/debt forgiveness/$15B loan)
  o Support the deal approved by Chairman Johnson/Peters ($13B)
  o Develop a broader set of legislative asks
  o Negotiate directly with POTUS and/or the Treasury Secretary

• In making our decision in this regard, one fact I should point out is that during our meeting yesterday with our union leadership, they stressed that they are hearing that any legislative asks need to be closely tied to COVID-19 issues, and that broader reform requests would not be looked upon favorably.

• While we recognize that this may be in the self-interests of the Unions, we note that Speaker Pelosi was widely criticized by Republicans on the Senate floor with regard to the last stimulus bill, and she has stated publically that she would like a quick consensus bill here.

• She has stated that while the bill should be COVID-19 related, she also wants it to be economic stimulus oriented, which could work in our favor.

• Once we have agreed upon our legislative request, we need to move out quickly. I believe that personal outreach by the Governors to certain key political figures
can help reframe the narrative about the Postal Service as a part of the nation’s critical infrastructure that will be needed to perform essential services for the American people.

- Where the Governors can provide the most help in this round is to be focused on changing the Administration’s views.

- There seems to be a growing consensus amongst the Board that the best way to do this would be through a direct meeting with POTUS. I am not opposed to this and would be happy to participate in any way I can.

- That said, I still have some concerns that the only way an appropriation for the Postal Service ultimately gets support in the Senate is for the Governors to reach an agreement on a legislative package with the Treasury Secretary, and we may not have sufficient time to make the connections between POTUS and the Secretary.

- In that regard, in a conversation that Ron Stroman had with Chairman Johnson’s Chief of Staff, he advised Ron that we needed to be negotiating with the Treasury Secretary.

- Therefore we should think through whether we can have a meaningful dialogue with POTUS that will result in him giving instructions to the Secretary, or whether we should proceed on parallel tracks with the Secretary.

- Assuming parallel tracks are in order, I would suggest the following meetings/calls in an effort to change the Administration’s view.

- We would recommend that Reince Priebus arrange a call for Governors Barger and Bloom with POTUS, and I could try to do the same through Peter Navarro. I would also be happy to participate in the call if it would be helpful.

- We would recommend that Chairman Duncan and Governor Martinez arrange a call with the Treasury Secretary to try to determine his issues with providing relief to the Postal Service. I still believe such a call could be important as a hedge strategy in case we can’t make enough progress with POTUS, since in that instance the Secretary’s views will have outsized influence on the process.

- We would recommend that Reince Priebus arrange a call for Chairman Duncan and Governor Barger with the Chief of Staff to the President, Mark Meadows.

- Assuming some of these conversations bear fruit, and that we reach an accommodation with POTUS and/or Secretary Mnuchin, we would recommend
outreach to our key legislative oversight leaders to inform them that we have such accommodation.

- We would recommend that Reince Priebus set up a call with Chairman Ron Johnson.

- Also, we would recommend that Governor Bloom arrange a call with Chairperson Maloney.

- We would recommend Governor Williams reach out to Majority Leader Steny Hoyer

As I noted, time is of the essence.
Talking points for Concerning Legislative Strategy for the Fourth Stimulus Bill
March 31, 2020

• Thank you Mr. Chairman, and I certainly agree with your point that we need to start preparing immediately for the fourth stimulus bill.

• I appreciate the willingness of the Governors to get personally involved since I believe the primary work that we need to do will be with the Administration, the political access that the Governors have will be invaluable.

• I fully agree with the Chairman’s statement that where the Governors can provide the most help in this round is to be focused on changing the Administration’s views.

• As the Chairman noted, the financial relief provided through the last stimulus bill was substantially undercut when the Administration would only support a loan, and that loan may come with terms and conditions that are not acceptable to the Postal Service.

• As an initial matter, we need to agree on what our legislative ask will be.
  
  o Initial Board approved legislative ask ($44.5B)
  o Subsequent Board approved ask in response to a request from the Speaker ($15B plus elimination of our debt, as the minimum prudent amount necessary to hedge against the substantial risk that the Postal Service will lose all of our liquidity this fiscal year)
  o Support the provisions in the Speaker’s draft bill ($25B/debt forgiveness/$15B loan)
  o Support the deal approved by Chairman Johnson/Peters ($13B)
  o Develop a broader set of legislative asks
  o Negotiate directly with the Treasury Secretary

• Once we reach a collective resolution of this issue, I believe there are two primary areas where the personal participation of the Governors will help most.

• First, as the Chairman indicated, it would be very helpful, if we can reach agreement this week, we need to finish the 10-year strategy document. Both the Treasury Secretary and the President’s Chief of Staff have let us know that they expect to see our plan, and our credibility would be markedly enhanced I don’t think we can develop credibility with the Administration, even for short term relief, if they don’t have faith that we have a longer term plan that is more in line with the Administration’s expectations.
That said, given the pace with which the fourth stimulus bill is moving, we cannot afford to wait beyond this week to reach a consensus on the 10-year strategy document. To put it bluntly, time is of the essence. We need to map out an integrated political strategy that includes a holistic view of the manner we intend to portray the Postal Service, both in response to the present crisis, and for the future.

Once we have agreed upon our legislative request, we need to move out quickly. We are ready to roll out. I believe that personal outreach by the Governors to certain key political figures can help reframe the narrative about the Postal Service as a part of the nation’s critical infrastructure that will be need to perform as essential service for the American people.

We believe the only way an appropriation for the Postal Service gets support in the Senate is for the Governor to reach an agreement on a legislative package with the Treasury Secretary. For that reason, the single most important activity that needs to occur is a discussion with the Secretary, as soon as it can be arranged.

In that regard, once we are ready to go, I would suggest the following meetings/calls in an effort to change the Administration’s view

- We would recommend that Chairman Duncan and Governor Martinez arrange a call with the Treasury Secretary to work out a legislative package that could get support in the Senate. I can’t emphasize enough the importance of this call, since the Secretary’s views will inform all of our other activities we will purpose to get legislation, given that we believe he has outsized influence on the process.

- We would recommend that Reince Priebus arrange a call for Chairman Duncan and Governor Barger with the Chief of Staff to the President, Mark Meadows.

- Assuming some of these conversations bear fruit, and that we reach an accommodation with Secretary Mnuchin, we would recommend outreach to our key legislative oversight leaders to inform them that we have such accommodation.

- We would recommend that Reince Priebus set up a call with Chairman Ron Johnson.

- Also, we would recommend that Governor Bloom arrange a call with Chairperson Maloney.

- We would recommend Governor Williams reach out to Majority Leader Steny Hoyer.
As I noted, time is of the essence – given what we’re hearing – I’ll ask Ron to provide some insight on timing.
The Honorable Steven T. Mnuchin  
Secretary  
U.S. Department of the Treasury  
1500 Pennsylvania Ave  
Washington, D.C. 20220  

Dear Secretary Mnuchin:

We write with urgent concerns regarding the financial condition of the U.S. Postal Service and the $10 billion loan Congress authorized the Department of the Treasury to provide to the Postal Service in the Coronavirus Aid, Relief, and Economic Security (CARES) Act.¹ The Coronavirus emergency and resulting decline in economic activity have jeopardized the Postal Service’s ability to continue providing essential services to every American. We urge you to make this loan as soon as possible, with terms that respect the Postal Service’s status and authorities as an independent establishment of the executive branch. We cannot afford to lose this vital infrastructure at a time when it is most needed to continue delivering prescription drugs, critical packages to households and businesses, Coronavirus-related information, vote-by-mail materials, testing kits, medical equipment, and eventually vaccines across this nation.

On March 20, the Postal Service notified our Committees that due to the Coronavirus emergency it will “run out of cash due to a potential decline in revenue of $8-$10 billion and may have to limit or cease operations by the end of this fiscal year.” The Postal Service subsequently provided revenue projections indicating that it could lose up to $12.6 billion in revenues this fiscal year as a result of the pandemic. During the Coronavirus pandemic, the Postal Service is incurring additional costs as it continues to provide safe deliveries and services to every member of the public, including costs of additional facility cleanings, purchasing critical supplies, and training staff on new procedures, in addition to regular operating costs.²

Meanwhile, the Postal Service continues to provide universal, essential services in every community across the nation, delivering medications, emergency information, home supplies, and more. The Postal Service is a lifeline for seniors and for people in rural areas, who often have less access to other services, particularly during this crisis. Postal workers deliver mail and packages to over 159 million households and businesses each day, including over 1 billion prescriptions last year. Businesses rely on the Postal Service to carry their packages the last

² See, for example, U.S. Postal Service, How Can We Help?: USPS Coronavirus Updates for Residential Customers (Mar. 24, 2020) (faq.usps.com/s/article/USPS-Coronavirus-Updates-for-Residential-Customers).
mile, particularly in remote and rural areas, as the only carrier that delivers to every single address. Furthermore, the Postal Service is at the center of a $1.4 trillion mailing industry that employs more than 7.5 million people.³

Enacted on March 27, the CARES Act authorizes the Postal Service to borrow up to an additional $10 billion from the Department of the Treasury (Treasury) “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The terms of this loan are to be “mutually agreed upon by the Secretary and the Postal Service.”⁴ In discussions with Senate authorizers regarding these provisions, you indicated that a loan would be made “at the Treasury rate.” This compromise was made with the understanding that Treasury would act swiftly to provide immediate, necessary financial relief to the Postal Service with a loan under practical, commonsense financial terms.

We strongly urge you to make this loan to the Postal Service in a timely manner, under fair terms that comply with the intent of the CARES Act, and with respect to the proper authorities delegated to the Postal Service. Congress maintains the authority to set the policies by which the Postal Service operates, delegated by statute to the Postal Service Board of Governors and the Postmaster General. The Board of Governors has the exclusive authority to direct the exercise of “the power of the Postal Service,”⁵ appoint or remove the Postmaster General, and “direct and control the expenditures and review the practices and policies of the Postal Service.”⁶ We expect the Treasury Department to fully comply with federal statutes and refrain from setting any conditions that would infringe on the Postal Service’s statutory authorities. We cannot afford to compromise this lifeline for seniors, rural areas, and all Americans.

To ensure the terms and conditions that Treasury intends to negotiate with the Postal Service comply with federal statutes and vested authorities, we ask that you provide us with the following documents within one week after the Postal Service requests a loan under the CARES Act:

- The terms and conditions the Treasury will propose to the Postal Service for the exercise of this borrowing authority, as well as any terms and conditions provisionally agreed upon with the Postal Service, including information about any postal policy and/or operational provisions Treasury intends to improperly include as a condition of borrowing;

---

• A statement of when Treasury will allow the Postal Service to exercise its borrowing authority, and

• For context regarding the current negotiations, all signed or proposed borrowing agreements (Note Purchase Agreements), as well as all “term sheets” and communications regarding these agreements, between the Postal Service and the Treasury Department since 2018. It is our understanding the last permanent agreement expired in September 2018, and an interim agreement expired in August 2019.

Thank you for your attention to this urgent matter.

Sincerely,

Gary C. Peters

Dear Mr. Chairman and Governors:

On behalf of the Postal Service’s 500,000 craft employees, we write to express our appreciation for the leadership you have shown during the current national crisis caused by the COVID-19 pandemic and to urge you to resist inappropriate interference by the Treasury Department in the management and operations of the Postal Service.

As our members across the country in post offices, on delivery routes, and in processing plants and other facilities face down the dangers of providing essential services during a pandemic, we thank you for fighting for the survival of the Postal Service -- a national treasure and a truly essential public service.

We specifically applaud your unanimous endorsement of immediate legislative relief to help the Postal Service survive this crisis so that we can continue to help America fight this pandemic and eventually recover from the deep recession it has caused. Our members are proud to be delivering goods to families that are sheltering in place, medicines and supplies to those who are sick, relief checks to suffering citizens and vital public health information to the entire country. And the industry – mailers, shippers and suppliers – is committed to respond to and fulfill these critical public needs, and work with the Postal Service to deliver them as well. The assistance you are seeking from Congress will allow us to serve these vital functions. We want to continue to deliver for the Nation.
We also urge you to continue to resist inappropriate efforts by the Department of Treasury to interfere with the management of the Postal Service or to place conditions on access to credit provided by the Postal Reorganization Act or the CARES Act -- conditions that would weaken the legal authorities of the Board of Governors and the Postal Regulatory Commission. It is the role of a democratically elected Congress to set postal policy in this country, and it is the role of the Board and the PRC to implement that policy with the managerial and regulatory discretion provided by law. The Treasury Department has no authority to re-write the law or impose its policy preferences on the Postal Service – or the country.

In a few years’ time, when this pandemic and this economic crisis are behind us, the Postal Service will celebrate its 250th anniversary. If we all work together to preserve the institution that we love and depend upon, on that anniversary we will be able to look back at this time as being among the finest in the long proud history of the Postal Service.

Thanks again for your leadership.

Sincerely,

Fredric V. Rolando

Cc: Postmaster General Megan Brennan
Deputy Postmaster General Ronald Stroman
This letter responds to your request of April 3, 2020 for information regarding the Postal Service’s immediate financial condition following the onset of the Coronavirus Disease 2019 (COVID-19) pandemic, and the Postal Service’s plans regarding the additional $10 billion in borrowing authority recently authorized by Congress in the CARES Act. The requested information is below.

The Postal Service Board of Governors and management team, along with the 630,000 employees of the Postal Service, remain highly focused on our mission of binding the nation together and providing the American people with prompt, reliable, and universal postal delivery services. Our mission has never been more important than now, as more and more Americans are being asked to shelter in place and to work from home due to the COVID-19 pandemic. We operate by statute as a "basic and fundamental service" provided by the Federal Government to the American people, and the continued provision of postal services is designated both as an essential function under federal law during times of emergency and as part of the nation’s critical infrastructure. Every day, the dedicated men and women of the Postal Service accept, process, transport, and deliver vital mail and packages to communities throughout the Nation.

The Postal Service is fully committed to being a source of consistency and reliability for American households and businesses throughout this national emergency, and to ensuring that the public can confidently depend upon our critical mailing and shipping services both in the near term, and into the future. However, as I discussed during our teleconference on April 9, 2020 on these matters, and detail further below, the COVID-19 pandemic is having a profoundly negative impact on our financial condition. The result is a liquidity crisis due to the pandemic that requires immediate action by Congress to ensure our continued ability to provide our critical services to the American people in a prompt, reliable, and efficient manner.

1. The most recent financial estimates regarding the Postal Service’s finances through the end of the fiscal year, under expected economic conditions, including: projected revenue, expenses, emergency expenses, and cash-on-hand. Such estimates should include information about the attendant economic assumptions. We request that you send a copy of the estimates that will be used in discussions with the Treasury Department about borrowing, and continue to send updated estimates as necessary.

Our projections of the impact of the COVID-19 pandemic are grounded in three knowns and a significant number of unknowns. The three knowns include what is currently happening with volumes, the impact of the last great recession on the Postal Service’s volume after GDP growth resumed, and what mailers are communicating conforming the Postal Service regarding their short-term plans.

The first known is what is currently happening with volumes. We are seeing a significant decline across mail products, with growth in packages. All percentages describe the change in mail volume from the same period last year. The first week of the COVID-impact (3/16-3/21) the Postal Service saw total delivered mail volume (consisting of letters and flats) decline by 5.3%. The week of March 22nd total delivered mail volume declined by 7.5%, the week of March 29th total delivered mail volume declined by 24.2%, and the week of April 5th total delivered mail volume declined by 32.2%. Delivered packages have shown a growth trajectory which has been offsetting a portion of the mail revenues lost in recent weeks. The first week of the COVID-impact (3/16-3/21) the Postal Service saw delivered package volumes decline by 1.0%. The week of March 22nd total delivered package volumes grew by 5.0%, the week of March 29th total delivered package volumes increased by 11.8%, and the week of April 5th total delivered package volumes increased by 20.7%.

Although package growth has accelerated, our current projection is that this trend will not continue and we will likely have declines in packages in the upcoming months. The reasons for this belief are as follows:

- First, some of our customers are already expressing concerns about what they are reading concerning our financial condition and stability, and are pursuing alternatives to move and deliver their products.
- Second, the significant decline in GDP and the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
- Third, package growth will also be likely be impacted by supply chain disruptions across the system, as shortages due to production and transportation disruptions, not only in the U.S, but throughout the world, ripple through the economy, thus reducing package volume.
- Fourth, much of the package growth seen in recent weeks was fueled by consumers stocking up on basic needed household items and stockpiling food. Much of this spending was funneled through e-commerce
because consumers did not want to physically shop in stores. As consumers reach higher inventory levels of household staples, repeat purchasing will decline. Additionally, as society begins to open up, many (but not all) consumers will return to shopping in stores.

The known impacts experienced by the Postal Service during and after the last recession in 2008-2009 also influence our analysis. During that recession, the Postal Service lost significant mail volume that never returned; total volumes experienced a steep downward step between 2007 and 2009 and thereafter returned to a more gradual decline that has continued ever since. Prior to the recession, the Postal Service had total mail volume of 212B pieces in FY2007. After the recession, the Postal Service had 168B pieces within the system in FY2011, a decline of 20.7% of total mail volume. Mail volume declined by 43.9B pieces and $9.2B in total revenue were lost during this period, with $6.8 billion of revenue lost in 2009 alone.

The final known factor is what mailers are telling us about their short-term plans. For the most part, major mailers are expecting a slow-down in mailing due to the economic impact across the economy. Advertisers have reduced spending, which is having a significant effect on marketing mail, with marketing mail volume down 42.5% in the most recent week.

There are three components to the COVID-19 impact that are unknown and make the effects of the pandemic extremely difficult to quantify:

- **Depth** of the short-term impact during Calendar Q2 and Q3. Specifically, how bad will economic conditions get?
- **Duration** of the economic impact. This is directly tied to how long the economy remains shuttered and will have a significant influence on FY2021 volumes and revenues.
- **Volume levels** to which mail returns after the pandemic is concluded. This will influence our financial outlook in future years. It is possible that many companies never return to business and that some portion of our volume will be permanently lost to digital alternatives. (As noted previously, after the 2008-2009 recession, mail volume never returned and we suffered a permanent 20% decline from FY2007 levels of over 20%).

Each of these components will ultimately be influenced by the degree to which GDP declines in the coming months, the increase in the unemployment rate and the persistence of higher unemployment levels, declines in business and consumer confidence and investment spending (which often significantly lag the beginning of an "official" recovery), and the timing of the reopening of segments of the economy. None of these elements are known or can be predicted with any real degree of certainty at this time. The estimates for GDP decline are diverse, with a recent survey of economists by the Wall Street Journal reporting a median decline in GDP of 26.5% in Postal Quarter 3 (April – June, 2020). In addition, the same survey of economists suggests a median projection for the unemployment rate by June 2020 of 13%. To put that GDP loss in perspective, the recession of 2008-2009 caused a 3.3% decline in GDP in FY2009; the median decline in GDP projected for this quarter (April – September 2020) is 7 times worse than the worst quarter GDP experienced in the last recession.

These GDP and unemployment projections, when considered in light of the Postal Service’s financial results during the last recession, and the most recent volume decline information, have led us to the following initial estimates for the next 18 months and the longer-term outlook:

- **Short-term impact - Postal Q3 & Q4 (April – September)**
  - We expect a Significant significant short-term impact for the remainder of FY2020 due to the economic impact of COVID-19
    - which will cause the projected declines of approximately 50% in volumes in Q3 and 57% in Q4, based on the speed at which volume has already declined, the GDP and unemployment projections estimated by economists and information communicated by mailers.

- **Medium-term impact - Fiscal Year 2021 (October 2020 – September 2021)**
  - As time moves forward and the economic lock-down begins to lessen, we project a gradual return of volumes beginning in Q1, FY 2021, to about 80% of the corresponding pre-COVID levels in Q1.

1 WSJ Survey of Economists - https://www.wsj.com/graphics/econsurvey/
• Long-term impact - Fiscal Year 2022 and beyond
  o The longer-term projection suggests a return to a "new normal" of about 75% of pre-COVID volume levels, which is slightly worse than the last recession when we returned to a new normal of approximately 80% of pre-recession volumes. We then expect the long-term gradual secular volume declines will resume for the next 10 years.

All of these volume assumptions are dependent on many facets of the COVID-19 disruption that are as yet unknown. For example, the longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return could be less than currently projected. Likewise, if the economic lock-down retreats in the coming weeks and businesses return to normal quickly, it is possible that the volume levels could be greater than these projections. Ultimately, given the significant uncertainty concerning these matters, our projections, while severe, should not be considered as being conservative, rather than worst case, because it is conceivable that the impact of COVID-19 on mail volumes will be even more dire than we are anticipating.

Based on these projections, it is expected that the Postal Service’s financial condition will worsen significantly compared to previous estimates. Depending on the severity and length of the economic lock-down, our current projections, which are based upon the assumptions indicated herein, indicate the Postal Service would be essentially illiquid in September 2020 if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than 1 payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers’ compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term lending note that was available to us under our existing statutory borrowing authority of up to $15B. A portion of this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current volume projections, we will be running out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections directly due to the COVID-19 pandemic.

The Postal Service will do what it can to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. Due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act (H.R. 6201), our ability to significantly reduce expenses in the short-run is limited. That said, based upon these projected volume reductions, over the next 18 months we would be required to reduce 123 million workhours over the next 18 months by 123 million, which is the equivalent of approximately 69,000 Full-Time Equivalents (FTEs). The savings associated with those reduced workhours, however, are diminished because the new leave provisions of H.R. 6201 added additional costs to the Postal Service that are estimated to be approximately $600M-$900M depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying all of this, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and

For the rest of FY 2021, we estimate that volumes will gradually return to about 74% of pre-COVID volume levels (as noted, current projections by economists suggest this will be worse than the great recession, when we lost over approximately 20% of volumes), due to the overall economic impact the lock-down is having).

For the entirety of FY 2021, we estimate that total volume will be approximately 70% of pre-COVID volume levels.

For the remainder of FY 2021, we estimate that mail volumes will gradually return to about 74% of pre-COVID volume levels. Our current projections, which are based upon the assumptions indicated herein, indicate the Postal Service would be essentially illiquid in September 2020 if additional cash is not obtained (either through the additional $10B Treasury loan under the CARES Act, or alternative funding mechanisms). At that time, the Postal Service would have less than 1 payroll of cash remaining (payroll is ~$2B bi-weekly), with a negative cash balance projected for October, when the $1.5B workers’ compensation cash payment is due to the Department of Labor. While previous estimates put this date as early as June, this has been extended until September due to our ability to delay payment of employer Social Security taxes pursuant to the CARES Act (~$1.1B thru September 2020), and our ability to obtain an additional $3.4B from the Federal Financing Bank pursuant to a short-term lending note that was available to us under our existing statutory borrowing authority of up to $15B. A portion of this note ($400M) must be repaid by September 2020, while the remaining $3B must be repaid by April 2, 2021.

Over the next 18 months (to the end of the next fiscal year, September 2021), we project our net loss will increase by $22.8B versus previous projections as a direct result of the impacts of the COVID-19 pandemic. Based upon our current volume projections, we will be running out of cash in April 2021 even if we secure the additional $10B in borrowing under the CARES Act. Finally, over the longer term (10 years), we project our net loss will increase by $54.3B versus previous projections directly due to the COVID-19 pandemic.

The Postal Service will do what it can to reduce expenses commensurate with these volume declines through overtime and overall workhour reductions, and curtailing of all travel and other discretionary spending. Due to the impact of COVID-19 on employee availability, the fixity of our network, and the costs associated with the leave provisions of the Families First Coronavirus Response Act (H.R. 6201), our ability to significantly reduce expenses in the short-run is limited. That said, based upon these projected volume reductions, over the next 18 months we would be required to reduce 123 million workhours over the next 18 months by 123 million, which is the equivalent of approximately 69,000 Full-Time Equivalents (FTEs). The savings associated with those reduced workhours, however, are diminished because the new leave provisions of H.R. 6201 added additional costs to the Postal Service that are estimated to be approximately $600M-$900M depending on how many of our employees suffer a qualifying condition related to COVID-19, and on how many of our employees have children and dependents out of school/daycare. Unlike other entities, these expenses are not reimbursable to the Postal Service under the statute. In addition, it is expected that additional supplies and cleaning services required due to COVID-19 could cost the Postal Service over $100M over the next 6 months.

Given the economic uncertainty underlying all of this, the Postal Service will continuously monitor and evaluate new information as it becomes available, including current mail volumes, announcements by governments concerning the opening of aspects of the economy, input from our mail and shipping customers, as well as economic projections for the broader economy. This new information will necessitate updates to our forecast and...
the Postal Service will incorporate on an ongoing basis any relevant new information as it becomes available to ensure we have the most updated assessment of the pandemic on our financial condition.

2. A clear public statement from the Postal Service regarding its expected financial condition, to inform its customers about its revenues, expenses, and expected solvency.

On April 10, we issued a public statement on our financial condition and our stimulus needs, which is available at https://about.usps.com/newsroom/statements/041020-pmg-statement-on-usps-stimulus-needs.htm.

3. A statement of the amount of funds the Postal Service intends to request from the Treasury Department under the CARES Act, including the terms requested by the Postal Service for the authorized loan.

We are in discussions with the Treasury regarding the borrowing authority in the CARES Act, including the terms and conditions that would apply to such borrowing, and will update you when those negotiations are completed. However, we anticipate that we will be required to borrow the full $10 billion that is available, for the reasons noted herein.
MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

FROM: Russell T. Vought
Acting Director

SUBJECT: Implementing the Presidential Transition Act

This Memorandum provides guidance to all Executive departments and agencies ("agencies") on assisting the Presidential transition activities required by the Presidential Transition Act of 1963, as amended (3 U.S.C. § 102 note).

Background

The Presidential Transition Act promotes the orderly transfer of Executive powers in connection with the expiration of the term of office of a President and the inauguration of a new President. The activities required by the Act are also helpful to prepare for leadership transitions that occur between the first and second terms of Administrations.

The Act requires the establishment of a White House Transition Coordinating Council, an Agency Transition Directors Council, and designation of a General Services Administration (GSA) Federal Transition Coordinator. The Act sets up a timetable for agencies to name points of contact to assist with transition efforts and develop succession plans and establishes responsibilities for the Agency Transition Directors Council.

Timetable of Required Agency Actions

1. By May 1, 2020, each agency identified in Enclosure 1 shall name its Agency Transition Director. The Agency Transition Director should be a senior career representative whose responsibilities include leading Presidential transition efforts within the agency. Agencies shall provide the name, title, email address, and telephone number for their Agency Transition Directors to GSA’s Federal Transition Coordinator at PresidentialTransition2020@gsa.gov. These individuals will serve on the Agency Transition Directors Council, co-chaired by the Federal Transition Coordinator and the Deputy Director for Management of the Office of Management and Budget (OMB).
2. By May 1, 2020, each agency identified in Enclosure 2 shall identify a point of contact for communication purposes related to Presidential transition efforts. Agencies shall provide the name, title, email address, and telephone number for their communication coordination to GSA’s Federal Transition Coordinator at PresidentialTransition2020@gsa.gov.

3. Not later than September 15, 2020, and in accordance with subchapter III of chapter 33 of title 5, United States Code, the head of each agency shall ensure that a succession plan is in place for each senior non-career position in the agency.

**Responsibilities**

The Agency Transition Directors Council shall:

i. Ensure the Federal Government has an integrated strategy for addressing interagency challenges and responsibilities around Presidential transitions and turnover of non-career appointees;

ii. Coordinate transition activities among the Executive Office of the President, agencies, and the transition team of eligible candidates and the President-elect and vice-President-elect;

iii. Draw on guidance provided by the White House Transition Coordinating Council and lessons learned from previous Presidential transitions in carrying out its duties;

iv. Assist the Federal Transition Coordinator in identifying and carrying out the responsibilities of the Federal Transition Coordinator relating to a Presidential transition;

v. Provide guidance to agencies in gathering briefing materials and information relating to the Presidential transition that may be requested by eligible candidates;

vi. Ensure materials and information described in subparagraph (v) above are prepared not later than November 1 of the year during which a Presidential election is held;

vii. Ensure agencies adequately prepare career employees who are designated to fill non-career positions during a Presidential transition; and

viii. Consult with the President’s Management Council, or any successor thereto, in carrying out its duties.

OMB and GSA intend to hold an Agency Transition Directors Council meeting on May 27, 2020. Calendar invitations will be distributed to the Agency Transition Directors in advance of the meeting.

---

1 As used in this memorandum, the term ‘agency’ means an Executive agency, as defined in section 105 of title 5, United States Code.

2 Required pursuant to the Presidential Transition Enhancements Act of 2019 (Pub. L. 116-121).
If you have any questions regarding this Memorandum, please contact Mary Gibert, Federal Transition Coordinator at GSA (mary.gibert@gsa.gov).

Text of Presidential Transition Act of 1963, as amended (3 U.S.C. 102 note)

https://www.govinfo.gov/content/pkg/PLAW-114publ136/pdf/PLAW-114publ136.pdf
Public Law 114–136
114th Congress
An Act
To improve the process of presidential transition.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.
This Act may be cited as the “Edward ‘Ted’ Kaufman and Michael Leavitt Presidential Transitions Improvements Act of 2015”.

SEC. 2. PRESIDENTIAL TRANSITION IMPROVEMENTS.
(a) In General.—The Presidential Transition Act of 1963 (3 U.S.C. 102 note) is amended—
(1) by redesignating sections 4, 5, and 6 as sections 5, 6, and 7, respectively; and
(2) by inserting after section 3 the following:

"SEC. 4. TRANSITION SERVICES AND ACTIVITIES BEFORE ELECTION.
(a) Definitions.—In this section—
"(1) the term ‘Administrator’ means the Administrator of General Services;
"(2) the term ‘agency’ means an Executive agency, as defined in section 105 of title 5, United States Code;
"(3) the term ‘eligible candidate’ has the meaning given that term in section 3(h)(4); and
"(4) the term ‘Presidential election’ means a general election held to determine the electors of President and Vice President under section 1 or 2 of title 3, United States Code.

(b) General Duties.—The President shall take such actions as the President determines necessary and appropriate to plan and coordinate activities by the Executive branch of the Federal Government to facilitate an efficient transfer of power to a successor President, including by—
"(1) establishing and operating a White House transition coordinating council in accordance with subsection (d); and
"(2) establishing and operating an agency transition directors council in accordance with subsection (e).

(c) Federal Transition Coordinator.—The Administrator shall designate an employee of the General Services Administration who is a senior career appointee to—
"(1) carry out the duties and authorities of the General Services Administration relating to Presidential transitions under this Act or any other provision of law;
"(2) serve as the Federal Transition Coordinator with responsibility for coordinating transition planning across agencies, including through the agency transition directors council established under subsection (e); 

"(3) ensure agencies comply with all statutory requirements relating to transition planning and reporting; and 

"(4) act as a liaison to eligible candidates.

"(d) WHITE HOUSE TRANSITION COORDINATING COUNCIL.—

"(1) ESTABLISHMENT.—Not later than 6 months before the date of a Presidential election, the President shall establish a White House transition coordinating council for purposes of facilitating the Presidential transition.

"(2) DUTIES.—The White House transition coordinating council shall—

"(A) provide guidance to agencies and the Federal Transition Coordinator regarding preparations for the Presidential transition, including succession planning and preparation of briefing materials;

"(B) facilitate communication and information sharing between the transition representatives of eligible candidates and senior employees in agencies and the Executive Office of the President; and

"(C) prepare and host interagency emergency preparedness and response exercises.

"(3) MEMBERSHIP.—The members of the White House transition coordinating council shall include—

"(A) senior employees of the Executive branch selected by the President, which may include the Chief of Staff to the President, any Cabinet officer, the Director of the Office of Management and Budget, the Administrator, the Director of the Office of Personnel Management, the Director of the Office of Government Ethics, and the Archivist of the United States;

"(B) the Federal Transition Coordinator;

"(C) the transition representative for each eligible candidate, who shall serve in an advisory capacity; and

"(D) any other individual the President determines appropriate.

"(4) CHAIRPERSON.—The Chairperson of the White House transition coordinating council shall be a senior employee in the Executive Office of the President, designated by the President.

"(e) AGENCY TRANSITION DIRECTORS COUNCIL.—

"(1) IN GENERAL.—The President shall establish and operate an agency transition directors council, which shall—

"(A) ensure the Federal Government has an integrated strategy for addressing interagency challenges and responsibilities around Presidential transitions and turnover of noncareer appointees;

"(B) coordinate transition activities between the Executive Office of the President, agencies, and the transition team of eligible candidates and the President-elect and Vice-President-elect; and

"(C) draw on guidance provided by the White House transition coordinating council and lessons learned from previous Presidential transitions in carrying out its duties.
“(2) DUTIES.—As part of carrying out the responsibilities under paragraph (1), the agency transition directors council shall—

(A) assist the Federal Transition Coordinator in identifying and carrying out the responsibilities of the Federal Transition Coordinator relating to a Presidential transition;

(B) provide guidance to agencies in gathering briefing materials and information relating to the Presidential transition that may be requested by eligible candidates;

(C) ensure materials and information described in subparagraph (B) are prepared not later than November 1 of a year during which a Presidential election is held;

(D) ensure agencies adequately prepare career employees who are designated to fill non-career positions under subsection (f) during a Presidential transition; and

(E) consult with the President’s Management Council, or any successor thereto, in carrying out the duties of the agency transition directors council.

“(3) MEMBERSHIP.—The members of the agency transition directors council shall include—

(A) the Federal Transition Coordinator and the Deputy Director for Management of the Office of Management and Budget, who shall serve as Co-Chairpersons of the agency transition directors council;

(B) other senior employees serving in the Executive Office of the President, as determined by the President;

(C) a senior representative from each agency described in section 901(b)(1) of title 31, United States Code, the Office of Personnel Management, the Office of Government Ethics, and the National Archives and Records Administration whose responsibilities include leading Presidential transition efforts within the agency;

(D) a senior representative from any other agency determined by the Co-Chairpersons to be an agency that has significant responsibilities relating to the Presidential transition process; and

(E) during a year during which a Presidential election will be held, a transition representative for each eligible candidate, who shall serve in an advisory capacity.

“(4) MEETINGS.—The agency transition directors council shall meet—

(A) subject to subparagraph (B), not less than once per year; and

(B) during the period beginning on the date that is 6 months before a Presidential election and ending on the date on which the President-elect is inaugurated, on a regular basis as necessary to carry out the duties and authorities of the agency transition directors council.

“(f) INTERIM AGENCY LEADERSHIP FOR TRANSITIONS.—

(1) OVERSIGHT AND IMPLEMENTATION OF TRANSITION.—Not later than 6 months before the date of a Presidential election, the head of each agency shall designate a senior career employee of the agency and a senior career employee of each major component and subcomponent of the agency to oversee and implement the activities of the agency, component, or subcomponent relating to the Presidential transition.
Deadline.

"(2) ACTING OFFICERS.—Not later than September 15 of a year during which a Presidential election occurs, and in accordance with subchapter III of chapter 33 of title 5, United States Code, for each noncareer position in an agency that the head of the agency determines is critical, the head of the agency shall designate a qualified career employee to serve in the position in an acting capacity if the position becomes vacant.

"(g) MEMORANDUMS OF UNDERSTANDING.—

"(1) IN GENERAL.—Not later than November 1 of a year during which a Presidential election occurs, the President (acting through the Federal Transition Coordinator) shall, to the maximum extent practicable, negotiate a memorandum of understanding with the transition representative of each eligible candidate, which shall include, at a minimum, the conditions of access to employees, facilities, and documents of agencies by transition staff.

"(2) EXISTING RESOURCES.—To the maximum extent practicable, the memorandums of understanding negotiated under paragraph (1) shall be based on memorandums of understanding from previous Presidential transitions.

"(h) EQUITY IN ASSISTANCE.—Any information or other assistance provided to eligible candidates under this section shall be offered on an equal basis and without regard to political affiliation.

"(i) REPORTS.—

"(1) IN GENERAL.—The President, acting through the Federal Transition Coordinator, shall submit to the Committee on Oversight and Government Reform of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate reports describing the activities undertaken by the President and agencies to prepare for the transfer of power to a new President.

"(2) TIMING.—The reports under paragraph (1) shall be provided 6 months and 3 months before the date of a Presidential election.

(b) OTHER IMPROVEMENTS.—Section 3 of the Presidential Transition Act of 1963 (3 U.S.C. 102 note) is amended—

(1) in subsection (a)—

(A) in paragraph (8)—

(i) in subparagraph (A)(i)—

(I) by inserting “and during the term of a President” after “during the transition”; and

(II) by striking “after inauguration”; and

(ii) in subparagraph (B), by inserting “or Executive agencies (as defined in section 105 of title 5, United States Code)” before the period; and

(B) in paragraph (10), by inserting “including, to the greatest extent practicable, human resource management system software compatible with the software used by the incumbent President and likely to be used by the President-elect and Vice President-elect” before the period;

(2) in subsection (b)(2), by striking “30 days” and inserting “180 days”;

(3) in subsection (g), by inserting “except for activities under subsection (a)(8)(A),” before “there shall be no”; and

(4) in subsection (h)(2), by adding at the end the following:
“(D) An eligible candidate shall have a right to the services and facilities described in this paragraph until the date on which the Administrator is able to determine the apparent successful candidates for the office of President and Vice President.”.

(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Section 3 of the Pre-Election Presidential Transition Act of 2010 (3 U.S.C. 102 note) is repealed.

(2) The Presidential Transition Act of 1963 (3 U.S.C. 102 note) is amended—

(A) in section 3—

(i) in subsection (a)(4)(B), by striking “section 6” and inserting “section 7”;

(ii) in subsection (b), in the matter preceding paragraph (1), by striking “section 3 of this Act” and inserting “this section”; and

(iii) in subsection (h)(3)(B)(iii), by striking “section 5” each place it appears and inserting “section 6”;

(B) in section 6, as redesignated by subsection (a) of this section, by striking “section 6(a)(1)” each place it appears and inserting “section 7(a)(1)”;

(C) in section 7(a)(2), as redesignated by subsection (a) of this section, by striking “section 4” and inserting “section 5”.

(3) Section 8331(1)(K) of title 5, United States Code, is amended by striking “section 4” and inserting “section 5”.

(4) Section 8701(a)(10) of title 5, United States Code, is amended by striking “section 4” and inserting “section 5”.

(5) Section 8901(1)(1) of title 5, United States Code, is amended by striking “section 4” and inserting “section 5”.

SEC. 3. NATIONAL ARCHIVES PRESIDENTIAL TRANSITION.

Section 2203(g) of title 44, United States Code, is amended—

(1) by redesignating paragraph (3) as paragraph (4); and

(2) by inserting after paragraph (2) the following:

“(3) When the President considers it practicable and in the public interest, the President shall include in the President's budget transmitted to Congress, for each fiscal year in which the term of office of the President will expire, such funds as may be necessary for carrying out the authorities of this subsection.”.

SEC. 4. REPORTS ON POLITICAL APPOINTEES APPOINTED TO NON-POLITICAL PERMANENT POSITIONS.

(a) DEFINITIONS.—In this section—

(1) the term “agency” has the meaning given the term “Executive agency” in section 105 of title 5, United States Code;

(2) the term “covered civil service position” means a position in the civil service (as defined in section 2101 of title 5, United States Code) that is not—

(A) a temporary position; or

(B) a political position;

(3) the term “former political appointee” means an individual who—

(A) is not serving in an appointment to a political position; and

(B) served as a political appointee during the 5-year period ending on the date of the request for an appointment to a covered civil service position in any agency;
(4) the term "political appointee" means an individual serving in an appointment to a political position; and

(5) the term "political position" means—

(A) a position described under sections 5312 through 5316 of title 5, United States Code (relating to the Executive Schedule);

(B) a noncareer appointment in the Senior Executive Service, as defined under paragraph (7) of section 3132(a) of title 5, United States Code; or

(C) a position in the executive branch of the Government of a confidential or policy-determining character under schedule C of subpart C of part 213 of title 5, Code of Federal Regulations.

(b) REPORTING ON CURRENT OR RECENT POLITICAL APPOINTEES APPOINTED TO COVERED CIVIL SERVICE POSITIONS.——

(1) ANNUAL REPORT.—Except as provided in paragraph (2), the Director of the Office of Personnel Management shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Oversight and Government Reform of the House of Representatives an annual report regarding requests by agencies to appoint political appointees or former political appointees to covered civil service positions. Each report shall cover one calendar year and shall—

(A) for each request by an agency that a political appointee be appointed to a covered civil service position during the period covered by the report, provide—

(i) the date on which the request was received by the Office of Personnel Management;

(ii) subject to subsection (c), the name of the individual and the political position held by the individual, including title, office, and agency;

(iii) the date on which the individual was first appointed to a political position in the agency in which the individual is serving as a political appointee;

(iv) the grade and rate of basic pay for the individual as a political appointee;

(v) the proposed covered civil service position, including title, office, and agency, and the proposed grade and rate of basic pay for the individual;

(vi) whether the Office of Personnel Management approved or denied the request; and

(vii) the date on which the individual was appointed to a covered civil service position, if applicable; and

(B) for each request by an agency that a former political appointee be appointed to a covered civil service position during the period covered by the report, provide—

(i) the date on which the request was received by the Office of Personnel Management;

(ii) subject to subsection (c), the name of the individual and the political position held by the individual, including title, office, and agency;

(iii) the date on which the individual was first appointed to any political position;

(iv) the grade and rate of basic pay for the individual as a political appointee;
(v) the date on which the individual ceased to serve in a political position;
(vi) the proposed covered civil service position, including title, office, and agency, and the proposed grade and rate of basic pay for the individual;
(vii) whether the Office of Personnel Management approved or denied the request; and
(viii) the date on which the individual was first appointed to a covered civil service position, if applicable.

(2) QUARTERLY REPORT IN CERTAIN YEARS.—In the last year of the term of a President, or, if applicable, the last year of the second consecutive term of a President, the report required under paragraph (1) shall be submitted quarterly and shall cover each quarter of the year, except that the last quarterly report shall also cover January 1 through 20 of the following year.

(c) NAMES AND TITLES OF CERTAIN APPOINTEES.—If determined appropriate by the Director of the Office of Personnel Management, a report submitted under subsection (b) may exclude the name or title of a political appointee or former political appointee—
(1) who—
(A) was requested to be appointed to a covered civil service position; and
(B) was not appointed to a covered civil service position; or
(2) relating to whom a request to be appointed to a covered civil service position is pending at the end of the period covered by that report.

SEC. 5. REPORT ON REGULATIONS PROMULGATED NEAR THE END OF PRESIDENTIAL TERMS.

(a) DEFINITIONS.—In this section:
(1) The term “covered presidential transition period” means each of the following:
(B) The 120-day period ending on January 20, 2009.
(C) The 120-day period ending on January 20, 2017.
(2) The term “covered regulation” means a final significant regulatory action promulgated by an Executive department.
(3) The term “significant regulatory action” means any regulatory action that is likely to result in a rule that may—
(A) have an annual effect on the economy of $100,000,000 or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;
(B) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
(C) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or
(D) raise novel legal or policy issues.
(4) The term “Executive department” has the meaning given that term under section 101 of title 5, United States Code.
(b) REPORT.—
(1) IN GENERAL.—The Comptroller General of the United States shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Oversight and Government Reform of the House of Representatives a report regarding covered regulations promulgated during each covered presidential transition period.

(2) CONTENTS OF REPORT.—The report required under paragraph (1) shall, to the extent feasible, for each covered presidential transition period—

(A) compare the number, scope, and impact of, and type of rulemaking procedure used for, covered regulations promulgated during the covered presidential transition period to the number, scope, and impact of, and type of rulemaking procedure used for, covered regulations promulgated during the 120-day periods ending on January 20 of each year after 1996, other than 2001, 2009, and 2017;

(B) determine the statistical significance of any differences identified under subparagraph (A) and whether and to what extent such differences indicate any patterns;

(C) evaluate the size, scope, and effect of the covered regulations promulgated during the covered presidential transition period; and

(D) assess the extent to which the regularly required processes for the promulgation of covered regulations were followed during the covered presidential transition period, including compliance with the requirements under—

(i) chapter 8 of title 5, United States Code (commonly known as the “Congressional Review Act”);

(ii) the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 601 note);

(iii) sections 202, 203, 204, and 205 of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1532–1535);

(iv) chapter 6 of title 5, United States Code (commonly known as the “Regulatory Flexibility Act”); and

(v) chapter 35 of title 44, United States Code (commonly known as the “Paperwork Reduction Act”).

SEC. 6. ANALYSIS OF THREATS AND VULNERABILITIES.

(a) IN GENERAL.—Not later than February 15, 2016, the Secretary of Homeland Security shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committees on Oversight and Government Reform and Homeland Security of the House of Representatives a report analyzing the threats and vulnerabilities facing the United States during a presidential transition, which—

(1) shall identify and discuss vulnerabilities related to border security and threats related to terrorism, including from weapons of mass destruction;

(2) shall identify steps being taken to address the threats and vulnerabilities during a presidential transition; and

(3) may include recommendations for actions by components and agencies within the Department of Homeland Security.
(b) Form.—The report submitted under subsection (a) shall be prepared in unclassified form, but may contain a classified annex.

Approved March 18, 2016.
Mr. Michael Plunkett  
President & CEO, PostCom Association for Postal Commerce  
1800 Diagonal Road, Suite 600  
Alexandria, VA  22314-2840

Mike,

This letter is in response to your March 31, 2020, co-signed letter regarding the impact of the COVID-19 pandemic on the mailing industry.

The Postal Service understands the profound impact that the pandemic is having on our industry, and the economy generally. Indeed, due to the slowdown in economic activity caused by the pandemic, we are experiencing very significant declines in mail volumes. The end result is that the Postal Service faces a near-term liquidity crisis that threatens our ability to continue providing our critical services, which are more important than ever as Americans shelter in place, work from home, or otherwise practice social distancing.

While the $10 billion of additional borrowing authority provided in the recent CARES Act was a good start, it is not sufficient by itself to address this liquidity crisis, meaning further immediate action on the part of Congress and the Administration is required. The Board of Governors has unanimously approved a set of recommendations to the Administration and Congress for short-term financial relief that is designed to ensure that the Postal Service can continue to serve the essential needs of the American people as a part of the nation’s critical infrastructure.

We have carefully considered each of the proposals in your letter regarding steps you wish the Postal Service to take concerning our prices and payment terms. After this deliberation, management has determined that the Postal Service is not in a position to adopt an across-the-board decrease in prices, to change our requirement that postage be paid at the time of mailing, or to suspend the July increase in self-declared rates for Inbound Letter Post small packetsany of those proposals at this time. Given our dire liquidity situation, our focus is and must be on taking every step we can to protect our ability to continuing providing our essential services to the American people.

Be assured that the Postal Service recognizes the importance of a thriving mailing industry to our long-term financial sustainability. We are analyzing the appropriateness of working on potential options to encourage mailers to return to the mail as our situation stabilizes, and would like to include the mailing industry in the development of potential solutions.

We sincerely wish you and your members the best as we all navigate these difficult and uncertain times. We are committed to ensuring the Postal Service remains able to provide the mailing industry with the prompt, reliable, and efficient postal services you and your members have come to expect, and that you continue to need now and in the future.

Sincerely,
Mr. Michael Plunkett  
President & CEO, PostCom  
Association for Postal Commerce  
1800 Diagonal Road, Suite 600  
Alexandria, VA 22314-2840

Mike,

This letter is in response to your March 31, 2020, letter regarding the impact of the COVID-19 pandemic on the mailing industry.

The Postal Service understands the profound impact that the pandemic is having on our industry, and the economy generally. Indeed, due to the slowdown in economic activity caused by the pandemic, we are experiencing very significant declines in mail volumes. The end result is that the Postal Service faces a near-term liquidity crisis that threatens our ability to continue providing our critical services, which are more important than ever as Americans shelter in place, work from home, or otherwise practice social distancing.

While the $10 billion of additional borrowing authority provided in the recent CARES Act was a good start, it is not sufficient by itself to address this liquidity crisis, meaning further immediate action on the part of Congress and the Administration is required. The Board of Governors has unanimously approved a set of recommendations to the Administration and Congress for short-term financial relief that is designed to ensure that the Postal Service can continue to serve the essential needs of the American people as a part of the nation’s critical infrastructure.

We have carefully considered each of the proposals in your letter regarding steps you wish the Postal Service to take concerning our prices and payment terms. After this deliberation, management has determined that the Postal Service is not in a position to adopt any of those proposals at this time. Given our dire liquidity situation, our focus is and must be on taking every step we can to protect our ability to continuing providing our essential services to the American people.

Be assured that the Postal Service recognizes the importance of a thriving mailing industry to our long-term financial sustainability. We are working on potential options to encourage mailers to return to the mail as our situation stabilizes, and would like to include the mailing industry in the development of potential solutions.

We sincerely wish you and your members the best as we all navigate these difficult and uncertain times. We are committed to ensuring the Postal Service remains able to provide the mailing industry with the prompt, reliable, and efficient postal services you and your members have come to expect, and that you continue to need now and in the future.

Sincerely,
March 31, 2020

The Honorable Cory A. Booker
United States Senate
Washington, DC  20510-3007

Dear Senator Booker:

This responds to your March 25 letter to Postmaster General Megan J. Brennan, cosigned by several of your colleagues, regarding postal operations.

I want to assure you that the U.S. Postal Service is marshalling all possible resources to meet the many challenges posed by the COVID-19 pandemic. We have established a dedicated COVID-19 Command Response leadership team to direct employee, operational, business, and customer continuity efforts during this extraordinary time. The safety and well-being of our employees and our customers is our highest priority. We are closely following the guidance of the Centers for Disease Control and Prevention (CDC) and other public health authorities, and working to provide our employees with the most up-to-date guidance.

In addition to sharing CDC’s guidance on ways to avoid contracting and spreading the virus, the Postal Service is providing employees and customers with information regarding the safety of mail and packages. Both the CDC and the World Health Organization (WHO) have indicated there is no evidence the virus is being spread through the mail. According to WHO, the likelihood of an infected person contaminating commercial goods is low, and the risk of catching the virus from a package that has been moved, traveled and exposed to different conditions and temperatures is also low. Surgeon General Jerome M. Adams has also specifically stated there is no evidence that the virus is being spread through the mail.

As an organization of 630,000 employees throughout the country we have had employees test positive for COVID-19 and we are closely tracking those individuals and establishing contacts and a working relationship with local state or municipal Health Departments in those situations. We note that the percentage of postal employees who have tested positive for the virus is consistent with the percentage of Americans nationwide who have tested positive, even though most of our employees cannot shelter in place and must continue to go to work each day. Their attendance enables the Postal Service to carry out its essential function of accepting, processing, transporting, and delivering mail, including important governmental information and benefits such as Census materials, social security checks and materials advising the public about COVID-19; ballots and political mail; transactional mail that is essential to the functioning of our economy; and packages containing vital necessities like prescription medicines and many other goods purchased online.

In addition to delivering for our customers, the Postal Service is working to keep them informed through educational posters in Post Office lobbies, communications on digital message boards at large Post Offices, service alerts on usps.com, and special messages communicated through Informed Delivery, a notification service that allows residential customers to receive digital previews of their incoming mail.

Please see the following responses to the specific questions in your letter:

1. What preventative steps is the USPS taking to ensure its employees do not contract COVID-19? How far apart are employees stationed from one another at distribution and processing centers?

   The Postal Service is continuing to provide employees with information to protect themselves during the pandemic, including special internal and external website pages with information sheets from the CDC, videos and other resources. The Postal Service is also regularly updating employees through
articles in postal news publications, messages on video monitors inside postal facilities, and by way of Stand-Up talks with our employees, which our managers and supervisors are instructed to provide only in ways that assure proper social distancing between employees.

The Postal Service also makes gloves, sanitizer, and disinfectant available to our employees. While we have experienced problems in some locations with supply, the Postal Service is constantly monitoring the situation and aggressively restocking these materials. In addition, the Postal Service will provide surgical masks to any employee who requests one. Our managers and supervisors have also been instructed to immediately provide a surgical mask to anyone who is exhibiting symptoms potentially related to COVID-19. If an employee exhibiting such symptoms does not then voluntarily agree to go home and take advantage of our pandemic liberal leave policy, they will be ordered to leave the facility. The CDC has not recommended that healthy individuals should wear masks to protect themselves from COVID-19 and we have therefore not made wearing one mandatory. Universally issuing masks to all our employees would exhaust our existing supply and create a situation in which the Postal Service would need to compete with medical professionals for the scarce supplies that they must utilize in caring for COVID-19 patients.

While the majority of Postal Service employees must be physically present to fulfill their duties, we recognize that many of our employees can work remotely. As part of our enterprise-wide effort to increase social distancing to the greatest extent possible, the Postal Service has expanded its telework policy to include a larger number of employees during the pandemic and allowing for up to five days of telework each workweek.

With specific regard to distribution and processing centers we have issued instructions to managers and supervisors to reconfigure operations wherever possible to insure six feet of distance between employees, with specific advice regarding our common manual or machine operations, motorized material moving equipment operations, break areas, common areas, etc. A specific mandatory stand up talk for employees has been issued with regard to their interactions with contractor employees who operate trucks making deliveries and pickups at our docks to insure proper social distancing in those situations. This process of adjusting the complex operations in our many distribution and processing centers around the country in order to meet social distancing guidelines is ongoing. We will continue to monitor and adapt our efforts as we receive further advice from the CDC and others and we are engaging in negotiations with our Unions with regard to temporary changes being made in our collective bargaining agreements that will allow us to more successfully achieve proper social distancing. We are being transparent about all of the ongoing instructions, guidance and related negotiated agreements, posting them on our internal website under a COVID-19 heading that we regularly direct our employees to review. The more our employees become aware of the instructions, guidance and agreements, the more involved they will become in making sure all of our facilities are as safe as possible for everyone.

2. What precautions is the USPS taking for mail that has to be delivered to those who are at a heightened risk, including the elderly and those who are immunocompromised?

We recognize that the close proximity and additional handling that occurs when employees must ask customers for a signature or government issued identification creates heightened health risks during the pandemic. To reduce those risks, we are temporarily modifying customer signature capture procedures for the MDD sign-on-glass feature, PS Form 3811 (Domestic Return Receipt), PS Form 3849 (We ReDeliver for You), and on any hard-copy receipt items usually signed by customers. Effective immediately and until further notice, we have asked our carriers to follow the temporary process below for signature service items:

- Avoid ringing the doorbell when possible. Knock on the customer’s door. Avoid areas that may be frequently touched when knocking.
- While maintaining a safe, appropriate distance, request the customer’s first initial and last name.
• Using the MDD, scan the mail piece barcode, select Delivered and answer the prompted questions. Enter the customer’s first initial and last name when prompted for name.
• When prompted for the customer to sign the MDD’s screen, employees are to print their own initials (not a signature), route number and notate C19 on the screen in lieu of the customer’s signature.
• For Return Receipts and other hard copy items, enter the customer’s first initial and last name in the Signature box of the form.
• For PS Forms 3811 and 3849, employees are to print their own initials (not a signature), route number and notate C19 in the “Received by” or “Printed Name” section, dependent on the form. With the PS Form 3849, scan the completed form following the normal process to finalize the delivery.
• For increased safety, politely ask the customer to step back a safe distance or close the screen door/door so you may leave the item in the mail receptacle or appropriate location by the customer door.
• If there is no response, follow the normal Notice Left process.
• If there are delivery points on your route where social distancing recommendations are difficult to follow, please advise your supervisor so alternative delivery methods can be explored.

Specifically in response to senior centers or other facilities or communities that have chosen to restrict entrance onto their property during the pandemic in some fashion that prevents our letter carriers from delivering to individual boxes, we have designed several alternate means by which the Postal Service is willing to accommodate delivery:

1) Customers may opt to redirect to a temporary mail receptacle inside or outside their home or business.
2) Customers may place their mail on hold at the Post Office servicing their address. Mail and parcels can be held up to 30 days and will be available for customer pickup.
3) Customers may redirect all mail to an alternate location.

3. Will the USPS temporarily close, and deep clean, the appropriate distribution and processing centers as well as carrier cars in the event a USPS employee tests positive for COVID-19?

The CDC recommends cleaning frequently touched surfaces and commonly shared items at least daily with routine cleaning agents (e.g., detergents, spray cleaners, and sanitizers). Based on CDC guidance the Postal Service has issued a Maintenance Management Order (MMO) that details those cleaning requirements, infection-control strategies, and recommended products, as well as the surfaces and areas that require cleaning, and the frequency with which these tasks are required during the pandemic. When an employee who has worked in the facility tests positive a full facility cleaning is conducted by our maintenance staff, again as based on CDC guidance. That cleaning generally does not require us to close the facility given the safe types of cleaning products being used because our maintenance staff can clean the facility section by section in conjunction with our operations. However, if there are issues with the availability of postal maintenance staff needed to complete the full facility cleaning expeditiously, we can and have brought in certified private cleaning companies that we maintain under contract. In those instances we may temporarily close the facilities to accomplish the cleaning efficiently. We continue to monitor all CDC guidance in this area and will adapt the MMO to any updates.

Postal managers are making every effort to have employees utilize the same delivery vehicle daily. Carriers have been advised to clean the frequently touched surfaces in their assigned vehicle using a household disinfecting spray or wipe, to wash/clean their hands before and after driving their vehicle, and to specifically make sure they do so if anyone who has driven or otherwise used their vehicle
even displays some potential symptoms of COVID-19. Disinfectant cleaner and gloves are made available for this purpose.

4. How many employees typically gather together for the USPS’s daily service talk on health and safety protocols? Are employees a minimum of six feet apart during these daily huddles?

Following guidance issued by the White House and the CDC on social gatherings, we stagger times for stand up talks with smaller groups if they are held indoors and/or hold them outside for larger groups if possible to insure that social distancing is taking place and we remind everyone to avoid all close contact (no less than six feet) with each other. If necessary we allow stand up talks to take place over intercoms or by other electronic means. A Memorandum of Understanding just completed with the National Letter Carriers allows for the staggering of scheduled route start times in order to allow for smaller group stand up talks; staggered arrivals at timeclocks, staggered departures from office duties to street duties, etc.

5. Will USPS agree to provide full pay to high risk individuals, or those who live with high risk individuals, for the duration of the pandemic?

The Postal Service has instituted a liberal leave policy during the Pandemic and is actively encouraging all employees who think they might be sick or that are developing symptoms potentially related to COVID-19 to stay at home and take leave. The liberal leave policy also allows employees to freely utilize leave available to them without fear of reprisal, including if they choose in voluntarily complying with local shelter in place or travel restrictions that they would otherwise be exempt from as part of our workforce. Specific actions have been taken to allow for the use of available sick leave for dependent care leave for purposes of caring for individuals that they live with who are impacted by the pandemic, including children who are out of school. No provision has been made to pay employees who are not at work after their leave has been exhausted.

6. Will the USPS provide emergency sick leave beyond normal accrued leave to all employees, including those who have no contractual right to leave, in the event they contract or are suspected to contract COVID-19?

With the passage of the Families First Coronavirus Response Act (FFCRA) all employees will receive 80 hours of emergency sick leave above and beyond what they otherwise have accrued or have available to them under postal regulations or collective bargaining agreement, to be utilized in all circumstances set forth in the guidance issued by the Department of Labor (DOL), including if they contract or are suspected of contracting COVID-19. DOL guidance also provides that there can be no reprisal for the use of this leave, which would already be true under the Postal Service pandemic leave policy.

7. How will the USPS implement new procedures for delivery and pickup that allow employees and customers to avoid direct contact?

As described in detail in the response to Question 2, the Postal Service has implemented a temporary modification to mail handling procedures for mail that requires customer signatures, and provided alternate delivery options for those who choose not to receive their mail in the normal fashion. To practice social distancing in our retail lobbies, we place social distancing signage on the outer and inner lobby doors, utilize every other window station when feasible, and place floor tape in the queue line (6 feet apart) and at the retail counter positions (3 feet away from the counter to create 6 feet of distance between the customer and the window clerk). In addition, our retail associates follow a script and ask customers to help us adhere to CDC guidelines by practicing social distancing of at least 6 feet. Smaller retail offices have customers wait outside in Post Office Box lobby spaces and
enter the retail unit one at a time. We are also now planning for the procurement and deployment of sneeze guards on our counters between clerks and customers.

The Postal Service is committed to ensuring the safety and well-being of our employees and the communities we serve during the COVID-19 pandemic. You may be assured that we will continue to follow the strategies and measures recommended by the CDC and public health departments and continually stay aware of any updates in their guidance and implement them as soon as possible.

If I can be of assistance in other postal matters, please let me know.

Sincerely,
Dear Speaker Pelosi, Minority Leader McCarthy, Majority Leader McConnell, and Minority Leader Schumer:

The coronavirus crisis is wreaking havoc on the U.S. Postal Service. Without immediate help, the Postal Service — a vital staple of American society since 1775 — could cease to function by this summer. This crisis is also affecting the State of New York more than any other. There were 287 confirmed cases of coronavirus and 14 deaths among postal workers in New York as of April 20, 2020.¹

As a direct result of the coronavirus crisis, first class and business mail volume across the country has dropped at an alarming rate. Mail volume is down by more than 30% from the same period last year. Over the next ten years, the Postal Service estimates that losses caused by the coronavirus crisis would be $54 billion.²

This is a national emergency. The American people rely on the Postal Service to deliver crucial goods and services every day, including more than a billion life-saving medications last year alone, millions of economic stimulus checks and unemployment benefits to help during this crisis, and 2020 Census forms for every household in America.

In New York, the Postal Service delivers to 7.7 million addresses and has more than 1,800 Post Offices. In our state, the Postal Service employed 44,675 people and paid close to $3

---

¹ Email from the Office of Congressional and Intergovernmental Affairs, U.S. Postal Service, to Committee on Oversight and Reform (Apr. 20, 2020).

² Briefing by Megan J. Brennan, Postmaster General and Chief Executive Officer, U.S. Postal Service, to Committee on Oversight and Reform (Apr. 9, 2020).
billion in wages in 2018.\textsuperscript{3} New York also will rely heavily on the Postal Service to conduct its primary on June 23, 2020, during which no-excuse absentee ballots will be accepted.\textsuperscript{4}

The Postal Service is a fundamental component of America’s economic infrastructure, providing affordable, universal delivery of mail and e-commerce packages to more than 160 million households and businesses. The Postal Service propels a $1.6 trillion mailing industry that employs 7.3 million people. It does all of this while operating as a business and receiving next to nothing in taxpayer dollars.\textsuperscript{5}

Both Democrats and Republicans supported large infusions of liquidity for other industries and companies that are critical to our nation’s economy, and we must do the same now to save the Postal Service.

The Postal Board of Governors has asked for a package that includes $25 billion in emergency appropriations to offset coronavirus-related losses, $25 billion for “shovel-ready” projects to modernize the Postal Service, and access to $25 billion in unrestricted borrowing authority from the Treasury.\textsuperscript{6}

To be clear, these requests were put forth unanimously by a Board of Governors with a Republican majority—all of whom were appointed by President Trump.

The Postal Service is an indispensable component of America’s critical infrastructure, and its workers are on the frontlines every single day delivering information and packages to the American people. We strongly support emergency funding for the Postal Service and urge you to do the same.

Sincerely,

Carolyn B. Maloney

Peter T. King

SEC. ___. UNITED STATES POSTAL SERVICE.

(a) Additional Borrowing Authority.—

(1) IN GENERAL.—Notwithstanding any other provision of law, after the date of enactment of this Act—

(A) the United States Postal Service is authorized to borrow money from the Treasury in an amount not to exceed $25,000,000,000 (in addition to any other borrowing in which the Postal Service is authorized to engage) to carry out the duties and responsibilities of the Postal Service, including those under title 39, United States Code; and

(B) the Secretary of the Treasury shall lend up to such amount, without charging any administrative fees, at the request of the Postal Service.; and

(C) any purchase by the Secretary of the Treasury of obligations issued by the Postal Service, either as required by this subsection or pursuant to section 2006 of title 39, United States Code, shall be subject to the terms and conditions of the note purchase agreement between the Postal Service and the Federal Financing Bank in effect on September 29, 2018 (subject to any modifications on which the Postal Service and the Secretary may mutually agree, pursuant to section 2006(a) of title 39, United States Code), except that no expiration date provided in such note purchase agreement shall apply.

(2) REPEAL OF FISCAL YEAR BORROWING LIMIT.—Section 2005(a)(1) of title 39, United States Code, is amended by striking “In any one fiscal year,” and all that follows through the period.

(b) Prioritization of Delivery for Medical and Other Essential Purposes During COVID–19 Emergency.—Notwithstanding any other provision of law, the United States Postal Service—

(1) shall prioritize delivery of postal products for medical and other essential purposes during the emergency involving Federal primary responsibility determined to exist by the President under section 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5191(b)) with respect to the Coronavirus Disease 2019 (COVID–19);

(2) may establish temporary delivery points, in such form and manner as the Postal Service determines necessary, to protect employees of the Postal Service and individuals receiving deliveries from the Postal Service; and

(3) may institute flexible delivery, similar to the delivery flexibility utilized by the Postal Service after natural disasters or other emergency situations, in such form and manner as the Postal Service determines necessary, in the event operations or employees of the Postal Service are impacted by the COVID–19 emergency described in paragraph (1).

(2) may establish temporary delivery points, in such form and manner as the Postal Service determines necessary, to protect employees of the Postal Service and individuals receiving deliveries from the Postal Service; and

(3) may institute flexible delivery, similar to the delivery flexibility utilized by the Postal Service after natural disasters or other emergency situations, in such form and manner as the Postal Service determines necessary, in the event operations or employees of the Postal Service are impacted by the COVID–19 emergency described in paragraph (1), to the extent that normal delivery frequency is no longer feasible.
Essential Service Talking Points

• The Postal Service is mandated by statute to operate “as a basic and fundamental service provided to the people by the Government of the United States, authorized by the Constitution, created by an Act of Congress, and supported by the people.” 39 U.S.C. §101(a).

• The Postal Service carries out an essential function of the federal government and provides critical government services as part of the National Continuity Policy (established pursuant to a series of Presidential Policy Directives).
  
  o Under National Security Presidential Directive 51, Departments and Agencies were directed to identify Primary Mission Essential Functions (PMEF) they provide that support the eight National Essential Functions of the federal government which need to continue in any crisis to ensure Continuity of Government (COG).
  
  o In 2009, the federal government approved the Priority Mission Essential Function of the Postal Service to “deliver postal services to the American public.” This PMEF supports National Essential Function 8 to provide “Critical Government Services.”
  
  o On January 9, 2020, the National Security Council approved maintaining USPS PMEF#1 “Deliver Postal Services” because it was assessed as critical for the continuous performance of National Essential Function 8 to provide “Critical Government Services.”
  
  o The Postal Service relies heavily on our contractors, suppliers, and industry partners for operations, and they are likewise critical to the provision of this essential function.

• The Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency (CISA) issued guidance on March 19, 2020, which identifies “postal and shipping workers” as essential to critical infrastructure.
  
  o CISA explained that promoting the ability of essential critical infrastructure workers “to continue to work during periods of community restriction, access management, social distancing, or closure orders/directives is crucial to community resilience and continuity of essential functions.”
  
  o White House Guidance further provides that if individuals work in a critical infrastructure industry, as defined by the Department of Homeland Security, they have a responsibility to maintain their normal work schedule, while following CDC guidance to protect individuals’ health at work.
- The DHS guidance is not specific to the Postal Service, but rather postal and shipping workers. This should include our contractors, suppliers, and industry partners.

- Regarding industry:
  
  - CISA materials recognize that the postal and shipping industry moves “essential paper transactions” on which other critical infrastructure sectors like commercial facilities and financial services rely.
  
  - In addition, the Postal Service is used to deliver important governmental information, such as census and CDC materials, and ballots.
  
  - Our mailing and printing industry partners are vital because they print and mail these items, and hence ensure that the government and businesses can access the mail.
  
  - Our industry partners are also important in ensuring the efficiency of our package delivery network, through which we deliver vital goods.
Dear Postal Executives:

These are challenging and unprecedented times for our Nation, and I want to first express my gratitude for your leadership and unwavering commitment to the Postal Service and the American people. I am deeply inspired and moved in awe of the unwavering resolve of all of our employees under such adverse circumstance. Their dedication to ensure the Postal Service meets the critical needs of the American public during this unprecedented COVID-19 pandemic is what makes us all proud to be part of the Postal team. As we lead our organization to deliver through this challenge, it is important to remember the overarching principles that must guide our decision-making over the coming weeks.

It is imperative that we reinforce with our employees to reiterate to our employees, that together we are providing a vital public service for the American people. The continued provision of postal services during times of emergency is designated as an essential function under federal law. Further, postal workers are designated by the Department of Homeland Security as a part of the nation’s critical infrastructure. Every day, the men and women of the Postal Service accept, process, transport, and deliver vitally important mail and packages. Guidance issued by the Administration and the Centers for Disease Control and Prevention (CDC) has stressed the importance and special responsibility that critical infrastructure industries, such as the United States Postal Service, have to maintain normal provision of services during this emergency. During difficult times like these, the value of the Postal Service’s mission to bind the Nation together is never more evident. I am tremendously impressed and grateful for the way our postal family responds during times of crisis, and all who step up to the challenge can be justly proud.

That said, it is equally important to recognize that our collective service in support of our countrymen during these difficult times for our nation is made up of the individual efforts of each of the men and women who work for the Postal Service. We must therefore also remember that achieving our mission depends fundamentally upon the health and well-being of our employees. For that reason, within the context of our critical mission, we must do everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To ensure that we do so, the COVID-19 Command Response team at Headquarters is working closely with the Department of Health and Human Services, the CDC, and other public health officials to receive their latest guidance on appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include:

- Updating our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements. We have entered into MOUs with the unions and management associations to provide 80 hours of paid leave to employees, including non-career employees, for issues related to COVID-19, and have expanded the definition of Sick Leave for Dependent Care for all employees to deal with the cascading closures of primary and secondary schools across the country.

- Working to overcome the challenges in the supply chain to ensure that our employees have access to hand sanitizer, and receive surgical masks and gloves upon request. We have shipped 15 million masks throughout the country to ensure that they are...
available for our employees, and are working tirelessly to keep the supply chain for critical personal protective equipment flowing in the face of national challenges.

- Reinforcing workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing and risk minimization. We have implemented measures at retail facilities and mail processing facilities to ensure appropriate social distancing, including through signage, floor tape, and "cough/sneeze" barriers. We have suspended the use of mPOS and Lobby Assistants when needed to ensure social distancing. We have changed delivery procedures to eliminate the requirement that customers sign the MDD for delivery.

- Updating our cleaning policies to ensure that all cleaning occurs in a manner consistent with CDC guidance relating to this pandemic.

- Expanding the use of telework for those employees who are able to perform their jobs remotely.

- Issuing a daily cadence of Stand-Up Talks, articles, videos, and other communications to ensure employees have the latest information and guidance.

As leaders, it is incumbent on us to ensure that we communicate all of this information to our employees, and that we follow the new guidelines and policies we are establishing. We want to continually reinforce the message to our employees that while together we will continue to provide our essential public service to America as a part of the nation’s critical infrastructure, we are also fully committed within those confines we will do all we can to keep our people safe.

That said, I recognize that, as the pandemic unfolds, adjusting operations is going to be necessary in many areas. In particular, we anticipate that the need to flex operations may arise to account for absent employees, and that such adjustments will likely have temporary service impacts. You have the same discretion as in any other emergency situation to adjust local operations as you determine necessary to account for such contingencies, and we will rely on your good judgment to manage the day. Follow your localized continuity of operations plans, and remember that we have an obligation to continue providing our normal levels of service to the American people to the maximum extent possible. In this regard, remember that a key strength of our organization is our stabilizing role in a crisis: the public takes confidence from our regular, daily role in their communities.

Our lives have changed dramatically over the last several weeks, and as we adapt to the challenges posed by COVID-19, we cannot forget that in this crisis, like no other, our customers are counting on us as their vital link to the medicines, critical goods, and important information that they will need during these difficult times. I am confident that we will protect and maintain our customers’ trust, and that we will make America proud.

Thank you for your continued leadership and dedication as we all confront the realities of this pandemic.
Dear Postal Executives:

These are challenging and unprecedented times for our Nation, and I want to first express my gratitude for your tremendous efforts to ensure that the Postal Service continues to meet the needs of the American public during the COVID-19 pandemic. As we lead our organization, it is important to remember the overarching principles that must guide our decision-making over the coming weeks.

First, it is critical that we continue to remember, and to reiterate to our employees, that we are providing a vital public service for the American people. The continued provision of postal services during times of emergency is designated as an essential function under federal law, and postal workers are part of the nation’s critical infrastructure as designated by the Department of Homeland Security. Every day, the men and women of the Postal Service accept, process, transport, and deliver vitally important mail and packages. Guidance issued by the White House and Centers for Disease Control (CDC) has stressed the importance and special responsibility that critical infrastructure industries have to maintain normal work schedules during this emergency. Indeed, it is during difficult times like these where the value of the Postal Service’s mission to bind the Nation together is most evident.

Second, we must also remember that achieving our mission depends fundamentally upon the health and well-being of our employees. Given our critical public service mission, we cannot shut down or severely curtail our operations. Rather, within this context, we must do everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To ensure that we do so, the COVID-19 Command Response team at Headquarters is working closely with the Department of Health and Human Services, the CDC, and other public health officials to receive their latest guidance on appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include:

- Updating our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements.
- Working to overcome the challenges in the supply chain and ensure that our employees have access to hand sanitizer, masks, and other protective supplies.
- Reinforcing workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing and risk minimization.

As leaders, it is incumbent on us to ensure that we communicate all of this information to our employees, and that we follow the new guidelines and policies we are establishing. We want to continually reinforce the message to our employees that while together we will continue to provide our essential public service to America as a part of the nation’s critical infrastructure, within those confines we will do all we can to keep our people safe.

Third, I recognize that, as the pandemic unfolds, adjusting operations is going to be necessary in many areas. In particular, we anticipate that the need to adjust operations may arise to account for absent employees, and that such adjustments will likely have service impacts. You have the same discretion as in any other emergency situation to adjust local operations as you determine necessary to account for such contingencies. Follow your localized continuity of

Commented [MT]-WD1: Keith/Cal/David, the list below could be substantially expanded. Some additional items to consider are in the “policy change” section of the attached document that Katie prepared. Additional items that Katie did not include would be that we expanded the appropriate use of SLDC to care for a child whose school has closed, and the elimination of the requirement to obtain customer signatures for accountable mail on the MDD device. We also need to mention the provision of personal protective equipment. You can bucket things in some fashion, but I want the list to be longer.
operations plans, and remember that we have an obligation to continue providing our normal levels of service to the American people to the maximum extent possible. In this regard, remember that one of the Postal Service’s strengths as an organization is our stabilizing role in a crisis: the public takes confidence from our regular, daily role in their communities.

Our lives have changed dramatically over the last several weeks, and as we adapt to the challenges posed by COVID-19, we must continually strive to earn the trust and confidence of the public and our employees, just as we have always done. I am confident that we will meet every challenge, and that we will get through this crisis. Thank you for your continued leadership and dedication as we all confront the realities of this pandemic.
Dear Postal Executives:

These are challenging and unprecedented times for our Nation, and I want to first express my gratitude for your tremendous efforts to ensure that the Postal Service continues to meet the needs of the American public during the COVID-19 pandemic. As we lead our organization, it is important to remember the overarching principles that must guide our decision-making over the coming weeks.

First, it is critical that we continue to remember, and to reiterate to our employees, that we are providing a vital public service for the American people. The continued provision of postal services during times of emergency is designated as an essential function under federal law, and postal workers are part of the nation’s critical infrastructure as designated by the Department of Homeland Security. Every day, the men and women of the Postal Service accept, process, transport, and deliver vitally important mail and packages. Guidance issued by the White House and Centers for Disease Control (CDC) has stressed the importance and special responsibility that critical infrastructure industries have a special responsibility to maintain normal work schedules during this emergency. Indeed, it is during difficult times like these where the value of the Postal Service’s mission to bind the Nation together is most evident.

Second, we must also remember that achieving our mission depends fundamentally upon the health and well-being of our employees. Given our critical public service mission, we cannot shut down or severely curtail our operations. Rather, within this context, we must do everything that we can to protect the health and safety of our employees while they are performing their jobs, in a manner consistent with the advice of medical and public health professionals. To ensure that we do so, the COVID-19 Command Response team at Headquarters is working closely with the Department of Health and Human Services, the CDC, and other public health officials to receive their latest guidance on appropriate workplace practices. We are adjusting our policies accordingly, and are continually sharing the latest information throughout our organization. Specific actions we have taken include:

- Updating our leave policies to allow liberal use of leave, and to therefore give our employees the ability to stay home whenever they feel sick, must provide dependent care, or wish to abide by State or local shelter-in-place requirements.
- Working to overcome the challenges in the supply chain and ensure that our employees have access to hand sanitizer, masks, and other protective supplies.
- Reinforcing workplace behaviors to ensure that contact amongst our employees and with our customers reflects the best guidance regarding healthy interactions, social distancing and risk minimization.

As leaders, it is incumbent on us to ensure that we communicate all of this information to our employees, and that we follow the new guidelines and policies we are establishing. We want to continually reinforce the message to our employees that while together we will continue to provide our essential public service to America as a part of the nation’s critical infrastructure, within those confines we will do all we can to keep our people safe.

Third, I recognize that, as the pandemic unfolds, adjusting operations is going to be necessary in many areas. In particular, we anticipate that the need to adjust operations may arise to account for absent employees, and that such adjustments which will likely have service impacts. You have the same discretion as in any other emergency situation to adjust local operations as
you determine necessary to account for such contingencies. Follow your localized continuity of operations plans, and remember that we have an obligation to continue providing our normal levels of service to the American people to the maximum extent possible. In this regard, remember that one of the Postal Service’s strengths as an organization is our stabilizing role in a crisis: the public takes confidence from our regular, daily role in their communities.

Our lives have changed dramatically over the last several weeks, and as we adapt to the challenges posed by COVID-19, we must continually strive to earn the trust and confidence of the public and our employees, just as we have always done. I am confident that we will meet every challenge, and that we will get through this crisis. Thank you for your continued leadership and dedication as we all confront the realities of this pandemic.
Postal Service Efforts and Implementations for COVID-19 Response

Rescue Mission

This week’s PostCom bulletin includes several guest submissions regarding the future of the Postal Service (see below). There are different perspectives represented, not only because the Postal Service seems to draw interest from all corners, but because there is still so much that nobody knows. What we do know is that the Postal Service is already experiencing significant volume losses and that – at least so far – financial assistance from the government has been limited.

We should expect much more debate about the Postal Service and its future in the coming months. At a virtual House Oversight and Government Reform Committee hearing last week, the Postal Service asked Congress for support including:

- A $25Bn appropriation to offset expected revenue losses through FY 2021
- A $25Bn grant for postal modernization investments that likely include new vehicles and facility improvements
- $25Bn in unrestricted borrowing authority

Even when Congress is spending at unprecedented rates, that is a lot of money; $75Bn is more – in nominal terms – than the Postal Service has ever generated in a fiscal year. While there is almost a consensus (there is a very important source of dissent) that the Postal Service is deserving of some support, they’re not likely to get everything they ask for.

For one thing, Congress generally does not dole out billions of dollars without expecting something in return. Corporations and industries that are receiving funding from Coronavirus relief spending are having to accept sometimes burdensome conditions. Furthermore, we are approaching the anniversary of a heated exchange between then-Congressman Mark Meadows and the PMG over the Postal Service’s ten-year plan (link unavailable). If Congress had valid concerns about the future direction of the Postal Service last year, those concerns have probably not lessened in the last twelve months.

Given the looming damage to the US economy from the Coronavirus pandemic, and the importance of the Postal Service, some type of short-
term postal relief is warranted. At the same time, the USPS faces long-
term structural challenges that require careful examination and will
entail balancing of interests among competing stakeholders.
Emergency spending legislation that attempts to prop up the US
economy while simultaneously targeting multiple industries is not the
right vehicle to achieve these twin aims. The Postal Service maintains
that their recent funding request is separate from their ongoing mission
to achieve legislative and regulatory reform. Unfortunately, the decision
makers who will shape the next round of economic relief probably
won’t see it that way, and by asking for so much, USPS risks having its
allies on the Hill use the current crisis to enact half-baked postal reform
that will buy time but little else.

First-Line Supervisor Retention Gets High Marks

The U.S. Postal Service has done a good job of retaining first-line
supervisors, with an average national attrition rate of only 1 percent for
fiscal years (FYs) 2016-2018, but timely hiring and qualifications of
new supervisors are issues management should address, according to
a new audit report. First-Line Supervisor Recruitment and Retention,
19SMG008HR000-R20.

First-line supervisors are a significant portion of the USPS workforce: during FY 2018, the Postal Service had 18,433 permanent first-line
supervisors — 13,049 in retail facilities and 5,384 in mail processing
facilities — with another 4,394 employees detailed to perform
supervisory duties and responsibilities.

In one of a series of audits concerning first-line supervisors, the U.S.
Postal Service Office of Inspector General (OIG) found that despite the
solid retention rate, when vacancies did occur, 88 percent of those
examined were open for more than the within-60-days hiring target.

Also, USPS hiring officials did not complete and maintain required
supporting documentation for 68 percent of first-line supervisor
positions. Missing documentation included signed and dated
requirements matrices that determine whether potential hires met
qualifications. Because this information was missing, the OIG could not
determine whether these first-line supervisors met the qualifications
outlined in vacancy announcements.
Based on this issue, the OIG identified $16.4 million in unsupported questioned costs related to the pay increase for promotion to first-line supervisor. The watchdog group recommended USPS management develop controls to ensure timely hiring and that district and facility officials prepare and maintain hiring documentation as required.

Management agreed with the findings, monetary impact, and need for controls over hiring documentation. But it argued that controls exist now for officials to complete their hiring responsibilities.

**Guest Articles**

**No, Trump Isn’t Trying to Kill the Postal Service**

*Op-ed written by Kevin Kosar, Vice President, Research Partnerships, R Street Institute, a non-profit public policy research organization. This article was originally published on The American Spectator and reprinted with permission. Views and opinions reflected in the article are of the author’s and do not necessarily reflect the views and opinions of PostCom.*

Over the weekend, #postalservice began trending on Twitter. That’s weird, seeing as the Post Office is, well, the Post Office. And I say that as someone who has spent 17 years studying postal policy. (Thank you for your sympathy.)

The Twitter-steria stemmed from a report that the Trump administration opposed giving the U.S. Postal Service (USPS) a bailout. House of Representatives Democrats had tried to slip a more than $30 billion bailout into the Coronavirus Aid, Relief, and Economic Security Act (CARES Act). Trump and company rejected the bill and told Congress they beleaguered agency could have a $10 billion loan instead.

All of this should have been old news — Trump signed the law on March 27. But the Washington Post’s story went viral, with other newspapers and media picking it up. Thence to social media, and then craziness erupted.

Three different conspiracies emerged, and all of them slapped evil horns on the president:

- **Trump wants to bankrupt the agency so he can sell it off and privatize it.**

- **Trump wants to kill the Postal Service to hurt Jeff Bezos, whose Amazon.com uses USPS to deliver some of its parcels.**

- **Trump wants to shut down the Postal Service so that people cannot vote by mail.**

The outrage has been burning for days, stoked by the usual suspects, like John Dean and the Daily Kos.

It is difficult to express just how inane these claims are.

For one, hardly anyone wants to privatize the Postal Service. Certainly not President Trump. His postal reform commission expressly rejected privatization. Besides, who exactly would want to buy the Postal Service? It is an
agency with $130 billion in unfunded pension and retiree health-care obligations. By law the USPS has a heavily unionized workforce who every four years negotiate more expensive compensation contracts. And demand for USPS’s services have plunged over the past decade. Mail volume is down more than 30 percent. There is a reason only the USPS delivers paper mail to nearly every home in America along with the Virgin Islands, Guam, and Puerto Rico — it is not lucrative.

And the notion that the president wants the Postal Service to cease operations is so absurd that it should not require comment. But here we are. The president, as everyone knows, really wants to get reelected, and he cares about his ratings. So why exactly would he kill an agency that is, as the Gallup pollsters note, “America’s favorite federal agency”?

Then there is the matter of Trump’s base. He is especially popular among the elderly, veterans, and residents of rural areas. What do they all have in common beyond their affection for Trump? They like the Postal Service and depend on it.

Try closing a rural post office, and rural residents will grab their pitchforks. The elderly depend on the USPS to deliver prescription drugs and the paper mail — often preferred over digital communications. The elderly — and Republicans generally — vote by mail disproportionately. Oh, and by the way, the president himself votes by mail.

Lastly, it also is the case that the USPS hires lots of veterans. The agency reports it has 100,000 of them.

What the Left fails to understand is pretty rudimentary: throwing money at an agency running structural deficits is stupid. Yes, the Postal Service needs an infusion to help it deal with a massive drop in mail volume due to COVID-19.

But more than that, the agency desperately needs reform. The Trump administration gets this point, and in the next few months we may well see a deal where the USPS gets an infusion to help it weather the COVID-19 storm and the changes it needs to survive in the digital 21st century.

Political Mail In A COVID-19 World

Op-ed written by Mark Fallon, President & CEO of The Berkshire Company, an independent management consulting firm that specializes in the print-mail industry. Article was originally published on the Consumer Postal Council’s website and reprinted with permission. Views and opinions reflected in the article are of the author’s and do not necessarily reflect the views and opinions of PostCom.

The first political campaign I worked on took place in 1990. I’d just returned to Massachusetts after serving in the Army. Elections were taking place for state-wide offices, including the governor, attorney general and treasurer. I’d worked in the Massachusetts State House while in graduate school and had met several of the people running for office. While looking for permanent employment, I volunteered for a couple of candidates.

My duties were fairly simple – make phone calls to prospective donors and voters, hold signs outside rallies and assemble mass mailings. Those same functions still take place today, however emails and social media either supplement or replace the phone calls and mailings.

But will those tactics be effective in 2020? Will the COVID-19 pandemic significantly change campaign messaging strategies?

While television ads will continue, the prospective audience is shrinking with on-demand shows and streaming services. Social media remains omnipresent but becomes less trustworthy with each scandal. Cellular service providers have improved detecting spam, reducing the effectiveness of robocalls.
The United States Postal Service (USPS) uses the designation “political mail” for campaigns' marketing mail. Even with the increased use of email and social media, the USPS has seen significant increases in volumes and revenue over the last three election cycles. In 2014, campaigns spent $375 million to send 1.9 billion pieces of political mail. For the 2018 mid-term elections, that increased to over $573 million on three billion pieces.

The reason? Voters find hard-copy mail, delivered to their homes by the USPS, more credible than any other form of advertising — and that includes in-person visits by candidates or campaign workers. Social media ads, phone calls and text messages aren’t considered trustworthy.

Early in this election cycle — the USPS started an aggressive push to promote the use of mail in political campaigns. With a self-described “obsessive, relentless and compulsive” training program, they created a political strategy team. In addition to analysts, key staff have been designated as strategists in each of the seven USPS areas. A special website — deliverthewin.com — was launched.

The USPS has participated in American Association of Political Consultants (AAPC) and Campaigns & Elections (C&E) events with both speaking opportunities and exhibit booths. They’ve also sponsored articles, email blasts, Facebook Live interviews and webinars to promote political mail. As with online shopping, the USPS is showing candidates that physical mail is a key component of omni-channel marketing campaigns.

This sales pitch will hold even more weight during and after the pandemic. Many rallies are being cancelled and there’s uncertainty around future events. Campaigns will have greater than normal challenges to find volunteers willing to walk door-to-door. And even when they do, many doors will remain shut.

These changes don’t mean an automatic “win” for the USPS. Many printers and mail service providers are struggling during the COVID-19 crisis, and some won’t be able to weather the economic downturn. The decline in overall mail volumes has escalated during the shutdown. Planned in-person seminars and similar events have been cancelled.

Working with political consultants, webinars are being scheduled to continue to educate campaign managers. Those are being supplemented with additional online training for service providers through the National Postal Customer Council Advisory Committee. That message will need to be amplified as businesses reopen and the economy recovers.

Political mail won’t replace the volumes of mail lost due to the current crisis. However, fewer pieces mean that what’s delivered will stand out, improving the effectiveness of mail campaigns. That may help politicians see the value of the USPS. In turn, that may gain the USPS political allies for much needed legislative reform.

In 2020, there are 35 Senate races (including two special elections), 435 House of Representatives races, and gubernatorial races in 11 states. Additionally, there are thousands of races for state representatives, mayors and town selectmen. Every candidate needs to get their message out to donors and voters.

It’s up to the USPS to help them see mail as a critical component of their campaign.

Postmaster General Warns House Committee of Dire Consequences Without Congressional Action- Trump’s Own Hand Picked Board of Governors Says USPS Needs $75B

PostalNews Today, Postmaster General Megan J. Brennan provided a video briefing to Members of the Committee on Oversight and Reform on the devastating impact the coronavirus crisis has had on the finances of the Postal Service and the steps Congress and the President must take to ensure continued delivery of essential information, packages, and services. The Postal Service is fighting for its survival, putting in jeopardy the careers and paychecks of its 650,000 employees—as well as the more than $1.7 trillion mailing industry that employs more than 7.5 million people,” Government Operations Subcommittee Chairman Gerald E. Connolly said. “We cannot allow the Postal Service to collapse. To do so would deepen our nation’s economic crisis and eliminate an important lifeline for individuals who rely on the Postal Service’s 1 billion deliveries of lifesaving prescription deliveries and eviscerate the very infrastructure we need to administer the upcoming elections.”

Consumer Price Index Summary

BLS In March, the Consumer Price Index for All Urban Consumers fell 0.4 percent on a seasonally adjusted basis; rising 1.5 percent over the last 12 months, not seasonally adjusted. The index for all items less food and energy fell 0.1 percent in March (SA); up 2.1 percent over the year (NSA).

More Than 600,000 People Sign A Petition Demanding Hazard Pay For Postal Workers After 19 Die Of Coronavirus And 6,000 More Are Forced Into Self-Quarantine Across US

DailyMail More than 600,000 have signed a petition demanding the government give hazard pay to all of its USPS workers continuing to brave the outside during the coronavirus lockdown. It comes as 19 postal workers have died of coronavirus, while 500 have tested positive and another 6,000 have had to self-isolate, USPS leaders told Congress last week. The petition claims that USPS staff have not been given adequate protective equipment as they work 12-hour overtime shifts, packing and loading potentially contaminated packages and letters. ‘As of this present time, there have been upwards of more than 40 confirmed cases of coronavirus within the United States Postal Service,’ the Change.org petition written on March 16 says.

Trump’s War Against The Postal Service Could Have Another Casualty: Tens Of Thousands Of Military Veterans With Disabilities

BusinessInsider The tenuous situation for the Postal Service puts its employees, many of whom are military veterans, in an uncertain position. USPS is one of the largest employers of veterans nationwide and dwarfs its competitors in hiring numbers: Nearly 100,000 military veterans are employed by the agency, or roughly 15% of its entire workforce of 600,000 employees, according to a spokesperson. One internal estimate showed how a subset of veterans could be disproportionately affected by cuts. Though the exact numbers were not immediately available, USPS estimated that at least 60% of its veteran employees have some sort of disability rating.
Postal Workers Say USPS Isn’t Telling Them When Colleagues Test Positive for COVID-19, Despite Promising To

ProPublica The U.S. Postal Service appears to be continuing its checkered response to the coronavirus. Workers across the country say they’re not being informed when colleagues have tested positive for COVID-19, despite a Postal Service policy to do so. At the end of March, after workers complained, the Postal Service told its employees they would be notified if someone “in your workplace is confirmed to have COVID-19.” But workers at 11 locations told ProPublica they found out about cases through colleagues or were only told by management days after word had already gotten out.

NRLCA and USPS Sign MOU Concerning Temporary Workplace Changes to Promote Social Distancing

PostalNews From the National Rural Letter Carriers Association: Your National Board agrees that the social distancing recommendations of the Centers of Disease Control and Prevention (CDC) are important measures which should be practiced as much as possible to slow the spread of the coronavirus (COVID-19). Some of those social distancing recommendations for the workplace include increasing physical space between workers, staggering work schedules, limiting large work-related gatherings and reducing or eliminating travel. With that in mind, the NRLCA and the USPS have agreed to a MOU with temporary changes to promote social distancing. The terms of this MOU will minimize the possibility of exposure to the coronavirus or the possibility of unknowingly spreading the coronavirus to a larger portion of the workforce.

China » China.org

The arrival of the first train of a new postal rail service to Europe here opened up a new reliable and efficient logistics channel between Lithuania and China. Departing from southwest China’s Chongqing Municipality on April 3, the “China Post” CR Express 1st block train, loaded with much-needed medical supplies and 42 TEUs of parcels, arrived on April 12 in Vilnius. The parcels will be later transferred to other European countries. “With this new route, especially during a difficult pandemic period, we are turning a new page towards a closer cooperation to meet consumer expectations — assessing not only delivery time or price, but also environmental requirements,” wrote the minister.

France » BBC

Amazon has been ordered to limit its deliveries in France to essential goods only, amid claims it is failing to protect its workers from coronavirus. A court in Nanterre, near Paris, ordered the online retail giant to deliver only food, hygiene and medical products in the country from Tuesday. This is to allow officials to assess whether Amazon is taking adequate precautions to protect its staff. Amazon has not commented on the court ruling.
India » Post&Parcel

With train and bus services shut, India Post is relying on its own Mail Motor Services (MMS) to carry out delivery services within the state and in adjacent states while airlines are being used to deliver parcels in the metros, reports Hindustan Times. Rajguru Nagar branch sub-post office master Sanita Madaan said the branch had booked 85 parcels of medicine since the lockdown. “Before the lockdown, we rarely received bookings for medicines as people mainly relied on private courier companies but now we deliver medicines on a regular basis. People have medicines delivered within the state and to neighbouring states.”

Ireland » Post&Parcel

An Post, in partnership with Children’s Books, Ireland have distributed a free 24-page #ImagineNation playbook to children all over Ireland to enjoy. The campaign is aimed at helping families confined to their homes by COVID-19. The #ImagineNation playbook is full of drawing, writing and mindfulness exercises from leading Irish children’s authors and illustrators including Oliver Jeffers, Chris Haughton, Sarah Crossan, Don Conroy, Niall Breslin, Niamh Sharkey and many more. The book will be accessible to all children to download as well as being delivered free by An Post to thousands of houses around the country.

Isle of Jersey » Parcel&Post

From today, Jersey Post will be delivering free postcards to all residential addresses to launch its Island-wide, Connecting Jersey campaign. From Tuesday 14 April, every island household will receive two free postcards: • Thank you • Thinking of you. Households can send the cards free of charge to any address in Jersey throughout April.

United Kingdom » Post&Parcel

The UK Drone Delivery Group, the new drone industry initiative, established to provide guidance on the steps required for the UK to accelerate the growth of the UK drone industry, has today released its ‘White Paper’ for public consultation. The White Paper calls for the development of new testing grounds, which are expected to significantly transform the UK’s potential to achieve world-leading status in the fast-moving drone industry.

Zimbabwe » Herald

The country’s postal and courier services is continuing on a downward trend with latest figures showing a 32 percent dip during the year to December 2019 on e-substitution as technology is providing an alternative channel for transmission of information. According to the regulator, the Postal and Telecommunications Regulatory Authority of Zimbabwe (POTRAZ) postal and courier services went down 32 percent to 5.3 billion items in 2019 compared to 7.8 billion recorded in the prior year. The service has halved in the past five years from 10 billion recorded in 2015.

Industry Alert: **New Processes for Bulk Hold Mail and Forwarding Requests by Businesses** The United States Postal Service has implemented two new processes to allow businesses to submit Hold Mail requests in bulk (10 or more), as well as requests to forward mail from many locations (10 or more) to one. The new processes allow businesses with 10 or more requests to provide the Postal Service with an Excel spreadsheet with the addresses and relevant information for their hold or forwarding requests. Businesses must provide the information in a specific Excel file format. The Sales Representative will coordinate directly with the customer to obtain the required information. There are currently no changes to the maximum timeframe for holding mail (30 days). Businesses should contact their Sales Representative if they would like to request Bulk Hold Mail (10 or more) for 30 Days or to Forward Mail from many locations (10 or more) to one.

Industry Alert: **COVID-19 CONTINUITY OF OPERATIONS UPDATE Mailability of Hand Sanitizer Update** The March 28, 2020, Link article titled “Hands Off” described the mailing requirements for hand sanitizers and disinfecting wipes containing flammable alcohols such as ethanol and/or isopropanol (rubbing alcohol). As stated in the article, small quantities of these potentially flammable hand sanitizers and alcohol wipes are permitted in domestic mail via surface transportation. To better support our customers during this period of increased demand, mailers can obtain an exception through the Manager, Product Classification to increase the quantity of these items containing ethyl and isopropanol alcohol sent via surface transportation. Additionally, mailers can also be granted an authorization by the Manager, Product Classification to ship limited quantities of ethanol alcohol in domestic air transportation. As several mailers have been provided with written approvals from the Manager, Product Classification for products that are eligible for domestic air shipments or an increase in quantity limits in surface transport, the information below is provided as a guidance to assist in determining eligible mailings. If a mailer holds a valid authorization or an exception from the Manager, Product Classification, the following criteria must be met upon acceptance of the items:

- Upon their first mailing at each postal facility, the mailer must provide a copy of a signed letter from Headquarters, Product Classification. The letter will contain the mailer's unique approval number and applicable mailing requirements. **Note:** It is suggested that the facility maintains copies of such letters on file for future reference.

- The outer package must have the appropriate text marking “Contains xxx” followed by their assigned unique authorization number that will begin with either HSA, HSB, HSD, HSE or HSS. **Note:** This information is included in the letter and may be hand or type written prominently on the package. Examples of text markings:

  "Contains Air-Eligible Ethyl Alcohol - Authorization No. HSA - xxxxxx"
  "Contains Air-Eligible Ethyl Alcohol - Authorization No. HSB - xxxxxx"
  "Contains Surface Eligible Ethyl Alcohol - Exception No. HSE - xxxxxx"

*It is illegal to reproduce or to distribute without written permission*
Please note that these materials are strictly prohibited in international mail, Army Post Office (APO), Fleet Post Office (FPO) and Diplomatic Post Office (DPO) destinations.

**Industry Alert: International Service Impacts as of April 17, 2020** Effective April 17, 2020, the Postal Service™ will temporarily suspend international mail acceptance to destinations where transportation is unavailable due to impacts related to the COVID-19 pandemic and restrictions into the area. Customers are asked to refrain from mailing items addressed to any of the following countries, until further notice:

- Bermuda
- Cape Verde
- Oman
- South Sudan
- Swaziland (Eswatini)
- Yemen

These service disruptions affect Priority Mail Express International® (PMEI), Priority Mail International® (PMI), First-Class Mail International® (FCMI), First-Class Package International Service® (FCPIS®), International Priority Airmail® (IPA®), International Surface Air Lift® (ISAL®), and M-Bag® items.

For already deposited items, other than Global Express Guarantee (GXG®), Postal Service employees will endorse the items as “Mail Service Suspended — Return to Sender” and then place them in the mail stream for return.

For any returned item bearing a customs form, the Postal Service will, upon request, refund postage and fees on mail returned due to the suspension of service.

For all other returned items not bearing a customs declarations form, the Postal Service will, upon request, refund postage and fees on mail returned due to the suspension of service, or the sender may re-mail them with the existing postage once service has been restored. When remailing under this option, customers must cross out the markings “Mail Service Suspended — Return to Sender.”

Unless otherwise noted, service suspensions to a particular country do not affect delivery of military and diplomatic mail.

USPS is closely monitoring the situation and will continue to update customers until the situation returns to normal. Please visit our International Service Alerts page for the most up to date information: [https://about.usps.com/newsroom/service-alerts/international/?utm_source=residential&utm_medium=link&utm_campaign=res_to_intl](https://about.usps.com/newsroom/service-alerts/international/?utm_source=residential&utm_medium=link&utm_campaign=res_to_intl)

**Industry Alert: UPDATE 23: International Mail Service Disruptions Due to COVID-19** On April 15, 2020, the Postal Service™ received notifications from various postal operators regarding changes in international mail services due to the novel coronavirus (COVID-19).

The following countries have suspended certain mail services:

**Honduras UPDATE:** Empresa de Correos de Honduras (Honducor) has advised that they are extending the suspension of mail services until April 19, 2020, or a later date to be communicated in due course.

**Mauritius UPDATE:** Mauritius Post has advised that they are extending the suspension of mail services until May 4, 2020.
Nepal UPDATE: Nepal Post has advised that they are extending the suspension of mail services until April 30, 2020.

Sri Lanka UPDATE: Department of Posts has advised that they are extending the suspension of mail services until April 20, 2020.

Unless otherwise noted, service suspensions to a particular country do not affect delivery of military and diplomatic mail.

The following countries have announced service disruptions:

Colombia UPDATE: Servicios Postales Nacionales S.A. 4-72, has advised that, owing to the emergency resulting from the spread of the novel coronavirus (COVID-19), there continues to be significant delays in all of its international inbound and outbound letter-post, parcel-post and Express Mail Service (EMS) items.

Georgia UPDATE: Georgian Post has advised that the Government of Georgia has decided to extend the measures aimed at reducing the spread of COVID-19 until May 10, 2020. This includes the suspension of signature service and suspension of service standards.

Ireland UPDATE: An Post, has advised that owing to the cancellation of numerous international flights, it is currently limited in its ability to send outbound mail (letter-post, parcel-post and EMS items) to some countries and ceasing to accept mail destined for those countries until further notice. Details of these destinations can be found at https://www.anpost.com/Coronavirus/Mails-Parcels-services. As of April 15, An Post is sending only letters, large envelopes and packets to the United States; no parcels.

Italy UPDATE: Poste Italiane has advised that the Italian Government has extended the measures aimed at minimizing the spread of COVID-19 until May 3, 2020. This includes the suspension of signature service and service standards; limitations on the size and weight of parcels; and changes to the number delivery attempts that will be made before a package is returned to sender.

Jamaica UPDATE: Jamaica Post has advised that the suspension of service standards has been extended until further notice.

United Arab Emirates UPDATE: Emirates Post has advised that it is carrying out contactless deliveries during the COVID-19 pandemic. Deliveries to the addressee’s home require the courier to confirm the recipient’s name by asking to see ID, recording name and releasing item to recipient.

These service disruptions affect Priority Mail Express International® (PMEI), Priority Mail International® (PMI), First-Class Mail International® (FCMI), First-Class Package International Service® (FCPIS®), International Priority Airmail® (IPA®), International Surface Air Lift® (ISAL®), and M-Bag® items.

The DMM Advisory will continue to update mailers regarding new service disruptions as they are received. For a full list of international service disruptions, please visit https://about.usps.com/newsroom/service-alerts/international/welcome.htm
UPCOMING POSTCOM WEBINARS

Due to the Covid-19 Health Crisis and the importance of distributing critical information to the entire industry, the following webinars will not be limited to members only.

PostCom Webinar on Coronavirus Updates – April 24, 2 pm ET [Register]

May Member Webinar – May 12, 2 pm ET [Register]

Dear Secretary Mnuchin:

During this national emergency, the U.S. Postal Service (USPS) continues to deliver critical goods to every address, including those in hard-hit urban cities as well as difficult to reach rural areas. The services being provided by the Postal Service include the delivery of prescription drugs, household goods, election materials, census material, Coronavirus-related information, testing kits, medical equipment, and eventually vaccines. However, without immediate financial assistance, these services will not continue.

We understand House and Senate negotiators agreed to a $13 billion appropriation during consideration of the CARES Act. We further understand this appropriation was dropped when it was opposed by the Administration. It is now obvious that much more is needed.

Yesterday the USPS Board of Governors (appointed by President Trump), notified Congress that, due to the Coronavirus emergency, it will run out of cash before September 30, the end of this fiscal year (see attached release). The bipartisan Board of Governors requested the following:

- $25 billion emergency appropriation to offset coronavirus-related losses.
- $25 billion grant to fund “shovel-ready” projects to modernize the Postal Service.
- Access to $25 billion in unrestricted borrowing authority from the Treasury.

We write in support of the USPS Board of Governors’ request. In addition, Treasury should never seek to impose operational changes and policy conditions on any of the Postal Service’s new or existing borrowing authorities—changes and policies that by law are set by the USPS Board of Governors and Congress.

The over 600,000 men and women of the Postal Service, who have been on the front lines each and every day, represent the only workforce servicing every single household and open business across the nation. Unfortunately, given the lack of emergency funding, it appears they have been abandoned by the Administration. The Postal Service and the corporate members of the Parcel Shippers Association stand-out with their commitment and execution in support of the administrations efforts to keep the economy moving as it struggles throughout this pandemic.
There is a mistaken impression promoted by at least one competitor that the Postal Service undercharges for its package delivery services. This claim has been widely debunked by independent commissions, experts, and virtually everyone who has looked at it (see attached Bibliography). Unfortunately, the postal task force that you chaired accepted this view, choosing to ignore the information provided by USPS and the Postal Regulatory Commission, and proposed the costing methodology changes advocated by that competitor in its final report.

Now is NOT the time to demand structural changes in the way the Postal Service operates or prices its products as a condition to access funds vital for it to continue the extraordinary service they provide the American people. Now is the time to help the Postal Service do what they have done for over 240 years—to Bind the Nation, Enable Commerce, and most importantly, support the Administration in the economic recovery of this nation.

Sincerely,

Jim Cochrane
Chief Executive Officer
Parcel Shippers Association

April 3, 2020

The Honorable Steven T. Mnuchin  
Secretary  
U.S. Department of the Treasury  
1500 Pennsylvania Ave  
Washington, D.C. 20220

Dear Secretary Mnuchin:

We write with urgent concerns regarding the financial condition of the U.S. Postal Service and the $10 billion loan Congress authorized the Department of the Treasury to provide to the Postal Service in the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The Coronavirus emergency and resulting decline in economic activity have jeopardized the Postal Service’s ability to continue providing essential services to every American. We urge you to make this loan as soon as possible, with terms that respect the Postal Service’s status and authorities as an independent establishment of the executive branch. We cannot afford to lose this vital infrastructure at a time when it is most needed to continue delivering prescription drugs, critical packages to households and businesses, Coronavirus-related information, vote-by-mail materials, testing kits, medical equipment, and eventually vaccines across this nation.

On March 20, the Postal Service notified our Committees that due to the Coronavirus emergency it will “run out of cash due to a potential decline in revenue of $8-$10 billion and may have to limit or cease operations by the end of this fiscal year.” The Postal Service subsequently provided revenue projections indicating that it could lose up to $12.6 billion in revenues this fiscal year as a result of the pandemic. During the Coronavirus pandemic, the Postal Service is incurring additional costs as it continues to provide safe deliveries and services to every member of the public, including costs of additional facility cleanings, purchasing critical supplies, and training staff on new procedures, in addition to regular operating costs.

Meanwhile, the Postal Service continues to provide universal, essential services in every community across the nation, delivering medications, emergency information, home supplies, and more. The Postal Service is a lifeline for seniors and for people in rural areas, who often have less access to other services, particularly during this crisis. Postal workers deliver mail and packages to over 159 million households and businesses each day, including over 1 billion prescriptions last year. Businesses rely on the Postal Service to carry their packages the last

2 See, for example, U.S. Postal Service, How Can We Help?: USPS Coronavirus Updates for Residential Customers (Mar. 24, 2020) (faq.usps.com/s/article/USPS-Coronavirus-Updates-for-Residential-Customers).
mile, particularly in remote and rural areas, as the only carrier that delivers to every single address. Furthermore, the Postal Service is at the center of a $1.4 trillion mailing industry that employs more than 7.5 million people.³

Enacted on March 27, the CARES Act authorizes the Postal Service to borrow up to an additional $10 billion from the Department of the Treasury (Treasury) “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The terms of this loan are to be “mutually agreed upon by the Secretary and the Postal Service.”⁴ In discussions with Senate authorizers regarding these provisions, you indicated that a loan would be made “at the Treasury rate.” This compromise was made with the understanding that Treasury would act swiftly to provide immediate, necessary financial relief to the Postal Service with a loan under practical, commonsense financial terms.

We strongly urge you to make this loan to the Postal Service in a timely manner, under fair terms that comply with the intent of the CARES Act, and with respect to the proper authorities delegated to the Postal Service. Congress maintains the authority to set the policies by which the Postal Service operates, delegated by statute to the Postal Service Board of Governors and the Postmaster General. The Board of Governors has the exclusive authority to direct the exercise of “the power of the Postal Service,”⁵ appoint or remove the Postmaster General, and “direct and control the expenditures and review the practices and policies of the Postal Service.”⁶ We expect the Treasury Department to fully comply with federal statutes and refrain from setting any conditions that would infringe on the Postal Service’s statutory authorities. We cannot afford to compromise this lifeline for seniors, rural areas, and all Americans.

To ensure the terms and conditions that Treasury intends to negotiate with the Postal Service comply with federal statutes and vested authorities, we ask that you provide us with the following documents within one week after the Postal Service requests a loan under the CARES Act:

• The terms and conditions the Treasury will propose to the Postal Service for the exercise of this borrowing authority, as well as any terms and conditions provisionally agreed upon with the Postal Service, including information about any postal policy and/or operational provisions Treasury intends to improperly include as a condition of borrowing;

---
U.S. Department of the Treasury
April 3, 2020
Page 3

- A statement of when Treasury will allow the Postal Service to exercise its borrowing authority; and

- For context regarding the current negotiations, all signed or proposed borrowing agreements (Note Purchase Agreements), as well as all “term sheets” and communications regarding these agreements, between the Postal Service and the Treasury Department since 2018. It is our understanding the last permanent agreement expired in September 2018, and an interim agreement expired in August 2019.

Thank you for your attention to this urgent matter.

Sincerely,

Gary C. Peters
Ranking Member
Senate Committee on Homeland Security and Governmental Affairs

Carolyn B. Maloney
Chairwoman
House Committee on Oversight and Reform

Tom Carper
Ranking Member
Senate Permanent Subcommittee on Investigations

Gerald E. Connolly
Chairman
House Subcommittee on Government Operations
Dear Mike,

Thank you for your email today addressed jointly to the Postal Service and me outlining your organization's concerns with the current pandemic and its impact on the United States Postal Service and the entire mailing community. The Commission well understands those concerns, and recognizes that our nation's postal system is a critical component of America's infrastructure. Indeed, we must do all we can to ensure its viability, particularly in the midst of this world-wide pandemic.

Your letter calls for changes to postal rates and payment collections. By law, the Governors of the Postal Service are charged with setting rates, and the Commission evaluates those rates consistent with statutory requirements. While we have not received any information or request from the Postal Service at this time, to the extent that the Governors propose any such changes, please know that the Commission stands ready to act as expeditiously as possible to efficiently and effectively review any proposals in conformance with existing law.

These are challenging times for the Postal Service and all of our nation. The Commission is committed to continuing uninterrupted in its mission of ensuring the transparency and accountability of the Postal Service, and also fostering a vital and efficient universal mail system on behalf of our fellow Americans.
With best wishes, I am,

Sincerely yours,

[Signature]

USPS
Pricing/Cost Analysis of
Contracts with Amazon & Other Major Customers
Scope of Assignment by Independent Firm v.2

- Analyze the economic terms of the contracts between USPS and its 10 largest package customers for the fiscal years 2017, 2018 and 2019.
- Determine the profitability of the contracts considering fixed and variable costs to determine a) their marginal profitability, and b) their profitability after fully allocating all costs.
- Given its legally and regulatory mandated service, pricing and cost and other obligations, and the competitive environment, determine whether the USPS is pricing these contracts in a fashion designed to optimize both their profitability and the overall profitability of the USPS.
- Provide any additional observations on the costs or profitability of its major package contracts.

Timeline –
April 30 – Receive proposals
May 1 – Proposal evaluation and summary for final selection
May 4 – Award contract

Status Update –

Dear Fellow Shareholders,

2018 was a fabulous year.

It was a year in which all of our business segments and regions delivered powerful top- and bottom-line growth, resulting in double-digit organic revenue growth overall and a fourth consecutive year of adjusted earnings per share growth.

This exceptional performance is the result of the deep commitment of our teams across the globe to seize our future: to listen to our clients deeply, figure out where we have the most value to bring, and invest boldly to take market share and drive ourselves into new adjacencies where we have a right to win.

That success has come because we have committed to change and innovation as the path to an ever brighter future. We have collectively committed to a relentless focus on organic growth by investing boldly behind the aspirations of our people – organic growth that supports enriched service and record numbers of promotions and lateral hires while enhancing shareholder returns. That is the objective we have, and that is the path we are on.

I hope you are as excited as I am about the Company’s success in 2018, as well as over the last several years. But I hope even more that you share our enthusiasm for where we believe the fundamental changes we have made over the last few years have moved us and the bright prospects ahead for our clients, our people and our shareholders.

Thank you for your investment and continued support.

Steven H. Gunby
President and Chief Executive Officer

“Our record performance in 2018 is a reflection of the core mission we have been on these last few years, which is to ensure we are leveraging our expertise to help our clients with the most significant challenges and opportunities they face.”

Steven H. Gunby
President and Chief Executive Officer

FTI Consulting, Inc.
Non-GAAP Financial Measures

In this Annual Report, FTI Consulting, Inc. (collectively, the “Company,” “we,” “our” or “FTI Consulting”) includes information derived from consolidated and segment financial information that may not be prepared in accordance with Accounting Principles Generally Accepted in the United States (“GAAP”). Certain of these financial measures are considered not in conformity with GAAP (“non-GAAP financial measures”) under the rules promulgated by the Securities and Exchange Commission (“SEC”). Specifically, we have referred to the following non-GAAP financial measures:

- Total Segment Operating Income
- Adjusted EBITDA
- Total Adjusted Segment EBITDA
- Adjusted EBITDA Margin
- Adjusted Net Income
- Adjusted Earnings per Diluted Share
- Free Cash Flow

We have included the definitions of Segment Operating Income (Loss) and Adjusted Segment EBITDA below in order to more fully define the components of certain non-GAAP financial measures in the accompanying analysis of financial information. As described in Note 18, “Segment Reporting” in Part II, Item 8, “Financial Statement and Supplementary Data” of our Annual Report on Form 10-K for the year ended December 31, 2018 (our “Form 10-K”), we evaluate the performance of our operating segments based on Adjusted Segment EBITDA, and Segment Operating Income (Loss) is a component of the definition of Adjusted Segment EBITDA.

We define Segment Operating Income (Loss), which is a GAAP financial measure, as a segment’s share of consolidated operating income. We define Total Segment Operating Income, which is a non-GAAP financial measure, as the total of Segment Operating Income (Loss) for all segments, which excludes unallocated corporate expenses. We use Segment Operating Income (Loss) for the purpose of calculating Adjusted Segment EBITDA. We define Adjusted Segment EBITDA, a GAAP financial measure, as a segment’s share of consolidated operating income before depreciation, amortization of intangible assets, remeasurement of acquisition-related contingent consideration, special charges and goodwill impairment charges. We use Adjusted Segment EBITDA as a basis to internally evaluate the financial performance of our segments because we believe it reflects current core operating performance and provides an indicator of the segment’s ability to generate cash. We define Adjusted EBITDA Margin as Adjusted EBITDA as a percentage of total revenues.

We define Total Adjusted Segment EBITDA, which is a non-GAAP financial measure, as the total of Adjusted Segment EBITDA for all segments, which excludes unallocated corporate expenses. We define Adjusted EBITDA, which is a non-GAAP financial measure, as consolidated net income before income tax provision, other non-operating income (expense), depreciation, amortization of intangible assets, remeasurement of acquisition-related contingent consideration, special charges, goodwill impairment charges, gain or loss on sale of a business and losses on early extinguishment of debt. We believe that these non-GAAP financial measures, when considered together with our GAAP financial results and GAAP financial measures, provide management
and investors with a more complete understanding of our operating results, including underlying trends. In addition, EBITDA is a common alternative measure of operating performance used by many of our competitors. It is used by investors, financial analysts, rating agencies and others to value and compare the financial performance of companies in our industry. Therefore, we also believe that these measures, considered along with corresponding GAAP financial measures, provide management and investors with additional information for comparison of our operating results with the operating results of other companies.

We define Adjusted Net Income and Adjusted Earnings per Diluted Share (“Adjusted EPS”), which are non-GAAP financial measures, as net income and earnings per diluted share (“EPS”), respectively, excluding the impact of remeasurement of acquisition-related contingent consideration, special charges, goodwill impairment charges, losses on early extinguishment of debt, non-cash interest expense on convertible notes, gain or loss on sale of a business and the impact of adopting the 2017 U.S. Tax Cuts and Jobs Act (the “2017 Tax Act”). We use Adjusted Net Income for the purpose of calculating Adjusted EPS. Management uses Adjusted EPS to assess total Company operating performance on a consistent basis. We believe that these non-GAAP financial measures, when considered together with our GAAP financial results, provide management and investors with an additional understanding of our business operating results, including underlying trends.

We define Free Cash Flow, which is a non-GAAP financial measure, as net cash provided by operating activities less cash payments for purchases of property and equipment. We believe this non-GAAP financial measure, when considered together with our GAAP financial results, provides management and investors with an additional understanding of the Company’s ability to generate cash for ongoing business operations and other capital deployment.

Non-GAAP financial measures are not defined in the same manner by all companies and may not be comparable with other similarly titled measures of other companies. Non-GAAP financial measures should be considered in addition to, but not as a substitute for or superior to, the information contained in our Consolidated Statements of Comprehensive Income. Reconciliations of non-GAAP financial measures to the most directly comparable GAAP financial measures are included in this Annual Report.

Title of Each Class
Common Stock, $0.01 par value

Name of Each Exchange on Which Registered
New York Stock Exchange

Securities Registered Pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T ($232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K ($229.405 of this chapter) is not contained herein, and will not be contained, to the best of Registrant’s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer ☒
Non-accelerated filer ☐

Accelerated filer ☐
Smaller reporting company ☐
Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the voting and non-voting common stock held by non-affiliates of the registrant was $2.3 billion, based on the closing sales price of the registrant’s common stock on June 30, 2018.

The number of shares of the registrant’s common stock outstanding on February 19, 2019 was 37,863,716.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of our definitive Proxy Statement to be filed with the Securities and Exchange Commission with respect to our 2018 Annual Meeting of Stockholders are incorporated by reference into Part III of this Annual Report on Form 10-K to the extent stated therein.

FTI CONSULTING, INC.
Pursuant to Section 12(g) of the Act: None

Forward-Looking Information

This Annual Report on Form 10-K (the “Annual Report”) includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), that involve uncertainties and risks. Forward-looking statements include statements concerning our plans, objectives, goals, strategies, future events, future revenues, future results and performance, future capital allocations and expenditures, expectations, plans or intentions relating to acquisitions, share repurchases and other matters, business trends, new, or changes to, laws and regulations, including the 2017 U.S. Tax Cuts and Jobs Act, and other information that is not historical. Forward-looking statements often contain words such as “estimates,” “expects,” “anticipates,” “projects,” “plans,” “intends,” “believes,” “forecasts” and variations of such words or similar expressions. All forward-looking statements, including, without limitation, management’s financial guidance and examination of operating trends, are based upon our historical performance and our current plans, estimates and expectations at the time we make them, and various assumptions. There can be no assurance that management’s expectations, beliefs, forecasts and projections will result or be achieved. Our actual financial results, performance or achievements could differ materially from those expressed in, or implied by, any forward-looking statements. The inclusion of any forward-looking information should not be regarded as a representation by us or any other person that the future plans, estimates, forecasts or expectations contemplated by us will be achieved. Given these risks, uncertainties and other factors, you should not place undue reliance on any forward-looking statements.

There are a number of risks and uncertainties that could cause our actual results to differ materially from the forward-looking statements contained in, or implied by, statements in this Annual Report. Important factors that could cause our actual results to differ materially from the forward-looking statements we make in this Annual Report are set forth in this report, including under the heading “Risk Factors” in Part I, Item 1A of this Annual Report. All forward-looking statements attributable to us or persons acting on our behalf apply only as of the date of this Annual Report and are expressly qualified in their entirety by the cautionary statements included herein. We undertake no obligation to publicly update or revise any forward-looking statements to reflect subsequent events or circumstances and do not intend to do so.

ITEM 1. BUSINESS

Unless otherwise indicated or required by the context, when we use the terms “Company,” “FTI Consulting,” “we,” “us” and “our,” we mean FTI Consulting, Inc., a Maryland corporation, and its consolidated subsidiaries.

Company Overview

General

FTI Consulting is a global business advisory firm dedicated to helping organizations manage change, mitigate risk and resolve disputes: financial, legal, operational, political and regulatory, reputational and transactional. Individually, each of our segments and practices is staffed with experts recognized for the depth of their knowledge and a track record of making an impact. Collectively, FTI Consulting offers a comprehensive suite of services designed to assist clients across the business cycle, from proactive risk management to rapid response to unexpected events and dynamic environments.

We report financial results for the following five reportable segments:

• Corporate Finance & Restructuring;
• Forensic and Litigation Consulting;
• Economic Consulting;
• Technology; and
• Strategic Communications.

We work closely with our clients to help them anticipate, illuminate and overcome complex business challenges and make the most of opportunities arising from factors such as the economy, financial and credit markets, governmental legislation and regulation, and litigation. We provide our clients with expert advice and solutions involving turnaround and restructuring (including bankruptcy), business transformations (including performance improvement), interim management, transactions (including mergers and acquisitions (“M&A”), forensic accounting and advisory services, global risk & investigations
(“GRIP”), antitrust and competition matters, international arbitrations, regulated industries, securities litigation and risk management, electronic discovery management (or “e-discovery”), managed document review, collection and computer forensics), information governance, privacy and security, M&A crisis and special situation communications, and public affairs communications. Our experienced professionals are acknowledged leaders in their chosen field not only for their level of knowledge and understanding, but for their ability to structure practical workable solutions to complex issues and real-world problems. Our clients include Fortune 500 corporations, FTSE 100 companies, global banks, major law firms, and local, state and national governments and agencies around the globe. In addition, major United States (“U.S.”) and international law firms refer us or engage us on behalf of their clients.

We believe clients retain us because of our recognized expertise and capabilities in highly specialized areas, as well as our reputation for successfully meeting our clients’ needs.

Our operations span the globe encompassing locations within: (i) the Americas, consisting of our 47 U.S. offices located in 19 states, three offices located in Calgary, Toronto and Vancouver, Canada and our six offices serving Latin America located in Argentina, Brazil, Colombia, Mexico, the Cayman Islands and the Virgin Islands (British); (ii) Asia and the Pacific, consisting of 15 offices located in Australia, China (including Hong Kong), India, Indonesia, Japan, South Korea, Malaysia and Singapore; and (iii) Europe, Middle East and Africa (“EMEA”), consisting of 24 offices located in Belgium, Denmark, Finland, France, Germany, Ireland, Israel, Qatar, South Africa, Spain, United Arab Emirates and the United Kingdom (“UK”).

We derive the majority of our revenues from providing professional services to clients in the U.S. For the year ended December 31, 2018, we derived approximately 68% and 32% of our consolidated revenues from the work of professionals who are assigned to locations inside and outside the U.S., respectively.

**Summary Financial and Other Information**

The following table sets forth the percentage of consolidated revenues for the last three years contributed by each of our five reportable segments.

Our Reportable Segments

Corporate Finance & Restructuring

Our Corporate Finance & Restructuring segment focuses on the strategic, operational, financial and capital needs of our clients around the world. We address the full spectrum of financial, operational and transactional risks and opportunities facing our clients. Our clients include companies, boards of directors, investors, private equity sponsors, banks, lenders, and other financing sources and creditor groups, as well as other parties-in-interest. We deliver a wide range of service offerings, including turnaround and corporate restructuring (and bankruptcy), business transformation (including financial, operational and performance improvement services), and interim management services. Additionally, our services include dispute advisory, M&A, valuation and financial advisory and tax services. Our clients demand our industry expertise, which includes emphasis in the automotive, energy, power & products (“EPP”), healthcare, mining, real estate & infrastructure, retail & consumer products, and telecom, media & technology (“TMT”) sectors.

In 2018, our Corporate Finance & Restructuring segment operated through business transformation, turnaround and restructuring, and other practices, which offer the following services:

- **Turnaround & Restructuring.** We provide advisory services to help our clients stabilize finances and operations to reassure creditors and other stakeholders that proactive steps are being taken to preserve and enhance value. For clients confronting liquidity problems, excessive leverage, underperformance, overexpansion, or other business or financial issues, we develop liquidity forecasts, identify cash flow improvements, obtain financing, negotiate loan covenant waivers and guide complex debt restructurings.

  Our turnaround management professionals provide their turnaround skills, restructuring expertise, and industry and functional experience to lead through crisis situations, such as financial and operational restructuring and insolvency and bankruptcy, by stabilizing financial position, optimizing financial resources, protecting enterprise value, resolving regulatory compliance issues, building morale and establishing credibility with stakeholders. Our professionals serve in the following interim executive and management roles: chief executive officer, chief operating officer, chief financial officer, chief restructuring officer, controller and treasurer, and other senior positions that report to them.

  Our company advisory group advises and assists clients by providing liquidity management, operational improvement, turnaround and restructuring, and capital solutions services to achieve successful turnarounds. Through our out-of-court services, we assist clients to right-size infrastructure, improve liquidity and solvency, improve cash flow and working capital management, sell noncore assets or business units and recapitalize. We perform due diligence reviews, financial statement, cash flow and EBITDA (earnings before interest expense, income taxes, depreciation and amortization) analyses, prepare liquidity forecasts and financial projections, recommend credit alternatives, assist in determining optimal capital structure, monitor portfolios of assets, assess collateral, provide crisis credit and securitized transaction assistance, negotiate loan covenant waivers and guide complex debt restructurings. We also lead and manage the financial aspects of in-court restructurings and bankruptcies by offering services that help our clients assess the impact of a bankruptcy filing on their financial condition and operations. We provide critical services specific to court-supervised insolvency and bankruptcy proceedings. We represent underperforming companies that are debtors-in-possession and lenders. With a focus on minimizing disruption and rebuilding the business after an exit from bankruptcy or insolvency, we help clients accelerate a return to business as usual.

  Our creditor advisory group advises and assists secured and unsecured creditors in distressed situations to maximize recoveries and preserve the value of assets. Our services include assessing the short-term and long-term liquidity needs, evaluating operations and the reasonableness of business plans, determining enterprise value, negotiating executable restructuring programs, building a consensus within the creditor group, investigating intercompany transactions and potential fraudulent conveyances, bankruptcy preparation and reporting services, financial analysis in support of petitions and affiliated motions, strategies for monetizing a debtor’s assets, the discovery of unidentified assets and liabilities, and expert witness testimony.

- **Business Transformation.** The services offered by our business transformation practice focus on improving the efficiency and effectiveness of clients’ operations by implementing systemic changes leading to sustainable results. Our expert-led teams focus on:

  - **Revenues,** by helping clients unlock profitability, combining consulting tools, analytics and operating experience to deploy strategies designed to deliver sustainable, accelerated revenue growth in an accelerated time frame;
• **Operations**, such as sales, customers and sourcing and procurement, by analyzing data and other information that drives improvements, insights and change;

• **Transactions**, such as M&A, by providing due diligence, pre- and post- advisory and merger integration services;

• **Finance**, by collaborating with finance and accounting executives to address people, process and technology gaps by using data analytics and best practices to establish solutions that support finance responsibilities while balancing the company’s strategic goals, including through our interim management services that address gaps in executive expertise; and

• **People**, by partnering with business leaders, management, communications and HR, to drive business results by fully addressing the people-side of change. We help organizations realize the benefits of a transformation more rapidly and deliver sustainable change that moves our clients’ businesses forward.

• **Office of the Chief Financial Officer (“CFO”) Solutions.** Our Office of the CFO Solutions provides holistic, practical, value-enhancing solutions to address people, process and technology gaps. Our solutions are designed to preserve, create and sustain value and to help the CFO team achieve rapid success. We collaborate with CFOs and their finance and accounting organizations and use innovative engagement tools to provide transformation services, manage risk, deliver business intelligence capabilities, and prepare for and execute events, all while building confidence, clarity, controls and consistency.

• **Interim Management.** Through interim management services, our professionals fill the void when our clients need skilled, experienced leadership to pursue opportunities, contend with executive turnover and transition, or drive strategic transactions or change. The experienced and credentialed professionals in our transitional management practice assume executive officer level roles, providing the leadership, financial management, and operating and strategic decision-making abilities to lead transitions due to extraordinary events such as M&A, divestitures, changes in control and carve-outs of businesses from larger enterprises.

• **Transactions.** We combine the disciplines of structured finance, investment banking, lender services, M&A, M&A integration, and U.S. Securities and Exchange Commission (“SEC”) and other regulatory experience to help our clients maximize value and minimize risk in M&A and other high stakes transactions. The many services that we provide relating to investment banking, lender services, M&A integration, and structured finance and transaction services include: performing due diligence reviews, evaluating key value drivers and risk factors, advising on the most advantageous tax and accounting structures, and assessing quality of earnings, quality of balance sheet and working capital requirements. We identify value enhancers and value issues. We provide comprehensive tax consulting intended to maximize a client’s return on investment. We help structure post-acquisition earn-outs and price adjustment mechanisms to allow a client to realize optimal value and perform services for clients involved in purchase price disputes such as assessing the consistent application of U.S. generally accepted accounting principles (“GAAP”), earn-out issues, working capital issues, settlement ranges and allocation of purchase price for tax purposes.

We provide investment banking services in the U.S. and other countries, including Canada and Puerto Rico, through financial industry regulated entities, focusing on identifying and executing value-added transactions for public and private middle market companies. We can also provide investment advisory services through our registered advisors.

• **Valuation & Financial Advisory Services.** We provide an array of forecasting, valuation and transaction support services with respect to strategic transactions, including capital markets, M&A and distressed situations. We have the expertise to provide fairness, solvency, collateral valuation, intellectual asset valuation, and going concern valuation options.

• **Dispute Advisory.** We provide independent litigation consulting, including bankruptcy and avoidance litigation and industry-specific civil, commercial and regulatory dispute services. Our bankruptcy and avoidance litigation services include consulting, expert witness and trial services related to preferential payments, solvency and fraudulent conveyances, substantive consolidation, claims litigation, plan feasibility, valuation disputes and board fiduciary assessments.

Our commercial and regulatory dispute services involve industry-specific expertise relating to industry standards and customary practices, economic damages, fact finding, and forensic review and analysis, primarily related to the
automotive, hospitality, gaming and leisure, real estate and infrastructure, retail and consumer products, structured finance and TMT industries.

- **Tax Services.** We provide advisory services relating to corporate, partnership, and real estate investment trust ("REIT") and real estate tax compliance and reporting, international taxation, debt restructuring, foreign, state and local taxes, research and development, transfer pricing, tax valuation services and value-added taxation. We advise businesses on a variety of tax matters ranging from tax transaction support to best practice process implementation and structuring.

- **Executive Compensation & Corporate Governance.** We provide objective advice on the design and implementation of comprehensive executive compensation programs to attract, retain, reward and motivate management and employees for the right kind of performance while closely aligning the interests of employees with those of the company’s shareholders and investors. Our corporate governance services include succession planning, stock ownership requirements, and shareholder engagement and outreach.

**Forensic and Litigation Consulting**

Our Forensic and Litigation Consulting segment provides law firms, companies, government clients and other interested parties with multidisciplinary, independent dispute advisory, investigations, data analytics, forensic accounting, business intelligence and risk mitigation services. We advise our clients in response to allegations involving the propriety of accounting and financial reporting, fraud, regulatory scrutiny and anti-corruption. We assist our clients in protecting enterprise value by (i) quantifying damages and providing expert testimony in a wide range of dispute situations: claims and liabilities, government and regulatory inquiries, investigations and proceedings, litigation, intellectual property ("IP"), professional malpractice, lost profits, valuations, breach of contract, purchase price disagreements, business interruption, environmental claims, construction claims and fraud, (ii) employing forensic accounting and complex modeling to analyze financial transactions, and (iii) identifying, collecting, analyzing and preserving structured information within enterprise systems. We have the capacity to provide our full array of practice offerings across jurisdictional boundaries around the world.

In 2018, our Forensic and Litigation Consulting segment operated through risk advisory, investigations and disputes practices, which offer the following services:

- **Forensic Accounting & Advisory Services.** We assist U.S. and multinational clients with responding to allegations involving the propriety of accounting, financial reporting, fraud, regulatory scrutiny and anti-corruption inquiries. We identify, collect, analyze and interpret financial and accounting data and information for fraud, accounting, complex financial reporting, audit and special committee investigations. We analyze issues, identify options and make recommendations to respond to financial misstatements, financial restatements and inadequate disclosure allegations, claims, threatened and pending litigation, regulatory inquiries and actions, and whistleblower allegations. We employ investigative skills, establish document and database controls, prepare analytical models, perform forensic accounting, present expert testimony and render opinions, and prepare written reports. We have particular expertise investigating compliance with the U.S. Foreign Corrupt Practices Act (the "FCPA") and other anti-corruption laws, including the UK Anti-Bribery Act (the "UKBA") and the Organisation for Economic Co-operation and Development (the “OECD”). We provide consulting assistance and expert witness services to securities counsel and their clients regarding inquiries and investigations initiated by the Divisions of Enforcement and Corporate Finance and Office of the Chief Accountant of the SEC. We assist clients in responding to inquiries from the Public Company Accounting Oversight Board.

- **GRIP.** We utilize a multidisciplinary approach to conduct complex factual and regulatory investigations combining teams of former federal prosecutors and regulators, law enforcement and intelligence officials, forensic accountants, industry specialists and computer forensic specialists. We uncover actionable intelligence and perform value-added analysis to help our clients address and mitigate risks, protect assets, remediate compliance, make informed decisions and maximize opportunities. Our capabilities and services include white collar defense intelligence and investigations, complex commercial and financial investigations, business intelligence and investigative due diligence, political risk assessments, business risk assessments, fraud and forensic accounting investigations, computer forensics and electronics evidence, specialized fact finding, domestic and international arbitration proceedings, asset searching and analysis, IP and branding protection, anti-money laundering consulting, ethics and compliance program design, and transactional due diligence. We help our clients navigate anti-bribery and anti-corruption risk proactively (assessing and mitigating risk) and reactively (responding to allegations with multidisciplinary investigation, forensic accounting and information preservation experts). We help clients institute the necessary internal controls with which to comply, and we investigate suspected violations of the FCPA and other anti-corruption laws, including the UKBA and the OECD. We also develop remediation and
monitoring plans, including the negotiation of settlement agreements. Through our services, we uncover actionable intelligence and perform value-added analysis to help our clients and other decision makers address and mitigate risk, protect assets, remediate compliance deficiencies, make informed decisions and maximize opportunities.

- **Cybersecurity.** Our cybersecurity practice uses cutting-edge technologies and capabilities together with our comprehensive practice offerings to enable clients to address their most critical needs and integrate new solutions atop or alongside pre-existing policies and programs to address cyber threats. We help our clients understand their own environments, implement defensive strategies, identify threats, holistically respond to crises, and sustainably recover their operations and reputation after an incident.

- **Dispute Advisory Services.** We provide early case assessment and pre-trial, in-trial and post-trial dispute advisory services in judicial and a broad range of alternative dispute resolution and regulatory forums, including international arbitration, to help clients assess potential, threatened and pending claims resulting from complex events, including securities, accounting and regulatory enforcement actions, valuation, solvency and acquisition disputes, intellectual property disputes and valuations, commercial disputes, including business insurance claims, financial and economic transactions, as well as accounting and professional malpractice allegations, and labor and employment disputes. We analyze records and information, including electronic information, to locate assets, trace flows of funds, identify illegal or fraudulent activity, reconstruct events from incomplete and/or corrupt data, uncover vital evidence, quantify damages and prepare for trial or settlement. In many of our engagements, we also act as an expert witness. We perform economic and commercial analyses necessary to support International Trade Commission Section 337 investigations used to prevent certain products subject to IP claims from entering the U.S.

- **Trial Services.** We work as part of the team advising and supporting clients in large and highly complex civil trials. Through the use of our proprietary information technology, we turn facts and ideas into presentations and information that drive decisions. We help control litigation costs, expedite the in-trial process, prepare evidence, and help our clients to readily organize, access and present case-related data. Our proprietary TrialMax™ software integrates documents, photographs, animations, deposition videos, audios and demonstrative graphics into a single trial preparation and presentation tool. Our graphics consulting services select the most appropriate presentation formats to maximize impact and memorability and then create persuasive graphic presentations that support, clarify and emphasize the key themes of a case. We provide illustrations and visual aids that help simplify complex technical subjects for jurors through opening and closing statement consulting, witness presentations, research presentations, exhibit plans and outlines, hardboards, scale models, storyboards, timelines, and technical and medical illustrations.

- **Data & Analytics.** We deliver strategic business solutions for clients requiring in-depth identification, analysis and preservation of large, disparate sets of financial, operational and transactional data. We map relationships among various information systems and geographies, mine for specific transactions and uncover patterns that may signal fraudulent activity or transactional irregularities. We assist with recovering assets and designing and implementing safeguards to minimize the risk of recurrence. We produce detailed visualizations from complex data, making it easier to identify abnormalities and share information. We also have the expertise to perform system and information technology (“IT”) audits and due diligence.

- **Compliance, Monitoring & Receivership.** Our expert industry professionals provide full-scale assessments and process improvement and support services for compliance programs, as well as act as independent monitors or in support of trustees, monitors, receivers and examiners. In matters involving the appointment of monitors, receivers or examiners by courts or regulators, our experts possess the necessary independence and skills to test and monitor compliance with and the continuing effectiveness of the terms of settlements or reforms across many industries and professions.

- **Anti-Corruption Investigations & Compliance.** We help clients mitigate corruption risks and investigate and prevent corruption issues arising from the FCPA, the UKBA, Brazil’s Clean Company Act and other similar global statutes.

- **Anti-Money Laundering.** We help banks, broker-dealers, money transmitters, regulators, insurers, law firms, investors and corporations investigate and address anti-money laundering and anti-corruption regulations, compliance and sanctions with specialized consulting services, combining our expertise and investigative experience with our specialized technology and data services.

- **Health Solutions.** We work with a variety of healthcare and life sciences clients to discern innovative solutions that optimize performance in the short term and prepare for future strategic, operational, financial and legal challenges. We provide a one-company team of experts across the spectrum of healthcare disciplines. These
professionals have specialized capabilities and a record of success across hospital operations and restructuring, healthcare economics, and stakeholder engagement and communication.

Economic Consulting

Our Economic Consulting segment provides law firms, companies, government entities and other interested parties with analysis of complex economic issues for use in legal, regulatory and international arbitration proceedings, strategic decision making and public policy debates in the U.S. and around the world. We deliver sophisticated economic analysis and modeling of issues arising in complex M&A transactions, antitrust litigation, commercial disputes, international arbitrations, regulatory proceedings, IP disputes and a wide range of financial litigation. We help clients analyze issues such as the economic impact of deregulation on a particular industry and the amount of damages suffered by a business as a result of a particular event. Our professionals regularly provide expert testimony on damages, rates and prices, valuations (including valuations of complex financial instruments), antitrust and competition regulation, business valuations, IP, transfer pricing and public policy.

In 2018, our Economic Consulting segment offered the following services:

- **Antitrust & Competition Economics.** We provide financial, economic and econometric consulting services to assist clients in public policy debates, regulatory proceedings and litigation. We apply our models to complex data in order to evaluate the likely effects of transactions on prices, costs and competition. Our professionals are experts at analyzing and explaining the antitrust and competition impact of diverse transactions and proceedings relating to M&A, price fixing, monopolization and abuse of a dominant position, exclusionary conduct, bundling and tying, and predatory pricing. Our services include financial and economic analyses of policy, regulatory and litigation matters. We provide expert testimony, testimony regarding class certifications and quantification of damages analyses for corporations, governments and public-sector entities in the U.S. and around the world.

- **Valuation.** We help clients identify and understand the value of their businesses in both contentious and uncontentious situations. We provide business valuation, expert valuation and expert testimony services relating to traditional commercial disputes and other matters as diverse as transaction pricing and structuring, securities fraud, valuations for financial reporting, tax, regulatory and stakeholder investment compliance, solvency issues, fraudulent transfers, post-acquisition M&A disputes and transactions, and disputes between shareholders. We provide our clients with specialized valuation opinions and expert testimony involving international disputes before international courts of jurisdiction and arbitration tribunals. We assist our clients in making economic and investment decisions that significantly affect shareholder value, economic returns and capital allocation.

- **Intellectual Property.** We help clients understand and maximize the value of their intangible business assets. We calculate losses from IP infringement, apply econometrics to develop pricing structures for IP valuations and licensing, manage the purchase or sale of IP assets, negotiate with tax authorities, and determine IP-related losses in legal disputes and arbitrations. We provide IP-related advice and expert opinions and testimony for commercial transactions, intergroup transfers, M&A and negotiations with taxing authorities to a wide range of industries.

- **International Arbitration.** We help clients navigate each phase of the dispute resolution process. Our international arbitration practice works with companies, governments and members of the international bar to provide independent advice and expert testimony relating to business valuations and economic damages in a wide variety of commercial and treaty disputes before international arbitration tribunals. Our services include evaluating claims, identifying and quantifying economic damages, litigation support and identifying the best approaches to achieve positive outcomes.

- **Labor & Employment.** We prepare economic and statistical analyses for clients facing disputes relating to wage and hour issues, class action, class certification, lost earnings and discrimination. Our experienced labor and employment team provide statistical analyses of data and damage exposure, review and rebut expert reports, calculate the economic value of a claim, determine if the purported class in labor and employment litigation meets legal requirements for certification, and provide expert testimony. We provide clients with statistical and economic analysis of Fair Labor Standards Act wage and hour issues, state wage and hour issues, employment discrimination issues, Equal Employment Opportunity Commission investigations, Office of Federal Contract Compliance Program audits, reduction-in-force assessments and compensation studies.

- **Public Policy.** We advise clients regarding the impact of legislation and political considerations on industries and commercial transactions. We perform financial and economic analyses of policy and regulatory matters and the effect of legislation, regulations and political considerations on a wide range of issues facing our clients around the world, such as the environment, taxation and regulations relating to global competitiveness. We provide comparative analyses of proposed policy alternatives, division of responsibilities of federal and local regulators,
the effects of regulations on risk sharing across constituencies and geographies, and unintended consequences. Our services include strategic and regulatory planning, program evaluation, regulatory and policy reform, tort liability, forecasting, public private partnerships and public finance.

- **Regulated Industries.** We provide economic analysis, econometrics and network modeling to provide information to major network and regulated industry participants on the effects of regulations on global business strategies. We provide advice on pricing, valuation, risk management, and strategic and tactical challenges. We also advise clients on the transition of regulated industries to more competitive environments. Our services include economic analysis, econometrics and modeling, due diligence and expert testimony.

- **Securities Litigation & Risk Management.** Our professionals apply economic theory, econometrics and the modern theory of finance to assess, quantify and manage risks inherent in global financial markets. We advise clients and testify on a variety of issues, including securities fraud, insider trading, initial public offering (“IPO”) allocations, market efficiency, market manipulation and forms of securities litigation. We also evaluate financial products such as derivatives, securitized products, collateralized obligations, special purpose entities, and structured financial instruments and transactions.

- **Center for Healthcare Economics and Policy.** We support and facilitate the work of local governments, insurers, providers, physicians, employers and community-based stakeholders by providing data-driven strategies and solutions based on empirical analyses and modeling to reduce the per capita cost of healthcare, improve the health of populations, and enhance patient experience and access to care.

- **Network Analysis.** We provide our clients with hindsight, insight and foresight by using our technology and experience to visualize and evaluate relationships and flows among people, groups, markets, organizations, infrastructure, IT systems, biological systems and other interconnected entities in order to understand complex interconnected data. The information we generate can be used by our clients to evaluate and defend insurance claims, support litigation and regulatory proceedings, detect fraud, identify trends and problematic events, certify class litigation claims, and investigate social and terrorist networks.

- **Economic Impact Analysis.** We apply both market and macroeconomic models across a range of industries to analyze how markets and the broader economy react to changes in public policy and investments. Our clients use our analyses to formulate their strategic plans to educate key stakeholders, policymakers, regulators, the media and the public on the benefits and costs of their plans when determining the best course of action.

**Technology**

Our Technology segment offers a comprehensive portfolio of information governance, e-discovery management and data analytics software, services and consulting to corporations, law firms, courts and government agencies worldwide. Our consulting and services allow our clients to control the risk and expense of information during legal and regulatory events more confidently, as well as better understand and act on their data in the context of compliance and risk. Our professionals help clients locate, analyze, review and produce electronically stored information (“ESI”), including email, computer files, audio, video, instant messaging, cloud data and social media. Our professionals have a proven track record of helping clients with complex issues, including internal investigations, regulatory and global investigations such as under the FCPA and UKBA, litigation and joint defense, discovery and preparation, and antitrust and competition investigations, including second requests under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended.

In 2018, our Technology segment operated through software and consulting and services practices, which offer the following services:

- **E-discovery Management.** We plan, design and manage discovery workflows and engagements to maximize responsiveness, minimize costs and risks, and provide greater budget predictability. We offer several deployment options, from a do-it-yourself on-premises model to a full-service managed services option. We offer clients the option to establish master repositories so that data need only be collected and processed once. In the repository, the data can be accessed and used across multiple matters, enabling the reuse and retention of valuable attorney work product and other information.

- **Managed Document Review.** We offer Acuity®, a managed review offering that allows corporations and law firms to improve the cost-effectiveness of their e-discovery processes while more effectively identifying the most critical information and documents in large data sets. With Acuity®, we drive review efficiency by leveraging the power of analytics and artificial intelligence while ensuring rigorous project and budget oversight. Acuity® workflows enable collaboration among the corporation, law firm and our managed review teams.
• Collections & Computer Forensics. We help organizations meet requirements for collecting, analyzing and producing large amounts of data from a variety of sources, including email, chat, voicemail, backup tapes, social media, the cloud, mobile devices, shared server files and databases, often on multiple continents. We provide both proactive and reactive support using expert services, methodologies and tools that help companies and their legal advisors understand technology-dependent issues. We also offer services to reconstruct data that has been deleted, misplaced or damaged.

• Information Governance, Privacy & Security. We provide the people, process and technology to develop, implement and deliver information governance, privacy & security strategies that reduce corporate risk, cut storage costs, secure data, improve the e-discovery process and enable better insight into data. Services include: readiness assessment consulting and services for the General Data Protection Regulation Act, data privacy program development and managed services, scanning and quarantine of sensitive data, including personally identifiable information and trade secrets, cleanup of file share, litigation hold and preservation optimization, e-discovery readiness/meet-and-confer support, divestiture data segregation, decommission and disposition of business applications in a defensible manner, modernization of messaging policies, backup remediation, workstation and forensic image remediation, social media and messaging archive migration and remediation, migration to cloud applications, discovery of key data, enterprise content management and SharePoint migration and decommissioning, voice and audio readiness, and cybersecurity readiness assessment.

• Contract Intelligence. Our Contract Intelligence service provides a cost-effective solution for a key component of contract life cycle management, offering organizations a centralized, organized method to review and analyze their global contract universe. Corporations and firms using our Contract Intelligence service can better find, understand and act upon contracts to meet regulatory requirements, reduce risk and recognize greater business value in business contexts such as pre-merger contract diligence, alignment of contract with new regulations and analyses of leasing agreements for compliance with new accounting standards.

• Relativity®. In 2017, we became an authorized provider of Relativity®, a third-party software product designed to help clients find relevant information quickly and accurately and manage the complexity and scope of investigations and litigation, and have successfully delivered Relativity® on multiple legal and regulatory engagements.

• Ringtail® E-discovery Software. In September 2018, we sold our Ringtail® software and related e-discovery and document review software platform to Nuix, an information software company, for approximately $55.0 million. At the time of sale, we entered into a three-year preferred partner licensing agreement with Nuix for the Nuix Ringtail Review platform. Ringtail helps companies find relevant information quickly and accurately and manage complex investigations and transactions.

• Radiance Visual Analytics Software. Radiance is a highly scalable, visual analytics platform to search ESI from disparate sources in a single interface.

* Registered trademark of Relativity Technologies, Inc. Ringtail is a registered trademark of Nuix.
Strategic Communications

Our Strategic Communications segment designs and executes communications strategies for management teams and boards of directors to help them seize opportunities, manage financial, regulatory and reputational challenges, navigate market disruptions, articulate their brand, stake a competitive position, and preserve and grow operations. We believe our integrated offerings, which include a broad scope of services, deep industry expertise and global reach, are unique and distinguish us from other strategic communications consultancies.

In 2018, our Strategic Communications segment offered the following services:

- **M&A Crisis Communications & Special Situations.** We specialize in advising clients on their communications to investors and other audiences to help them protect their business, brand and market positions and achieve fair valuations in capital markets. We employ a disciplined discovery process to identify preparedness gaps, assess the situation, plan for various possibilities, prepare and disseminate communications, and manage legal and political consequences. We provide services relating to a wide range of M&A scenarios, including transformative and bolt-on acquisitions, friendly and hostile takeovers, and activism defense. We also advise clients in situations that present threats to their valuation and reputation with investors such as proxy contests, financial restatements, shareholder activism, unplanned management changes and other crises. Our integrated communications services are designed to address the concerns of all internal and external stakeholders.

- **Capital Markets Communications.** We assist clients in developing and delivering a consistent and credible narrative to investors and the investment community. We help companies articulate and present their entry into the equity markets, from articulating the strategic rationale and investment story to preparing the registration statement with securities regulators to developing the road show for the IPO. We provide investor relations best practices programs and investor relations services and communications. We conduct perception audits and organize investor community events. We provide a wide range of research and analyses to our clients. We also help clients communicate leadership transitions and demonstrate new management credibility to investors.

- **Corporate Reputation.** We promote businesses and protect corporate reputations, creating solutions for our clients’ mission-critical communications needs. Our services include crisis and issues management, reputational risk advisory, stakeholder identification, mapping and engagement, messaging and organization positioning, thought leadership consultancy, corporate social responsibility, strategic media relations, employee communications, engagement and change communications, and media and presentation coaching, as well as qualitative and quantitative research.

- **Public Affairs & Government Relations.** We advise senior business leaders and leading organizations around the world on how to effectively engage with governments, politicians and policymakers and respond to regulatory changes. We advise governments on how to attract investors by improving their regulatory and legal frameworks. Our integrated global team is based in leading political centers, including Berlin, Brussels, London, Melbourne and Washington, D.C. We combine public policy, economic consulting and capital markets expertise with strategic communications and business advisory skills. We offer the full range of engagement programs, ranging from crisis management of imminent legislation to longer-term shaping of the policy environment. We use a range of qualitative and quantitative tools to establish our clients’ case in connection with government investigations, political and legislative engagement, public policy debates and business strategies, whether in terms of message refinement, policy mapping, reputation benchmarking, opinion polling or speechwriting.

- **People & Change.** We help clients plan, design and implement internal communications and programs to increase engagement and understanding among leadership teams, employees, vendors, partners and customers. We partner with our clients to understand their unique business environment and internal and external communications aspirations. Our services assist business leaders in communicating and navigating change and transformative events, including new strategy and vision introductions, leadership positioning, M&A, operating model changes, outsourcing or insourcing, workforce consolidations or reductions, and restructurings and reorganizations. Our services are designed to align stakeholder insights with organizational needs.

- **Digital & Creative Communications.** We collaborate with clients to conceive and produce integrated design, content and digital strategies across all media and markets to advance business objectives with key stakeholders and the media. Our approach includes defining corporate and brand positioning, surveying the audience to gauge social sentiments and needs, demystifying complex business operations and situations, selecting a program that resonates with the marketplace, building the communications plan, launching the initiative for maximum visibility and evaluating the success of the program. We provide customized solutions to reach target audiences through digital channels. Our design and marketing teams specialize in corporate and brand identity development, website
development, advertising, interactive marketing campaigns, video and animation, brochures, fact sheets, testimonials and other marketing materials, and annual report development. Our social media experts work with clients to identify and engage stakeholders through the most appropriate and useful paid and non-paid social and digital media outlets.

- **Strategy Consulting & Research.** We provide in-depth market and stakeholder analyses to help our clients solve complex business and communications problems. Our research services include reputation benchmarking, peer analysis, benchmarking and financial market valuations, brand awareness studies and brand extension audits, including customer focus groups, shareholder analysis and investor targeting, consumer trend analysis, public opinion polling and policymaker perception audits.

**Our Industry Specializations**

We employ professionals across our segments and practices who are qualified to provide our core services plus a range of specialized consulting services and solutions that address the strategic, reputational, operational, financial, regulatory, legal and other needs of specific industries. The major industry groups that we service include:

**Aerospace & Defense.** Our aerospace and defense professionals provide services addressing the core issues related to the strategic growth and tactical priorities of commercial aviation, airlines, defense contractors, aviation maintenance, repair and overhaul and service providers, and security-oriented businesses. We help our clients navigate issues such as organic and inorganic growth, affordability, profitability, digital strategies, complex disputes with governments and regulators, regulatory audits, strategic communications and improvements to business systems.

**Agriculture.** Our agribusiness experts advise producers, accumulators and processors to address global concerns relating to the quality, quantity, biodiversity, commodity pricing and sustainable practices, and the effects of weather, climate change and animal rights activism on the food supply.

**Automotive.** Our automotive experts offer vehicle manufacturers, suppliers, retailers, vehicle financiers and other automotive subsectors, as well as their creditors, lenders and other stakeholders, a comprehensive range of corporate finance and strategic communications services.

**Construction.** Our construction services professionals provide commercial management, risk-based advice, dispute resolution services and strategic communications counsel on complex projects across all construction and engineering industries. Our professionals are industry leaders who understand technical, business, regulatory and legal matters and are seasoned in giving expert testimony to ensure that every aspect of their capital program or project is properly governed, well-executed, regulatory compliant and fully supported from beginning to end.

**EPP.** Our EPP professionals provide a wide array of advisory services that address the strategic, financial, restructuring, reputational, regulatory and legal needs of energy and utility clients involved in the production of crude oil, natural gas, refined products, chemicals, coal, electric power, emerging technologies, and renewable energy and clean energy technologies. Our professionals are involved in many of the largest financial and operational restructurings, regulatory and litigation matters involving energy and utility companies globally.

**Environmental.** Our environmental services professionals provide a comprehensive suite of services aimed at helping organizations manage and resolve specific environmental issues or programmatic challenges. Our services focus on the resolution of complex contamination, toxic tort, products liability, and insurance investigations and disputes before courts, regulators, mediators and alternative dispute tribunals.

**Financial Institutions.** Our professionals assist banks and financial services clients of all sizes and types in navigating through a changing environment of financial services regulations and enforcement actions, litigation threats, and economic and competitive challenges. We work with clients to manage risk, ensure compliance, resolve regulatory inquiries as they arise, engage with relevant stakeholders, and leverage their assets to protect and enhance enterprise value.

**Healthcare & Life Sciences.** Our professionals work with a wide variety of healthcare and life sciences clients to discern innovative solutions that optimize performance in the short term and prepare for future strategic, operational, financial, regulatory, legal and reputational challenges. We provide a one-company team of experts across the spectrum of healthcare disciplines. These professionals have specialized capabilities and a record of success across hospital operations and restructuring, healthcare economics, regulatory compliance, and stakeholder engagement and communications.

**Hospitality, Gaming & Leisure.** Our professionals help hotels, resorts, casinos, timeshares and condo hotels with operational realignment, asset and interim management, strategic analysis and event readiness (e.g., IPO, receivership, bankruptcy) and stakeholder engagement to preserve, protect and enhance asset and enterprise value.
Insurance. Our professionals combine their business and technical acumen to help insurers, reinsurers, captives, brokers, investors, regulators, corporations and their legal and business advisors address complex strategic and tactical issues. We apply methodologies, analytics and communications counsel to support the strategic requirements of our clients to protect assets, meet compliance requirements, achieve performance goals and engage with key stakeholders. Our professionals have a proven track record of effectively managing a broad range of large domestic and international engagements such as high-profile, discreet investigations and disputes, complex restructuring and enterprise-wide transformations, and the application of methodologies and analytics to innovate, improve performance, reduce risk and achieve compliance.

Mining. Our professionals assist mining businesses in understanding how to conduct business in emerging markets, M&A, capital markets financing, commodity pricing, valuations and quantification of damages in dispute situations.

Public-Sector & Government Contracts. Our government contracts team assists businesses through all phases of public sector contracting, including complying with government regulations and managing government business, risk avoidance, dispute resolution and litigation support. Our public-sector solutions team delivers services, including financial and performance improvement, risk management and forensic consulting, economic and public policy consulting, technology and data analytics, and strategic communications.

Real Estate & Infrastructure. Our professionals have the industry expertise and experience to help real estate owners, users, investors and lenders better navigate the real estate market’s complexities and manage its inherent risks. We provide such services through our real estate solutions practice within our Corporate Finance & Restructuring segment and our construction solutions practice within our Forensic and Litigation Consulting segment. We represent leading public and private real estate entities and stakeholders, including REITs, financial institutions, investment banks, opportunity funds, insurance companies, hedge funds, pension advisors, owners and developers, offering services that help align strategy with business goals.

Retail & Consumer Products. Our professionals provide a full range of corporate finance, turnaround, restructuring and strategic communications expertise for retailers. We have experience in developing strategies for retail and consumer products companies to address internal and external challenges from inception through maturity. Our professionals have deep industry expertise in critical functional areas to help our clients drive performance, implement plans and engage with key stakeholders that will have sustained results. Our Fast Track™ approach utilizes highly developed frameworks and analytics to identify levers in the retail value equation that can be influenced quickly and serve to fund longer term strategic initiatives that drive shareholder value.

TMT. Our TMT team provides strategic, financial, operational and communications consulting with industry specialists in wireline and wireless telecom, print and digital media, broadcast TV and radio, entertainment and content production, and technology companies of all types, including software, hardware, Internet business models and cloud-based technology. We provide targeted performance improvement strategies and implementation, commercial diligence and transaction advisory, M&A integration, carve-outs and divestitures planning, valuation, interim management, restructuring and strategic communications. We deliver original insights that help clients better understand company performance, consumer behavior, digital substitution, emerging technologies, disruptive trends and stakeholder priorities in our industries.

Transportation. Our professionals provide corporate communications, financial communications, public affairs advice, strategy consulting and research to a broad range of organizations and companies involved in various forms of transportation, including rail, trucking and infrastructure.

Our Business Drivers

Factors that drive demand for our business offerings include:

- **M&A Activity.** M&A activity is an important driver for all of our segments. We offer services for all phases of the M&A process. Our services during the pre-transaction phase include government competition advice and pre-transaction analysis. Our services during the negotiation phase include due diligence, negotiation and other transaction advisory services, government competition and antitrust regulation services, expert advice, asset valuations and financial communications advice. We also offer post-M&A integration and transformation services.

- **Financial Markets.** Financial market factors, including credit and financing availability, terms and conditions, the willingness of financial institutions to provide debt modifications or relief, corporate debt levels, default rates and capital markets transactions, are significant drivers of demand for our business offerings, particularly our Corporate Finance & Restructuring and Strategic Communications segments.

- **Regulatory Complexity, Public Scrutiny and Investigations.** Increasingly complex global regulations and legislation, greater scrutiny of corporate governance, instances of corporate malfeasance, and more stringent and complex
reporting requirements drive demand for our business offerings. The need to understand and address the impact of regulation and legislation, as well as the increasing costs of doing business, have prompted companies to focus on better assessing and managing risks and opportunities. In addition, boards of directors, audit committees and independent board committees have been increasingly tasked with conducting internal investigations of financial wrongdoing, regulatory non-compliance and other issues. These factors and laws, such as the Sarbanes-Oxley Act and the Dodd-Frank Wall Street Reform and Consumer Protection Act, have contributed to the demand for independent consultants and experts to investigate and provide analyses and to support the work of outside legal counsel, accountants and other advisors. These types of investigations also increasingly demand the use of multiple disciplinary service offerings like ours, which combine skills and capabilities across practices with industry expertise. These factors drive demand for various practices and services of all our segments.

- **Litigation and Disputes.** Litigation and business disputes, the complexity of the issues presented, and the amount of potential damages and penalties drive demand for the services offered by many of our segments, particularly our Forensic and Litigation Consulting, Economic Consulting and Technology segments. Law firms and their clients, as well as government regulators and other interested third parties, rely on independent outside resources to evaluate claims, facilitate discovery, assess damages, provide expert reports and testimony, manage the pre-trial and in-trial process, and effectively present evidence. 

- **Operational Challenges and Opportunities.** Businesses facing challenges require the evaluation and re-evaluation of strategy, risks and opportunities as a result of crisis-driven situations, competition, regulation, innovation and other events that arise in the course of business. These challenges include enterprise risk management, global expansion, competition from established companies, and emerging businesses and technologies doing business in emerging markets, and new and changing regulatory requirements and legislation. Management, companies and their boards need outside help to recognize, understand and evaluate such events and effect change, which drives demand for independent expertise that can combine general business acumen with the specialized technical expertise of our practice offerings and industry expertise. These factors drive demand for various practices and services of all our segments.

- **Developing Markets.** The growth of multinational firms and global consolidation can precipitate antitrust and competition scrutiny and the spread internationally of issues and practices that historically have been more common in the U.S., such as increased and complex litigation, corporate restructuring and bankruptcy activities, and antitrust and competition scrutiny. Companies in the developing world and multinational companies can benefit from our expert advice to access capital and business markets, comply with the regulatory and other requirements of multiple countries, structure M&A transactions and conduct due diligence, which drives demand for the services of all of our segments.

**Our Competitive Strengths**

We compete primarily on the basis of the breadth of our services, the quality of our work, the prominence of our professionals, our geographic reach, our reputation and performance record, our specific industry expertise and our strong client relationships. We believe our success is driven by a combination of long-standing competitive strengths, including:

- **Pre-eminent Businesses and Professionals.** We believe that our segments include some of the pre-eminent practices and professionals in our industry today. During 2018, the awards and recognitions received by the Company include the following:

  - FTI Consulting named to *Forbes* magazine’s list of America’s Best Management Consulting Firms for the third consecutive year — recognized in 18 sectors and functional areas
  - FTI Consulting named to *Consulting* magazine’s Best Firms to Work For list
  - FTI Consulting named *Who’s Who Legal*’s Consulting Firm of the Year award for the second consecutive year
  - Corporate Finance & Restructuring ranked the #1 U.S. Restructuring Advisor by *The Deal* for 11 consecutive years
  - FTI Consulting and Compass Lexecon had the most experts (144) recognized in the *Who’s Who Legal* Consulting Experts Guide for the third consecutive year
  - Compass Lexecon ranked #1 on *Global Arbitration Review*’s GAR 100 Expert Witness Firms’ Power Index
  - Compass Lexecon named *Who’s Who Legal*’s Competition Economics Firm of the Year for the fourth consecutive year
• FTI Consulting named Who’s Who Legal’s Arbitration Consulting Firm of the Year for the third consecutive year
• FTI Consulting named Who’s Who Legal’s Investigations Firm of the Year
• FTI Technology named 2018 Technology Sector Consulting Firm of the Year in Australia by Corporate Intl magazine
• Strategic Communications ranked in the top five PR Advisor by deal count and volume in MergerMarket’s 2018 PR Advisors League Tables in the Global, Europe and Asia-Pacific categories
• FTI Consulting named a Top 15 Strategy Consulting Firm in the Asia Pacific region by Consultancy Asia

• Diversified Service Offerings. Our five reportable segments offer a diversified portfolio of practices providing services within our four geographic regions. Our broad range of practices and services, the diversity of our revenue streams, our specialized industry expertise and our global locations distinguish us from our competitors. This diversity helps to mitigate the impact of crises, events and changes in a particular practice, industry or country.

• Diversified Portfolio of Elite Clients. We provide services to a diverse group of clients, including global Fortune 500 companies, FTSE 100 companies, global financial institutions, banks, and local, state and national governments and agencies in the U.S. and other countries. Additionally, 96 of the 100 law firms as ranked by American Lawyer Global 100: Most Revenue List refer or engage us on behalf of multiple clients on multiple matters.

• Strong Cash Flow. Our business model has several characteristics that produce consistent cash flows. Our strong cash flow supports business operations, capital expenditures, and research and development efforts in our Technology segment and our ability to service our indebtedness and pursue our growth and other strategies.

• Demand for Integrated Solutions and a Consultative Approach. Our breadth and depth of practice and service offerings and industry expertise across the globe drive demand by businesses that seek our integrated services and consultative approach covering different aspects of event-driven occurrences, reputational issues and transactions across different jurisdictions.

Our Business Strategy

We build client relationships based on the quality of our services, our brand and the reputation of our professionals. We provide diverse complementary services to meet our clients’ needs around the world. We emphasize client service and satisfaction. We aim to build strong brand recognition. The following are key elements of our business strategy:

• Leverage Our Practitioners, Businesses, Extensive Geographic Diversification and Relationships. We work hard to maintain and strengthen our core practices and competencies. We believe that our recognized expertise, client relationships and the quality of our reputation, coupled with our successful track record, size and geographic diversity, are the most critical elements in a decision to retain us. Many of our professionals are recognized experts in their respective fields.

• Grow Organically. Our strategy is to grow organically by increasing headcount and market share to provide clients with an attractive and evolving suite of services across our segments, as well as the industries and geographic regions in which we operate.

• Attract and Retain Highly Qualified Professionals. Our professionals are crucial to delivering our services to clients and generating new business. As of December 31, 2018, we employed 3,756 revenue-generating professionals, many of whom have an established and widely recognized name in their respective service and industry specialization. Through our substantial staff of highly qualified professionals, we can handle a large number of complex assignments simultaneously. To attract and retain highly qualified professionals, we offer significant compensation opportunities, including sign-on bonuses, forgivable loans, retention bonuses, cash incentive bonuses and equity compensation, along with a competitive benefits package and the chance to work on challenging global engagements with other highly skilled peers.

• Enhance Profitability. We endeavor to manage costs, headcount, utilization, bill rates and pricing for both time and materials and alternative fee arrangements to operate profitably.

• Acquisitions and Other Investments. Enhance value through capital allocation: The strength of our balance sheet gives us the flexibility to allocate capital and create shareholder value in numerous ways including investments in hiring new
employees, acquisitions and share repurchases. We consider strategic and opportunistic acquisition opportunities on a selective basis. We seek to integrate completed acquisitions and manage investments in a way that fosters organic growth, expands our geographic presence or complements our segments, practices, services and industry focuses. We typically structure our acquisitions to retain the services of key individuals from the acquired companies.

Our Employees

Our success depends on our ability to attract and retain our expert professional workforce. Our professionals include PhDs, MBAs, JDs, CPAs, CPA-ABVs (CPAs accredited in business valuations), CPA-CFFs (CPAs certified in financial forensics), CRAs (certified risk analysts), Certified Turnaround Professionals, Certified Insolvency and Reorganization Advisors, Certified Fraud Examiners, ASAs (accredited senior appraisers), construction engineers and former senior government officials. We also engage independent contractors to supplement our professionals on client engagements as needed. As of December 31, 2018, we employed 4,768 employees, of which 3,756 were revenue-generating professionals.

Employment Agreements

As of December 31, 2018, we had written employment arrangements with substantially all of our 486 Senior Managing Directors and equivalent personnel (collectively, “SMD”). These arrangements generally provide for fixed salary and participation in incentive payment programs (which, in some cases, may be based on financial measures such as EBITDA or relative total shareholder return), salary continuation benefits, accrued bonuses and other benefits beyond the termination date if an SMD leaves our employment for specified reasons prior to the expiration date of the employment agreement. The length and amount of payments to be paid by us following the termination or resignation of an SMD may vary, depending on whether the person resigned with or without “good reason” or was terminated by us with or without “cause,” retired or did not renew, died or became “disabled,” or was terminated as a result of a “change in control” (all such terms as defined in such SMD’s employment agreement). All of our written employment arrangements with SMDs require some notice period be given by the party prior to termination of employment and include covenants providing for restrictions on the SMDs competing against, and soliciting employees from, the Company for a specified period of time following the end of the SMDs employment.

Incentive and Retention Payments

Our SMDs and other employees, consultants and professionals may receive incentive, retention or sign-on payments, on a case-by-case basis, through unsecured general recourse forgivable loans, equity awards or other payments (collectively, “Retention Awards”). We believe that providing these multi-year Retention Awards greatly enhances our ability to attract and retain our key professionals.

Some or all of the principal amount and accrued interest of the loans we make will be forgiven by us upon the passage of time, or their repayment will be funded by us through additional cash bonus compensation, provided that the recipient is an employee or consultant on the forgiveness date. In addition, upon certain termination events, accrued interest and the outstanding principal balance may be forgiven, including upon death, disability and, in some cases, retirement or termination by the Company without cause or the recipient with good reason, or the recipient may be required to repay the unpaid accrued interest and outstanding principal balance upon certain other termination events such as voluntary resignation, as provided in the applicable promissory note. The value of the forgivable loans we have made, in the aggregate, as well as on an individual basis, have been, and we anticipate will continue to be, significant. Our executive officers and outside directors are not eligible to receive loans, and no loans have been made to them.

Our executive officers, other members of senior management and outside directors, as well as employees and independent service providers, have received and will continue to receive equity awards, which may include stock option and share-based awards (including awards in the form of restricted stock, performance-based restricted stock units, deferred restricted stock units, and cash-settled stock appreciation rights and units), on a case-by-case basis, to the extent that shares are available under our stockholder-approved equity compensation plans. The value of such equity and cash-based awards, in the aggregate, as well as on an individual basis, has been and is expected to continue to be significant.

Recipients of sign-on or other retention payments, other than loans, may be required to repay a portion or all of the original payment upon a termination event. These awards are typically smaller amounts in nature than forgivable loans and have a shorter service requirement than forgivable loans.

Select SMDs may participate in certain incentive compensation programs, such as our Senior Managing Director Incentive Compensation Program in the U.S., UK and Canada (the “ICP”) or the Key Senior Managing Director Incentive Plan (the “KSIP”). The ICP was closed to new participants effective January 2015. Participants were recommended by management and approved by the Compensation Committee of the Board of Directors of the Company. The ICP and KSIP provide for a combination of forgivable loans, equity awards and retention bonuses that are paid over an average of six to 10 years depending
on the program and economic value of the award. These programs also require participants to defer a portion of their bonus in the form of cash or restricted stock over a two-to-three-year period.

Marketing

We rely primarily on our senior professionals to identify and pursue business opportunities. Referrals from clients, law firms and other intermediaries and our reputation from prior engagements are also key factors in securing new business. Our professionals often learn about new business opportunities from their frequent contacts and close working relationships with clients. In marketing our services, we emphasize our experience, the quality of our services and our professionals’ particular areas of expertise, as well as our ability to quickly staff new and large engagements. While we aggressively seek new business opportunities, we maintain high professional standards and carefully evaluate potential new client relationships and engagements before accepting them. We also employ or contract with sales professionals who are tasked primarily with marketing the services of our Corporate Finance & Restructuring, Forensic and Litigation Consulting, Technology and Strategic Communications segments.

Clients

During the year ended December 31, 2018, no single client accounted for more than 10% of our consolidated revenues. No reportable segment had a single client that accounted for more than 10% of its respective total revenues for the year ended December 31, 2018. In some cases, we may have engagements through law firms that represent a larger percentage of our consolidated revenues or the revenues of a segment; however, each law firm engages us on behalf of multiple clients.

Competition

We compete with different companies or businesses of companies depending on the particular nature of a proposed engagement and the requested types of service(s) or the location of the client or delivery of the service(s) or product(s). Our businesses are highly competitive. Our competitors include large organizations, such as the global accounting firms and large management and financial consulting companies, that offer a broad range of consulting services; investment banking firms; IT consulting and software companies that offer niche services that are the same or similar to services or products offered by one or more of our segments; and small firms and independent contractors that provide one or more specialized services.

We compete primarily on the basis of the breadth of our services, the quality of our work, the prominence of our professionals, our geographic reach, our reputation and performance record, our specific industry expertise, our ability to staff multiple significant engagements across disciplines and industries in multiple locations, and our strong client relationships. Our Technology segment, particularly with respect to hosting services, and to a lesser extent our other segments, may also compete on price, although the critical nature of the services provided by our Corporate Finance & Restructuring, Forensic and Litigation Consulting, and Economic Consulting segments typically makes price a secondary consideration with respect to those segments. Since our businesses depend in large part on professional relationships, there are low barriers of entry for professionals, including our professionals, electing to work independently, start their own firms or change employers.

Our Corporate Finance & Restructuring segment primarily competes with specialty boutiques providing restructuring, bankruptcy or M&A services and, to a lesser extent, large investment banks and global accounting firms.

Our Forensic and Litigation Consulting segment primarily competes with other large consulting companies and global accounting firms with service offerings similar to ours.

Our Economic Consulting segment primarily competes with individually recognized economists, specialty boutiques and large consulting companies with service offerings similar to ours.

Our Technology segment primarily competes with consulting and/or software providers specializing in e-discovery, ESI and the management of electronic content. Competitors may offer products and/or services intended to address one piece or more of those areas. There continues to be significant consolidation of companies providing products and services similar to our Technology segment, through M&A and other transactions, which may provide competitors access to greater financial and other resources than those of FTI Consulting. This industry is subject to significant and rapid innovation. Larger competitors may be able to invest more in research and development or react more quickly to new regulatory or legal requirements and other changes and may be able to innovate more quickly and efficiently. In addition, companies compete aggressively against our Technology segment on the basis of price, particularly with respect to hosting and e-discovery services.

Our Strategic Communications segment competes with large public relations firms, as well as boutique M&A, crisis communications and public affairs firms.
Some service providers are larger than we are and, on certain engagements, may have an advantage over us with respect to one or more competitive factors. Specialty boutiques or smaller local or regional firms, while not offering the range of services we provide, may compete with us on the basis of geographic proximity, specialty services or pricing advantages.

**Patents, Licenses and Trademarks**

We hold no U.S. patents and have three U.S. patent applications pending. We have no U.S. provisional patent applications pending. We have no Canadian or other international patents, provisional patents or patents pending.

We consider the Acuity®, Radiance™ and our other technologies and software to be proprietary and confidential. We consider our TrialMax® comprehensive trial preparation software to be proprietary and confidential. The TrialMax® software and technology are not protected by patents. We rely upon international copyright laws, non-disclosure agreements and contractual agreements, internal controls, including confidentiality and invention disclosure agreements with our employees and independent contractors, and license agreements with third parties to protect our proprietary information, software and other works. Despite these safeguards, there is a risk that competitors may obtain and seek to use such intellectual property.

We have also developed marketing language such as “Critical Thinking at the Critical Time®” and “Experts with Impact™” and other trademarks, logos and designs. In some cases, but not all, the trademarks have been registered in the U.S. and/or foreign jurisdictions or, in some cases, applications have been filed and are pending. Certain FTI Consulting and Compass-formative marks’ use is pursuant to certain Co-Existence, Consent and/or Settlement agreements. We believe we take the appropriate steps to protect our trademarks and brands.

**Corporate Information**

We incorporated under the laws of the state of Maryland in 1982. We are a publicly traded company with common stock listed on the New York Stock Exchange (the “NYSE”) under the symbol FCN. Our executive offices are located at 555 12th Street NW, Washington, D.C. 20004. Our telephone number is 202-312-9100. Our website is [http://www.fticonsulting.com](http://www.fticonsulting.com).

**Financial Information on Industry Segments and Geographic Areas**

We manage and report operating results through five reportable segments. We also administratively manage our business regionally. See “Risk Factors — Risks Related to Our Operations” for a discussion of risks related to international operations. See Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and Note 18, “Segment Reporting” in Part II, Item 8 of this Annual Report for a discussion of revenues, net income and total assets by business segment and revenues for the U.S., UK and all other foreign countries as a group.

**Available Information**

We make available, free of charge, on or through our website at [http://www.fticonsulting.com](http://www.fticonsulting.com), our annual, quarterly and current reports and any amendments to those reports, our proxy statements, as well as our other filings with the SEC, as soon as reasonably practicable after electronically filing them with the SEC. Information posted on our website is not part of this Annual Report or any other report filed with the SEC in satisfaction of the requirements of the Exchange Act. Copies of this Annual Report, as well as other periodic reports filed with the SEC, may also be requested at no charge from our Corporate Secretary at FTI Consulting, Inc., 6300 Blair Hill Lane, Suite 303, Baltimore, MD 21209, telephone number 410-591-4867.
ITEM 1A. RISK FACTORS

All of the following risks could materially and adversely affect our business, financial condition and results of operations. In addition to the risks discussed below and elsewhere in this Annual Report, other risks and uncertainties not currently known to us or that we currently consider immaterial could, in the future, materially and adversely affect our business, financial condition and financial results.

Risks Related to Our Reportable Segments

Changes in capital markets, M&A activity, legal or regulatory requirements, general economic conditions and monetary or geopolitical disruptions, as well as other factors beyond our control, could reduce demand for our practice offerings or services, in which case our revenues and profitability could decline.

Different factors outside of our control could affect demand for a segment’s practices and our services. These include:

• fluctuations in U.S. and/or global economies, including economic downturns or recessions and the strength and rate of any general economic recoveries;
• the U.S. or global financial markets and the availability, costs, and terms of credit and credit modifications;
• level of leverage incurred by countries or businesses;
• M&A activity;
• frequency and complexity of significant commercial litigation;
• overexpansion by businesses causing financial difficulties;
• business and management crises, including the occurrence of alleged fraudulent or illegal activities and practices;
• new and complex laws and regulations, repeals of existing laws and regulations or changes of enforcement of laws, rules and regulations, including antitrust/competition reviews of proposed M&A transactions;
• other economic, geographic or political factors; and
• general business conditions.

We are not able to predict the positive or negative effects that future events or changes to the U.S. or global economies will have on our business or the business of any particular segment. Fluctuations, changes and disruptions in financial, credit, M&A and other markets, political instability and general business factors could impact various segments’ operations and could affect such operations differently. Changes to factors described above, as well as other events, including by way of example, contractions of regional economies, or the economy of a particular country, trade restrictions, monetary systems, banking, real estate and retail or other industries; debt or credit difficulties or defaults by businesses or countries; new, repeals of or changes to laws and regulations, including changes to the bankruptcy and competition laws of the U.S. or other countries; tort reform; banking reform; a decline in the implementation or adoption of new laws or regulation, or in government enforcement, litigation or monetary damages or remedies that are sought; or political instability may have adverse effects on one or more of our segments or service, practice or industry offerings.

Our revenues, operating income and cash flows are likely to fluctuate.

We experience fluctuations in our revenues and cost structure and the resulting operating income and cash flows and expect that this will continue to occur in the future. We experience fluctuations in our annual and quarterly financial results, including revenues, operating income and earnings per share, for reasons that include: (i) the types and complexity, number, size, timing and duration of client engagements; (ii) the timing of revenue recognition under U.S. GAAP; (iii) the utilization of revenue-generating professionals, including the ability to adjust staffing levels up or down to accommodate the business and prospects of the applicable segment and practice; (iv) the time it takes before a new hire becomes profitable; (v) the geographic locations of our clients or the locations where services are rendered; (vi) billing rates and fee arrangements, including the opportunity and ability to successfully reach milestones and complete, and collect success fees and other outcome-contingent or performance-based fees; (vii) the length of billing and collection cycles and changes in amounts that may become uncollectible; (viii) changes in the frequency and complexity of government regulatory and enforcement activities; (ix) business and asset acquisitions; (x) fluctuations in the exchange rates of various currencies against the U.S. dollar; and (xi) economic factors beyond our control.
The results of different segments and practices may be affected differently by the above factors. Certain of our practices, particularly our restructuring practice, tend to experience their highest demand during periods when market and/or industry conditions are less favorable for many businesses. For example, in periods of limited credit availability, reduced M&A activity and/or declining business and/or consumer spending, while not always the case, there may be increased restructuring opportunities that will cause our restructuring practice to experience high demand. On the other hand, those same factors may cause a number of our other segments and practices, such as our antitrust and competition practice in Economic Consulting, to experience reduced demand. The positive effects of certain events or factors on certain segments and practices may not be sufficient to overcome the negative effects of those same events or factors on other parts of our business. In addition, our mix of practice offerings adds complexity to the task of predicting revenues and results of operations and managing our staffing levels and expenditures across changing business cycles and economic environments.

Our results are subject to seasonal and similar factors, such as during the fourth quarter when our professionals and our clients typically take vacations. We may also experience fluctuations in our operating income and related cash flows because of increases in employee compensation, including changes to our incentive compensation structure and the timing of incentive payments, which we generally pay during the first quarter of each year, or hiring or retention payments, which are paid throughout the year. Also, the timing of investments or acquisitions and the cost of integrating them may cause fluctuations in our financial results, including operating income and cash flows. This volatility makes it difficult to forecast our future results with precision and to assess accurately whether increases or decreases in any one or more quarters are likely to cause annual results to exceed or fall short of previously issued guidance. While we assess our annual guidance at the end of each quarter and update such guidance when we think it is appropriate, unanticipated future volatility can cause actual results to vary significantly from our guidance, even where that guidance reflects a range of possible results and has been updated to take account of partial-year results.

If we do not effectively manage the utilization of our professionals or billable rates, our financial results could decline.

Our failure to manage the utilization of our professionals who bill on an hourly basis, or maintain or increase the hourly rates we charge our clients for our services, could result in adverse consequences, such as non- or lower-revenue-generating professionals, increased employee turnover, fixed compensation expenses in periods of declining revenues, the inability to appropriately staff engagements (including adding or reducing staff during periods of increased or decreased demand for our services), or special charges associated with reductions in staff or operations. Reductions in workforce or increases of billable rates will not necessarily lead to savings. In such events, our financial results may decline or be adversely impacted. A number of factors affect the utilization of our professionals. Some of these factors we cannot predict with certainty, including general economic and financial market conditions; the complexity, number, type, size and timing of client engagements; the level of demand for our services; appropriate professional staffing levels, in light of changing client demands and market conditions; utilization of professionals across segments and geographic regions; competition; and acquisitions. In addition, our global expansion into or within locations where we are not well-known or where demand for our services is not well-developed could also contribute to low or lower utilization rates in certain locations.

Segments may enter into engagements such as fixed fee and time and materials with caps. Failure to effectively manage professional hours and other aspects of alternative fee engagements may result in the costs of providing such services exceeding the fees collected by the Company. Failure to successfully complete or reach milestones with respect to contingent fee or success fee assignments may also lead to lower revenues or the costs of providing services under those types of arrangements may exceed the fees collected by the Company.

Factors that could negatively affect utilization in our segments include:

Corporate Finance & Restructuring — The completion of bankruptcy proceedings; the timing of the completion of other engagements; fewer and smaller restructuring (including bankruptcy) cases; a recovering or strong economy; easy credit availability; low interest rates; and fewer, smaller and less complex M&A and restructuring activity; or less capital markets activity.

Forensic and Litigation Consulting — The settlement of litigation; less frequent instances of significant mismanagement, fraud, wrongdoing or other business problems that could result in fewer or less complex business engagements; fewer and less complex legal disputes; fewer class action suits; the timing of the completion of engagements; less government regulation or fewer regulatory investigations; and the timing of government investigations and litigation.

Economic Consulting — Fewer, smaller and less complex M&A activity; less capital markets activity or fewer complex transactions; a reduced number of regulatory filings and less litigation, reduced or less aggressive antitrust and competition
regulation or enforcement; fewer government investigations and proceedings; and the timing of client utilization of our services.

Technology — The settlement of litigation; a decline in volume and complexity of litigation proceedings and governmental investigations; and volume and timing of M&A activities and degree of enforcement of anti-trust regulations.

Strategic Communications — Fewer event-driven crises affecting businesses; general economic decline that may reduce certain discretionary spending by clients; a decline in capital markets activity, including M&A; and fewer public securities offerings.

Our segments may face risks of fee non-payment, clients may seek to renegotiate existing fees and contract arrangements, and clients may not accept billable rate or price increases, which could result in loss of clients, fee write-offs, reduced revenues and less profitable business.

In some cases, our segments are engaged by certain clients who are experiencing or anticipate experiencing financial distress or are facing complex challenges, are engaged in litigation or regulatory or judicial proceedings, or are facing foreclosure of collateral or liquidation of assets. This may be true in light of general economic conditions; lingering effects of past economic slowdowns or recession; or business- or operations-specific reasons. Such clients may not have sufficient funds to continue operations or to pay for our services. We typically do not receive retainers before we begin performing services on a client’s behalf in connection with a significant number of engagements in our segments. In the cases where we have received retainers, we cannot assure the retainers will adequately cover our fees for the services we perform on behalf of these clients. With respect to bankruptcy cases, bankruptcy courts have the discretion to require us to return all, or a portion of, our fees.

We may receive requests to discount our fees or to negotiate lower rates for our services and to agree to contract terms relative to the scope of services and other terms that may limit the size of an engagement or our ability to pass through costs. We consider these requests on a case-by-case basis. We routinely receive these types of requests and expect this to continue in the future. In addition, our clients and prospective clients may not accept rate increases that we put into effect or plan to implement in the future. Fee discounts, pressure not to increase or even decrease our rates, and less advantageous contract terms could result in the loss of clients, lower revenues and operating income, higher costs and less profitable engagements. More discounts or write-offs than we expect in any period would have a negative impact on our results of operations. There is no assurance that significant client engagements will be renewed or replaced in a timely manner or at all, or that they will generate the same volume of work or revenues or be as profitable as past engagements.

Certain of our clients prefer fixed and other alternative fee arrangements that place revenue ceilings or other limitations on our fee structure or may shift more of our revenue-generating potential to back-end contingent and success fee arrangements. With respect to such alternative fee arrangements, we may discount our rates initially, which could mean that the cost of providing services exceeds the fees collected by the Company during all or a portion of the term of the engagement. In such cases, the Company’s failure to manage the engagement efficiently or collect the success or performance fees could expose the Company to a greater risk of loss on such engagement than other fee arrangements or may cause variations in the Company’s revenues and operating results due to the timing of achievement of the performance-based criteria, if achieved at all. A segment’s ability to service clients with these fee arrangements at a cost that does not directly correlate to time and materials may negatively impact or result in a loss of the profitability of such engagements, adversely affecting the financial results of the segment.

Our Technology segment faces certain risks, including (i) industry consolidation and a highly competitive environment, (ii) client concentration, (iii) downward pricing pressure, (iv) technology changes and obsolescence and (v) failure to protect IP used by the segment, which individually or together could cause the financial results and prospects of this segment and the Company to decline.

Our Technology segment is facing significant competition from other consulting and/or software providers specializing in e-discovery, ESI and the management of electronic content. There continues to be consolidation of companies providing products and services similar to those offered by our Technology segment, which may provide competitors access to greater financial and other resources than those of the Company. Larger competitors may be able to react more quickly to new regulatory or legal requirements and other changes, or innovate more quickly and efficiently. Our Technology segment has been experiencing increasing competition from companies providing similar services at lower prices, particularly with respect to hosting and e-discovery services.

The success of our Technology segment and its ability to compete depends significantly on the IP rights we license from third-parties. There is no assurance that (i) the software we license to provide our services will remain competitive or
technologically innovative, (ii) new, innovative or improved software or products will not be developed by others that will compete more effectively with the software or products we currently license or use to service our customers, or (iii) we can enter into licenses or other agreements on economically advantageous terms to license or enter into other agreements to use new or more innovative third-party software and products to provide our services. If our Technology segment is unable to license or otherwise use competitively innovative or technologically advanced software and products to provide our services, we could be unable to retain clients, grow our business and capitalize on market opportunities, which would adversely affect our operating margins and financial results.

Unauthorized use and misuse of our proprietary IP by employees or third parties could have a material adverse effect on our business, financial condition and results of operations. The available legal remedies for unauthorized or misuse of our proprietary IP may not adequately compensate us for the damages caused by unauthorized use.

**Our segments face certain risks relating to cybersecurity and the failure to protect the confidentiality of client information against misuse or disclosure.**

Our reputation for maintaining the confidentiality of proprietary, confidential and trade secret information is critical to the success of our segments. In addition, our Technology segment is dependent on providing secure information storage to host client information as a service. We routinely face cyber-based attacks and attempts by hackers and similar unauthorized users to gain access to or corrupt our information technology systems, which so far have been unsuccessful. Such attacks could disrupt our business operations, cause us to incur unanticipated losses or expenses, and result in unauthorized disclosures of confidential or proprietary information. We expect to continue to face such attempts. Although we seek to prevent, detect and investigate these network security incidents, and take steps to mitigate the likelihood of network security breaches, there can be no assurance that attacks by unauthorized users will not be attempted in the future or that our security measures will be effective. If we fail to effectively protect the confidentiality of our clients’ or our own IP and proprietary information from disclosure or misuse by our employees, contractors or third parties, the financial results of the affected segment or the Company would be adversely affected. There is no certainty that we can maintain the confidentiality or prevent the misuse of our or our client information.

**We may not manage our growth effectively, and our profitability may suffer.**

We experience fluctuations in growth of our different segments, practices or services, including periods of rapid or declining growth. Periods of rapid expansion may strain our management team or human resources and information systems. To manage growth successfully, we may need to add qualified managers and employees and periodically update our operating, financial and other systems, as well as our internal procedures and controls. We also must effectively motivate, train and manage a larger professional staff. If we fail to add or retain qualified managers, employees and contractors when needed, estimate costs, or manage our growth effectively, our business, financial results and financial condition may suffer.

We cannot assure that we can successfully manage growth through acquisitions and the integration of the companies and assets we acquire or that they will result in the financial, operational and other benefits that we anticipate. Some acquisitions may not be immediately accretive to earnings, and some expansion may result in significant expenditures.

In periods of declining growth, underutilized employees and contractors may result in expenses and costs being a greater percentage of revenues. In such situations, we will have to weigh the benefits of decreasing our workforce or limiting our service offerings and saving costs against the detriment that the Company could experience from losing valued professionals and their industry expertise and clients.

**Risks Related to Our Operations**

**Our international operations involve special risks.**

Our international operations involve financial and business risks that differ from or are in addition to those faced by our U.S. operations, including:

- cultural and language differences;
- limited “brand” recognition;
- different employment laws and rules, employment or service contracts, compensation methods, and social and cultural factors that could result in employee turnover, lower utilization rates, higher costs and cyclical fluctuations in utilization that could adversely affect financial and operating results;
• foreign currency disruptions and currency fluctuations between the U.S. dollar and foreign currencies that could adversely affect financial and operating results;
• different legal and regulatory requirements and other barriers to conducting business;
• greater difficulties in resolving the collection of receivables when legal proceedings are necessary;
• greater difficulties in managing our non-U.S. operations, including client relationships, in certain locations;
• disparate systems, policies, procedures and processes;
• failure to comply with the FCPA and anti-bribery laws of other jurisdictions;
• higher operating costs;
• longer sales and/or collections cycles;
• potential restrictions or adverse tax consequences for the repatriation of foreign earnings, such as trapped foreign losses and importation or withholding taxes;
• different or less stable political and/or economic environments;
• conflicts between and among the U.S. and countries in which we conduct business, including those arising from trade disputes or disruptions, the termination or suspension of treaties, or boycotts; and
• civil disturbances or other catastrophic events that reduce business activity.

If we are not able to quickly adapt to or effectively manage our operations in geographic markets outside the U.S., our business prospects and results of operations could be negatively impacted.

Failure to comply with governmental, regulatory and legal requirements or with our company-wide Code of Ethics and Business Conduct, Anti-Corruption Policy, Policy on Inside Information and Insider Trading, and other policies could lead to governmental or legal proceedings that could expose us to significant liabilities and damage our reputation.

We have a robust Code of Ethics and Business Conduct, Anti-Corruption Policy, Policy on Inside Information and Insider Trading, and other policies and procedures that are designed to educate and establish the standards of conduct that we expect from our executive officers, outside directors, employees, and independent consultants and contractors. These policies require strict compliance with U.S. and local laws and regulations applicable to our business operations, including those laws and regulations prohibiting improper payments to government officials. In addition, as a corporation whose securities are registered under the Securities Act and publicly traded on the NYSE, our executive officers, outside directors, employees and independent contractors are required to comply with the prohibitions against insider trading of our securities. In addition, we impose certain restrictions on the trading of securities of our clients. Nonetheless, we cannot assure our stakeholders that our policies, procedures and related training programs will ensure full compliance with all applicable legal requirements. Illegal or improper conduct by our executive officers, directors, employees, independent consultants or contractors, or others who are subject to our policies and procedures could damage our reputation in the U.S. and internationally or lead to litigation or governmental or regulatory proceedings in the U.S. or foreign jurisdictions, which could result in civil or criminal penalties, including substantial monetary awards, fines and penalties, as well as disgorgement of profits.
We may be required to recognize goodwill impairment charges, which could materially affect our financial results.

We assess our goodwill, trade names and other intangible assets, as well as our other long-lived assets as and when required by GAAP to determine whether they are impaired and, if they are, to record appropriate impairment charges. Factors we consider include significant underperformance relative to expected historical or projected future operating results and significant negative industry or economic trends. We have previously recorded impairment charges to the carrying value of goodwill of certain of our segments, and it is possible that we may be required to record significant impairment charges in the future. Such charges have had and could have an adverse impact on our results of operations.

Risks Related to Our People

Our failure to recruit and retain qualified professionals could negatively affect our financial results and our ability to staff client engagements, maintain relationships with clients and drive future growth.

We deliver sophisticated professional services to our clients. Our success is dependent, in large part, on our ability to keep our supply of skills and resources in balance with client demand around the world. To attract and retain clients, we need to demonstrate professional acumen and build trust and strong relationships. Our professionals have highly specialized skills. They also develop strong bonds with the clients they serve. Our continued success depends upon our ability to attract and retain professionals who have expertise, a good reputation and client relationships critical to maintaining and developing our business. We face intense competition in recruiting and retaining highly qualified professionals to drive our organic growth and support expansion of our services and geographic footprint. We cannot assure that we will be able to attract or retain qualified professionals to maintain or expand our business. If we are unable to successfully integrate, motivate and retain qualified professionals, our ability to continue to secure work may suffer. Moreover, competition has caused our costs of retaining and hiring qualified professionals to increase, a trend that could continue and could adversely affect our operating margins and financial results.

Despite fixed terms or renewal provisions, we could face retention issues during and at the end of the terms of those agreements and large compensation expenses to secure extensions. There is no assurance we will enter into new or extend employment agreements with our professionals. We monitor contract expirations carefully to commence dialogues with professionals regarding their employment in advance of the actual contract expiration dates. Our goal is to renew employment agreements when advisable and to stagger the expirations of the agreements if possible. Because of the concentration of contract expirations in certain years, we may experience high turnover or other adverse consequences, such as higher costs, loss of clients and engagements or difficulty in staffing engagements, if we are unable to renegotiate employment arrangements or the costs of retaining qualified professionals become too high. The implementation of new compensation arrangements may result in the concentration of potential turnover in future years.

Headcount reductions to manage costs during periods of reduced demand for our services could have negative impacts on our business over the longer term.

Our people are our primary assets and account for the majority of our expenses. During periods of reduced demand for our services, or in response to unfavorable changes in market or industry conditions, we may seek to align our cost structure more closely with our revenues and increase our utilization rates by reducing headcount and eliminating or consolidating underused locations in affected business segments or practices. Following such actions, in response to subsequent increases in demand for our services, including as a result of favorable changes in market or industry conditions, we may need to hire, train and integrate additional qualified and skilled personnel and may be unable to do so to meet our needs or our clients’ demands on a timely basis. If we are unable to manage staffing levels on a timely basis in light of changing opportunities or conditions, our ability to accept or service business opportunities and client engagements, take advantage of positive market and industry developments, and realize future growth could be negatively affected, which could negatively impact our revenues and profitability. In addition, while increased utilization resulting from headcount reductions may enhance our profitability in the near term, it could negatively affect our business over the longer term by limiting the time our professionals have to seek out and cultivate new client relationships and win new projects.

We incur substantial costs to hire and retain our professionals, and we expect these costs to continue and to grow.

We may pay hiring or retention bonuses to secure the services of professionals. Those payments have taken the form of unsecured general recourse forgivable loans, stock options, restricted stock, cash-based stock appreciation rights and other equity- and cash-based awards, and cash payments to attract and retain our professional employees. We make forgivable loans to KSIP participants and may provide forgivable or other types of loans to new hires and professionals who join us in connection with acquisitions, as well as to select current employees and other professionals on a case-by-case basis. The
aggregate amount of loans to professionals is significant. We expect to continue issuing unsecured general recourse forgivable loans.

We also provide significant additional payments under the KSIP and annual recurring equity or cash awards under the ICP, the Executive Committee incentive compensation arrangements and other compensation programs, including awards in the form of restricted stock and other stock- or cash-based awards or, alternatively, cash if we do not have adequate equity securities available under stockholder-approved equity plans.

In addition, our Economic Consulting segment has contracts with select economists or professionals that provide for compensation equal to a percentage of such individual’s annual collected client fees plus a percentage of the annual fees generated by junior professionals working on engagements managed by such professionals, which results in compensation expenses for that segment being a higher percentage of revenues and EBITDA than the compensation paid by other segments. We expect that these arrangements will continue and that the Company may enter into similar arrangements with other economists and professionals hired by the Company.

We rely heavily on our executive officers and the heads of our operating segments and industry leaders for the success of our business.

We rely heavily on our executive officers and the heads of our operating segments, regional locations and industries to manage our operations. Given the highly specialized nature of our services and the scale of our operations, our executive officers and the heads of our operating segments and industry and regional leaders must have a thorough understanding of our service offerings, as well as the skills and experience necessary to manage a large organization in diverse geographic locations. We are unable to predict with certainty the impact that leadership transitions may have on our business operations, prospects, financial results, client relationships, or employee retention or morale.

Professionals may leave our Company to form or join competitors, and we may not have, or may choose not to pursue, legal recourse against such professionals.

Our professionals typically have close relationships with the clients they serve, based on their expertise and bonds of personal trust and confidence. Therefore, the barriers to our professionals pursuing independent business opportunities or joining our competitors should be considered low. Although our clients generally contract for services with us as a company, and not with an individual professional, in the event that a professional leaves, such clients may decide that they prefer to continue working with a specific professional rather than with our Company. Substantially all of our written employment arrangements with our senior managing directors and equivalent employees include non-competition and non-solicitation covenants. These restrictions have generally been drafted to comply with state “reasonableness” standards. However, states generally interpret restrictions on competition narrowly and in favor of employees. Therefore, a state may hold certain restrictions on competition to be unenforceable. In the case of employees outside the U.S., we draft non-competition provisions in an effort to comply with applicable foreign law. In the event an employee departs and acts in a way that we believe violates his or her non-competition or non-solicitation agreement, we will consider any legal remedies we may have against such person on a case-by-case basis. We may decide that preserving cooperation and a professional relationship with a former employee or client, or other concerns, outweighs the benefits of any possible legal recourse. We may also decide that the likelihood of success does not justify the costs of pursuing a legal remedy. Therefore, there may be times we may decide not to pursue legal action, even if it is available to us.

Risks Related to Our Client Relationships

If we are unable to accept client engagements due to real or perceived relationship issues, our revenues, growth, client engagements and prospects may be negatively affected.

Our inability to accept engagements from existing or prospective clients, represent multiple clients in connection with the same or competitive engagements, or any requirement that we resign from a client engagement may negatively impact our revenues, growth and financial results. While we follow internal practices to assess real and potential issues in the relationships between and among our clients, engagements, segments, practices and professionals, such concerns cannot always be avoided. For example, we generally will not represent parties adverse to each other in the same matter. Under U.S. federal bankruptcy rules, we generally may not represent both a debtor and its creditors in the same proceeding, and we are required to notify the U.S. Trustee of real or potential conflicts. Even if we begin a bankruptcy-related engagement, the U.S. Trustee could find that we no longer meet the disinterestedness standard because of real or potential changes in our status as a disinterested party and order us to resign, which could result in disgorgement of fees. Acquisitions may require us to resign from a client engagement because of relationship issues that are not currently identifiable. In addition, businesses that we acquire or employees who join us may not be free to accept engagements they could have accepted prior to our acquisition or hire because of relationship issues.
Claims involving our services could harm our overall professional reputation and our ability to compete and attract business or hire or retain qualified professionals.

Our engagements involve matters that may result in a severe impact on a client’s business, cause the client a substantial monetary loss or prevent the client from pursuing business opportunities. Our ability to attract new clients and generate new and repeat engagements or hire professionals depends upon our ability to maintain a high degree of client satisfaction, as well as our reputation among industry professionals. As a result, any claims against us involving the quality of our services may be more damaging than similar claims against businesses in other industries.

We may incur significant costs and may lose engagements as a result of claims by our clients regarding our services.

Many of our engagements involve complex analysis and the exercise of professional judgment, including litigation and governmental investigatory matters where we act as experts. Therefore, we are subject to the risk of professional and other liabilities. Although we believe we maintain an appropriate amount of insurance, it is limited. Damages and/or expenses resulting from any successful claim against us, for indemnity or otherwise, in excess of the amount of insurance coverage will be borne directly by us and could harm our profitability and financial resources. Any claim by a client or third party against us could expose us to reputational issues that adversely affect our ability to attract new or maintain existing engagements or clients or qualified professionals or other employees, consultants or contractors.

Our clients may terminate our engagements with little or no notice and without penalty, which may result in unexpected declines in our utilization and revenues.

Our engagements center on transactions, disputes, litigation and other event-driven occurrences that require independent analysis or expert services. Transactions may be postponed or canceled, litigation may be settled or dismissed, and disputes may be resolved, in each case with little or no prior notice to us. If we cannot manage our work in process, our professionals may be underutilized until we can reassign them or obtain new engagements, which can adversely affect financial results.

The engagement letters that we typically enter into with clients do not obligate them to continue to use our services. Typically, our engagement letters permit clients to terminate our services at any time without penalties. In addition, our business involves large client engagements that we staff with a substantial number of professionals. At any time, one or more client engagements may represent a significant portion of a segment’s revenues. If we are unable to replace clients or revenues as engagements end or if clients unexpectedly cancel engagements with us or curtail the scope of our engagements and we are unable to replace the revenues from those engagements, eliminate the costs associated with those engagements or find other engagements to utilize our professionals, the financial results of the Company could be adversely affected.

We may not have, or may choose not to pursue, legal remedies against clients that terminate their engagements.

The engagement letters that we typically have with clients do not obligate them to continue to use our services and permit them to terminate the engagement without penalty at any time. Even if the termination of an ongoing engagement by a client could constitute a breach of the client’s engagement agreement, we may decide that preserving the overall client relationship is more important than seeking damages for the breach and, for that or other reasons, decide not to pursue any legal remedies against a client, even though such remedies may be available to us. We make the determination whether to pursue any legal actions against a client on a case-by-case basis.

Failures of our internal information technology systems controls.

Our reputation for providing secure information storage and maintaining the confidentiality of proprietary, confidential and trade secret information is critical to the success of our businesses, especially our Technology segment, which hosts client information as a service. We routinely face cyber-based attacks and attempts by hackers and similar unauthorized users to gain access to or corrupt our information technology systems, which so far have been unsuccessful. Such attacks could disrupt our business operations, cause us to incur unanticipated losses or expenses, and result in unauthorized disclosures of confidential or proprietary information. We expect to continue to face such attempts. Although we seek to prevent, detect and investigate these network security incidents and have taken steps to mitigate the likelihood of network security breaches, there can be no assurance that attacks by unauthorized users will not be attempted in the future or that our security measures will be effective.

Compromise of confidential or proprietary information could damage our reputation, harm our businesses and adversely impact our financial results.

The Company’s own confidential and proprietary information and that of our clients could be compromised, whether intentionally or unintentionally, by our employees, consultants or vendors. A compromise of the security of our information technology systems leading to theft or misuse of our own or our clients’ proprietary or confidential information, or the public disclosure or use of such information by others, could result in losses, third-party claims against us and reputational harm,
including the loss of clients. The theft or compromise of our or our clients’ information could negatively impact our reputation, financial results and prospects. In addition, if our reputation is damaged due to a data security breach, our ability to attract new engagements and clients may be impaired or we may be subjected to damages or penalties, which could negatively impact our businesses, financial results or financial condition.

**Governmental focus on data privacy and security could increase our costs of operations.**

In reaction to publicized incidents in which electronically stored personal and other information has been lost, accessed or stolen, or transmitted by or to third parties without permission, U.S. and non-U.S. governmental authorities have proposed or adopted or are considering proposing or adopting data security and/or data privacy statutes or regulations. Continued governmental focus on data security and privacy may lead to additional legislative and regulatory action, which could increase the complexity of doing business in the U.S. or the applicable jurisdiction. The increased emphasis on information security and the requirements to comply with applicable U.S. and foreign data security and privacy laws and regulations may increase our costs of doing business and negatively impact our financial results.

**Risks Related to Competition**

*If we fail to compete effectively, we may miss new business opportunities or lose existing clients, and our revenues and profitability may decline.*

The market for some of our consulting services is highly competitive. We do not compete against the same companies across all of our segments, practices, services, industries or geographic regions. Instead, we compete with different companies or businesses of companies depending on the particular nature of a proposed engagement and the types of requested service(s) and the location of the client or delivery of the service(s). Our operations are highly competitive.

Our competitors include large organizations, such as the global accounting firms and the large management and financial consulting companies that offer a broad range of consulting services; investment banking firms; IT consulting and software companies, which offer niche services that are the same or similar to services or products offered by one or more of our segments; and small firms and independent contractors that focus on specialized services. Some of our competitors have significantly more financial resources, a larger national or international presence, larger professional staffs and greater brand recognition than we do. Some have lower overhead and other costs and can compete through lower cost-service offerings.

Since our business depends in large part on professional relationships, our business has low barriers to entry for professionals electing to start their own firms or work independently. In addition, it is relatively easy for professionals to change employers.

If we cannot compete effectively or if the costs of competing, including the costs of hiring and retaining professionals, become too expensive, our revenue growth and financial results could be negatively affected and may differ materially from our expectations.

*We may face competition from parties who sell us their businesses and from professionals who cease working for us.*

In connection with our acquisitions, we generally obtain non-solicitation agreements from the professionals we hire, as well as non-competition agreements from senior managers and professionals. The agreements prohibit such individuals from competing with us during the term of their employment and for a fixed period afterwards and from seeking to solicit our employees or clients. In some cases, but not all, we may obtain non-competition or non-solicitation agreements from parties who sell us their businesses or assets. The duration of post-employment non-competition and non-solicitation agreements typically ranges from six to 12 months. Non-competition agreements with the sellers of businesses or assets that we acquire typically continue longer than 12 months. Certain activities may be carved out of, or otherwise may not be prohibited by, these arrangements. We cannot assure that one or more of the parties from whom we acquire a business or assets, or who do not join us or leave our employment, will not compete with us or solicit our employees or clients in the future. States and foreign jurisdictions may interpret restrictions on competition narrowly and in favor of employees or sellers. Therefore, certain restrictions on competition or solicitation may be unenforceable. In addition, we may not pursue legal remedies if we determine that preserving cooperation and a professional relationship with a former employee or his or her clients, or other concerns, outweighs the benefits of any possible legal recourse or the likelihood of success does not justify the costs of pursuing a legal remedy. Such persons, because they have worked for our Company or a business that we acquire, may be able to compete more effectively with us, or be more successful in soliciting our employees and clients, than unaffiliated third parties.
Risks Related to Acquisitions

We will consider future strategic or opportunistic acquisitions. In those cases, some or all of the following risks could be applicable.

We may have difficulty integrating acquisitions or convincing clients to allow assignment of their engagements to us, which can reduce the benefits we receive from acquisitions.

The process of managing and integrating acquisitions into our existing operations may result in unforeseen operating difficulties and may require significant financial, operational and managerial resources that would otherwise be available for the operation, development and organic expansion of our existing operations. To the extent that we misjudge our ability to properly manage and integrate acquisitions, we may have difficulty achieving our operating, strategic and financial objectives.

Acquisitions also may involve a number of special financial, business and operational risks, such as:

- difficulties in integrating diverse corporate cultures and management styles;
- disparate policies and practices;
- client relationship issues;
- decreased utilization during the integration process;
- loss of key existing or acquired personnel;
- increased costs to improve or coordinate managerial, operational, financial and administrative systems;
- dilutive issuances of equity securities, including convertible debt securities, to finance acquisitions;
- the assumption of legal liabilities;
- future earn-out payments or other price adjustments;
- potential future write-offs relating to the impairment of goodwill or other acquired intangible assets or the revaluation of assets;
- difficulty or inability to collect receivables; and
- undisclosed liabilities.

In addition to the integration challenges mentioned above, our acquisitions of non-U.S. companies offer distinct integration challenges relating to foreign laws and governmental regulations, including tax and employee benefit laws, and other factors relating to operating in countries other than the U.S., which we have addressed above in the discussion regarding the difficulties we may face operating globally.

Asset transactions may require us to seek client consents to the assignment of their engagements to us or a subsidiary. All clients may not consent to assignments. In certain cases, such as government contracts and bankruptcy engagements, the consent of clients cannot be solicited until after the acquisition has closed. Further, such engagements may be subject to security clearance requirements or bidding provisions with which we might not be able to comply. There is no assurance that clients of the acquired entity or local, state, federal or foreign governments will agree to novate or assign their contracts to us.

The Company may also hire groups of selected professionals from another company. In such event, there may be restrictions on the ability of the professionals who join the Company to compete and work on client engagements. In addition, the Company may enter into arrangements with the former employers of those professionals regarding limitations on their work until any time restrictions pass. In such circumstances, there is no assurance that the Company will enter into mutually agreeable arrangements with any former employer, and the utilization of such professionals may be limited, and our financial results could be negatively affected until their restrictions end. The Company could also face litigation risks from group hires.

We may be unable to take advantage of opportunistic acquisition situations, which may adversely affect our ability to expand or diversify our business.

At the time an acquisition opportunity presents itself, internal and external pressures (including, but not limited to, competition for such acquisition, the cost of such acquisition, borrowing capacity under our senior secured bank revolving
credit facility (as amended and restated on November 30, 2018, the “Credit Facility”) or the availability and cost of alternative financing) may cause us to be unable to pursue or complete an acquisition.

An acquisition may not be accretive in the near term or at all.

Competitive market conditions may require us to pay a price that represents a higher multiple of revenues or profits for an acquisition. As a result of these competitive dynamics, cost of the acquisition or other factors, certain acquisitions may not be accretive to our overall financial results at the time of the acquisition or at all.

We may have a different system of governance and management from a company we acquire or its parent, which could cause professionals who join us from an acquired company to leave us.

Our governance and management policies and practices will not mirror the policies and practices of an acquired company or its parent. In some cases, different management practices and policies may lead to workplace dissatisfaction on the part of professionals who join our Company. Some professionals may choose not to join our Company or leave after joining us. Existing professionals may leave us as well. The loss of key professionals may harm our business and financial results and cause us not to realize the anticipated benefits of the acquisition.

Due to fluctuations in our stock price, acquisition candidates may be reluctant to accept shares of our common stock as purchase price consideration, use of our shares as purchase price consideration may be dilutive or the owners of certain companies we seek to acquire may insist on stock price guarantees.

We may structure an acquisition to pay a portion of the purchase price in shares of our common stock. The number of shares issued as consideration is typically based on an average closing price per share of our common stock for a number of days prior to the closing of such acquisition. We believe that payment in the form of shares of common stock of FTI Consulting provides the acquired entity and its principals with a vested interest in the future success of the acquisition and the Company. Stock market volatility, generally, or FTI Consulting’s stock price volatility, specifically, may result in acquisition candidates being reluctant to accept our shares as consideration. In such cases, we may have to issue more shares if stock constitutes part of the consideration, offer stock price guarantees, pay the entire purchase price in cash or negotiate an alternative price structure. The result may be an increase in the cost of an acquisition.

Certain past acquisition-related agreements have contained stock price guarantees that resulted in cash payments in the future if the price per share of FTI Consulting common stock fell below a specified per share market value on the date restrictions lapse. There is no assurance that an acquisition candidate will not negotiate stock price guarantees with respect to a future acquisition, which may increase the cost of such acquisition.

Risks Related to Our Indebtedness

Our leverage could adversely affect our financial condition or operating flexibility if the Company fails to comply with operating covenants under applicable debt instruments.

Our Credit Facility, or our other indebtedness outstanding from time to time, contains or may contain operating covenants that may, subject to exceptions, limit our ability and the ability of our subsidiaries to, among other things:

- create, incur or assume certain liens;
- make certain restricted payments, investments and loans;
- create, incur or assume additional indebtedness or guarantees;
- create restrictions on the payment of dividends or other distributions to us from our restricted subsidiaries;
- engage in M&A transactions, consolidations, sale-leasebacks, joint ventures, and asset and security sales and dispositions;
- pay dividends or redeem or repurchase our capital stock;
- alter the business that we and our subsidiaries conduct;
- engage in certain transactions with affiliates;
- modify the terms of certain indebtedness;
- prepay, redeem or purchase certain indebtedness; and
• make material changes to accounting and reporting practices.

In addition, the Credit Facility includes a financial covenant that requires us not to exceed a maximum consolidated total net leverage ratio (the ratio of funded debt (less unrestricted cash up to $150.0 million) to Consolidated EBITDA, as defined in the Credit Facility).

Operating results below a certain level or other adverse factors, including a significant increase in interest rates, could result in us being unable to comply with certain covenants. If we violate any applicable covenants and are unable to obtain waivers, our agreements governing our indebtedness or other applicable agreement could be declared in default and could be accelerated, which could permit, in the case of secured debt, the lenders to foreclose on our assets securing the debt thereunder. If the indebtedness is accelerated, we may not be able to repay our debt or borrow sufficient funds to refinance it. Even if we are able to obtain new financing, it may not be on commercially reasonable terms or on terms that are acceptable to us. If our debt is in default for any reason, our cash flows, financial results or financial condition could be materially and adversely affected. In addition, complying with these covenants may cause us to take actions that are not favorable to holders of our indebtedness outstanding from time to time and may make it more difficult for us to successfully execute our business strategy and compete against companies that are not subject to such restrictions.

Despite our current level of indebtedness, we and our subsidiaries may still incur significant additional indebtedness, which could further exacerbate the risks associated with our substantial indebtedness.

Our current level of indebtedness could have important consequences on our future operations. We and our subsidiaries may be able to incur substantial additional indebtedness, including additional secured indebtedness, in the future. The terms of the indenture, dated as of August 20, 2018, between us and U.S. Bank National Association, as trustee (the "Indenture") governing the 2.0% Convertible Senior Notes due 2023 (the “2023 Convertible Notes”) do not restrict us from incurring additional debt, securing existing or future debt, recapitalizing our debt or taking a number of other actions that are not limited by the terms of the Indenture. The terms of the agreements governing our Credit Facility and other indebtedness limit, but do not prohibit, us from incurring additional indebtedness.

Our ability to incur additional indebtedness may have the effect of reducing the funds available to pay amounts due with respect to our indebtedness. If we incur new indebtedness or other liabilities, the related risks that we and our subsidiaries may face could intensify.

We may not be able to generate sufficient cash to service our indebtedness, and we may be forced to take other actions to satisfy our payment obligations under our indebtedness, which may not be successful.

Our ability to make scheduled payments on or to refinance our indebtedness depends on our future performance, including the performance of our subsidiaries, which will be affected by financial, business and economic conditions, competition and other factors. We will not be able to control many of these factors, such as the general economy, economic conditions in the industries in which we operate and competitive pressures. Our cash flow may not be sufficient to allow us to pay principal and interest on our indebtedness and to meet our other obligations. If our cash flows and capital resources are insufficient to fund our debt service obligations, we may be forced to reduce or delay investments and capital expenditures or to sell assets, seek additional capital, or restructure or refinance our indebtedness. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations. In addition, the terms of existing or future debt agreements, including our Credit Facility, may restrict us from pursuing any of these alternatives.

In the event that we need to refinance all or a portion of our outstanding indebtedness before maturity or as it matures, we may not be able to obtain terms as favorable as the terms of our existing indebtedness or refinance our existing indebtedness at all. If interest rates or other factors existing at the time of refinancing result in higher interest rates upon refinancing, we will incur higher interest expense. Furthermore, if any rating agency changes our credit rating or outlook, our debt and equity securities could be negatively affected, which could adversely affect our financial condition and financial results.

Our Credit Facility is guaranteed by substantially all of our domestic subsidiaries and will be required to be guaranteed by future domestic subsidiaries, including those that join us in connection with acquisitions.

Substantially all of our U.S. subsidiaries guarantee our obligations under our Credit Facility, and substantially all of their assets are pledged as collateral for the Credit Facility. Future U.S. subsidiaries will be required to provide similar guarantees under the Credit Facility. If we default on any guaranteed indebtedness, our U.S. subsidiaries could be required to make payments under their guarantees, and our senior secured creditors could foreclose on our U.S. subsidiaries’ assets to satisfy unpaid obligations, which would materially adversely affect our business and financial results.
We may not have the ability to raise the funds necessary to settle conversions of the 2023 Convertible Notes or to repurchase the 2023 Convertible Notes upon a fundamental change, and the agreements governing our other indebtedness contain, and our future debt may contain, limitations on our ability to pay cash upon conversion or repurchase of the 2023 Convertible Notes.

Holders of the 2023 Convertible Notes will have the right to require us to repurchase their 2023 Convertible Notes upon the occurrence of a fundamental change at a fundamental change repurchase price equal to 100% of the principal amount of the 2023 Convertible Notes to be repurchased, plus any accrued and unpaid interest. In addition, upon conversion of the 2023 Convertible Notes, unless we elect to deliver solely shares of our common stock to settle such conversion (other than paying cash in lieu of delivering any fractional share), we will be required to make cash payments in respect of the 2023 Convertible Notes being converted in accordance with the terms of the Indenture governing the 2023 Convertible Notes. However, we may not have enough available cash or be able to obtain financing at the time we are required to make repurchases of the 2023 Convertible Notes. Our Credit Facility prohibits us from making any cash payments on the conversion or repurchase of the 2023 Convertible Notes if a default or an event of default under that facility exists or would result from such conversion or repurchase, or if, after giving effect to such conversion or repurchase (and any additional indebtedness incurred in connection with such conversion or a repurchase), we would not be in pro forma compliance with certain financial tests under that the Credit Facility.

Any new credit facility that we may enter into may have similar restrictions. In addition, our ability to repurchase the 2023 Convertible Notes or to pay cash upon conversions of the 2023 Convertible Notes may be limited by law, by regulatory authority or by agreements governing our future indebtedness. Our failure to repurchase the 2023 Convertible Notes at a time when the repurchase is required by the Indenture or to pay any cash payable on future conversions of the Notes as required by the Indenture would constitute a default under the Indenture. A default under the Indenture or the fundamental change itself could also lead to a default under agreements governing our existing and future indebtedness. If the repayment of the related indebtedness were to be accelerated after any applicable notice or grace periods, we may not have sufficient funds to repay the indebtedness and repurchase the 2023 Convertible Notes or make cash payments upon conversions thereof.

The conditional conversion feature of the 2023 Convertible Notes, if triggered, may adversely affect our financial condition and operating results.

In the event the conditional conversion feature of the 2023 Convertible Notes is triggered, holders of the 2023 Convertible Notes will be entitled to convert the 2023 Convertible Notes at their option at any time during specific periods listed in the Indenture governing the 2023 Convertible Notes. If one or more holders elect to convert their 2023 Convertible Notes, unless we elect to satisfy our conversion obligation by delivering solely shares of our common stock (other than paying cash in lieu of delivering any fractional share), we would be required to settle a portion or all of our conversion obligation through the payment of cash, which could adversely affect our liquidity. In addition, even if holders do not elect to convert their 2023 Convertible Notes, we could be required under applicable accounting rules to reclassify all or a portion of the outstanding principal of the 2023 Convertible Notes as a current rather than long-term liability, which would result in a material reduction of our net working capital.

The accounting method for convertible debt securities that may be settled in cash, such as the 2023 Convertible Notes, could have a material effect on our reported financial results.

Under Accounting Standards Codification 470-20, Debt with Conversion and Other Options ("ASC 470-20"), an entity must separately account for the liability and equity components of convertible debt instruments (such as the 2023 Convertible Notes) that may be settled entirely or partially in cash upon conversion in a manner that reflects the issuer’s economic interest cost. The effect of ASC 470-20 on the accounting for the 2023 Convertible Notes is that the equity component is required to be included in the additional paid-in capital section of stockholders’ equity on our consolidated balance sheet, and the value of the equity component would be treated as original issue discount for purposes of accounting for the debt component of the 2023 Convertible Notes. As a result, we will be required to record a greater amount of non-cash interest expense in current periods presented as a result of the amortization of the discounted carrying value of the 2023 Convertible Notes to their face amount over the term of the 2023 Convertible Notes. We will report lower net income in our financial results because ASC 470-20 will require interest to include both the current period’s amortization of the debt discount and the instrument’s coupon interest, which could adversely affect our reported or future financial results, the trading price of our common stock and the trading price of the 2023 Convertible Notes.

In addition, under certain circumstances, convertible debt instruments (such as the 2023 Convertible Notes) that may be settled entirely or partly in cash are currently accounted for utilizing the treasury stock method, the effect of which is that the shares issuable upon conversion of the 2023 Convertible Notes are not included in the calculation of diluted earnings per share, except to the extent that the conversion value of the 2023 Convertible Notes exceeds their principal amount. Under the treasury
stock method, for diluted earnings per share purposes, the transaction is accounted for as if the number of shares of common stock that would be necessary to settle such excess, if we elected to settle such excess in shares, is issued. We cannot be sure that the accounting standards in the future will continue to permit the use of the treasury stock method. If we are unable to use the treasury stock method in accounting for the shares issuable upon conversion of the 2023 Convertible Notes, then our diluted earnings per share would be adversely affected.

*Our variable rate indebtedness will subject us to interest rate risk, which could cause our annual debt service obligations to increase significantly.*

Borrowings under our Credit Facility will be at variable rates of interest, which expose us to interest rate risk. If interest rates increase, our debt service obligations on the variable rate indebtedness would increase even though the amount borrowed remained the same. An increase in debt service obligations under our variable rate indebtedness could affect our ability to make payments required under the terms of the agreements governing our indebtedness or our other indebtedness outstanding from time to time.

**ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

**ITEM 2. PROPERTIES**

Our executive offices located in Washington, D.C., consist of 93,507 square feet under a lease expiring April 2028. Our principal corporate facilities located in Bowie, Maryland, consist of 30,835 square feet under a lease expiring April 2028. We also lease offices to support our operations in 45 other cities across the U.S., including New York, Chicago, Denver, Houston, Dallas, Los Angeles and San Francisco, and we lease office space to support our international locations in 27 countries — the United Kingdom, Ireland, Finland, France, Germany, Spain, Belgium, Denmark, Israel, Australia, Malaysia, China (including Hong Kong), Japan, Singapore, the United Arab Emirates, South Korea, South Africa, Argentina, Brazil, Colombia, Mexico, Canada, Indonesia, India, Qatar, the Cayman Islands and the British Virgin Islands. We believe our existing leased facilities are adequate to meet our current requirements and that suitable space will be available as needed.

**ITEM 3. LEGAL PROCEEDINGS**

From time to time in the ordinary course of business, we are subject to claims, asserted or unasserted, or named as a party to lawsuits or investigations. Litigation, in general, and IP and securities litigation, in particular, can be expensive and disruptive to normal business operations. Moreover, the results of legal proceedings cannot be predicted with any certainty, and in the case of more complex legal proceedings, such as IP and securities litigation, the results are difficult to predict at all. We evaluate litigation claims and legal proceedings to assess the likelihood of unfavorable outcomes and to estimate, if possible, the amount of potential losses. Based on these assessments and estimates, we establish reserves and/or disclose the relevant litigation claims or legal proceedings, as appropriate. These assessments and estimates are based on the information available to management at the time and involve a significant amount of management judgment. Actual outcomes or losses may differ materially from those anticipated at the time. We currently are not aware of any asserted or unasserted legal proceedings or claims that we believe would have a material adverse effect on our financial condition or results of our operations.

**ITEM 4. MINE SAFETY DISCLOSURES**

Not applicable.
ITEM 5.  MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Common Stock

Our common stock currently trades on the NYSE under the symbol FCN. As of January 31, 2019, the number of holders of record of our common stock was 181.

Securities Authorized for Issuance under Equity Compensation Plans

The following table includes the number of shares of common stock of the Company authorized or to be issued upon exercise of outstanding options, warrants and rights awarded under our employee equity compensation plans as of December 31, 2018.

(1) On June 2, 2016, our Board of Directors authorized a stock repurchase program of up to $100.0 million (the “Repurchase Program”). On each of May 18, 2017 and December 1, 2017, our Board of Directors authorized an additional $100.0 million, increasing the Repurchase Program to an aggregate authorization of $300.0 million. During the year ended December 31, 2018, we repurchased an aggregate of 755,803 shares of our outstanding common stock under the Repurchase Program at an average repurchase price of $53.88 per share for a total cost of approximately $40.7 million.

(2) Includes 3,322 shares of common stock withheld to cover payroll tax withholdings related to the lapse of restrictions on restricted stock.

(3) Includes 3,216 shares of common stock withheld to cover payroll tax withholdings related to the lapse of restrictions on restricted stock.

(4) During the month ended November 30, 2018, we repurchased and retired 89,824 shares of common stock, at an average per share price of $67.35, for an aggregate cost of $6.0 million.

(5) During the month ended December 31, 2018, we repurchased and retired 328,904 shares of common stock, at an average per share price of $62.20, for an aggregate cost of $20.5 million.
ITEM 6. SELECTED FINANCIAL DATA

We derived the selected financial data presented below for the periods or dates indicated from our consolidated financial statements. The data below should be read in conjunction with our consolidated financial statements, related notes and other financial information appearing in Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and Part II, Item 8 of this Annual Report.

A number of factors have caused our results of operations and financial position to vary significantly from one year to the next and can make it difficult to evaluate period-to-period comparisons because of a lack of comparability. The most significant of these factors include: acquisitions, goodwill impairment charges, special charges and stock repurchases.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion and analysis of our consolidated financial condition, results of operations, liquidity and capital resources for each of the three years in the period ended December 31, 2018 and significant factors that could affect our prospective financial condition and results of operations. This discussion should be read in conjunction with our consolidated financial statements and notes included in Part II, Item 8, “Financial Statements and Supplementary Data” of this Annual Report on Form 10-K (the “Annual Report”). Historical results and any discussion of prospective results may not indicate our future performance.

Business Overview

FTI Consulting is a global business advisory firm dedicated to helping organizations manage change, mitigate risk and resolve disputes: financial, legal, operational, political and regulatory, reputational and transactional. Individually, each of our practices is staffed with experts recognized for the depth of their knowledge and a track record of making an impact. Collectively, FTI Consulting offers a comprehensive suite of services designed to assist clients across the business cycle, from proactive risk management to rapid response to unexpected events and dynamic environments.

We report financial results for the following five reportable segments:

Our Corporate Finance & Restructuring (“Corporate Finance”) segment focuses on the strategic, operational, financial and capital needs of our clients around the world and delivers a wide range of service offerings related to restructuring, business transformation and transaction support. Our restructuring practice includes corporate restructuring, including bankruptcy and interim management services. Our business transformation and transactions support practices include financings, mergers and acquisitions ("M&A"), M&A integration, valuations and tax advice, as well as financial, operational and performance improvement services.

Our Forensic and Litigation Consulting (“FLC”) segment provides law firms, companies, government clients and other interested parties with multidisciplinary, independent dispute advisory, investigations, data analytics, forensic accounting, business intelligence and risk mitigation services, as well as interim management and performance improvement services for our health solutions practice clients.

Our Economic Consulting segment provides law firms, companies, government entities and other interested parties with analysis of complex economic issues for use in legal, regulatory and international arbitration proceedings, strategic decision making and public policy debates in the United States ("U.S.") and around the world.

Our Technology segment offers a comprehensive portfolio of information governance and electronic discovery ("e-discovery") software, services and consulting support to companies, law firms, courts and government agencies worldwide. Our services allow our clients to control the risk and expense of e-discovery events more confidently, as well as manage their data in the context of compliance and risk.

Our Strategic Communications segment designs and executes communications strategies for management teams and boards of directors to help them seize opportunities, manage financial, regulatory and reputational challenges, navigate market disruptions, articulate their brand, stake a competitive position, and preserve and grow their operations.

We derive substantially all of our revenues from providing professional services to both U.S. and global clients. Most of our services are rendered under time-and-expense arrangements that obligate the client to pay us a fee for the hours that we incur at agreed-upon rates. Under this arrangement, we typically bill our clients for reimbursable expenses, which may include the cost of producing our work product and other direct expenses that we incur on behalf of the client, such as travel costs. We also render services for which certain clients may be required to pay us a fixed fee or recurring retainer. These arrangements are generally cancelable at any time. Some of our engagements contain performance-based arrangements in which we earn a success fee when and if certain predefined outcomes occur. This type of success fee may supplement a time-and-expense or fixed fee arrangement. Success fee revenues may cause variations in our revenues and operating results due to the timing of achieving the performance-based criteria. Seasonal factors, such as the timing of our employees’ and clients’ vacations and holidays, may impact the timing of our revenues across our segments.

In our Technology segment, certain clients are billed based on the amount of data stored on our electronic systems, the volume of information processed or the number of users licensing our Ringtail® software prior to its sale in September 2018, and other software products. We licensed, and in some cases continue to license, certain products directly to end users, as well as indirectly through our channel partner relationships. Unit-based revenues are defined as revenues billed on a per item, per page or some other unit-based method and include revenues from data processing and hosting, software usage and software
licensing. Unit-based revenues include revenues associated with the software products that are made available to customers, either via a web browser (“on-demand”) or installed at our customer or partner locations (“on-premise”). On-demand revenues are charged on a unit or monthly basis and include, but are not limited to, processing and review related functions. On-premise revenues are composed of upfront license fees, with recurring support and maintenance.

Our financial results are primarily driven by:

- the number, size and type of engagements we secure;
- the rate per hour or fixed charges we charge our clients for services;
- the utilization rates of the revenue-generating professionals we employ;
- the timing of revenue recognition related to revenues subject to certain performance-based contingencies;
- the number of revenue-generating professionals;
- licensing of our software products and other technology services;
- the types of assignments we are working on at different times;
- the length of the billing and collection cycles; and
- the geographic locations of our clients or locations in which services are rendered.

We define acquisition growth as revenues of acquired companies in the first 12 months following the effective date of an acquisition. Our definition of organic growth is the change in revenues, excluding the impact of all such acquisitions.

When significant, we identify the estimated impact of foreign currency translation (“FX”) driven by our businesses with functional currencies other than the U.S. dollar (“USD”), on the period-to-period performance results. The estimated impact of FX is calculated as the difference between the prior period results multiplied by the average foreign currency exchange rates to USD in the current period and the prior period results, multiplied by the average foreign currency rates to USD in the prior period.

Non-GAAP Financial Measures

In the accompanying analysis of financial information, we sometimes use information derived from consolidated and segment financial information that may not be presented in our financial statements or prepared in accordance with generally accepted accounting principles in the United States (“GAAP”). Certain of these financial measures are considered “not in conformity with GAAP ("non-GAAP financial measures") under the U.S. Securities and Exchange Commission ("SEC") rules. Specifically, we have referred to the following non-GAAP financial measures:

- Total Segment Operating Income
- Adjusted EBITDA
- Total Adjusted Segment EBITDA
- Adjusted EBITDA Margin
- Adjusted Net Income
- Adjusted Earnings per Diluted Share
- Free Cash Flow

We have included the definitions of Segment Operating Income (Loss) and Adjusted Segment EBITDA below in order to more fully define the components of certain non-GAAP financial measures in the accompanying analysis of financial information. As described in Note 18, “Segment Reporting” in Part II, Item 8, “Financial Statements and Supplementary Data” of this Annual Report, we evaluate the performance of our operating segments based on Adjusted Segment EBITDA, and Segment Operating Income (Loss) is a component of the definition of Adjusted Segment EBITDA.

We define Segment Operating Income (Loss), a GAAP financial measure, as a segment’s share of consolidated operating income. We define Total Segment Operating Income, which is a non-GAAP financial measure, as the total of Segment
Operating Income (Loss) for all segments, which excludes unallocated corporate expenses. We use Segment Operating Income (Loss) for the purpose of calculating Adjusted Segment EBITDA. We define Adjusted Segment EBITDA, a GAAP financial measure as a segment’s share of consolidated operating income before depreciation, amortization of intangible assets, remeasurement of acquisition-related contingent consideration, special charges and goodwill impairment charges. We use Adjusted Segment EBITDA as a basis to internally evaluate the financial performance of our segments because we believe it reflects current core operating performance and provides an indicator of the segment’s ability to generate cash. We define Adjusted EBITDA Margin as Adjusted EBITDA as a percentage of total revenues.

We define Total Adjusted Segment EBITDA, which is a non-GAAP financial measure, as the total of Adjusted Segment EBITDA for all segments, which excludes unallocated corporate expenses. We define Adjusted EBITDA, which is a non-GAAP financial measure, as consolidated net income before income tax provision, other non-operating income (expense), depreciation, amortization of intangible assets, remeasurement of acquisition-related contingent consideration, special charges, goodwill impairment charges, gain or loss on sale of a business and losses on early extinguishment of debt. We believe that these non-GAAP financial measures, when considered together with our GAAP financial results and GAAP financial measures, provide management and investors with a more complete understanding of our operating results, including underlying trends. In addition, EBITDA is a common alternative measure of operating performance used by many of our competitors. It is used by investors, financial analysts, rating agencies and others to value and compare the financial performance of companies in our industry. Therefore, we also believe that these measures, considered along with corresponding GAAP financial measures, provide management and investors with additional information for comparison of our operating results with the operating results of other companies.

We define Adjusted Net Income and Adjusted Earnings per Diluted Share (“Adjusted EPS”), which are non-GAAP financial measures, as net income and earnings per diluted share (“EPS”), respectively, excluding the impact of remeasurement of acquisition-related contingent consideration, special charges, goodwill impairment charges, losses on early extinguishment of debt, non-cash interest expense on convertible notes, gain or loss on sale of a business and the impact of adopting the 2017 U.S. Tax Cuts and Jobs Act (the “2017 Tax Act”). We use Adjusted Net Income for the purpose of calculating Adjusted EPS. Management uses Adjusted EPS to assess total Company operating performance on a consistent basis. We believe that these non-GAAP financial measures, when considered together with our GAAP financial results, provide management and investors with an additional understanding of our business operating results, including underlying trends.

We define Free Cash Flow, which is a non-GAAP financial measure, as net cash provided by operating activities less cash payments for purchases of property and equipment. We believe this non-GAAP financial measure, when considered together with our GAAP financial results, provides management and investors with an additional understanding of the Company’s ability to generate cash for ongoing business operations and other capital deployment.

Non-GAAP financial measures are not defined in the same manner by all companies and may not be comparable with other similarly titled measures of other companies. Non-GAAP financial measures should be considered in addition to, but not as a substitute for or superior to, the information contained in our Consolidated Statements of Comprehensive Income. Reconciliations of non-GAAP financial measures to the most directly comparable GAAP financial measures are included elsewhere in this report.

**Revenues**

Revenues increased $220.1 million, or 12.2%, from 2017 to 2018. The increase in revenues was primarily due to higher global demand across all segments, particularly in our Corporate Finance and FLC segments.

**Special charges**

There were no special charges in 2018. For the year ended December 31, 2017, we recorded special charges of $40.9 million related to certain targeted reductions of staff in areas of each segment to realign our workforce with current business demand. In addition, cost-cutting actions were taken in certain corporate departments where we were able to streamline support activities and reduce our real estate costs.

**Gain on sale of business**

During the year ended December 31, 2018, we sold our Ringtail® e-discovery software and related business (collectively, "Ringtail"). The net proceeds from the sale were $50.3 million, which resulted in a pre-tax gain of $13.0 million.

**Loss on early extinguishment of debt**

In order to more effectively utilize the Company’s growing cash balances, maintain financial flexibility and reduce cash interest, we issued $316.3 million aggregate principal amount of 2.0% convertible senior notes due 2023 (“2023 Convertible Notes”) and used a portion of the proceeds, along with cash on hand, to retire $300 million aggregate principal amount of 6.0% senior notes due 2022 (the “2022 Notes”) during 2018. We recognized a $9.1 million loss on early extinguishment of debt for 2018, consisting primarily of a redemption premium of $6.0 million and a $3.1 million non-cash write-off of unamortized deferred financing costs. The impact of early extinguishment of debt is excluded from the calculation of Adjusted EBITDA.

**Net income**

Net income increased $42.6 million, or 39.5%, from 2017 to 2018. This increase was primarily due to higher operating profits across all business segments and a $13.0 million gain related to the sale of Ringtail, which were partially offset by a $9.1 million loss on early extinguishment of debt and $3.0 million of non-cash interest on convertible notes. Net income in 2017 included a $44.9 million net tax benefit to reflect the impact of adopting the 2017 Tax Act, which was nearly offset by $40.9 million in pre-tax special charges related to headcount and real estate reductions.

**Adjusted EBITDA**

Adjusted EBITDA increased $73.7 million, or 38.4%, from 2017 to 2018. Adjusted EBITDA was 13.1% of revenues for the year ended December 31, 2018 compared with 10.6% of revenues for the year ended December 31, 2017. The increase in Adjusted EBITDA was primarily due to higher revenues across all business segments, which were partially offset by an increase in compensation, primarily related to higher variable compensation and an increase in billable headcount and higher selling, general and administrative (“SG&A”) expenses.
**EPS and Adjusted EPS**

EPS increased $1.18 to $3.93 in 2018 compared with $2.75 in 2017. 2018 EPS included a loss on early extinguishment of debt, which decreased EPS by $0.17 and non-cash interest on convertible notes, which decreased EPS by $0.06. These decreases were partially offset by a gain on the sale of Ringtail, which increased EPS by $0.16. EPS for the year ended December 31, 2017 included the net tax benefit recorded to reflect the impact of adopting the 2017 Tax Act, which increased EPS by $1.14, and a special charge related to headcount and real estate reductions, which reduced EPS by $0.70.

Adjusted EPS increased $1.68 to $4.00 in 2018 compared with $2.32 in 2017, largely due to improved operating results.

**Liquidity and Capital Allocation**

Cash balances increased by $122.1 million, or 64.3%, to $312.1 million for the year ended December 31, 2018. Cash provided by operating activities increased $83.0 million to $230.7 million in 2018 as compared with $147.6 million in 2017. The increase was primarily due to higher cash collections resulting from higher revenues, partially offset by an increase in cash paid for salaries and benefits and increased income tax payments. Days sales outstanding (“DSO”) was 93 days as of December 31, 2018 and 91 days as of December 31, 2017.

A portion of net cash provided by operating activities was used to repurchase and retire 0.8 million shares of our common stock under our Repurchase Program for an average price per share of $53.88, at a total cost of $40.7 million during the year ended December 31, 2018. We had $72.6 million remaining under the Repurchase Program to repurchase additional shares as of December 31, 2018. Additionally, we used a portion of the proceeds from the issuance of the 2023 Convertible Notes to repurchase 0.2 million shares of our common stock at $76.51 per share for a total cost of $15.0 million. This was a separate repurchase transaction outside of the Repurchase Program.

Free Cash Flow, which is a non-GAAP financial measure, for the years ended December 31, 2018 and 2017 was $198.4 million and $115.6 million, respectively. The increase was primarily due to an increase in net cash provided by operating activities, as described above.

**Headcount**

Our total headcount increased 3.4% from 4,609 as of December 31, 2017 to 4,768 as of December 31, 2018. The following table includes the net billable headcount additions (reductions) for the year ended December 31, 2018.

</tbody>
</table>
Year Ended December 31, 2018 Compared with December 31, 2017

Revenues and Operating Income

See “Segment Results” for an expanded discussion of Revenues and Adjusted Segment EBITDA.

Special Charges

There were no special charges during the year ended December 31, 2018. Special charges for the year ended December 31, 2017 were $40.9 million. See Note 5, "Special Charges" in Part II, Item 8 of this Annual Report for expanded disclosure.

Unallocated Corporate Expenses

Unallocated corporate expenses increased $13.5 million, or 16.2%, to $96.6 million in 2018 from $83.1 million in 2017. Excluding the impact of special charges of $3.7 million recorded in 2017, unallocated corporate expenses increased by $17.1 million in 2018, or 21.6%. The increase was primarily due to an increase in variable compensation expense, higher costs for corporate and regional business development initiatives and the senior managing director meeting held in December 2018.

Interest Income and Other

Interest income and other, which includes FX gains and losses, increased $1.2 million to $5.0 million for the year ended December 31, 2018 from $3.8 million for the year ended December 31, 2017. The increase was primarily due to a $1.5 million increase in interest income resulting from investments of excess cash and a $0.3 million increase in net unrealized FX gains, partially offset by a $0.6 million loss on sale of investment in 2018. FX gains and losses, both realized and unrealized, relate to the remeasurement or settlement of monetary assets and liabilities that are denominated in a currency other than an entity’s functional currency. These monetary assets and liabilities include cash, as well as third-party and intercompany receivables and payables.

Interest Expense

Interest expense increased $1.8 million, or 7.1%, to $27.1 million in 2018 from $25.4 million in 2017. The increase in interest expense reflects additional interest expense related to the 2023 Convertible Notes issuance that overlapped the period until the redemption of the 2022 Notes, partially offset by lower interest expense due to lower outstanding borrowings under our senior secured bank revolving credit facility.

Income Tax Provision (Benefit)

Our income tax provision was $57.2 million for 2018 as compared with an income tax benefit of $20.9 million for 2017. Excluding the discrete income tax benefit in 2017 from the adoption of the 2017 Tax Act, our effective tax rate was 27.5% for 2018 and 27.6% for 2017. The 2018 rate was favorably impacted by reductions in the U.S. income tax rate as a result of the 2017 Tax Act, which was partially offset by an unfavorable discrete tax adjustment relating to the sale of Ringtail®. The 2017 effective tax rate was favorably impacted by an unusually high mix of foreign earnings compared with low U.S. earnings due to 2017 special charges.

Year Ended December 31, 2017 Compared with December 31, 2016

Revenues and Operating Income

See “Segment Results” for an expanded discussion of Revenues and Adjusted Segment EBITDA.

Special Charges

Special charges for the year ended December 31, 2017 were $40.9 million. Special charges for the year ended December 31, 2016 were $10.4 million. See Note 5, "Special Charges" in Part II, Item 8 of this Annual Report for an expanded disclosure.

Unallocated Corporate Expenses

Unallocated corporate expenses decreased $5.0 million, or 5.7%, to $83.1 million in 2017 from $88.2 million in 2016. Excluding the impact of special charges of $3.7 million recorded in 2017, unallocated corporate expenses decreased by $8.1 million in 2017, or 9.3%. The decrease was primarily due to lower infrastructure department spend and lower executive compensation expenses, which were partially offset by higher outside legal expenses.
**Interest Income and Other**

Interest income and other, which includes FX gains and losses, decreased $6.7 million to $3.8 million for the year ended December 31, 2017 from $10.5 million for the year ended December 31, 2016. The decrease was primarily due to a net unrealized FX loss, which was $0.1 million for the year ended December 31, 2017 compared with a $4.9 million gain for the year ended December 31, 2016. FX gains and losses, both realized and unrealized, relate to the remeasurement or settlement of monetary assets and liabilities that are denominated in a currency other than an entity’s functional currency. These monetary assets and liabilities include cash, as well as third-party and intercompany receivables and payables.

**Interest Expense**

Interest expense increased $0.5 million, or 2.2%, to $25.4 million in 2017 from $24.8 million in 2016 due to the impact of a 0.7% increase in average interest rates on our borrowings under our senior secured bank revolving credit facility in 2017, partially offset by lower average borrowings outstanding during 2017 as compared with 2016.

**Income Tax Provision (Benefit)**

Our income tax benefit was $20.9 million for 2017 as compared with an income tax provision of $42.3 million for 2016. Our 2017 income tax benefit included a discrete income tax benefit of $44.9 million related to the adoption of the 2017 Tax Act on December 22, 2017. Excluding the impact of the 2017 Tax Act, our effective tax rate was 27.6% for 2017 as compared with an effective tax rate of 33.1% for 2016. The 2017 effective tax rate, excluding the impact of adopting the 2017 Tax Act, declined related to the mix of higher foreign and U.S. state earnings in lower taxed jurisdictions as compared with the prior year.

The $44.9 million discrete adjustment for 2017 related to the adoption of the 2017 Tax Act impact includes the following:

- $65.1 million income tax benefit related to the remeasurement of U.S. deferred tax liabilities from the previous U.S. federal tax rate of 35% to the newly enacted rate of 21%; and
- $18.7 million income tax expense related to a Transition Tax on a deemed repatriation of accumulated foreign earnings and profits as required under the new tax law.

**SEGMENT RESULTS**

**Total Adjusted Segment EBITDA**

We evaluate the performance of each of our operating segments based on Adjusted Segment EBITDA, which is a GAAP measure. The following table reconciles Net Income to Total Adjusted Segment EBITDA, a non-GAAP financial measure, for the years ended December 31, 2018, 2017 and 2016.

(1) The number of revenue-generating professionals for the Technology segment excludes as-needed professionals, who we employ based on demand for the segment’s services. We employed an average of 253, 305 and 287 as-needed employees during the years ended December 31, 2018, 2017 and 2016, respectively.

(2) We calculate the utilization rate for our billable professionals by dividing the number of hours that all of our billable professionals worked on client assignments during a period by the total available working hours for all of our billable professionals during the same period. Available hours are determined by the standard hours worked by each employee, adjusted for part-time hours, U.S. standard work weeks and local country holidays. Available working hours include vacation and professional training days but exclude holidays. Utilization rates are presented for our segments that primarily bill clients on an hourly basis. We have not presented utilization rates for our Technology and Strategic Communications segments as most of the revenues of these segments are not generated on an hourly basis.

(3) For engagements where revenues are based on number of hours worked by our billable professionals, average billable rate per hour is calculated by dividing revenues (excluding revenues from success fees, pass-through revenues and outside consultants) for a period by the number of hours worked on client assignments during the same period. We have not presented average billable rates per hour for our Technology and Strategic Communications segments as most of the revenues of these segments are not based on billable hours.

(1) Revenues less direct cost of revenues.  
(2) Gross profit as a percent of revenues.

### Year Ended December 31, 2018 Compared with December 31, 2017

Revenues increased $82.4 million, or 17.1%, from 2017 to 2018. Acquisition-related revenues contributed $9.5 million, or 2.0%, compared with 2017. Excluding the acquisition, revenues increased $73.0 million, or 15.1%. The revenue increase was largely driven by increased demand for our restructuring services and business transformation and transactions services, primarily in North America and Europe, Middle East and Africa (“EMEA”), along with higher realization due to mix of client engagements and staffing globally, which was partially offset by lower success fees.

Gross profit increased $46.8 million, or 28.7%, from 2017 to 2018. Gross profit margin increased 3.4 percentage points from 2017 to 2018. This increase was primarily due to increased utilization because of higher demand in our global restructuring services and business transformation and transaction services along with higher realization, partially offset by lower success fees.

SG&A expenses increased $8.3 million, or 9.9%, from 2017 to 2018. SG&A expenses were 16.3% of revenues in 2018 compared with 17.4% in 2017. The increase in SG&A expenses was primarily due to higher bad debt, infrastructure support, recruiting and other general administrative expenses.

### Year Ended December 31, 2017 Compared with December 31, 2016

Revenues decreased $1.2 million, or 0.3%, from 2016 to 2017. Acquisition-related revenues contributed $10.1 million, or 2.1%, compared with 2016. Excluding the acquisition, revenues decreased $11.3 million, or 2.3%. This decrease was primarily driven by lower demand for restructuring practice offerings globally, which was partially offset by increased demand in the business transformation practice and higher success fees.
Gross profit decreased $12.9 million, or 7.3%, from 2016 to 2017. Gross profit margin decreased 2.6 percentage points from 2016 to 2017. This decrease was due to lower utilization driven by an increase in billable headcount, which was partially offset by higher success fees.

SG&A expenses increased $2.2 million, or 2.7%, from 2016 to 2017, which included $1.2 million from a recent acquisition and the impact of higher bad debt expenses, partially offset by other general overhead expenses. Bad debt expenses in 2016 included collections of prior period write-offs. SG&A expenses were 17.4% of revenues in 2017 compared with 16.9% in 2016.

</table>

(1) Revenues less direct cost of revenues.
(2) Gross profit as a percent of revenues.

**Year Ended December 31, 2018 Compared with December 31, 2017**

Revenues increased $58.0 million, or 12.5%, from 2017 to 2018. The increase was driven by higher demand for our construction solutions, investigations and disputes services, particularly across North America and EMEA.

Gross profit increased $33.0 million, or 21.1%, from 2017 to 2018. Gross profit margin increased 2.5 percentage points from 2017 to 2018. This increase in gross profit margin is related to higher utilization, primarily due to higher demand for our construction solutions and investigations services.

SG&A expenses increased $8.9 million, or 10.1%, from 2017 to 2018. SG&A expenses were 18.6% of revenues in 2018 compared with 19.0% in 2017. The increase in SG&A expenses was due to higher personnel, rent and occupancy, travel and other administrative costs.
Year Ended December 31, 2017 Compared with December 31, 2016

Revenues increased $4.6 million, or 1.0%, from 2016 to 2017. This increase was driven by increased volume in the global construction solutions practice and investigations practice in EMEA, which was partially offset by lower demand in the health solutions practice.

Gross profit increased $13.6 million, or 9.5%, from 2016 to 2017. Gross profit margin increased 2.7 percentage points from 2016 to 2017. This increase in gross profit margin is related to higher utilization, largely in the construction solutions, disputes and investigations practices, partially offset by lower success fees in our health solutions practice.

SG&A expenses decreased $1.5 million, or 1.6%, from 2016 to 2017. SG&A expenses were 19.0% of revenues in 2017 compared with 19.6% in 2016. The decrease in SG&A expenses was due to lower costs from headcount reductions, primarily in our health solutions practice, partially offset by higher bad debt expenses.

(1) Revenues less direct cost of revenues.
Gross profit as a percent of revenues.

Year Ended December 31, 2018 Compared with December 31, 2017

Revenues increased $38.0 million, or 7.7%, from 2017 to 2018. The increase was primarily due to higher demand for antitrust services in EMEA and financial economic services in North America, which were partially offset by lower demand for antitrust services in North America and lower realization due to mix of client engagements in EMEA.

Gross profit increased $9.7 million, or 7.5%, from 2017 to 2018. Gross profit margin was consistent from 2017 to 2018. Higher margins from improved utilization were entirely offset by lower realization and higher variable compensation as a percentage of revenues.
SG&A expenses increased $1.7 million, or 2.3%, from 2017 to 2018. SG&A expenses were 13.8% of revenues in 2018 compared with 14.5% in 2017. The increase in SG&A expenses was primarily driven by higher rent and occupancy costs, which were partially offset by lower bad debt expense.

**Year Ended December 31, 2017 Compared with December 31, 2016**

Revenues decreased $4.5 million, or 0.9%, from 2016 to 2017. This decrease was primarily driven by lower demand for financial economics services in North America, which was partially offset by higher demand for antitrust services in EMEA and international arbitration services in North America.

Gross profit decreased $8.6 million, or 6.2%, from 2016 to 2017. Gross profit margin decreased 1.4 percentage points from 2016 to 2017. This decrease was primarily due to a decline in utilization, resulting from both lower demand and an increase in billable headcount.

SG&A expenses increased $4.6 million, or 6.8%, from 2016 to 2017. SG&A expenses were 14.5% of revenues in 2017 compared with 13.5% in 2016. The increase in SG&A expenses was driven primarily by higher bad debt, compensation, depreciation and infrastructure support costs, which were partially offset by lower legal fees.

</table>

(1) Revenues less direct cost of revenues.
(2) Gross profit as a percent of revenues.
(3) Includes personnel involved in direct client assistance and revenue-generating consultants and excludes professionals employed on an as-needed basis.
Year Ended December 31, 2018 Compared with December 31, 2017

Revenues increased $10.9 million, or 6.2%, from 2017 to 2018. The increase in revenues was primarily due to an increase in both demand and pricing for consulting services, an increase in demand for hosting and higher realized pricing for M&A-related managed reviews. This increase was partially offset by lower pricing for hosting and $2.0 million in lower revenues from software licensing due to the Ringtail® divestiture. Higher consulting revenues were driven by increased demand for information governance, privacy and security services and global investigations.

Gross profit increased $1.3 million, or 1.7%, from 2017 to 2018. Gross profit margin decreased 1.7 percentage points to 40.2% from 2017 to 2018. The decrease in gross profit margin was largely due to a lower mix of high-margin hosting and software licensing revenues.

SG&A expenses decreased $3.2 million, or 5.1%, from 2017 to 2018. SG&A expenses were 32.1% of revenues in 2018 compared with 35.9% in 2017. The decrease in SG&A expenses was primarily due to lower research and development expenses due to the Ringtail® divestiture, partially offset by an increase in other general administrative expenses. Research and development expenses related to software development were $8.7 million in 2018, a decline of $6.2 million, compared with $14.9 million in 2017.

Year Ended December 31, 2017 Compared with December 31, 2016

Revenues decreased $2.9 million, or 1.6%, from 2016 to 2017. This decrease was primarily driven by lower pricing for hosting services as a result of a decline in legacy hosting matters at the end of their cycle, coupled with lower demand for managed review offerings, partially offset by higher demand for hosting services as a result of new engagements. Additionally, higher demand for consulting was driven by growth in new engagements, as well as growth in information governance engagements.

Gross profit increased $3.2 million, or 4.6%, from 2016 to 2017. Gross profit margin increased 2.4 percentage points to 41.9% from 2016 to 2017. This margin increase was due to higher pricing for consulting, higher demand for hosting and lower depreciation expense, which was partially offset by lower pricing for hosting services.

SG&A expenses decreased $1.3 million, or 2.0%, from 2016 to 2017. SG&A expenses were 35.9% of revenues in 2017 compared with 36.1% in 2016. This decrease was due to lower salary and benefits and lower research and development expenses, partially offset by higher sales commissions. Research and development expenses related to software development were $14.9 million in 2017, a decline of $2.6 million, compared with $17.5 million in 2016.
Revenues increased $30.8 million, or 16.0%, from 2017 to 2018, which included a 1.6% estimated positive impact from FX. Excluding the estimated positive impact of FX, revenues increased $27.8 million or 14.4%. The increase was primarily due to higher project-based revenues in North America and higher retainer- and project-based revenues in EMEA. These increases were primarily driven by an increase in public affairs and financial communications services, as well as an increase in pass-through revenues.

Gross profit increased $16.8 million, or 23.8%, from 2017 to 2018. Gross profit margin increased 2.4 percentage points from 2017 to 2018. The increase in gross profit margin was due to lower fixed compensation as a percentage of revenues, partially offset by higher variable compensation and a higher proportion of lower margin pass-through revenues.

SG&A expenses increased $0.8 million, or 1.8%, from 2017 to 2018. SG&A expenses were 20.9% of revenues in 2018 compared with 23.9% in 2017. The increase in SG&A expenses was primarily due to higher infrastructure support costs, bad debt and variable compensation, partially offset by lower expenses related to acquisition-related contingent consideration.

Year Ended December 31, 2017 Compared with December 31, 2016

Revenues increased $1.3 million, or 0.7%, from 2016 to 2017. This increase was due to higher retainer-based revenues across all regions, which was partially offset by lower project income in North America, primarily in the financial communications practice.
Gross profit decreased $2.8 million, or 3.8%, from 2016 to 2017. Gross profit margin decreased 1.7 percentage points from 2016 to 2017. This decrease was primarily due to fewer large, high-margin engagements in North America, as well as higher compensation as a result of increased average billable headcount.

SG&A expenses decreased $0.6 million, or 1.2%, from 2016 to 2017. SG&A expenses were 23.9% of revenues in 2017 compared with 24.3% in 2016. The decrease in SG&A expenses was primarily due to lower staff costs, partially offset by higher travel and entertainment expenses.

We have generally financed our day-to-day operations, capital expenditures and acquisitions through cash flows from operations. During the first quarter of our fiscal year, our cash needs generally exceed our cash flows from operations due to the payment of annual incentive compensation. Our operating cash flows generally exceed our cash needs subsequent to the second quarter of each year.

Our operating assets and liabilities consist primarily of billed and unbilled accounts receivable, notes receivable from employees, accounts payable, accrued expenses and accrued compensation expenses. The timing of billings and collections of receivables, as well as compensation and vendor payments, affect the changes in these balances.

DSO is a performance measure used to assess how quickly revenues are collected by the Company. We calculate DSO at the end of each reporting period by dividing net accounts receivable reduced by billings in excess of services provided, by revenues for the quarter, adjusted for changes in foreign exchange rates. We multiply the result by the number of days in the quarter.

Free Cash Flow, a non-GAAP financial measure, for the three years ended December 31, 2018, 2017 and 2016 was $198.4 million, $115.6 million and $204.6 million, respectively.

**Year Ended December 31, 2018 Compared with Year Ended December 31, 2017**

Net cash provided by operating activities increased $83.0 million, or 56.3%, from 2017 to 2018. The increase in net cash provided by operating activities was primarily due to higher cash collections, partially offset by an increase in cash paid for salaries and benefits and higher income tax payments. DSO was 93 days as of December 31, 2018 and 91 days as of December 31, 2017.

Net cash provided by investing activities increased $59.4 million, or 146.1%, from 2017 to 2018. The Company received proceeds of $50.3 million from the sale of Ringtail® in 2018. Capital expenditures were $32.3 million for 2018 as compared with $32.0 million for 2017.

Net cash used in financing activities decreased $23.4 million, or 16.6%, from 2017 to 2018. Cash used in financing activities in 2018 included the $300 million redemption of the 2022 Notes, $100 million of net repayments under our senior secured bank revolving credit facility (as amended and restated on November 30, 2018, the “Credit Facility”), $16.1 million payments of debt issue costs, redemption premium and other redemption costs, and $55.7 million in common stock repurchases. These cash outflows were partially offset by $316.3 million in proceeds from the issuance of the 2023 Convertible Notes and $38.5 million from the issuance of common stock under our equity compensation plans. Net cash used in financing activities for the year ended December 31, 2017 included payments of $168.1 million for common stock repurchases and $5.2 million cash paid for acquisition-related contingent consideration, partially offset by $30.0 million of net borrowings under our senior secured bank revolving credit facility.
Year Ended December 31, 2017 Compared with Year Ended December 31, 2016

Net cash provided by operating activities decreased $85.9 million, or 36.8%, from 2016 to 2017. The decrease was primarily due to higher compensation payments, including salaries, bonuses and severance, and lower cash collections. This was partially offset by lower income tax payments in the year ended December 31, 2017. DSO was 91 days as of December 31, 2017 and 2016.

Net cash used in investing activities increased $10.5 million, or 34.9%, from 2016 to 2017. Payment for the acquisition of substantially all of the assets of a business completed in 2017 by our Corporate Finance segment was $8.9 million, net of cash received. Payment for the acquisition completed in 2016 by our Strategic Communications segment was $1.2 million, net of cash received. Capital expenditures were $32.0 million for 2017 as compared with $28.9 million for 2016.

Net cash used in financing activities increased $15.6 million, or 12.5%, from 2016 to 2017. Cash used in financing activities in 2017 included $168.1 million in common stock repurchases and $5.2 million cash paid for acquisition-related contingent consideration, partially offset by $30.0 million of net borrowings under our senior secured bank revolving credit facility and the receipt of $2.8 million of refundable deposits related to one of our foreign entities. Net financing activities for 2016 included repayments of $130.0 million of borrowings under our senior secured bank revolving credit facility and $21.5 million in common stock repurchases, partially offset by $21.7 million in cash received from the issuance of common stock under our equity compensation plan and the receipt of $4.0 million of refundable deposits related to one of our foreign entities.

Capital Resources

As of December 31, 2018, our capital resources included $312.1 million of cash and cash equivalents and available borrowing capacity of $549.0 million under a $550.0 million revolving line of credit under our Credit Facility. As of December 31, 2018, we had no outstanding borrowings under our Credit Facility and $1.0 million of outstanding letters of credit, which reduced the availability of borrowings under the Credit Facility. We use letters of credit primarily in lieu of security deposits for our leased office facilities. The $550.0 million revolving line of credit under the Credit Facility includes a $75.0 million sublimit for borrowings in currencies other than USD, including the euro, British pound, Australian dollar and Canadian dollar.

The availability of borrowings, as well as issuances and extensions of letters of credit, under our Credit Facility is subject to specified conditions. We may choose to repay outstanding borrowings under the Credit Facility at any time before maturity without premium or penalty. Borrowings under the Credit Facility in USD, euro and British pound bear interest at an annual rate equal to the London Interbank Offered Rate ("LIBOR"), plus an applicable margin or an alternative base rate plus an applicable margin. The alternative base rate means a fluctuating rate per annum equal to the highest of (1) the rate of interest in effect for such day as the prime rate announced by Bank of America, (2) the federal funds rate plus the sum of 50 basis points, and (3) the one-month LIBOR plus 100 basis points. Borrowings under the Credit Facility in Canadian dollars bear interest at an annual rate equal to the Canadian Dealer Offered Rate plus an applicable margin. Borrowings under the Credit Facility in Australian dollars bear interest at an annual rate equal to the Bank Bill Swap Reference Bid Rate plus an applicable margin. The Credit Facility is guaranteed by substantially all of our domestic subsidiaries and is secured by a first priority security interest in substantially all of the assets of FTI Consulting and such domestic subsidiaries. Subject to certain conditions, at any time prior to maturity, we will be able to invite existing and new lenders to increase the size of the facility up to a maximum of $700.0 million.

Our Credit Facility and other indebtedness outstanding from time to time contains or may contain covenants that, among other things, may limit our ability to: incur additional indebtedness; create liens; pay dividends on our capital stock, make distributions or repurchases of our capital stock or make specified other restricted payments; consolidate, merge or sell all or substantially all of our assets; guarantee obligations of other entities or our foreign subsidiaries; enter into hedging agreements; enter into transactions with affiliates or related persons; or engage in any business other than consulting-related businesses. In addition, the Credit Facility includes a financial covenant that requires us not to exceed a maximum consolidated total net leverage ratio (the ratio of funded debt (less unrestricted cash up to $150.0 million) to Consolidated EBITDA, as defined in the Credit Facility). As of December 31, 2018, we were in compliance with the covenants contained in the Credit Facility and the indenture, dated as of August 20, 2018, between us and U.S. Bank National Association, as trustee (the "Indenture") governing the 2023 Convertible Notes.

Future Capital Needs

We anticipate that our future capital needs will principally consist of funds required for:

- operating and general corporate expenses relating to the operation of our businesses;
-
• capital expenditures, primarily for information technology equipment, office furniture and leasehold improvements;
• debt service requirements, including interest payments on our long-term debt;
• compensation for designated executive management and senior managing directors under our various long-term incentive compensation programs;
• discretionary funding of our stock repurchase program;
• contingent obligations related to our acquisitions;
• potential acquisitions of businesses; and
• other known future contractual obligations.

We currently anticipate capital expenditures of $31 million to $38 million to support our organization during 2019, including direct support for specific client engagements. Our estimate takes into consideration the needs of our existing businesses but does not include the impact of any purchases that we may be required to make as a result of future acquisitions or specific client engagements that are not currently contemplated. Our capital expenditure requirements may change if our staffing levels or technology needs change significantly from what we currently anticipate, if we are required to purchase additional equipment specifically to support new client engagements or for their purposes or if we pursue and complete additional acquisitions.

2023 Convertible Notes

Our 2023 Convertible Notes were issued pursuant to the Indenture. The 2023 Convertible Notes bear interest at a fixed rate of 2.0% per year, payable semiannually in arrears on February 15 and August 15 of each year, beginning on February 15, 2019. The 2023 Convertible Notes will mature on August 15, 2023, unless earlier converted or repurchased. Upon conversion, the 2023 Convertible Notes may be settled, at our election in cash, shares of our common stock or a combination of cash and shares of our common stock.

Each $1,000 principal amount of the 2023 Convertible Notes will initially be convertible into 9.8643 shares of our common stock, which is equivalent to an initial conversion price of approximately $101.38 per share of common stock, subject to adjustment upon the occurrence of specified events. Prior to the close of business on the business day immediately preceding May 15, 2023, the 2023 Convertible Notes may be converted only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on September 30, 2018 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on, and including, the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period after any five consecutive trading day period in which the trading price (as defined in the Indenture) per $1,000 principal amount of the 2023 Convertible Notes for each trading day of the Measurement Period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate in effect on each such trading day; or (3) upon the occurrence of specified corporate events. On or after May 15, 2023, until the close of business on the business day immediately preceding the maturity date of August 15, 2023, holders may convert their 2023 Convertible Notes at any time, regardless of the foregoing circumstances.

We may not redeem the 2023 Convertible Notes prior to the maturity date.

If we undergo a fundamental change (as defined in the Indenture), subject to certain conditions, holders may require us to repurchase for cash all or part of their 2023 Convertible Notes in principal amounts of $1,000 or a multiple thereof. The fundamental change repurchase price will be equal to 100% of the principal amount of the 2023 Convertible Notes to be repurchased, plus accrued and unpaid interest, if any, to, but excluding, the fundamental change repurchase date. In addition, in certain circumstances, we may be required to increase the conversion rate for any 2023 Convertible Notes converted in connection with a make-whole fundamental change (as defined in the Indenture). See Note 1, "Description of Business and Summary of Significant Accounting Policies" and Note 13, "Long-Term Debt" in Part II, Item 8 and "Risk Factors" in Part I, Item 1A of this Annual Report for a further discussion of the 2023 Convertible Notes.

Cash Flows

For the last several years, our cash flows from operations have exceeded our cash needs for capital expenditures and debt service requirements. We believe that our cash flows from operations, supplemented by short-term borrowings under our
Credit Facility, as necessary, will provide adequate cash to fund our long-term cash needs from normal operations for the next 12 months or longer.

Our conclusion that we will be able to fund our cash requirements by using existing capital resources and cash generated from operations does not take into account the impact of any future acquisitions, unexpected significant changes in number of employees or other unanticipated uses of cash. The anticipated cash needs of our business could change significantly if we pursue and complete additional business acquisitions, if our business plans change, if economic conditions change from those currently prevailing or from those now anticipated, or if other unexpected circumstances arise that may have a material effect on the cash flow or profitability of our business, including material negative changes in the operating performance or financial results of our business. Any of these events or circumstances, including any new business opportunities, could involve significant additional funding needs in excess of the identified currently available sources and could require us to raise additional debt or equity funding to meet those needs. Our ability to raise additional capital, if necessary, is subject to a variety of factors that we cannot predict with certainty, including:

- our future profitability;
- the quality of our accounts receivable;
- our relative levels of debt and equity;
- the volatility and overall condition of the capital markets; and
- the market price of our securities.

Any new debt funding, if available, may be on terms less favorable to us than our Credit Facility or the Indenture that governs our 2023 Convertible Notes.

**Off-Balance Sheet Arrangements**

We have no off-balance sheet arrangements other than operating leases, and we have not entered into any transactions involving unconsolidated subsidiaries or special purpose entities.

**Future Contractual Obligations**

The following table sets forth our estimates as to the amounts and timing of contractual payments for our most significant contractual obligations as of December 31, 2018. The information in the table reflects future unconditional payments and is based on the terms of the relevant agreements, appropriate classification of items under GAAP currently in effect and certain assumptions such as interest rates. Future events could cause actual payments to differ from these amounts.

Future contractual obligations related to our long-term debt assume that payments will be made based on the current payment schedule and that interest payments will be at their stated rates and exclude any additional revolving line of credit borrowings or repayments subsequent to December 31, 2018 and prior to the November 30, 2023 maturity date of our Credit Facility.

(1) Includes principal and interest payments. Projected interest payments may differ in the future based on the balance outstanding on our Credit Facility, as well as changes in market interest rates.

**Effect of Inflation**

Inflation is not generally a material factor affecting our business. General operating expenses such as salaries, employee benefits and lease costs are, however, subject to normal inflationary pressures.
Critical Accounting Policies

**General.** Our discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which we have prepared in accordance with GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate our estimates, including those related to allowance for doubtful accounts and unbilled services, goodwill, share-based compensation, income taxes and contingencies on an ongoing basis. We base our estimates on current facts and circumstances, historical experience and various other assumptions that we believe are reasonable. These results form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe that the following critical accounting policies reflect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

**Revenue Recognition.** Revenues are recognized when we satisfy a performance obligation by transferring goods or services promised in a contract to a customer, in an amount that reflects the consideration that we expect to receive in exchange for those goods or services. Performance obligations in our contracts represent distinct or separate service streams that we provide to our customers.

We evaluate our revenue contracts with customers based on the five-step model under *Revenue from Contracts with Customers:* (1) identify the contract with the customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to separate performance obligations; and (5) recognize revenues when (or as) each performance obligation is satisfied. If, at the outset of an arrangement, we determine that a contract with enforceable rights and obligations does not exist, revenues are deferred until all criteria for an enforceable contract are met.

We generate the majority of our revenues by providing consulting services to our clients. Most of our consulting service contracts are based on one of the following types of arrangements:

- **Time and expense arrangements** require the client to pay us based on the number of hours worked at contractually agreed-upon rates. We recognize revenues for these arrangements based on hours incurred and contracted rates utilizing a right-to-invoice practical expedient because we have a right to consideration for services completed to date. When a time and expense arrangement has a not-to-exceed or "cap" amount and we expect to perform work in excess of the cap, we recognize revenue up to the cap amount specified by the client, based on the efforts or hours incurred as a percentage of total efforts or hours expected to be incurred (i.e., proportional performance method). Certain time and materials arrangements may be subject to third-party approval, e.g., a court or other regulatory institution, with interim billing and payments made and received based upon preliminarily agreed-upon rates. In such cases, we record revenues for the portion of our services based on our assessment of the expected probability of amounts ultimately to be agreed upon by the court or regulator. These assessments are made on a case-by-case basis depending on the nature of the engagement, client economics, historical experience and other appropriate factors.

- **Fixed fee arrangements** require the client to pay a pre-established fee in exchange for a predetermined set of professional services. We recognize revenues for these arrangements based on the proportional performance related to individual performance obligations within each arrangement, however, these arrangements generally have one performance obligation.

- **Performance-based or contingent arrangements** represent forms of variable consideration. In these arrangements, our fees are based on the attainment of contractually defined objectives with our client, such as completing a business transaction or assisting the client in achieving a specific business objective. When our performance obligation(s) are satisfied over time, we determine the transaction price based on the expected probability of achieving the agreed-upon outcome and recognize revenues earned to date by applying the proportional performance method. These arrangements include conditional payments, commonly referred to as success fees, which were previously recognized when the cash was collected.

In addition, we generate certain revenues from our Technology segment that are based on units of data stored or processed. Unit-based revenues are recognized as services are provided, based on either the amount of data stored or processed, the number of concurrent users accessing the information, or the number of pages or images processed for a client, and agreed-upon per unit rates. We also generate revenues from our on-premise software licenses. Software license revenues are generally recognized at a point in time when the customer acceptance occurs, in accordance with the provision of the arrangements.

Certain of our time and expense and fixed fee billing arrangements may include client incentives in the form of volume-based discounts, where if certain fee levels are reached, the client can receive future services at a discounted hourly rate.
Contracts with customers that have a prospective discounted pricing option based on predetermined volume thresholds are evaluated to determine whether they include a material right, which is an option that provides a customer the right to acquire free or discounted goods or services in the future. If the option provides a material right to the customer, we allocate a portion of the transaction price to the material right and defer revenues during the pre-discount period, compared with our previous practice of recognizing the reduction in revenues when customers became eligible to receive the volume discount.

Reimbursable expenses, including those relating to travel, out-of-pocket expenses, outside consultants and other outside service costs, are generally included in revenues, and an equivalent amount of reimbursable expenses is included in costs of services in the period in which the expense is incurred.

**Allowance for Doubtful Accounts and Unbilled Services.** We maintain an allowance for doubtful accounts and unbilled services for estimated losses resulting from disputes that affect our ability to fully collect our billed accounts receivable, potential fee reductions negotiated by clients or imposed by bankruptcy courts and the inability of clients to pay our fees. Even if a bankruptcy court approves our services, the court has the discretion to require us to refund all or a portion of our fees due to the outcome of the case or a variety of other factors. We estimate the allowance for all receivable risks by reviewing the status of each matter and recording reserves based on our experience and knowledge of the particular client and historical collection patterns. However, our actual experience may vary from our estimates. If the financial condition of our clients were to deteriorate, resulting in their inability or unwillingness to pay our fees, or bankruptcy courts require us to refund certain fees, we may need to record additional allowances or write-offs in future periods. This risk related to a client’s inability to pay may be partially mitigated to the extent that we may receive retainers from some of our clients prior to performing services.

Timing of revenue recognition often differs from the timing of billing to our customers. Generally, we transfer goods or services to a customer before the customer pays consideration or payment is due. If we have an unconditional right to invoice and receive payment for goods or services already provided, we record billed and unbilled receivables on our Consolidated Balance Sheets. Payment terms and conditions vary depending on the jurisdiction, market and type of service and whether regulatory or other third-party approvals are required. In addition, contracts may be negotiated per the client’s request, or at times we are asked to execute contracts in a form provided by customers that might include different terms. Our standard contract terms generally include a requirement of payment within 30 days where no contingencies exist.

We record adjustments to the allowance for doubtful accounts and unbilled services as a reduction in revenues when there are changes in estimates of fee reductions that may be imposed by bankruptcy courts and other regulatory institutions, for both billed and unbilled receivables. The allowance for doubtful accounts and unbilled services is also adjusted after the related work has been billed to the client and we later discover that collectability is not reasonably assured. These adjustments are recorded to “Selling, general and administrative expenses” on the Consolidated Statements of Comprehensive Income and totaled $17.9 million, $15.4 million and $8.9 million for the years ended December 31, 2018, 2017 and 2016, respectively.

**Goodwill and Other Intangible Assets.** Goodwill represents the purchase price of acquired businesses in excess of the fair market value of net assets acquired at the date of acquisition. Other intangible assets may include trade names, customer relationships, non-competition agreements and software.

We test our goodwill and other indefinite-lived intangible assets for impairment annually as of the first day of the fourth quarter and whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. On a quarterly basis, we monitor the key drivers of fair value to detect events or other changes that would warrant an interim impairment test. Important factors we consider that could trigger an interim impairment review include, but are not limited to, the following:

- significant underperformance relative to expected historical or projected future operating results;
- a significant change in the manner of our use of the acquired asset or the strategy for our overall business;
- a significant market decline related to negative industry or economic trends; and/or
- our market capitalization relative to net carrying value.

We assess our goodwill for impairment at the reporting unit level. A reporting unit is an operating segment or a business one level below that operating segment if discrete financial information is available and regularly reviewed by the chief operating decision makers. Entities have an option, under certain circumstances, to perform a qualitative assessment regarding the reporting unit’s fair value to determine whether it is necessary to perform the quantitative impairment test.

In the qualitative assessment, we consider various factors, events or circumstances, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance and other relevant reporting unit specific events. If, based on the qualitative assessment, an entity determines that it is not “more likely than not” that the fair
value of a reporting unit is less than its carrying value, we do not prepare a quantitative impairment test. If we determine otherwise, we will prepare a quantitative assessment for potential goodwill impairment.

In the quantitative assessment, we compare the estimated fair value of the reporting unit with the carrying amount of that reporting unit. We estimate fair value using a combination of an income approach (based on discounted cash flows) and market approaches, using appropriate weighting factors. If the fair value exceeds the carrying amount, goodwill is not impaired. However, if the carrying value exceeds the fair value of the reporting unit, an impairment loss shall be recognized in an amount equal to that excess, limited to the total amount of goodwill allocated to that reporting unit.

The cash flows employed in the income approach are based on our most recent budgets, forecasts and business plans, as well as various growth rate assumptions for years beyond the current business plan period, discounted using an estimated weighted average cost of capital (“WACC”) based on our assessment of the risk inherent in the future revenue streams and cash flows and our WACC. The WACC consists of (1) a risk-free rate of return, (2) an equity risk premium that is based on the rate of return on equity of publicly traded companies with business characteristics comparable with our reporting units, (3) the current after-tax market rate of return on debt of companies with business characteristics similar to our reporting units, each weighted by the relative market value percentages of our equity and debt, and (4) an appropriate size premium. In the market approach, we utilize market multiples derived from comparable guideline companies and comparable market transactions to the extent available. These valuations are based on estimates and assumptions, including projected future cash flows and the determination of appropriate market comparables and determination of whether a premium or discount should be applied to such comparables.

We determine whether to perform qualitative assessment first or to bypass the qualitative assessment and proceed with the quantitative goodwill impairment test for each of our reporting units based on the headroom from the most recent quantitative tests and other events or changes in circumstances that could impact the fair value of the reporting units.

The process of evaluating the potential impairment of goodwill is highly subjective and requires significant judgment and estimates. There can be no assurance that the estimates and assumptions used in our goodwill impairment testing will prove to be accurate predictions of the future. If our assumptions regarding forecasted cash flows are not achieved or market conditions significantly deteriorate, we may be required to record goodwill impairment charges in future periods, whether in connection with our next annual impairment test or prior to that, if a triggering event occurs outside of the quarter during which the annual goodwill impairment test is performed. It is not possible at this time to determine if any future impairment charge would result or, if it does, whether such charge would be material.

Intangible assets with finite lives are amortized over their estimated useful lives and reviewed for impairment whenever events or changes in circumstances indicate an asset’s carrying value may not be recoverable. We amortize our acquired finite-lived intangible assets on a straight-line basis over periods ranging from five to 15 years.

**Significant New Accounting Pronouncements**

See Note 2, “New Accounting Standards” in Part II, Item 8 of this Annual Report.

**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to market risk from changes in interest rates, changes in the price of our common stock and changes in foreign exchange rates.

**Interest Rate Risk**

We are exposed to interest rate risk related to debt obligations outstanding. Interest rate changes expose our fixed rate long-term borrowings to changes in fair value and expose our variable rate borrowings to changes in our interest expense. From time to time, we use derivative instruments, primarily consisting of interest rate swap agreements, to manage our interest rate exposure by achieving a desired proportion of fixed rate vs. variable rate borrowings. All of our derivative transactions are entered into for non-trading purposes.

The following table presents principal cash flows and related interest rates by year of maturity for our 2023 Convertible Notes and the fair value of the debt as of December 31, 2018. The fair value has been determined based on the last actively traded prices for our 2023 Convertible Notes. As of December 31, 2018, there were no variable rate debt instruments outstanding as there were no borrowings under our Credit Facility. Future interest rate risk may be affected by revolving line of credit borrowings subsequent to December 31, 2018 and prior to the November 30, 2023 maturity date of our Credit Facility.
Foreign Currency Exchange Rate Risk

Exchange Rate Risk

Our foreign currency exposure primarily relates to intercompany receivables and payables and third-party receivables and payables that are denominated in currencies other than the functional currency of our legal entities. Our largest foreign currency exposure is unsettled intercompany payables and receivables, which are reviewed on a regular basis. In cases where settlement of intercompany balances is not practical, we may use cash to create offsetting currency positions to reduce exposure. Gains and losses from foreign currency transactions are included in interest income and other on our Consolidated Statements of Comprehensive Income and to date have not had a material impact on our consolidated financial statements. See Note 6, “Interest Income and Other” in Part II, Item 8 of this Annual Report for information.

Translation of Financial Results

Most of our foreign subsidiaries operate in a currency other than USD; therefore, increases or decreases in the value of USD against other major currencies will affect our operating results and the value of our balance sheet items denominated in foreign currencies. Our most significant exposures to translation risk currently relate to functional currency assets and liabilities that are denominated in the British pound, euro, Australian dollar and Canadian dollar. The following table details the unrealized changes in the net investments of foreign subsidiaries whose currencies are denominated in currencies other than USD for the years ended December 31, 2018, 2017 and 2016. These translation adjustments are reflected in “Other comprehensive income (loss)” on our Consolidated Statements of Comprehensive Income.

Management’s Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting and for performing an assessment of the effectiveness of internal control over financial reporting as of December 31, 2018. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our system of internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets, (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that our receipts and expenditures are being made only in accordance with the authorization of our management and directors, and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements. Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2018 based on the framework in the 2013 Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, our management concluded that our internal control over financial reporting was effective as of December 31, 2018.

KPMG LLP, the independent registered public accounting firm that audited our financial statements, has issued an audit report on their assessment of internal control over financial reporting, which is included elsewhere in this Annual Report.

Date: February 26, 2019

(principal financial officer)
Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
FTI Consulting, Inc.

Opinion on Internal Control Over Financial Reporting

We have audited FTI Consulting, Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2018 and 2017, the related consolidated statements of comprehensive income, stockholders’ equity, and cash flows for each of the years in the three-year period ended December 31, 2018, and the related notes and financial statement Schedule II, Valuation and Qualifying Accounts (collectively, the consolidated financial statements), and our report dated February 27, 2019 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ KPMG LLP

McLean, Virginia
February 27, 2019
Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
FTI Consulting, Inc.

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of FTI Consulting, Inc. and subsidiaries (the Company) as of December 31, 2018 and 2017, the related consolidated statements of comprehensive income, stockholders’ equity, and cash flows for each of the years in the three-year period ended December 31, 2018, and the related notes and financial statement Schedule II, Valuation and Qualifying Accounts (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company’s internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control — Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 27, 2019 expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

Change in Accounting Principles

As discussed in Note 1 and 2 to the consolidated financial statements, effective January 1, 2018, the Company adopted Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 606, Revenue from Contracts with Customers. This change was adopted using the modified retrospective method.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Company’s auditor since 2006.

1. Description of Business and Summary of Significant Accounting Policies

Description of Business

FTI Consulting, Inc. including its consolidated subsidiaries (collectively, the “Company,” “we,” “our” or “FTI Consulting”), is a global business advisory firm dedicated to helping organizations manage change, mitigate risk and resolve disputes: financial, legal, operational, political and regulatory, reputational and transactional. Individually, each of our segments and practices is staffed with experts recognized for the depth of their knowledge and a track record of making an impact. Collectively, FTI Consulting offers a comprehensive suite of services designed to assist clients across the business cycle, from proactive risk management to rapid response to unexpected events and dynamic environments. We operate through five reportable segments: Corporate Finance & Restructuring, Forensic and Litigation Consulting, Economic Consulting, Technology and Strategic Communications.

Accounting Principles

Our financial statements are prepared in conformity with United States (“U.S.”) generally accepted accounting principles (“GAAP”). The consolidated financial statements include the accounts of FTI Consulting and all of our subsidiaries. All intercompany transactions and balances have been eliminated. Reclassifications of certain prior period amounts have been made to conform to the current period presentation.

Foreign Currency

Results of operations for our non-U.S. subsidiaries are translated from the designated functional currency to the reporting currency of the U.S. dollar ("USD"). Revenues and expenses are translated at average exchange rates for each month, while assets and liabilities are translated at balance sheet date exchange rates. Resulting net translation adjustments are recorded as a component of stockholders’ equity in “Accumulated other comprehensive income (loss).”

Transaction gains and losses arising from currency exchange rate fluctuations on transactions denominated in a currency other than the local functional currency are included in “Interest income and other” on the Consolidated Statements of Comprehensive Income. Such transaction gains and losses may be realized or unrealized depending upon whether the transaction settled during the period or remains outstanding at the balance sheet date.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and accompanying notes. Due to the inherent uncertainty involved in making those assumptions, actual results could differ from those estimates. The most significant estimates made and assumptions used are the determination of the allowance for doubtful accounts and unbilled services, the assessment of the recoverability of goodwill, other intangible assets and realization of deferred tax assets, the valuation of share-based compensation and the fair value of acquisition-related contingent consideration. Management bases its estimates on historical trends, current experience and other assumptions that it believes are reasonable.

Concentrations of Risk

We do not have a single customer that represents 10% or more of our consolidated revenues. We derive the majority of our revenues from providing professional services to clients in the U.S. For the year ended December 31, 2018, we derived approximately 32% of our consolidated revenues from the work of professionals who are assigned to locations outside of the U.S. We believe that the geographic and industry diversity of our customer base throughout the U.S. and internationally minimizes the risk of incurring material losses due to concentrations of credit risk.

Revenue Recognition

Revenues are recognized when we satisfy a performance obligation by transferring goods or services promised in a contract to a customer, in an amount that reflects the consideration that we expect to receive in exchange for those goods or services. Performance obligations in our contracts represent distinct or separate service streams that we provide to our customers.

We evaluate our revenue contracts with customers based on the five-step model under Revenue from Contracts with Customers ("ASC 606"); (1) identify the contract with the customer; (2) identify the performance obligations in the contract;
(3) determine the transaction price; (4) allocate the transaction price to separate performance obligations; and (5) recognize revenues when (or as) each performance obligation is satisfied. If, at the outset of an arrangement, we determine that a contract with enforceable rights and obligations does not exist, revenues are deferred until all criteria for an enforceable contract are met.

We generate the majority of our revenues by providing consulting services to our clients. Most of our consulting service contracts are based on one of the following types of arrangements:

- **Time and expense arrangements** require the client to pay us based on the number of hours worked at contractually agreed-upon rates. We recognize revenues for these arrangements based on hours incurred and contracted rates utilizing a right-to-invoice practical expedient because we have a right to consideration for services completed to date. When a time and expense arrangement has a not-to-exceed or "cap" amount and we expect to perform work in excess of the cap, we recognize revenues up to the cap amount specified by the client, based on the efforts or hours incurred as a percentage of total efforts or hours expected to be incurred (i.e., proportional performance method). Certain time and materials arrangements may be subject to third-party approval, e.g., a court or other regulatory institution, with interim billing and payments made and received based upon preliminarily agreed-upon rates. In such cases, we record revenues for the portion of our services based on our assessment of the expected probability of amounts ultimately to be agreed upon by the court or regulator. These assessments are made on a case-by-case basis depending on the nature of the engagement, client economics, historical experience and other appropriate factors.

- **Fixed fee arrangements** require the client to pay a pre-established fee in exchange for a predetermined set of professional services. We recognize revenues for these arrangements based on the proportional performance related to individual performance obligations within each arrangement; however, these arrangements generally have one performance obligation.

- **Performance-based or contingent arrangements** represent forms of variable consideration. In these arrangements, our fees are based on the attainment of contractually defined objectives with our client, such as completing a business transaction or assisting the client in achieving a specific business objective. When our performance obligation(s) are satisfied over time, we determine the transaction price based on the expected probability of achieving the agreed-upon outcome and recognize revenues earned to date by applying the proportional performance method. These arrangements include conditional payments, commonly referred to as success fees, which were previously recognized when the cash was collected.

In addition, we generate certain revenues from our Technology segment that are based on units of data stored or processed. Unit-based revenues are recognized as services are provided, based on either the amount of data stored or processed, the number of concurrent users accessing the information or the number of pages or images processed for a client, and agreed-upon per unit rates. We also generate revenues from our on-premise software licenses. Software license revenues are generally recognized at a point in time when the customer acceptance occurs, in accordance with the provision of the arrangements.

Certain of our time and expense and fixed fee billing arrangements may include client incentives in the form of volume-based discounts, where if certain fee levels are reached, the client can receive future services at a discounted hourly rate. Contracts with customers that have a prospective discounted pricing option based on predetermined volume thresholds are evaluated to determine whether they include a material right, which is an option that provides a customer the right to acquire free or discounted goods or services in the future. If the option provides a material right to the customer, we allocate a portion of the transaction price to the material right and defer revenues during the pre-discount period, compared with our previous practice of recognizing the reduction in revenues when customers became eligible to receive the volume discount.

Reimbursable expenses, including those relating to travel, out-of-pocket expenses, outside consultants and other outside service costs, are generally included in revenues, and an equivalent amount of reimbursable expenses is included in costs of services in the period in which the expense is incurred.

**Direct Cost of Revenues**

Direct cost of revenues consists primarily of billable employee compensation and related payroll benefits, the cost of contractors assigned to revenue-generating activities and direct expenses billable to clients. Direct cost of revenues also includes depreciation expense on the equipment of our Technology segment that is used to host and process client information, as well as amortization of software. Direct cost of revenues does not include an allocation of corporate overhead and non-billable segment costs.
Share-Based Compensation

Share-based compensation cost is estimated at the grant date based on the fair value of the award and is recognized as expense over the requisite service period or performance period of the award. The amount of share-based compensation expense recognized at any date must at least equal the portion of grant date value of the award that is vested at that date.

We use the Black-Scholes pricing model to determine the fair value of stock options on the date of grant. The Black-Scholes pricing model requires the development of assumptions, including volatility and expected term, which are based on our historical experience. The risk-free interest rate is based on the term of U.S. Treasury interest rates that is consistent with the expected term of the share-based award.

The fair value of restricted share awards and restricted stock units is measured based on the closing price of the underlying stock on the date of grant. The fair value of performance share units that contain market-based vesting conditions is measured using a Monte Carlo pricing model. The compensation cost of performance stock units is based on the grant date fair value and is not subsequently reversed if it is later determined that the market condition is unlikely to be met or is expected to be lower than originally expected.

For all our share-based awards, we recognize forfeiture expense as forfeitures occur.

Research and Development

Research and development costs related to software development are expensed as incurred. When we have determined that technological feasibility for our software products is reached, development costs related to the project are capitalized until such products are available for general release to customers as discussed in “Capitalized Software to Be Sold, Leased or Otherwise Marketed.” Research and development expenses related to software development totaled $8.7 million, $14.9 million and $17.5 million for the years ended December 31, 2018, 2017 and 2016, respectively, and are included in “Selling, general and administrative expenses” on the Consolidated Statements of Comprehensive Income.

Advertising Costs

Advertising costs consist of marketing, advertising through print and other media, professional event sponsorship and public relations. These costs are expensed as incurred. Advertising costs totaled $15.5 million, $14.8 million and $15.9 million for the years ended December 31, 2018, 2017 and 2016, respectively, and are included in “Selling, general and administrative expenses” on the Consolidated Statements of Comprehensive Income.

Acquisition-Related Contingent Consideration

The fair value of acquisition-related contingent consideration is estimated at the acquisition date utilizing a probability weighted estimate of future cash flow adjusted for the expected timing of each payment. Subsequent to the acquisition date, on a quarterly basis, the contingent consideration liability is remeasured at current fair value with any changes recorded in earnings. Accretion expense is recorded to adjust the discounted value of acquisition-related contingent consideration liabilities to their present value. Remeasurement gains or losses and accretion expense are included in “Selling, general and administrative expenses” on the Consolidated Statements of Comprehensive Income.

Income Taxes

Our income tax provision (benefit) consists principally of U.S. federal, state and international income taxes. We generate income in a significant number of states located throughout the U.S., as well as foreign countries in which we conduct business. Our effective income tax rate may fluctuate due to a change in the mix of earnings between higher and lower state or country tax jurisdictions and the impact of non-deductible expenses. Additionally, we record deferred tax assets and liabilities using the asset and liability method of accounting, which requires us to measure these assets and liabilities using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion, or all, of the deferred tax asset will not be realized. In evaluating our ability to recover our deferred tax assets, we consider all available positive and negative evidence, including scheduled reversals of temporary differences, projected future taxable income, tax planning strategies and recent results of operations.

Cash Equivalents

Cash equivalents consist of money market funds, commercial paper and certificates of deposit with maturities of three months or less at the time of purchase.
Allowance for Doubtful Accounts and Unbilled Services

We maintain an allowance for doubtful accounts and unbilled services for estimated losses resulting from potential fee reductions negotiated by clients or imposed by bankruptcy courts or other regulatory agencies and the inability of clients to pay our fees, as well as from disputes that affect our ability to fully collect our billed accounts receivable. Even if a bankruptcy court approves our services, the court has the discretion to require us to refund all or a portion of our fees due to the outcome of the case or a variety of other factors. We estimate the allowance for all receivable risks by reviewing the status of each matter and recording reserves based on our experience and knowledge of the particular client and historical collection patterns. However, our actual experience may vary significantly from our estimates. If the financial condition of our clients were to deteriorate, resulting in their inability or unwillingness to pay our fees, or bankruptcy courts require us to refund certain fees, we may need to record additional allowances or write-offs in future periods. This risk related to a client’s non-payment may be mitigated to the extent that we receive a retainer from some of our clients prior to performing services.

We record adjustments to the allowance for doubtful accounts and unbilled services as a reduction in revenues when there are changes in estimates of fee reductions that may be imposed by bankruptcy courts and other regulatory institutions for both billed and unbilled receivables. The allowance for doubtful accounts and unbilled services is also adjusted after the related work has been billed to the client and we discover that collectability is not reasonably assured. These adjustments are recorded to “Selling, general and administrative expenses” on the Consolidated Statements of Comprehensive Income and totaled $17.9 million, $15.4 million and $8.9 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Property and Equipment

We record property and equipment, including improvements that extend useful lives, at cost, while maintenance and repairs are expensed as incurred. We calculate depreciation using the straight-line method based on estimated useful lives ranging from three to seven years for furniture, equipment and software. We amortize leasehold improvements over the shorter of the estimated useful life of the asset or the lease term. We capitalize costs incurred during the application development stage of computer software developed or obtained for internal use. Capitalized software developed for internal use is classified within furniture, equipment and software and is amortized over the estimated useful life of the software, which is generally three years. Purchased software licenses to be sold to customers are capitalized and amortized over the license term.

Notes Receivable from Employees

Notes receivable from employees principally include unsecured general recourse forgivable loans and retention payments, which are provided to attract and retain certain of our senior employees and other professionals. Generally, all of the principal amount and accrued interest of the forgivable loans we make to employees and other professionals will be forgiven according to the stated terms of the loan agreement, provided that the professional is providing services to the Company on the forgiveness date and upon other specified events, such as death or disability. Professionals who terminate their employment or services with us prior to the end of the forgiveness period are required to repay the outstanding, unforgiven loan balance and any accrued but unforgiven interest. If the termination was by the Company without cause or by the employee with good reason, or, subject to certain conditions, if the employee terminates his or her employment due to retirement or non-renewal of his or her employment agreement, the loan may be forgiven or continue to be forgivable, in whole or in part. We amortize forgivable loans ratably over the requisite service period, which ranges from a period of two to 10 years. The amount of expense recognized at any date must at least equal to the portion of the principal forgiven on the forgiveness date.

Goodwill and Other Intangible Assets

Goodwill represents the purchase price of acquired businesses in excess of the fair market value of net assets acquired at the date of acquisition. Other intangible assets may include trade names, customer relationships, non-competition agreements and software.
We test our goodwill and other indefinite-lived intangible assets for impairment annually as of the first day of the fourth quarter or whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. On a quarterly basis, we monitor the key drivers of fair value to detect events or other changes that would warrant an interim impairment test. Important factors we consider that could trigger an interim impairment review include, but are not limited to, the following:

- significant underperformance relative to expected historical or projected future operating results;
- a significant change in the manner of our use of the acquired asset or the strategy for our overall business;
- a significant market decline related to negative industry or economic trends; and/or
- our market capitalization relative to net carrying value.

We assess our goodwill for impairment at the reporting unit level. A reporting unit is an operating segment or a business one level below that operating segment if discrete financial information is available and regularly reviewed by the chief operating decision makers. Entities have an option, under certain circumstances, to perform a qualitative assessment regarding the reporting unit’s fair value to determine whether it is necessary to perform the quantitative impairment test.

In the qualitative assessment, we consider various factors, events or circumstances, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance and other relevant reporting unit specific events. If, based on the qualitative assessment, an entity determines that it is not “more likely than not” that the fair value of a reporting unit is less than its carrying value, we do not prepare a quantitative impairment test. If we determine otherwise, we will prepare a quantitative assessment for potential goodwill impairment.

In the quantitative assessment, we compare the estimated fair value of the reporting unit with the carrying amount of that reporting unit. We estimate fair value using a combination of an income approach (based on discounted cash flows) and market approaches, using appropriate weighting factors. If the fair value exceeds the carrying amount, goodwill is not impaired. However, if the carrying value exceeds the fair value of the reporting unit, an impairment loss shall be recognized in an amount equal to that excess, limited to the total amount of goodwill allocated to that reporting unit.

We determine whether to perform a qualitative assessment first or to bypass the qualitative assessment and proceed with the quantitative goodwill impairment test for each of our reporting units based on the excess of fair value over carrying value from the most recent quantitative tests and other events or changes in circumstances that could impact the fair value of the reporting units.

Intangible assets with finite lives are amortized over their estimated useful lives and reviewed for impairment whenever events or changes in circumstances indicate an asset’s carrying value may not be recoverable. We amortize our acquired finite-lived intangible assets on a straight-line basis over periods ranging from five to 15 years.

**Impairment of Long-Lived Assets**

We review long-lived assets such as property and equipment and finite-lived intangible assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. These events or changes in circumstances may include a significant deterioration of operating results, changes in business plans or changes in anticipated future cash flows. If an impairment indicator is present, we evaluate recoverability of assets to be held and used by a comparison of the carrying value of the assets with future undiscounted net cash flows expected to be generated by the assets. We group assets at the lowest level for which there are identifiable cash flows that are largely independent of the cash flows generated by other asset groups. If the total of the expected undiscounted future cash flows is less than the carrying amount of the asset group, we estimate the fair value of the asset group to determine whether an impairment loss should be recognized.

**Capitalized Software to Be Sold, Leased or Otherwise Marketed**

We expense costs for software products that will be sold, leased or otherwise marketed until technological feasibility has been established. Thereafter, eligible software development costs are capitalized and subsequently reported at the lower of unamortized cost or net realizable value. Capitalized costs are amortized based on current and future revenues for each product with an annual minimum equal to the straight-line amortization over the remaining estimated economic life of the product. We classify software products to be sold, leased or otherwise marketed as noncurrent “Other assets” on the Consolidated Balance Sheets. Unamortized capitalized software costs were $0.2 million and $14.8 million as of December 31, 2018 and 2017, respectively. Amortization expense for capitalized software costs was $5.3 million, $6.7 million and $12.0 million for the years ended December 31, 2018, 2017 and 2016, respectively.
Leases

We lease office space and equipment under non-cancelable operating leases. The leases normally provide for the payment of minimum annual rentals and may include scheduled rent increases. Some leases include provisions for renewal options of up to five years. Some of our leases for office space contain provisions whereby the future rental payments may be adjusted for increases in operating expenses above specified amounts.

We recognize rent expense under operating leases on a straight-line basis over the non-cancelable lease term. For leases with scheduled rent increases, this treatment results in a deferred rent liability, which is classified within “Other liabilities” on the Consolidated Balance Sheets. Lease inducements, such as tenant improvement allowances, cash inducements and rent abatements, are amortized on a straight-line basis over the life of the lease. Unamortized lease inducements are also included in deferred rent. Deferred rent totaled $45.1 million and $43.9 million for the years ended December 31, 2018 and 2017, respectively.

Billings in Excess of Services Provided

Billings in excess of services provided represent amounts billed to clients, such as retainers, in advance of work being performed. Clients may make advance payments, which are held on deposit until completion of work or are applied at predetermined amounts or times. Excess payments are either applied to final billings or refunded to clients upon completion of work. Payments in excess of related accounts receivable and unbilled receivables are recorded as billings in excess of services provided within the liabilities section of the Consolidated Balance Sheets.

Convertible Notes

On August 20, 2018, we issued 2.0% convertible senior notes due 2023 ("2023 Convertible Notes") with an aggregate principal amount of $316.3 million, payable semiannually in arrears on February 15 and August 15 of each year, beginning on February 15, 2019. The 2023 Convertible Notes will mature on August 15, 2023, unless earlier converted or repurchased. Upon conversion, the 2023 Convertible Notes may be settled, at our election in cash, shares of our common stock, or a combination of cash and shares of our common stock.

We separately recorded the liability and equity components of the 2023 Convertible Notes. The carrying amount of the liability component was calculated by measuring the fair value of a similar debt instrument that does not have an associated convertible feature. The carrying amount of the equity component representing the conversion option was determined by deducting the fair value of the liability component from the par value of the 2023 Convertible Notes. The equity component is not remeasured as long as it continues to meet the conditions for equity classification. The excess of the principal amount of the liability component over its carrying amount ("debt discount") is amortized to interest expense over the term of the 2023 Convertible Notes using the effective interest rate method.

We record debt issuance costs as an adjustment to the carrying amount of the related liability and equity components of our 2023 Convertible Notes. We amortize the debt discount and debt issuance costs on the liability component using the effective interest rate method over the expected life of the debt instrument.

2. New Accounting Standards

Adopted Accounting Standards

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, Revenue from Contracts with Customers. On January 1, 2018, we adopted ASC 606 using the modified retrospective method and recorded an immaterial cumulative effect adjustment to the beginning balance of retained earnings for revenue contracts that existed at the adoption date. Under the modified retrospective method, prior year information has not been adjusted and continues to be reported under the accounting standards in effect for periods prior to the adoption date. We have not retroactively restated the existing contracts for modifications that occurred before January 1, 2018.

See Note 1, "Description of Business and Summary of Significant Accounting Policies" for a description of the significant accounting policies and methods used in preparation of the Consolidated Financial Statements. See Note 4, "Revenues" for the disclosures required under ASC 606. The adoption of ASC 606 had an immaterial impact on our Consolidated Statements of Comprehensive Income and Consolidated Balance Sheets and had no impact on our Consolidated Statements of Cash Flows.

In March 2018, the FASB issued ASU 2018-05, Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin No. 118 (SEC Update), Income Taxes (Topic 740). ASU 2018-05 provides guidance regarding the recording of tax impacts where uncertainty exists, in the period of adoption of the 2017 U.S. Tax Cuts and Jobs Act (the “2017 Tax Act”), which
allowed companies to reflect provisional amounts for those specific income tax effects of the 2017 Tax Act for which the accounting under ASC Topic 740 is incomplete but for which a reasonable estimate could be determined. The Company recognized the income tax effects of the adoption of the 2017 Tax Act in its financial statements in accordance with ASU 2018-05. The Company finalized its accounting for the income tax effects of the adoption of the 2017 Tax Act in the fourth quarter of 2018 with the filing of its tax returns. There were no material changes to the provisional amounts recorded in the 2017 financial statements in connection with the 2017 Tax Act.

Accounting Standards Not yet Adopted

In February 2016, the FASB issued ASU 2016-02, amended in some respects by subsequent ASUs (collectively “ASC 842”), which supersedes existing lease guidance. Under ASC 842, we will be required to record right-of-use assets and corresponding lease liabilities on the balance sheet, as well as to disclose key quantitative and qualitative information about leasing arrangements. This guidance is effective on a modified retrospective basis for reporting periods beginning after December 15, 2018, with early adoption permitted. We elected to adopt ASC 842 using a modified transition approach, effective January 1, 2019. As permitted by the guidance, prior comparative periods will not be adjusted under this method. In addition, we elected the package of practical expedients available under the guidance that allows us not to reassess whether a contract contains a lease, lease classification or initial direct costs.

In preparation for adoption of the standard, the Company implemented internal controls and business process changes to enable the preparation of financial information in accordance with the standard. The standard will have a material impact on our Consolidated Balance Sheet. The most significant impact will be the recognition of right-of-use assets and lease liabilities for operating leases. The Company estimates that adoption of this standard will result in recognition of additional right-of-use assets in the range of $145.0 million and $155.0 million and additional lease liabilities in the range of $210.0 million and $220.0 million on the adoption date for operating leases. We do not currently expect that the adoption of ASC 842 will have a material impact on our results of operations or cash flow presentation.

In August 2018, the FASB issued ASU 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement, which modifies the disclosure requirements for fair value measurements. The guidance promotes a framework to help improve the effectiveness of disclosures in the notes and is effective for annual and interim periods beginning after December 15, 2019, although early adoption is permitted. The Company is in the process of evaluating the impact of this new guidance on its consolidated financial statements.

In August 2018, the FASB issued ASU 2018-15, Internal Use Software (Subtopic 350-40): Customer’s accounting for implementation costs incurred in a cloud computing arrangement that is a service contract, which requires the Company to capitalize implementation costs of a hosting arrangement that is a service contract and expense those costs over the term of the hosting arrangement. The guidance is effective for annual and interim periods beginning after December 15, 2019 although early adoption is permitted. The Company is in the process of evaluating the impact of this new guidance on its consolidated financial statements.

3. Earnings per Common Share

Basic earnings per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per common share adjusts basic earnings per common share for the effects of potentially dilutive common shares. Potentially dilutive common shares include the dilutive effects of shares issuable under our equity compensation plans, including stock options and restricted shares, each using the treasury stock method.

Because we expect to settle the principal amount of the outstanding 2023 Convertible Notes in cash, we use the treasury stock method for calculating the potential dilutive effect of the conversion feature on earnings per common share, if applicable. The conversion feature will have a dilutive impact on earnings per common share when the average market price of our common stock for a given period exceeds the conversion price of $101.38 per share. As we did not meet this threshold during the year ended December 31, 2018, any shares of common stock potentially issuable upon conversion of the 2023 Convertible Notes are excluded from the calculation of diluted earnings per share.
4. Revenues

Revenues recognized during the current period may include revenues recognized from performance obligations satisfied or partially satisfied in previous periods. This primarily occurs when the estimated transaction price has changed based on a reassessment of the expected probability of achieving the agreed-upon outcome for our performance-based and contingent arrangements, resulting in a catch-up adjustment for service provided in previous periods. The aggregate amount of revenues recognized related to the catch-up adjustment due to a change in the transaction price during the year ended December 31, 2018 was $16.1 million.

Unfulfilled performance obligations represent the remaining contract transaction prices allocated to the performance obligations that are unsatisfied, or partially unsatisfied, and therefore revenues have not yet been recorded. Unfulfilled performance obligations primarily consist of the remaining fees not yet recognized under our proportional performance method for both our fixed fee arrangements and the portion of performance-based and contingent arrangements that we have deemed probable. As of December 31, 2018, the aggregate amount of the transaction price allocated to unfulfilled performance obligations was $8.8 million, and we expect to recognize the majority of the related revenues over the next 24 months. We elected to utilize the optional exemption to exclude from this disclosure fixed fee and performance-based and contingent arrangements with an original expected duration of one year or less and to exclude our time and expense arrangements for which revenues are recognized using the right-to-invoice practical expedient.

Contract assets are defined as assets for which we have recorded revenue because we determined that it is probable that we will earn a performance-based or contingent fee, but we are not yet entitled to receive our fees because certain events, such as completion of the measurement period or client approval, must occur. The contract asset balance was $2.4 million as of December 31, 2018 and immaterial as of December 31, 2017.

Contract liabilities are defined as liabilities incurred when we have received consideration from a client but have not yet performed the agreed-upon services. This may occur when we receive advance billings before delivery and acceptance of software licenses in our Technology segment and when clients pay us upfront fees before we begin work for them. The contract liability balance was immaterial as of December 31, 2018 and December 31, 2017.

5. Special Charges

During the year ended December 31, 2017, we recorded special charges of $40.9 million. The charges related to certain targeted reductions in areas of each segment where we needed to realign our workforce with then-current business demand. In addition, cost-cutting actions were taken in certain corporate departments where we were able to streamline support activities and reduce our real estate costs. The special charge included the following components:

- $23.5 million of employee severance and other employee-related costs;
- $14.4 million of exit costs associated with the curtailment of our lease on our executive office in Washington, D.C.; and
- $3.0 million of other expenses, including costs related to disposing or closing several small international offices.

</tbody>
</table>

A summary of our stock option activity during the year ended December 31, 2018 is presented below. The aggregate intrinsic value of stock options outstanding and exercisable, or fully vested, at December 31, 2018 in the table below represents the total pre-tax intrinsic value, which is calculated as the difference between the closing price of our common stock on the last trading day of 2018 and the exercise price, multiplied by the number of in-the-money options that would have been received by the option holders had all option holders exercised their options on December 31, 2018. The aggregate intrinsic value changes based on fluctuations in the fair market value per share of our common stock.

<table>

</tbody>
</table>

Cash received from option exercises for the years ended December 31, 2018, 2017 and 2016 was $41.6 million, $4.1 million and $27.3 million, respectively. The tax benefit realized from stock options exercised totaled $4.0 million, $1.1 million and $4.8 million for the years ended December 31, 2018, 2017 and 2016, respectively.

The intrinsic value of stock options exercised is the amount by which the market value of our common stock on the exercise date exceeds the exercise price. The total intrinsic value of stock options exercised for the years ended December 31, 2018, 2017 and 2016 was $26.4 million, $0.9 million and $6.9 million, respectively.
The following is a summary of stock options outstanding and exercisable as of December 31, 2018.

</tbody>
</table>

As of December 31, 2018, there was $22.9 million of unrecognized compensation cost related to unvested restricted share awards. That cost is expected to be recognized ratably over a weighted average period of 4.1 years. The total fair value of restricted share awards that vested during the years ended December 31, 2018, 2017 and 2016 was $10.4 million, $9.9 million and $10.4 million, respectively.

**Restricted Stock Units**

A summary of our restricted stock units activity during the year ended December 31, 2018 is presented below. The aggregate intrinsic value represents the total pre-tax intrinsic value based on the closing price of our common stock on the last trading day of 2018.

<table>
<thead>
<tr>
<th>Restricted stock units outstanding at December 31, 2017</th>

<td><strong>39.72</strong></td>
<td><strong>22,329</strong></td>
</tr>
</tbody>
</table>

The intrinsic value of restricted stock units released reflects the market value of our common stock on the date of release. The total intrinsic value of restricted stock units released for the years ended December 31, 2018, 2017 and 2016 was $5.4 million, $4.1 million and $9.3 million, respectively.
As of December 31, 2018, there was $0.2 million of unrecognized compensation cost related to unvested restricted stock units. That cost is expected to be recognized ratably over a weighted average period of 0.6 years. The total fair value of restricted stock units that vested during the years ended December 31, 2018, 2017 and 2016 was $1.7 million, $1.9 million and $2.4 million, respectively.

**Performance Stock Units**

A summary of our performance stock units activity during the year ended December 31, 2018 is presented below. The performance stock units are subject to market conditions based on the total shareholder return of the Company as compared with the total shareholder return of the Standard & Poor’s 500. The aggregate intrinsic value represents the total pre-tax intrinsic value based on the closing price of our common stock on the last trading day of 2018.

<table>
<thead>
<tr>

</tr>
<tr>
<td>Performance stock units outstanding at December 31, 2018</td>
<td>275</td>
<td>$28.40</td>
<td>$18,348</td>
</tr>
</tbody>
</table>

As of December 31, 2018, there was $2.1 million of unrecognized compensation cost related to unvested performance stock units. That cost is expected to be recognized ratably over a weighted average period of 0.8 years. The total fair value of performance stock units that vested during the year ended December 31, 2018 was $1.4 million. There were no performance stock units that vested during the years ended December 31, 2017 and 2016.

The table below reflects the weighted average grant date fair value per share of stock options, restricted share awards, restricted stock units and performance stock units awarded during the years ended December 31, 2018, 2017 and 2016. The fair value of our stock options is calculated using the Black-Scholes option-pricing model. The fair value of our restricted stock awards and restricted stock units is determined based on the closing market price per share of our common stock on the grant date. The fair value of the performance stock units reflects the market conditions as of the grant date using a Monte Carlo simulation.

<td><strong>$403,750</strong></td>
</tr>
</tbody>
</table>

(1) The short-term portion is included in “Accounts payable, accrued expenses and other,” and the long-term portion is included in “Other liabilities” on the Consolidated Balance Sheets.

The fair values of financial instruments not included in this table are estimated to be equal to their carrying values as of December 31, 2018 and 2017.

We estimate the fair value of our 2023 Convertible Notes based on their last actively traded prices. The fair value of our debt is classified within Level 2 of the fair value hierarchy because it is traded in less active markets.

We estimate the fair value of acquisition-related contingent consideration using a probability-weighted discounted cash flow model. This fair value estimate represents a Level 3 measurement as it is based on significant inputs not observed in the market.
market and reflect our own assumptions. The significant unobservable inputs used in the fair value measurements of our acquisition-related contingent consideration are our measures of the future profitability and related cash flows and discount rates. The fair value of the contingent consideration is reassessed at each reporting period by the Company based on additional information as it becomes available.

Any change in the fair value of an acquisition’s contingent consideration liability results in a remeasurement gain or loss that is recorded in “Selling, general and administrative expenses” on the Consolidated Statements of Comprehensive Income. During the year ended December 31, 2018, there was no change in the estimated fair value of future expected contingent consideration payments. During the years ended December 31, 2017 and 2016, we recorded $0.7 million and $1.4 million in expense related to increases in the fair value of future expected contingent consideration payments, respectively.

10. Property and Equipment

Property and equipment consist of the following.

<table>
<thead>
<tr>
<th></th>
<th>December 31, 2018</th>
<th>December 31, 2017</th>

</tbody>
</table>
During the year ended December 31, 2017, we made an initial payment of $8.9 million at closing to acquire a restructuring business within our Corporate Finance & Restructuring segment. We recorded $11.9 million in goodwill as a result of the acquisition. We have included the results of the acquired business' operations in the Corporate Finance & Restructuring segment since the acquisition date.

During the year ended December 31, 2018, we sold a business within our Technology segment for proceeds of $50.3 million. We wrote off $20.9 million in goodwill as a result of the sale.

</table>

(1) During the year ended December 31, 2018, we sold a business and related intangible assets within our Technology segment.

Other intangible assets with finite lives are amortized over their estimated useful lives. We recorded amortization expense of $8.2 million, $10.6 million and $10.3 million during the years ended December 31, 2018, 2017 and 2016, respectively.

We estimate our future amortization expense for our intangible assets with a finite life to be as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>As of December 31, 2018 (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2019</td>
<td>$7,291</td>
</tr>
<tr>
<td>2020</td>
<td>7,176</td>
</tr>
<tr>
<td>2021</td>
<td>6,657</td>
</tr>
<tr>
<td>2022</td>
<td>4,913</td>
</tr>
<tr>
<td>2023</td>
<td>1,693</td>
</tr>
<tr>
<td>Thereafter</td>
<td>1,803</td>
</tr>
<tr>
<td></td>
<td>$29,533</td>
</tr>
</tbody>
</table>

(1) Actual amortization expense to be reported in future periods could differ from these estimates as a result of new intangible asset acquisitions, changes in useful lives, or other relevant factors or changes.
12. Notes Receivable from Employees

The table below summarizes the changes in the carrying amount of our notes receivable from employees.

<table>
<thead>
<tr>
<th>Notes receivable from employees — beginning</th>
<th>December 31,</th>

</table>

(1) There were no current portions of long-term debt as of December 31, 2018 and 2017.

2023 Convertible Notes

On August 20, 2018, we issued $316.3 million aggregate principal amount of the 2023 Convertible Notes, which includes the notes issued pursuant to an option granted to the initial purchasers of the 2023 Convertible Notes to purchase additional notes. The 2023 Convertible Notes bear interest at a fixed rate of 2.0% per year, payable semiannually in arrears on February 15 and August 15 of each year, beginning on February 15, 2019. The 2023 Convertible Notes will mature on August 15, 2023, unless earlier converted or repurchased.

The 2023 Convertible Notes are senior unsecured obligations of the Company and will rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the 2023 Convertible Notes; equal in right of payment to any of our unsecured indebtedness that is not so subordinated; effectively junior in right of payment to any of the Company’s secured indebtedness (including all amounts outstanding, from time to time, under the Credit Facility) to the extent of the value of the assets securing such indebtedness; and structurally junior to all indebtedness and other liabilities (including trade payables) of our subsidiaries.

The 2023 Convertible Notes are convertible at an initial conversion rate of 9.8643 shares of our common stock per $1,000 principal amount of the 2023 Convertible Notes (equivalent to an initial conversion price of approximately $101.38 per...
share of common stock). Holders may convert their 2023 Convertible Notes at any time prior to the close of business on the business day immediately preceding May 15, 2023. The 2023 Convertible Notes may be converted only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on September 30, 2018 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on, and including, the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day; (2) during the five business day period after any five consecutive trading day period (the “Measurement Period”) in which the trading price (as defined in the indenture governing the 2023 Convertible Notes) per $1,000 principal amount of the 2023 Convertible Notes for each trading day of the Measurement Period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate in effect on each such trading day; or (3) upon the occurrence of specified corporate events. On or after May 15, 2023, until the close of business on the business day immediately preceding the maturity date of August 15, 2023, holders may convert their 2023 Convertible Notes at any time, regardless of the foregoing circumstances. The circumstances required to allow the holders to convert their 2023 Convertible Notes were not met as of December 31, 2018.

If we undergo a fundamental change (as defined in the indenture governing the 2023 Convertible Notes), subject to certain conditions, holders may require us to repurchase for cash all or part of their 2023 Convertible Notes.

Debt issuance costs of $8.4 million related to the 2023 Convertible Notes were comprised primarily of discounts and commissions payable to the initial purchasers. We allocated the total amount incurred to the liability and equity components of the 2023 Convertible Notes based on their relative values. Issuance costs attributable to the liability component were $7.2 million and will be amortized to interest expense using the effective interest rate method over the expected life of the 2023 Convertible Notes. Issuance costs attributable to the equity component were netted with the equity component in stockholders' equity.

For the year ended December 31, 2018, we recognized contractual interest expense of $2.3 million and amortization of the debt discount and issuance costs of $3.0 million for the 2023 Convertible Notes. The effective interest rate of the liability component was 5.45%.

2022 Notes

On November 15, 2018, we redeemed the $300.0 million outstanding principal amount of our 6.0% senior notes due 2022 (“2022 Notes”), pursuant to the terms of the indenture governing the 2022 Notes. We recognized a loss on early extinguishment of debt of $9.1 million, consisting primarily of a redemption premium of $6.0 million and a $3.1 million non-cash write-off of unamortized deferred financing costs. This loss has been recorded in “Loss on early extinguishment of debt” within the Consolidated Statements of Comprehensive Income.

Credit Facility

On June 26, 2015, we entered into a credit agreement, which provides for a $550.0 million senior secured revolving line of credit maturing on June 26, 2020. In November 2018, we amended and restated the credit agreement to extend the maturity to November 30, 2023 and incurred $1.7 million of debt issuance costs (the “2018 Credit Agreement”). At the Company’s option, borrowings under the 2018 Credit Agreement in USD, euro and British pound will bear interest at either one-, two- or three-month London Interbank Offered Rate (“LIBOR”) or an alternative base rate, in each case plus the applicable margin. The applicable margin will fluctuate between 1.25% per annum and 2.00% per annum, in the case of LIBOR borrowings, or between 0.25% per annum and 1.00% per annum, in the case of base rate borrowings, in each case, based upon the Company’s Consolidated Total Net Leverage Ratio (as defined in the 2018 Credit Agreement) at such time. The lenders have a security interest in substantially all of the assets of the Company and substantially all of its domestic subsidiaries.

Under the 2018 Credit Agreement, we are required to pay a commitment fee rate that fluctuates between 0.20% and 0.35% per annum and the letter of credit fee rate that fluctuates between 1.25% and 2.00% per annum, in each case, based upon the Company’s Consolidated Total Net Leverage Ratio.

There were no borrowings outstanding under the 2018 Credit Agreement as of December 31, 2018. The Company classified the borrowings outstanding as of December 31, 2017 as long-term debt in the accompanying Consolidated Balance Sheets as the amounts due were not contractually required or expected to be liquidated for more than one year from the applicable balance sheet date. Additionally, $1.0 million of the borrowing limit was used (and, therefore, unavailable) as of December 31, 2018 for letters of credit.

There were $3.6 million and $3.1 million of unamortized debt issue costs related to the Credit Facility as of December 31, 2018 and 2017, respectively. These amounts were included in “Other assets” on our Consolidated Balance Sheets.
14. Commitments and Contingencies

Operating Lease Commitments

Rental expense, net of rental income was $55.3 million, $56.0 million and $54.8 million during the years ended December 31, 2018, 2017 and 2016, respectively. For years subsequent to December 31, 2018, future minimum payments for all operating lease obligations that have initial non-cancelable lease terms exceeding one year, net of rental income from subleases are as follows.

<table>
<thead>
<tr>
<th>Year</th>

</tbody>
</table>

Contingencies

We are subject to legal actions arising in the ordinary course of business. In management’s opinion, we believe we have adequate legal defenses and/or insurance coverage with respect to the eventuality of such actions. We do not believe any settlement or judgment relating to any pending legal action would materially affect our financial position or results of operations.

15. Income Taxes

On December 22, 2017, the 2017 Tax Act was signed into law. The 2017 Tax Act included a number of changes to the U.S. Internal Revenue Code, including a reduction of the U.S. corporate income tax rate from 35% to 21% for tax years beginning after December 31, 2017, and a one-time transition tax on certain unrepatriated foreign earnings (the “Transition Tax”). Prospective changes from the 2017 Tax Act that began in 2018 include imposed limitations on the deductibility of executive compensation and interest, a general elimination of U.S. federal income taxes on dividends from foreign subsidiaries, and a new provision designed to tax global intangible low-taxed income (“GILTI”). The Company has made an accounting policy election to account for the tax effects of the GILTI provision as a period cost.

The Company recognized the income tax effects of the 2017 Tax Act in its financial statements for the year ended December 31, 2017, in accordance with Staff Accounting Bulletin No. 118, which provides SEC staff guidance for the application of ASC Topic 740, Income Taxes. The Company finalized its accounting for the income tax effects of the 2017 Tax Act in the fourth quarter of 2018 and there was no material change.
The table below summarizes significant components of deferred tax assets and liabilities.

</tbody>
</table>

As of December 31, 2018 and 2017, the Company believes certain deferred tax assets principally associated with foreign tax credit, capital loss and foreign net operating loss carryforwards, which can be carried forward for periods ranging from 5 years to indefinite, will expire based on updated forward-looking financial information. Therefore, valuation allowances of $21.9 million and $21.6 million are recorded against the Company’s net deferred tax assets as of December 31, 2018 and 2017, respectively.

Prior to the passage of the 2017 Tax Act, the Company asserted that substantially all of the undistributed earnings of our foreign subsidiaries were considered indefinitely reinvested and accordingly, no deferred taxes were recognized. Pursuant to the provisions of the U.S. Tax Act, these earnings were subjected to U.S. federal taxation as a result of the one-time Transition Tax; however, these earnings may still be subject to foreign withholding taxes upon distribution. We have re-evaluated our historical assertion as a result of the 2017 Tax Act and determined that we no longer consider a majority of the undistributed earnings of our foreign subsidiaries to be indefinitely reinvested. As of December 31, 2018, the Company has recognized a deferred tax liability of $0.4 million for foreign withholding tax on undistributed earnings of our foreign subsidiaries that are not indefinitely reinvested.

As of December 31, 2018, the Company has not recorded a $17.8 million deferred tax liability related to the basis difference in the investment in our foreign subsidiaries, as the investment is considered permanent in nature.

</tr>
</tbody>
</table>

The income tax expense for 2018 was $57.2 million, as compared with an income tax benefit of $20.9 million in 2017. The increase in expense is primarily attributable to higher pre-tax income in 2018 as compared with 2017 and the impact of the discrete income tax benefit of $44.9 million recorded in 2017 in connection with accounting for tax effects related to the 2017 Tax Act.

We file numerous consolidated and separate income tax returns in the U.S. federal jurisdiction and in many city, state and foreign jurisdictions. We are no longer subject to U.S. federal income tax examinations for years prior to 2014. We are also no longer subject to state and local or foreign tax examinations by tax authorities for years prior to 2012.
Our liability for uncertain tax positions was $3.7 million and $2.7 million as of December 31, 2018 and 2017, respectively. The Company does not expect any of the uncertain tax positions to settle within the next 12 months. As of December 31, 2018, our accrual for the payment of tax-related interest and penalties was not significant.

16. Stockholders’ Equity

2016 Stock Repurchase Program

On June 2, 2016, our Board of Directors authorized a stock repurchase program of up to $100.0 million (the “Repurchase Program”). On May 18, 2017 and December 1, 2017, our Board of Directors authorized an additional $100.0 million, respectively, increasing the Repurchase Program to an aggregate authorization of $300.0 million. No time limit has been established for the completion of the program, and the program may be suspended, discontinued or replaced by the Board of Directors at any time without prior notice. As of December 31, 2018, we have $72.6 million available under this program to repurchase additional shares.

The following table details our stock repurchases under the Repurchase Program:

<table>
<thead>
<tr>

<td>$18,577</td>
</tr>
</tbody>
</table>

2018 Repurchase Transaction

On August 13, 2018, our Board of Directors authorized the use of a portion of the proceeds from the issuance of the 2023 Convertible Notes to repurchase up to $25.0 million of common stock. On August 16, 2018, 196,050 shares of our common stock were repurchased at $76.51 per share for a total cost of $15.0 million. This is a separate repurchase transaction outside of the Repurchase Program.

2015 Stock Repurchase Program

On November 5, 2015, our Board of Directors authorized a six-month stock repurchase program of up to $50.0 million (the “2015 Repurchase Program”). During the year ended December 31, 2016, we repurchased and retired 85,100 shares of our common stock for an average per share price of $34.16, at a total cost of $2.9 million, which was paid in full in 2016. The 2015 Repurchase Program expired on May 5, 2016.

17. Employee Benefit Plans

We maintain a qualified defined contribution 401(k) plan, which covers substantially all of our U.S. employees. Under the plan, participants are entitled to make pre-tax and/or Roth post-tax contributions up to the annual maximums established by the Internal Revenue Service. We match a certain percentage of participant contributions pursuant to the terms of the plan, which contributions are limited to a percentage of the participant’s eligible compensation. Effective in 2018, we increased our matching percentage. We made contributions related to the plan of $15.2 million, $11.6 million and $11.4 million during the years ended December 31, 2018, 2017 and 2016, respectively.

We also maintain several defined contribution pension plans for our employees in the United Kingdom and other foreign countries. We contributed to these plans $7.7 million, $6.4 million and $6.3 million during the years ended December 31, 2018, 2017 and 2016, respectively.

18. Segment Reporting

We manage our business in five reportable segments: Corporate Finance & Restructuring ("Corporate Finance"), Forensic and Litigation Consulting ("FLC"), Economic Consulting, Technology and Strategic Communications.

Our Corporate Finance segment focuses on the strategic, operational, financial and capital needs of our clients around the world and delivers a wide range of service offerings related to restructuring, business transformation and transaction support. Our restructuring practice includes corporate restructuring, including bankruptcy and interim management services. Our business transformation and transaction support practices include financings, mergers and acquisitions ("M&A"), M&A integration, valuations and tax advice, as well as financial, operational and performance improvement services.
Our FLC segment provides law firms, companies, government clients and other interested parties with multidisciplinary, independent dispute advisory, investigations, data analytics, forensic accounting, business intelligence and risk mitigation services, as well as interim management and performance improvement services for our health solutions practice clients.

Our Economic Consulting segment provides law firms, companies, government entities and other interested parties with analysis of complex economic issues for use in legal, regulatory and international arbitration proceedings, strategic decision making and public policy debates in the U.S. and around the world.

Our Technology segment provides corporations and law firms with a comprehensive and global portfolio of consulting and services for information governance, privacy and security, electronic discovery and insight analytics. Our consulting expertise enables clients to more confidently govern, secure, find, analyze and rapidly understand their data in the context of compliance and risk.

Our Strategic Communications segment designs and executes communications strategies for management teams and boards of directors to help them seize opportunities, manage financial, regulatory and reputational challenges, navigate market disruptions, articulate their brand, stake a competitive position, and preserve and grow their operations.

We evaluate the performance of our operating segments based on Adjusted Segment EBITDA, a GAAP financial measure. We define Adjusted Segment EBITDA as a segment’s share of consolidated operating income before depreciation, amortization of intangible assets, remeasurement of acquisition-related contingent consideration, special charges and goodwill impairment charges. We define Total Adjusted Segment EBITDA, a non-GAAP financial measure, as the total of Adjusted Segment EBITDA for all segments, which excludes unallocated corporate expenses. We use Adjusted Segment EBITDA to internally evaluate the financial performance of our segments because we believe it reflects current core operating performance and provides an indicator of the segment’s ability to generate cash.

The table below presents revenues and Adjusted Segment EBITDA for our reportable segments for the years ended December 31, 2018, 2017 and 2016.

(1) The sum of the quarterly earnings per share amounts may not equal the annual amounts due to changes in the weighted average number of common shares outstanding during each quarterly period.
ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation of the effectiveness of the design and operation of our “disclosure controls and procedures” (as defined in Rule 13a-15(e) under the Exchange Act), as of the end of the period covered by this Annual Report on Form 10-K was made under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer. Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (a) were effective to ensure that information required to be disclosed by us in reports filed or submitted under the Exchange Act is timely recorded, processed, summarized and reported, and (b) included, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in reports filed or submitted under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management’s Report on Internal Control over Financial Reporting

Management’s report on internal control over financial reporting is included in Part II, Item 8, “Financial Statements and Supplementary Data.”

Changes in Internal Control over Financial Reporting

There have not been any changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.
PART III

Certain information required in Part III is omitted from this report but is incorporated herein by reference from our definitive proxy statement for the 2019 Annual Meeting of Stockholders to be filed within 120 days after the end of our fiscal year ended December 31, 2018, pursuant to Regulation 14A with the U.S. Securities and Exchange Commission (“SEC”).

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information contained in our proxy statement under the captions “Information about the Board of Directors and Committees,” “Corporate Governance,” “Executive Officers and Compensation” and “Section 16(a) Beneficial Ownership Reporting Compliance” is incorporated herein by reference.

We have adopted the FTI Consulting, Inc. Code of Ethics and Business Conduct (“Code of Ethics”), which applies to our Chairman of the Board, President, Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer and Controller, and our other financial professionals, as well as all our other executive officers, including chief strategy and transformation officer, chief human resources officer, general counsel, and chief risk officer, and our other officers, directors, employees and independent contractors. The Code of Ethics is publicly available on our website at http://www.fticonsulting.com/~/media/Files/us-files/our-firm/guidelines/fti-code-of-conduct.pdf. If we make any substantive amendments to the Code of Ethics or grant any waiver, including any implicit waiver, from a provision of the Code of Ethics to our President, Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer and Controller or persons performing similar functions, other executive officers or directors, we will disclose the nature of such amendment or waiver on our website or in a Current Report on Form 8-K filed with the SEC. We will provide a copy of our Code of Ethics without charge upon request to our Corporate Secretary, FTI Consulting, Inc., 6300 Blair Hill Lane, Suite 303, Baltimore, Maryland 21209.

ITEM 11. EXECUTIVE COMPENSATION

The information contained in our proxy statement under the caption “Executive Officers and Compensation” is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information contained in our proxy statement under the captions “Security Ownership of Certain Beneficial Owners and Management” and this Annual Report under the caption Part II, Item 5, “Market for the Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities — Securities Authorized for Issuance under Equity Compensation Plans” is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

The information contained in our proxy statement under the captions “Certain Relationships and Related Party Transactions,” “Information about the Board of Directors and Committees,” and “Corporate Governance” is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information contained in our proxy statement under the caption “Principal Accountant Fees and Services” is incorporated herein by reference.
ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULE

(a) (1) The following financial statements are included in this Annual Report:
   Management’s Report on Internal Control over Financial Reporting
   Report of Independent Registered Public Accounting Firm — Internal Control over Financial Reporting
   Report of Independent Registered Public Accounting Firm — Consolidated Financial Statements
   Consolidated Balance Sheets — December 31, 2018 and 2017
   Consolidated Statements of Stockholders’ Equity — Years Ended December 31, 2018, 2017 and 2016
   Notes to Consolidated Financial Statements

(2) The following financial statement schedule is included in this Annual Report:
   Schedule II — Valuation and Qualifying Accounts
   All schedules, other than the schedule listed above, are omitted as the information is not required or is otherwise provided.
FTI Consulting, Inc. and Subsidiaries

AMERICAN OVERSIGHT
[THIS PAGE INTENTIONALLY LEFT BLANK]
The graph below compares the cumulative total shareholder return on our common stock from December 31, 2013 through December 31, 2018 with the cumulative total return of the S&P 500 Index and two customized peer groups. For 2018, the Company has changed its peer group as compared to 2017. The new peer group of six companies includes CRA International, Inc., Houlihan Lokey, Inc., Huron Consulting Group, Inc., Moelis & Co., Navigant Consulting, Inc., and PJT Partners, Inc. (collectively, the “2018 Peer Group”). The old peer group of seven companies included Evercore, Inc., Greenhill & Co, Inc., Huron Consulting Group, Inc., Lazard Limited, Navigant Consulting, Inc., Resources Connection, Inc., and Robert Half International, Inc. (collectively, the “2017 Peer Group”). The changes made from the 2017 Peer Group to the 2018 Peer Group were driven by several factors. In September 2018, the Company selected a peer group for executive compensation purposes, and all of the members of the 2018 Peer Group are also members of that compensation peer group. We also determined that the companies in the 2018 Peer Group are more comparable to the Company than some of the companies in the 2017 Peer Group in terms of one or more of the types of services offered to clients, including with respect to restructuring or mergers and acquisitions, size of market capitalization, or professional employee demographics.

Comparison of 5-Year Cumulative Total Return*

* $100 invested on 12/31/13 in stock or index, including reinvestment of dividends.

Original April 8 2020 quarterly projections versus current trends:
- First-Class Mail stronger than projection, census and a small impact from the initial mailing of stimulus checks have buttressed some of the declines
- Marketing Mail has reduced quickly and is expected to decline further as businesses fail
- Periodicals have declined but not as much as initial estimates
- Shipping & Packages have increased significantly, there is much uncertainty as to whether this trend will continue
- International volumes have slowed and are expected to decline further as international trade slows and self-declared rates begin
• Factors supporting First-Class Mail volume in FY 2020 are likely one-time

• Marketing Mail is highly dependent on the state of the economy
  – The length and depth of the recession will be critical to Marketing Mail volume
  – Past experience in the Great Recession indicates that lost volume is not likely to return

• Potential for stronger package growth in the short-term with significant risk in the longer-term
  – Current package growth is due to shift to online fulfilment, America stocking up and reliance on USPS to handle surge in volumes (for example, Amazon fulfillment centers have focused on essential items)
  – Risks still exist with the long-term
    • Customer concerns regarding our financial condition and stability have increased, which may encourage shift to other channels for advertising and package delivery.
    • Higher unemployment and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the advertising and package markets.
    • Package growth may be adversely impacted by supply chain (production and transportation) disruptions, not only in the U.S but internationally.
    • Recent package growth was fueled by consumers stockpiling household items and food via e-commerce channels. As this surge in spending subsides, repeat purchasing will decline. As society begins to reopen, many consumers will return to retail stores.
    • FedEx has publicly announced that they would be bringing up to 400 million packages back into their network by the end of this calendar year.
Future Volume Scenarios

- Short-term volume trends are becoming more evident, although much uncertainty remains about future course of economy and mail and package volumes.
- Index values shown below represent percentage of IFP volume forecasts retained in subsequent periods.

<tr>
<td>Total</td>
<td>69</td>
<td>60</td>
</tr>
</tbody>
</table>

• Short-term volume trends are becoming more evident, although much uncertainty remains about future course of economy and mail and package volumes.

Index values shown below represent percentage of IFP volume forecasts retained in subsequent periods.
- Assessed higher volume assumptions in light of most recent data
Without the $10B in additional borrowing, the Postal Service could be illiquid as early as Q4 2020 or as late as Q3 2021, based on updated projections.

Note: Assumes continued default on year-end payments for RHB, FERS and CSRS.
Assumes $3B short-term note will be repaid in Q3 FY2021 based on debt schedule.

Outlook for 2020 and 2021 is for significant revenue declines and net losses. Network cannot contract sufficiently to offset declining volume. Note: Board of Actuaries has revised assumptions underlying the CSRDF liability which has increased the amortization payments for FERS and CSRS

Post-COVID period requires significant workhour reductions due to declining volumes. There is a lag to achievement of significant workhour savings due to contractual obligations and the frility of the mail processing and delivery infrastructure.

Baseline Forecast using preliminary volume projection: Reduction of 123M work hours, or approximately 70,000 Full Time Equivalent employees

Scenario 1: Reduction of 54M work hours, or approximately 30,000 Full Time Equivalent employees
Scenario 2: Reduction of 89M work hours, or approximately 50,000 Full Time Equivalent employees
Scenario 3: Reduction of 54M work hours, or approximately 30,000 Full Time Equivalent employees

* The increase in supplies and services is associated with additional purchases related to COVID including purchases of personal protective equipment such as sanitizer, masks, as well as increases related to contract cleaning of facilities due to COVID.
** The Workers' Compensation Fair Value Adjustment is a non-cash expense that reflects the impact that changes in interest rates has on the liability. It fluctuates on a monthly basis.

*Units and pieces in millions*
On April 2, 2020, the Board of Actuaries of the Civil Service Retirement System recommended that OPM adopt new discount and inflation rates

**Summary of Changes:**
- Discount rate decreased from 4.25% to 4.00%
- Inflation assumption decreased from 2.50% to 2.40%
- General salary increase assumption decreased from 2.75% to 2.65%

**Financial Impact:**
- Estimated FERS amortization payment increased by $226M in FY2020
- Estimated CSRS amortization payment increased by $181M in FY2020
- Estimated workers’ compensation (non-cash) increased by $901M in FY2020

- Note: FERS and CSRS amortization amounts are estimates and could change once OPM sends the final bill in September
Amazon is USPS' largest customer. It represented ~$3.9B revenue in FY19, driving $1.6B in contribution and 24% of Air/Ground package delivery volume. FY20 revenue is up 12.6% YTD\(^1\) through February, and experiencing COVID-driven increase of 47% vs. SPLY\(^2\). Over 50% of 1.5B packages shipped in FY19 were at non-discounted prices. Amazon may grow from 50% of e-commerce market today to 70%+ of the market by 2022, with 8B+ packages.

Of total Amazon volume, 77% is overall Parcel Select (37% is PS Lightweight), representing ~80% of total contribution.\(^3\)

The following pages articulate the following:

- **Section 1: Competitor Insourcing Capabilities.** Explains why no Parcel Select volume should be considered “anyhow” volume
- **Section 2: Framework for New Term with Consequences.** Outlines path to leverage Amazon’s recent ask for price certainty to improve overall contracts and install economic consequences for volume insourcing.
- **Section 3: Contribution Impact of a Declining Amazon.** Articulates the relative contribution impact of both decline and growth scenarios with Amazon relationship
- **Section 3 Addendum: Impact of 4x Price Increase in Parcel Select.** Articulates the relative contribution impact of increasing published prices and terminating Parcel Select relationships.
- **Appendix.** Defines key assumptions outlines in Section 3 and Section 3 Addendum.

---

\(^1\) Direct revenue not including revenue through alternative carriers (e.g., UPS sent ~13M Amazon packages through USPS network in FY19)

\(^2\) Since March 10\(^{th}\), 2020

\(^3\) Based on March YTD volume profile. Source: BCT’s March Amazon Dashboard. Parcel Select Contribution based on partner-adjusted costs, with remaining volume assumed to be national average based on the FY19 ACR, assuming a 2.5% cost increase to FY20.
Section 1: Summary of Competitor Capabilities

Comparing Amazon to other major Parcel Select NSAs, we see that Amazon is not only our largest customer, but also one with strength and growth, not achieved through heavy discounting. Currently, USPS and Amazon are entering negotiations to expand partnership, introduce increased operational stability, and secure multi-year contribution.

Given the pressures of COVID-19 stressing Amazon’s capacity, we are at an inflection point in the USPS-Amazon relationship. Increased eCommerce volume is pressuring Amazon to rely on USPS more than ever, which we can cement if we continue to actively partner with them in the long-term. Otherwise, USPS will cede ground to Amazon’s insourcing and other competitors. USPS has no guarantee to retain business under current contractual arrangements.

Amazon has been aggressively insourcing volume with Amazon Logistics, sending 2B+ packages in FY19, which primarily cuts into USPS’ share:

</tr>
</tbody>
</table>

Major last-mile competitors (UPS, FedEx and Amazon Logistics) are all currently making investments to increase capacity and network capabilities. While FedEx is not building out capabilities for <1lb parcels (or currently taking a large share of Amazon), UPS and AMZL have investments that suggest expanded capacity across both lightweight and heavyweight parcels.

**UPS has the capability to absorb a majority of USPS-Amazon volume in the near future with limited incremental investment.**

- **Major investments in new and expanded facilities will increase UPS daily capacity by ~3-5M pieces per day in 2020:**
  - 1 new regional super-hub in Harrisburg, PA with ability to process up to 100K packages per hour.
  - 2 new super-hubs in Tacoma, WA & Ontario, CA with ability to process ~50K packages per hour.
  - 3 new automated sortation & distribution centers with ability to process at least ~20K packages per hour.
  - Transition to ~100% sortation automation increases efficiency by 30%.

- **Ability to handle incremental volume in the last mile will require significant expansion of workforce (+100K temporary workers employed during peak) and delivery fleet (+25%).**

By end of 2020, UPS will increase daily capacity to 33-40M and be able to absorb 100% of USPS Amazon volume.
**Section 2: Potential terms to protect USPS interests**

To secure contribution and prevent continued share-loss, recommend aggressively using Amazon’s most-recent ask for price certainty to **modify entire Parcel Select contractual relationship and establish high-consequence commitments**.

Proposed terms would align closely to UPS agreement.

UPS “no-decline” requirement was a critical feature of the negotiation, and ensures that any volume loss triggers rate escalations. These escalations occur quickly enough to “harvest margin” in instances where customers choose to adjust long-term network plans.

</table>
Section 3. Potential contribution outcomes

USPS management has assessed the multi-year contribution impact based on the following go-forward Amazon scenarios:

a) Contribution harvest strategy through rate increases while maintaining NSA.

b) Steady-state contract status with steady contribution decline.

c) Contractually “locked-in” state to grow contribution.
   - C1: Maintain minimum 0% volume growth ("no decline") to keep NSA pricing
   - C2: Maintain low 5% volume growth to steal share from competitors
   - C3: Maintain strong 15% volume growth in line with Amazon’s eCommerce growth

d) Increase published prices to 4X (see Addendum)
   - D1: Terminate Amazon NSA; volume shifts to Amazon insourcing and competitors but USPS does not win back significant volume through other Parcel Select customer (UPS)
   - D2: Terminate all Parcel Select NSAs (assessed in Addendum – not in below chart)

![Parcel Select Contribution Scenarios](image)

**Scenario A: Contribution harvest strategy.**

*Example: Raise published prices by 50% in Parcel Select Lightweight, effectively increasing prices in all of Amazon’s lightweight volume (37% of total volume).*

This strategy will lead Amazon to rapidly pull volume from USPS. Capability analysis indicates both Amazon and UPS are capable of absorbing USPS’ entire share of existing Amazon volumes. Based on demonstrated in-sourcing capabilities of both carriers, predict >75% of all Amazon volume by 2024 will no longer be with USPS.

In parallel, if UPS takes share from USPS, it will: (1) improve their last-mile economics and increase UPS ability to self-deliver and pull last-mile volume from USPS, (2) create downward price pressure on USPS full-network products (Priority Mail, First Class Package Service).

---

*Note: Section 2 Assumptions documented in APPENDIX*
Wednesday, April 29, 2020

**Scenario B: Steady-state contract.**

*Example: Pursue *no significant changes to contractual agreements*. No contribution is guaranteed to USPS year-to-year.*

In mid-term, USPS expected to maintain volumes from COVID period. However, due to a lack of USPS pricing certainty, there is expectation that insourcing would continue, and volume would *shift steadily to UPS* while accelerating its internal capabilities and growing density. USPS would *lose 35%+ of current Amazon volume by FY23*, heavily reducing contribution.

**Scenario C: Contractually lock-in contribution.**

*Example: Use recent ask for “price certainty” to modify relationship and install contribution certainty.*

Pursue contribution certainty by locking in customer volume commitments. PS contribution could remain flat or increase by up to $1B+ by creating significant economic disincentive for volume declines.

Requires aggressive negotiation strategy that forces new levels of commitment in alignment with UPS negotiation outcomes.
**Section 3 ADDENDUM: Considering a 4x price increase on Parcel Select**

**Context**

This section analyzes the potential impact of a 4-5x price increase of USPS Parcel Select product (both heavyweight and lightweight).

Three scenarios are considered below:

- **D1:** Terminate Amazon NSA; volume shifts to Amazon insourcing and competitors but USPS does not win back significant volume through other Parcel Select customer (UPS)
- **D2:** Terminate all Parcel Select NSAs (*assessed in Addendum – not in below chart*)

In addition, the following key items can be found in the Appendix:

- Detailed articulation of assumptions explanations for Scenario D1
- Summary of impact of price increase to existing USPS price ladder
- Summary of current NSA termination clauses

**Scenario D1: Raising published rates 4x, terminating Amazon NSA**

*Only Amazon is terminated* as an NSA using 365 day out clause, while also installing “defensive terms” for alternative customers (e.g., *rate caps for DHL and Pitney Bowes’ lightweight business*).

In mid-term, USPS would see a contribution uplift during FY21, but would see a rapid loss in contribution due to accelerated in-sourcing behaviors and Amazon partnership with UPS.

**USPS would see contribution from Parcel Select with customer shift from ~$1.3B in FY19, surge to ~$2.3B in FY20, and then decline significantly to ~$1.1B in FY21 and ~$0M annually afterwards.**

*NOTE:* this scenario assumes other customer relationships are held constant. UPS does not provide significant share of Amazon business back to USPS via SurePost or Mail Innovations (~13M pieces in FY19).

Even with additional network volumes, USPS is unlikely to see any significant “volume return” via SurePost or Mail Innovations:

- **During Peak season, UPS can nearly double daily package deliveries to 20 million/day on average** by hiring additional workers (100K in 2019) and establishing small annexes. To deliver USPS Amazon volume, **UPS would need to absorb only ~4M daily pieces on average, which is 20% of their reported peak operating ability.**
- **Furthermore, SurePost and Mail Innovation will not be well-aligned to the current service standards** Amazon experiences at the DDU, making the products unlikely substitutes.

Terminating the Amazon NSA will have implications for all Parcel Select customer relationships. Despite favorable “defensive terms” added to their NSAs, shippers will have reason to believe that

Overall, this action sends the message that USPS is not in control of its financial position or customer strategy, and that customers can presume no pricing certainty or trust even within NSA relationships. Beyond the largest Parcel Select customers, big box retailers (e.g., Walmart, Target) and pharmaceutical shippers (e.g., CVS) seeking a carrier partner for building out their delivery networks would question USPS’ viability for that long-term role.

**Scenario D2: Assuming all major Parcel Select/etc NSAs are terminated with either 365-day 30-day clause (see above):**

Majority of USPS Parcel Select business would be lost under the scenario where USPS raises all published rates by 4x and terminates all customer relationships.

Scenario A: Contribution harvest

<table>
<thead>
<tr>
<th>Competitor Response</th>
<th>FY21</th>
<th>FY22</th>
<th>FY23</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assumed Amazon grows at 18% annually due to long-term customer behavior change. In response to USPS' actions, will pursue network expansions and UPS partnership. They increase their planned 100K add’l last-mile vans by 2024 to 118K vans, with aggressive deployment (e.g. 50%+ by 2022) and improved package density. UPS partnership is accelerated, and UPS begins quickly investing in its network to handle volume. Decline is concentrated in PSLW, but also results in substantial PSHW decline.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Outsourced Volume</td>
<td>2.4B</td>
<td>2.2B</td>
<td>2.3B</td>
</tr>
<tr>
<td>UPS volume (annual growth)</td>

<td>-65%</td>
<td>-80%</td>
</tr>
<tr>
<td>Implied PSHW annual decline</td>
<td>-27%</td>
<td>-37%</td>
<td>-54%</td>
</tr>
</tbody>
</table>

**Price increase**

- **PSHW price increase is 5% for all years except FY21 (assumed to be 2.1% due to their growth)**
- **PSLW price increase is 50% in FY21, and 5% in subsequent years**

**Outcome:** USPS retains ~16% of current PS volumes, equivalent to the portions of volume in USPS Core and ~1/5 of the Battleground, as determined by previous geo-analysis.¹⁰

Scenario B: Maintain current agreements

<table>
<thead>
<tr>
<th>Competitor Response</th>
<th>FY21</th>
<th>FY22</th>
<th>FY23</th>
</tr>
</thead>
<tbody>
<tr>
<td>Similar to above, Amazon grows at 18% annually. They increase their planned 100K add’l last-mile vans by 2024 only to 115K vans, but still with aggressive deployment (e.g. 50%+ by 2022) and improved package density. UPS begins significant network investments in 2021, which are complete by 2023. Decline is equivalent across PS.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>

<td>2.5B</td>
<td>2.4B</td>
<td>2.4B</td>
</tr>
</tbody>
</table>

---

¹⁰ Consider the relative decline compared to USPS’ overall Amazon volume (~1.54B) and applies to PS.

¹⁰ Assumes PSLW decline does not begin until Q2 FY21, when the pricing change would go into effect. Also assumes that ~65% of PSLW volume will be manifested at the 2lb DDU NSA rate, with 35% being subject to the full 50% price increase. This is in-line with the proportion of NSA/Non-NSA PSHW volumes, based on March YTD Data.

¹⁰ Based on projected FY20 volumes, and Enterprise Analytics prior geo-segmentation analysis. Projected FY20 volumes assume 75% sustained COVID growth impacting Q3, with Q4 growth based on March YTD trends (with ~1-2% increase assumed for COVID impact. Source: BCI’s March Amazon Dashboard.

Note: Scenario A and B assume 2.5% annual inflation, along with a 2.1% PSHW price increase in FY21, followed by 5% price increases in FY22 and FY23. The 2.1% PSHW increase is in line with Amazon’s current cap. In Scenario A, a 50% price increase is used for PSLW in 2021, with subsequent 5% price increases in 2021 and 2022. In Scenario B, the 2021 PSLW price increase is assumed to be 5% instead of 50%.

</tbody>
</table>

Price increase: Assume 5.5% price increase on both PSLW and PSHW.

**Outcome:** USPS retains ~30% of current PS volumes, equivalent to the portions of volume in USPS Core and ~1/2 of the Battleground.

**Scenario C: Lock-in contribution**

Scenarios rely on projected FY20 volumes as the baseline.

- FY20 Baseline assumes 75% sustained COVID growth impacting FY20Q3 volumes, with FY20Q4 growth based on March YTD trends (with a ~1.2% increase assumed for COVID impact).
- In Scenario C, 2.1% PSHW and 2.5% PSLW and PSHW price increases assumed for FY21. All subsequent years assume 2.5% price increase across all products.
- 2.5% cost inflation used.

---

**FOR INTERNAL USE ONLY – ASSUMPTION DOCUMENTATION FOR SECTION 2**

**Scenario D1: Core Assumptions**

*Impact on USPS Amazon Volume by quarter involves the following assumptions:*

<table>
<thead>
<tr>
<th>Volume Assumption</th>
<th>What you have to believe</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Amazon</strong></td>
<td></td>
</tr>
</tbody>
</table>
| Amazon increases annual capacity by 2.6B+ by Q4 FY21, 20% more aggressive than current public plans | *Amazon adds 44k last-mile vans by Q4 FY21*  
*35k from standing Rivian order (100k by 2024) and 9K from new orders (Mercedes makes 450k+ vans/yr)*  
*Each van can deliver 165 parcels/360 days a year*  
*Continues fulfillment/middle mile investments on track* |
| **UPS**           |                          |
| UPS will add 3-5M new packages/day by end of 2020, increasing capacity by 1B-1.5B packages annually | *Continues current investment in 3 new super-hubs by end of 2020, totaling 200k hourly add'l capacity*  
*3 sortation/automation centers w/ 60k hourly capacity*  
*Complete transition to 100% automated sortation* |
FedEx

Run rate capacity for Amazon at ~200M Amazon packages annually

FedEx can reallocate all 200M of FY19 Amazon capacity back to Amazon by January 2021

PSLW

PSLW published rates increase 4X on 6/1/2020; NSA-eligible volume is manifested at lower HW NSA rates until contract termination goes into effect on 5/1/2021 and all LW is at 4X

PSHW

Published rates increase 4X on 6/1/2020; NSA volume continues at NSA rates until NSA termination goes into effect on 6/1/2021

Assuming 260(ish) working days:

- UPS = ~18M ADV IN US, 21M WW
- FedEx = ~13M ADV IN US / Canada, ~17M WW
- AMZN = ~8.4M AVD IN US

During Peak

- UPS = ~32-40M delivered (WW)
- FedEx = ~38M moved (WW)
- AMZN = Unknown.

Fleet rentals: North American Fleet Rental fleets are robust and likely struggling

Overall, 490,000 commercial vans were sold domestically in the United States in 2019, a 13% increase from the previous year. Similar sales figures were projected for 2020 ([https://www.goodcarbadcar.net/2019-us-commercial-van-sales-figures-by-model/](https://www.goodcarbadcar.net/2019-us-commercial-van-sales-figures-by-model/))

- Budget has 27k ([https://www.budgettruck.com/resources/factsheet](https://www.budgettruck.com/resources/factsheet))
- U-Haul has 167k trucks ([https://www.amerco.com/history.aspx](https://www.amerco.com/history.aspx))
- Penske had 50k+ in North America ([https://www.pensketruckrental.com/commercial-truck-rental/commercial-trucks/](https://www.pensketruckrental.com/commercial-truck-rental/commercial-trucks/))
- Etc.

UPS: Peak Capacity of 32-40M parcels DELIVERED per day (assumes 6 days), versus ~20M average daily volume. 125k global trucks, but rentals are available.

- Would need to hire new employees, but they have interviewed 100k in ONE DAY in the US previously.
- They continue to invest in automation, increasing automated capacity by 400k pieces / hour in 2019, and have plans to continue to invest.

- Less information available, but they are investing less in their ground operations than UPS.
- However, they clearly can scale volume when needed. FedEx hired 55k temporary workers in peak 2019.

Amazon: ~6M parcels delivered per day on average. 30K domestic last-mile vans, with 100K additional vans expected to be on the road by 2024.

- Have continually demonstrated ability to accelerate ramp-up, such as through hiring 100K additional warehouse and delivery workers during COVID-19.
- Current investments could quickly be bolstered through additional purchases and leasing.
UPS: Peak Capacity of 32-40M parcels DELIVERED per day (assumes 6 days), versus ~20M average daily volume. 125k global trucks, but rentals are available. Would need to hire new employees, but they have interviewed 100k in ONE DAY in the US previously. They continue to invest in automation, increasing automated capacity by 400k pieces / hour in 2019, and have plans to continue to invest.

- 40M High end: Their COO estimated it as even higher at “nearly double” the ~20M deliveries a day they handle now ([https://pressroom.ups.com/pressroom/ContentDetailsViewer.page?ConceptType=PressReleases&id=1568030066733-734](https://pressroom.ups.com/pressroom/ContentDetailsViewer.page?ConceptType=PressReleases&id=1568030066733-734))
  - US deliveries are ~18.7M a day as of last year. ([https://pressroom.ups.com/pressroom/ContentDetailsViewer.page?ConceptType=FactSheets&id=1426321563187-193](https://pressroom.ups.com/pressroom/ContentDetailsViewer.page?ConceptType=FactSheets&id=1426321563187-193))
- They have 125k global vehicles (168 parcels / day delivered based on 21M total deliveries GLOBALLY)
  - They would need an additional ~25k vehicles to handle this capacity
- They are making investments in additional capacity:
- Earnings call:
  - George Willis (Prez, US Ops): We delivered over 32 million packages, 16 of the 18 delivery days between Thanksgiving and Christmas. The majority of our volume, as you heard us talk about investments and handle that growth was -- year-over-year, was done in our automated facilities
  - Juan Perez (Chief Information / Engineering Office): The first one that I think it's important for you guys to know is that at the end of 2019, 75% of our U.S. eligible ground volume was actually sorted through automation. In addition to that, we had completed the rollout of UPS ORION navigation.
FedEx: 38M parcels moved on Cyber Monday (WW). ADV in the US / Canada of 13M (~10M ground and ~3M Express). Less information available, but they are investing less in their ground operations than UPS. However, they clearly can scale volume when needed. FedEx hired 55k temporary workers in peak 2019.

- FedEx continuing to invest in package capacity, primarily in heavyweight, while making sure that they can do LW profitably. From Fred Smith:
  - Now the changes. As we announced last summer, FedEx is aggressively expanding North American packages -- package services for the rapidly growing e-commerce market to include year-round seven-day delivery, in sourcing most SmartPost volumes formally given to the postal service, standing up more dedicated ground large package facilities, given the remarkable growth in demand for the delivery of oversize items and new unique short-haul services.
  - While these are the most visible changes, numerous other new technologies and operating processes are being deployed to ensure we can profitably deliver increasing numbers of lighter weight residential packages. These strategies are being well received in the marketplace with record peak volume -- package volumes which are substantially above last year and well over forecast with excellent service levels and high overall customer satisfaction. In the fourth fiscal quarter, we forecast FedEx Ground margins will again be in the teens.

- NOTE: FedEx doesn’t break out domestic versus international

Sources (by bullet)

Amazon: ~6M parcels delivered per day on average. 30K domestic last-mile vans, with 100K additional vans expected to be on the road by 2024. Have continually demonstrated ability to accelerate ramp-up, such as through hiring 100K additional warehouse and delivery workers during COVID-19. Current investments could quickly be bolstered through additional purchases and leasing.

- Assumes 365 days / year.
- At 300 days = 7.3M / day
- At 260 days = 8.4M / day
- At the end of 2019, Amazon’s current last-mile fleet size was 30,000 vans across 800 Delivery Service Providers
- While bulk of their vans have come from Mercedes Sprinter vans, they have used a variety of vendors
  - Ordered 2,200+ vans from Spartan in July 2019, and have also been seen with RAM models
- Their biggest source of additional capacity will be their purchase of 100,000 electric vans from Rivian
  - Pilots are expected to be on the road by 2020, with Bezos expecting all 100K deployed by 2024
  - This was part of a $700M+ investment made by Amazon in Rivian
- With their current fleet size and operating model (365 days/year), assuming ~175 packages/day/van, Amazon’s internal capacity for 2019 was ~1.9B. However, they also deploy Flex for about ~15% of deliveries, bringing total to ~2.3B. This enables Amazon to deliver ~40-50% of their own volume, in-line with many industry reports and confirmed by Amazon representatives.
- The additional 100,000 vans can bring 6.4B of additional capacity to Amazon’s network

Sources (by bullet)

- “Amazon will order 100,000 electric delivery vans from EV startup Rivian, Jeff Bezos says” The Verge. https://www.theverge.com/2019/9/19/20873947/amazon-electric-delivery-van-rivian-jeff-bezos-order
Talking Points for Call with Congressman Connolly

- Congressman Connolly, I am calling to discuss what I believe is a misunderstanding of some comments I made during yesterday’s open Board meeting, about the Postal Service’s ability to provide an essential service to the country during the COVID-19 crisis.

- First, let me extend my appreciation for your efforts on behalf of the Postal Service during negotiations of the CARES Act, and for your continued advocacy.

- You are responsible for making the Postal Service a central part of the national debate on emergency funding during this crisis.

- Chairman Duncan and I agreed before yesterday’s meeting that he would address the Postal Service’s critical liquidity challenges, and I would discuss the operations of Postal Service as part of America’s critical infrastructure, with an unrivaled ability to deliver an essential service during this crisis, as well as what we are doing to protect the health and safety of our employees.

- We wanted to balance a sense of urgency about addressing our worsening financial condition, with a clear statement about why addressing the Postal Service’s liquidity challenges was so important to the country.

- We also wanted our employees, to hear that we are still up and running, even though things are getting tough, and that their well-being remains our number one concern. They are showing tremendous courage every day in the face of significant personal risk to themselves and their families. They needed to hear that their jobs are not going away.
• We also wanted to alleviate any immediate concerns of our customers that our ability to address their current needs was at risk.

• We knew that trying to balance both messages would be difficult. But we felt that since this was the first time the Board would be publically discussing the COVID crisis, it was important to address multiple audiences and their varying concerns.
Introduction

Let me start by taking this opportunity to thank the men and women of the United States Postal Service.

At least six days per week, and in some instances seven, Postal Service employees accept, process, transport, and deliver vital mail and packages like medicine, products that sustain us, benefits checks, and important information, all with their usual resolve and quiet efficiency.

Postal employees provide an essential public service to all Americans as a part of the country’s critical infrastructure. They go to work every day to serve their communities. We all owe them our sincere gratitude and thanks.

As Americans are urged to stay home, the importance of the mail will only grow as people will need access to communications, essential packages and other necessities.

That said, we are at a critical juncture in the life of the Postal Service. At a time when America needs us more than ever, the reason we are so needed is having a devastating effect on our business.

Because of the significant impacts to our volume and revenues that we project as a direct result of the COVID-19 pandemic, we are in serious danger of running out of cash this fiscal year.

Furthermore, even if we get access to the borrowing authority provided by the CARES Act as we expect, we project that we will run out of cash next fiscal year absent significant additional assistance from Congress.

I would like to provide more details about these and other subjects in our discussion today.

Let me start with our employees. Our number one priority is to protect the health and safety of our employees.

A. How are we protecting our employees?

- We are following the guidance of the Centers for Disease Control and Prevention and other public health authorities.
• **We are coordinating our policies to protect our employees with all four of our union presidents**

• We have established a dedicated COVID-19 Command Response leadership team

• We share CDC guidance with all of our employees on ways to avoid contracting and spreading the virus.

• Based on CDC’s April 3 guidance recommending that cloth face coverings be worn in public settings, we are strongly encouraging all employees to follow this recommendation. We have sufficient inventory to provide non-medical masks to employees upon request or they may bring their own personal cloth face coverings to work for use while on duty.

• We have distributed gloves and hand sanitizers in our facilities. However, the increased demand for gloves and sanitizer depleted supplies of those items in some locations, but we are replenishing our stock.

• **Expanded employee leave provisions, including adding temporary additional paid leave for Non-Career Employees and ability to use sick leave dependent care to include child care.**

• We have instituted a liberal leave policy to encourage employees who think they might be sick or are developing symptoms potentially related to COVID-19 to stay at home and take leave. Pursuant to the Families First Coronavirus Response Act, all employees will also receive 80 hours of emergency sick leave in addition to what they otherwise have accrued.

• We closely keep track of individuals that test positive for COVID-19 and work with local, state or municipal Health Departments in those situations.

• Social distancing is now being applied to every Postal Service function and facility.

• We are installing sneeze guards in our retail facilities.
To practice social distancing in our retail lobbies, we placed social distancing notices on the outer and inner lobby doors, and place floor tape in the queue line six feet apart

- To protect our employees and customers, we eliminated the requirement that customers sign our Mobile Delivery Devices for delivery

- Updated our cleaning policies to ensure that all cleaning occurs in a manner consistent with CDC guidance to prevent the spread of coronavirus

- Expanded the use of telework for employees who are able to perform their jobs remotely, Enabled almost 17,000 employees with telework capability, including over 2,000 bargaining unit employees

- In the case of senior centers we have designated several alternative means by which the Postal Service can accommodate delivery.

B. Shift to Volume Decline

- Here’s what we are seeing right now - the mail has been declining significantly over the past three weeks.

<table>
<thead>
<tr>
<th>Week</th>
<th>Delivered Mail Volume</th>
<th>Delivered Packages</th>
<th>Entered Presort First-Class</th>
<th>Entered USPS Marketing</th>
<th>Entered Periodicals</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Week (3/16 - 3/21)</td>
<td>-5.3%</td>
<td>-1.0%</td>
<td>9.0%</td>
<td>-21.6%</td>
<td>1.3%</td>
</tr>
<tr>
<td>Total Week (3/22 - 3/28)</td>
<td>-7.5%</td>
<td>5.0%</td>
<td>5.1%</td>
<td>-35.5%</td>
<td>-1.6%</td>
</tr>
<tr>
<td>Total Week (3/29 - 4/4)</td>

<td>11.8%</td>
<td>-15.7%</td>
<td>-38.9%</td>
<td>-26.7%</td>
</tr>
<tr>
<td>Week to Date (4/5 - 4/7)</td>
<td>-30.4%</td>
<td>19.9%</td>
<td>-1.0%</td>
<td>-44.5%</td>
<td>-51.4%</td>
</tr>
</tbody>
</table>

- The week of March 16, the total delivered mail (which is a lagging indicator) declined 5.3%; the week of March 22 the total delivered mail declined 7.5%; and last week it declined 24.3%

- This week through Tuesday the mail has declined 30.4%

- For the past two weeks packages have increased, primarily Priority and First Class
• The week of March 22 packages increased 5%; the week of March 30 packages increased 11.7%

• This week through Tuesday packages have increased 20%
  • Although package growth has accelerated, we believe that trend is likely to reverse for several reasons.
  • First, some of our customers are already expressing concerns about what they are reading about our financial condition, and are pursuing alternatives to move their products.
  • Second, the impact of the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
  • Finally, package growth will also be likely impacted by supply chain disruptions across the system, as manufactured goods that go into the boxes decrease, thus reducing package volume.

Volume Impact Estimates:
• There are three components to the COVID impact, that make the effects of the pandemic difficult to quantify:
  • **Depth** of the short-term impact during Calendar Q2 and Q3
  • **Duration** of the economic impact which will influence FY2021
  • **Volume Levels** to which mail returns after the pandemic is concluded, which will influence the out-years
    § After the 2008-2009 recession, some volume never returned (permanent 20% decline from FY2007 levels)

• Current projections suggest the following
• Again recognizing there are a number of unknowns:
  • How bad is it going to get?
  • How long will the economy stay shuttered?
  • Do we permanently lose volume to digital alternatives?

  • **Short term impact - Postal Q3 & Q4 (April – September)**
    § Significant short-term impact for the remainder of FY2020 due to economic impact of COVID
USPS projects impact of up to a 50% decline in volumes in Q3 and 57% decline in Q4 based on the speed at which volume has already declined and information communicated by mailers.

- **Medium-term impact Fiscal Year 2021 (October 2020 – September 2021)**
  - As time moves forward and the economic lock-down begins to lessen, USPS projects a gradual return of volumes beginning in Q1, to about 60% of the corresponding Pre-COVID levels in Q1.
  - The rest of the Fiscal year it is assumed volumes will gradually return to about 74% of Pre-COVID volume levels (it is expected this will be worse than the great recession when USPS lost approximately 20% of volumes by the end due to the overall economic impact the lock-down is having)

- **Long-term impact Fiscal Year 2022 and beyond**
  - The longer-term projection suggests a return to a “new normal” of about 74% of Pre-COVID volume levels where the long-term more gradual secular volume trends will resume for the next 10 years.
  - The longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return will be less.

**C. Revenue Decline**
- The week of March 22 national revenue declined 12.2% v. Plan
- Last week national revenue declined 13.9% v. Plan

- **Revenue Trend:**

</tbody>
</table>

**D. Cash Impacts in the short-term:**
• Project $13B revenue loss for the remainder of this fiscal year directly due to COVID-19
  o Revenue is currently running about $40-50M below plan each day

• Depending on the severity and length of the economic lock-down, current projections indicate the Postal Service would run out of cash by the end of this Fiscal Year if additional cash is not obtained (either through the additional possible Treasury loan, or additional funding mechanisms)
  o We will be illiquid in September with less than 1 payroll of cash remaining (Payroll is ~$2B bi-weekly) with a negative cash balance in October
    § The previous estimate was June.
    § With the stimulus we can defer employer Social Security taxes (~$1.1B thru September 2020) and Treasury agreed to lend us an additional $3.4B which has extended our runway by approximately 3 months.
  o Even with the additional $10B loan, USPS is projected to run out of cash in April 2021 as the $3B in short-term lending comes due to Treasury

• Over the next 18 months (to the end of the next fiscal year) we project our net loss will increase by $22.8B versus previous projections directly due to COVID
  o The previous baseline FY2020/FY2021 net loss projection was -$16.3B
  o The COVID FY2020/FY2021 net loss projection is -$39.1B

• Over the longer term (10 years) we project our net loss will increase by $54.3B versus previous projections directly due to COVID
  o The previous ten year net loss projection was -$146.1B
  o The COVID ten year net loss projection is -$200.6B

• We will do what we can to reduce expenses through overtime and non-career hour reductions, and curtailing of discretionary spending, but due to the impact of COVID on availability, and the costs associated with the leave provisions of HR6201, our ability to significantly reduce expenses in the short-run is diminished.
  • These volume reductions require us to reduce workhours over the next 18 months by 123M which is approximately 69,000 FTEs.
Cost of HR6201 is approximately $600-$900M depending on how many of our workforce suffer a qualifying condition related to COVID and how many have children and dependents out of school/daycare

E. Discussions with Treasury concerning the $10B

- We have started discussions with Treasury concerning the additional borrowing authority and we look forward to a quick resolution so that we can have ready access to this necessary borrowing

**What we Need Now – Short-Term ASK**

As you know our Board of Governors is comprised of both Republicans and Democrats. They operate in a very bipartisan manner. The Postal Service’s recommendations for both short term and medium term relief that I will discuss were adopted unanimously by the Board of Governors. We understand there is a need to focus on short relief to get us through the immediate COVID-19 crisis, and for that reason our immediate ask will be only for relief to help us recover from the direct effects that the COVID-19 pandemic has had and will have on our business.

However, in an effort to be fully transparent, I want to be clear that while this relief will help us to whether the storm caused to our business by the pandemic, it will not resolve our fundamental business model problems or restore the Postal Service to longer term financial health.

For that reason, I will lay out what the Board agrees is needed now to deal with the direct impacts of the COVID-19 pandemic. I will also briefly outline the additional financial relief which the Board believes will be necessary in future legislation to fix the business model problems of the Postal Service and to restore us to longer term financial health.

With regard to our immediate needs to deal with the threat to the Postal Service posed by the impacts to our business directly related to the COVID-19 pandemic, we seek the following four items from Congress:

- **$25B grant to cover COVID losses over the next two year period**

- **$25B modernization grant to help the Postal Service whether the longer term economic impacts to our business resulting from the pandemic, which will ensure that the USPS can maintain and modernize our critical infrastructure to support the nation**
• Debt forgiveness of the $14.4B in outstanding debt

• Unrestricted borrowing authority up to $25B

• The impact of COVID on our expected cash flows over the next 18 months was a decrease of approximately $25B, and in the longer term is almost $55B.

• The Postal Service was severely undercapitalized and this situation is exacerbated by COVID, and as a result we have requested that our $14.4B debt be forgiven to improve our financial condition and provide added flexibility.

• Additionally the severe impact on Postal Service cash flows caused by the pandemic over the longer term as a result of the permanent shift in volumes will require further unsustainable deferment of infrastructure maintenance, and too little investment in new vehicles and automation.

• Providing this $25B grant to enable the Postal Service to modernize our infrastructure has an additional benefit as a stimulus to the economy as the country returns to a new normal.

• Additionally, our projections are not the worst case—In fact, we are not sure where the bottom is. As a result, we need some cushion to help ensure we remain liquid.

• This short-term relief, which is only intended to address the direct impact of the COVID-19 pandemic on our infrastructure, will only allow us to maintain operations.
  o until 2023 (with defaults 2027);
  o If we do not receive the modernization grant this will provide relief until 2021 (with defaults 2025)

F. What we will eventually need medium-term (Within 18 months) to fix our business model and make us sustainable long-term

• We still need additional financial relief that will provide relief for the long-term (10 year horizon):
  o Prospective Medicare Integration with vested liability.
  o Pension relief
  o Pricing & product freedom and flexibility
• The financial relief provided from these items (which we are not seeking now), along with the relief that we are requesting now that is directly related to the pandemic, will provide positive cash flow over the 10 year period.

• To be clear, we will eventually need both the COVID-19 relief we are seeking now, as well as the additional financial relief which we will seek later, in order to fix our business model problems and to be financially sustainable.

• If we can’t achieve this result relatively soon, we will be required to pursue more significant structural reforms to lower our costs in order to ensure that we can continue to pay our bills.

G. Other issues

• Note Purchase Agreement-The Note Purchase Agreement expired pursuant to its terms when we were not able to reach a consensus to extend it. To be clear, the NPA was primarily an administrative document that streamlined our ability to borrow from Treasury. Its expiration did not eliminate our ability to borrow from Treasury. Some lines of credit survived the expiration of the NPA, and in fact we exercised one last week to borrow an additional $3.4B from Treasury.

• With regard to the $10B in additional borrowing authority provided by the CARES Act, our anticipation is that we will be able to borrow that money, and in fact our CFO has had preliminary discussions with the FFB concerning that matter.

• Our request today concerning the borrowing authority provision is merely to further streamline the borrowing process, and to ensure that we have ready access to cash expeditiously, since we will need it to weather the COVID-19 storm.

OTHER
Volume decline – context we deliver roughly 3B pieces of mail a week; currently delivering 2.3B – losing roughly 700M pieces per week

Payroll ~$4B per month

COVID-19 pandemic will increase our net operating losses by more than $22B over the next 18 months and by more than $54B over the next 10 years – threatening our ability to operate.
Introduction

I am so proud of the courage displayed by our employees, and their outstanding work in processing, transporting and delivering mail, and packages in the midst of this national public health crisis. Every day they come to work, risking their health, in order to deliver much needed medications, Social Security and stimulus check, and other necessities to the American public. The Postal Service’s role as an essential service, and an important part of our country’s critical infrastructure was never more important than it is today.

Let me start by taking this opportunity to thank the men and women of the United States Postal Service for all they do every day to bind our nation together, and to emphasize the essential public service that they provide to all Americans as a part of the country’s critical infrastructure. At least six days per week, and in some instances seven, Postal Service employees accept, process, transport, and deliver vital mail and packages like medicine, products that sustain us, benefits checks, and important information, all with their usual resolve and quiet efficiency. As Americans are urged to stay home, the importance of the mail will only grow as people will need access to communications, essential packages and other necessities.

Given the fundamental role that they play as a part of the fabric of this nation, particularly in the difficult times we now face, I wanted to say how proud I am of the tremendous commitment of our employees. They put their anxiety and fear aside and go to work every day to provide a critical service to their communities. We all owe them our sincere gratitude and tremendous thanks.

That said, we are at a critical juncture in the life of the Postal Service. At a time when America needs us more than ever, the reason we are so needed is having a devastating effect on our business. Because of the significant impacts to our volume and revenues that we project as a direct result of the COVID-19 pandemic, we are in serious danger of running out of cash this fiscal year. Furthermore, even if we get access to the borrowing authority provided by the CARES Act as we expect, we project that we will run out of cash next fiscal year absent significant additional assistance from Congress. I would like to provide more details about these and other subjects in our discussion today.

Let me start with our employees. Our number one priority is to protect the health and safety of our employees.

A. How are we protecting our employees?
• We are following the guidance of the Centers for Disease Control and Prevention and other public health authorities

• We are coordinating our policies to protect our employees with all four of our union presidents

• We have established a dedicated COVID-19 Command Response leadership team

• We share CDC guidance with all of our employees on ways to avoid contracting and spreading the virus.

• Based on CDC’s April 3 guidance recommending that cloth face coverings be worn in public settings, we are strongly encouraging all employees to follow this recommendation. We have sufficient inventory to provide non-medical masks to employees upon request or they may bring their own personal cloth face coverings to work for use while on duty.

• We have distributed gloves and hand sanitizers in our facilities. However, the increased demand for gloves and sanitizer depleted supplies of those items in some locations, but we are replenishing our stock.

• Expanded employee leave provisions, including adding temporary additional paid leave for Non-Career Employees and ability to use sick leave dependent care to include child care.

• We have instituted a liberal leave policy to encourage employees who think they might be sick or are developing symptoms potentially related to COVID-19 to stay at home and take leave. Pursuant to the Families First Coronavirus Response Act, all employees will also receive 80 hours of emergency sick leave in addition to what they otherwise have accrued.

• We closely keep track of individuals that test positive for COVID-19 and work with local, state or municipal Health Departments in those situations.

• Social distancing is now being applied to every Postal Service function and facility.
• We are installing sneeze guards in our retail facilities.

• To practice social distancing in our retail lobbies, we place social distancing notices on the outer and inner lobby doors, and place floor tape in the queue line six feet apart

• We closely keep tract of individuals that test positive for COVID-19 and work with local, state or municipal Health Departments in those situations.

• Eliminated the requirement that customers sign our Mobile Delivery Devices for delivery

• Updated our cleaning policies to ensure that all cleaning occurs in a manner consistent with CDC guidance to prevent the spread of coronavirus

• Expanded the use of telework for employees who are able to perform their jobs remotely. Enabled almost 17,000 employees with telework capability, including over 2,000 bargaining unit employees

• In the case of senior centers we have designated several alternative means by which the Postal Service can accommodate delivery.

B. Volume Decline

• The mail has been declining significantly over the past three weeks.

• The week of March 16, the total delivered mail (which is a lagging indicator) declined 5.3%; the week of March 22 the total delivered mail declined 7.5%; and last week it declined 24.3%

• This week through Tuesday the mail has declined 30.4%

• For the past two weeks packages have increased, primarily Priority and First Class

• The week of March 22 packages increased 5%; the week of March 30 packages increased 11.7%

• This week through Tuesday packages have increased 20%
Although package growth has accelerated, we believe that trend is likely to reverse for several reasons.

First, some of our customers are already expressing concerns about what they are reading about our financial condition, and are pursuing alternatives to move their products.

Second, concerned of the impact of businesses losing faith in our ability to maintain operations, as well as the impact of the increase in the unemployment rate and the resulting decline in decreasing consumer income which will likely lead to less consumer spending and a decline in the overall package market.

Finally, package growth will also be likely impacted by supply chain disruptions across the system, as manufactured goods that go into the boxes decrease, thus this will reduce package volume.

**Volume Trend:**

</table>

**Volume Impact Estimates:**

- There are three components to the COVID impact, that make the effects of the pandemic difficult to quantify:
  - Depth of the short-term impact during Calendar Q2 and Q3
  - Duration of the economic impact which will influence FY2021
  - Volume Levels to which mail returns after the pandemic is concluded, which will influence the out-years

  § After the 2008-2009 recession, the volume never returned (permanent 20% decline from FY2007 levels)

- Current projections suggest the following (DON'T FORGET APPROPRIATE CAVEATS HERE):
Short term impact - Postal Q3 & Q4 (April – September)

§ Significant short-term impact for the remainder of FY2020 due to economic impact of COVID

§ USPS projects impact of up to a 50% decline in volumes in Q3 and 57% decline in Q4 based on the speed at which volume has already declined and information communicated by mailers.

Medium-term impact Fiscal Year 2021 (October 2020 – September 2021)

§ As time moves forward and the economic lock-down begins to lessen, USPS projects a gradual return of volumes beginning in Q1, to about 60% of the corresponding Pre-COVID levels with a 40% reduction in Q1. The rest of the Fiscal year it is assumed volumes will gradually return to about 74% of Pre-COVID volume levels (it is expected this will be worse than the great recession when USPS lost approximately 20% of volumes by the end due to the overall economic impact the lock-down is having)

Long-term impact Fiscal Year 2022 and beyond

§ The longer-term projection suggests a return to a “new normal” of about 74% of Pre-COVID volume levels where the long-term more gradual secular volume trends will resume for the next 10 years. The longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return will be less.

C. Revenue Decline

• The week of March 22 national revenue declined 12.2% v. Plan

• Last week national revenue declined 13.9% v. Plan

</tr>
</tbody>
</table>

D. Cash Impacts in the short-term:

• Project Impact of up to $13B in revenue loss versus original plan for the remainder of this fiscal year directly due to COVID-19 over the next 6 months

• Revenue is currently running about $40-50M below plan each day
• Depending on the severity and length of the economic lock-down, current projections indicate the Postal Service could run out of cash by the end of this Fiscal Year if additional cash is not obtained (either through the additional possible Treasury loan, or additional funding mechanisms)
  o We will be illiquid in September with less than 1 payroll of cash remaining (Payroll is ~$2B bi-weekly) with a negative cash balance in October
    § The previous estimate was June.
    § With the stimulus we can defer employer Social Security taxes (~$1.1B thru September 2020) and Treasury agreed to lend us an additional $3.4B which has extended our runway by approximately 3 months.
  o Even with the additional $10B loan, USPS is projected to run out of cash in April 2021 as the $3B in short-term lending comes due to Treasury

• Over the next 18 months (to the end of the next fiscal year), two years, we project our net loss will increase by $22.8B versus previous projections directly due to COVID
  o The previous baseline FY2020/FY2021 net loss projection was -$16.3B
  o The COVID FY2020/FY2021 net loss projection is -$39.1B

• Over the longer term, next ten years, we project our net loss will increase by $54.3B versus previous projections directly due to COVID
  o The previous ten year net loss projection was -$146.1B
  o The COVID ten year net loss projection is -$200.6B

• We will do what we can to reduce expenses through overtime and non-career hour reductions, and curtailing of discretionary spending, but due to the impact of COVID on availability, and the costs associated with the leave provisions of HR6201, our ability to significantly reduce expenses in the short-run is diminished. These volume reductions require us to reduce workhours over the next 18 months by 123M which is approximately 69,000 FTEs.
  o Cost of HR6201 is approximately $600-$900M depending on how many of our workforce suffer a qualifying condition related succumb to COVID and how many have children and dependents out of school/daycare

E. Discussions with Treasury concerning the $10B
The teams have begun dialog with Treasury concerning the additional borrowing authority and we look forward to a quick resolution so that we can have ready access to this necessary borrowing.

F. What We Need Now – Short-Term Ask

As you know our Board of Governors is comprised of both Republicans and Democrats. They operate in a very bipartisan manner. The Postal Service’s recommendations for both short term and medium to long term relief that I will discuss were adopted unanimously by the Board of Governors. While we understand there is a need to focus on short relief to get us through the immediate COVID-19 crisis, and for that reason our immediate ask will be only for relief to help us recover from the direct effects that the COVID-19 pandemic has had and will have on our business.

However, in an effort to be fully transparent, I want to be clear that while this relief will help us to whether the storm caused to our business by the pandemic, it will not resolve our fundamental business model problems or restore the Postal Service to longer term financial health. It is important to recognize that the Postal Service will experience the adverse effects of this economic downturn well into the future. For that reason, I will lay out what the Board agrees is needed now to deal with the direct impacts of the COVID-19 pandemic and what the Board believes will be necessary in future legislation to fix the business model problems of the Postal Service and to restore us to longer term financial health, aided by way of longer term structural changes.

With regard to our immediate needs to deal with the threat to the Postal Service posed by the impacts to our business directly related to the COVID-19 pandemic, we seek the following four items from Congress:

- $25B grant to cover COVID losses over the next two year period
- $25B modernization grant to help the Postal Service whether the longer term economic impacts to our business resulting from the pandemic, which will ensure that the USPS can maintain and modernize our critical infrastructure to support the nation
- Debt forgiveness of the $14.4B in outstanding debt
- Unrestricted borrowing authority up to $25B
• The impact of COVID on our expected cash flows over the next 18 months was a decrease of approximately $25B, and in the longer term is almost $55B.

• The Postal Service was severely undercapitalized and this situation is exacerbated by COVID, and as a result we have requested that our $14.4B debt be forgiven to improve our financial condition and provide added flexibility.

• Additionally the severe impact on Postal Service’s anemic cash flows caused by the pandemic over the longer term as a result of the permanent shift in volumes will require further unsustainable deferment of infrastructure maintenance, and too little investment in new vehicles, and automation.

• Providing this $25B grant to enable the Postal Service to modernize our infrastructure has an additional benefit. As such, as a stimulus to the economy as the country returns to a new normal, and to modernize the Postal Service, we are requesting a $25B.

• Additionally, our projections are not the worst case—In fact, we are not sure where the bottom is. As a result, we need some cushion to help ensure we remain liquid.

• This short-term relief, which is only intended to address the direct impact of the COVID-19 pandemic on our infrastructure, will only allow us to maintain operations.
  o This will provide us relief until 2023 (with defaults 2027);
  o If we do not receive the modernization grant this will provide relief until 2021 (with defaults 2025)

G. What we will eventually need medium-term (Within 18 months) to fix our business model and make us sustainable long-term

• We still need additional financial relief that will provide relief for the long-term (10 year horizon):
  o Prospective Medicare Integration with vested liability.
  o Pension relief
  o Pricing & product freedom and flexibility
    o Pension changes
    o Structural changes to enable the system to adapt to volume changes

• The short-term financial relief provided from these items (which we are not seeking now), along with the relief that we are requesting now that is directly
related to the pandemic above combined with these changes will provide positive cash flow over the 10 year period.

- To be clear, we will eventually need both the COVID-19 relief we are seeking now, as well as the additional financial relief which we will seek later, in order to fix our business model problems and to be financially sustainable.

- If we can’t achieve this result relatively soon, we will be required to pursue more significant structural reforms to lower our costs in order to ensure that we can continue to pay our bills.

H. Other issues
What we need long-term if we do not achieve resolution of our short and medium term items (Beyond 18 months)

- Note Purchase Agreement-The Note Purchase Agreement expired pursuant to its terms when we were not able to reach a consensus to extend it. To be clear, the NPA was primarily an administrative document that streamlined our ability to borrow from Treasury. Its expiration did not eliminate our ability to borrow from Treasury. Some lines of credit survived the expiration of the NPA, and in fact we exercised one last week to borrow an additional $3.4B from Treasury. Postal Service has needed structural reform for years, the latest pandemic and economic disaster is simply exacerbating an already broken business model—a fixed cost infrastructure that cannot adopt to the volume realities—we are delivering less mail to more delivery points.

- With regard to the $10B in additional borrowing authority provided by the CARES Act, our anticipation is that we will be able to borrow that money, and in fact our CFO has had preliminary discussions with the FFB concerning that matter.

- Our request today concerning the borrowing authority provision is merely to further streamline the borrowing process, and to ensure that we have ready access to cash expeditiously, since we will need it to weather the COVID-19 storm.
Introduction

Let me start by taking this opportunity to thank the men and women of the United States Postal Service

At least six days per week, and in some instances seven, Postal Service employees accept, process, transport, and deliver vital mail and packages like medicine, products that sustain us, benefits checks, and important information, all with their usual resolve and quiet efficiency.

Postal employees provide an essential public service to all Americans as a part of the country’s critical infrastructure. They go to work every day to serve their communities. We owe them a debt of gratitude.

Our number one priority is to protect the health and safety of our employees.

A. Permit me to outline – high level how we are protecting our employees.

• We are following the guidance of the Centers for Disease Control and Prevention and other public health authorities

• We are coordinating our policies to protect our employees with all four of our union presidents

• We have established a dedicated COVID-19 Command Response leadership team

• We share CDC guidance with all of our employees on ways to avoid contracting and spreading the virus.

• Based on CDC’s April 3 guidance recommending that cloth face coverings be worn in public settings, we are strongly encouraging all employees to follow this recommendation. We have sufficient inventory to provide non-medical masks to employees upon request or they may bring their own personal cloth face coverings to work for use while on duty.
• We have distributed gloves and hand sanitizers in our facilities. However, the increased demand for gloves and sanitizer depleted supplies of those items in some locations, but we are replenishing our stock.

• **Expanded employee leave provisions, including adding temporary additional paid leave for Non-Career Employees and ability to use sick leave dependent care to include child care.**

• We have instituted a liberal leave policy to encourage employees who think they might be sick or are developing symptoms potentially related to COVID-19 to stay at home and take leave. Pursuant to the Families First Coronavirus Response Act, all employees will also receive 80 hours of emergency sick leave in addition to what they otherwise have accrued.

• We closely keep track of individuals that test positive for COVID-19 and work with local, state or municipal Health Departments in those situations.

• Social distancing is now being applied to every Postal Service function and facility.

• We are installing sneeze guards in our retail facilities.

To practice social distancing in our retail lobbies, we placed social distancing notices on the outer and inner lobby doors, and place floor tape in the queue line six feet apart

• To protect our employees and customers, we eliminated the requirement that customers sign our Mobile Delivery Devices for delivery

• Updated our cleaning policies to ensure that all cleaning occurs in a manner consistent with CDC guidance to prevent the spread of coronavirus

• Expanded the use of telework for employees who are able to perform their jobs remotely, Enabled almost 17,000 employees with telework capability, including over 2,000 bargaining unit employees

**TURNING TO THE BUSINESS:**

As Americans are urged to stay home, the importance of the mail will only grow as people will need access to communications, essential packages and other necessities.
That said, we are at a critical juncture in the life of the Postal Service. At a time when America needs us more than ever, the reason we are so needed is having a devastating effect on our business.

Because of the significant impacts to our volume and revenues that we project as a direct result of the COVID-19 pandemic, we are in serious danger of running out of cash this fiscal year.

Furthermore, even if we get access to the borrowing authority provided by the CARES Act as we expect, we project that we will run out of cash next fiscal year absent significant additional assistance from Congress.

**B. Shift to Volume Decline**

- Here’s what we are seeing right now - the mail has been declining significantly over the past three weeks.

- For the past two weeks packages have increased, primarily Priority and First Class

- The week of March 22 packages increased 5%; the week of March 30 packages increased 11.7%
• This week through Tuesday packages have increased 20%
  
  o Although package growth has accelerated, we believe that trend is likely to reverse for several reasons.
  o First, some of our customers are already expressing concerns about what they are reading about our financial condition, and are pursuing alternatives to move their products.
  
  o Second, the impact of the increase in the unemployment rate and the resulting decline in consumer income will likely lead to less consumer spending and a decline in the overall package market.
  
  o Finally, package growth will also be likely be impacted by supply chain disruptions across the system, as manufactured goods that go into the boxes decrease, thus reducing package volume.

Volume Impact Estimates:

• There are three components to the COVID impact, that make the effects of the pandemic difficult to quantify:
  
  o **Depth** of the short-term impact during Calendar Q2 and Q3
  o **Duration** of the economic impact which will influence FY2021
  o **Volume Levels** to which mail returns after the pandemic is concluded, which will influence the out-years

  § After the 2008-2009 recession, some volume never returned (permanent 20% decline from FY2007 levels)

• Current projections suggest the following

• Again recognizing there are a number of unknowns:
  
  o How bad is it going to get?
  o How long will the economy stay shuttered?
  o Do we permanently lose volume to digital alternatives?

  o **Short term impact - Postal Q3 & Q4 (April – September)**

  § Significant short-term impact for the remainder of FY2020 due to economic impact of COVID
USPS projects impact of up to a 50% decline in volumes in Q3 and 57% decline in Q4 based on the speed at which volume has already declined and information communicated by mailers.

- **Medium-term impact Fiscal Year 2021 (October 2020 – September 2021)**
  
  USPs projects a gradual return of volumes beginning in Q1, to about 60% of the corresponding Pre-COVID levels in Q1.

  The rest of the Fiscal year it is assumed volumes will gradually return to about 74% of Pre-COVID volume levels (it is expected this will be worse than the great recession when USPS lost approximately 20% of volumes by the end due to the overall economic impact the lock-down is having).

- **Long-term impact Fiscal Year 2022 and beyond**

  The longer-term projection suggests a return to a “new normal” of about 74% of Pre-COVID volume levels where the long-term more gradual secular volume trends will resume for the next 10 years.

  The longer the economic lock-down continues and more businesses are disrupted, the higher the likelihood that the level of volume return will be less.

**C. Revenue Decline**

- The week of March 22 national revenue declined 12.2% v. Plan
- Last week national revenue declined 13.9% v. Plan

**Revenue Trend:**

</tbody>
</table>

**D. Cash Impacts in the short-term:**
• **Project $13B revenue loss for the remainder of this fiscal year directly due to COVID-19**
  - Revenue is currently running about $40-50M below plan each day

• Depending on the severity and length of the economic lock-down, current projections indicate the Postal Service would run out of cash by the end of this Fiscal Year if additional cash is not obtained (either through the additional possible Treasury loan, or additional funding mechanisms)
  - We will be illiquid in September with less than 1 payroll of cash remaining (Payroll is ~$2B bi-weekly) with a negative cash balance in October
    - The previous estimate was June.
  - With the stimulus we can defer employer Social Security taxes (~$1.1B thru September 2020) and Treasury agreed to lend us an additional $3.4B which has extended our runway by approximately 3 months.
  - Even with the additional $10B loan, USPS is projected to run out of cash in April 2021 as the $3B in short-term lending comes due to Treasury

• Over the next 18 months (to the end of the next fiscal year) we project our net loss will increase by $22.8B versus previous projections directly due to COVID
  - The previous baseline FY2020/FY2021 net loss projection was -$16.3B
  - The COVID FY2020/FY2021 net loss projection is -$39.1B

• Over the longer term (10 years) we project our net loss will increase by $54.3B versus previous projections directly due to COVID
  - The previous ten year net loss projection was -$146.1B
  - The COVID ten year net loss projection is -$200.6B

• We will do what we can to reduce expenses through overtime and non-career hour reductions, and curtailing of discretionary spending, but due to the impact of COVID on availability, and the costs associated with the leave provisions of HR6201, our ability to significantly reduce expenses in the short-run is diminished.
  - These volume reductions require us to reduce workhours over the next 18 months by 123M which is approximately 69,000 FTEs.
Cost of HR6201 is approximately $600-$900M depending on how many of our workforce suffer a qualifying condition related to COVID and how many have children and dependents out of school/daycare.

E. Discussions with Treasury concerning the $10B

- We have started the process with Treasury concerning the additional borrowing authority and we are meeting later today to continue the discussion.

What we Need Now – Short-Term ASK

As you know our Board of Governors is comprised of both Republicans and Democrats. They operate in a very bipartisan manner. The Postal Service’s recommendations for both short term and medium term relief that I will discuss were adopted unanimously by the Board of Governors. We understand there is a need to focus on short relief to get us through the immediate COVID-19 crisis, and for that reason our immediate ask will be only for relief to help us recover from the direct effects that the COVID-19 pandemic has had and will have on our business.

However, in an effort to be fully transparent, I want to be clear that while this relief will help us to whether the storm caused to our business by the pandemic, it will not resolve our fundamental business model problems or restore the Postal Service to longer term financial health.

For that reason, I will lay out what the Board agrees is needed now to deal with the direct impacts of the COVID-19 pandemic. I will also briefly outline the additional financial relief which the Board believes will be necessary in future legislation to fix the business model problems of the Postal Service and to restore us to longer term financial health.

With regard to our immediate needs to deal with the threat to the Postal Service posed by the impacts to our business directly related to the COVID-19 pandemic, we seek the following four items from Congress:

- **$25B grant to cover COVID losses over the next two year period**

- **$25B modernization grant to help the Postal Service weather the longer term economic impacts to our business resulting from the pandemic, which will ensure that the USPS can maintain and modernize our critical infrastructure to support the nation**
• Mechanism to pay off the $14.4B in outstanding debt

• Consolidate the borrowing authority provided in Stimulus 3 of $10B with $15B statutory authority providing us

• Unrestricted borrowing authority up to $25B

• The impact of COVID on our expected cash flows over the next 18 months was a decrease of approximately $25B, and in the longer term is almost $55B.

• The Postal Service was severely undercapitalized and this situation is exacerbated by COVID, and as a result we have requested that our $14.4B debt be forgiven to improve our financial condition and provide added flexibility.

• Additionally the severe impact on Postal Service cash flows caused by the pandemic over the longer term as a result of the permanent shift in volumes will require further unsustainable deferment of infrastructure maintenance, and too little investment in new vehicles and automation.

• Providing this $25B grant to enable the Postal Service to modernize our infrastructure has an additional benefit as a stimulus to the economy as the country returns to a new normal.

• Additionally, our projections are not the worst case—In fact, we are not sure where the bottom is. As a result, we need some cushion to help ensure we remain liquid.

• This short-term relief, which is only intended to address the direct impact of the COVID-19 pandemic on our infrastructure, will only allow us to maintain operations.
  o until 2023 (with defaults 2027);
  o If we do not receive the modernization grant this will provide relief until 2021 (with defaults 2025)

F. What we will eventually need medium-term (Within 18 months) to fix our business model and make us sustainable long-term

• We still need additional financial relief that will provide relief for the long-term (10 year horizon):
  o Prospective Medicare Integration with vested liability.
  o Pension relief
o Pricing & product freedom and flexibility

• The financial relief provided from these items (which we are not seeking now), along with the relief that we are requesting now that is directly related to the pandemic, will provide positive cash flow over the 10 year period.

• To be clear, we will eventually need both the COVID-19 relief we are seeking now, as well as the additional financial relief which we will seek later, in order to fix our business model problems and to be financially sustainable.

• If we can’t achieve this result relatively soon, we will be required to pursue more significant structural reforms to lower our costs in order to ensure that we can continue to pay our bills.

G. Other issues

• Note Purchase Agreement-The Note Purchase Agreement expired pursuant to its terms when we were not able to reach a consensus to extend it. To be clear, the NPA was primarily an administrative document that streamlined our ability to borrow from Treasury. Its expiration did not eliminate our ability to borrow from Treasury. Some lines of credit survived the expiration of the NPA, and in fact we exercised one last week to borrow an additional $3.4B from Treasury.

• With regard to the $10B in additional borrowing authority provided by the CARES Act, our anticipation is that we will be able to borrow that money, and in fact our CFO has had preliminary discussions with the FFB concerning that matter.

• Our request today concerning the borrowing authority provision is merely to further streamline the borrowing process, and to ensure that we have ready access to cash expeditiously, since we will need it to weather the COVID-19 storm.
DISCUSSION WITH DEPARTMENT OF TREASURY CONCERNING BORROWING UNDER THE CARES ACT
4/9/2020

Department of Treasury
Gary Grippo
Kip Kranbuhl
Various others, who did not identify themselves and provided no input

Postal Service
Joe Corbett
Tom Marshall
Elizabeth Schafer
Mark Berthold
Walter Alesevich

Major discussion points (mostly presented by Gary Grippo):

- Loan to be directly from the Treasury, not the FFB
  - Don’t want to run this through books of the FFB
- Note Agreement to be premised on Treasury’s Basic Interagency Borrowing Document (MOU)
  - Similar to what Treasury presented to Ginny Mae
- Not a future advance promissory note; the note would be in a maximum amount and the Postal Service would draw down on that amount
- Terms and Conditions
  - No Consent Rights
  - Triggering Events for Borrowing
    - Reporting to Treasury amount Postal Service cash position
    - Report of Postal Service actual volumes compared to projections
    - Condition—when permissible draw relative to cash on hand
  - Interest Rate—Ensure the Treasury’s cost of funds were covered
- Maturity—Haven’t thought this condition through
- Reporting at the time of draw
  - Satisfaction of covenants as a prerequisite to exercising a draw
  - Certification of Postal Service amount operating losses
- Secretary Mnuchin is reviewing everything related to CARES Act.
  - He reviews every press release
  - He will review documents related to the $10B Postal Service borrowing

Liz Schafer asked to forward a copy of the MOU; Grippo responded to Joe that the MOU embodies the process and accounting aspects of the loan and that we would have an initial copy in a week to 10 days

In response to Tom Marshall’s questions about discussions with Mike Elston about potential debt forgiveness, Kip Kranbuhl noted that the outstanding obligations needs to be repaid so as to avoid the FFB booking a loss. Kip Kranbuhl also noted that Treasury is looking for a sense of where the Postal Service’s financial are (what is the burn rate?) Gary Grippo noted that he had discussions with the Postal Service and he would brief Kip Kranbuhl.

In response to Tom Marshall’s questions about discussions with Mike Elston about potential debt forgiveness, Kip Kranbuhl noted that the outstanding obligations needs to be repaid so as to avoid the FFB booking a loss. Kip Kranbuhl also noted that Treasury is looking for a sense of where the Postal Service’s financial are (what is the burn rate?) Gary Grippo noted that he had discussions with the Postal Service and he would brief Kip Kranbuhl.
This memo sets out a summary of our central conclusions on the legality of an agreement that would cede effective operational control of key Postal Service functions to the Secretary of the Treasury or the Federal Financing Bank (FFB). In conducting this analysis, we assume that the terms of the proposed agreement would be substantially similar to those that the Postal Service discussed with the FFB in 2019. We base our conclusions both on a review of all the relevant materials prepared by the Postal Service and Treasury in 2019, and on our own independent research into the governing constitutional and statutory law.

We agree with the conclusion reached by the Postal Service at that time that such a surrender of Postal Service decision-making authority would be impermissible as a matter of law. By statute, Congress has given control over postal operations to the Governors and the Board of Governors. Under settled principles of constitutional law and statutory interpretation, the Governors may not “subdelegate” that authority to another department of the Executive Branch unless there is affirmative evidence that Congress permitted them to do so. And Congress has not affirmatively provided the Governors permission to subdelegate control over Postal Service operations to Treasury or the FFB, either in the recent CARES Act or in the Postal Service’s organic statute, the Postal Reorganization Act (PRA). Any agreement by the Postal Service to surrender its authority to the Secretary of the Treasury or to the FFB therefore would be illegal.

In particular:
• The Postal Service is an independent authority of the Executive Branch whose powers are statutorily assigned by Congress to the Governors and the Board of Governors. The courts uniformly have held that, when Congress has conferred specified powers on a particular agency, a different agency may not exercise those powers unless there is “affirmative evidence” that Congress permitted subdelegation of that authority from the first to the second agency; “[a] general delegation of decision-making authority to a federal administrative agency does not, in the ordinary course of things, include the power to subdelegate that authority” to a different agency. U.S. Telecom Ass’n v. FCC, 359 F.3d 554, 566 (D.C. Cir. 2004). Consequently, the questions here are whether (1) an agreement between the Postal Service and Treasury/FFB giving the latter control over core Postal Service operations would in fact constitute a subdelegation of the Postal Service’s authority; and (2) if so, whether that subdelegation has been authorized by Congress with sufficient clarity.

• On the first of these questions, an agreement that would give the Treasury/FFB control over Postal Service policy and decision-making would constitute a subdelegation. There is little case law precisely on point, but that likely is because no agency has proposed ceding to another government department effective control over central aspects of its decision making, including its relations with third parties and its policymaking—which is the sort of control demanded by the FFB in 2019. Indeed, the FFB did not really argue otherwise in 2019. The more limited points that it did offer in support of its argument that the proposed agreement would not constitute a subdelegation are unpersuasive.

➢ The FFB suggested that, by entering into the proposed agreement, the Postal Service would not be subdelegating its authority, but instead exercising its own choice to accept FFB control. This distinction is plainly wrong; it is simply another way of stating that the Postal Service (by accepting the proposal) would have chosen to subdelegate its authority. That doesn’t distinguish the situation here from every case of subdelegation, in which the delegating agency (whether by contract or by regulation) will have voluntarily sought to delegate an element of its authority.
The FFB also contended that the Postal Service would retain ultimate control over its policies because it could break its agreement with the FFB, subject only to the loss of financing that the FFB had not been obligated to provide in the first place and that the Postal Service could seek from other sources. Although the FFB did not put its position in these terms, it could analogize this theory to decisions that have recognized the propriety of agencies consulting with other executive departments (or with private parties), so long as the principal agency retains final decision-making authority. On that view, Treasury or the FFB would simply be seeking input into Postal Service decision making that the Postal Service would be free to reject.

Our view, however, is that the subdelegation doctrine makes it impermissible for an Executive Branch instrumentality to enter into what purports to be a binding agreement to illegally subdelegate its authority. That is so for a number of reasons.

First, even if there is a theoretical possibility that the Postal Service could terminate its loan agreement rather than accede to particular future Treasury/FFB directions, so long as the contract is in force there would be an illegal subdelegation, which would make it improper for the Postal Service to agree to the proposed contract terms.

Second, and relatedly, by accepting funds from the Treasury/FFB on the condition that it submit to their control, the Postal Service would be taking action—and would be inducing Treasury/FFB also to take action—expressly premised on the existence of an illegal subdelegation. This looks nothing like the sort of mechanism for offering nonbinding advice from one agency to another that has been found to be consistent with the subdelegation doctrine. We doubt that courts would find such an agreement lawful on the “wink and
a nod” understanding that the facially binding contract is only for show.

✓ And **third**, the PRA specifically authorizes the Postal Service to enter into “binding covenants” with the holders of its obligations relating to use of Postal Service revenues and receipts, indicating the congressional expectation that Postal Service contracts would in fact be binding in the ordinary sense. Against this background, there is no basis to believe that Congress authorized the Postal Service to subdelegate its authority by entering into facially “binding” contractual obligations that it intends to disregard.

This problem could not be avoided by including a contract term that allows the Postal Service to terminate the lending agreement and return the borrowed funds. In those circumstances, there still would be an illegal subdelegation while the contract was in force. And the reality is that the Postal Service would be unlikely to be able to return the funds in light of its other legal obligations (e.g., union contracts, retirement funding obligations, and operational requirements), making the possibility of termination—and the avoidance of impermissible subdelegation—illusory.

➢ The FFB invoked court decisions that recognize the authority of federal agencies to condition their actions on determinations made by other federal agencies, by state agencies, or even by nongovernmental entities. Although the limits of this principle are a little murky, we believe that courts would find these decisions inapposite here. The decisions cited by the FFB generally involve circumstances where it was reasonable for the principal agency to defer to the judgments of, or to rely on factual findings made by, a separate entity that has special knowledge or expertise bearing on the principal agency’s action. This sort of incorporation of a secondary determination constitutes only a very limited form of subdelegation. The proposal here,
which would delegate central Postal Service policymaking authority to an entity that has no programmatic connection to postal operations, is materially different. If the proposed agreement here is legal, the limit on subdelegation would effectively be read out of the law.

• On the second question posed by the prospect of awarding control over Postal Service operations to Treasury/FFB, Congress has not authorized that sort of subdelegation of Postal Service authority. Here, two interpretive rules apply: as a general matter, Congress does not use ordinary language to achieve extraordinary results (what the Supreme Court has called the “no elephants in mouseholes” principle); and, in particular, courts will not find subdelegation unless Congress has authorized it with unmistakable clarity. Both principles establish that the proposed subdelegation is not authorized.

 In 2019 the FFB suggested that the Postal Service’s general authority under the PRA to enter into contracts related to financing that it deems “necessary and desirable” authorizes it to contract away its authority. 39 U.S.C. § 2005(b)(1); see also 39 U.S.C. § 2005(c)(8) (obligations may be subject to such “terms and conditions” as the Postal Service determines); 39 U.S.C. § 2006(a) (Secretary of the Treasury and the Postal Service may enter into financing agreements under “such terms” as they agree). The CARES Act contains very similar language, providing that the Secretary of the Treasury may lend to the Postal Service “upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.” § 6001(b)(2). Although this language may be literally consistent the Postal Service entering into a contract on terms that surrender its core powers, the statutory text is insufficiently clear to authorize a subdelegation of Postal Service authority.

✓ So far as the PRA is concerned, the remainder of Sections 2005 and 2006 are technical or general; nothing in them suggests that Congress meant to authorize the Postal Service to cede control over central aspects of its operations. Even if contractual
provisions of the sort proposed by the FFB in 2019 might appear in a private contract, read in context it is very unlikely that Congress meant the boilerplate “terms and conditions” language of Sections 2005 and 2006 to authorize a governmental entity to surrender its core decision-making authority.

As for the CARES Act, it provides simply that the Postal Service may borrow funds from Treasury to be used for “operating expenses” if additional amounts are necessary “due to the COVID-19 emergency.” § 6001(b). Here, too, there is no suggestion in the statutory language or structure that Congress had it in mind to allow for a fundamental reallocation of Postal Service powers, let alone “affirmative evidence” that Congress meant to authorize subdelegation of Postal Service authority.

That conclusion is confirmed by unambiguous evidence that Congress meant to safeguard the independence of the Postal Service and, to the greatest extent possible, to insulate it from direct control by the President or other Executive Branch officials. That is why the PRA gives the Governors ultimate authority over the Postal Service and permits their removal only for cause. The legislative history of the PRA also contains clear indications that, in particular, Congress did not want the Secretary of the Treasury to use control over financing as a means of interfering with Postal Service operations. The PRA’s anodyne contracting language is wholly consistent with these indications of congressional intent.

The even more cursory terms of the CARES Act cannot reasonably be read to reverse this fundamental and long-settled congressional policy favoring Postal Service independence. The Congress that enacted the CARES Act is presumed to have been aware that the PRA was designed to limit direct presidential control...
over the Postal Service and to differentiate the Postal Service from conventional executive departments. Given that understanding, a simple authorization for the Postal Service to enter into a loan agreement with the Secretary of the Treasury—which is all the CARES Act contains—does not authorize the Secretary to demand, or the Postal Service to accept, Treasury control over Postal Service operations.

- The FFB argued in 2019 that its own statute authorizes subdelegation of Postal Service authority, but that contention is insupportable. The FFB is authorized generally to purchase or sell obligations issued, sold, or guaranteed by a federal agency “on terms and conditions determined by the bank.” 12 U.S.C. § 1285(a). As with the similar language in the PRA and the CARES Act, that phrase is not reasonably understood to give the FFB authority to demand control over the policy making of myriad federal agencies. In fact, the legislative history shows that the FFB was created to coordinate federal financing programs and, in particular, that Congress did not intend the FFB to be a mechanism by which the Treasury Secretary could assert authority over Postal Service policy. Nothing here provides the clarity necessary to support subdelegation.

- Entering into an agreement that creates an illegal subdelegation, even if that were something the Postal Service might consider, would create serious practical problems. Third parties that were adversely affected by policy changes demanded by Treasury/FFB—including, among other parties, Postal Service employees and customers—would have standing to bring lawsuits challenging the legality of those changes as inconsistent with the bar on subdelegation. In our view, those suits would likely be successful. Courts might respond by invalidating the changes, and perhaps the lending agreement itself. Although the ways in which such judicial decisions might be implemented are not entirely clear, at a minimum such decisions would cause great uncertainty and could result in substantial disruption of Postal Service operations and funding.

Subject: The Defense Production Act of 1950 and COVID-19 Pandemic

THE DEFENSE PRODUCTION ACT OF 1950
(50 U.S.C. §4501 et seq.)

And its implications for the United States Postal Service (“USPS”) during the COVID-19 Pandemic

Introduction

The Defense Production Act of 1950 (“DPA”) was originally enacted as a response to the outbreak of the Korean War and was modeled after the War Powers Acts of World War II. The DPA, however, far outlasted active hostilities in Korea and Congress has amended, extended and or renewed portions of the DPA more than 50 times—most recently Congress extended the DPA until September 30, 2025 in the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (P.L. 115-232). In the DPA Congress declared that

the security of the United States is dependent on the ability of the domestic industrial base to supply materials and services for the national defense and to prepare for and respond to military conflicts, natural or man-caused disasters, or acts of terrorism within the United States.

In general the DPA confers significant powers on to the Executive Branch to impact, direct, prioritize and incentivize industries as is necessary in the “national defense.” Three main sections of the DPA remain, (I) Title III: Strengthening Domestic Capability; (II) Title I: Priorities and Allocations; and (III) Title VII: General Provisions. Because Title III is most applicable to the USPS and the COVID-19 Pandemic, we will discuss Title II before Title I, below.
The DPA expressly provides the Executive Branch with an “array of authorities to shape national defense preparedness programs and to take appropriate steps to maintain and enhance the domestic industrial base.” 50 U.S.C. §4502(a)(4) (emphasis added). The term “national defense” is defined very broadly in the DPA, including many of the functions provided by the USPS; national defense is defined as

programs for military and energy production or construction, military or critical infrastructure assistance to any foreign nation, homeland security, stockpiling, space, and any directly related activity. Such term includes emergency preparedness activities conducted pursuant to title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act [42 U.S.C. §§5195 et seq.] and critical infrastructure protection and restoration.

“Critical infrastructure” is further broadly defined in the DPA to include “any systems and assets, whether physical or cyber-based, so vital to the United States that the degradation or destruction of such systems and assets would have a debilitating impact on national security, including, but not limited to, national economic security and national public health and safety.” 50 U.S.C. §4552(2). With over 500,000 employees and 187.8 Million items processed and delivered each day, 47% of the World’s mail, the USPS is unquestionably critical to a functioning U.S. and World economy. See https://facts.usps.com. The Department of Homeland Security, Cybersecurity and Infrastructure Security Agency has further classified “postal and shipping workers” as part of the “Essential Critical Infrastructure Workforce” in light of the COVID-19 Pandemic by memorandum dated March 19, 2020. See https://www.cisa.gov/sites/default/files/publications/CISA_Guidance_on_the_Essential_Critical_Infrastructure_Workforce_508C_0.pdf.

Moreover, the DPA references 42 U.S.C. §5195(a)(3) for the definition of “emergency preparedness” activities, which includes

all those activities and measures designed or undertaken to prepare for or minimize the effects of a hazard upon the civilian population, to deal with the immediate emergency conditions which would be created by the hazard, and to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by the hazard.

As a result the DPA extends well beyond military preparedness and support and is an important tool for the response and recovery from various types of national emergencies both foreign and domestic, including the current COVID-19 Pandemic. In fact, the essential services provided by the USPS, including the universal services mandate, during times where individuals are quarantined, and in many circumstances isolated from other services, is an important aspect of minimizing the effect of such a hazard upon the public.
I. **Title III of the DPA: Strengthening Domestic Capability**

Title III of the DPA allows the President, or other portions of the Executive Branch through delegation, to provide incentives and assistance, including loans and loan guarantees, to, *inter alia*, “assure that critical components, critical technology items, essential materials, and industrial resources are available from reliable sources when needed to meet defense requirements during peacetime, graduated mobilization, and national emergency.” U.S.C. §4517(b). As explained above, the USPS is likely considered part of the “critical infrastructure” of the United States, and the World, and Title III of the DPA allows for assistance and incentives to the USPS to assure that its critical function is provided in both peacetime and during a national emergency such as the COVID-19 Pandemic.

Pursuant to 50 U.S.C. §4531(a) the President has the authority under the DPA to reduce current shortfalls or prevent projected shortfalls of those entities providing critical items by authorizing direct loans or loan guarantees “for the purpose of financing any contractor, subcontractor, provider of critical infrastructure, or other person in support of . . . production and deliveries or services essential to the national defense.” *Id.* (emphasis added). Although the DPA typically requires meeting certain conditions and for the President to make certain determinations before the incentives can be provided, if a national emergency is declared by Congress or the President such conditions and determinations do not apply. 50 U.S.C. §4531(2). In the case of the COVID-19 Pandemic, the President has formally declared a national emergency and therefore the conditions and determinations are not required. *See* https://www.whitehouse.gov/presidential-actions/proclamation-declaring-national-emergency-concerning-novel-coronavirus-disease-covid-19-outbreak/. Regardless of a declaration of national emergency, Congress still must appropriate funds providing authority for such loan or loan guarantees. 50 U.S.C. §4531(3).

Congress has authorized the USPS, pursuant to 39 U.S.C. §2005, to borrow certain amounts of funds, but the total amount and net annual increase in obligations is subject to significant restrictions. However, the “CARES Act,” which has passed the Senate and is pending before the House of Representatives, includes an express appropriation of funds for direct loans to the USPS from the U.S. Treasury notwithstanding the limitations in 39 U.S.C. §2005. Specifically, Title VI, §6001(b) of the “CARES Act” currently includes language that allows the USPS to “borrow money from the Treasury in an amount not to exceed $10,000,000,000,” in addition to any other existing borrowing authority, if the USPS determines that due to the COVID-19 Pandemic it “will not be able to fund operating expenses without borrowing money.” The direct loan(s) of up to $10 Billion must be used for operating expenses and cannot be used for the payment of existing debt. *Id.* §6001(b)(1)(A)-(B). The loans under the CARES Act may be upon favorable terms, including any terms and conditions mutually agreed upon by the Secretary [of the Treasury] and the [USPS].” *Id.* §6001(b)(2).
Although the $10 Billion of available borrowing authority under the CARES Act, if enacted, is an important tool for the USPS to weather the COVID-19 Pandemic, the USPS payroll is approximately $4 Billion every two weeks and if additional borrowing becomes necessary Title III of the DPA can be invoked to provide additional funds so that USPS can continue to provide its critical infrastructure during this national emergency.

II. Title I of the DPA: Priorities and Allocations Authority

Title I of the DPA allows the President, or other portions of the Executive Branch through delegation, to require persons, businesses and other entities to (1) give priority to certain contracts, orders or other performance as necessary or appropriate to promote the national defense and (2) to allocate the distribution of supplies, materials, services or even facilities as deemed necessary or appropriate. 50 U.S.C. §4511(a).

The prioritization authority is the most commonly used aspect of the DPA, namely with regard to certain contracts or orders by the Department of Defense, including the B-2 Bomber, Air Force One and certain Mine Resistant Ambush Protected (MRAP) Vehicles. See www.bis.doc.gov/index.php/forms-documents/pdfs/1257-dx-dated-program-list/file. Although less common, other departments and agencies have used DPA prioritization such as the Department of Homeland Security requiring prioritization of manufacturing housing units, food and bottled water during the 2017 disaster season. See Department of Homeland Security, The Defense Production Act Committee: Report to Congress, Calendar Year 2017 Report, June 18, 2018, p. 10.

The allocation authority is rarely used. The best example of its use is the Civil Reserve Air Fleet (CRAF) whereby civilian aircraft are “allocated” for potential use by the Department of Defense in case needed in a nation defense crisis where the existing military air fleet is insufficient. See www.dot.gov/ost/oiser/craf.htm. However, the use of the allocation authority has recently been a topic of consideration during the COVID-19 Pandemic to potentially require private corporations to allocate resources towards the immediate production of test kits and other medical supplies.

Although providing powerful tools for the Executive Branch to invoke private assistance in national defense and national emergency efforts, the prioritization and allocation authorities of Title I are less likely to impact the USPS and more likely to affect private industry and manufacturing companies. That being said, Title VI, § 6001(c) of the “CARES Act,” which has passed the U.S. Senate and is pending before the House of Representatives, expressly instructs the USPS to “prioritize delivery of postal products for medical purposes” during the COVID-19 Pandemic and “establish temporary delivery points, in such form and manner as the [USPS] determines necessary, to protect employees . . . and individuals receiving deliveries…”
III. Title VII of the DPA: General Provisions

Title VII of the DPA includes various miscellaneous provisions that are generally not applicable to the USPS, including, *inter alia*, special preferences for small businesses, 50 U.S.C. §4551, ability to conduct investigations and obtain information regarding the domestic industrial base, 50 U.S.C. §4555, immunity from anti-trust laws where the DPA is used to encourage voluntary agreements between competing companies and interest, 50 U.S.C. §4558, the ability of the President to create a committee of industry executives, 50 U.S.C. §4560, and the creation of a committee on foreign investment, 50 U.S.C. §4565.

Conclusion

The DPA is an important and strong tool for the President and the Executive Branch to act in (or prepare for) wartime and times of crisis or emergency and the crucial function of the USPS makes it part of the “critical infrastructure” of the United States that is intended to be protected by the DPA.

Most applicable to the potential needs of the USPS in times of crisis such as the COVID-19 Pandemic is the authority to provide the USPS with significant direct loans or loan guarantees pursuant to Title III of the DPA. However, because the DPA requires express appropriation for such direct loans and loan guarantees and existing Federal Law caps USPS borrowing authority the USPS cannot rely exclusively on Executive authority under the DPA.

The USPS should:

1. engage Congress to assure passage of the CARES Act by the House without alteration to the section authorizing $10 Billion in direct loans;

2. immediately upon passage of the CARES Act, work with the Treasury Department to secure favorable terms for funds made available; and

3. continue to engage with Congress to secure additional authority for loans or loan guarantees in excess of the $10 Billion appropriated in the CARES Act if the current national emergency continues.

Introduction

The Defense Production Act of 1950 ("DPA") was originally enacted as a response to the outbreak of the Korean War and was modeled after the War Powers Acts of World War II. The DPA, however, far outlasted active hostilities in Korea and Congress has amended, extended and or renewed portions of the DPA more than 50 times—most recently Congress extended the DPA until September 30, 2025 in the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (P.L. 115-232). In the DPA Congress declared that

the security of the United States is dependent on the ability of the domestic industrial base to supply materials and services for the national defense and to prepare for and respond to military conflicts, natural or man-caused disasters, or acts of terrorism within the United States.

In general the DPA confers significant powers on to the Executive Branch to impact, direct, prioritize and incentivize industries as is necessary in the “national defense.” Three main sections of the DPA remain, (I) Title III: Strengthening Domestic Capability; (II) Title I: Priorities and Allocations; and (III) Title VII: General Provisions. Because Title III is most applicable to the USPS and the COVID-19 Pandemic, we will discuss Title II before Title I, below.
The DPA expressly provides the Executive Branch with an “array of authorities to shape national defense preparedness programs and to take appropriate steps to maintain and enhance the domestic industrial base.” 50 U.S.C. §4502(a)(4) (emphasis added). The term “national defense” is defined very broadly in the DPA, including many of the functions provided by the USPS; national defense is defined as

programs for military and energy production or construction, military or critical infrastructure assistance to any foreign nation, homeland security, stockpiling, space, and any directly related activity. Such term includes emergency preparedness activities conducted pursuant to title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act [42 U.S.C. §§5195 et seq.] and critical infrastructure protection and restoration.

“Critical infrastructure” is further broadly defined in the DPA to include “any systems and assets, whether physical or cyber-based, so vital to the United States that the degradation or destruction of such systems and assets would have a debilitating impact on national security, including, but not limited to, national economic security and national public health and safety.” 50 U.S.C. §4552(2). With over 500,000 employees and 187.8 Million items processed and delivered each day, 47% of the World’s mail, the USPS is unquestionably critical to a functioning U.S. and World economy. See https://facts.usps.com. The Department of Homeland Security, Cybersecurity and Infrastructure Security Agency has further classified “postal and shipping workers” as part of the “Essential Critical Infrastructure Workforce” in light of the COVID-19 Pandemic by memorandum dated March 19, 2020. See https://www.cisa.gov/sites/default/files/publications/CISA_Guidance_on_the_Essential_Critical_Infrastructure_Workforce_508C_0.pdf.

Moreover, the DPA references 42 U.S.C. §5195(a)(3) for the definition of “emergency preparedness” activities, which includes

all those activities and measures designed or undertaken to prepare for or minimize the effects of a hazard upon the civilian population, to deal with the immediate emergency conditions which would be created by the hazard, and to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by the hazard.

As a result the DPA extends well beyond military preparedness and support and is an important tool for the response and recovery from various types of national emergencies both foreign and domestic, including the current COVID-19 Pandemic. In fact, the essential services provided by the USPS, including the universal services mandate, during times where individuals are quarantined, and in many circumstances isolated from other services, is an important aspect of minimizing the effect of such a hazard upon the public.
I. Title III of the DPA: Strengthening Domestic Capability

Title III of the DPA allows the President, or other portions of the Executive Branch through delegation, to provide incentives and assistance, including loans and loan guarantees, to, inter alia, “assure that critical components, critical technology items, essential materials, and industrial resources are available from reliable sources when needed to meet defense requirements during peacetime, graduated mobilization, and national emergency.” U.S.C. §4517(b). As explained above, the USPS is likely considered part of the “critical infrastructure” of the United States, and the World, and Title III of the DPA allows for assistance and incentives to the USPS to assure that its critical function is provided in both peacetime and during a national emergency such as the COVID-19 Pandemic.

Pursuant to 50 U.S.C. §4531(a) the President has the authority under the DPA to reduce current shortfalls or prevent projected shortfalls of those entities providing critical items by authorizing direct loans or loan guarantees “for the purpose of financing any contractor, subcontractor, provider of critical infrastructure, or other person in support of . . . production and deliveries or services essential to the national defense.” Id. (emphasis added). Although the DPA typically requires meeting certain conditions and for the President to make certain determinations before the incentives can be provided, if a national emergency is declared by Congress or the President such conditions and determinations do not apply. 50 U.S.C. §4531(2). In the case of the COVID-19 Pandemic, the President has formally declared a national emergency and therefore the conditions and determinations are not required. See https://www.whitehouse.gov/presidential-actions/proclamation-declaring-national-emergency-concerning-novel-coronavirus-disease-covid-19-outbreak/. Regardless of a declaration of national emergency, Congress still must appropriate funds providing authority for such loan or loan guarantees. 50 U.S.C. §4531(3).

Congress has authorized the USPS, pursuant to 39 U.S.C. §2005, to borrow certain amounts of funds, but the total amount and net annual increase in obligations is subject to significant restrictions. However, the “CARES Act,” which has passed the Senate and is pending before the House of Representatives, includes an express appropriation of funds for direct loans to the USPS from the U.S. Treasury notwithstanding the limitations in 39 U.S.C. §2005. Specifically, Title VI, §6001(b) of the “CARES Act” currently includes language that allows the USPS to “borrow money from the Treasury in an amount not to exceed $10,000,000,000,” in addition to any other existing borrowing authority, if the USPS determines that due to the COVID-19 Pandemic it “will not be able to fund operating expenses without borrowing money.” The direct loan(s) of up to $10 Billion must be used for operating expenses and cannot be used for the payment of existing debt. Id. §6001(b)(1)(A)-(B). The loans under the CARES Act may be upon favorable terms, including any terms and conditions mutually agreed upon by the Secretary [of the Treasury] and the [USPS].” Id. §6001(b)(2).
Although the $10 Billion of available borrowing authority under the CARES Act, if enacted, is an important tool for the USPS to weather the COVID-19 Pandemic, the USPS payroll is approximately $4 Billion every two weeks and if additional borrowing becomes necessary Title III of the DPA can be invoked to provide additional funds so that USPS can continue to provide its critical infrastructure during this national emergency.

II. Title I of the DPA: Priorities and Allocations Authority

Title I of the DPA allows the President, or other portions of the Executive Branch through delegation, to require persons, businesses and other entities to (1) give priority to certain contracts, orders or other performance as necessary or appropriate to promote the national defense and (2) to allocate the distribution of supplies, materials, services or even facilities as deemed necessary or appropriate. 50 U.S.C. §4511(a).

The prioritization authority is the most commonly used aspect of the DPA, namely with regard to certain contracts or orders by the Department of Defense, including the B-2 Bomber, Air Force One and certain Mine Resistant Ambush Protected (MRAP) Vehicles. See www.bis.doc.gov/index.php/forms-documents/pdfs/1257-dx-dated-program-list/file. Although less common, other departments and agencies have used DPA prioritization such as the Department of Homeland Security requiring prioritization of manufacturing housing units, food and bottled water during the 2017 disaster season. See Department of Homeland Security, The Defense Production Act Committee: Report to Congress, Calendar Year 2017 Report, June 18, 2018, p. 10.

The allocation authority is rarely used. The best example of its use is the Civil Reserve Air Fleet (CRAF) whereby civilian aircraft are “allocated” for potential use by the Department of Defense in case needed in a nation defense crisis where the existing military air fleet is insufficient. See www.dot.gov/ost/oiser/craf.htm. However, the use of the allocation authority has recently been a topic of consideration during the COVID-19 Pandemic to potentially require private corporations to allocate resources towards the immediate production of test kits and other medical supplies.

Although providing powerful tools for the Executive Branch to invoke private assistance in national defense and national emergency efforts, the prioritization and allocation authorities of Title I are less likely to impact the USPS and more likely to affect private industry and manufacturing companies. That being said, Title VI, § 6001(c) of the “CARES Act,” which has passed the U.S. Senate and is pending before the House of Representatives, expressly instructs the USPS to “prioritize delivery of postal products for medical purposes” during the COVID-19 Pandemic and “establish temporary delivery points, in such form and manner as the [USPS] determines necessary, to protect employees . . . and individuals receiving deliveries…”
III. Title VII of the DPA: General Provisions

Title VII of the DPA includes various miscellaneous provisions that are generally not applicable to the USPS, including, inter alia, special preferences for small businesses, 50 U.S.C. §4551, ability to conduct investigations and obtain information regarding the domestic industrial base, 50 U.S.C. §4555, immunity from anti-trust laws where the DPA is used to encourage voluntary agreements between competing companies and interest, 50 U.S.C. §4558, the ability of the President to create a committee of industry executives, 50 U.S.C. §4560, and the creation of a committee on foreign investment, 50 U.S.C. §4565.

Conclusion

The DPA is an important and strong tool for the President and the Executive Branch to act in (or prepare for) wartime and times of crisis or emergency and the crucial function of the USPS makes it part of the “critical infrastructure” of the United States that is intended to be protected by the DPA.

Most applicable to the potential needs of the USPS in times of crisis such as the COVID-19 Pandemic is the authority to provide the USPS with significant direct loans or loan guarantees pursuant to Title III of the DPA. However, because the DPA requires express appropriation for such direct loans and loan guarantees and existing Federal Law caps USPS borrowing authority the USPS cannot rely exclusively on Executive authority under the DPA.

The USPS should:

(1) engage Congress to assure passage of the CARES Act by the House without alteration to the section authorizing $10 Billion in direct loans;

(2) immediately upon passage of the CARES Act, work with the Treasury Department to secure favorable terms for funds made available; and

(3) continue to engage with Congress to secure additional authority for loans or loan guarantees in excess of the $10 Billion appropriated in the CARES Act if the current national emergency continues.
Memorandum

Date: April 2, 2020

Subject: Summary Analysis of Options Available to the USPS for Relief and Resources During the COVID-19 Pandemic

Executive Summary

This memorandum provides a detailed summary analysis of various options available to the United States Postal Service (USPS) to obtain additional resources and relief during the current COVID-19 national emergency.

We have identified several different avenues for the USPS to achieve its goals, including (I) at least $10 Billion of additional funding and the ability for the President to make purchases to assist the USPS using Defense Production Act (DPA) funding available in the recently enacted CARES Act; (II) other Executive authority and action using the DPA, National Emergencies Act of 1976, Public Health Service Act, the Stafford Disaster Relief and Emergency Assistance Act and other Executive orders, and (III) additional legislative or regulatory reforms.

Section I – The CARES Act

Section I of this memorandum provides an in depth overview of portions of the recently enacted CARES Act that the USPS could utilize for immediate additional assistance and resources.

First, §6001 of the CARES Act provides an express appropriation of $10 Billion for the USPS to borrow money from the United States Treasury on any terms acceptable to the USPS and Secretary of the Treasury. This funding is in addition to the cap that otherwise exists on USPS loans pursuant to 39 U.S.C. §2005 and the USPS can use the funding to cover operating costs, but not pay existing debt. The additional $10 Billion of funding can be obtained as soon as the USPS can agree on terms with the Treasury and may be obtained on favorable terms in much the same manner as other funds obtained by the USPS from the Treasury’s Federal Financing Bank.
Secondly, §4003 of the CARES Act provides an additional $17 Billion for loans or loan guarantees to U.S. businesses “critical to maintaining national security.” As explained in more detail below, because the USPS plays a highly important role in national security and continuity of government and is also considered essential to the critical infrastructure of the Nation, we believe that the USPS could also qualify for additional funding under this Section of the CARES Act. Section 4003 of the CARES Act does not expressly address the otherwise applicable cap on USPS borrowing in 39 U.S.C. §2005, but we believe a case can be made that the cap does not apply to this appropriation given the USPS’s integral role in maintaining national security and continuity during a national emergency. Additional guidelines and requirements for qualification for this funding is expected from the Treasury Department within the next several days at which time we plan to supplement this memorandum with specific instructions regarding how the USPS can apply for and obtain this additional funding, but we encourage the USPS to immediately engage Treasury in advance of Treasury issuing guidelines. The USPS could use this funding for operating expenses during the COVID-19 Pandemic or for other needs such as the purchase of Personal Protective Equipment or other supplies.

Lastly, §4017 of the CARES Act integrates the DPA and expressly encourages the President to use his powers under the DPA during the existing national emergency. This section of the CARES Act further appropriates an additional $1 Billion for the President to use to make purchases under his DPA authority. The President could use portions of this funding to purchase Personal Protective Equipment or other resources for the USPS.

Section II – Executive Authority and Action

Section II of this memorandum identifies and addresses three major Acts that provide executive authority during times of national emergencies and that the USPS may benefit from, including the DPA, the National Emergencies Act of 1976, the Public Health Service Act, and the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

General details on the DPA were included in the original memorandum to the USPS dated March 26, 2020 and further details are included below. The DPA extends well beyond military preparedness and support and is an important tool for the response and recovery from various types of national emergencies both foreign and domestic, including the current COVID-19 Pandemic. The essential services provided by the USPS, including the universal services mandate, during times where individuals are quarantined, and in many circumstances isolated from other services, is an important aspect of minimizing the effect of such a hazard upon the public. Because of the critical function of the USPS the President can use the DPA to assist the USPS in various ways, including providing direct loans or loan guarantees, directing prioritization of USPS needs for materials, equipment and supplies and the purchase or allocation of resources for the USPS.
The National Emergencies Act grants the President the authority to declare a national emergency and outlines the powers and authorities available to the President during national emergencies.

The Public Health Service Act authorizes the Secretary of Health and Human Services to access the Public Health Emergency Fund during public health emergencies. Pursuant to the Public Health Service Act, the Secretary of Health and Human Services has broad authority to utilize the Public Health Emergency Fund once the Secretary has determined a public health emergency exists which may provide the USPS an avenue to receive funding should the Secretary determine that such use of funds are appropriate. The Public Health Service Act authorizes the Secretary of Health and Human Services, in coordination with the Secretary of Homeland Security, to maintain the Strategic National Stockpile (SNS). The Secretary of Health and Human Services shall deploy the SNS as (i) required by the Secretary of Homeland Security to respond to an actual or potential emergency or (ii) deploy the SNS at their discretion to respond to an actual or potential public health emergency or other situation in which deployment is necessary to protect the public health or safety. Accordingly, the USPS may be able to acquire personal protective equipment for its employees and contractors from the Strategic National Stockpile through the discretion of the Secretary of Health and Human Services.

The Robert T. Stafford Disaster Relief and Emergency Assistance Act generally establishes the assistance provided by the federal government to state and local governments to alleviate the suffering and damages caused by disasters. Chapter 68 of the Stafford Act establishes that federal agencies, specifically including the USPS, may be reimbursed for services provided pursuant to the President’s directive. Among other things, the President may direct federal agencies to support state and local emergency assistance efforts; coordinate disaster relief assistance; provide emergency assistance; and assist state and local governments in the distribution of medicine, food, and other supplies. The Stafford Act may provide the USPS the ability, through a designation made by the President, to provide additional assistance to emergency relief efforts and receive reimbursement for such assistance.

Section II of this memorandum also identifies and addresses the implications of the USPS’s role in carrying out two Primary Mission Essential Functions as well as “postal, parcel, courier, last-mile delivery, and shipping and related workers, to include private companies” being designated essential critical infrastructure workers.

Presidential Policy Directive 40 directs the Secretary of Homeland Security through the Administrator of the Federal Emergency Agency to coordinate the implementation, execution, and assessment of continuity activities among executive departments and agencies. The USPS carries out two Primary Mission Essential Functions: (i) deliver postal services to the American public and (ii) provide essential response capabilities – specifically the delivery of emergency countermeasures to residences when requested by the Department of Health and Human Services.
Additionally, “postal, parcel, courier, last-mile delivery, and shipping and related workers, to include private companies” are considered essential critical infrastructure workers, as defined in guidance issued by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency. As the USPS provides two Primary Mission Essential Functions and postal workers are considered critical infrastructure, opportunities under PPD-40 and Federal Continuity Directives 1 and 2 may be available to the USPS to both ensure liquidity of the USPS to continue performing its Primary Mission Essential Functions as well as obtain personal protective equipment (“PPE”) for USPS employees and contractors who are critical infrastructure.

In Executive Order 13909 (Prioritizing and Allocating Health and Medical Resources to Respond to the Spread of COVID-19), issued on March 18, 2020, President Trump delegated to the Secretary of Health and Human Services the prioritization and allocation under section 101 of the Defense Production Act with respect to health and medical resources needed to respond to the spread of COVID-19. Additionally, the Federal Emergency Management Agency established a National Resource Prioritization Cell to unify prioritization recommendations for the allocation of critical resources from the Strategic National Stockpile. The President’s executive order, and the establishment of the National Resource Prioritization Cell provide the USPS potential avenues to acquire personal protective equipment for its employees and contractors to safely continue executing its Primary Mission Essential Functions.

Section III – Legislative Action

Section III of this memorandum briefly addresses the fact that the President cannot act unilaterally by executive order to effectuate change to existing law, but addresses the potential to use additional stimulus legislation to obtain both additional financial aid and statutory changes that Michael Best could assist the USPS in achieving for long-term reform and sustainability.

Within a week of the President signing the CARES Act Members of Congress are already considering priorities for a potential “Phase 4” economic stimulus package to address the COVID-19 Pandemic. Because priorities are already being considered and various interested groups are already lobbying Congress for their share of the potential additional stimulus, it is important for the USPS needs to be part of the conversation. Members of the Michael Best & Friedrich Team, including Reince Priebus and Denise Bode, can provide invaluable assistance and guidance both with regard to the potential Phase 4 stimulus package and long-term statutory and regulatory reform to benefit the USPS.
Discussion

The United States Postal Service (USPS) has several options for obtaining additional funding and resources during and after the existing national emergency and COVID-19 Pandemic both as a result of the CARES Act and existing emergency powers of the President and the Executive Branch.

I. The CARES Act

The Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”) was signed into law by President Donald J. Trump on Friday March 27, 2020. The CARES Act is a third phase of economic stimulus legislation addressing the impacts caused by the Coronavirus 2019 (“COVID-19”) Pandemic and it includes over $2 Trillion of economic aid, including, inter alia, direct payments to eligible individual taxpayers, expanded unemployment insurance, direct funding to state and local governments, loans and other incentives to eligible businesses and local governments, new small business loans and health equipment for hospitals fighting COVID-19.

We have identified several portions of the CARES Act that either directly benefit the USPS or provide a potential for the USPS to obtain additional financial aid and/or resources. The CARES Act (a) authorizes the United States Treasury to loan up to an additional $10 Billion directly to the USPS to cover operating expenses during the COVID-19 Pandemic; (b) provides $17 Billion for “businesses critical to maintaining national security” and (c) $1 Billion for the President to make purchases under the Defense Production Act.

a. $10 Billion Direct Lending Authority for USPS

Title VI, §6001(b) of the “Cares Act” Authorizes USPS to “borrow money from the Treasury in an amount not to exceed $10,000,000,000,” in addition to any other existing borrowing authority, if the USPS determines that due to the COVID-19 Pandemic it “will not be able to fund operating expenses without borrowing money.” The direct loan(s) of up to $10 Billion must be used for operating expenses and cannot be used for the payment of existing debt. Id. §6001(b)(1)(A)-(B). The loans under the CARES Act may be upon favorable terms, including any “terms and conditions mutually agreed upon by the Secretary [of the Treasury] and the [USPS].” Id. §6001(b)(2).

The CARES Act does not provide any guidance regarding the terms or procedures for the additional financing, but because the USPS has consistent borrowing authority from the Federal Financing Bank (FFB), which is under the supervision of the Secretary of the Treasury, the additional funding should be obtained in much the same manner as existing USPS loans from the FFB. However, because the CARES Act allows for any mutually agreed upon terms, given the
national emergency and the important role that USPS plays during such an emergency the USPS should obtain favorable terms rather than terms similar to existing FFB loans.

Section 6001 of the CARES Act further requires the USPS to “prioritize delivery of postal products for medical purposes” and allows the USPS to “establish temporary delivery points, in such form and manner as the [USPS] determines necessary, to protect employees of the [USPS] and individuals receiving deliveries from the [USPS].” Id. §6001(c)(1)-(2). Although this provision of the CARES Act places a burden on the USPS, requiring prioritization of medical supplies, it does allow the USPS to protect its workers (and other members of the public) when it determines necessary by temporarily suspending direct service to certain areas deemed to present a higher risk and instead provide temporary delivery points. Id. This may present some opportunities to reduced operating costs.

b. Economic Stabilization and Assistance to Severely Distressed Sectors of the United States Economy

Section 4003 of the CARES Act provides the largest single appropriation within the Act—$500 Billion from the Treasury to provide liquidity to “eligible businesses” through loans, loan guarantees and other investments. Id. §4003(a). Eligible businesses are defined to include a business in the U.S. “that has not otherwise received adequate economic relief in the form of loans or loan guarantees provided under [the CARES Act].” Id. §4002(4)(B) (emphasis added). Although the USPS receives up to $10 Billion in loans from §6001 of the CARES Act, this is likely not “adequate.”

Within the $500 Billion available to “eligible businesses” Congress has specifically allocated $17 Billion that shall be made available to “businesses critical to maintaining national security.” Id. §4003(b)(3). The USPS plays a highly important role in national security and continuity of government and is also considered essentially to the critical infrastructure of the Nation.

The current National Continuity Policy was issued on July 15, 2016 in Presidential Policy Directive 40 and remains classified, but in its predecessor Directive issued on May 4, 2007 the USPS played an important role in national continuity and national security. The prior directive established National Essential Functions (“NEF”), which are the subset of Government Functions\(^1\) necessary to lead and sustain the country during a catastrophic emergency and therefore must be

---

\(^1\) "Government Functions" means the collective functions of the heads of executive departments and agencies as defined by statute, regulation, presidential direction, or other legal authority, and the functions of the legislative and judicial branches. National Security Federal Directive 51(2)(g).
supported through Continuity of Operations\(^2\) ("COOP") and Continuity of Government\(^3\) ("COG") capabilities.\(^4\) Executive departments and agencies were instructed to identify and submit a list of Primary Mission Essential Functions ("PMEF"), which are essential government functions that must be continuously performed in order to support or implement the uninterrupted performance of NEFs before, during, or in the aftermath of an emergency.\(^5\) The USPS carries out two PMEFs, (i) deliver postal services to the American public and (ii) provide essential response capabilities – specifically the delivery of emergency countermeasures to residences when requested by the Department of Health and Human Services ("HHS").\(^6\)

With over 500,000 employees and 187.8 Million items processed and delivered each day, 47% of the World’s mail, the USPS is unquestionably critical to a functioning U.S. and World economy.\(^7\) The Department of Homeland Security, Cybersecurity and Infrastructure Security Agency has further classified “postal and shipping workers” as part of the “Essential Critical Infrastructure Workforce” in light of the COVID-19 Pandemic by memorandum dated March 19, 2020.\(^8\)

Furthermore, the USPS is designated as a supporting agency for 7 of the 15 Emergency Support Function annexes under the National Response Framework—specifically the USPS has roles in reporting infrastructure disruptions and damages and also has an important role in distributing medicine, pharmaceuticals and other medical information and supplies.\(^9\)

Because the USPS likely qualifies as an eligible business under the CARES Act and is unquestionably critical to maintaining the Nation’s security and continuity, the USPS should apply for and seek additional assistance under §4003 of the CARES Act. Although a portion of the $17 Billion is likely intended for other companies such as Boeing that play a role in national security,

\(^2\) "Continuity of Operations," or "COOP," means an effort within individual executive departments and agencies to ensure that Primary Mission-Essential Functions continue to be performed during a wide range of emergencies, including localized acts of nature, accidents, and technological or attack-related emergencies. National Security Federal Directive 51(2)(d).

\(^3\) "Continuity of Government," or "COG," means a coordinated effort within the Federal Government's executive branch to ensure that National Essential Functions continue to be performed during a Catastrophic Emergency. National Security Federal Directive 51(2)(c).

\(^7\) See https://facts.usps.com.

\(^8\) See https://www.cisa.gov/sites/default/files/publications/CISA_Guidance_on_the_Essential_Critical_Infrastructure_Workforce_508C_0.pdf.

the USPS should qualify and be able to share in these funds. One concern we do have with regard to additional loans under §4003 of the CARES Act is the general cap on USPS borrowing in 39 U.S.C. §2005, but we believe a strong case can be made that the cap does not apply to this appropriation given the USPS’s integral role in maintaining national security and continuity during a national emergency. We encourage the USPS to immediately engage Treasury in advance of Treasury issuing guidelines in order to help ensure that such funds could be available to the USPS.

The framework for the terms and conditions associated with obtaining assistance under §4003 of the CARES Act is included in §§4003 (c) and (d), which further direct the Treasury Department to publish procedures for application and minimum requirements with 10 days of enactment. Under the terms and conditions in the CARES Act, the Treasury Secretary may make loans to businesses that can demonstrate: (1) they are an eligible business to which credit is not reasonably available at the time of the transaction; (2) the intended obligation is prudently incurred; and (3) the loan or guarantee is sufficiently secured or made at a rate that reflects the risk and, to the extent practicable, is not less than an interest rate based on market conditions for comparable obligations prior to the outbreak of COVID-19.

Additional terms require an applicant to: (1) show, to the extent practicable, the duration of the loan or guarantee will not exceed 5 years; (2) forego buying back stock or paying dividends for common stock (except if contractually obligated to do so) for 12 months after the obligation is no longer outstanding; (3) maintain employment levels as of March 24, 2020, to the extent practicable, until September 30, 2020, and not "in any case" reduce those employment levels by more than 10 percent; (4) certify that the business is "created or organized in the United States or under the laws of the United States and has significant operations in and a majority of its employees based in the United States; and (5) demonstrate that it incurred losses such "that the continued operations of the business are jeopardized."

Although the USPS is not a typical U.S. business, it is an independent federal entity that is self-supporting and operates much like any other business, but is subject to significant federal law and regulations. See, e.g., 39 U.S.C. § 101, et seq. Because the USPS receives no tax dollars for its operations and relies on the sale of postage, products and services to fund its operations it likely qualifies under §4003 of the CARES Act as an eligible business and can meet the above criteria.

When the Treasury Department publishes additional guidance on CARES Act funds under Section 4003 we will provide an updated version of the Memorandum with additional information.

c. Defense Production Act Purchases and Funding

Section 4017 of the CARES Act seeks to increase access to materials and supplies necessary for both national security and recovery from the COVID-19 Pandemic. To accomplish this the CARES expressly utilizes the Defense Production Act of 1950 (“DPA”) by lifting certain
limits and requirements within the DPA (namely with regard to the President’s ability to order the purchase of resources or items of need for government use or resale) and providing $1 Billion of funding\textsuperscript{10} for the President to make such purchases.

As explained generally in Michael Best’s original memorandum to the USPS dated March 26, 2020 and again in Section II(a) below, the DPA confers significant powers on to the Executive Branch to impact, direct, prioritize and incentivize industries as is necessary in the “national defense.” The DPA provides the President, or other Executive Branch departments or agencies through delegation, with significant authority to act in the interest of national security and during emergencies, including the ability to require persons, businesses and other entities to allocate the distribution of supplies, materials, services or even facilities as deemed necessary or appropriate. 50 U.S.C. §4511(a). In conjunction with this authority, the DPA allows the President great discretion to make purchases or commitments to purchase important items for its use or resale. 50 U.S.C. §4533(a). The President’s purchases under the DPA are typically limited to an existing Defense Production Act Fund, but the CARES Act expands on this funding with the additional $1 Billion. Id., §4534.

By removing conditions and requirements that the President would otherwise have to meet in order to act under the DPA, §4017 of the CARES Act encourages the use of this power by the President. As a result the President has great discretion to order certain companies to manufacture health supplies, including personal protective equipment such as and sanitizer, masks and gloves and use the funds existing in the Defense Production Act Fund and provided by the CARES Act to purchase these items for the USPS.

This directive can be ordered by the President at any time now that the CARES Act is effective and the USPS should therefore immediately engage the Administration for action on this item.

II. Executive Authority and Action

The CARES Act is not the only resource available to the USPS for both short-term assistance during the COVID-19 Pandemic and long-term solutions for sustainability. The Defense Production Act can be utilized by the President and or his Administration to assist the USPS independently of the CARES Act along with other significant statutory authority, executive orders and regulatory reform.

\textsuperscript{10} The $1 Billion appropriated for purchases under the DPA is not included in Section 4070 of the CARES Act, but is included in an un-numbered section later in the CARES Act.
a. Defense Production Act

The Defense Production Act of 1950 (“DPA”) confers significant powers on to the Executive Branch to impact, direct, prioritize and incentivize industries as is necessary in the “national defense.” The main sections of the DPA were presented in memorandum to the USPS dated March 26, 2020 and are again summarized for your convenience, including (I) Title III: Strengthening Domestic Capability; (II) Title I: Priorities and Allocations; and (III) Title VII: General Provisions.

The DPA expressly provides the Executive Branch with an “array of authorities to shape national defense preparedness programs and to take appropriate steps to maintain and enhance the domestic industrial base.” 50 U.S.C. §4502(a)(4) (emphasis added). The term “national defense” is defined very broadly in the DPA, including many of the functions provided by the USPS; national defense is defined as

programs for military and energy production or construction, military or critical infrastructure assistance to any foreign nation, homeland security, stockpiling, space, and any directly related activity. Such term includes emergency preparedness activities conducted pursuant to title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act [42 U.S.C. §§5195 et seq.] and critical infrastructure protection and restoration.

“Critical infrastructure” is further broadly defined in the DPA to include “any systems and assets, whether physical or cyber-based, so vital to the United States that the degradation or destruction of such systems and assets would have a debilitating impact on national security, including, but not limited to, national economic security and national public health and safety.” 50 U.S.C. §4552(2). With over 500,000 employees and 187.8 Million items processed and delivered each day, 47% of the World’s mail, the USPS is unquestionably critical to a functioning U.S. and World economy.\(^\text{11}\) The Department of Homeland Security, Cybersecurity and Infrastructure Security Agency has further classified “postal and shipping workers” as part of the “Essential Critical Infrastructure Workforce” in light of the COVID-19 Pandemic by memorandum dated March 19, 2020.\(^\text{12}\) Moreover, the DPA references 42 U.S.C. §5195(a)(3) for the definition of “emergency preparedness” activities, which includes

all those activities and measures designed or undertaken to prepare for or minimize the effects of a hazard upon the civilian population, to deal with the immediate emergency conditions which would be created by the hazard, and to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by the hazard.

---

\(^{11}\) See https://facts.usps.com.

\(^{12}\) See supra n. 8.
As a result the DPA extends well beyond military preparedness and support and is an important tool for the response and recovery from various types of national emergencies both foreign and domestic, including the current COVID-19 Pandemic. In fact, the essential services provided by the USPS, including the universal services mandate, during times where individuals are quarantined, and in many circumstances isolated from other services, is an important aspect of minimizing the effect of such a hazard upon the public.

i. Title III of the DPA

Title III of the DPA allows the President, or other portions of the Executive Branch through delegation, to provide incentives and assistance, including loans and loan guarantees, to, *inter alia*, “assure that critical components, critical technology items, essential materials, and industrial resources are available from reliable sources when needed to meet defense requirements during peacetime, graduated mobilization, and national emergency.” U.S.C. §4517(b). As explained above, the USPS is part of the “critical infrastructure” of the United States, and the World, and Title III of the DPA allows for assistance and incentives to the USPS to assure that its critical function is provided in both peacetime and during a national emergency such as the COVID-19 Pandemic.

Pursuant to 50 U.S.C. §4531(a) the President has the authority under the DPA to reduce current shortfalls or prevent projected shortfalls of those entities providing critical items by authorizing direct loans or loan guarantees “for the purpose of financing any contractor, subcontractor, *provider of critical infrastructure*, or other person in support of . . . production and *deliveries or services essential to the national defense.*” *Id.* (emphasis added). Although the DPA typically requires meeting certain conditions and for the President to make certain determinations before the incentives can be provided, if a national emergency is declared by Congress or the President such conditions and determinations do not apply. 50 U.S.C. §4531(2). In the case of the COVID-19 Pandemic, the President has formally declared a national emergency and therefore the conditions and determinations are not required.\(^\text{13}\) Regardless of a declaration of national emergency, Congress still must appropriate funds providing authority for such loan or loan guarantees. 50 U.S.C. §4531(3).

Although Congress has limited the borrowing authority of the USPS pursuant to 39 U.S.C. §2005 as explained in Section I of this memorandum the CARES Act includes both an express appropriation of funds for direct loans to the USPS from the U.S. Treasury and other relief for which we believe the USPS could qualify.

ii. Title I of the DPA

Title I of the DPA allows the President, or other portions of the Executive Branch through delegation, to require persons, businesses and other entities to (1) give priority to certain contracts, orders or other performance as necessary or appropriate to promote the national defense and (2) to allocate the distribution of supplies, materials, services or even facilities as deemed necessary or appropriate. 50 U.S.C. §4511(a).

The prioritization authority is the most commonly used aspect of the DPA, namely with regard to certain contracts or orders by the Department of Defense, including the B-2 Bomber, Air Force One and certain Mine Resistant Ambush Protected (MRAP) Vehicles. Although less common, other departments and agencies have used DPA prioritization such as the Department of Homeland Security requiring prioritization of manufacturing housing units, food and bottled water during the 2017 disaster season.

The allocation authority is rarely used. The best example of its use is the Civil Reserve Air Fleet (CRAF) whereby civilian aircraft are “allocated” for potential use by the Department of Defense in case needed in a nation defense crisis where the existing military air fleet is insufficient. See www.dot.gov/ost/oiser/craf.htm.

In these extraordinary times the use of the DPA during the COVID-19 Pandemic to potentially require private corporations to both prioritize and allocate resources towards the immediate production of test kits and other medical supplies is at the forefront of public discussion. In fact, on March 27, 2020 President Trump issued an order under the DPA directing the Secretary of Health and Human Services to “use any and all authority available under the [DPA] to require General Motors Company to accept, perform, and prioritize contracts or orders for the number of ventilators that the Secretary determines to be appropriate.” As explained in Section I (c) above, the President can use the DPA, including the additional funding provided by the CARS Act for the DPA Fund to make purchases of PPE or other materials and equipment for the USPS.

iii. Title VII of the DPA

Title VII of the DPA includes various miscellaneous provisions that are generally not applicable to the USPS, including, inter alia, special preferences for small businesses, 50 U.S.C. §4551, ability to conduct investigations and obtain information regarding the domestic industrial base, 50 U.S.C. §4555, immunity from anti-trust laws where the DPA is used to encourage

---

16 See https://www.whitehouse.gov/presidential-actions/memorandum-order-defense-production-act-regarding-general-motors-company/
voluntary agreements between competing companies and interest, 50 U.S.C. §4558, the ability of the President to create a committee of industry executives, 50 U.S.C. §4560, and the creation of a committee on foreign investment, 50 U.S.C. §4565.

b. **Other Existing Statutory Authority**

There are three major Acts that provide executive authority during times of national emergencies: (i) the National Emergencies Act of 1976; (ii) the Public Health Service Act; and (iii) The Robert T. Stafford Disaster Relief and Emergency Assistance Act. This section contains an overview of each Act and identifies potential executive actions under such legislation that could benefit the USPS.

i. **National Emergencies Act of 1976**

The National Emergencies Act of 1976 (the “National Emergencies Act”) authorizes the President to declare a national emergency. 50 U.S.C. § 1621(a). When the President declares a national emergency, as President Trump has for the COVID-19 Pandemic, various laws conferring executive powers during such an emergency become effective and remain in effect during such emergency. 50 U.S.C. § 1621(b). While the National Emergencies Act does not provide authority for specific executive actions applicable to the USPS, the National Emergencies Act does provide general authority for when, and how long, a national emergency may be declared and allows the President to take certain actions that may benefit the USPS under other law as discussed below.

ii. **Public Health Service Act**

The Public Health Service Act authorizes the Secretary of Health and Human Services (“HHS”) to determine that (i) a disease or disorder presents a public health emergency; or (ii) that a public health emergency, including significant outbreaks of infectious disease or bioterrorist attacks, exists. 42 U.S.C. § 247d(a). If the Secretary of HHS declares a public health emergency, as Secretary Azar has in the case of COVID-19, the Secretary may access the Public Health Emergency Fund (the “Health Fund”), without fiscal year limitations. 42 U.S.C. § 247d(b)(1). Secretary Azar may use the Health Fund to, *inter alia*, (a) facilitate coordination between and among Federal, State, local, Tribal, and territorial entities and public and private health care entities that the Secretary determines may be affected by COVID-19; (b) make grants, provide for

---

awards, enter into contracts, and conduct supportive investigations pertaining to COVID-19; and (c) carry out other activities, as the Secretary determines applicable and appropriate. 42 U.S.C. § 247d(2). The Secretary must report on expenditures made out of the Health Fund not later than 90 days after the end of the fiscal year to certain committees of the House of Representatives and Senate. 42 U.S.C. § 247d(3). As a result of the COVID-19 Pandemic and the declared emergencies the Secretary of HHS has broad authority to utilize the Health Fund to assist the USPS as the Secretary deems appropriate, including providing resources, equipment and other resources.

Additionally, the Public Health Service Act authorizes the Secretary of HHS, in coordination with the Secretary of Homeland Security, to maintain the Strategic National Stockpile ("SNS"). See 42 U.S.C. § 247d-6b. The SNS is a national repository of large quantities of medical supplies, including Personal Protective Equipment stored in strategic locations around the nation. The SNS is designed to supplement state and local public health departments in the event of a large-scale public health emergency that causes local supplies to run out. Pursuant to the Public Health Service Act, the Secretary of HHS may deploy the SNS to respond to the COVID-19 Pandemic. 42 U.S.C. § 247d-6b(a)(3)(f)-(g). The USPS may be able to access the SNS to obtain Personal Protective Equipment or other stockpiled equipment and resources for its operations during the COVID-19 Pandemic.

iii. Robert T. Stafford Disaster Relief and Emergency Assistance Act

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (the “Stafford Act”) establishes certain assistance provided by the federal government to state and local governments to alleviate the suffering and damages caused by disasters. Pursuant to the Stafford Act, federal agencies are reimbursed for services or supplies furnished during disasters and emergencies such as the current COVID-19 Pandemic. 42 U.S.C. § 5147. For purposes of the Stafford Act a "federal agency" includes any department, independent establishment, Government corporation, or other agency of the executive branch of the Federal Government, including the United States Postal Service . . .” 42 U.S.C. § 5122(9) (emphasis added). In any emergency under the Stafford Act, “the President may:

(i) direct any Federal agency, with or without reimbursement, to utilize its authorities and the resources granted to it under federal law (including personnel, equipment, supplies, facilities, and managerial, technical and advisory services) in support of state and local emergency assistance efforts to save lives, protect property and public health and safety, and lessen or avert the threat of a catastrophe, including precautionary evacuations;

(ii) coordinate all disaster relief assistance (including voluntary assistance) provided by federal agencies, private organizations, and state and local governments; …
(iv) provide emergency assistance through Federal agencies; …

(vii) assist state and local governments in the distribution of medicine, food, and other consumable supplies, and emergency assistance; and

(viii) provide accelerated federal assistance and Federal support where necessary to save lives, prevent human suffering, or mitigate severe damage, which may be provided in the absence of a specific request and in which case the President—

a. shall, to the fullest extent practicable, promptly notify and coordinate with a State in which such assistance or support is provided; and

b. shall not, in notifying and coordinating with a state, delay or impede the rapid deployment, use, and distribution of critical resources to victims of an emergency.”

Although the Stafford Act contains various requirements for emergency declarations at the federal and state level, this is not a concern given the existing national emergency and various emergencies and disasters declared in virtually every state throughout the nation as a result of COVID-19. The Stafford Act is primarily designed to provide direct federal assistance to state and local governments, but it also includes mechanisms for the President to direct and/or coordinate federal agencies, including the USPS, to provide services in an emergency or disaster. Due to the unique ability of the USPS to reach every residence in the United States, the USPS may be the sole federal agency, as defined under the Stafford Act, to provide emergency assistance to every citizen during the COVID-19 Pandemic. As such, the President may instruct the USPS to provide certain services and take certain actions, including the use of special equipment and protections, which could be directly funded or reimbursed under the Stafford Act by executive order.

c. Executive Orders

i. Federal Continuity Directives and Critical Infrastructure Designation

As identified in Mr. Marshall’s letter to Ms. Bonner “Re: Essential Public Service Provided by the Postal Service as a Part of the Nation’s Critical Infrastructure,” dated March 23, 2020, the United States Postal Services (“USPS”) carries out an essential function of the federal government and provides critical government services as part of the National Continuity Policy. National Security Presidential Directive 51 (“Directive 51”), issued May 4, 2007, established a comprehensive national policy on the continuity of federal government structures and operations. Directive 51 also established National Essential Functions (“NEF”), which are the subset of

Government Functions necessary to lead and sustain the country during a catastrophic emergency and therefore must be supported through Continuity of Operations ("COOP") and Continuity of Government ("COG") capabilities. Executive departments and agencies were instructed to identify and submit a list of Primary Mission Essential Functions ("PMEF"), which are essential government functions that must be continuously performed in order to support or implement the uninterrupted performance of NEFs before, during, or in the aftermath of an emergency. The USPS carries out two PMEFs: delivery of (i) postal services to the American public and (ii) emergency countermeasures to residences when requested by the Department of Health and Human Services ("HHS").

Presidential Policy Directive 40 ("PPD-40"), National Continuity Policy, issued on July 15, 2016, replaced Directive 51. PPD-40 remains classified, however certain information has been made available through Federal Continuity Directives 1 and 2. PPD-40 directs the Secretary of Homeland Security through the Administrator of the Federal Emergency Management Agency ("FEMA") to coordinate the implementation, execution, and assessment of continuity activities among executive departments and agencies. Specifically, the Administrator of FEMA is directed to develop and promulgate Federal Continuity Directives to establish continuity program and planning requirements for executive departments and agencies. PPD-40 requires departments and agencies to appoint a Continuity Coordinator at the Assistant Secretary level or higher.

Additionally, "postal, parcel, courier, last-mile delivery, and shipping and related workers, to include private companies" are considered essential critical infrastructure workers, as defined

---

20 "Government Functions" means the collective functions of the heads of executive departments and agencies as defined by statute, regulation, presidential direction, or other legal authority, and the functions of the legislative and judicial branches. National Security Federal Directive 51(2)(g).

21 "Continuity of Operations," or "COOP," means an effort within individual executive departments and agencies to ensure that Primary Mission-Essential Functions continue to be performed during a wide range of emergencies, including localized acts of nature, accidents, and technological or attack-related emergencies. National Security Federal Directive 51(2)(d).

27 Federal Continuity Directive 1, Section I (pg. 3).

28 Id.

29 Id. at Section V (pg. 5).
in guidance issued by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency (“CISA”). The term critical infrastructure is used to describe “systems and assets, whether physical or virtual, so vital to the United States that the incapacity or destruction of such systems and assets would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters.”

Because the USPS provides PMEFs, and postal workers are considered critical infrastructure, the USPS may be able to use PPD-40 and Federal Continuity Directives 1 and 2 to both ensure liquidity as well as obtain personal protective equipment (“PPE”) for USPS employees and contractors. The USPS should coordinate with the President, the Secretary of Homeland Security, and the Administrator of FEMA in order to seek possible emergency funds to ensure the USPS remains financially able to continue providing its important services and to obtain the equipment and resources necessary to do so.

ii. Strategic National Stockpile (“SNS”)

As discussed above in Section II(b), the Secretary of HHS, in coordination with the Secretary of Homeland Security, maintains the SNS. The President has declared a national emergency as a result of the COVID-19 Pandemic and issued Executive Order 13909 directing the Secretary of HHS to use the prioritization and allocation authorities under section 101 of the DPA with respect to health and medical resources needed to respond to the spread of COVID-19. Additionally, FEMA established the Supply Chain Stabilization Task Force to address limited supply of critical Personal Protective Equipment. The Supply Chain Stabilization Task Force is utilizing a four-prong approach, one prong focuses on the allocation of critical resources. To effectively allocate resources, the FEMA Supply Chain Stabilization Task Force established a National Resource Prioritization Cell to unify prioritization recommendations. The USPS should work with the Secretary of HHS, the Secretary of Homeland Security, and the National Resource Prioritization Cell of the FEMA Supply Chain Stabilization Task Force to obtain equipment and resources through the SNS.

31 Presidential Policy Directive (PPD) 21, Critical Infrastructure Security and Resilience, February 12, 2013, p. 12; USA Patriot Act of 2001, Section 1016(e), (42 U.S.C) 5195c(e)).
III. Legislative Action

Although significant authority is already vested in the President to take actions described above to protect national security, continuity and address national emergencies such as the COVID-19 Pandemic, the President’s executive authority has significant limits generally and during national emergencies. We do not believe that the President can take executive action during the COVID-19 Pandemic to effectuate any change to existing law sought by the USPS.

The United States Supreme Court has consistently held that the “President’s power, if any, to issue [executive orders] must stem from an act of Congress or from the Constitution itself.” Youngstown Sheet & Tube Co. v. Sawyer, 343 U.S. 579, 585 (1952). In the landmark case of Youngstown President Truman issued an executive order directing the Secretary of Commerce to seize and operate steel mills, which were integral to national security during the Korean War, and avert a strike. Id. at 582-83. Despite the undisputed national security need for the steel mills to continue operations, the Supreme Court held that the order was unconstitutional because it did not stem from any act of Congress or the Constitution itself. Id. at 585. In fact, the Court expressly rejected arguments that general executive authority and/or general military authority vested in the President by the Constitution supported the executive order. Id. at 586-87. The decision in Youngstown remains applicable law today. See Sierra Club v. Trump, 929 F.3d 670, 694 (9th Cir. 2019).

Additionally, because the changes desired by the USPS mostly involve express changes to existing statutory authority, the President’s power to effectuate change is virtually non-existent. The President cannot take action that is incompatible with the express or implied will of Congress unless the President has an independent power to do so under the Constitution, Zivotofsky v. Kerry, 571 U.S. 1, 15 (2015) (citing Youngstown, 343 U.S. at 637), which we do not believe exists here.

a. Additional “Phase 4” COVID-19 Stimulus

Less than a week after the enactment of the CARES Act, Members of Congress have signaled a desire for yet another “Phase 4” stimulus package. Part of the additional items being suggested by Speaker Nancy Pelosi includes additional investment in infrastructure, the health care system and digital economy.35

Even if a fourth round of stimulus is still only a possibility, it is important to make sure that additional assistance and/or reform for the USPS is part of the conversation and under consideration early in the process. In addition to further loans, funding and other resources that

---

could be included in Phase 4, the package could also be a source for long-term legislative reform benefiting the USPS. With adequate time to influence Members of Congress and the President a Phase 4 package could be significantly more beneficial to the USPS than the CARES Act.

b. **Long-term Legislative Action**

Federal legislation specifically reforming the law governing the USPS is the best long-term solution to liquidity issues faced by the USPS. The USPS has already identified several statutory changes that would greatly improve the ability of the USPS to efficiently operate and obtain more revenue. Namely legislation could be enacted to: (1) eliminate the cap on prices charged by the USPS and allow the Postal Regulatory Commission to engage in an oversight role monitoring the market prices set by the USPS Board of Governors; (2) provide flexibility for the USPS to enter into Negotiated Service Agreements; (3) eliminate Postal Regulatory Commission review of rate changes prior to effective date of the change; (4) provide flexibility for the USPS to offer non-postal services and government services; and (5) eliminate Postal Regulatory Commission review of new postal products and the elimination of existing postal products.

The USPS has already provided draft language for proposed amendments to Title 39 of the U.S. Code to accomplish these changes, which are attached hereto as Exhibit A.

Members of the Michael Best & Friedrich Team, including Reince Priebus and Denise Bode, can provide invaluable assistance and guidance both with regard to the potential Phase 4 stimulus package and long-term statutory and regulatory reform to benefit the USPS. In addition to taking immediate action on the above-identified items related to the CARES Act and existing Executive Action, we would like to discuss more specifically how Michael Best can assist the USPS in achieving both its short-term and long-term goals.
Memorandum

VIA EMAIL

To:        Tom Marshall, General Counsel, United States Postal Service
           Keith Weidner, Deputy General Counsel, United States Postal Service
From:      Stefan Passantino
CC:        Joe Olson, Nicholas Boerke and Nathan Groth
Date:      April 3, 2020
Subject:   Summary Analysis of Options Available to the USPS for Relief and Resources
           During the COVID-19 Pandemic

Executive Summary

This memorandum provides a detailed summary analysis of various options available to the United States Postal Service (USPS) to obtain additional resources and relief during the current COVID-19 national emergency.

We have identified several different avenues for the USPS to achieve its goals, including (I) at least $10 Billion of additional funding and the ability for the President to make purchases to assist the USPS using Defense Production Act (DPA) funding available in the recently enacted CARES Act; (II) other Executive authority and action using the DPA, National Emergencies Act of 1976, Public Health Service Act, the Stafford Disaster Relief and Emergency Assistance Act and other Executive action, and (III) additional legislative or regulatory reforms.

Section I – The CARES Act

Section I of this memorandum provides an in depth overview of portions of the recently enacted CARES Act that the USPS could utilize for immediate additional assistance and resources.

First, §6001 of the CARES Act provides an express appropriation of $10 Billion for the USPS to borrow money from the United States Treasury on any terms acceptable to the USPS and Secretary of the Treasury. This funding is in addition to the cap that otherwise exists on USPS loans pursuant to 39 U.S.C. §2005 and the USPS can use the funding to cover operating costs, but not pay existing debt. The additional $10 Billion of funding can be obtained as soon as the USPS can agree on terms with the Treasury and may be obtained on favorable terms in much the same manner as other funds obtained by the USPS from the Treasury’s Federal Financing Bank.
Secondly, §4003 of the CARES Act provides an additional $17 Billion for loans or loan guarantees to U.S. businesses “critical to maintaining national security.” As explained in more detail below, because the USPS plays a highly important role in national security and continuity of government and is also considered essential to the critical infrastructure of the Nation, we believe that the USPS could also qualify for additional funding under this Section of the CARES Act. Section 4003 of the CARES Act does not expressly address the otherwise applicable cap on USPS borrowing in 39 U.S.C. §2005, but we believe a case can be made that the cap does not apply to this appropriation given the USPS’s integral role in maintaining national security and continuity during a national emergency. The Treasury Department has released “preliminary” guidelines for this funding, which mostly restates the terms in the CARES Act and is further explained in the discussion section below. Additional guidelines and requirements, including an application, for qualification for this funding is expected from the Treasury Department at which time we plan to supplement this memorandum, but we encourage the USPS to immediately engage Treasury in advance of final guidelines. The USPS could use this funding for operating expenses during the COVID-19 Pandemic or for other needs such as the purchase of Personal Protective Equipment or other supplies.

Lastly, §4017 of the CARES Act integrates the DPA and expressly encourages the President to use his powers under the DPA during the existing national emergency. This section of the CARES Act further appropriates an additional $1 Billion for the President to use to make purchases under his DPA authority. The President could use portions of this funding to purchase Personal Protective Equipment or other resources for the USPS.

Section II – Executive Authority and Action

Section II of this memorandum identifies and addresses three major Acts that provide executive authority during times of national emergencies and that the USPS may benefit from, including the DPA, the National Emergencies Act of 1976, the Public Health Service Act, and the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

General details on the DPA were included in the original memorandum to the USPS dated March 26, 2020 and further details are included below. The DPA extends well beyond military preparedness and support and is an important tool for the response and recovery from various types of national emergencies both foreign and domestic, including the current COVID-19 Pandemic. The essential services provided by the USPS, including the universal service mandate, during times where individuals are quarantined, and in many circumstances isolated from other services, is an important aspect of minimizing the effect of such a hazard upon the public. Because of the critical function of the USPS the President can use the DPA to assist the USPS in various ways, including providing direct loans or loan guarantees, directing prioritization of USPS needs for materials, equipment and supplies and the purchase or allocation of resources for the USPS.
The National Emergencies Act grants the President the authority to declare a national emergency and outlines the powers and authorities available to the President during national emergencies.

The Public Health Service Act authorizes the Secretary of Health and Human Services to access the Public Health Emergency Fund during public health emergencies. Pursuant to the Public Health Service Act, the Secretary of Health and Human Services has broad authority to utilize the Public Health Emergency Fund once the Secretary has determined a public health emergency exists which may provide the USPS an avenue to receive funding should the Secretary determine that such use of funds are appropriate. The Public Health Service Act authorizes the Secretary of Health and Human Services, in coordination with the Secretary of Homeland Security, to maintain the Strategic National Stockpile (SNS). The Secretary of Health and Human Services shall deploy the SNS as (i) required by the Secretary of Homeland Security to respond to an actual or potential emergency or (ii) deploy the SNS at their discretion to respond to an actual or potential public health emergency or other situation in which deployment is necessary to protect the public health or safety. Accordingly, the USPS may be able to acquire personal protective equipment for its employees and contractors from the Strategic National Stockpile through the discretion of the Secretary of Health and Human Services.

The Robert T. Stafford Disaster Relief and Emergency Assistance Act generally establishes the assistance provided by the federal government to state and local governments to alleviate the suffering and damages caused by disasters. Chapter 68 of the Stafford Act establishes that federal agencies, specifically including the USPS, may be reimbursed for services provided pursuant to the President’s directive. Among other things, the President may direct federal agencies to support state and local emergency assistance efforts; coordinate disaster relief assistance; provide emergency assistance; and assist state and local governments in the distribution of medicine, food, and other supplies. The Stafford Act may provide the USPS the ability, through a designation made by the President, to provide additional assistance to emergency relief efforts and receive reimbursement for such assistance.

Section II of this memorandum also identifies and addresses the implications of the USPS’s role in carrying out a “Primary Mission Essential Function” as well as “postal, parcel, courier, last-mile delivery, and shipping and related workers, to include private companies” being designated essential critical infrastructure workers.

Presidential Policy Directive 40 directs the Secretary of Homeland Security through the Administrator of the Federal Emergency Agency to coordinate the implementation, execution, and assessment of continuity activities among executive departments and agencies. Delivery of postal services to the American public by the USPS is considered a “Primary Mission Essential Function.” Additionally, “postal, parcel, courier, last-mile delivery, and shipping and related workers, to include private companies” are considered essential critical infrastructure workers, as
defined in guidance issued by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency. As the USPS provides two Primary Mission Essential Functions and postal workers are considered critical infrastructure, opportunities under PPD-40 and Federal Continuity Directives 1 and 2 may be available to the USPS to both ensure liquidity of the USPS to continue performing its Primary Mission Essential Functions as well as obtain personal protective equipment (“PPE”) for USPS employees and contractors who are critical infrastructure.

In Executive Order 13909 (Prioritizing and Allocating Health and Medical Resources to Respond to the Spread of COVID-19), issued on March 18, 2020, President Trump delegated to the Secretary of Health and Human Services the prioritization and allocation under section 101 of the Defense Production Act with respect to health and medical resources needed to respond to the spread of COVID-19. Additionally, the Federal Emergency Management Agency established a National Resource Prioritization Cell to unify prioritization recommendations for the allocation of critical resources from the Strategic National Stockpile. The President’s executive order, and the establishment of the National Resource Prioritization Cell provide the USPS potential avenues to acquire personal protective equipment for its employees and contractors to safely continue executing its Primary Mission Essential Functions.

Section III – Legislative Action

Section III of this memorandum addresses the potential to use additional stimulus legislation to obtain both additional financial aid and statutory changes that Michael Best could assist the USPS in achieving for long-term reform and sustainability.

Within a week of the President signing the CARES Act Members of Congress are already considering priorities for a potential “Phase 4” economic stimulus package to address the COVID-19 Pandemic. Because priorities are already being considered and various interested groups are already lobbying Congress for their share of the potential additional stimulus, it is important for the USPS needs to be part of the conversation. Members of the Michael Best & Friedrich Team, including Reince Priebus and Denise Bode, can provide invaluable assistance and guidance both with regard to the potential Phase 4 stimulus package and long-term statutory and regulatory reform to benefit the USPS.

Discussion

The United States Postal Service (“USPS”) has several options for obtaining additional funding and resources during and after the existing national emergency and COVID-19 Pandemic both as a result of the CARES Act and existing emergency powers of the President and the Executive Branch.
I. The CARES Act

The Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") was signed into law by President Donald J. Trump on Friday March 27, 2020. The CARES Act is a third phase of economic stimulus legislation addressing the impacts caused by the Coronavirus 2019 ("COVID-19") Pandemic and it includes over $2 Trillion of economic aid, including, inter alia, direct payments to eligible individual taxpayers, expanded unemployment insurance, direct funding to state and local governments, loans and other incentives to eligible businesses and local governments, new small business loans and health equipment for hospitals fighting COVID-19.

We have identified several portions of the CARES Act that either directly benefit the USPS or provide a potential for the USPS to obtain additional financial aid and/or resources. The CARES Act (a) authorizes the United States Treasury to loan up to an additional $10 Billion directly to the USPS to cover operating expenses during the COVID-19 Pandemic; (b) provides $17 Billion for "businesses critical to maintaining national security" and (c) $1 Billion for the President to make purchases under the Defense Production Act.

a. $10 Billion Direct Lending Authority for USPS

Title VI, §6001(b) of the “Cares Act” Authorizes USPS to “borrow money from the Treasury in an amount not to exceed $10,000,000,000,” in addition to any other existing borrowing authority, if the USPS determines that due to the COVID-19 Pandemic it “will not be able to fund operating expenses without borrowing money.” The direct loan(s) of up to $10 Billion must be used for operating expenses and cannot be used for the payment of existing debt. Id. §6001(b)(1)(A)-(B). The loans under the CARES Act may be upon favorable terms, including any “terms and conditions mutually agreed upon by the Secretary [of the Treasury] and the [USPS].” Id. §6001(b)(2).

The CARES Act does not provide any guidance regarding the terms or procedures for the additional financing, but because the USPS has consistent borrowing authority from the Federal Financing Bank (FFB), which is under the supervision of the Secretary of the Treasury, the additional funding should be obtained in much the same manner as existing USPS loans from the FFB. However, because the CARES Act allows for any mutually agreed upon terms, given the national emergency and the important role that USPS plays during such an emergency the USPS should obtain favorable terms rather than terms similar to existing FFB loans.

Section 6001 of the CARES Act further requires the USPS to “prioritize delivery of postal products for medical purposes” and allows the USPS to “establish temporary delivery points, in such form and manner as the [USPS] determines necessary, to protect employees of the [USPS] and individuals receiving deliveries from the [USPS].” Id. §6001(c)(1)-(2). Although this provision of the CARES Act places a burden on the USPS, requiring prioritization of medical
supplies, it does allow the USPS to protect its workers (and other members of the public) when it
determines necessary by temporarily suspending direct service to certain areas deemed to present
a higher risk and instead provide temporary delivery points. *Id.* This may present some
opportunities to reduce operating costs.

b. Economic Stabilization and Assistance to Severely Distressed Sectors of
the United States Economy

Section 4003 of the CARES Act provides the largest single appropriation within the Act—
$500 Billion from the Treasury to provide liquidity to “eligible businesses” through loans, loan
guarantees and other investments. *Id.* §4003(a). Eligible businesses are defined to include a
business in the U.S. “that has not otherwise received *adequate* economic relief in the form of loans
or loan guarantees provided under [the CARES Act].” *Id.* §4002(4)(B) (emphasis
added). Although the USPS receives up to $10 Billion in loans from §6001 of the CARES Act,
this is likely not “*adequate*.”

Within the $500 Billion available to “eligible businesses” Congress has specifically
allocated $17 Billion that shall be made available to “*businesses critical to maintaining national
security.*” *Id.* §4003(b)(3). The USPS plays a highly important role in national security and
continuity of government and is also considered essential to the critical infrastructure of the Nation.

The current National Continuity Policy was issued on July 15, 2016 in Presidential Policy
Directive 40 and remains classified, but in its predecessor Directive issued on May 4, 2007 the
USPS played an important role in national continuity and national security. The prior directive
established National Essential Functions (“NEF”), which are the subset of Government Functions
necessary to lead and sustain the country during a catastrophic emergency and therefore must be
supported through Continuity of Operations*2* (“COOP”) and Continuity of Government*3* (“COG”)
capabilities.*4* Executive departments and agencies were instructed to identify and submit a list of
Primary Mission Essential Functions (“PMEF”), which are essential government functions that
must be continuously performed in order to support or implement the uninterrupted performance

---

1. “Government Functions” means the collective functions of the heads of executive departments and agencies as
defined by statute, regulation, presidential direction, or other legal authority, and the functions of the legislative and

2. “Continuity of Operations,” or “COOP,” means an effort within individual executive departments and agencies to
ensure that Primary Mission-Essential Functions continue to be performed during a wide range of emergencies,
including localized acts of nature, accidents, and technological or attack-related emergencies. National Security

branch to ensure that National Essential Functions continue to be performed during a Catastrophic Emergency.

of NEFs before, during, or in the aftermath of an emergency. The delivery of postal services to the American public by the USPS is considered a PMEF.

With over 500,000 employees and 187.8 Million items processed and delivered each day, 47% of the World’s mail, the USPS is unquestionably critical to a functioning U.S. and World economy. The Department of Homeland Security, Cybersecurity and Infrastructure Security Agency has further classified “postal and shipping workers” as part of the “Essential Critical Infrastructure Workforce” in light of the COVID-19 Pandemic by memorandum dated March 19, 2020.

Furthermore, the USPS is designated as a supporting agency for 8 of the 15 Emergency Support Function annexes and is a cooperating agency for one essential support area under the National Response Framework—specifically the USPS has roles in reporting infrastructure disruptions and damages and also has an important role in distributing medicine, pharmaceuticals and other medical information and supplies.

Because the USPS likely qualifies as an eligible business under the CARES Act, as explained in more detail below, and is unquestionably critical to maintaining the nation’s security and continuity, the USPS should apply for and seek additional assistance under §4003 of the CARES Act. Although a portion of the $17 Billion is likely intended for other companies such as Boeing that play a role in national security, the USPS should qualify and be able to share in these funds. One concern we do have with regard to additional loans under §4003 of the CARES Act is the general cap on USPS borrowing in 39 U.S.C. §2005, but we believe a strong case can be made that the cap does not apply to this appropriation given the USPS’s integral role in maintaining national security and continuity during a national emergency. Generally where there is an apparent conflict between to statutes, like there may be in this case with the general cap in 39 U.S.C. §2005 and the funds available under §4003 of the CARES Act, courts will attempt to read the two statutes “to give effect to each if [it] can do so while preserving their sense and purpose.” Watt v. Alaska, 451 U.S. 259, 267 (1981), see also Morton v. Mancari, 417 U.S. 535, 551 (1974). The general cap and §4003 of the CARES Act can be read to co-exist as the CARES Act is an emergency measure intend to provide for additional funding during the specific COVID-19 Pandemic.

---

8 See https://www.cisa.gov/sites/default/files/publications/CISA_Guidance_on_the_Essential_Critical_Infrastructure_Workforce_508C_0.pdf.
whereas the general cap applied prior to, and will again apply after, the existing national emergency. Moreover, when there is a conflict between two statutes, the statute enacted more recently (the CARES Act in this case) will generally control while preserving all non-conflicting aspects whenever possible. *Smith v. Robinson*, 468 U.S. 992, 1024 (U.S. 1984). We encourage the USPS to immediately engage Treasury in advance of Treasury issuing final guidelines in order to help ensure that such funds could be available to the USPS and to better understand if Treasury will take the position that the general cap still applies to the CARES Act funds.

The framework for the terms and conditions associated with obtaining assistance under §4003 of the CARES Act is included in §§4003 (c) and (d), which includes requirements that businesses demonstrate: (1) they are an eligible business to which credit is not reasonably available at the time of the transaction; (2) the intended obligation is prudently incurred; and (3) the loan or guarantee is sufficiently secured or made at a rate that reflects the risk and, to the extent practicable, is not less than an interest rate based on market conditions for comparable obligations prior to the outbreak of COVID-19.

Additional terms require an applicant to: (1) show, to the extent practicable, the duration of the loan or guarantee will not exceed 5 years; (2) forego buying back stock or paying dividends for common stock (except if contractually obligated to do so) for 12 months after the obligation is no longer outstanding; (3) maintain employment levels as of March 24, 2020, to the extent practicable, until September 30, 2020, and not "in any case" reduce those employment levels by more than 10 percent; (4) certify that the business is "created or organized in the United States or under the laws of the United States and has significant operations in and a majority of its employees based in the United States; and (5) demonstrate that it incurred losses such "that the continued operations of the business are jeopardized."

The Treasury Department has already issued "preliminary" guidance for obtaining funds under §4003 of the CARES Act, which mostly reiterate what was already included in the Act itself. However, the Treasury guidelines define a "Borrower" to include any U.S. Business, including those “critical to maintaining national security” that apply for or receive a loan under §4003 of the CARES Act. The guidance further states that “Borrowers will be able to apply for a loan directly from the Treasury Department, which will disburse the loan directly to borrowers whose applications are approved by the Treasury Department.” The guidance does not expand on the definition of an eligible business, simply stating that “eligible borrowers” include “businesses critical to maintaining national security.”

Although the USPS is not a typical U.S. business, it is an independent federal entity that is self-supporting and operates much like any other business, but is subject to significant federal law and regulations. See, e.g., 39 U.S.C. § 101, et seq. Because the USPS receives no tax dollars for its operations and relies on the sale of postage, products and services to fund its operations it likely qualifies under §4003 of the CARES Act as an eligible business and can meet the above criteria.
Moreover, Treasury guidance recently published for §4003 of the CARES Act explains that being a “U.S. Business” requires a certification that the borrower “is created or organized in the United States or under the laws of the United States and has significant operations in and a majority of its employees based in the United States.” The USPS easily meets all of these criteria.

When the Treasury Department publishes additional guidance on regarding funds under §4003 of the CARES Act, including the application, we will provide that to the USPS along with our analysis.

c. Defense Production Act Purchases and Funding

Section 4017 of the CARES Act seeks to increase access to materials and supplies necessary for both national security and recovery from the COVID-19 Pandemic. To accomplish this the CARES expressly utilizes the Defense Production Act of 1950 (“DPA”) by lifting certain limits and requirements within the DPA (namely with regard to the President’s ability to order the purchase of resources or items of need for government use or resale) and providing $1 Billion of funding for the President to make such purchases.

As explained generally in Michael Best’s original memorandum to the USPS dated March 26, 2020 and again in Section II(a) below, the DPA confers significant powers on to the Executive Branch to impact, direct, prioritize and incentivize industries as is necessary in the “national defense.” The DPA provides the President, or other Executive Branch departments or agencies through delegation, with significant authority to act in the interest of national security and during emergencies, including the ability to require persons, businesses and other entities to allocate the distribution of supplies, materials, services or even facilities as deemed necessary or appropriate. 50 U.S.C. §4511(a). In conjunction with this authority, the DPA allows the President great discretion to make purchases or commitments to purchase important items for its use or resale. 50 U.S.C. §4533(a). The President’s purchases under the DPA are typically limited to an existing Defense Production Act Fund, but the CARES Act expands on this funding with the additional $1 Billion. Id., §4534.

By removing conditions and requirements that the President would otherwise have to meet in order to act under the DPA, §4017 of the CARES Act encourages the use of this power by the President. As a result the President has great discretion to order certain companies to manufacture health supplies, including personal protective equipment such as hand sanitizer, masks and gloves and use the funds existing in the Defense Production Act Fund and provided by the CARES Act to purchase these items for the USPS.

10 The $1 Billion appropriated for purchases under the DPA is not included in Section 4070 of the CARES Act, but is included in an un-numbered section later in the CARES Act.
This directive can be ordered by the President at any time now that the CARES Act is effective and the USPS should therefore immediately engage the Administration for action on this item.

II. Executive Authority and Action

The CARES Act is not the only resource available to the USPS for both short-term assistance during the COVID-19 Pandemic and long-term solutions for sustainability. The Defense Production Act can be utilized by the President and or his Administration to assist the USPS independently of the CARES Act along with other significant statutory authority. While certain regulatory changes are a possibility under the USPS’s rulemaking authority, and executive action through executive orders is limited and subject to the statutory scheme establishing the USPS.

a. Defense Production Act

The Defense Production Act of 1950 (“DPA”) confers significant powers on to the Executive Branch to impact, direct, prioritize and incentivize industries as is necessary in the “national defense.” The main sections of the DPA were presented in memorandum to the USPS dated March 26, 2020 and are again summarized for your convenience, including (I) Title III: Strengthening Domestic Capability; (II) Title I: Priorities and Allocations; and (III) Title VII: General Provisions.

The DPA expressly provides the Executive Branch with an “array of authorities to shape national defense preparedness programs and to take appropriate steps to maintain and enhance the domestic industrial base.” 50 U.S.C. §4502(a)(4) (emphasis added). The term “national defense” is defined very broadly in the DPA, including many of the functions provided by the USPS; national defense is defined as

programs for military and energy production or construction, military or critical infrastructure assistance to any foreign nation, homeland security, stockpiling, space, and any directly related activity. Such term includes emergency preparedness activities conducted pursuant to title VI of The Robert T. Stafford Disaster Relief and Emergency Assistance Act [42 U.S.C. §§5195 et seq.] and critical infrastructure protection and restoration.

“Critical infrastructure” is further broadly defined in the DPA to include “any systems and assets, whether physical or cyber-based, so vital to the United States that the degradation or destruction of such systems and assets would have a debilitating impact on national security, including, but not limited to, national economic security and national public health and safety.” 50
U.S.C. §4552(2). With over 500,000 employees and 187.8 Million items processed and delivered each day, 47% of the World’s mail, the USPS is unquestionably critical to a functioning U.S. and World economy. The Department of Homeland Security, Cybersecurity and Infrastructure Security Agency has further classified “postal and shipping workers” as part of the “Essential Critical Infrastructure Workforce” in light of the COVID-19 Pandemic by memorandum dated March 19, 2020. Moreover, the DPA references 42 U.S.C. §5195(a)(3) for the definition of “emergency preparedness” activities, which includes

all those activities and measures designed or undertaken to prepare for or minimize the effects of a hazard upon the civilian population, to deal with the immediate emergency conditions which would be created by the hazard, and to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by the hazard.

As a result the DPA extends well beyond military preparedness and support and is an important tool for the response and recovery from various types of national emergencies both foreign and domestic, including the current COVID-19 Pandemic. In fact, the essential services provided by the USPS, including the universal service mandate, during times where individuals are quarantined, and in many circumstances isolated from other services, is an important aspect of minimizing the effect of such a hazard upon the public.

i. Title III of the DPA

Title III of the DPA allows the President, or other portions of the Executive Branch through delegation, to provide incentives and assistance, including loans and loan guarantees, to, inter alia, “assure that critical components, critical technology items, essential materials, and industrial resources are available from reliable sources when needed to meet defense requirements during peacetime, graduated mobilization, and national emergency.” U.S.C. §4517(b). As explained above, the USPS is part of the “critical infrastructure” of the United States, and the World, and Title III of the DPA allows for assistance and incentives to the USPS to assure that its critical function is provided in both peacetime and during a national emergency such as the COVID-19 Pandemic.

Pursuant to 50 U.S.C. §4531(a) the President has the authority under the DPA to reduce current shortfalls or prevent projected shortfalls of those entities providing critical items by authorizing direct loans or loan guarantees “for the purpose of financing any contractor, subcontractor, provider of critical infrastructure, or other person in support of . . . production and deliveries or services essential to the national defense.” Id. (emphasis added). Although the DPA typically requires meeting certain conditions and for the President to make certain determinations before the incentives can be provided, if a national emergency is declared by Congress or the
President such conditions and determinations do not apply. 50 U.S.C. §4531(2). In the case of the COVID-19 Pandemic, the President has formally declared a national emergency and therefore the conditions and determinations are not required.\(^\text{13}\) Regardless of a declaration of national emergency, Congress still must appropriate funds providing authority for such loans or loan guarantees. 50 U.S.C. §4531(3).

Although Congress has limited the borrowing authority of the USPS pursuant to 39 U.S.C. §2005 as explained in Section I of this memorandum the CARES Act includes both an express appropriation of funds for direct loans to the USPS from the U.S. Treasury and other relief for which we believe the USPS could qualify.

\textbf{ii. Title I of the DPA}

Title I of the DPA allows the President, or other portions of the Executive Branch through delegation, to require persons, businesses and other entities to (1) give \textit{priority} to certain contracts, orders or other performance as necessary or appropriate to promote the national defense and (2) to \textit{allocate} the distribution of supplies, materials, services or even facilities as deemed necessary or appropriate. 50 U.S.C. §4511(a).

The prioritization authority is the most commonly used aspect of the DPA, namely with regard to certain contracts or orders by the Department of Defense, including the B-2 Bomber, Air Force One and certain Mine Resistant Ambush Protected (MRAP) Vehicles.\(^\text{14}\) Although less common, other departments and agencies have used DPA prioritization such as the Department of Homeland Security requiring prioritization of manufacturing housing units, food and bottled water during the 2017 disaster season.\(^\text{15}\)

The allocation authority is rarely used. The best example of its use is the Civil Reserve Air Fleet (CRAF) whereby civilian aircraft are “allocated” for potential use by the Department of Defense in case needed in a national defense crisis where the existing military air fleet is insufficient. See www.dot.gov/ost/oiser/craf.htm.

In these extraordinary times the use of the DPA during the COVID-19 Pandemic to potentially require private corporations to both prioritize and allocate resources towards the immediate production of test kits and other medical supplies is at the forefront of public discussion. In fact, on March 27, 2020 President Trump issued an order under the DPA directing the Secretary of Health and Human Services to “use any and all authority available under the [DPA] to require

General Motors Company to accept, perform, and prioritize contracts or orders for the number of ventilators that the Secretary determines to be appropriate.” As explained in Section I (c) above, the President can use the DPA, including the additional funding provided by the CARS Act for the DPA Fund to make purchases of PPE or other materials and equipment for the USPS.

iii. Title VII of the DPA

Title VII of the DPA includes various miscellaneous provisions that are generally not applicable to the USPS, including, *inter alia*, special preferences for small businesses, 50 U.S.C. §4551, ability to conduct investigations and obtain information regarding the domestic industrial base, 50 U.S.C. §4555, immunity from anti-trust laws where the DPA is used to encourage voluntary agreements between competing companies and interest, 50 U.S.C. §4558, the ability of the President to create a committee of industry executives, 50 U.S.C. §4560, and the creation of a committee on foreign investment, 50 U.S.C. §4565.

b. Other Existing Statutory Authority

There are three major Acts that provide executive authority during times of national emergencies: (i) the National Emergencies Act of 1976; (ii) the Public Health Service Act; and (iii) The Robert T. Stafford Disaster Relief and Emergency Assistance Act. This section contains an overview of each Act and identifies potential executive actions under such legislation that could benefit the USPS.

i. National Emergencies Act of 1976

The National Emergencies Act of 1976 (the “National Emergencies Act”) authorizes the President to declare a national emergency. 50 U.S.C. § 1621(a). When the President declares a national emergency, as President Trump has for the COVID-19 Pandemic, various laws conferring executive powers during such an emergency become effective and remain in effect during such emergency. 50 U.S.C. § 1621(b). While the National Emergencies Act does not provide authority for specific executive actions applicable to the USPS, the National Emergencies Act does provide general authority for when, and how long, a national emergency may be declared and allows the President to take certain actions that may benefit the USPS under other law as discussed below.

---

16 See https://www.whitehouse.gov/presidential-actions/memorandum-order-defense-production-act-regarding-general-motors-company/
ii. Public Health Service Act

The Public Health Service Act authorizes the Secretary of Health and Human Services (“HHS”) to determine that (i) a disease or disorder presents a public health emergency; or (ii) that a public health emergency, including significant outbreaks of infectious disease or bioterrorist attacks, exists. 42 U.S.C. § 247d(a). If the Secretary of HHS declares a public health emergency, as Secretary Azar has in the case of COVID-19, the Secretary may access the Public Health Emergency Fund (the “Health Fund”), without fiscal year limitations. 42 U.S.C. § 247d(b)(1). Secretary Azar may use the Health Fund to, inter alia, (a) facilitate coordination between and among Federal, State, local, Tribal, and territorial entities and public and private health care entities that the Secretary determines may be affected by COVID-19; (b) make grants, provide for awards, enter into contracts, and conduct supportive investigations pertaining to COVID-19; and (c) carry out other activities, as the Secretary determines applicable and appropriate. 42 U.S.C. § 247d(2). The Secretary must report on expenditures made out of the Health Fund not later than 90 days after the end of the fiscal year to certain committees of the House of Representatives and Senate. 42 U.S.C. § 247d(3). As a result of the COVID-19 Pandemic and the declared emergencies the Secretary of HHS has broad authority to utilize the Health Fund to assist the USPS as the Secretary deems appropriate, including providing resources, equipment and other resources.

Additionally, the Public Health Service Act authorizes the Secretary of HHS, in coordination with the Secretary of Homeland Security, to maintain the Strategic National Stockpile (“SNS”). See 42 U.S.C. § 247d-6b. The SNS is a national repository of large quantities of medical supplies, including Personal Protective Equipment stored in strategic locations around the nation. The SNS is designed to supplement state and local public health departments in the event of a large-scale public health emergency that causes local supplies to run out. Pursuant to the Public Health Service Act, the Secretary of HHS may deploy the SNS to respond to the COVID-19 Pandemic. 42 U.S.C. § 247d-6b(a)(3)(f)-(g). The USPS may be able to access the SNS to obtain Personal Protective Equipment or other stockpiled equipment and resources for its operations during the COVID-19 Pandemic.

iii. Robert T. Stafford Disaster Relief and Emergency Assistance Act

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (the “Stafford Act”) establishes certain assistance provided by the federal government to state and local governments to alleviate the suffering and damages caused by disasters. Pursuant to the Stafford Act, federal agencies are reimbursed for services or supplies furnished during disasters and emergencies such as the current COVID-19 Pandemic. 42 U.S.C. § 5147. For purposes of the Stafford Act a “federal agency” includes any department, independent establishment, Government corporation, or other agency of the executive branch of the Federal Government, including the United States Postal Service. 42 U.S.C. § 5147. Pursuant to the Stafford Act, federal agencies are reimbursed for services or supplies furnished during disasters and emergencies such as the current COVID-19 Pandemic. 42 U.S.C. § 5147. For purposes of the Stafford Act a “federal agency” includes any department, independent establishment, Government corporation, or other agency of the executive branch of the Federal Government, including the United States Postal Service.

In any emergency under the Stafford Act, “the President may:

(i) direct any Federal agency, with or without reimbursement, to utilize its authorities and the resources granted to it under federal law (including personnel, equipment, supplies, facilities, and managerial, technical and advisory services) in support of state and local emergency assistance efforts to save lives, protect property and public health and safety, and lessen or avert the threat of a catastrophe, including precautionary evacuations;

(ii) coordinate all disaster relief assistance (including voluntary assistance) provided by federal agencies, private organizations, and state and local governments; …

(iv) provide emergency assistance through Federal agencies; …

(vii) assist state and local governments in the distribution of medicine, food, and other consumable supplies, and emergency assistance; and

(viii) provide accelerated federal assistance and Federal support where necessary to save lives, prevent human suffering, or mitigate severe damage, which may be provided in the absence of a specific request and in which case the President—

a. shall, to the fullest extent practicable, promptly notify and coordinate with a State in which such assistance or support is provided; and

b. shall not, in notifying and coordinating with a state, delay or impede the rapid deployment, use, and distribution of critical resources to victims of an emergency.” 42 U.S.C. § 5192(a).

Although the Stafford Act contains various requirements for emergency declarations at the federal and state level, this is not a concern given the existing national emergency and various emergencies and disasters declared in virtually every state throughout the nation as a result of COVID-19. The Stafford Act is primarily designed to provide direct federal assistance to state and local governments, but it also includes mechanisms for the President to direct and/or coordinate federal agencies, including the USPS, to provide services in an emergency or disaster. Due to the unique ability of the USPS to reach every residence in the United States, the USPS may be the sole federal agency, as defined under the Stafford Act, to provide emergency assistance to every citizen during the COVID-19 Pandemic. As such, the President may instruct the USPS to provide certain services and take certain actions, including the use of special equipment and protections, which could be directly funded or reimbursed under the Stafford Act by executive order.
c. Direct Executive Action

i. Federal Continuity Directives and Critical Infrastructure Designation

As identified in Mr. Marshall’s letter to Ms. Bonner “Re: Essential Public Service Provided by the Postal Service as a Part of the Nation’s Critical Infrastructure,” dated March 23, 2020, the USPS carries out an essential function of the federal government and provides critical government services as part of the National Continuity Policy. National Security Presidential Directive 51 (“Directive 51”), issued May 4, 2007, established a comprehensive national policy on the continuity of federal government structures and operations. Directive 51 also established National Essential Functions (“NEF”), which are the subset of Government Functions necessary to lead and sustain the country during a catastrophic emergency and therefore must be supported through Continuity of Operations (“COOP”) and Continuity of Government (“COG”) capabilities. Executive departments and agencies were instructed to identify and submit a list of Primary Mission Essential Functions (“PMEF”), which are essential government functions that must be continuously performed in order to support or implement the uninterrupted performance of NEFs before, during, or in the aftermath of an emergency. The delivery of postal services to the American public by the USPS is considered a PMEF.

Presidential Policy Directive 40 (“PPD-40”), National Continuity Policy, issued on July 15, 2016, replaced Directive 51. PPD-40 remains classified, however certain information has been

---

20 "Government Functions" means the collective functions of the heads of executive departments and agencies as defined by statute, regulation, presidential direction, or other legal authority, and the functions of the legislative and judicial branches. National Security Federal Directive 51(2)(g).
21 "Continuity of Operations," or "COOP," means an effort within individual executive departments and agencies to ensure that Primary Mission-Essential Functions continue to be performed during a wide range of emergencies, including localized acts of nature, accidents, and technological or attack-related emergencies. National Security Federal Directive 51(2)(d).
made available through Federal Continuity Directives 1 and 2. PPD-40 directs the Secretary of Homeland Security through the Administrator of the Federal Emergency Management Agency (“FEMA”) to coordinate the implementation, execution, and assessment of continuity activities among executive departments and agencies. Specifically, the Administrator of FEMA is directed to develop and promulgate Federal Continuity Directives to establish continuity program and planning requirements for executive departments and agencies. PPD-40 requires departments and agencies to appoint a Continuity Coordinator at the Assistant Secretary level or higher.

Additionally, “postal, parcel, courier, last-mile delivery, and shipping and related workers, to include private companies” are considered essential critical infrastructure workers, as defined in guidance issued by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency (“CISA”). The term critical infrastructure is used to describe “systems and assets, whether physical or virtual, so vital to the United States that the incapacity or destruction of such systems and assets would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters.”

Although the specific aspects of PPD-40 remain classified, because the USPS provides PMEFs, and postal workers are considered critical infrastructure, the USPS may be able to use PPD-40 and Federal Continuity Directives 1 and 2 to both ensure liquidity as well as obtain personal protective equipment (“PPE”) for USPS employees and contractors. The USPS should coordinate with the President, the Secretary of Homeland Security, and the Administrator of FEMA in order to seek possible emergency funds to ensure the USPS remains financially able to continue providing its important services and to obtain the equipment and resources necessary to do so.

ii. Strategic National Stockpile (“SNS”)

As discussed above in Section II(b), the Secretary of HHS, in coordination with the Secretary of Homeland Security, maintains the SNS. The President has declared a national

27 Federal Continuity Directive 1, Section I (pg. 3).
28 Id.
29 Id. at Section V (pg. 5).
31 Presidential Policy Directive (PPD) 21, Critical Infrastructure Security and Resilience, February 12, 2013, p. 12; USA Patriot Act of 2001, Section 1016(e), (42 U.S.C) 5195c(e)).
emergency as a result of the COVID-19 Pandemic\textsuperscript{32} and issued Executive Order 13909 directing the Secretary of HHS to use the prioritization and allocation authorities under section 101 of the DPA with respect to health and medical resources needed to respond to the spread of COVID-19.\textsuperscript{33} Additionally, FEMA established the Supply Chain Stabilization Task Force to address limited supply of critical Personal Protective Equipment. The Supply Chain Stabilization Task Force is utilizing a four-prong approach, one prong focuses on the allocation of critical resources. To effectively allocate resources, the FEMA Supply Chain Stabilization Task Force established a National Resource Prioritization Cell to unify prioritization recommendations.\textsuperscript{34} The USPS should work with the Secretary of HHS, the Secretary of Homeland Security, and the National Resource Prioritization Cell of the FEMA Supply Chain Stabilization Task Force to obtain equipment and resources through the SNS.

iii. Executive Orders

Executive orders are an extraordinary law making authority vested in the President only under very narrow circumstances and where the legislative and executive branch – through power vested in them by Article I and Article II of the Constitution – have not already spoken. Although significant authority is already vested in the President to take actions described above to protect national security, his constitutional authority does not extend to issue the executive orders sought by the USPS.

The United States Supreme Court has consistently held that the “President’s power, if any, to issue [executive orders] must stem from an act of Congress or from the Constitution itself.”\textit{Youngstown Sheet & Tube Co. v. Sawyer}, 343 U.S. 579, 585 (1952). In the landmark case of\textit{Youngstown} President Truman issued an executive order directing the Secretary of Commerce to seize and operate steel mills, which were integral to national security during the Korean War, and avert a strike. \textit{Id.} at 582-83. Despite the undisputed national security need for the steel mills to continue operations, the Supreme Court held that the order was unconstitutional because it did not stem from any act of Congress or the Constitution itself. \textit{Id.} at 585. In fact, the Court expressly rejected arguments that general executive authority and/or general military authority vested in the President by the Constitution supported the executive order. \textit{Id.} at 586-87. The decision in

\begin{footnotesize}
\begin{enumerate}
\end{enumerate}
\end{footnotesize}
Youngstown remains applicable law today. See Sierra Club v. Trump, 929 F.3d 670, 694 (9th Cir. 2019).

Here, what the USPS seeks not only isn’t granted by statutory or constitutional authority but is expressly addressed in statute. Any such orders issued by the President would be counter to the law and thus ineffectual. The President cannot take action that is incompatible with the express or implied will of Congress unless the President has an independent power to do so under the Constitution, Zivotofsky v. Kerry, 571 U.S. 1, 15 (2015) (citing Youngstown, 343 U.S. at 637). The authority to make the changes the USPS seeks by executive order simply does not exist.

III. Legislative Action

a. Additional “Phase 4” COVID-19 Stimulus

Less than a week after the enactment of the CARES Act, Members of Congress have signaled a desire for yet another “Phase 4” stimulus package. Part of the additional items being suggested by Speaker Nancy Pelosi includes additional investment in infrastructure, the health care system and digital economy.35

Even if a fourth round of stimulus is still only a possibility, it is important to make sure that additional assistance and/or reform for the USPS is part of the conversation and under consideration early in the process. In addition to further loans, funding and other resources that could be included in Phase 4, the package could also be a source for long-term legislative reform benefiting the USPS. With adequate time to influence Members of Congress and the President a Phase 4 package could be significantly more beneficial to the USPS than the CARES Act.

b. Long-term Legislative Action

Federal legislation specifically reforming the law governing the USPS is the best long-term solution to liquidity issues faced by the USPS. The USPS has already identified several statutory changes that would greatly improve the ability of the USPS to efficiently operate and obtain more revenue. Namely legislation could be enacted to: (1) eliminate the cap on prices charged by the USPS and allow the Postal Regulatory Commission to engage in an oversight role monitoring the market prices set by the USPS Board of Governors; (2) provide flexibility for the USPS to enter into Negotiated Service Agreements; (3) eliminate Postal Regulatory Commission review of rate changes prior to effective date of the change; (4) provide flexibility for the USPS to offer non-postal services and government services; and (5) eliminate Postal Regulatory Commission review of new postal products and the elimination of existing postal products.

The USPS has already provided draft language for proposed amendments to Title 39 of the U.S. Code to accomplish these changes, which are attached hereto as Exhibit A.

Members of the Michael Best & Friedrich Team, including Reince Priebus and Denise Bode, can provide invaluable assistance and guidance both with regard to the potential Phase 4 stimulus package and long-term statutory and regulatory reform to benefit the USPS. In addition to taking immediate action on the above-identified items related to the CARES Act and existing Executive Action, we would like to discuss more specifically how Michael Best can assist the USPS in achieving both its short-term and long-term goals.
TALKING POINTS

External Statements Regarding USPS Status

Note: These statements are intended to summarize the Postal Service’s legal exemption from State and local laws given the Postal Service’s status as an entity of the Federal Government, which is providing an essential function. It is intended for use by Postal Service officials in communicating with a variety of audiences. To the extent that you receive a communication from a lawyer, please refer that communication to the Law Department.

Customer/Public:

The Postal Service’s provision of mail and package delivery services is not affected by State and local government actions that are restricting commercial and personal activities in response to the Coronavirus Disease 2019 (COVID-19) pandemic. The Postal Service is an entity of the Federal Government whose employees are providing an essential government service for the American people. The restrictions being imposed by State and local governments generally exempt the provision of essential services from their scope. In addition, even if a State or local directive does not contain such an exemption, the performance of the Postal Service’s functions is governed by federal law, rather than State or local laws. The Postal Service is therefore continuing to fulfill our critical public service mission by accepting and delivering mail and packages in accordance with federal law. We are working closely with federal, state, and local authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public.

Employees:

Many State and local governments have issued legal directives restricting commercial and personal activities in response to the COVID-19 pandemic, such as requirements to shelter-in-place. These restrictions do not prevent Postal Service employees from reporting to and performing their work. The Postal Service is an entity of the Federal Government whose employees are providing an essential government service for the American people. The restrictions being imposed by State and local governments generally exempt individuals performing essential services from their scope. In addition, even if a State or local directive does not contain such an exemption, the performance of the Postal Service’s functions is governed by federal law, rather than State or local laws. The Postal Service is continuing to fulfill our critical public service mission by accepting and delivering mail and packages in accordance with federal law. Employees who live or work in jurisdictions that have imposed restrictions are therefore not entitled to administrative leave. We are working closely with federal, state, and local health authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public. That said, employees who have been diagnosed with COVID-19, or are experiencing its symptoms, should not come to work, and should take leave, which will be liberally approved. Employees who wish to remain at home in accordance with State or local directives are able to request the use of leave in accordance with applicable postal policies and other federal laws.

State and Local Officials:

The Postal Service’s provision of mail and package delivery services is not affected by State and local government actions that are restricting commercial and personal activities in response to the COVID-19 pandemic, including the directive issued by your jurisdiction. The Postal Service is an entity of the Federal Government whose employees are providing an essential government service for the American people. Our approach is to interpret the restrictions being imposed by State and local governments as either explicitly or impliedly exempting essential federal government services from its scope. In any event, even if a State or local action does not contain such an exemption, the Postal Service’s operations are governed by federal law, rather than State or local laws. The Postal Service is therefore continuing to fulfill our public service mission by accepting and delivering mail and packages in accordance with federal law. We are working closely with federal, state, and local health authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public.

SEC. XXX. UNITED STATES POSTAL SERVICE BORROWING AUTHORITY.

(a) BORROWING LIMITS.—Section 2005(a) of title 39, United States Code, is amended—

(1) in paragraph (1), by striking “In any one fiscal year,” and all that follows through the period; and—

(B) in paragraph (2)(C), by striking “fiscal year 1992 and each fiscal year thereafter.” and inserting in its place “fiscal years 1992 to 2019; and”; and

(C) by inserting after paragraph (2)(C) the following:

“(D) $25,000,000,000 for fiscal year 2020 and each fiscal year thereafter.”.

(b) RELATIONSHIP BETWEEN THE POSTAL SERVICE AND THE TREASURY.—Section 2006 of title 39, United States Code, is amended to read as follows:

“(a) ISSUANCE OF OBLIGATIONS TO THE SECRETARY OF THE TREASURY.—The Postal Service may require the Secretary of the Treasury to purchase obligations of the Postal Service issued under section 2005 or 2011 of this title, and the Secretary shall purchase such obligations without any administrative charge. Any purchase under this subsection shall be subject to the terms and conditions of the note purchase agreement between the Postal Service and the Federal Financing Bank in effect on September 29, 2018 (subject to any modifications on which the Postal Service and the Secretary may
mutually agree), except that no expiration date provided in such note purchase agreement shall apply.

“(b) ISSUANCE OF OBLIGATIONS TO OTHER PARTIES.—Subject to mutual agreement of the Postal Service and the Secretary of the Treasury, the Postal Service may issue and sell obligations to a party or parties other than the Secretary pursuant to sections 2005 and 2011(e) of this title, upon notice to the Secretary and upon consultation with the Secretary as to the date of issuance, maximum rates of interest, and other terms and conditions.”

(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Section 2005(d) of title 39, United States Code, is amended—

(A) in paragraph (4), by striking “; and” and inserting a period; and

(B) by striking paragraph (5).

(2) Section 2011(e)(4) of title 39, United States Code, is amended—

(A) in subparagraph (D), by striking “; and” and inserting a period; and

(B) by striking subparagraph (E).

(3) The Coronavirus Aid, Relief, and Economic Security Act is amended—

(A) in the table of sections, by amending the item related to section 6001 to read as follows:

“Sec. 6001. Prioritization of Medical Deliveries by the United States Postal Service.”;

and

(B) in section 6001,—

(i) by striking subsection (b); and

(ii) by striking the heading and inserting in its place the following:

“Sec. 6001. Prioritization of Medical Deliveries by the United States Postal Service.”.
USPS Proposed Legislative Language

FEDERAL FINANCING BANK

For satisfaction of all currently outstanding obligations issued pursuant to sections 2005 and 2006 of title 39, United States Code, $XX,XXX,XXX,XXX, Provided: That no payment shall be required from the United States Postal Service of any additional amount in connection with such currently outstanding obligations.

Explanation: This appropriation language provides an appropriation to the Federal Financing Bank (FFB) to satisfy the Postal Service’s outstanding obligations issued under Title 39 of the U.S. Code. The Postal Service currently has $14.4 billion in outstanding debt with the FFB. The exact amount of the appropriation is not currently specified, as it is intended to be sufficient to fully cover the amounts to which FFB is entitled under the outstanding notes because of early payment, as determined at the time the language is enacted.

UNITED STATES POSTAL SERVICE
PAYMENT TO POSTAL SERVICE FUND

For payment to the “Postal Service Fund”, $25,000,000,000, for necessary expenses to ensure the continued maintenance and development of the services and operations of the United States Postal Service during and following the COVID-19 pandemic, to remain available until expended; and $25,000,000,000, for the modernization of postal infrastructure and operations, including through capital expenditures to purchase delivery vehicles, processing equipment, and other goods, to ensure that the Postal Service is able to continue to provide prompt, reliable, and efficient services adapted to the needs of the United States, to remain available until expended.

Explanation: This appropriation language provides two appropriations to the Postal Service: (1) an appropriation of $25 billion to address the impacts of the COVID-19 pandemic on the Postal Service’s near-term financial condition; and (2) an appropriation of $25 billion to help the Postal Service address the long-term impacts of the pandemic and to ensure that we will be positioned on a going-forward basis to provide our essential services as part of the nation’s critical infrastructure, by modernizing our infrastructure and operations, including through procuring delivery vehicles and other capital goods from private sector suppliers.

* * * * *

SEC. XXX. UNITED STATES POSTAL SERVICE BORROWING AUTHORITY.

(a) BORROWING LIMITS.—Section 2005(a) of title 39, United States Code, is amended—
(1) in paragraph (1), by striking “In any one fiscal year,” and all that follows through the period; and—

(2) in paragraph (2)(C), by striking “fiscal year 1992 and each fiscal year thereafter.” and inserting in its place “fiscal years 1992 to 2019; and”; and

(3) by inserting after paragraph (2)(C) the following:

“(D) $25,000,000,000 for fiscal year 2020 and each fiscal year thereafter.”.

(b) RELATIONSHIP BETWEEN THE POSTAL SERVICE AND THE TREASURY.—
Section 2006 of title 39, United States Code, is amended by striking subsections (a) and (b) and inserting in their place the following:

“(a) ISSUANCE OF OBLIGATIONS TO THE SECRETARY OF THE TREASURY.—The Postal Service may require the Secretary of the Treasury to purchase obligations of the Postal Service issued under section 2005 or 2011 of this title, and the Secretary shall purchase such obligations without any administrative charge. Any purchase under this subsection shall be subject to the terms and conditions of the note purchase agreement between the Postal Service and the Federal Financing Bank in effect on September 29, 2018 (subject to any modifications on which the Postal Service and the Secretary may mutually agree), except that no expiration date provided in such note purchase agreement shall apply.

“(b) ISSUANCE OF OBLIGATIONS TO OTHER PARTIES.—Subject to mutual agreement of the Postal Service and the Secretary of the Treasury, the Postal Service may issue and sell obligations to a party or parties other than the Secretary pursuant to sections 2005 and 2011(e) of this title, upon notice to the Secretary and upon consultation with the Secretary as to the date of issuance, maximum rates of interest, and other terms and conditions.”

(c) TECHNICAL AND CONFORMING AMENDMENTS.—The Coronavirus Aid, Relief, and Economic Security Act is amended—

(1) in the table of sections, by amending the item related to section 6001 to read as follows:

“Sec. 6001. Prioritization of Medical Deliveries by the United States Postal Service.”; and

(2) in section 6001,—

(A) by striking the heading and inserting in its place the following:

“Sec. 6001. Prioritization of Medical Deliveries by the United States Postal Service.”;
(B) by striking subsection (b); and

(C) by renumbering subsection (c) as subsection (b).

**Explanation:** This provision consolidates revises the Postal Service’s current borrowing authority in one statutory section, and revises it in three ways. First, subsection (a) eliminates the $3 billion annual cap on new obligations, and raises the overall cap on outstanding obligations from $15 billion to $25 billion by consolidating the CARES Act borrowing authority into the long-standing Postal Service borrowing provision. Second, subsection (b) requires that Treasury purchase the Postal Service’s debt obligations, and makes the terms and conditions of such purchases consistent with the note purchase agreement through which Treasury purchased all Postal Service debt from 1999 until last year. In addition, the Postal Service would retain the right to borrow from the private market (as under current law), though only if the Postal Service and Treasury mutually agree. Third, subsection (c) eliminates the limited additional borrowing authority provided in the CARES Act, which is unnecessary once the Postal Service receives an unconditional $25 billion of borrowing authority, consolidated in the long-standing Postal Service borrowing provision.
For satisfaction of all currently outstanding obligations issued pursuant to sections 2005 and 2006 of title 39, United States Code, $XX,XXX,XXX,XXX, Provided: That no payment shall be required from the United States Postal Service of any additional amount in connection with such currently outstanding obligations.

UNITED STATES POSTAL SERVICE PAYMENT TO POSTAL SERVICE FUND

For payment to the “Postal Service Fund”, $25,000,000,000, for necessary expenses to ensure the continued maintenance and development of the services and operations of the United States Postal Service during and following the COVID-19 pandemic, to remain available until expended; and $25,000,000,000, for the modernization of postal infrastructure and operations, including through capital expenditures to purchase delivery vehicles, processing equipment, and other goods, to ensure that the Postal Service is able to continue to provide prompt, reliable, and efficient services adapted to the needs of the United States, to remain available until expended.

* * * * *

SEC. XXX. UNITED STATES POSTAL SERVICE BORROWING AUTHORITY.

(a) BORROWING LIMITS.—Section 2005(a) of title 39, United States Code, is amended—

(1) in paragraph (1), by striking “In any one fiscal year,” and all that follows through the period; and—

(2) in paragraph (2)(C), by striking “fiscal year 1992 and each fiscal year thereafter.” and inserting in its place “fiscal years 1992 to 2019; and”; and

(3) by inserting after paragraph (2)(C) the following:

“(D) $25,000,000,000 for fiscal year 2020 and each fiscal year thereafter.”.

(b) RELATIONSHIP BETWEEN THE POSTAL SERVICE AND THE TREASURY.—Section 2006 of title 39, United States Code, is amended by striking subsections (a) and (b) and inserting in their place the following:

“(a) ISSUANCE OF OBLIGATIONS TO THE SECRETARY OF THE TREASURY.—The Postal Service may require the Secretary of the Treasury to purchase obligations of the Postal Service issued under section 2005 or 2011 of this title, and the Secretary shall purchase such obligations without any administrative charge. Any purchase under this subsection shall be subject to the terms and conditions of the note purchase agreement between the Postal Service and the Federal Financing Bank in effect on September 29,
2018 (subject to any modifications on which the Postal Service and the Secretary may mutually agree), except that no expiration date provided in such note purchase agreement shall apply.

“(b) ISSUANCE OF OBLIGATIONS TO OTHER PARTIES.—Subject to mutual agreement of the Postal Service and the Secretary of the Treasury, the Postal Service may issue and sell obligations to a party or parties other than the Secretary pursuant to sections 2005 and 2011(e) of this title, upon notice to the Secretary and upon consultation with the Secretary as to the date of issuance, maximum rates of interest, and other terms and conditions.”

(c) TECHNICAL AND CONFORMING AMENDMENTS.—The Coronavirus Aid, Relief, and Economic Security Act is amended—

(1) in the table of sections, by amending the item related to section 6001 to read as follows:

“Sec. 6001. Prioritization of Medical Deliveries by the United States Postal Service.”;

and

(2) in section 6001,—

(A) by striking the heading and inserting in its place the following:

“Sec. 6001. Prioritization of Medical Deliveries by the United States Postal Service.”;

(B) by striking subsection (b); and

(C) by renumbering subsection (c) as subsection (b).
USPS

Pricing/Cost Analysis of

Contracts with Amazon & Other Major Customers

Scope of Assignment by Independent Firm

- Analyze the economic terms of the contracts between USPS and its 10 largest package customers for the fiscal years 2017, 2018 and 2019.
- Determine the profitability of the contracts considering fixed and variable costs to determine a) their marginal profitability, and b) their profitability after fully allocating all costs.
- Given its legally and regulatorily mandated service, pricing and cost and other obligations, and the competitive environment, determine whether the USPS is pricing these contracts in a fashion designed to optimize both their profitability and the overall profitability of the USPS.
- Provide any additional observations on the costs or profitability of its major package contracts.

Fyi. I had my monthly meeting with the OIG leadership yesterday via ZOOM.

Thomas J. Marshall
General Counsel and Executive Vice President
United States Postal Service

From: Marshall, Thomas J - Washington, DC
Sent: Thursday, April 16, 2020 7:43 PM
To: 'Martin, Lisa' (b)(3), 410(c)(2), (b)(6)
Subject: RE: Response to Senator Charles Schumer's Request

Lisa, as I mentioned yesterday, we believe the direct short-term impacts of the pandemic will increase our net loses over the next 18 months by (b)(5), (b) and over the longer term by (b)(5), (b)(3), . As such, (b)(5), (b)

Finally, because the focus of our ask right now is related to the direct impacts of the COVID-19 pandemic, you are correct that (b)(5), (b)(3), 410(c)(2) . However, we have made it clear that (b)(5), (b)(3), 410(c)(2)

We have also emphasized that without both our request related to the direct impacts of the COVID-19 pandemic, and the additional reforms which we need but which we are not seeking now, (b)(5), (b)(3), 410(c)(2)

From: Martin, Lisa (b)(3), 410(c)(2), (b)(6)

Subject: [EXTERNAL] RE: Response to Senator Charles Schumer's Request

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.

We’re trying to summarize your description of the USPS ask on the Hill, but want to be sure we’re accurate. Is this correct?

1. $25B in appropriated funds to cover COVID related expenses and losses
2. $25B grant for shovel ready infrastructure improvements, not necessarily attributable to COVID issues
3. Loan consolidation and forgiveness (forgiving $11B outstanding debt, and combining existing $15B Title 39 and $10B CARES Act borrowing authority and administration)

4. Does not include elimination of outstanding prefunding obligations.

Washington, D.C. 20515

The Honorable Mitch McConnell
Majority Leader
United States Senate
S-230, U.S. Capitol
Washington, D.C. 20510

The Honorable Steven Mnuchin
Secretary
United States Department of Treasury
1500 Pennsylvania Avenue NW
Washington, D.C. 20220

Dear Leader McCarthy, Majority Leader McConnell, and Secretary Mnuchin:

As you consider legislative priorities in any upcoming stimulus packages to address the coronavirus (COVID-19) pandemic, we urge you to incorporate provisions that will address the needs of the U.S. Postal Service (USPS). Postal management believes that volume and revenue may drop by 50% due to COVID-19. Now is not the time to debate reforms to USPS but rather to provide much needed relief to keep this important service operational.

In March, USPS worked with the Centers for Disease Control and Prevention (CDC) to send a mailer with critical information about COVID-19 and recommendations for every American to prevent the spread of the virus. The Food and Drug Administration (FDA) is currently working on a self-testing nasal swab that must, once available, be efficiently delivered by the Postal Service to 135 million households across the country.

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act, P.L. 116-137) provided $10 billion to the Treasury Department’s Federal Finance Bank (FFB). The FFB has tried to impose operational changes to the Postal Service for years and these authorities were augmented in the CARES Act. USPS has not received a taxpayer appropriation (other than for military/overseas voting and free mail for the blind) since the 1980s but this current crisis warrants that change.

We ask that you consider including the following provisions:

1. A “public service” appropriation of at least $25 billion to the Postal Service to alleviate some of the strain caused by the pandemic.

2. An authorization for a continued “public service” appropriation for the difference between USPS revenue and expenses for the duration of this public health crisis.

3. A mechanism to reimburse the Postal Service for any COVID-19 related leave pay provided by the Families First Coronavirus Response Act (P.L. 116-127).

4. Ensure equal treatment for postal employees in any legislation that authorizes, and funds hazard pay for other front-line workers exposed to health risks related to the COVID-19 virus. Such
legislation should cover postal workers, who face heightened exposure risks to the virus on a daily basis.

Millions of Americans depend on the Postal Service throughout their daily lives but especially during the coronavirus pandemic USPS is serving an important role. Any interruption to service could be detrimental not only to USPS but also to our constituents across the country.

Sincerely,

Brian Fitzpatrick

Essential Service Provider Letter

**Law Enforcement Official**: The bearer of this letter with an accompanying U.S. Postal Service identification badge provides essential services of the federal government.

The Postal Service is continuing to fulfill its critical public service mission by accepting and delivering mail and packages in accordance with federal law. The Postal Service’s provision of mail and package delivery services is not affected by State and local government actions that are restricting commercial and personal activities in response to the COVID-19 pandemic, including the recent order or directive issued for the geographic areas under your jurisdiction.

This exemption includes the employees’ and contractors’ time traveling to and from their workplaces.

We are working closely with federal, state, and local health authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public.

Confirmation of this individual’s status as a Postal Service employee or contractor may be received by contacting the employee’s supervisor at [number].

Argued January 13, 2020 Decided April 14, 2020

No. 19-1026

UNITED PARCEL SERVICE, INC.,
PETITIONER

v.

POSTAL REGULATORY COMMISSION,
RESPONDENT

AMAZON.COM SERVICES, INC., ET AL.,
INTERVENORS

On Petition for Review of an Order
of the Postal Regulatory Commission

Kathleen M. Sullivan argued the cause for petitioner. With her on the briefs was Steig D. Olson.

Michael Shih, Attorney, U.S. Department of Justice, argued the cause for respondent. With him on the brief were Michael S. Raab, Attorney, David A. Trissell, General Counsel, Postal Regulatory Commission, Anne J. Siarnacki, Deputy General Counsel, and Reese T. Boone, Attorney.

Eric P. Koetting and Morgan E. Rehrig, Attorneys, U.S. Postal Service, Michael F. Scanlon, John Longstreth, and James Pierce Myers were on the brief for intervenors
Amazon.com Services, et al. in support of the Postal Regulatory Commission.

Before: HENDERSON and MILLET, Circuit Judges, and EDWARDS, Senior Circuit Judge.

Opinion for the Court filed by Senior Circuit Judge EDWARDS.

EDWARDS, Senior Circuit Judge: This case involves a petition for review filed by United Parcel Service, Inc. (“UPS”), challenging the Postal Regulatory Commission’s (“Commission”) Order Adopting Final Rules Relating to the Institutional Cost Contribution Requirement for Competitive Products, No. 4963, Dkt. No. RM2017-1 (P.R.C. Jan. 3, 2019) (“Order”), reprinted in Joint Appendix (“J.A.”) 515-712. The disputed Order modifies Commission regulations that are meant to “ensure that all [of the Postal Service’s] competitive products collectively cover what the Commission determines to be an appropriate share of the institutional costs of the Postal Service.” 39 U.S.C. § 3633(a)(3). In making this “appropriate share” determination under § 3633(a)(3), the Commission is obligated to “consider,” among other things, “the degree to which any costs are uniquely or disproportionately associated with any competitive products.” Id. § 3633(b). However, the Commission concluded that “there are no costs uniquely or disproportionately associated with competitive products that are not already attributed to those products under the Commission’s current cost attribution methodology” under § 3633(a)(2). Order at 28, J.A. 547.

The problem is that § 3633(a)(2) only requires the Commission to “ensure that each competitive product covers its costs attributable.” The term costs attributable is narrowly defined as “the direct and indirect postal costs attributable to [a
particular competitive] product through reliably identified causal relationships.” 39 U.S.C. § 3631(b). However, it is not at all clear that “uniquely or disproportionately associated” costs described under § 3633(b) include only those costs that are attributable “through reliably identified causal relationships.” And § 3633(b) makes it clear that “the Commission shall consider . . . the degree to which any costs are uniquely or disproportionately associated with any competitive products.” Id. § 3633(b) (emphasis added). The Commission’s Order fails to explain why these seemingly distinct statutory phrases cover the same costs, and further elides the requirements of § 3633(a)(3) and (b) by suggesting that, to the extent these statutory phrases overlap, the Commission need not consider costs under § 3633(b) if it already accounted for them under § 3633(a)(2).

UPS argues that the Commission’s position is contrary to law because “the Order fails to consider . . . costs ‘uniquely or disproportionately associated with any competitive products,’ as the Act requires in section 3633(b).” Br. for Petitioner at 3. UPS also contends that the Commission erred in simply assuming, without adequate explanation, that “there are no institutional costs uniquely or disproportionately associated with competitive products.” Id. We agree.

Two aspects of the Commission’s Order require a remand. First, the Commission has not adequately explained how the statutory phrases “direct and indirect postal costs attributable to [a particular competitive] product through reliably identified causal relationships” and “costs . . . uniquely or disproportionately associated with any competitive products” can coincide. It is far from clear that these phrases have the same meaning. And the Commission has not demonstrated that, although they have distinct meanings, the phrases nonetheless coincide in application. Second, in focusing on costs attributed
to competitive products under § 3633(a)(2), the Commission failed to discharge its responsibility under § 3633(b) to “consider . . . the degree to which any costs are uniquely or disproportionately associated with any competitive products.” 39 U.S.C. § 3633(b) (emphasis added). The Commission must consider any costs made relevant by § 3633(b). It does not matter whether the Commission has arguably considered such costs in implementing its responsibilities under § 3633(a)(2). These two points are amplified in the opinion below.

The bottom line is that the Commission’s Order is arbitrary and capricious because it is “largely incomprehensible” with respect to the matters in issue. U.S. Postal Serv. v. PRC, 785 F.3d 740, 753 (D.C. Cir. 2015). Therefore, we are constrained to remand the case for further consideration. On remand, the Commission must adhere to the commands of the statute and address the costs specified in § 3633(b) in determining the “appropriate share” under § 3633(a)(3). Following reconsideration of this case, any Commission Order must be coherent and transparent, and it must satisfy the requirements of reasoned and reasonable decision-making. Id. at 744, 753. The present Order fails to meet these standards “because it fails to articulate a comprehensible standard,” id. at 753, regarding the meaning and application of § 3633(a)(3) and (b).

I. BACKGROUND

A. Statutory Background

The Postal Service offers both “market dominant” and “competitive” products. Market-dominant products, like first-class mail, are “those over which the ‘Postal Service exercises sufficient market power that it can effectively’ raise prices or decrease quality ‘without risk of losing a significant level of business to other firms offering similar products.’” UPS v.
Competitive products, on the other hand, like priority mail or parcel post, are “products over which the Postal Service faces meaningful market competition” from companies like UPS. *UPS v. PRC*, 890 F.3d at 1056 (internal quotation marks and citation omitted); see also 39 U.S.C. § 3631 (listing competitive products).

In 2006, Congress enacted the Postal Accountability and Enhancement Act, Pub. L. No. 109-435, 120 Stat. 3198 (2006) (“Accountability Act”), to ensure (among other things) that the Postal Service offers its competitive products on fair terms. See S. REP. NO. 108-318, at 14-16 (2004). To that end, the Accountability Act requires the Commission to promulgate regulations that ensure that the Postal Service is not “using revenues from market-dominant products subject to its monopoly power to defray costs competitive products would otherwise have to be priced to cover.” *UPS v. PRC*, 890 F.3d at 1055.

Specifically, § 3633(a) requires the Commission to issue three sets of regulations:

(a) In general.—The Postal Regulatory Commission shall, within 18 months after the date of enactment of this section, promulgate (and may from time to time thereafter revise) regulations to—

(1) prohibit the subsidization of competitive products by market-dominant products;

(2) ensure that each competitive product covers its costs attributable; and
(3) ensure that all competitive products collectively cover what the Commission determines to be an appropriate share of the institutional costs of the Postal Service.

39 U.S.C. § 3633(a)(1)-(3). As may be seen, the foregoing provisions refer to “costs attributable” and “institutional costs.” These terms are important in our consideration of the issues presented in this case.

As explained in the introduction to this opinion, the Accountability Act defines the term “costs attributable” as “the direct and indirect postal costs attributable to [a particular competitive] product through reliably identified causal relationships.” Id. § 3631(b). The Commission, in turn, interprets the term “institutional costs” to mean “residual costs” – that is, the Postal Service’s total costs minus its costs attributable under § 3633(a)(2). See UPS v. PRC, 890 F.3d at 1055-56, 1061-63 (explaining the relationship between “institutional costs” and “costs attributable”).

The Accountability Act calls for the Commission to periodically review its “appropriate share” determination under § 3633(a)(3). The statute also specifies that the Commission “shall consider” the following matters when it conducts that review:

(b) Review of minimum contribution.—Five years after the date of enactment of this section, and every 5 years thereafter, the Postal Regulatory Commission shall conduct a review to determine whether the institutional costs contribution requirement under subsection (a)(3) should be retained in its current form, modified, or eliminated. In making its determination, the Commission shall consider all
relevant circumstances, including the prevailing competitive conditions in the market, and the degree to which any costs are uniquely or disproportionately associated with any competitive products.

39 U.S.C § 3633(b).

In effect, then, the Accountability Act requires the Commission to establish a multi-part “price floor” for its competitive products. See UPS v. PRC, 890 F.3d at 1055-56. First, the Commission must issue regulations to prevent market-dominant products from subsidizing competitive products. Second, the price of “each competitive product” must be set high enough to cover the “direct and indirect postal costs attributable to such product through reliably identified causal relationships.” Third, the Commission must also ensure that “all competitive products collectively” cover what the Commission determines to be an “appropriate share” of the Postal Service’s institutional (i.e., unattributed) costs. The Commission, in determining what share is appropriate, “shall consider,” among other things, “the degree to which any costs are uniquely or disproportionately associated with any competitive products.”

B. The Commission’s 2016 Order Addressing § 3633(a)(2)

Commission’s cost-attribution method as “reasonable and reasonably explained.” Id. at 1069. Because the court’s 2018 decision thoroughly explains the Commission’s cost-attribution method, the decision provides important context for the questions at issue in this case.

First, the court’s 2018 decision explains several concepts that the Commission uses to sort out the Postal Service’s costs. To start, the decision explains that “the Commission distinguishes (albeit necessarily imperfectly) between ‘fixed costs,’ . . . which remain constant regardless of overall product volume, and ‘variable costs,’ . . . which vary with the Service’s production levels.” Id. at 1056 (citing 2016 Order at 6). Examples of fixed costs include executive salaries and product-specific fixed costs like advertising. See id. In addition, the decision explains that the Commission distinguishes between variable costs that are “volume-variable” – i.e., which vary directly with the marginal cost of the cheapest relevant unit and the total number of units, id. at 1057 (citing 2016 Order at 36 n.56) – and variable costs that are not “volume-variable” in this sense, which the Commission calls “inframarginal costs,” id. at 1058 (citing 2016 Order at 35). The concept of inframarginal costs is not entirely intuitive. The basic idea is that, thanks to economies of scale, marginal costs tend to decrease with volume, and the sum of the differences between the marginal cost of earlier, more expensive units and the marginal cost of the last, cheapest unit is the inframarginal cost. See id. at 1057-58; 2016 Order at 35-36.

Second, the court’s 2018 decision holds that the Commission’s decision to define “institutional costs” as “residual costs” – that is, as any costs not attributed to competitive products through reliably identified causal relationships under § 3633(a)(2) – was based on a permissible reading of the Accountability Act. UPS v. PRC, 890 F.3d at
1061-63. An important upshot of the Commission’s choice to treat institutional costs as “residual” is that the composition of the Postal Service’s institutional costs will (by definition) depend on how attributed costs are calculated. For example, if the Commission were to attribute to each competitive product its product-specific fixed costs and its volume-variable costs – which is what the Commission did until 2016 – then the Postal Service’s institutional costs would include all its other fixed costs and all of its inframarginal costs. See id. at 1056-58.

Third, the court’s 2018 decision upholds the Commission’s revised method for attributing costs under § 3633(a)(2). See id. at 1066-69. In short, the Commission adopted a method that enables it to attribute product-specific fixed costs, volume-variable costs, and some (but not all) inframarginal costs to each competitive product. See id. at 1060. The Commission is able to tie a portion of the Postal Service’s inframarginal costs to specific competitive products through “reliably identified causal relationships” by calculating the “costs that would disappear were the Postal Service to stop offering those products for sale.” Id. at 1055. This “incremental cost” method accounts for not only a “product’s share of volume-variable costs, but also the inframarginal costs that would be removed if the product were not to be provided.” Id. at 1059 (internal quotation marks omitted) (quoting 2016 Order App’x A at 19). In the Commission’s view, “because the portion of inframarginal costs included within a product’s incremental cost has a causal relationship with that product, the Accountability Act requires the Postal Service to attribute it.” Id. at 1059-60 (internal quotation marks omitted) (quoting 2016 Order at 55, 61). The court’s 2018 decision finds the Commission’s position reasonable and reasonably explained. Id. at 1069.
Fourth, the court’s 2018 decision notes that the Commission’s cautious cost-attribution method leaves some of the Postal Service’s inframarginal costs unattributed. See id. at 1060 (“All other costs, including all remaining inframarginal costs, remain classified as institutional.”). Indeed, the decision concludes that the Commission’s caution was reasonable, given the Accountability Act’s requirement that attributed costs have “reliably identified causal relationships” to competitive products. See id. at 1068. For example, the 2018 decision rejects the argument that the Commission’s approach was arbitrary and capricious for assuming that competitive products are responsible for only the lowest-cost units associated with a given activity. The decision reasons that “[a]tributing more than this amount . . . necessitates guesswork, and the Commission sensibly concluded that such guesswork was inconsistent with its statutory obligation to base attribution on only ‘reliably identified causal relationships.’” Id. (quoting 39 U.S.C. § 3631(b)).

It is clear, then, that the court’s 2018 decision in UPS v. PRC upholding the Commission’s cost-attribution method under § 3633(a)(2) leaves open important questions that provide context for understanding and assessing the Commission’s § 3633(a)(3) determination in this case. These questions include: Are some of the Postal Service’s institutional costs — and especially its unattributed inframarginal costs — still related in some meaningful way to competitive products, even if those costs cannot be attributed under § 3633(a)(2)? And if so — if, for instance, some of those institutional costs are “uniquely or disproportionately associated with competitive products,” 39 U.S.C. § 3633(b) — might they need to be accounted for when the Commission issues regulations under another provision of the Accountability Act?
C. The Commission’s Disputed Order in this Case

On January 3, 2019, the Commission issued the Order modifying its “appropriate share” determination under § 3633(a)(3) that is the subject of the dispute in this case. In the past, the Commission had determined that “all competitive products collectively” must cover at least 5.5% of the Postal Service’s institutional costs. See Order at 4-5, J.A. 523-24 (summarizing the Commission’s 2007 and 2012 orders). In the 2019 Order, however, the Commission decided that the “appropriate share” of the Postal Service’s institutional costs to be covered by “all competitive products collectively” should be set using a dynamic formula. In short, the Commission’s formula relies on two primary variables: the “Competitive Contribution Margin” and the “Competitive Growth Differential.” These variables are meant to represent the Postal Service’s market power and market position. See id. at 19-28, J.A. 538-47. The Commission intends to use the formula “to annually update the appropriate share based on prevailing competitive conditions in the market and other relevant circumstances.” Id. at 19, J.A. 538.

For our purposes, however, the details of the Commission’s formula-based approach are not critical. Instead, our focus in this case is on whether the Commission, in making its determination, adequately discharged its obligation under § 3633(b) to “consider all relevant circumstances, including the prevailing competitive conditions in the market, and the degree to which any costs are uniquely or disproportionately associated with any competitive products.” Therefore, this background section is similarly focused on the Commission’s § 3633(b) analysis and in particular on the Commission’s “consider[ation of] . . . the degree to which any costs are uniquely or disproportionately associated with any competitive products.”
In a section of its Order titled “Connection to Section 3633(b) Criteria,” the Commission recited the factors that the Accountability Act says it “shall consider,” and then explained its position on costs “uniquely or disproportionately associated with” competitive products:

The Commission has repeatedly found that there are no costs uniquely or disproportionately associated with competitive products that are not already attributed to those products under the Commission’s current cost attribution methodology. As a result, the formula-based approach does not separately account for such costs.

Order at 28-29, J.A. 547-48 (citations omitted).

The Commission finds that there are no costs uniquely or disproportionately associated with competitive products that are not already attributed to competitive products. Under the Commission’s methodology, any cost that is uniquely or disproportionately associated with any competitive product is identified as an attributable cost because it exhibits a reliably identifiable causal relationship with
a specific competitive product. With regard to costs that are disproportionately associated with competitive products, the Commission’s cost attribution methodology identifies relationships between costs and cost drivers, which include mail characteristics such as weight and shape (e.g., letters or parcels). . . . In this way, the costs attributed to products reflect any disproportionate association of those costs with any specific products (including any competitive products).

Under the Commission’s methodology, the Commission also classifies any cost that is uniquely associated with any product (including any competitive product) as attributable to that product. These costs are often referred to as product-specific costs. For example, advertisements for a specific product and supplies for money orders are unique costs attributed to specific products under the Commission’s methodology.

. . . .

For the reasons discussed above, the Commission concludes that its costing methodology already accounts for the “the degree to which any costs are uniquely or disproportionately associated with any competitive products.” To the extent that any costs can be attributed to specific competitive products, they are already distributed under the Commission’s current costing methodology and are not included in the institutional costs of the Postal Service.

Initial Notice at 43-45, J.A. 147-49; see also Revised Notice at 52-53, J.A. 304-05 (summarizing this same point).
Late, in response to comments from UPS and others, the Commission provided a succinct summary of the position it took in its Initial Notice. See Order at 138-162, J.A. 657-81.

In [the Initial Notice], the Commission found that there are no costs uniquely or disproportionately associated with competitive products that are not already attributed to those products. This is because all costs that are uniquely or disproportionately associated with competitive products exhibit a reliably identified causal relationship with a specific competitive product or group of products and are therefore attributed. The Commission described “unique” costs as product-specific costs and determined that any cost that is uniquely associated with a competitive product is attributed to that product through a reliably identified causal relationship. . . . In addition, the Commission found that any cost disproportionately associated with a competitive product is attributed to that product through the cost methodology’s use of cost drivers. . . . In this way, the costs attributed products reflect any disproportionate association of those costs with specific products. As a result, the Commission determined that both types of costs are attributed to the competitive products that cause them.

Order at 138-39, J.A. 657-58 (citing Initial Notice at 43-44).

Finally, in response to UPS’s comment suggesting that the Commission’s analysis mistakenly conflates the “associated with” standard and the “reliably identified causal relationships” standard, the Commission concluded that “UPS overlooks key terms in section 3633(b), as well as the context of the statutory
scheme as a whole.” Order at 143, J.A. 662. The Commission emphasized the “degree of flexibility . . . inherent in the appropriate share provisions of section 3633” and the lack of any mechanical relationship between the Commission’s consideration of the statutory factors and the Commission’s ultimate determination. Id. at 144, J.A. 663. The Commission continued:

For the relevant factor at issue, “the degree to which any costs are uniquely or disproportionately associated with any competitive products,” UPS focuses on only a portion of the statutory language—“disproportionately associated.” However, in reading the relevant factor in its entirety, the use of the words “degree” and “any” plainly contemplate that there may be no uniquely or disproportionately associated competitive product costs. Congress does not require costs to be found; only for the Commission to “consider” whether “any” exist. Nothing in section 3633(b) prevents the Commission from concluding as it has—that all costs uniquely or disproportionately associated with competitive products are, in fact, captured by the costing methodology it currently employs pursuant to section 3633(a)(2).

Order at 144, J.A. 663.

In short, the Commission’s position appears to be that the statutory phrase “costs . . . uniquely or disproportionately associated with any competitive products” is no broader than the phrase “direct and indirect postal costs attributable to [a particular competitive] product through reliably identified causal relationships.” And the Commission appears to base that conclusion on the assumption that costs are uniquely or
disproportionately associated with competitive products only if competitive products can be reliably said to cause such costs.

II. ANALYSIS

A. Standard of Review

“Because the Congress expressly delegated to the Commission responsibility to implement [the Accountability Act], we review its interpretation’ of that statute under the standards enunciated in Chevron and its progeny.” U.S. Postal Serv. v. PRC, 785 F.3d 740, 750 (D.C. Cir. 2015) (quoting U.S. Postal Serv. v. PRC, 640 F.3d 1263, 1266 (D.C. Cir. 2011)).

Under Chevron’s First Step, if “Congress has directly spoken to the precise question at issue . . ., that is the end of the matter; for the court, as well as the agency, must give effect to the unambiguously expressed intent of Congress.” If the statute is ambiguous, Chevron’s Second Step then requires us to consider whether the Commission has acted pursuant to delegated authority and, if so, whether its interpretation of the statute is “permissible.”

In deciding whether the Commission’s Order is arbitrary and capricious, we are “reluctan[t] to interfere with [the Commission’s] reasoned judgments about technical questions within its area of expertise.” UPS v. PRC, 890 F.3d 1053, 1066 (D.C. Cir. 2018) (internal quotation marks omitted) (quoting All. of Nonprofit Mailers v. PRC, 790 F.3d 186, 197 (D.C. Cir. 2015)). At the same time, the Commission must adequately “consider” all the factors that the Accountability Act makes relevant, see Lindeen v. SEC, 825 F.3d 646, 657 (D.C. Cir. 2016), and the Commission’s decision-making must be comprehensible, see U.S. Postal Serv. v. PRC, 785 F.3d 740, 753 (D.C. Cir. 2015); Glob. Tel*Link v. FCC, 866 F.3d 397, 413 (D.C. Cir. 2017).

B. The Commission’s Disputed Interpretation and Application of § 3633(a)(3)

The dispositive question before the court in this case is whether the Commission, in reviewing its appropriate share determination, adequately discharged its statutory obligation to “consider” the “degree to which any costs are uniquely or disproportionately associated with any competitive products.” We hold that the Commission failed to do this and, therefore, we are constrained to remand the case.

We do not mean to render any decision on what the appropriate share determination under § 3633(a)(3) should be. That is for the Commission to determine in the first instance. At this point, however, the Commission’s interpretation and application of § 3633(a)(3) and (b) are incomprehensible and, thus, unreasonable. No deference is due to the Commission’s current position because the disputed Order fails to apply the relevant terms of the statute, and it offers no reasoned basis for this failure.
As detailed above, the Commission’s position appears to be that the term “costs . . . uniquely or disproportionately associated with any competitive products” in § 3633(b) is no broader than – and indeed may coincide with – the term “direct and indirect postal costs attributable to [a particular competitive] product through reliably identified causal relationships,” which defines “costs attributable” in § 3633(a)(2). To reach that conclusion, the Commission assumed that “all costs that are uniquely or disproportionately associated with competitive products exhibit a reliably identified causal relationship with a specific competitive product or group of products and are therefore attributed.” Order at 138, J.A. 657. The Commission thus reasons that none of the Postal Service’s institutional costs – including, apparently, its “remaining inframarginal costs,” UPS v. PRC, 890 F.3d at 1060 – are uniquely or disproportionately associated with its competitive products in the sense intended in § 3633(b). This leads the Commission to conclude that there are no costs for it to “consider” under § 3633(b). See, e.g., Order at 28-29, J.A. 547-48. The Commission’s analysis defies reasoned decision-making.

As noted at the outset of this opinion, there are two significant problems with the Commission’s position. First, the Commission has not adequately explained how the statutory phrases “direct and indirect postal costs attributable to [a particular competitive] product through reliably identified causal relationships,” 39 U.S.C. § 3631(b), and “costs . . . uniquely or disproportionately associated with any competitive products,” id. § 3633(b), can effectively coincide. Second, in focusing narrowly on costs attributed to competitive products under § 3633(a)(2), the Commission failed to discharge its responsibility under § 3633(b) to “consider . . . the degree to which any costs are uniquely or disproportionately associated
with any competitive products.” *Id.* § 3633(b) (emphasis added). We elaborate on these points in turn.

1. **The Commission’s Interpretation of Costs “Uniquely or Disproportionately Associated with Competitive Products” Under § 3633(b)**

The Commission’s current analysis of the relationship between costs “attributed through reliably identified causal relationships” and costs “uniquely or disproportionately associated with” is incomprehensible. In the passages from the Commission’s Order reprinted above, the Commission assumes that the Postal Service’s costs can be “uniquely or disproportionately associated with” competitive products only if there is a reliably identified causal relationship between those costs and competitive products. *See* Initial Notice at 43-44, J.A. 147-48; Order at 138-39, 657-58. In its brief to this court and at oral argument, however, the Commission’s counsel suggests that the Commission gave the phrase “uniquely or disproportionately associated with” a distinct interpretation, and only then proceeded to conclude that there are no costs in that independent category that are not already attributed to competitive products under § 3633(a)(2). *See* Br. for Respondent at 29-32; Tr. of Oral Argument at 54-55. It is an understatement to say that one is hard-pressed to understand what the Commission means to say regarding the meaning of § 3633(b).

At this point, we cannot credit either one of the foregoing interpretations of the Accountability Act. To start, the Commission cannot simply *assume* that the “uniquely or disproportionately associated with” standard is subsumed by the “reliably identified causal relationships” standard. That would impermissibly conflate the language of § 3633(a)(2) – which incorporates the definition of “costs attributed” from
§ 3631(b) – with the evidently distinct language of § 3633(b). See BP Energy Co. v. FERC, 828 F.3d 959, 968 (D.C. Cir. 2016) (“Even under the most deferential standard, an agency cannot read statutory provisions out of existence but must interpret statutes ‘so that effect is given to all its provisions . . . [and] no part will be inoperative or superfluous, void or insignificant.’” (alteration in original) (quoting Corley v. United States, 556 U.S. 303, 314 (2009))). Instead, the Commission must explain why these two statutory phrases have the same practical reach despite the use of different language.

As noted above, the Commission attempted to offer such an explanation in its brief to this court. The Commission belatedly argues that it did not “equate[]” the two statutory phrases “as an interpretative matter.” Br. for Respondent at 34. Rather, the Commission now contends that it gave independent meaning to the statutory terms “uniquely . . . associated with” and “disproportionately associated with” using the ordinary tools of statutory interpretation. See id. at 29-34; Tr. of Oral Argument at 54-55. Then, according to counsel, the Commission concluded that “all ‘uniquely associated’ costs and all ‘disproportionately associated’ costs satisfy the Commission’s independent definition of the ‘costs attributable’ to a competitive product.” Br. for Respondent at 31. This line of argument is hard to discern in what the Commission actually said, and it is somewhat hard to fathom on its own terms. But if that is the Commission's view, it must spell it out.

In any event, as things stand now, “we simply cannot comprehend the [Commission’s] reasoning” about the meaning and application of § 3633(b). Glob. Tel*Link v. FCC, 866 F.3d 397, 413 (D.C. Cir. 2017). Therefore, the Commission’s Order is neither reasoned nor reasonable. “At its core, the Commission’s Order is arbitrary and capricious because it fails
to articulate a comprehensible standard . . . .” U.S. Postal Serv. v. PRC, 785 F.3d 740, 753 (D.C. Cir. 2015). “[W]e owe no deference to an agency determination that is ‘largely incomprehensible.’” Id. (quoting Coburn v. McHugh, 679 F.3d 924, 926 (D.C. Cir. 2012)). The bottom line is that the Commission has not adequately explained why the statutory phrases at issue here have similar meanings, nor has it demonstrated that these statutory categories, even if distinct in meaning, nevertheless coincide in application. Therefore, the Commission’s application of § 3633(a)(3) and (b) was arbitrary and capricious and must be remanded.

2. The Commission’s Consideration of “Any” Such Costs Under § 3633(b)

A second problem with the disputed Order is that, in focusing its analysis on costs attributed to competitive products under 39 U.S.C. § 3633(a)(2), the Commission failed to “consider . . . the degree to which any costs are uniquely or disproportionately associated with any competitive products” as required by 39 U.S.C. § 3633(b). As the plain meaning of that provision suggests, the Accountability Act clearly requires the Commission to consider any costs uniquely or disproportionately associated with competitive products at the time it reviews its appropriate share determination under § 3633(a)(3). This includes, but is not limited to, any costs fitting that description that the Commission may have already considered when it promulgated regulations under § 3633(a)(1) or § 3633(a)(2).

The record in this case indicates that the Commission did not follow this statutory mandate. Instead, the Commission, relying on its inadequately explained interpretation of the Accountability Act, focused narrowly on the costs it had considered – and attributed – in promulgating regulations under
§ 3633(a)(2). At oral argument, counsel for the Commission suggested that by piecing together the Commission’s responses to various comments, we could find that the Commission did indeed consider a broader class of costs. Tr. of Oral Argument at 75; see also Br. for Respondent at 35-38. Even assuming that is right, however, the Commission’s Order does not make it clear or comprehensible, and we cannot fill in the blanks in the Commission’s reasoning. The simple point here is that the Commission erred in concluding that it had discharged its responsibility to consider any costs uniquely or disproportionately associated with competitive products by virtue of the fact that it had already considered these costs when setting the price floor under § 3633(a)(2).

An agency Order that is at odds with the requirements of the applicable statute cannot survive judicial review. See, e.g., Michigan v. EPA, 135 S. Ct. 2699, 2706 (2015). “An agency’s failure to consider and address during rulemaking ‘an important aspect of the problem’ renders its decision arbitrary and capricious. A ‘statutorily mandated factor, by definition, is an important aspect of any issue before an administrative agency . . . .’” Mozilla Corp. v. FCC, 940 F.3d 1, 60 (D.C. Cir. 2019) (per curiam) (first quoting Motor Vehicle Mfrs. Ass’n v. State Farm Mut. Auto. Ins. Co., 463 U.S. 29, 43 (1983); then quoting Pub. Citizen v. Fed. Motor Carrier Safety Admin., 374 F.3d 1209, 1216 (D.C. Cir. 2004)). On the record before us, the Commission’s treatment of § 3633(b) cannot survive judicial review. Therefore, we are constrained to remand the Order to the Commission for further consideration.

On remand, the Commission must consider all costs uniquely or disproportionately associated with competitive products in setting the appropriate share, even if it has already accounted for those costs under § 3633(a)(1) and (a)(2).
Furthermore, the Commission should fully address the issue left open in the court’s 2018 decision in *UPS v. PRC*. The court in that decision recognized that, because the costs attributed test under § 3633(a)(2) is conservative, there may be institutional costs that are “uniquely or disproportionately associated with competitive products,” even though they cannot be said to stand in “reliably identified causal relationships” with them. The Commission’s Order in this case does not address this.

In addition, the Commission must explain the relevance (if any) of costs it may have considered in implementing § 3633(a)(1). At oral argument, counsel for the Commission suggested that the Commission might not have to further consider costs uniquely or disproportionately associated with competitive products under § 3633(b) because it had already considered them pursuant to § 3633(a)(1). Tr. of Oral Argument at 43-44, 48, 54-55. However, this possibility is offered as nothing more than a fleeting suggestion in the Commission’s Order and its brief to the court. *Compare* Order at 144, J.A. 663, and Br. for Respondent at 19 (focusing only on § 3633(a)(2)), *with* Order at 160 n.294, J.A. 679 n.294, and Br. for Respondent at 36 (mentioning the Commission’s test under § 3633(a)(1)). If this point is somehow critical to the Commission’s analysis, the Commission must make that clear in the first instance. *See* SEC v. *Chenery Corp.*, 318 U.S. 80, 94-95 (1943).

We do not mean for these examples to exhaust the issues that the Commission must address on remand, only to illustrate some of what a fuller “consider[ation]” of the relevant costs will involve.

***
In sum, the Commission must address the issues highlighted above before we can say whether its formula-based approach to determining the appropriate share under § 3633(a)(3) is permissible and reasonable. On remand, the Commission might decide to revise its judgment regarding the “appropriate share” under § 3633(a)(3). Indeed, at oral argument, counsel for the Commission conceded that the “floor” established under § 3633(a)(3) might need to be adjusted if the Commission found any costs uniquely or disproportionately associated with competitive products. Tr. of Oral Argument at 49-50. It is also possible, however, that the Commission might decide against revising its bottom-line judgment, given the other factors the Commission must consider under § 3633(b) and the latitude that the text affords the Commission in making a final determination.

We take no position on this matter. It is not for this court to say that the Commission must account for costs in any specific way under § 3633(b) or that the Commission must make any particular “appropriate share” determination under § 3633(a)(3). Rather, the judgment of the court is that, on remand, the Commission must consider all the costs referenced under § 3633(b), as the Accountability Act clearly commands. And any decision that the Commission reaches regarding the meaning and application of § 3633(b) in connection with the “appropriate share” determination under § 3633(a)(3) must be consistent with the terms of the statute, must be comprehensible, and must otherwise satisfy the requirements of reasoned decision-making.

III. CONCLUSION

For the reasons set forth above, we grant UPS’s petition for review and remand the case to the Commission for further consideration consistent with this opinion.
The United States Postal Service  
Mission Statement adopted by the Board of Governors on April 1, 2020

A. Our History

The United States Postal Service has a storied history as the institution of our Government guaranteeing safe and secure communication among and between the Government and the American people.

Many are familiar with our history, which began with the Second Continental Congress and Benjamin Franklin in 1775 and continued in 1787 when the Postal Clause of the U.S. Constitution empowered Congress to establish post offices and post roads. Congress exercised those powers with the passage of The Post Office Act of 1792, which made the Postal Service a permanent fixture of the Federal Government. The Act included provisions to facilitate freedom of the press, the privacy of personal correspondence, and expand the nation’s physical infrastructure, all vital to our nation’s growth and prosperity.

These principles and objectives endure. While radio, television and the Internet have irrevocably altered our information-gathering habits, postal correspondence remains the most secure and resilient form of communication, providing the American People with a delivery infrastructure vital to our National Security.

The USPS retains the largest physical and logistical infrastructure of any non-military government institution, providing an indispensable foundation supporting an ever-changing and evolving nationwide communication network. Capitalizing on its expertise in scheduling and high-volume sorting, the USPS also serves a vital role enabling digital commerce.

B. Our Mission

- To serve the American people and, through the universal service obligation, bind our nation together by maintaining and operating our unique, vital and resilient infrastructure.
• To provide trusted, safe and secure communications and services between our Government and the American people, businesses and their customers, and the American people with each other.

• To serve all areas of our nation, making full use of evolving technologies.

C. Carrying Out Our Mission

To meet this Mission we will:

• Remain an integral part of the United States Government, providing all Americans with universal and open access to our unrivalled delivery and storefront network.

• Maintain and enhance our reputation and role as a trusted face of the federal government in every community and provide all levels of government with access to our network and services.

• Provide frequent, reliable, safe and secure delivery of mail, packages and other communications to all Americans.

• Use technology, innovation and where appropriate private sector partnerships, to optimize and adapt our network, operations and business model to meet the changing needs of our customers and delivery recipients, while maintaining our core mission.

• Operate in a modern, efficient and effective manner that allows us to minimize what we charge for our services, consistent with meeting, in a fair way, our obligations to our current and retired employees and other stakeholders.

• Remain an employer of choice, able to attract retain and develop high quality employees that possess the skills necessary to excel in a rapidly changing business environment
Ms. Megan J. Brennan  
Postmaster General and Chief Executive Officer  
United States Postal Service  
475 L’Enfant Plaza, S.W.  
Room 4012  
Washington, D.C. 20260

Dear Ms. Brennan:

We write with urgent concern about the immediate financial condition and needs of the U.S. Postal Service in light of the coronavirus emergency and resulting decline in economic activity. This crisis has jeopardized the Postal Service’s ability to continue providing essential service to every American. We ask that you provide information as soon as possible to ensure that Congress and the public are fully informed about this matter.

On March 20, the Postal Service notified our Committees that due to the coronavirus crisis, it will \((b)(3), 410(c)(2)\) provided revenue projections indicating that it could lose up to \((b)(3), 410(c)\) in revenues this fiscal year. During the coronavirus pandemic, the Postal Service is incurring additional costs as it continues to provide safe deliveries and services to every member of the public, including cleaning and disinfecting facilities, purchasing critical supplies, and training staff on new procedures, in addition to regular operating costs. Meanwhile, the Postal Service continues to provide universal service in every community across the country, delivering medications, emergency information, home supplies, and more.

On March 27, Congress passed the CARES Act (P.L. 116-136), which authorizes the Department of the Treasury to provide a $10 billion loan to the Postal Service “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The Secretary of the Treasury retains the discretion to make that loan and set terms, which must be mutually agreed upon by the Postal Service.

We strongly urge the Postal Service to assert its proper authorities with regard to the finances and management of the Postal Service and ensure that this loan is made in a timely manner and under conditions acceptable to the Postal Service.

Given the urgent need to fully understand the Postal Service’s financial condition, we ask that you produce the following information by April 6, 2020:

1. The most recent financial estimates regarding the Postal Service’s finances through the end of the fiscal year, under expected economic conditions, including: projected revenue, expenses, emergency expenses, and cash-on-hand. Such
estimates should include information about the attendant economic assumptions. We request that you send a copy of the estimates that will be used in discussions with the Treasury Department about borrowing, and continue to send updated estimates as necessary;

2. A clear public statement from the Postal Service regarding its expected financial condition, to inform its customers about its revenues, expenses, and expected solvency; and

3. A statement of the amount of funds the Postal Service intends to request from the Treasury Department under the CARES Act, including the terms requested by the Postal Service for the authorized loan.

Thank you for your attention to this urgent matter. Please direct all questions and correspondence to our staffs at (202) 225-5051 and (202) 224-2627,

Sincerely,

Carolyn B. Maloney

    The Honorable Jody B. Hice, Ranking Member
    House Subcommittee on National Security
Responding to Committee Document Requests

1. In complying with this request, produce all responsive documents that are in your possession, custody, or control, whether held by you or your past or present agents, employees, and representatives acting on your behalf. Produce all documents that you have a legal right to obtain, that you have a right to copy, or to which you have access, as well as documents that you have placed in the temporary possession, custody, or control of any third party.

2. Requested documents, and all documents reasonably related to the requested documents, should not be destroyed, altered, removed, transferred, or otherwise made inaccessible to the Committees.

3. In the event that any entity, organization, or individual denoted in this request is or has been known by any name other than that herein denoted, the request shall be read also to include that alternative identification.

4. The Committees’ preference is to receive documents in electronic form (i.e., CD, memory stick, thumb drive, or secure file transfer) in lieu of paper productions.

5. Documents produced in electronic format should be organized, identified, and indexed electronically.

6. Electronic document productions should be prepared according to the following standards:
   
a. The production should consist of single page Tagged Image File (“TIF”), files accompanied by a Concordance-format load file, an Opticon reference file, and a file defining the fields and character lengths of the load file.

b. Document numbers in the load file should match document Bates numbers and TIF file names.

c. If the production is completed through a series of multiple partial productions, field names and file order in all load files should match.

d. All electronic documents produced to the Committees should include the following fields of metadata specific to each document, and no modifications should be made to the original metadata:

   BEGDOC, ENDDOC, TEXT, BEGATTACH, ENDATTACH, PAGECOUNT, CUSTODIAN, RECORDTYPE, DATE, TIME, SENTDATE, SENTTIME, BEGINDATE, BEGINTIME, ENDDATE, ENDTIME, AUTHOR, FROM, CC, TO, BCC, SUBJECT, TITLE, FILENAME, FILEEXT, FILESIZE, DATECREATED, TIMECREATED, DATELASTMOD, TIMELASTMOD,
7. Documents produced to the Committees should include an index describing the contents of the production. To the extent more than one CD, hard drive, memory stick, thumb drive, zip file, box, or folder is produced, each should contain an index describing its contents.

8. Documents produced in response to this request shall be produced together with copies of file labels, dividers, or identifying markers with which they were associated when the request was served.

9. When you produce documents, you should identify the paragraph(s) or request(s) in the Committees’ letter to which the documents respond.

10. The fact that any other person or entity also possesses non-identical or identical copies of the same documents shall not be a basis to withhold any information.

11. The pendency of or potential for litigation shall not be a basis to withhold any information.

12. In accordance with 5 U.S.C. § 552(d), the Freedom of Information Act (FOIA) and any statutory exemptions to FOIA shall not be a basis for withholding any information.

13. Pursuant to 5 U.S.C. § 552a(b)(9), the Privacy Act shall not be a basis for withholding information.

14. If compliance with the request cannot be made in full by the specified return date, compliance shall be made to the extent possible by that date. An explanation of why full compliance is not possible shall be provided along with any partial production.

15. In the event that a document is withheld on the basis of privilege, provide a privilege log containing the following information concerning any such document: (a) every privilege asserted; (b) the type of document; (c) the general subject matter; (d) the date, author, addressee, and any other recipient(s); (e) the relationship of the author and addressee to each other; and (f) the basis for the privilege(s) asserted.

16. If any document responsive to this request was, but no longer is, in your possession, custody, or control, identify the document (by date, author, subject, and recipients), and explain the circumstances under which the document ceased to be in your possession, custody, or control.

17. If a date or other descriptive detail set forth in this request referring to a document is inaccurate, but the actual date or other descriptive detail is known to you or is otherwise apparent from the context of the request, produce all documents that would be responsive as if the date or other descriptive detail were correct.
18. This request is continuing in nature and applies to any newly-discovered information. Any record, document, compilation of data, or information not produced because it has not been located or discovered by the return date shall be produced immediately upon subsequent location or discovery.

19. All documents shall be Bates-stamped sequentially and produced sequentially.

20. Two sets of each production shall be delivered, one set to the Majority Staff and one set to the Minority Staff. When documents are produced to the Committee on Oversight and Reform, production sets shall be delivered to the Majority Staff in Room 2157 of the Rayburn House Office Building and the Minority Staff in Room 2105 of the Rayburn House Office Building. When documents are produced to the Committee on Financial Services, production sets shall be delivered to the Majority Staff in Room 2129 of the Rayburn House Office Building and the Minority Staff in Room 4340 of the O’Neill House Office Building. When documents are produced to the Permanent Select Committee on Intelligence, production sets shall be delivered to Majority and Minority Staff in Room HVC-304 of the Capital Visitor Center.

21. Upon completion of the production, submit a written certification, signed by you or your counsel, stating that: (1) a diligent search has been completed of all documents in your possession, custody, or control that reasonably could contain responsive documents; and (2) all documents located during the search that are responsive have been produced to the Committee.

Definitions

1. The term “document” means any written, recorded, or graphic matter of any nature whatsoever, regardless of how recorded, and whether original or copy, including, but not limited to, the following: memoranda, reports, expense reports, books, manuals, instructions, financial reports, data, working papers, records, notes, letters, notices, confirmations, telegrams, receipts, appraisals, pamphlets, magazines, newspapers, prospectuses, communications, electronic mail (email), contracts, cables, notations of any type of conversation, telephone call, meeting or other inter-office or intra-office communication, bulletins, printed matter, computer printouts, teletypes, invoices, transcripts, diaries, analyses, returns, summaries, minutes, bills, accounts, estimates, projections, comparisons, messages, correspondence, press releases, circulars, financial statements, reviews, opinions, offers, studies and investigations, questionnaires and surveys, and work sheets (and all drafts, preliminary versions, alterations, modifications, revisions, changes, and amendments of any of the foregoing, as well as any attachments or appendices thereto), and graphic or oral records or representations of any kind (including without limitation, photographs, charts, graphs, microfiche, microfilm, videotape, recordings and motion pictures), and electronic, mechanical, and electric records or representations of any kind (including, without limitation, tapes, cassettes, disks, and recordings) and other written, printed, typed, or other graphic or recorded matter of any kind or nature, however produced or reproduced, and whether preserved in writing, film, tape, disk, videotape, or otherwise. A document bearing any notation not a
part of the original text is to be considered a separate document. A draft or non-identical copy is a separate document within the meaning of this term.

2. The term “communication” means each manner or means of disclosure or exchange of information, regardless of means utilized, whether oral, electronic, by document or otherwise, and whether in a meeting, by telephone, facsimile, mail, releases, electronic message including email (desktop or mobile device), text message, instant message, MMS or SMS message, message application, or otherwise.

3. The terms “and” and “or” shall be construed broadly and either conjunctively or disjunctively to bring within the scope of this request any information that might otherwise be construed to be outside its scope. The singular includes plural number, and vice versa. The masculine includes the feminine and neutral genders.

4. The term “including” shall be construed broadly to mean “including, but not limited to.”

5. The term “Company” means the named legal entity as well as any units, firms, partnerships, associations, corporations, limited liability companies, trusts, subsidiaries, affiliates, divisions, departments, branches, joint ventures, proprietorships, syndicates, or other legal, business or government entities over which the named legal entity exercises control or in which the named entity has any ownership whatsoever.

6. The term “identify,” when used in a question about individuals, means to provide the following information: (a) the individual’s complete name and title; (b) the individual’s business or personal address and phone number; and (c) any and all known aliases.

7. The term “related to” or “referring or relating to,” with respect to any given subject, means anything that constitutes, contains, embodies, reflects, identifies, states, refers to, deals with, or is pertinent to that subject in any manner whatsoever.

8. The term “employee” means any past or present agent, borrowed employee, casual employee, consultant, contractor, de facto employee, detailee, fellow, independent contractor, intern, joint adventurer, loaned employee, officer, part-time employee, permanent employee, provisional employee, special government employee, subcontractor, or any other type of service provider.

9. The term “individual” means all natural persons and all persons or entities acting on their behalf.
Board of Governors Announces Selection of Louis DeJoy
to Serve as Nation’s 75th Postmaster General

WASHINGTON – The Board of Governors of the United States Postal Service today announced its unanimous selection of Louis DeJoy to serve as the 75th Postmaster General of the United States and Chief Executive Officer of the world’s largest postal organization. DeJoy is an accomplished business executive with more than 35 years of experience. As Chairman and CEO of New Breed Logistics, DeJoy spent decades in collaboration with the U.S. Postal Service, Boeing, Verizon, Disney, United Technologies and other public and private companies to provide supply chain logistics, program management and transportation support. He is expected to begin serving in his new role effective June 15th.

“Louis DeJoy understands the critical public service role of the United States Postal Service, and the urgent need to strengthen it for future generations,” said Robert M. (Mike) Duncan, chair of the Board of Governors. “The Board appreciated Louis’ depth of knowledge on the important issues facing the Postal Service and his desire to work with all of our stakeholders on preserving and protecting this essential institution.”

DeJoy becomes the fifth Postmaster General to join the institution from the private sector since the Postal Service became an independent establishment within the Executive Branch in 1971.

“Having worked closely with the Postal Service for many years, I have a great appreciation for this institution and the dedicated workers who faithfully execute its mission. I look forward to working with the supporters of the Postal Service in Congress and the Administration to ensure the Postal Service remains an integral part of the United States government. Postal workers are the heart and soul of this institution, and I will be honored to work alongside them and their unions. It will be an incredible honor to serve as Postmaster General, and I commit myself to upholding the Postal Service’s cherished role in our nation,” said Mr. DeJoy.

As Chairman and CEO of New Breed Logistics, Inc., he transformed a small, family owned transportation company with 10 employees into a nationwide provider of highly engineered, technology-driven, contract logistics solutions employing more than 9,000 people. New Breed Logistics was a contractor to the U.S. Postal Service for more than 25 years, supplying the Postal Service with logistics support for multiple processing facilities. The company received Quality Supplier Awards from the Postal Service in 1995, 1996, 1997 and 1998.

In 2014, New Breed merged with XPO Logistics, with DeJoy serving as CEO of XPO Logistics’ supply chain business in the Americas before retiring in December 2015 as CEO and joining the XPO Logistics board of directors, where he served until 2018.
DeJoy is a member of the Board of Trustees at Elon University in North Carolina and the Fund for American Studies in Washington, DC. He received his Bachelor of Business Administration from Stetson University. He currently resides in Greensboro, North Carolina with his wife, Dr. Aldona Wos.

DeJoy’s appointment comes upon the retirement of Megan Brennan, the nation’s 74th Postmaster General, who announced her intent to step down in October 2019. The Board of Governors then began an extensive nationwide search, employing a national executive search firm to conduct the search with additional advisory services from Chelsea Partners. In the ensuing months, the Governors reviewed the records of more than two hundred candidates for the position before narrowing the list to more than fifty candidates to undergo substantial vetting. Subsequently, the Governors interviewed more than a dozen candidates in first round interviews, and invited seven candidates for follow-up interviews. A narrow list of finalists then underwent a final vetting process before the Governors made their decision.

# # #
The undersigned companies, trade associations and consumer advocacy organizations believe it is imperative to save the United States Postal Service. We thank you all for your leadership as the nation confronts this pandemic, and urge you to provide enough funding to enable USPS to survive and serve its customers, the American people, during this exceptionally trying time.

We, along with the postal-reliant industry that generates $1.6 trillion in sales and employs 7.3 million workers, have long supported a self-sufficient Postal Service. But no business entity can withstand a 50% or more externally-imposed drop in business and revenues, as USPS projects due to COVID-19, and long survive. That is why emergency funding must be provided now.

The American people have been reminded during this pandemic of just how fundamental to American life the Postal Service still is. USPS is delivering prescriptions, household and business staples, groceries, Personal Protective Equipment, greeting cards and personal correspondence to bridge social distancing, Paycheck Protection Program, Social Security and tax refund checks, CDC advice cards on keeping oneself and family safe, and newspapers and magazines still vital to informing the American people. It is enabling a new wave of businesses along with the e-commerce sector to survive the pandemic through remote order and fulfillment. Postal Service delivery is essential. And it is of particularly acute need in rural areas of the country, where there are no alternatives, and often not even broadband. USPS is a lifeline there and elsewhere throughout the country during these challenging times.

As to how much is needed, we defer to the experts, the bipartisan Postal Service Board of Governors appointed by the President, and our leaders in Congress. While substantial sums are needed, they amount to a small part of the emergency funds Congress has provided and will continue to provide, including to sustain small businesses, their employees and the economy. The Postal Service is the backbone of businesses large and small in America, and must endure.

The American people, 91% of whom approve of USPS\(^1\), often raise a commotion if a single Post Office is to be closed. Closing the entire system or imposing a major reduction in service during this time of need would magnify that reaction substantially.

We again strongly urge you to save the Postal Service and preserve a fundamental lifeline to millions of Americans.

Thank you.

Sincerely,

     The Honorable Ron Johnson
     The Honorable Gary Peters
Headquarters COVID Town Hall
April 28th, 2020
Opening Remarks

Megan J. Brennan
Postmaster General and Chief Executive Officer
General Election outreach to States

• Expected surge in absentee ballots
• Contact all 50 states, prioritizing 19 states with excuse required to vote with absentee ballot
• Educate states on absentee ballot envelope design and mailing requirements
• Election Mail Teams will be comprised of HQ, Area, and District staff with election mail expertise
• Efforts in progress to support increased use of absentee ballots for primaries
Employee Response

Continue to support our employees as the nation ramps back up for business

- Employee health, safety and wellness
- Partnership with Unions and Management Associations
- Targeted fast track hiring
- Telework approach
Continue to deliver vital goods and services as we help the country transition

- Economic Impact Payment
- Medications
- Package platform utilization
- Manage to workload and employee availability
Technology Enabled

Continue to leverage technology to enable the Postal Service to achieve its mission
Business Continuity

Continue to ensure health of critical business processes to drive Postal operations

(b)(3), 410(c)(2)
Continue to meet our customers where they are to provide creative, meaningful and effective mailing & shipping solutions
Communications

Continue to communicate with our employees, customers and stakeholders

- COVID-19 Blue and LiteBlue sites
- HERO Messaging
- Field Positive Feedback
- Social Media
- Media Stories

THANK YOU FOR THE THANK-YOU’s
Continue to support and coordinate all of Postal response to COVID-19

- Integrated transition plan
- Coordinated & prioritized solutions
- Speed & thoroughness in decision making
- Removal of barriers & allocation of resources
- Navigating the new normal
Thank You

The Eagle Always Faces Forward
MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

FROM: Russell T. Vought
Acting Director

SUBJECT: Implementing the Presidential Transition Act

This Memorandum provides guidance to all Executive departments and agencies ("agencies") on assisting the Presidential transition activities required by the Presidential Transition Act of 1963, as amended (3 U.S.C. § 102 note).

Background

The Presidential Transition Act promotes the orderly transfer of Executive powers in connection with the expiration of the term of office of a President and the inauguration of a new President. The activities required by the Act are also helpful to prepare for leadership transitions that occur between the first and second terms of Administrations.

The Act requires the establishment of a White House Transition Coordinating Council, an Agency Transition Directors Council, and designation of a General Services Administration (GSA) Federal Transition Coordinator. The Act sets up a timetable for agencies to name points of contact to assist with transition efforts and develop succession plans and establishes responsibilities for the Agency Transition Directors Council.

Timetable of Required Agency Actions

1. By May 1, 2020, each agency identified in Enclosure 1 shall name its Agency Transition Director. The Agency Transition Director should be a senior career representative whose responsibilities include leading Presidential transition efforts within the agency. Agencies shall provide the name, title, email address, and telephone number for their Agency Transition Directors to GSA’s Federal Transition Coordinator at PresidentialTransition2020@gsa.gov. These individuals will serve on the Agency Transition Directors Council, co-chaired by the Federal Transition Coordinator and the Deputy Director for Management of the Office of Management and Budget (OMB).
2. By May 1, 2020, each agency identified in Enclosure 2 shall identify a point of contact for communication purposes related to Presidential transition efforts. Agencies shall provide the name, title, email address, and telephone number for their communication coordination to GSA’s Federal Transition Coordinator at PresidentialTransition2020@gsa.gov.

3. Not later than September 15, 2020, and in accordance with subchapter III of chapter 33 of title 5, United States Code, the head of each agency shall ensure that a succession plan is in place for each senior non-career position in the agency.

Responsibilities

The Agency Transition Directors Council shall:

i. Ensure the Federal Government has an integrated strategy for addressing interagency challenges and responsibilities around Presidential transitions and turnover of non-career appointees;

ii. Coordinate transition activities among the Executive Office of the President, agencies, and the transition team of eligible candidates and the President-elect and vice-President-elect;

iii. Draw on guidance provided by the White House Transition Coordinating Council and lessons learned from previous Presidential transitions in carrying out its duties;

iv. Assist the Federal Transition Coordinator in identifying and carrying out the responsibilities of the Federal Transition Coordinator relating to a Presidential transition;

v. Provide guidance to agencies in gathering briefing materials and information relating to the Presidential transition that may be requested by eligible candidates;

vi. Ensure materials and information described in subparagraph (v) above are prepared not later than November 1 of the year during which a Presidential election is held;

vii. Ensure agencies adequately prepare career employees who are designated to fill non-career positions during a Presidential transition; and

viii. Consult with the President’s Management Council, or any successor thereto, in carrying out its duties.

OMB and GSA intend to hold an Agency Transition Directors Council meeting on May 27, 2020. Calendar invitations will be distributed to the Agency Transition Directors in advance of the meeting.

---

1 As used in this memorandum, the term ‘agency’ means an Executive agency, as defined in section 105 of title 5, United States Code.

2 Required pursuant to the Presidential Transition Enhancements Act of 2019 (Pub. L. 116-121).
If you have any questions regarding this Memorandum, please contact Mary Gibert, Federal Transition Coordinator at GSA (mary.gibert@gsa.gov).

Text of Presidential Transition Act of 1963, as amended (3 U.S.C. 102 note)

https://www.govinfo.gov/content/pkg/PLAW-114publ136/pdf/PLAW-114publ136.pdf
Public Law 114–136
114th Congress

An Act

To improve the process of presidential transition.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Edward ‘Ted’ Kaufman and Michael Leavitt Presidential Transitions Improvements Act of 2015”.

SEC. 2. PRESIDENTIAL TRANSITION IMPROVEMENTS.

(a) In General.—The Presidential Transition Act of 1963 (3 U.S.C. 102 note) is amended—

(1) by redesignating sections 4, 5, and 6 as sections 5, 6, and 7, respectively; and

(2) by inserting after section 3 the following:

"SEC. 4. TRANSITION SERVICES AND ACTIVITIES BEFORE ELECTION.

(a) Definitions.—In this section—

"(1) the term ‘Administrator’ means the Administrator of General Services;

"(2) the term ‘agency’ means an Executive agency, as defined in section 105 of title 5, United States Code;

"(3) the term ‘eligible candidate’ has the meaning given that term in section 3(h)(4); and

"(4) the term ‘Presidential election’ means a general election held to determine the electors of President and Vice President under section 1 or 2 of title 3, United States Code.

(b) General Duties.—The President shall take such actions as the President determines necessary and appropriate to plan and coordinate activities by the Executive branch of the Federal Government to facilitate an efficient transfer of power to a successor President, including by—

"(1) establishing and operating a White House transition coordinating council in accordance with subsection (d); and

"(2) establishing and operating an agency transition directors council in accordance with subsection (e).

(c) Federal Transition Coordinator.—The Administrator shall designate an employee of the General Services Administration who is a senior career appointee to—

"(1) carry out the duties and authorities of the General Services Administration relating to Presidential transitions under this Act or any other provision of law;
"(2) serve as the Federal Transition Coordinator with responsibility for coordinating transition planning across agencies, including through the agency transition directors council established under subsection (e);

"(3) ensure agencies comply with all statutory requirements relating to transition planning and reporting; and

"(4) act as a liaison to eligible candidates.

"(d) WHITE HOUSE TRANSITION COORDINATING COUNCIL.—

"(1) ESTABLISHMENT.—Not later than 6 months before the date of a Presidential election, the President shall establish a White House transition coordinating council for purposes of facilitating the Presidential transition.

"(2) DUTIES.—The White House transition coordinating council shall—

"(A) provide guidance to agencies and the Federal Transition Coordinator regarding preparations for the Presidential transition, including succession planning and preparation of briefing materials;

"(B) facilitate communication and information sharing between the transition representatives of eligible candidates and senior employees in agencies and the Executive Office of the President; and

"(C) prepare and host interagency emergency preparedness and response exercises.

"(3) MEMBERSHIP.—The members of the White House transition coordinating council shall include—

"(A) senior employees of the Executive branch selected by the President, which may include the Chief of Staff to the President, any Cabinet officer, the Director of the Office of Management and Budget, the Administrator, the Director of the Office of Personnel Management, the Director of the Office of Government Ethics, and the Archivist of the United States;

"(B) the Federal Transition Coordinator;

"(C) the transition representative for each eligible candidate, who shall serve in an advisory capacity; and

"(D) any other individual the President determines appropriate.

"(4) CHAIRPERSON.—The Chairperson of the White House transition coordinating council shall be a senior employee in the Executive Office of the President, designated by the President.

"(e) AGENCY TRANSITION DIRECTORS COUNCIL.—

"(1) IN GENERAL.—The President shall establish and operate an agency transition directors council, which shall—

"(A) ensure the Federal Government has an integrated strategy for addressing interagency challenges and responsibilities around Presidential transitions and turnover of noncareer appointees;

"(B) coordinate transition activities between the Executive Office of the President, agencies, and the transition team of eligible candidates and the President-elect and Vice-President-elect; and

"(C) draw on guidance provided by the White House transition coordinating council and lessons learned from previous Presidential transitions in carrying out its duties.
“(2) DUTIES.—As part of carrying out the responsibilities under paragraph (1), the agency transition directors council shall—

(A) assist the Federal Transition Coordinator in identifying and carrying out the responsibilities of the Federal Transition Coordinator relating to a Presidential transition;

(B) provide guidance to agencies in gathering briefing materials and information relating to the Presidential transition that may be requested by eligible candidates;

(C) ensure materials and information described in subparagraph (B) are prepared not later than November 1 of a year during which a Presidential election is held;

(D) ensure agencies adequately prepare career employees who are designated to fill non-career positions under subsection (f) during a Presidential transition; and

(E) consult with the President's Management Council, or any successor thereto, in carrying out the duties of the agency transition directors council.

“(3) MEMBERSHIP.—The members of the agency transition directors council shall include—

(A) the Federal Transition Coordinator and the Deputy Director for Management of the Office of Management and Budget, who shall serve as Co-Chairpersons of the agency transition directors council;

(B) other senior employees serving in the Executive Office of the President, as determined by the President;

(C) a senior representative from each agency described in section 901(b)(1) of title 31, United States Code, the Office of Personnel Management, the Office of Government Ethics, and the National Archives and Records Administration whose responsibilities include leading Presidential transition efforts within the agency;

(D) a senior representative from any other agency determined by the Co-Chairpersons to be an agency that has significant responsibilities relating to the Presidential transition process; and

(E) during a year during which a Presidential election will be held, a transition representative for each eligible candidate, who shall serve in an advisory capacity.

“(4) MEETINGS.—The agency transition directors council shall meet—

(A) subject to subparagraph (B), not less than once per year; and

(B) during the period beginning on the date that is 6 months before a Presidential election and ending on the date on which the President-elect is inaugurated, on a regular basis as necessary to carry out the duties and authorities of the agency transition directors council.

“(f) INTERIM AGENCY LEADERSHIP FOR TRANSITIONS.—Not later than 6 months before the date of a Presidential election, the head of each agency shall designate a senior career employee of the agency and a senior career employee of each major component and subcomponent of the agency to oversee and implement the activities of the agency, component, or subcomponent relating to the Presidential transition.
Deadline.

(2) ACTING OFFICERS.—Not later than September 15 of a year during which a Presidential election occurs, and in accordance with subchapter III of chapter 33 of title 5, United States Code, for each noncareer position in an agency that the head of the agency determines is critical, the head of the agency shall designate a qualified career employee to serve in the position in an acting capacity if the position becomes vacant.

(g) MEMORANDUMS OF UNDERSTANDING.—

(1) IN GENERAL.—Not later than November 1 of a year during which a Presidential election occurs, the President (acting through the Federal Transition Coordinator) shall, to the maximum extent practicable, negotiate a memorandum of understanding with the transition representative of each eligible candidate, which shall include, at a minimum, the conditions of access to employees, facilities, and documents of agencies by transition staff.

(2) EXISTING RESOURCES.—To the maximum extent practicable, the memorandums of understanding negotiated under paragraph (1) shall be based on memorandums of understanding from previous Presidential transitions.

(h) EQUITY IN ASSISTANCE.—Any information or other assistance provided to eligible candidates under this section shall be offered on an equal basis and without regard to political affiliation.

(i) REPORTS.—

(1) IN GENERAL.—The President, acting through the Federal Transition Coordinator, shall submit to the Committee on Oversight and Government Reform of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate reports describing the activities undertaken by the President and agencies to prepare for the transfer of power to a new President.

(2) TIMING.—The reports under paragraph (1) shall be provided 6 months and 3 months before the date of a Presidential election.

(b) OTHER IMPROVEMENTS.—Section 3 of the Presidential Transition Act of 1963 (3 U.S.C. 102 note) is amended—

(1) in subsection (a)—

(A) in paragraph (8)—

(I) by inserting “and during the term of a President” after “during the transition”; and

(II) by striking “after inauguration”; and

(ii) in subparagraph (B), by inserting “or Executive agencies (as defined in section 105 of title 5, United States Code)” before the period; and

(B) in paragraph (10), by inserting “including, to the greatest extent practicable, human resource management system software compatible with the software used by the incumbent President and likely to be used by the President-elect and Vice President-elect” before the period;

(2) in subsection (b)(2), by striking “30 days” and inserting “180 days”;

(3) in subsection (g), by inserting “except for activities under subsection (a)(8)(A),” before “there shall be no”; and

(4) in subsection (h)(2), by adding at the end the following:
“(D) An eligible candidate shall have a right to the services and facilities described in this paragraph until the date on which the Administrator is able to determine the apparent successful candidates for the office of President and Vice President.”.

(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Section 3 of the Pre-Election Presidential Transition Act of 2010 (3 U.S.C. 102 note) is repealed.

(2) The Presidential Transition Act of 1963 (3 U.S.C. 102 note) is amended—

(A) in section 3—

(i) in subsection (a)(4)(B), by striking “section 6” and inserting “section 7”;

(ii) in subsection (b), in the matter preceding paragraph (1), by striking “section 3 of this Act” and inserting “this section”; and

(iii) in subsection (h)(3)(B)(ii), by striking “section 5” each place it appears and inserting “section 6”;

(B) in section 6, as redesignated by subsection (a) of this section, by striking “section 6(a)(1)” each place it appears and inserting “section 7(a)(1)”;

(C) in section 7(a)(2), as redesignated by subsection (a) of this section, by striking “section 5” and inserting “section 6”.

(3) Section 8331(1)(K) of title 5, United States Code, is amended by striking “section 4” and inserting “section 5”.

(4) Section 8701(a)(10) of title 5, United States Code, is amended by striking “section 4” and inserting “section 5”.

(5) Section 8901(1)(1) of title 5, United States Code, is amended by striking “section 4” and inserting “section 5”.

SEC. 3. NATIONAL ARCHIVES PRESIDENTIAL TRANSITION.

Section 2203(g) of title 44, United States Code, is amended—

(1) by redesignating paragraph (3) as paragraph (4); and

(2) by inserting after paragraph (2) the following:

“(3) When the President considers it practicable and in the public interest, the President shall include in the President’s budget transmitted to Congress, for each fiscal year in which the term of office of the President will expire, such funds as may be necessary for carrying out the authorities of this subsection.”.

SEC. 4. REPORTS ON POLITICAL APPOINTEES APPOINTED TO NON-POLITICAL PERMANENT POSITIONS.

(a) DEFINITIONS.—In this section—

(1) the term “agency” has the meaning given the term “Executive agency” in section 105 of title 5, United States Code;

(2) the term “covered civil service position” means a position in the civil service (as defined in section 2101 of title 5, United States Code) that is not—

(A) a temporary position; or

(B) a political position;

(3) the term “former political appointee” means an individual who—

(A) is not serving in an appointment to a political position; and

(B) served as a political appointee during the 5-year period ending on the date of the request for an appointment to a covered civil service position in any agency;
(4) the term "political appointee" means an individual serving in an appointment to a political position; and
(5) the term "political position" means—
   (A) a position described under sections 5312 through 5316 of title 5, United States Code (relating to the Executive Schedule);
   (B) a noncareer appointment in the Senior Executive Service, as defined under paragraph (7) of section 3132(a) of title 5, United States Code; or
   (C) a position in the executive branch of the Government of a confidential or policy-determining character under schedule C of subpart C of part 213 of title 5, Code of Federal Regulations.

(b) REPORTING ON CURRENT OR RECENT POLITICAL APPOINTEES APPOINTED TO COVERED CIVIL SERVICE POSITIONS.—
   (1) ANNUAL REPORT.—Except as provided in paragraph (2), the Director of the Office of Personnel Management shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Oversight and Government Reform of the House of Representatives an annual report regarding requests by agencies to appoint political appointees or former political appointees to covered civil service positions. Each report shall cover one calendar year and shall—
      (A) for each request by an agency that a political appointee be appointed to a covered civil service position during the period covered by the report, provide—
         (i) the date on which the request was received by the Office of Personnel Management;
         (ii) subject to subsection (c), the name of the individual and the political position held by the individual, including title, office, and agency;
         (iii) the date on which the individual was first appointed to a political position in the agency in which the individual is serving as a political appointee;
         (iv) the grade and rate of basic pay for the individual as a political appointee;
         (v) the proposed covered civil service position, including title, office, and agency, and the proposed grade and rate of basic pay for the individual;
         (vi) whether the Office of Personnel Management approved or denied the request; and
         (vii) the date on which the individual was appointed to a covered civil service position, if applicable; and
      (B) for each request by an agency that a former political appointee be appointed to a covered civil service position during the period covered by the report, provide—
         (i) the date on which the request was received by the Office of Personnel Management;
         (ii) subject to subsection (c), the name of the individual and the political position held by the individual, including title, office, and agency;
         (iii) the date on which the individual was first appointed to any political position;
         (iv) the grade and rate of basic pay for the individual as a political appointee;
(v) the date on which the individual ceased to serve in a political position;
(vi) the proposed covered civil service position, including title, office, and agency, and the proposed grade and rate of basic pay for the individual;
(vii) whether the Office of Personnel Management approved or denied the request; and
(viii) the date on which the individual was first appointed to a covered civil service position, if applicable.

(2) QUARTERLY REPORT IN CERTAIN YEARS.—In the last year of the term of a President, or, if applicable, the last year of the second consecutive term of a President, the report required under paragraph (1) shall be submitted quarterly and shall cover each quarter of the year, except that the last quarterly report shall also cover January 1 through 20 of the following year.

(c) NAMES AND TITLES OF CERTAIN APPOINTEES.—If determined appropriate by the Director of the Office of Personnel Management, a report submitted under subsection (b) may exclude the name or title of a political appointee or former political appointee—

(1) who—
(A) was requested to be appointed to a covered civil service position; and
(B) was not appointed to a covered civil service position;
or
(2) relating to whom a request to be appointed to a covered civil service position is pending at the end of the period covered by that report.

SEC. 5. REPORT ON REGULATIONS PROMULGATED NEAR THE END OF PRESIDENTIAL TERMS.

(a) DEFINITIONS.—In this section:
(1) The term “covered presidential transition period” means each of the following:
(B) The 120-day period ending on January 20, 2009.
(C) The 120-day period ending on January 20, 2017.
(2) The term “covered regulation” means a final significant regulatory action promulgated by an Executive department.
(3) The term “significant regulatory action” means any regulatory action that is likely to result in a rule that may—
(A) have an annual effect on the economy of $100,000,000 or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;
(B) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
(C) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or
(D) raise novel legal or policy issues.
(4) The term “Executive department” has the meaning given that term under section 101 of title 5, United States Code.

(b) REPORT.—
(1) IN GENERAL.—The Comptroller General of the United States shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Oversight and Government Reform of the House of Representatives a report regarding covered regulations promulgated during each covered presidential transition period.

(2) CONTENTS OF REPORT.—The report required under paragraph (1) shall, to the extent feasible, for each covered presidential transition period—

(A) compare the number, scope, and impact of, and type of rulemaking procedure used for, covered regulations promulgated during the covered presidential transition period to the number, scope, and impact of, and type of rulemaking procedure used for, covered regulations promulgated during the 120-day periods ending on January 20 of each year after 1996, other than 2001, 2009, and 2017;

(B) determine the statistical significance of any differences identified under subparagraph (A) and whether and to what extent such differences indicate any patterns;

(C) evaluate the size, scope, and effect of the covered regulations promulgated during the covered presidential transition period; and

(D) assess the extent to which the regularly required processes for the promulgation of covered regulations were followed during the covered presidential transition period, including compliance with the requirements under—

(i) chapter 8 of title 5, United States Code (commonly known as the "Congressional Review Act");

(ii) the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 601 note);

(iii) sections 202, 203, 204, and 205 of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1532–1535);

(iv) chapter 6 of title 5, United States Code (commonly known as the "Regulatory Flexibility Act"); and

(v) chapter 35 of title 44, United States Code (commonly known as the "Paperwork Reduction Act").

SEC. 6. ANALYSIS OF THREATS AND VULNERABILITIES.

(a) IN GENERAL.—Not later than February 15, 2016, the Secretary of Homeland Security shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committees on Oversight and Government Reform and Homeland Security of the House of Representatives a report analyzing the threats and vulnerabilities facing the United States during a presidential transition, which—

(1) shall identify and discuss vulnerabilities related to border security and threats related to terrorism, including from weapons of mass destruction;

(2) shall identify steps being taken to address the threats and vulnerabilities during a presidential transition; and

(3) may include recommendations for actions by components and agencies within the Department of Homeland Security.
(b) Form.—The report submitted under subsection (a) shall be prepared in unclassified form, but may contain a classified annex.

Approved March 18, 2016.
Dear Speaker Pelosi, Minority Leader McCarthy, Majority Leader McConnell, and Minority Leader Schumer:

The coronavirus crisis is wreaking havoc on the U.S. Postal Service. Without immediate help, the Postal Service — a vital staple of American society since 1775 — could cease to function by this summer. This crisis is also affecting the State of New York more than any other. There were 287 confirmed cases of coronavirus and 14 deaths among postal workers in New York as of April 20, 2020.¹

As a direct result of the coronavirus crisis, first class and business mail volume across the country has dropped at an alarming rate. Mail volume is down by more than 30% from the same period last year. Over the next ten years, the Postal Service estimates that losses caused by the coronavirus crisis would be $54 billion.²

This is a national emergency. The American people rely on the Postal Service to deliver crucial goods and services every day, including more than a billion life-saving medications last year alone, millions of economic stimulus checks and unemployment benefits to help during this crisis, and 2020 Census forms for every household in America.

In New York, the Postal Service delivers to 7.7 million addresses and has more than 1,800 Post Offices. In our state, the Postal Service employed 44,675 people and paid close to $3

---

¹ Email from the Office of Congressional and Intergovernmental Affairs, U.S. Postal Service, to Committee on Oversight and Reform (Apr. 20, 2020).

² Briefing by Megan J. Brennan, Postmaster General and Chief Executive Officer, U.S. Postal Service, to Committee on Oversight and Reform (Apr. 9, 2020).
billion in wages in 2018.³ New York also will rely heavily on the Postal Service to conduct its primary on June 23, 2020, during which no-excuse absentee ballots will be accepted.⁴

The Postal Service is a fundamental component of America’s economic infrastructure, providing affordable, universal delivery of mail and e-commerce packages to more than 160 million households and businesses. The Postal Service propels a $1.6 trillion mailing industry that employs 7.3 million people. It does all of this while operating as a business and receiving next to nothing in taxpayer dollars.⁵

Both Democrats and Republicans supported large infusions of liquidity for other industries and companies that are critical to our nation’s economy, and we must do the same now to save the Postal Service.

The Postal Board of Governors has asked for a package that includes $25 billion in emergency appropriations to offset coronavirus-related losses, $25 billion for “shovel-ready” projects to modernize the Postal Service, and access to $25 billion in unrestricted borrowing authority from the Treasury.⁶

To be clear, these requests were put forth unanimously by a Board of Governors with a Republican majority—all of whom were appointed by President Trump.

The Postal Service is an indispensable component of America’s critical infrastructure, and its workers are on the frontlines every single day delivering information and packages to the American people. We strongly support emergency funding for the Postal Service and urge you to do the same.

Sincerely,

Carolyn B. Maloney

Peter T. King

BULLETIN THE JOURNAL OF POSTAL COMMERCE

President's Corner

Rescue Mission

This week’s PostCom bulletin includes several guest submissions regarding the future of the Postal Service (see below). There are different perspectives represented, not only because the Postal Service seems to draw interest from all corners, but because there is still so much that nobody knows. What we do know is that the Postal Service is already experiencing significant volume losses and that – at least so far – financial assistance from the government has been limited.

We should expect much more debate about the Postal Service and its future in the coming months. At a virtual House Oversight and Government Reform Committee hearing last week, the Postal Service asked Congress for support including:

- A $25Bn appropriation to offset expected revenue losses through FY 2021
- A $25Bn grant for postal modernization investments that likely include new vehicles and facility improvements
- $25Bn in unrestricted borrowing authority

Even when Congress is spending at unprecedented rates, that is a lot of money; $75Bn is more – in nominal terms – than the Postal Service has ever generated in a fiscal year. While there is almost a consensus (there is a very important source of dissent) that the Postal Service is deserving of some support, they’re not likely to get everything they ask for.

For one thing, Congress generally does not dole out billions of dollars without expecting something in return. Corporations and industries that are receiving funding from Coronavirus relief spending are having to accept sometimes burdensome conditions. Furthermore, we are approaching the anniversary of a heated exchange between then-Congressman Mark Meadows and the PMG over the Postal Service’s ten-year plan (link unavailable). If Congress had valid concerns about the future direction of the Postal Service last year, those concerns have probably not lessened in the last twelve months.

Given the looming damage to the US economy from the Coronavirus pandemic, and the importance of the Postal Service, some type of short-
First-Line Supervisor Retention Gets High Marks

The U.S. Postal Service has done a good job of retaining first-line supervisors, with an average national attrition rate of only 1 percent for fiscal years (FYs) 2016-2018, but timely hiring and qualifications of new supervisors are issues management should address, according to a new audit report. First-Line Supervisor Recruitment and Retention, 19SMG008HR000-R20.

First-line supervisors are a significant portion of the USPS workforce: during FY 2018, the Postal Service had 18,433 permanent first-line supervisors — 13,049 in retail facilities and 5,384 in mail processing facilities — with another 4,394 employees detailed to perform supervisory duties and responsibilities.

In one of a series of audits concerning first-line supervisors, the U.S. Postal Service Office of Inspector General (OIG) found that despite the solid retention rate, when vacancies did occur, 88 percent of those examined were open for more than the within-60-days hiring target.

Also, USPS hiring officials did not complete and maintain required supporting documentation for 68 percent of first-line supervisor positions. Missing documentation included signed and dated requirements matrices that determine whether potential hires met qualifications. Because this information was missing, the OIG could not determine whether these first-line supervisors met the qualifications outlined in vacancy announcements.
Based on this issue, the OIG identified $16.4 million in unsupported questioned costs related to the pay increase for promotion to first-line supervisor. The watchdog group recommended USPS management develop controls to ensure timely hiring and that district and facility officials prepare and maintain hiring documentation as required.

Management agreed with the findings, monetary impact, and need for controls over hiring documentation. But it argued that controls exist now for officials to complete their hiring responsibilities.

No, Trump Isn’t Trying to Kill the Postal Service

Op-ed written by Kevin Kosar, Vice President, Research Partnerships, R Street Institute, a non-profit public policy research organization. This article was originally published on The American Spectator and reprinted with permission. Views and opinions reflected in the article are of the author’s and do not necessarily reflect the views and opinions of PostCom.

Over the weekend, #postservice began trending on Twitter. That’s weird, seeing as the Post Office is, well, the Post Office. And I say that as someone who has spent 17 years studying postal policy. (Thank you for your sympathy.)

The Twitter-steria stemmed from a report that the Trump administration opposed giving the U.S. Postal Service (USPS) a bailout. House of Representatives Democrats had tried to slip a more than $30 billion bailout into the Coronavirus Aid, Relief, and Economic Security Act (CARES Act). Trump and company rejected the bill and told Congress they beleaguered agency could have a $10 billion loan instead.

All of this should have been old news — Trump signed the law on March 27. But the Washington Post’s story went viral, with other newspapers and media picking it up. Thence to social media, and then craziness erupted.

Three different conspiracies emerged, and all of them slapped evil horns on the president:

- Trump wants to bankrupt the agency so he can sell it off and privatize it.

- Trump wants to kill the Postal Service to hurt Jeff Bezos, whose Amazon.com uses USPS to deliver some of its parcels.

- Trump wants to shut down the Postal Service so that people cannot vote by mail.

The outrage has been burning for days, stoked by the usual suspects, like John Dean and the Daily Kos.

It is difficult to express just how inane these claims are.

For one, hardly anyone wants to privatize the Postal Service. Certainly not President Trump. His postal reform commission expressly rejected privatization. Besides, who exactly would want to buy the Postal Service? It is an
agency with **$130 billion** in unfunded pension and retiree health-care obligations. By law the USPS has a heavily unionized workforce who every four years negotiate more expensive compensation contracts. And demand for USPS’s services have plunged over the past decade. Mail volume is down more than 30 percent. There is a reason only the USPS delivers paper mail to nearly every home in America along with the Virgin Islands, Guam, and Puerto Rico — it is not lucrative.

And the notion that the president wants the Postal Service to cease operations is so absurd that it should not require comment. But here we are. The president, as everyone knows, really wants to get reelected, and he cares about his ratings. So why exactly would he kill an agency that is, as the Gallup pollsters note, “America’s favorite federal agency”?

Then there is the matter of Trump’s base. He is especially popular among the elderly, veterans, and residents of rural areas. What do they all have in common beyond their affection for Trump? They like the Postal Service and depend on it.

Try closing a rural post office, and rural residents will grab their pitchforks. The elderly depend on the USPS to deliver prescription drugs and the paper mail — often preferred over digital communications. The elderly — and Republicans generally — vote by mail disproportionately. Oh, and by the way, the president himself votes by mail.

Lastly, it also is the case that the USPS hires lots of veterans. The agency reports it has 100,000 of them.

What the Left fails to understand is pretty rudimentary: throwing money at an agency running structural deficits is stupid. Yes, the Postal Service needs an infusion to help it deal with a massive drop in mail volume due to COVID-19.

But more than that, the agency desperately needs reform. The Trump administration gets this point, and in the next few months we may well see a deal where the USPS gets an infusion to help it weather the COVID-19 storm and the changes it needs to survive in the digital 21st century.

**Political Mail In A COVID-19 World**

Op-ed written by Mark Fallon, President & CEO of The Berkshire Company, an independent management consulting firm that specializes in the print-mail industry. Article was originally published on the Consumer Postal Council’s website and reprinted with permission. Views and opinions reflected in the article are of the author’s and do not necessarily reflect the views and opinions of PostCom.

The first political campaign I worked on took place in 1990. I’d just returned to Massachusetts after serving in the Army. Elections were taking place for state-wide offices, including the governor, attorney general and treasurer. I’d worked in the Massachusetts State House while in graduate school and had met several of the people running for office. While looking for permanent employment, I volunteered for a couple of candidates.

My duties were fairly simple – make phone calls to prospective donors and voters, hold signs outside rallies and assemble mass mailings. Those same functions still take place today, however emails and social media either supplement or replace the phone calls and mailings.

But will those tactics be effective in 2020? Will the COVID-19 pandemic significantly change campaign messaging strategies?

While television ads will continue, the prospective audience is shrinking with on-demand shows and streaming services. Social media remains omnipresent but becomes less trustworthy with each scandal. Cellular service providers have improved detecting spam, reducing the effectiveness of robocalls.
The United States Postal Service (USPS) uses the designation “political mail” for campaigns’ marketing mail. Even with the increased use of email and social media, the USPS has seen significant increases in volumes and revenue over the last three election cycles. In 2014, campaigns spent $375 million to send 1.9 billion pieces of political mail. For the 2018 mid-term elections, that increased to over $573 million on three billion pieces.

The reason? Voters find hard-copy mail, delivered to their homes by the USPS, more credible than any other form of advertising – and that includes in-person visits by candidates or campaign workers. Social media ads, phone calls and text messages aren’t considered trustworthy.

Early in this election cycle – the USPS started an aggressive push to promote the use of mail in political campaigns. With a self-described “obsessive, relentless and compulsive” training program, they created a political strategy team. In addition to analysts, key staff have been designated as strategists in each of the seven USPS areas. A special website – deliverthewin.com – was launched.

The USPS has participated in American Association of Political Consultants (AAPC) and Campaigns & Elections (C&E) events with both speaking opportunities and exhibit booths. They’ve also sponsored articles, email blasts, Facebook Live interviews and webinars to promote political mail. As with online shopping, the USPS is showing candidates that physical mail is a key component of omni-channel marketing campaigns.

This sales pitch will hold even more weight during and after the pandemic. Many rallies are being cancelled and there’s uncertainty around future events. Campaigns will have greater than normal challenges to find volunteers willing to walk door-to-door. And even when they do, many doors will remain shut.

These changes don’t mean an automatic “win” for the USPS. Many printers and mail service providers are struggling during the COVID-19 crisis, and some won’t be able to weather the economic downturn. The decline in overall mail volumes has escalated during the shutdown. Planned in-person seminars and similar events have been cancelled.

Working with political consultants, webinars are being scheduled to continue to educate campaign managers. Those are being supplemented with additional online training for service providers through the National Postal Customer Council Advisory Committee. That message will need to be amplified as businesses reopen and the economy recovers.

Political mail won’t replace the volumes of mail lost due to the current crisis. However, fewer pieces mean that what’s delivered will stand out, improving the effectiveness of mail campaigns. That may help politicians see the value of the USPS. In turn, that may gain the USPS political allies for much needed legislative reform.

In 2020, there are 35 Senate races (including two special elections), 435 House of Representatives races, and gubernatorial races in 11 states. Additionally, there are thousands of races for state representatives, mayors and town selectmen. Every candidate needs to get their message out to donors and voters.

It’s up to the USPS to help them see mail as a critical component of their campaign.

Postmaster General Warns House Committee of Dire Consequences Without Congressional Action- Trump’s Own Hand Picked Board of Governors Says USPS Needs $75B

PostalNews Today, Postmaster General Megan J. Brennan provided a video briefing to Members of the Committee on Oversight and Reform and Reform on the devastating impact the coronavirus crisis has had on the finances of the Postal Service and the steps Congress and the President must take to ensure continued delivery of essential information, packages, and services. The Postal Service is fighting for its survival, putting in jeopardy the careers and paychecks of its 650,000 employees—as well as the more than $1.7 trillion mailing industry that employs more than 7.5 million people,” Government Operations Subcommittee Chairman Gerald E. Connolly said. “We cannot allow the Postal Service to collapse. To do so would deepen our nation’s economic crisis and eliminate an important lifeline for individuals who rely on the Postal Service’s 1 billion deliveries of lifesaving prescription deliveries and eviscerate the very infrastructure we need to administer the upcoming elections.”

Consumer Price Index Summary

BLS In March, the Consumer Price Index for All Urban Consumers fell 0.4 percent on a seasonally adjusted basis; rising 1.5 percent over the last 12 months, not seasonally adjusted. The index for all items less food and energy fell 0.1 percent in March (SA), up 2.1 percent over the year (NSA).

More Than 600,000 People Sign A Petition Demanding Hazard Pay For Postal Workers After 19 Die Of Coronavirus And 6,000 More Are Forced Into Self-Quarantine Across US

DailyMail More than 600,000 have signed a petition demanding the government give hazard pay to all of its USPS workers continuing to brave the outside during the coronavirus lockdown. It comes as 19 postal workers have died of coronavirus, while 500 have tested positive and another 6,000 have had to self-isolate, USPS leaders told Congress last week. The petition claims that USPS staff have not been given adequate protective equipment as they work 12-hour overtime shifts, packing and loading potentially contaminated packages and letters. ‘As of this present time, there have been upwards of more than 40 confirmed cases of coronavirus within the United States Postal Service,’ the Change.org petition written on March 16 says.

Trump’s War Against The Postal Service Could Have Another Casualty: Tens Of Thousands Of Military Veterans With Disabilities

BusinessInsider The tenuous situation for the Postal Service puts its employees, many of whom are military veterans, in an uncertain position. USPS is one of the largest employers of veterans nationwide and dwarfs its competitors in hiring numbers: Nearly 100,000 military veterans are employed by the agency, or roughly 15% of its entire workforce of 600,000 employees, according to a spokesperson. One internal estimate showed how a subset of veterans could be disproportionately affected by cuts. Though the exact numbers were not immediately available, USPS estimated that at least 60% of its veteran employees have some sort of disability rating.
Postal Workers Say USPS Isn’t Telling Them When Colleagues Test Positive for COVID-19, Despite Promising To

ProPublica The U.S. Postal Service appears to be continuing its checkered response to the coronavirus. Workers across the country say they’re not being informed when colleagues have tested positive for COVID-19, despite a Postal Service policy to do so. At the end of March, after workers complained, the Postal Service told its employees they would be notified if someone “in your workplace is confirmed to have COVID-19.” But workers at 11 locations told ProPublica they found out about cases through colleagues or were only told by management days after word had already gotten out.

NRLCA and USPS Sign MOU Concerning Temporary Workplace Changes to Promote Social Distancing

PostalNews From the National Rural Letter Carriers Association: Your National Board agrees that the social distancing recommendations of the Centers of Disease Control and Prevention (CDC) are important measures which should be practiced as much as possible to slow the spread of the coronavirus (COVID-19). Some of those social distancing recommendations for the workplace include increasing physical space between workers, staggering work schedules, limiting large work-related gatherings and reducing or eliminating travel. With that in mind, the NRLCA and the USPS have agreed to a MOU with temporary changes to promote social distancing. The terms of this MOU will minimize the possibility of exposure to the coronavirus or the possibility of unknowingly spreading the coronavirus to a larger portion of the workforce.

China » China.org

The arrival of the first train of a new postal rail service to Europe here opened up a new reliable and efficient logistics channel between Lithuania and China. Departing from southwest China's Chongqing Municipality on April 3, the “China Post” CR Express 1st block train, loaded with much-needed medical supplies and 42 TEUs of parcels, arrived on April 12 in Vilnius. The parcels will be later transferred to other European countries. “With this new route, especially during a difficult pandemic period, we are turning a new page towards a closer cooperation to meet consumer expectations — assessing not only delivery time or price, but also environmental requirements,” wrote the minister.

France » BBC

Amazon has been ordered to limit its deliveries in France to essential goods only, amid claims it is failing to protect its workers from coronavirus. A court in Nanterre, near Paris, ordered the online retail giant to deliver only food, hygiene and medical products in the country from Tuesday. This is to allow officials to assess whether Amazon is taking adequate precautions to protect its staff. Amazon has not commented on the court ruling.
India » Post&Parcel

With train and bus services shut, India Post is relying on its own Mail Motor Services (MMS) to carry out delivery services within the state and in adjacent states while airlines are being used to deliver parcels in the metros, reports Hindustan Times. Rajguru Nagar branch sub-post office master Sarita Madaan said the branch had booked 85 parcels of medicine since the lockdown. "Before the lockdown, we rarely received bookings for medicines as people mainly relied on private courier companies but now we deliver medicines on a regular basis. People have medicines delivered within the state and to neighbouring states."

Ireland » Post&Parcel

An Post, in partnership with Children’s Books, Ireland have distributed a free 24-page #ImagineNation playbook to children all over Ireland to enjoy. The campaign is aimed at helping families confined to their homes by COVID-19. The #ImagineNation playbook is full of drawing, writing and mindfulness exercises from leading Irish children’s authors and illustrators including Oliver Jeffers, Chris Haughton, Sarah Crossan, Don Conroy, Niall Breslin, Niamh Sharkey and many more. The book will be accessible to all children to download as well as being delivered free by An Post to thousands of houses around the country.

Isle of Jersey » Parcel&Post

From today, Jersey Post will be delivering free postcards to all residential addresses to launch its Island-wide, Connecting Jersey campaign. From Tuesday 14 April, every island household will receive two free postcards: • Thank you • Thinking of you. Households can send the cards free of charge to any address in Jersey throughout April.

United Kingdom » Post&Parcel

The UK Drone Delivery Group, the new drone industry initiative, established to provide guidance on the steps required for the UK to accelerate the growth of the UK drone industry, has today released its ‘White Paper’ for public consultation. The White Paper calls for the development of new testing grounds, which are expected to significantly transform the UK’s potential to achieve world-leading status in the fast-moving drone industry.

Zimbabwe » Herald

The country’s postal and courier services is continuing on a downward trend with latest figures showing a 32 percent dip during the year to December 2019 on e-substitution as technology is providing an alternative channel for transmission of information. According to the regulator, the Postal and Telecommunications Regulatory Authority of Zimbabwe (POTRAZ) postal and courier services went down 32 percent to 5.3 billion items in 2019 compared to 7.8 billion recorded in the prior year. The service has halved in the past five years from 10 billion recorded in 2015.

Industry Alert: New Processes for Bulk Hold Mail and Forwarding Requests by Businesses The United States Postal Service has implemented two new processes to allow businesses to submit Hold Mail requests in bulk (10 or more), as well as requests to forward mail from many locations (10 or more) to one. The new processes allow businesses with 10 or more requests to provide the Postal Service with an Excel spreadsheet with the addresses and relevant information for their hold or forwarding requests. Businesses must provide the information in a specific Excel file format. The Sales Representative will coordinate directly with the customer to obtain the required information. There are currently no changes to the maximum timeframe for holding mail (30 days). Businesses should contact their Sales Representative if they would like to request Bulk Hold Mail (10 or more) for 30 Days or to Forward Mail from many locations (10 or more) to one.

Industry Alert: COVID-19 CONTINUITY OF OPERATIONS UPDATE Mailability of Hand Sanitizer Update The March 28, 2020, Link article titled “Hands Off” described the mailing requirements for hand sanitizers and disinfecting wipes containing flammable alcohols such as ethanol and/or isopropanol (rubbing alcohol). As stated in the article, small quantities of these potentially flammable hand sanitizers and alcohol wipes are permitted in domestic mail via surface transportation. To better support our customers during this period of increased demand, mailers can obtain an exception through the Manager, Product Classification to increase the quantity of these items containing ethyl and isopropanol alcohol sent via surface transportation. Additionally, mailers can also be granted an authorization by the Manager, Product Classification to ship limited quantities of ethanol alcohol in domestic air transportation. As several mailers have been provided with written approvals from the Manager, Product Classification for products that are eligible for domestic air shipments or an increase in quantity limits in surface transport, the information below is provided as a guidance to assist in determining eligible mailings. If a mailer holds a valid authorization or an exception from the Manager, Product Classification, the following criteria must be met upon acceptance of the items:

- Upon their first mailing at each postal facility, the mailer must provide a copy of a signed letter from Headquarters, Product Classification. The letter will contain the mailer’s unique approval number and applicable mailing requirements. Note: It is suggested that the facility maintains copies of such letters on file for future reference.

- The outer package must have the appropriate text marking “Contains xxx” followed by their assigned unique authorization number that will begin with either HSA, HSB, HSD, HSE or HSS. Note: This information is included in the letter and may be hand or type written prominently on the package. Examples of text markings:

  “Contains Air-Eligible Ethyl Alcohol - Authorization No. HSA - xxxxxx”
  “Contains Air-Eligible Ethyl Alcohol - Authorization No. HSB - xxxxxx”
  “Contains Surface Eligible Ethyl Alcohol - Exception No. HSE - xxxxxx”

It is illegal to reproduce or to distribute without written permission.
Please note that these materials are strictly prohibited in international mail, Army Post Office (APO), Fleet Post Office (FPO) and Diplomatic Post Office (DPO) destinations.

**Industry Alert: International Service Impacts as of April 17, 2020** Effective April 17, 2020, the Postal Service™ will temporarily suspend international mail acceptance to destinations where transportation is unavailable due to impacts related to the COVID-19 pandemic and restrictions into the area. Customers are asked to refrain from mailing items addressed to any of the following countries, until further notice:

- Bermuda
- Cape Verde
- Oman
- South Sudan
- Swaziland (Eswatini)
- Yemen

These service disruptions affect Priority Mail Express International® (PMEI), Priority Mail International® (PMI), First-Class Mail International® (FCMI), First-Class Package International Service® (FCPIS®), International Priority Airmail® (IPA®), International Surface Air Lift® (ISAL®), and M-Bag® items.

For already deposited items, other than Global Express Guarantee (GXG®), Postal Service employees will endorse the items as “Mail Service Suspended — Return to Sender” and then place them in the mail stream for return.

For any returned item bearing a customs form, the Postal Service will, upon request, refund postage and fees on mail returned due to the suspension of service.

For all other returned items not bearing a customs declarations form, the Postal Service will, upon request, refund postage and fees on mail returned due to the suspension of service, or the sender may re-mail them with the existing postage once service has been restored. When remailing under this option, customers must cross out the markings “Mail Service Suspended — Return to Sender.”

Unless otherwise noted, service suspensions to a particular country do not affect delivery of military and diplomatic mail.

USPS is closely monitoring the situation and will continue to update customers until the situation returns to normal. Please visit our International Service Alerts page for the most up to date information [https://about.usps.com/newswire/service-alerts/international/?utm_source=residential&utm_medium=link&utm_campaign=res_to_intl](https://about.usps.com/newswire/service-alerts/international/?utm_source=residential&utm_medium=link&utm_campaign=res_to_intl)

**Industry Alert: UPDATE 23: International Mail Service Disruptions Due to COVID-19** On April 15, 2020, the Postal Service™ received notifications from various postal operators regarding changes in international mail services due to the novel coronavirus (COVID-19).

The following countries have suspended certain mail services:

**Honduras UPDATE:** Empresa de Correos de Honduras (Honducor) has advised that they are extending the suspension of mail services until April 19, 2020, or a later date to be communicated in due course.

**Mauritius UPDATE:** Mauritius Post has advised that they are extending the suspension of mail services until May 4, 2020.
**Nepal UPDATE:** Nepal Post has advised that they are extending the suspension of mail services until April 30, 2020.

**Sri Lanka UPDATE:** Department of Posts has advised that they are extending the suspension of mail services until April 20, 2020.

Unless otherwise noted, service suspensions to a particular country do not affect delivery of military and diplomatic mail.

The following countries have announced service disruptions:

**Colombia UPDATE:** Servicios Postales Nacionales S.A. 4-72, has advised that, owing to the emergency resulting from the spread of the novel coronavirus (COVID-19), there continues to be significant delays in all of its international inbound and outbound letter-post, parcel-post and Express Mail Service (EMS) items.

**Georgia UPDATE:** Georgian Post has advised that the Government of Georgia has decided to extend the measures aimed at reducing the spread of COVID-19 until May 10, 2020. This includes the suspension of signature service and suspension of service standards.

**Ireland UPDATE:** An Post, has advised that owing to the cancellation of numerous international flights, it is currently limited in its ability to send outbound mail (letter-post, parcel-post and EMS items) to some countries and ceasing to accept mail destined for those countries until further notice. Details of these destinations can be found at [https://www.anpost.com/Coronavirus/Mails-Parcels-services](https://www.anpost.com/Coronavirus/Mails-Parcels-services). As of April 15, An Post is sending only letters, large envelopes and packets to the United States; no parcels.

**Italy UPDATE:** Poste Italiane has advised that the Italian Government has extended the measures aimed at minimizing the spread of COVID-19 until May 3, 2020. This includes the suspension of signature service and service standards; limitations on the size and weight of parcels; and changes to the number delivery attempts that will be made before a package is returned to sender.

**Jamaica UPDATE:** Jamaica Post has advised that the suspension of service standards has been extended until further notice.

**United Arab Emirates UPDATE:** Emirates Post has advised that it is carrying out contactless deliveries during the COVID-19 pandemic. Deliveries to the addressee’s home require the courier to confirm the recipient’s name by asking to see ID, recording name and releasing item to recipient.

These service disruptions affect Priority Mail Express International® (PMEI), Priority Mail International® (PMI), First-Class Mail International® (FCMI), First-Class Package International Service® (FCPIS®), International Priority Airmail® (IPA®), International Surface Air Lift® (ISAL®), and M-Bag® items.

The DMM Advisory will continue to update mailers regarding new service disruptions as they are received. For a full list of international service disruptions, please visit [https://about.usps.com/newsroom/service-alerts/international/welcome.htm](https://about.usps.com/newsroom/service-alerts/international/welcome.htm)

The Honorable Steven T. Mnuchin  
Secretary  
U.S. Department of the Treasury  
1500 Pennsylvania Ave  
Washington, D.C. 20220

Dear Secretary Mnuchin:

During this national emergency, the U.S. Postal Service (USPS) continues to deliver critical goods to every address, including those in hard-hit urban cities as well as difficult to reach rural areas. The services being provided by the Postal Service include the delivery of prescription drugs, household goods, election materials, census material, Coronavirus-related information, testing kits, medical equipment, and eventually vaccines. However, without immediate financial assistance, these services will not continue.

We understand House and Senate negotiators agreed to a $13 billion appropriation during consideration of the CARES Act. We further understand this appropriation was dropped when it was opposed by the Administration. It is now obvious that much more is needed.

Yesterday the USPS Board of Governors (appointed by President Trump), notified Congress that, due to the Coronavirus emergency, it will run out of cash before September 30, the end of this fiscal year (see attached release). The bipartisan Board of Governors requested the following:

- $25 billion emergency appropriation to offset coronavirus-related losses.
- $25 billion grant to fund “shovel-ready” projects to modernize the Postal Service.
- Access to $25 billion in unrestricted borrowing authority from the Treasury.

We write in support of the USPS Board of Governors’ request. In addition, Treasury should never seek to impose operational changes and policy conditions on any of the Postal Service’s new or existing borrowing authorities—changes and policies that by law are set by the USPS Board of Governors and Congress.

The over 600,000 men and women of the Postal Service, who have been on the front lines each and every day, represent the only workforce servicing every single household and open business across the nation. Unfortunately, given the lack of emergency funding, it appears they have been abandoned by the Administration. The Postal Service and the corporate members of the Parcel Shippers Association stand out with their commitment and execution in support of the administrations efforts to keep the economy moving as it struggles throughout this pandemic.
There is a mistaken impression promoted by at least one competitor that the Postal Service undercharges for its package delivery services. This claim has been widely debunked by independent commissions, experts, and virtually everyone who has looked at it (see attached Bibliography). Unfortunately, the postal task force that you chaired accepted this view, choosing to ignore the information provided by USPS and the Postal Regulatory Commision, and proposed the costing methodology changes advocated by that competitor in its final report.

Now is NOT the time to demand structural changes in the way the Postal Service operates or prices its products as a condition to access funds vital for it to continue the extraordinary service they provide the American people. Now is the time to help the Postal Service do what they have done for over 240 years—to Bind the Nation, Enable Commerce, and most importantly, support the Administration in the economic recovery of this nation.

Sincerely,

Jim Cochrane
Chief Executive Officer
Parcel Shippers Association

April 3, 2020

The Honorable Steven T. Mnuchin
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Ave
Washington, D.C. 20220

Dear Secretary Mnuchin:

We write with urgent concerns regarding the financial condition of the U.S. Postal Service and the $10 billion loan Congress authorized the Department of the Treasury to provide to the Postal Service in the Coronavirus Aid, Relief, and Economic Security (CARES) Act.¹ The Coronavirus emergency and resulting decline in economic activity have jeopardized the Postal Service’s ability to continue providing essential services to every American. We urge you to make this loan as soon as possible, with terms that respect the Postal Service’s status and authorities as an independent establishment of the executive branch. We cannot afford to lose this vital infrastructure at a time when it is most needed to continue delivering prescription drugs, critical packages to households and businesses, Coronavirus-related information, vote-by-mail materials, testing kits, medical equipment, and eventually vaccines across this nation.

On March 20, the Postal Service notified our Committees that due to the Coronavirus emergency it will “run out of cash due to a potential decline in revenue of $8-$10 billion and may have to limit or cease operations by the end of this fiscal year.” The Postal Service subsequently provided revenue projections indicating that it could lose up to $12.6 billion in revenues this fiscal year as a result of the pandemic. During the Coronavirus pandemic, the Postal Service is incurring additional costs as it continues to provide safe deliveries and services to every member of the public, including costs of additional facility cleanings, purchasing critical supplies, and training staff on new procedures, in addition to regular operating costs.²

Meanwhile, the Postal Service continues to provide universal, essential services in every community across the nation, delivering medications, emergency information, home supplies, and more. The Postal Service is a lifeline for seniors and for people in rural areas, who often have less access to other services, particularly during this crisis. Postal workers deliver mail and packages to over 159 million households and businesses each day, including over 1 billion prescriptions last year. Businesses rely on the Postal Service to carry their packages the last

² See, for example, U.S. Postal Service, How Can We Help?: USPS Coronavirus Updates for Residential Customers (Mar. 24, 2020) (faq.usps.com/s/article/USPS-Coronavirus-Updates-for-Residential-Customers).
mile, particularly in remote and rural areas, as the only carrier that delivers to every single address. Furthermore, the Postal Service is at the center of a $1.4 trillion mailing industry that employs more than 7.5 million people.³

Enacted on March 27, the CARES Act authorizes the Postal Service to borrow up to an additional $10 billion from the Department of the Treasury (Treasury) “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The terms of this loan are to be “mutually agreed upon by the Secretary and the Postal Service.”⁴ In discussions with Senate authorizers regarding these provisions, you indicated that a loan would be made “at the Treasury rate.” This compromise was made with the understanding that Treasury would act swiftly to provide immediate, necessary financial relief to the Postal Service with a loan under practical, commonsense financial terms.

We strongly urge you to make this loan to the Postal Service in a timely manner, under fair terms that comply with the intent of the CARES Act, and with respect to the proper authorities delegated to the Postal Service. Congress maintains the authority to set the policies by which the Postal Service operates, delegated by statute to the Postal Service Board of Governors and the Postmaster General. The Board of Governors has the exclusive authority to direct the exercise of “the power of the Postal Service,”⁵ appoint or remove the Postmaster General, and “direct and control the expenditures and review the practices and policies of the Postal Service.”⁶ We expect the Treasury Department to fully comply with federal statutes and refrain from setting any conditions that would infringe on the Postal Service’s statutory authorities. We cannot afford to compromise this lifeline for seniors, rural areas, and all Americans.

To ensure the terms and conditions that Treasury intends to negotiate with the Postal Service comply with federal statutes and vested authorities, we ask that you provide us with the following documents within one week after the Postal Service requests a loan under the CARES Act:

- The terms and conditions the Treasury will propose to the Postal Service for the exercise of this borrowing authority, as well as any terms and conditions provisionally agreed upon with the Postal Service, including information about any postal policy and/or operational provisions Treasury intends to improperly include as a condition of borrowing;

---

A statement of when Treasury will allow the Postal Service to exercise its borrowing authority; and

For context regarding the current negotiations, all signed or proposed borrowing agreements (Note Purchase Agreements), as well as all “term sheets” and communications regarding these agreements, between the Postal Service and the Treasury Department since 2018. It is our understanding the last permanent agreement expired in September 2018, and an interim agreement expired in August 2019.

Thank you for your attention to this urgent matter.

Dear Mr. Chairman and Governors:

On behalf of the Postal Service’s 500,000 craft employees, we write to express our appreciation for the leadership you have shown during the current national crisis caused by the COVID-19 pandemic and to urge you to resist inappropriate interference by the Treasury Department in the management and operations of the Postal Service.

As our members across the country in post offices, on delivery routes, and in processing plants and other facilities face down the dangers of providing essential services during a pandemic, we thank you for fighting for the survival of the Postal Service -- a national treasure and a truly essential public service.

We specifically applaud your unanimous endorsement of immediate legislative relief to help the Postal Service survive this crisis so that we can continue to help America fight this pandemic and eventually recover from the deep recession it has caused. Our members are proud to be delivering goods to families that are sheltering in place, medicines and supplies to those who are sick, relief checks to suffering citizens and vital public health information to the entire country. And the industry – mailers, shippers and suppliers – is committed to respond to and fulfill these critical public needs, and work with the Postal Service to deliver them as well. The assistance you are seeking from Congress will allow us to serve these vital functions. We want to continue to deliver for the Nation.
We also urge you to continue to resist inappropriate efforts by the Department of Treasury to interfere with the management of the Postal Service or to place conditions on access to credit provided by the Postal Reorganization Act or the CARES Act -- conditions that would weaken the legal authorities of the Board of Governors and the Postal Regulatory Commission. It is the role of a democratically elected Congress to set postal policy in this country, and it is the role of the Board and the PRC to implement that policy with the managerial and regulatory discretion provided by law. The Treasury Department has no authority to re-write the law or impose its policy preferences on the Postal Service – or the country.

In a few years’ time, when this pandemic and this economic crisis are behind us, the Postal Service will celebrate its 250th anniversary. If we all work together to preserve the institution that we love and depend upon, on that anniversary we will be able to look back at this time as being among the finest in the long proud history of the Postal Service.

Thanks again for your leadership.

Sincerely,

Lori Rectanus
Director, Physical Infrastructure Issues
Government Accountability Office

RE: U.S. Postal Service: Congressional Action to Enable a Sustainable Business Model Is Essential
(Draft Report No. GAO-20-385)

Dear Ms. Rectanus:

On behalf of the United States Postal Service, this letter responds to your invitation to comment on the draft of the Government Accountability Office’s (GAO’s) audit report number GAO-20-385, which was transmitted to us for review on March 12.

Following the receipt of your draft report, the onset of the Coronavirus Disease 2019 (COVID-19) pandemic has had profound impacts both on the Nation, and the Postal Service. The pandemic has demonstrated the vital nature of the public services that the Postal Service performs, as Americans are being asked to shelter in place and to work from home. We operate by statute as a “basic and fundamental service” provided by the Federal Government to the American people, and the continued provision of postal services is designated as an essential function of the Government during times of emergency pursuant to the framework of the National Continuity Policy. The postal sector is also part of the nation’s critical infrastructure. Every day, the men and women of the Postal Service accept, process, transport, and deliver vital mail and packages to all communities in the Nation, including important governmental information and benefits such as Census materials, social security checks, and materials advising the public on COVID-19; materials relating to elections, including ballots and political mail; materials that are essential to the functioning of our economy, such as transactional mail; and packages containing vital necessities, including medicines and other goods that sustain us that are purchased online.

While the criticality of the services the Postal Service provides has never been more evident, and we are committed to continuing to fulfill our universal service mission, the pandemic has also had drastic impacts on our financial condition. We have experienced significant and sudden declines in mail volume and revenue due to the pandemic. The result is a liquidity crisis that requires immediate action by Congress to ensure our continued ability to operate in the near term.

While short-term action by Congress is critical, the Postal Service’s financial situation has long been unsustainable due to a combination of declining mail volumes and an inflexible statutory and regulatory structure that limits our ability to reduce costs and increase revenue. Therefore, Congress must also adopt financial and/or structural reforms to our business model, in order to ensure the Postal Service’s long-term financial viability, as discussed in your report. As discussed below, we generally concur with your discussion of the structural challenges facing the Postal Service and the general policy options for addressing them, albeit with some clarifications.

As an initial matter, we concur with the National Bankruptcy Conference’s thorough legal analysis, which concludes that the Federal bankruptcy laws do not apply to the Postal Service as an entity of the Federal Government. We further agree that attempting to apply a bankruptcy-like legal process meaningfully to the Postal Service would face significant legal hurdles, given that the central flaws in
our business model derive from statute. In this regard, bankruptcy is a process to address outstanding debts, not significant future liabilities caused by statutory obligations. To place the Postal Service on a sustainable footing requires not only addressing our unpaid past liabilities, but also, more fundamentally, reform of statutorily determined aspects of our business model. Therefore, as the National Bankruptcy Conference and GAO note (e.g., at page 36 of the draft report), "all roads for [restructuring the Postal Service's existing and future obligations] lead back to Congress."

The essential policy issues for Congress can be boiled down to two questions: what does Congress want the Postal Service to do, and how should those mandates be paid for? The former question requires Congress to consider, in particular, the level of universal postal service that is appropriate to meet the evolving needs of the American people (which is particularly important to consider in times like these), and the compensation and benefits structure that should apply to the men and women who provide that essential, fundamental service. The latter question requires Congress to consider how the costs incurred by the Postal Service should be funded, whether through the sale of postal products and services, taxpayer appropriations, or other sources.

Over the past decade, the Postal Service has aggressively pursued opportunities within its control to reduce costs and sustain revenue, some of which are discussed in your report. Yet those opportunities remain insufficient to close the current gap between our costs and revenues. The Postal Service has therefore advocated for financial and structural reforms to our business model to rebalance costs and revenue, and to sustain that balance going forward, by giving the Postal Service greater pricing and product flexibility and greater ability to reduce costs.

The central aspect of our proposal has been to rationalize our post-retirement benefits structure by ensuring that our retiree health benefits program is appropriately integrated with Medicare. As your report notes (on page 13 of the draft), most companies do not offer retiree health benefits, and the number that do has declined over time. What is not specifically mentioned in your report is that, for the minority of employers that do continue to offer a retiree health benefits program, the universal practice is to integrate that program with Medicare. Doing so would wipe out most of the Postal Service's remaining retiree health benefits prefunding liability. While Medicare integration would shift some cost to Medicare, the increase would be very small when considering the Medicare program as a whole: it would increase Medicare spending by a small fraction of one percent. In addition, other options regarding our retirement benefits would not require taxpayer support, such as changes in liability calculation methods and diversified investment of fund assets.

Beyond these policy issues, GAO also recommends that Congress consider whether to retain the Postal Service's status as an independent establishment, or to adopt a different institutional structure. We agree with GAO that this topic could logically be part of a comprehensive examination of the Postal Service's business model by Congress. We understand the purpose of the GAO report is to not make any specific recommendations to Congress in this regard, but simply to lay out the various theoretical and practical effects of various possible institutional forms; our feedback on this matter was offered in the same spirit, and as a part of your intellectual exercise. Ultimately, Congress, with input from our Board of Governors and other interested stakeholders, would need to determine whether changing the Postal Service's institutional structure is necessary or appropriate to ensure the continued provision of prompt, reliable, and efficient universal postal services to the American people.

Given Congress's constitutional responsibility over postal services and the critical nature of the postal system to the functioning of the American economy and society, particularly in times like these, Congress would have to address the basic policy questions noted above regardless of whether the Postal Service remains an independent establishment or were recast in some other form. For example, even where foreign postal operators have been privatized, they remain—uniquely among letter and package delivery providers in their countries—legally obligated to provide universal service under statutory and regulatory conditions that constrain their autonomy over rates and costs. In those countries, privatization processes have involved legislative decisions about
service levels, revenue diversification, labor and employment laws, ratemaking authority, governmental assumption of costs (e.g., pension liabilities in Germany and the United Kingdom, as well as operation of the post office network in the United Kingdom), and other taxpayer support (e.g., tax exemptions in various countries, and £1.1 billion in appropriated modernization funding in the United Kingdom). The draft report notes that the same was true of the privatization of Conrail in this country. And even established private automobile manufacturers and airlines have required Federal assistance and legal reforms in order to continue operating, pursuant to Congress's determination of the critical role of those industries in the American economy.

Hence, the core motivation of a sustainable postal service for the nation does not hinge on the provider's institutional form. Rather, that motivation – and the attendant legislative support – should apply so long as Congress deems postal services necessary to the nation's current and future needs. That said, it bears noting, when assessing how institutional form can affect institutional incentives, that a Government entity will necessarily prioritize the achievement of its service mission set forth in statute, while a privatized entity would have obligations to its shareholders.

At the same time, it should also be noted that (contrary to pages 34-35 of the draft report), institutional form in itself is not determinative regarding efficiency incentives. Although an independent establishment of the Executive Branch rather than a Government or private corporation, the Postal Service has long been recognized as at the forefront of postal operators – ahead of several cited in the draft report – in terms of operating efficiency. Many of the efficiency gains achieved by corporatized and privatized foreign postal operators in recent years essentially represent efforts to catch up to what the Postal Service has already done for decades (e.g., worksharing and automated delivery-point sequencing) or to keep pace with recent changes that the Postal Service began implementing before them (e.g., consolidation of its processing network and introduction of two-tier wage schedules). For example, the Postal Service was the first postal operator in the world to automate delivery sequencing (Royal Mail and La Poste followed more than a decade later). A change in institutional form is therefore clearly unnecessary to incent the Postal Service to be efficient.

In that regard, and particularly considering the highly competitive nature of the marketplace in which we operate for all of our products, we consider the drive to operate efficiently to be a part of the DNA of the Postal Service, and that would remain an inherent part of our culture irrespective of our institutional form. For that reason, we do not believe corporatization or privatization would somehow unlock new efficiency potential that the Postal Service purportedly lacks under the current structure; only reform in the laws governing Postal Service's cost structure can do that, and they would do so whether or not the Postal Service remains an independent establishment. Finally, for the reasons noted above, we also do not believe that a change in our status to a more typical federal agency that is more reliant on appropriations would result in disincentives for us to be efficient.

Thank you once again for providing us with the opportunity to comment. We would be pleased to assist your office with further information or discussion of this matter if you believe it would be helpful.

Sincerely,

[Signature]

Thomas J. Marshall

The Honorable Steven T. Mnuchin  
Secretary  
U.S. Department of the Treasury  
1500 Pennsylvania Ave  
Washington, D.C. 20220

Dear Secretary Mnuchin:

We write with urgent concerns regarding the financial condition of the U.S. Postal Service and the $10 billion loan Congress authorized the Department of the Treasury to provide to the Postal Service in the Coronavirus Aid, Relief, and Economic Security (CARES) Act.\(^1\) The Coronavirus emergency and resulting decline in economic activity have jeopardized the Postal Service’s ability to continue providing essential services to every American. We urge you to make this loan as soon as possible, with terms that respect the Postal Service’s status and authorities as an independent establishment of the executive branch. We cannot afford to lose this vital infrastructure at a time when it is most needed to continue delivering prescription drugs, critical packages to households and businesses, Coronavirus-related information, vote-by-mail materials, testing kits, medical equipment, and eventually vaccines across this nation.

On March 20, the Postal Service notified our Committees that due to the Coronavirus emergency it will “run out of cash due to a potential decline in revenue of $8-$10 billion and may have to limit or cease operations by the end of this fiscal year.” The Postal Service subsequently provided revenue projections indicating that it could lose up to $12.6 billion in revenues this fiscal year as a result of the pandemic. During the Coronavirus pandemic, the Postal Service is incurring additional costs as it continues to provide safe deliveries and services to every member of the public, including costs of additional facility cleanings, purchasing critical supplies, and training staff on new procedures, in addition to regular operating costs.\(^2\)

Meanwhile, the Postal Service continues to provide universal, essential services in every community across the nation, delivering medications, emergency information, home supplies, and more. The Postal Service is a lifeline for seniors and for people in rural areas, who often have less access to other services, particularly during this crisis. Postal workers deliver mail and packages to over 159 million households and businesses each day, including over 1 billion prescriptions last year. Businesses rely on the Postal Service to carry their packages the last

\(^2\) See, for example, U.S. Postal Service, How Can We Help?: USPS Coronavirus Updates for Residential Customers (Mar. 24, 2020) (faq.usps.com/s/article/USPS-Coronavirus-Updates-for-Residential-Customers).
mile, particularly in remote and rural areas, as the only carrier that delivers to every single address. Furthermore, the Postal Service is at the center of a $1.4 trillion mailing industry that employs more than 7.5 million people.  

Enacted on March 27, the CARES Act authorizes the Postal Service to borrow up to an additional $10 billion from the Department of the Treasury (Treasury) “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The terms of this loan are to be “mutually agreed upon by the Secretary and the Postal Service.” In discussions with Senate authorizers regarding these provisions, you indicated that a loan would be made “at the Treasury rate.” This compromise was made with the understanding that Treasury would act swiftly to provide immediate, necessary financial relief to the Postal Service with a loan under practical, commonsense financial terms.

We strongly urge you to make this loan to the Postal Service in a timely manner, under fair terms that comply with the intent of the CARES Act, and with respect to the proper authorities delegated to the Postal Service. Congress maintains the authority to set the policies by which the Postal Service operates, delegated by statute to the Postal Service Board of Governors and the Postmaster General. The Board of Governors has the exclusive authority to direct the exercise of “the power of the Postal Service,” appoint or remove the Postmaster General, and “direct and control the expenditures and review the practices and policies of the Postal Service.” We expect the Treasury Department to fully comply with federal statutes and refrain from setting any conditions that would infringe on the Postal Service’s statutory authorities. We cannot afford to compromise this lifeline for seniors, rural areas, and all Americans.

To ensure the terms and conditions that Treasury intends to negotiate with the Postal Service comply with federal statutes and vested authorities, we ask that you provide us with the following documents within one week after the Postal Service requests a loan under the CARES Act:

- The terms and conditions the Treasury will propose to the Postal Service for the exercise of this borrowing authority, as well as any terms and conditions provisionally agreed upon with the Postal Service, including information about any postal policy and/or operational provisions Treasury intends to improperly include as a condition of borrowing;

---

U.S. Department of the Treasury
April 3, 2020
Page 3

- A statement of when Treasury will allow the Postal Service to exercise its borrowing authority, and

- For context regarding the current negotiations, all signed or proposed borrowing agreements (Note Purchase Agreements), as well as all “term sheets” and communications regarding these agreements, between the Postal Service and the Treasury Department since 2018. It is our understanding the last permanent agreement expired in September 2018, and an interim agreement expired in August 2019.

Thank you for your attention to this urgent matter.

Sincerely,

Gary C. Peters

March 19, 2020

The President
The White House
1600 Pennsylvania Avenue, NW
Washington, DC 20500

Dear Mr. President:

We, the undersigned organizations, applaud the Administration and Congress for their swift actions to mitigate the impact of the unfolding Coronavirus pandemic. As our nation deals with this unprecedented public health crisis, we would like to emphasize to you and our senior government leaders that the transportation and goods movement industry stands ready and able to play a pivotal role in promoting economic growth while assisting with pandemic healthcare relief.

Commercial transportation firms will be essential in our country's ability to restore economic health, vitality and a return to everyday life. As the federal, state and local governments take steps to limit the spread of the Coronavirus, it is crucial that such actions do not inadvertently encumber the vital role of package and mail delivery services. We therefore write to encourage you, the Vice President, and the Coronavirus Task Force to reaffirm that transportation and shipping service providers, to include air, ground and ocean networks, are critical industries that should not be hindered by unnecessary restrictions impeding our ability to deliver.

Transportation service providers and shipping/postal operators have already been recognized by the Department of Homeland Security and Presidential Policy Directives as Critical Infrastructure industries. All of these firms utilize sophisticated networks of transportation modes including aviation, rail, ocean and truck to provide final-mile delivery for consumer goods, food, medical supplies and devices, among other items. Given the current disruption to the daily life of many Americans, there is even greater demand, and reliance upon, our services. Our organizations have implemented increased measures to ensure the safety of our people, our customers, and the general public.

It is imperative that precautionary actions taken by federal, state or municipal governments do not impose unnecessary burdens or logistical complications on package and mail delivery services, or on the people that provide those services, including our pilots, couriers, hub operators and truck drivers. Such unintended negative consequences will hamper our ability to reach businesses and consumers that are relying upon timely and dependable delivery. Neither restrictive public policies that impede interstate commerce (i.e. – Article I, Section 8 of the U.S. Constitution) should be enacted, nor should new local government initiatives create a regulatory patchwork that hinders operational efficiency.

Mr. President, the spread of the Coronavirus in the U.S. is testing government institutions, challenging private industry, and placing inordinate demands on our fellow citizens. As our nation mobilizes to mitigate the impact of the pandemic, we ask that you and your Coronavirus Task Force reiterate the valuable role our firms play in this regard, and discourage states and localities from implementing public policies that restrict our ability to serve the American people.

USPS-20-1215-A-009784
We stand ready and willing to continue this important service to our nation, and will continue to work with federal, state and local governments in a coordinated fashion to help our employees deliver for America in the safest possible manner while also keeping our employees and the customers they serve safe too.

Sincerely,

Chairman
