August 21, 2020

Austin Evers
American Oversight
1030 15th Street NW, Suite B255
Washington, DC 20005

RE: FOIA Case No. 2020-FPRO-01103

Dear Mr. Evers:

This responds to your Freedom of Information Act (FOIA) request dated May 12, 2020, in which you seek access to Postal Service records. Specifically, you requested:

All email communications (email messages, complete email chains email attachments, calendar invitations, and attachments thereto) sent by USPS Postmaster General Megan Brennan or General Counsel Thomas Marshall containing any of the following key terms:

i. POTUS
ii. "White House"
iii. "the WH"
iv. Amazon
v. Bezos
vi. "CARES Act"

vii. Mnuchin
viii. "vote-by-mail"
ix. "vote by mail"
x. VBM
xi. "mail-in voting"
xii. ballots

In an effort to accommodate USPS and reduce the number of potentially responsive records, American Oversight agrees that the search for responsive email communications may be limited to emails sent by the specified officials. Despite this search accommodation, American Oversight still requests that complete email chains be produced, displaying both sent and received messages. For example, if Postmaster General Brennan responded to an email sent to her from another individual, both the response Postmaster General Brennan sent and the message she responded to should be produced.

Please provide all responsive records from March 1, 2020, through the date the search is conducted.

The FOIA generally requires federal agencies to disclose to the public reasonably described records within their possession, the FOIA contains several exemptions that permit agencies to withhold certain records. Additionally, an agency may refuse to either confirm or deny that it has relevant records when disclosing the existence or nonexistence of responsive records would itself cause a harm protected under the FOIA statute.
In this instance, the Postal Service asserts Exemption 3 in conjunction with 39 U.S.C § 410(c)(2), as a basis for declining to acknowledge whether responsive records exist related to search term "Amazon" because we find that the records that you requested qualifies as "information of a commercial nature including trade secrets, whether or not obtained from a person outside the Postal Service, which under good business practice would not be publicly disclosed". Thus, the Postal Service declines to conduct a search for the records requested and will neither confirm nor deny whether responsive records exist.

A search was done by our Information Catalog Program (ICP) Office with the other search terms and a total of 3,039 responsive records were located for your request. However, some of the information your request are being withheld under Exemption 3 in conjunction with 39 U.S.C § 410(c)(2), Exemption 5 and 6.

Please find the information enclosed in 2 CDs. The first CD contains 2538 pages of records and the second CD contains 501 pages of records.

Also visit the CARES Act link at https://www.congress.gov/bill/116th-congress/senate-bill/3548/text since the General Counsel and Executive Vice President, Thomas Marshall received a copy of the 1200+ page final bill from Sen. McConnell's office.

Exemption 3 provides that agencies may withhold records that are exempted from disclosure by another statute that "establishes particular criteria for withholding or refers to particular types of matters to be withheld." 5 U.S.C. § 552(b)(3). We consider that 39 U.S.C. §410(c)(1) and §410(c)(2) operates independently as an exempting statute within the scope of Exemption 3.

Section 410(c)(2) of Title 39, U.S. Code, provides that "information of a commercial nature, including trade secrets, whether or not obtained from a person outside the Postal Service, which under good business practice would not be publicly disclosed" is exempt from the disclosure requirements of the FOIA. This section was enacted as part of the Postal Reorganization Act, 39 U.S.C. § 101 et seq., (1970), which established the Postal Service as an independent establishment of the executive branch and generally directed it to conduct its operations in accordance with sound business principles.

To determine what constitutes "good business practice" under § 410(c)(2), courts consider the customs of the commercial world, management techniques, and business law, as well as the standards of practice adhered to by large corporations. The Postal Service may withhold information of a commercial nature if large businesses would do the same. It would not be good business practice to release the requested information, and private businesses would not release information of this nature to the public.

Exemption 5 permits withholding inter-agency or intra-agency letters or memorandums that would not be available by law to a party other than an agency in litigation with the U.S. Postal Service. The purpose of this exemption is to encourage open, frank discussion on matters of policy between agency personnel; to protect against premature disclosure of proposed policies before they are finally adopted and to protect against public confusion that might result from disclosure of reasons and rationales that were not in fact ultimately the grounds for an agency’s action. Other information withheld under Exemption 5 are documents and other memoranda prepared by agency attorneys that contain confidential communications encompassing opinions given by an attorney, and communications between attorneys that reflect client-supplied information.

In this instance, the withheld information consists, in part, of communications prepared by, or at the direction of, agency attorneys that contain confidential communications encompassing opinions given by an attorney, and communications between attorneys that reflect client-supplied information. Accordingly, such information qualifies for Exemption 5 protection.

Also, some information is being withheld under Exemption 6. Exemption 6 permits withholding documents where release of personnel and similar files would constitute a clearly unwarranted
invasion of personal privacy. Any records which contain information concerning particular
individuals, may qualify for the exemption's protection. In this instance, email addresses and cell
phone numbers of postal employees have been withheld under Exemption 6.

In determining whether to release records that may be protected by Exemption 6, the agency
must balance the privacy interests of the individuals involved against the public interest, if any,
that would be served by disclosure. We do not consider that there is a public interest in the
disclosure of the requested information sufficient to outweigh the privacy interests of the
individuals involved. For the purposes of FOIA Exemption 6, the only public interest to be
weighed is the extent to which disclosure would service the "core purpose" of the FOIA, which is
to contribute significantly to public understanding of the operations or activities of the government,
or, in other words, to shed light on the conduct of government agencies.

If you are not satisfied with the response to this request, you may file an administrative appeal
within 90 days of the date of this response letter by writing to the General Counsel U.S. Postal
Service 475 L'Enfant Plaza SW Washington, DC 20260 or via email at FOIAAppeal@usps.gov.
Your appeal must be postmarked or electronically transmitted within 90 days of the date of the
response to your request. The letter of appeal should include, as applicable:

(1) A copy of the request, of any notification of denial or other action, and of any
other related correspondence;
(2) The FOIA tracking number assigned to the request;
(3) A statement of the action, or failure to act, from which the appeal is taken;
(4) A statement identifying the specific redactions to responsive records that the
requester is challenging;
(5) A statement of the relief sought; and
(6) A statement of the reasons why the requester believes the action or failure to
act is erroneous.

For further assistance and to discuss any aspect of your request, you may contact any of the
FOIA Public Liaison listed below:

PRIVACY & RECORDS OFFICE
US POSTAL SERVICE
475 L'ENFANT PLAZA SW RM 1P830

Megan,

Attached is the Members letter to the Treasury Secretary that we discussed.

Thanks
Ron
The Honorable Steven T. Mnuchin  
Secretary  
U.S. Department of the Treasury  
1500 Pennsylvania Ave  
Washington, D.C. 20220  

Dear Secretary Mnuchin:

We write with urgent concerns regarding the financial condition of the U.S. Postal Service and the $10 billion loan Congress authorized the Department of the Treasury to provide to the Postal Service in the Coronavirus Aid, Relief, and Economic Security (CARES) Act.\(^1\) The Coronavirus emergency and resulting decline in economic activity have jeopardized the Postal Service’s ability to continue providing essential services to every American. We urge you to make this loan as soon as possible, with terms that respect the Postal Service’s status and authorities as an independent establishment of the executive branch. We cannot afford to lose this vital infrastructure at a time when it is most needed to continue delivering prescription drugs, critical packages to households and businesses, Coronavirus-related information, vote-by-mail materials, testing kits, medical equipment, and eventually vaccines across this nation.

On March 20, the Postal Service notified our Committees that due to the Coronavirus emergency it will \(\text{(b)(3), 410(c)(2)}\). During the Coronavirus pandemic, the Postal Service is incurring additional costs as it continues to provide safe deliveries and services to every member of the public, including costs of additional facility cleanings, purchasing critical supplies, and training staff on new procedures, in addition to regular operating costs.\(^2\)

Meanwhile, the Postal Service continues to provide universal, essential services in every community across the nation, delivering medications, emergency information, home supplies, and more. The Postal Service is a lifeline for seniors and for people in rural areas, who often have less access to other services, particularly during this crisis. Postal workers deliver mail and packages to over 159 million households and businesses each day, including over 1 billion prescriptions last year. Businesses rely on the Postal Service to carry their packages the last

\(^2\) See, for example, U.S. Postal Service, \textit{How Can We Help?: USPS Coronavirus Updates for Residential Customers} (Mar. 24, 2020) (faq.usus.com/s/article/USPS-Coronavirus-Updates-for-Residential-Customers).
mile, particularly in remote and rural areas, as the only carrier that delivers to every single address. Furthermore, the Postal Service is at the center of a $1.4 trillion mailing industry that employs more than 7.5 million people.\(^3\)

Enacted on March 27, the CARES Act authorizes the Postal Service to borrow up to an additional $10 billion from the Department of the Treasury (Treasury) “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The terms of this loan are to be “mutually agreed upon by the Secretary and the Postal Service.”\(^4\) In discussions with Senate authorizers regarding these provisions, you indicated that a loan would be made “at the Treasury rate.” This compromise was made with the understanding that Treasury would act swiftly to provide immediate, necessary financial relief to the Postal Service with a loan under practical, commonsense financial terms.

We strongly urge you to make this loan to the Postal Service in a timely manner, under fair terms that comply with the intent of the CARES Act, and with respect to the proper authorities delegated to the Postal Service. Congress maintains the authority to set the policies by which the Postal Service operates, delegated by statute to the Postal Service Board of Governors and the Postmaster General. The Board of Governors has the exclusive authority to direct the exercise of “the power of the Postal Service,”\(^5\) appoint or remove the Postmaster General, and “direct and control the expenditures and review the practices and policies of the Postal Service.”\(^6\) We expect the Treasury Department to fully comply with federal statutes and refrain from setting any conditions that would infringe on the Postal Service’s statutory authorities. We cannot afford to compromise this lifeline for seniors, rural areas, and all Americans.

To ensure the terms and conditions that Treasury intends to negotiate with the Postal Service comply with federal statutes and vested authorities, we ask that you provide us with the following documents within one week after the Postal Service requests a loan under the CARES Act:

- The terms and conditions the Treasury will propose to the Postal Service for the exercise of this borrowing authority, as well as any terms and conditions provisionally agreed upon with the Postal Service, including information about any postal policy and/or operational provisions Treasury intends to improperly include as a condition of borrowing;

---

A statement of when Treasury will allow the Postal Service to exercise its borrowing authority; and

For context regarding the current negotiations, all signed or proposed borrowing agreements (Note Purchase Agreements), as well as all “term sheets” and communications regarding these agreements, between the Postal Service and the Treasury Department since 2018. It is our understanding the last permanent agreement expired in September 2018, and an interim agreement expired in August 2019.

Thank you for your attention to this urgent matter.

Sincerely,

Gary C. Peters

April 3, 2020

Ms. Megan J. Brennan
Postmaster General and Chief Executive Officer
United States Postal Service
475 L’Enfant Plaza, S.W.
Room 4012
Washington, D.C. 20260

Dear Ms. Brennan:

We write with urgent concern about the immediate financial condition and needs of the U.S. Postal Service in light of the coronavirus emergency and resulting decline in economic activity. This crisis has jeopardized the Postal Service’s ability to continue providing essential service to every American. We ask that you provide information as soon as possible to ensure that Congress and the public are fully informed about this matter.

On March 20, the Postal Service notified our Committees that due to the coronavirus crisis, [redacted]. Meanwhile, the Postal Service continues to provide universal service in every community across the country, delivering medications, emergency information, home supplies, and more.

On March 27, Congress passed the CARES Act (P.L. 116-136), which authorizes the Department of the Treasury to provide a $10 billion loan to the Postal Service “if the Postal Service determines that, due to the COVID-19 emergency, it will not be able to fund operating expenses without borrowing money.” The Secretary of the Treasury retains the discretion to make that loan and set terms, which must be mutually agreed upon by the Postal Service.

We strongly urge the Postal Service to assert its proper authorities with regard to the finances and management of the Postal Service and ensure that this loan is made in a timely manner and under conditions acceptable to the Postal Service.

Given the urgent need to fully understand the Postal Service’s financial condition, we ask that you produce the following information by April 6, 2020:

1. The most recent financial estimates regarding the Postal Service’s finances through the end of the fiscal year, under expected economic conditions, including: projected revenue, expenses, emergency expenses, and cash-on-hand. Such
estimates should include information about the attendant economic assumptions. We request that you send a copy of the estimates that will be used in discussions with the Treasury Department about borrowing, and continue to send updated estimates as necessary;

2. A clear public statement from the Postal Service regarding its expected financial condition, to inform its customers about its revenues, expenses, and expected solvency; and

3. A statement of the amount of funds the Postal Service intends to request from the Treasury Department under the CARES Act, including the terms requested by the Postal Service for the authorized loan.

Thank you for your attention to this urgent matter. Please direct all questions and correspondence to our staff at [Redacted].

Responding to Committee Document Requests

1. In complying with this request, produce all responsive documents that are in your possession, custody, or control, whether held by you or your past or present agents, employees, and representatives acting on your behalf. Produce all documents that you have a legal right to obtain, that you have a right to copy, or to which you have access, as well as documents that you have placed in the temporary possession, custody, or control of any third party.

2. Requested documents, and all documents reasonably related to the requested documents, should not be destroyed, altered, removed, transferred, or otherwise made inaccessible to the Committees.

3. In the event that any entity, organization, or individual denoted in this request is or has been known by any name other than that herein denoted, the request shall be read also to include that alternative identification.

4. The Committees’ preference is to receive documents in electronic form (i.e., CD, memory stick, thumb drive, or secure file transfer) in lieu of paper productions.

5. Documents produced in electronic format should be organized, identified, and indexed electronically.

6. Electronic document productions should be prepared according to the following standards:

   a. The production should consist of single page Tagged Image File (“TIF”), files accompanied by a Concordance-format load file, an Opticon reference file, and a file defining the fields and character lengths of the load file.

   b. Document numbers in the load file should match document Bates numbers and TIF file names.

   c. If the production is completed through a series of multiple partial productions, field names and file order in all load files should match.

   d. All electronic documents produced to the Committees should include the following fields of metadata specific to each document, and no modifications should be made to the original metadata:

      BEGDOC, ENDDOC, TEXT, BEGATTACH, ENDDATTACH, PAGECOUNT, CUSTODIAN, RECORDTYPE, DATE, TIME, SENTDATE, SENTTIME, BEGINDATE, BEGIN TIME, ENDDATE, ENDTIME, AUTHOR, FROM, CC, TO, BCC, SUBJECT, TITLE, FILENAME, FILEEXT, FILESIZE, DATECREATED, TIMECREATED, DATE LASTMOD, TIME LASTMOD,
Documents produced to the Committees should include an index describing the contents of the production. To the extent more than one CD, hard drive, memory stick, thumb drive, zip file, box, or folder is produced, each should contain an index describing its contents.

Documents produced in response to this request shall be produced together with copies of file labels, dividers, or identifying markers with which they were associated when the request was served.

When you produce documents, you should identify the paragraph(s) or request(s) in the Committees’ letter to which the documents respond.

The fact that any other person or entity also possesses non-identical or identical copies of the same documents shall not be a basis to withhold any information.

The pendency of or potential for litigation shall not be a basis to withhold any information.

In accordance with 5 U.S.C. § 552(d), the Freedom of Information Act (FOIA) and any statutory exemptions to FOIA shall not be a basis for withholding any information.

Pursuant to 5 U.S.C. § 552a(b)(9), the Privacy Act shall not be a basis for withholding information.

If compliance with the request cannot be made in full by the specified return date, compliance shall be made to the extent possible by that date. An explanation of why full compliance is not possible shall be provided along with any partial production.

In the event that a document is withheld on the basis of privilege, provide a privilege log containing the following information concerning any such document: (a) every privilege asserted; (b) the type of document; (c) the general subject matter; (d) the date, author, addressee, and any other recipient(s); (e) the relationship of the author and addressee to each other; and (f) the basis for the privilege(s) asserted.

If any document responsive to this request was, but no longer is, in your possession, custody, or control, identify the document (by date, author, subject, and recipients), and explain the circumstances under which the document ceased to be in your possession, custody, or control.

If a date or other descriptive detail set forth in this request referring to a document is inaccurate, but the actual date or other descriptive detail is known to you or is otherwise apparent from the context of the request, produce all documents that would be responsive as if the date or other descriptive detail were correct.
18. This request is continuing in nature and applies to any newly-discovered information. Any record, document, compilation of data, or information not produced because it has not been located or discovered by the return date shall be produced immediately upon subsequent location or discovery.

19. All documents shall be Bates-stamped sequentially and produced sequentially.

20. Two sets of each production shall be delivered, one set to the Majority Staff and one set to the Minority Staff. When documents are produced to the Committee on Oversight and Reform, production sets shall be delivered to the Majority Staff in Room 2157 of the Rayburn House Office Building and the Minority Staff in Room 2105 of the Rayburn House Office Building. When documents are produced to the Committee on Financial Services, production sets shall be delivered to the Majority Staff in Room 2129 of the Rayburn House Office Building and the Minority Staff in Room 4340 of the O’Neill House Office Building. When documents are produced to the Permanent Select Committee on Intelligence, production sets shall be delivered to Majority and Minority Staff in Room HVC-304 of the Capital Visitor Center.

21. Upon completion of the production, submit a written certification, signed by you or your counsel, stating that: (1) a diligent search has been completed of all documents in your possession, custody, or control that reasonably could contain responsive documents; and (2) all documents located during the search that are responsive have been produced to the Committee.

Definitions

1. The term “document” means any written, recorded, or graphic matter of any nature whatsoever, regardless of how recorded, and whether original or copy, including, but not limited to, the following: memoranda, reports, expense reports, books, manuals, instructions, financial reports, data, working papers, records, notes, letters, notices, confirmations, telegrams, receipts, appraisals, pamphlets, magazines, newspapers, prospectuses, communications, electronic mail (email), contracts, cables, notations of any type of conversation, telephone call, meeting or other inter-office or intra-office communication, bulletins, printed matter, computer printouts, teletypes, invoices, transcripts, diaries, analyses, returns, summaries, minutes, bills, accounts, estimates, projections, comparisons, messages, correspondence, press releases, circulars, financial statements, reviews, opinions, offers, studies and investigations, questionnaires and surveys, and work sheets (and all drafts, preliminary versions, alterations, modifications, revisions, changes, and amendments of any of the foregoing, as well as any attachments or appendices thereto), and graphic or oral records or representations of any kind (including without limitation, photographs, charts, graphs, microfiche, microfilm, videotape, recordings and motion pictures), and electronic, mechanical, and electric records or representations of any kind (including, without limitation, tapes, cassettes, disks, and recordings) and other written, printed, typed, or other graphic or recorded matter of any kind or nature, however produced or reproduced, and whether preserved in writing, film, tape, disk, videotape, or otherwise. A document bearing any notation not a
2. The term “communication” means each manner or means of disclosure or exchange of information, regardless of means utilized, whether oral, electronic, by document or otherwise, and whether in a meeting, by telephone, facsimile, mail, releases, electronic message including email (desktop or mobile device), text message, instant message, MMS or SMS message, message application, or otherwise.

3. The terms “and” and “or” shall be construed broadly and either conjunctively or disjunctively to bring within the scope of this request any information that might otherwise be construed to be outside its scope. The singular includes plural number, and vice versa. The masculine includes the feminine and neutral genders.

4. The term “including” shall be construed broadly to mean “including, but not limited to.”

5. The term “Company” means the named legal entity as well as any units, firms, partnerships, associations, corporations, limited liability companies, trusts, subsidiaries, affiliates, divisions, departments, branches, joint ventures, proprietorships, syndicates, or other legal, business or government entities over which the named legal entity exercises control or in which the named entity has any ownership whatsoever.

6. The term “identify,” when used in a question about individuals, means to provide the following information: (a) the individual’s complete name and title; (b) the individual’s business or personal address and phone number; and (c) any and all known aliases.

7. The term “related to” or “referring or relating to,” with respect to any given subject, means anything that constitutes, contains, embodies, reflects, identifies, states, refers to, deals with, or is pertinent to that subject in any manner whatsoever.

8. The term “employee” means any past or present agent, borrowed employee, casual employee, consultant, contractor, de facto employee, detailee, fellow, independent contractor, intern, joint adventurer, loaned employee, officer, part-time employee, permanent employee, provisional employee, special government employee, subcontractor, or any other type of service provider.

9. The term “individual” means all natural persons and all persons or entities acting on their behalf.
Thanks,

Megan

Subject: Business Letter in Support of Emergency Relief for USPS

Members of the Board of Governors,

Please find attached a letter sent this morning to Congressional leaders regarding the Postal Service. It is signed by more than 1200 businesses, trade associations and consumer groups from around the country.

Best regards,

Michael

Michael J. Elston
Secretary of the Board of Governors
United States Postal Service
April 30, 2020

Dear Congressional Leaders:

The undersigned companies, trade associations and consumer advocacy organizations believe it is imperative to save the United States Postal Service. We thank you all for your leadership as the nation confronts this pandemic, and urge you to provide enough funding to enable USPS to survive and serve its customers, the American people, during this exceptionally trying time.

We, along with the postal-reliant industry that generates $1.6 trillion in sales and employs 7.3 million workers, have long supported a self-sufficient Postal Service. But no business entity can withstand a 50% or more externally-imposed drop in business and revenues, as USPS projects due to COVID-19, and long survive. That is why emergency funding must be provided now.

The American people have been reminded during this pandemic of just how fundamental to American life the Postal Service still is. USPS is delivering prescriptions, household and business staples, groceries, Personal Protective Equipment, greeting cards and personal correspondence to bridge social distancing, Paycheck Protection Program, Social Security and tax refund checks, CDC advice cards on keeping oneself and family safe, and newspapers and magazines still vital to informing the American people. It is enabling a new wave of businesses along with the e-commerce sector to survive the pandemic through remote order and fulfillment. Postal Service delivery is essential. And it is of particularly acute need in rural areas of the country, where there are no alternatives, and often not even broadband. USPS is a lifeline there and elsewhere throughout the country during these challenging times.

As to how much is needed, we defer to the experts, the bipartisan Postal Service Board of Governors appointed by the President, and our leaders in Congress. While substantial sums are needed, they amount to a small part of the emergency funds Congress has provided and will continue to provide, including to sustain small businesses, their employees and the economy. The Postal Service is the backbone of businesses large and small in America, and must endure.

The American people, 91% of whom approve of USPS\(^1\), often raise a commotion if a single Post Office is to be closed. Closing the entire system or imposing a major reduction in service during this time of need would magnify that reaction substantially.

We again strongly urge you to save the Postal Service and preserve a fundamental lifeline to millions of Americans.

Thank you.

Sincerely,

Megan,

I also expect that, (b)(5)

Thanks
Ron
April 28, 2020

Dear Speaker Pelosi, Minority Leader McCarthy, Majority Leader McConnell, and Minority Leader Schumer:

The coronavirus crisis is wreaking havoc on the U.S. Postal Service. Without immediate help, the Postal Service — a vital staple of American society since 1775 — could cease to function by this summer. This crisis is also affecting the State of New York more than any other. There were 287 confirmed cases of coronavirus and 14 deaths among postal workers in New York as of April 20, 2020.¹

As a direct result of the coronavirus crisis, first class and business mail volume across the country has dropped at an alarming rate. Mail volume is down by more than 30% from the same period last year. Over the next ten years, the Postal Service estimates that losses caused by the coronavirus crisis would be $54 billion.²

This is a national emergency. The American people rely on the Postal Service to deliver crucial goods and services every day, including more than a billion life-saving medications last year alone, millions of economic stimulus checks and unemployment benefits to help during this crisis, and 2020 Census forms for every household in America.

In New York, the Postal Service delivers to 7.7 million addresses and has more than 1,800 Post Offices. In our state, the Postal Service employed 44,675 people and paid close to $3

¹ Email from the Office of Congressional and Intergovernmental Affairs, U.S. Postal Service, to Committee on Oversight and Reform (Apr. 20, 2020).
² Briefing by Megan J. Brennan, Postmaster General and Chief Executive Officer, U.S. Postal Service, to Committee on Oversight and Reform (Apr. 9, 2020).
billion in wages in 2018.\textsuperscript{3} New York also will rely heavily on the Postal Service to conduct its primary on June 23, 2020, during which no-excuse absentee ballots will be accepted.\textsuperscript{4}

The Postal Service is a fundamental component of America’s economic infrastructure, providing affordable, universal delivery of mail and e-commerce packages to more than 160 million households and businesses. The Postal Service propels a $1.6 trillion mailing industry that employs 7.3 million people. It does all of this while operating as a business and receiving next to nothing in taxpayer dollars.\textsuperscript{5}

Both Democrats and Republicans supported large infusions of liquidity for other industries and companies that are critical to our nation’s economy, and we must do the same now to save the Postal Service.

The Postal Board of Governors has asked for a package that includes $25 billion in emergency appropriations to offset coronavirus-related losses, $25 billion for “shovel-ready” projects to modernize the Postal Service, and access to $25 billion in unrestricted borrowing authority from the Treasury.\textsuperscript{6}

To be clear, these requests were put forth unanimously by a Board of Governors with a Republican majority—all of whom were appointed by President Trump.

The Postal Service is an indispensable component of America’s critical infrastructure, and its workers are on the frontlines every single day delivering information and packages to the American people. We strongly support emergency funding for the Postal Service and urge you to do the same.

Sincerely,

Carolyn B. Maloney

Peter T. King

\textsuperscript{3} U.S. Postal Service, \textit{The United States Postal Service Economic Impact: The State of New York} (July 2019).

\textsuperscript{6} Briefing by Megan J. Brennan, Postmaster General and Chief Executive Officer, U.S. Postal Service, to Committee on Oversight and Reform (Apr. 9, 2020).

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.

Katherine A. Agodorny,

Unfortunately, my family and I have come to find out that the USPS locally will no longer deliver our parcels to our home. Our address is on file at the post office to deliver our parcels to our home without a signature. We currently have two parcels being held at the post office despite a previous understanding that they were to be home delivered. Although an explanation is given that subdivision roads are under construction, residents continue to have full access to the roadways and ALL other commercial businesses and delivery services (including UPS, FedEx, and Amazon) are completing their routes and services/deliveries without incident, delay, or interruption.

In this current pandemic, particularly with the state mandated "Stay at Home" Order except for mandatory services to sustain or prolong life as well as the unnecessary increased exposure to me as an individual of an increased risk for COVID-19 by visiting a post office facility, this current policy of avoiding home delivery is insensitive and potentially dangerous to health.

The USPS current advertisements include "Priority is Serving You", "We Will Never Stop Delivering to Every Person in this Country", "Every Day, All Across America, We Deliver for You".

I find your current policy of not delivering our parcels to our home in direct opposition to the ongoing policies promoted by the USPS. Please resume home delivery of ALL US Mail to our home immediately.

Thank you very much. Please reply at your earliest convenience.

Sent: Monday, May 11, 2020 11:22 AM
To: \[\text{(b)(5)}\]
Subject: On vote-by-mail

RICHARD – even during this pandemic, Trump and his Republican allies are opposing vote-by-mail, because they believe it will hurt their chances at reelection.

This is indefensible. No American should have to choose between voting and staying healthy – which is why Michelle Obama is getting involved and advocating for vote-by-mail:

[https://als-totem.s3.amazonaws.com/emailimages/11172/DGA-6425_Top.png](http://links.dga.mkt6018.com/ctt?ms=MTczMjQwMDAS1&kn=5&r=NDQyMDMwMDg0OTE0S0&b=0&j=MTg4MDY5OTA0MAS2&mt=1&rt=0>
Michelle Obama is demanding we expand mail-in voting, but she needs your help! We need 100,000 signatures on our vote-by-mail petition, but right now, we’re 2,512 signatures short – and we’re still missing your name. Please, RICHARD, Michelle Obama is counting on you to add your name before midnight:

Sign the petition to support universal vote-by-mail! http://links.dga.mkt6018.com/ctt?ms=MTczMjQwMDAS1&kn=6&r=NDQyMDMwMDg0OTE0S0&b=0&j=MTg4MDY5OTA0MAS2&mt=1&rt=0

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments. This email shall re-confirm that it took USPS nearly twelve (12) month to successfully executive a change of address verified request the last time I moved (see previous emails). I can now confirm, that USPS has, once again, failed to execute the most recent confirmed change of address request. On March 6th, my mother suffered a massive stroke and I have been attending to her ever since. As a result, I "successfully" changed my address through the USPS website on March 30th, 2020 see confirmation pic. It is now May 11th and I can confirm a total of zero (0) pieces of mail have been forward to me. While I did receive digital confirmation (see below) and did receive the customary coupons that accompany the traditional initial 5x7 mail from USPS confirming the change, no mail has arrived. Furthermore, I can confirm, from my house sitters, that mail continues to arrive at my house in [b](6). It’s been 6 weeks.

[IMG_2902.png]

Kindly, fix this. I lost money, dozens of hours of my time and a client last time USPS failed to recognize it’s responsibility. I beg you in hopes of avoiding the same fate this time.

Thanks.
As mail continues not to be forwarded to my current address per the agreement I entered into with USPS in May of 2018, USPS is still in breach. Additionally, I received confirmation in November that my multiple mail forwarded requests were still "not in the system". Lastly, I am attaching a letter that I was forced to write in February to USPS employee (b)(6). It is self-explanatory and I afforded her 6 weeks to respond. The attached is an accurate snapshot of USPS information systems, internal process and ability to handle customer service.

To date, I have spent 23.5 hours in connection to USPS' breach.

Regards,

(b)(6)

On Mon, Dec 17, 2018 at 8:26 PM DJ T <<EMAIL>> wrote:

Mr. Grayson,

I really appreciate yours and any response.

Please know, if this matter has been referred to Mr. (b)(6), he has already sent me multiple form letters over the past 6 months. These form letters were filled with platitudes and condition responses. Therefore, this matter should be addressed by someone willing to properly engage.

I thank you in advance for your understanding.

On Mon, Dec 17, 2018 at 8:08 PM Grayson, Cornell R - Merrifield, VA <<EMAIL>> wrote:

Dear Mr. Talbot:

This is to acknowledge your recent inquiry to the Office of the Postmaster General.

Please accept my apology on behalf of the Postal Service for the situation you describe in your message. Your inquiry has been escalated to the Los Angeles District Manager’s office for investigation, documentation and resolution. You will hear from your District office directly regarding this inquiry.

Thank you for contacting the Postal Service and bringing this matter to our attention.

Sincerely,

Cornell Grayson

Subject: Fwd: [EXTERNAL] Fwd: Mail

Ms. Brenan,

As USPS' breach has not been resolved, I send this update for your records.

Although it has become clear that USPS is either unwilling or incapable of addressing this ongoing issue, perhaps you can instruct someone from your staff to at least attempt to answer the questions below. To date, I have received no answers, no explanations and little engagement. Considering the stage we are at, the questions below should be answered in writing.

Happy Holidays.

Best,

(b)(6)-------- Forwarded message ---------

Subject: Re: [EXTERNAL] Fwd: Mail
To: Vaccarella, Gary J - Washington, DC <(b)(6), (b)(3), 410(c)(2)>
Cc: Coleman, Michael C - Los Angeles, CA <(b)(6), (b)(3), 410(c)(2)>, McAdams, Kevin L - Merrifield, VA <(b)(6), (b)(3), 410(c)(2)>

In the furtherance of trying to resolve USPS continual breach as it approaches it's 7th month, below please find some updates from the past three weeks.

* On November 29th, 2018 while I was at the (b)(6) Post office off (b)(6) drive, USPS employee (b)(6) notified me that there is no record of ANY change of address in connection to my move. She checked the system twice. Despite this ongoing issue and no less than four (4) completed and submitted change of address forms, she was certain there was no variation of my name nor my business. This is beyond any belief. Even though it has been six (6) month and USPS continually refuses to provide me with an explanation, I will simply ask again. How is this possible? I have a recording of her explanation. Lastly, I want to note that Ms. (b)(6) was awesome. She was professional, attentive and apologetic. In no way should USPS reprimand her for being honest.

* Over the past few weeks two (2) pieces of mail were successfully forwarded to my new, current address. With the exception of one other piece of mail, I can confirm these are the only pieces of mail that have been properly forwarded with the customary yellow sticker. Both of these pieces, the sender had the address "printed" on the envelope.

* I can confirm that a minimum of four (4) pieces of mail in the past three weeks have not not been forwarded to my new, current address. Their whereabouts are unknown. All these pieces had clearly "hand-written" addresses. These bring the total of known, documented pieces of mail missing, improperly delivered to old address and/or returned to sending (all breaches of our agreement from May 28th 2018) now stands at least 20.

This is either 5th or 6th time I have attempted to address this specific package. All previous attempts have been ignored by USPS. As previously stated in earlier emails, in early October I was alerted to
a piece of mail en route to my previous address. Because on this long-standing, well-documented usps failure, as a courtesy, I alerted the USPS including both Mr. (b)(6) and Mr. M(b)(6) multiple times while the package was in USPS possession. Zero response and no action was taken. I was notified by Ms. (b)(6) the individual who lives at my previous address, the day the carrier mis-delivered the package. Once again, I alerted USPS. Zero response and no action taken. As a direct result of USPS mistake and lack of response to my courtesy alerts, this package was returned to sender by USPS. I notified USPS and asked multiple times for a solution to get the package resent and properly delivered. Once again, zero response and no action was taken. As a direct result of USPS mistake and inaction, the sender was forced to resend the package via fedex. As I have written previously, once again attached is copy of the bill, I had to pay for the direct mistakes of USPS which could have been averted with minimal response by USPS. I have a secondary paper trail that confirms this saga. Is it or is it not the position of USPS that they are not responsible for the costs incurred in connection to the this package??

* I recently received a certified letter from the country of (b)(6) threatening me with sanctions as a result of me not showing up for Jury Duty. I never received the summons. Based upon the dates they claim they sent me multiple summons, it appears that their summons reached the same fate that dozens of other pieces of mail have experienced. Showed I incur any costs or sanctions as result, USPS will be held responsible.

unrelated USPS issues:

* On November 27th, while at the (b)(6) Post office, I sent a 2-3 day Priority Mail envelope (which contained a cashier’s check) to (b)(6) . I did this with the help and approval of an USPS employee. As of December 7th, the vendor/recipient had not received the envelope. As a result, and since this payment needed to be made in order for a gift to be manufactured in time for Christmas, I was forced to go back to the post office and send another check to the vendor overnight. The first attempt finally arrived on December 10th. Why would a 2-3 day priority envelope take 13 days? Lastly, I did incur additional costs of having to stop payment on one of the checks.

* On the same day 11/27, on the same trip stated above, I dropped a piece of mail off at the Post Office. It was a standard envelope (9x4in) with first class postage. This envelope also possessed a check. It was being sent to 90025 (about a 2 miles away as the crow flies). This envelope did not arrive until December 8th. 11 days. I was threatened with late charges, but was able to explain and show proof of my previous issues with USPS.

USPS is responsible for at least $50 of fees incurred as a direct result of their failures. This does not include lost interest (%) and lost wages as a result of these ongoing issues.

I have now spent 19.6 hours dealing with USPS breach. This includes the 30 minutes it took to write this email

For several years the postal workers and postmaster at the California post office have been falsifying their records. They claim that they have been trying to deliver packages from Amazon and other businesses. I have had to travel to the post office at least 100 times to retrieve packages that they have never even tried to deliver. Your employees are committing a federal crime by falsifying records and by claiming that they attempted delivery when they just scan the package and leave it at the post office. This is very easy to confirm because their scan time and attempted deliver times are within minutes of each other and when I pointed that out to the local post master, she screamed at me to "get out of her post office". These employees enter false information into your database willingly. Nonetheless, many, many federal crimes have been committed and continue to be committed on your watch. I hope you choose to abide by the law now that you have been informed.
To Whom it May Concern,

My packages, despite me having asked several times that they be delivered to my house, are left propped on my mailbox on 625. I bought the largest mailbox I could to keep this from happening. Sometimes it’s almost comical how bad the delivery is here and there’s a whole discussion string of 162 posts online where we trade our ridiculous and awful stories about mail delivery in this area.

Today I arrived home to a medium sized Amazon envelope propped in the rain on top of my EMPTY mailbox. It would have easily fit in the box. C’mon. Usually, when it rains, my box is just left open so all of my mail is wet. This was just bizarre. I am including two photos, one of how I found it and one showing it would have easily fit in the box.

At times I don’t get mail for days then seem to get several days worth at once. At one time, it took 42 days for a envelope to reach me from Service Access Management, 10 miles away. I regularly am missing packages and have to write to companies that say they have delivered already, and as regularly, my neighbors and I are trading our mis-delivered mail.

It’s so bad that for years I have been dropping my mail off because I do not trust the service at the branch.

Once again, I am asking that my packages be dropped off at my house, not left propped on top of my mail box on a busy road which is out of sight of my house.

Thank you,
Thank you.

Subject: [EXTERNAL] Please Help

Good Morning, I want to start off with my appreciation to you for keeping the mail moving forward during this crisis.

My reason for writing you is I am at my wits end with the USPS here in (b)(6) Alaska. I have had to contact our state senator (b)(6) to straighten out my mail carrier. I could not get a hold of our local post master. He will never answer the phone and when I go into see him he is gone. I even tried to make an appointment.

Mind you my significant other was a contract mail carrier for 30 years by air in remote areas based out of (b)(6) Alaska. So I understand how contract mail is provided.

Here are my issues, Mail carrier sends my mail back as un-deliverable, I believe I am allowed 10 business days. My pay checks and jury duty notice were sent back. She removes the mail after 5 days and then refuses to deliver at all. I am missing several packages. She, the mail carrier told Amazon my box was too full. There was one envelope. The tracking number on this package is (b)(6). I use informed delivery, this package does not show up on it.

I would contact my local USPS, but I can’t. They never answer the phone and the post master is never there. (b)(6) has been going on for 5 plus years.

I know you are very busy and will probably never even see this but maybe someone will. I am not the only person suffering at the hands of this carrier. My address is: (b)(6). I have been missing several packages.

Thank you for your service and good luck in your new adventures.
Sincerely,
(b)(6)
Mendonca, Pat - Washington, DC

Thank you, Chairman Duncan

Good morning everyone.

I also want to express my deep condolences to the families, friends and coworkers of our postal colleagues that have passed as result of COVID-19. My thoughts and prayers are with you.

I would also add my thanks – and my admiration and respect – for the men and women of the Postal Service.

Postal employees embody the spirit of public service as they continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure.

The 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages throughout this country.

We deliver supplies that sustain us, prescription medications, benefit checks and other critical materials such as medical information, financial statements, absentee ballots, and Census surveys.

This fundamental service which our employees provide is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.
The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the nation with prompt, secure, and affordable mail and package delivery services—a mission proudly accepted each and every day.

This mission has never been more important, and it is clearer than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.

A recent survey by the Pew Research Center shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service.

This is a credit to the men and women of the Postal Service who go to work every day to serve their communities.

As Chairman Duncan mentioned, throughout the nation, in community after community, we have seen expressions of gratitude for the work our employees do to deliver for America.

We are deeply grateful to the public for these many uplifting messages of support—it makes clear to us that the Postal Service matters to the American people.
Several weeks ago, I provided a briefing to members and staff of the House Committee on Oversight and Government Reform, and separately to the Chairman and Ranking Member of the Senate Committee on Homeland Security and Governmental Affairs, on our financial projections that we anticipate will directly result from the impact of COVID-19, both in the short and longer term.

In our briefings, based upon the data that was available to us at the time, we described the significant impacts that we believe the pandemic will have on our business.

The stark reality is that the pandemic will cause meaningful near-term and long-term implications from the steep decline in revenue we will suffer this year, and in the coming years, that endanger our ability to fulfill our universal service mission, absent Congressional intervention.

We also provided Congress with our immediate legislative request, to help the Postal Service deal with the direct impacts of the pandemic. The request was unanimously approved by our Board of Governors.

We seek a significant appropriation to help offset the volume and revenue losses resulting from the pandemic over the next 18 months.
We also request modernization funding so that we can weather the longer term economic impacts of the pandemic and position the Postal Service to maintain and update our critical infrastructure to continue to support the nation.

Modernizing our infrastructure has an added benefit of serving as a catalyst as America’s economy opens up.

Finally, we seek unrestricted access to borrowing.

(PAUSE)

While we continue to evaluate the data as we fight through the pandemic each week, our fundamental conclusions which formed the basis of our legislative request remain unchanged.

Based upon our review of the business landscape, it is certain that immediate funding is necessary to sustain the Postal Service and to mitigate the impacts of the pandemic.

That is our focus right now.

We will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.
To be clear, however, while short-term action by Congress to address the liquidity crisis caused by the pandemic is necessary, it is also true that the Postal Service faces long-standing financial challenges stemming from a broken business model that is imposed upon us by law and that leaves us financially unsustainable.

While we do not believe that our business model challenges can be thoughtfully resolved in the midst of the current crisis, it is a situation which policy makers will need to confront in the immediate future.

Mail volumes continue to decline, but our ability to adjust to such volume declines is hampered by an inflexible statutory and regulatory structure that imposes legally mandated, unaffordable costs on us.

We are prohibited from reducing these costs, and yet we also lack the autonomy to diversify our products or to control pricing for products that generate the majority of our revenue.

To ensure the long-term viability of the Postal Service, Congress must adopt reforms to our business model along with the immediate relief that we are requesting now that is directly related to the pandemic.

These combined actions by Congress, along with continued management initiatives to drive greater efficiency and increase profitable revenue, will provide the Postal Service with positive cash flow over the next ten years.
As the Congress and the Administration take steps to support businesses and industries around the country, we strongly encourage action to shore up the finances of the Postal Service and enable us to continue to fulfill our indispensable mission and to play an effective role in the nation’s economic recovery.

[PAUSE]

I join the Chairman in thanking David Williams for his service on the Board and wish him the best.

Also, I would like to send my heartfelt congratulations to Louis DeJoy, who will succeed me to become the 75th Postmaster General of the United States.

Louis will bring the business acumen and insights that he has acquired over a successful 35-year professional career.

I can assure you that I will do everything I can to support Louis and ensure a seamless transition.

I also know postal employees throughout the organization will support Louis in his efforts to uphold and preserve the Postal Service’s cherished role in our nation.

(PAUSE)
I would like to close, as I opened, by again extending my gratitude to the men and women of the Postal Service for the vital service they continue to provide to the American public.

It has been my privilege to work alongside all of my postal colleagues and to share in our ongoing mission of service to the nation.

I thank you for all of the support you have provided me during my postal career.

And with that, I'll turn it back over to Chairman Duncan.
Thanks,

Megan

Subject: [EXTERNAL] Re: Missing mail

Good Evening,

I am sorry to bother you again. I know we are living in difficult times right now. I also know the Postal Service is trying it's best to keep up, but I am and have been for the last three years having trouble with my mail. I have informed mail delivery and so far this week I am missing two pieces of mail. Three weeks ago two pieces went missing including a letter from the Department of Labor. The Post Office shouldn't be losing important letters like this especially now.

I am not sure what the issue is. The local Post Office says it is not them. I don't appreciate someone suggesting to get a Post office box. Why? I am suppose to stay home as much as possible. There is a camera right over my box. Why can't anyone investigate? Why is this still an issue?

A few months ago, I did bring up the fact that a tenant issues with is either a current or former postal employee. Nobody bother to look into it.

The Post Office needs a better system. I can track my Fed ex, UPS and Amazon packages from the moment the driver is on the road or near by.

There should be a better letter system besides informed mail delivery. Each letter should have a code to allow you to track the mail the moment it hits the distribution center to the local Post office to it hits your box. You can charge for it. It will be optional. I just think this is crazy to still have to deal with this after three years.

It would be nice to finally have this resolved even if it means filing a Police Report.

Thank you for your time and hope this is finally resolved.
Stay Safe,

Alisa

On Thu, Feb 6, 2020, 5:27 PM Alisa M wrote:

Good Evening,

I am sorry to bother you, but this has been an ongoing issue for 3 years now. My mail keeps going missing. No matter how many times I file a complaint. My local post office comes up with a temporarily fix and then 2 or 3 weeks later back to the same thing.

I was trying hard not to contact you because I know you are very busy, but on Tuesday the mail in my building was just left outside the boxes in the lobby. See attached photo. Now I am missing a W2 form and now my identity is at risk.

I have informed mail delivery and a lot of times I never see that mail even after a week.

Even when I report my mail as stolen, nothing is done. The regional office never has a answer. They say they will get back in three days. I never hear from them.

I hoping by contacting you this will finally fix this issue or fix what the disconnect is.

Thank you for your time.

Under fire from Trump, Postal Service braces for arrival of new postmaster general allied with White House Louis DeJoy — a top Republican fundraiser and Trump donor — has been selected to run the beleaguered agency the president has long agitated to change By Jacob Bogage<https://www.washingtonpost.com/people/jacob-bogage/>
May 7, 2020 at 7:12 p.m. EDT

U.S. Postal Service officials are bracing for sweeping changes with the arrival of a new boss who is deeply aligned with President Trump at a time the agency grappling with a financial crisis and battling for its future.

The selection of Louis DeJoy — a North Carolina businessman and top Republican fundraiser — as postmaster general puts a White House ally at the helm of an agency Trump has long agitated to change, deriding it as a “loser” and “delivery boy” for private shipping companies, particularly Amazon.

The administration, led by Treasury Secretary Steven Mnuchin, has angled for the authority to name a successor to current Postmaster General Megan Brennan and set package prices, among other terms, in exchange for emergency funding for the Postal Service, which leaders say could run out of money by October.

Trump in April called USPS “a joke”<https://www.washingtonpost.com/us-policy/2020/04/24/trump-postal-service-loan-treasury/?tid=lk_inline_manual_7&itid=lk_inline_manual_7> and said he would not authorize a $10 billion loan included in a pandemic relief package unless it raised package rates 400 percent on third-party shippers.
With DeJoy’s appointment and the resignation of David C. Williams, vice chairman of the board of governors and a foil to Mnuchin’s borrowing terms, some postal advocates worry that the changes Trump wants will not only materialize, they will be made without any benefit of additional funding — or the promised loan — for an agency whose already shaky financial footing has grown weaker during the coronavirus pandemic. They also worry it will politicize the independent agency, leaving USPS wounded in the run up to a presidential election that in many states may be conducted through the mail.

“We’re trying to manage through a pandemic and economic collapse,” Rep. Gerald E. Connolly (D-Va.), who chairs the House subcommittee responsible for postal oversight, said in a phone interview. “What could go wrong in hiring a political donor?”

The White House declined to comment, and DeJoy did not immediately respond to a request for comment.

DeJoy is the owner of a real estate and consulting firm in North Carolina who had served as chairman and chief executive of New Breed Logistics, according to his family’s foundation page. New Breed was sold to XPO Logistics and DeJoy served on the company’s board of directors.

He is a longtime donor to Republican causes, according to Federal Election Commission records, and has given more than $157,000 to GOP candidates, committees and superpacs since the start of the year. In March 2017, DeJoy hosted a fundraiser for Trump at his home in Greensboro, N.C. Tickets cost as much as $15,000 per couple, according to the Raleigh News & Observer. In the invitation he wrote of “unreasonable challenges” Trump faced from “the political establishment, the left wing groups, the media and many of the federal employees of the agencies of the executive branch.”

His wife, Aldona Wos, a former ambassador to Estonia and Trump’s nominee as ambassador to Canada, is the vice chair of the president’s Commission on White House Fellowships. USPS Board of Governors Chairman Robert M. Duncan, the former head of the RNC, chairs the fellowship panel.

Conservatives are cheering DeJoy’s appointment and hailing his private-sector experience in the logistics industry. Only four postmasters general have come from the private sector, and some analysts want the Postal Service to invest more heavily in the logistics arena, rather than door-to-door delivery.

“We have so many different ways to move stuff,” said Kevin Kosar, vice president of research partnerships at libertarian think tank R Street. “Where does the Postal Service fit into that picture? Hopefully someone from the outside like DeJoy can bring people into the main office who can help him think about that.”

Meanwhile, the Package Coalition — an industry group of online retailers led by Amazon, eBay, QVC and CVS Health, all companies set to lose substantially with higher shipping rates — launched a $2 million ad blitz Wednesday on Fox News. The 30-second commercial, which will air during broadcasts of “Hannity,” “Fox & Friends” and other network shows, takes aim at Trump’s proposal to quadruple package rates, calling it a “400-percent package tax.” It asks viewers to call Congress and urge members to support a postal bailout.

(Amazon founder and chief executive Jeff Bezos owns The Washington Post.)

“We’re trying not to be alarmist about it,” former Army secretary and Package Coalition chairman John McHugh said in a phone interview. “But we want to tell people that there’s something afoot that I think could be cataclysmic in the lives of many Americans. That is the Postal Service running out of money.”

The Postal Regulatory Commission, the body that approves postage rates and monitors the USPS’s budget, on Thursday reported the agency was in “dire” financial shape after 2019. It posted an $8.8 billion loss caused by declining mail volume and missed its payments into a prepaid retiree health benefit account.
congress/?tid=lk_inline_manual_28&itid=lk_inline_manual_28>. Those losses don’t reflect the nearly two-month long coronavirus pandemic, during which postal leaders told lawmakers they expected $2 billion losses each month as the economy shut down.

But Senate Republicans say they have data that indicates USPS’s losses, propped up by surging package volumes, are far more tame than the agency portrays and that the USPS is not in desperate need of a bailout as some officials claim.
Joe,

Sorry, here it is.

Thanks,

Megan

The 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages throughout this country.

We deliver supplies that sustain us, prescription medications, benefit checks and other critical materials such as medical information, financial statements, absentee ballots, and Census surveys.

This fundamental service which our employees provide is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities.
The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the nation with prompt, secure, and affordable mail and package delivery services—a mission proudly accepted each and every day.

This mission has never been more important, and it is clearer than ever how consequential the postal system is in meeting America’s social, informational, and economic needs.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government.

A recent survey by the Pew Research Center shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service.

This is a credit to the men and women of the Postal Service who go to work every day to serve their communities.

As Chairman Duncan mentioned, throughout the nation, in community after community, we have seen expressions of gratitude for the work our employees do to deliver for America.

We are deeply grateful to the public for these many uplifting messages of support—It makes clear to us that the Postal Service matters to the American people.
Several weeks ago, I provided a briefing to members and staff of the House Committee on Oversight and Government Reform, and separately to the Chairman and Ranking Member of the Senate Committee on Homeland Security and Governmental Affairs, on our financial projections that we anticipate will directly result from the impact of COVID-19, both in the short and longer term.

In our briefings, based upon the data that was available to us at the time, we described the significant impacts that we believe the pandemic will have on our business.

The stark reality is that the pandemic will cause meaningful near-term and long-term implications from the steep decline in revenue we will suffer this year, and in the coming years, that endanger our ability to fulfill our universal service mission, absent Congressional intervention.

We also provided Congress with our immediate legislative request, to help the Postal Service deal with the direct impacts of the pandemic. The request was unanimously approved by our Board of Governors.

We seek a significant appropriation to help offset the volume and revenue losses resulting from the pandemic over the next 18 months.
We also request modernization funding so that we can weather the longer term economic impacts of the pandemic and position the Postal Service to maintain and update our critical infrastructure to continue to support the nation.

Modernizing our infrastructure has an added benefit of serving as a catalyst as America’s economy opens up.

Finally, we seek unrestricted access to borrowing.

While we continue to evaluate the data as we fight through the pandemic each week, our fundamental conclusions which formed the basis of our legislative request remain unchanged.

Based upon our review of the business landscape, it is certain that immediate funding is necessary to sustain the Postal Service and to mitigate the impacts of the pandemic.

That is our focus right now.

We will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.

[PAUSE]
To be clear, however, while short-term action by Congress to address the liquidity crisis caused by the pandemic is necessary, it is also true that the Postal Service faces long-standing financial challenges stemming from a broken business model that is imposed upon us by law and that leaves us financially unsustainable.

While we do not believe that our business model challenges can be thoughtfully resolved in the midst of the current crisis, it is a situation which policy makers will need to confront in the immediate future.

Mail volumes continue to decline, but our ability to adjust to such volume declines is hampered by an inflexible statutory and regulatory structure that imposes legally mandated, unaffordable costs on us.

We are prohibited from reducing these costs, and yet we also lack the autonomy to diversify our products or to control pricing for products that generate the majority of our revenue.

To ensure the long-term viability of the Postal Service, Congress must adopt reforms to our business model along with the immediate relief that we are requesting now that is directly related to the pandemic.

These combined actions by Congress will provide the Postal Service with positive cash flow over the next ten years.
As the Congress and the Administration take steps to support businesses and industries around the country, we strongly encourage action to shore up the finances of the Postal Service and enable us to continue to fulfill our indispensable mission and to play an effective role in the nation’s economic recovery.

[PAUSE]

I join the Chairman in thanking David Williams for his service on the Board and wish him the best.

Also, I would like to send my heartfelt congratulations to Louis DeJoy, who will succeed me to become the 75th Postmaster General of the United States.

Louis will bring the business acumen and insights that he has acquired over a successful 35-year professional career.

I can assure you that I will do everything I can to support Louis and ensure a seamless transition.

I also know postal employees throughout the organization will support him in his efforts to uphold and preserve the Postal Service’s cherished role in our nation.

(PAUSE)
I would like to close, as I opened, by again extending my gratitude to the men and women of the Postal Service for the vital service they continue to provide to the American public.

It is a privilege to work alongside all of my postal colleagues and to share in our ongoing mission of service to the nation.

I thank you for all of the support you have provided me during my postal career.

And with that, I’ll turn it back over to Chairman Duncan.
Thanks,

Megan

I appreciate your assistance. I am concerned about the package delivery based on the message shown online (see below). The house is secure, and has a second secured gate which the mail office has the code.

Please ensure my package is delivered today. I will ensure that the first gate will be open which it has been all week to accommodate Amazon deliveries.

Thanking you in advance for your assistance.

Sincerely,

We attempted to deliver your item at 12:08 pm on May 6, 2020 in NEW YORK, NY 10027 and a notice was left because no secure delivery location was available. You may arrange redelivery by using the Schedule a Redelivery feature on this page or may pick up the item at the Post Office indicated on the notice beginning May 7, 2020. If this item is unclaimed by June 5, 2020 then it will be returned to sender.

Subject: (b)(5)

Top Republican fundraiser and Trump ally named postmaster general, giving president new influence over Postal Service, Jacob Bogage. A top donor to President Trump and the Republican National Committee will be named the new head of the Postal Service, putting a top ally of the president in charge of an agency where Trump has long pressed for major changes in how it handles its business.

The Postal Service’s board of governors confirmed late Wednesday that Louis DeJoy, a North Carolina businessman who is currently in charge of fundraising for the Republican National Convention in Charlotte, will serve as the new postmaster general.

The action will install a stalwart Trump ally to lead the Postal Service, which he has railed against for years, and probably move him closer than ever before to forcing the service to renegotiate its terms with companies and its own union workforce. Trump’s Treasury Department and the Postal Service are in the midst of a negotiation over a $10 billion line of credit approved as part of coronavirus. [Link]

The confirmation came after The Washington Post asked for comment on the decision. Trump has indicated he wants the Postal Service to dramatically raise fees for delivering packages for customers such as Amazon in exchange for tapping the line of credit. Trump has long argued that Amazon doesn’t pay the Postal Service enough, a charge the agency has fiercely contested. (Amazon’s chief executive, Jeff Bezos, owns The Post.) “Louis DeJoy understands the critical public service role of the United States Postal Service, and the urgent need to strengthen it for future generations,” Robert M. Duncan, chairman of the board of governors, said in a statement.

“Postal workers are the heart and soul of this institution, and I will be honored to work alongside them and their unions,” DeJoy, who will start June 15, said in a statement. The White House declined to comment.

Rep. Gerald E. Connolly (D-Va.), chairman of the House subcommittee that oversees the Postal Service, denounced the move as a reward by Trump to a “crony donor.”

“The Postal Service is in crisis and needs real leadership and someone with knowledge of the issues,” Connolly said. “This crony doesn’t cut it.”

After criticizing the agency for years, Trump has been consolidating his influence lately. Three Republicans and one Democrat sit on the board of governors after the vice chairman, David Williams, a Democrat, resigned last week.
The departure came after Williams told confidants he was upset that the Treasury Department was meddling in what has long been an apolitical agency and felt that his fellow board members had capitulated to Treasury Secretary Steven Mnuchin’s conditions for the $10 billion line of credit, according to four people familiar with Williams’s thinking. Williams did not respond to a request for comment.

Democrats have urged the Postal Service to hold firm with Treasury over the terms of the loan, betting they could win more money for the agency in another round of legislation and threatening the Trump administration with taking the risk of disrupting mail service.

But in recent days, the Postal Service’s board has appeared open to some of the Trump administration’s terms, according to the four people, who spoke on the condition of anonymity to disclose private conversations. The precise terms could not be learned.

“[Williams’s] main frustration is that he felt the Treasury Department was interfering in an apolitical board and an apolitical agency,” said one person who spoke with him.

A Treasury Department spokesman declined to comment.

DeJoy will be the first postmaster general in two decades who did not rise through the agency’s ranks. He would have to navigate a financially fraught agency while also working with its powerful labor unions, among the last -public-sector unions left with significant clout in contract negotiations with the government.

In part because of the coronavirus pandemic, the Postal Service is projecting a $13 billion revenue shortfall by the end of the fiscal year in September.

Trump has for years seized on the rates the Postal Service charges companies like Amazon to deliver packages. The business of package delivery has proved increasingly vital to the service’s finances as first class mail has deteriorated, and Trump has contended the agency charges Amazon and other companies too little.

The Postal Service has rejected those accusations, arguing it is charging competitive rates in an environment where it squares off against UPS, FedEx and even Amazon’s growing delivery service.

Megan Brennan, the current postmaster general, who announced her retirement late last year, had clashed with the Trump administration over its efforts to take more control over postal finances and operations. Trump had urged her early in his tenure to increase fees for Amazon and other companies.

The announcement of Brennan’s successor comes at a tumultuous period for the Postal Service, whose already shaky financial footing has grown weaker during the coronavirus pandemic.

Trump, responding to a report in The Post in April, threatened to block the $10 billion Postal Service loan unless officials dramatically raised shipping prices on online retailers.

“The Postal Service is a joke,” Trump said publicly last month in the Oval Office. He called for the agency to quadruple its shipping prices. Many analysts warn that if the Postal Service did that, it would put itself at a massive disadvantage in the marketplace.

DeJoy, a North Carolina native, has played a prominent role in Republican politics, particularly since Trump won the presidency in 2016. He has given more than $2 million to the Trump campaign or Republican causes since 2016, according to the Federal Election Commission, including a $210,600 contribution to the Trump Victory Fund on Feb. 19. He has given more than $650,000 to the Trump Victory Fund and more than $1 million to the RNC.

DeJoy was tapped as the finance chairman for the RNC convention in August and has worked in recent months with Katie Walsh, a top Republican operative, to orchestrate the event.

An RNC spokesman declined to comment.

DeJoy’s wife, Aldona Wos, is vice chairman of the president’s Commission on White House Fellowships and is Trump’s nominee for ambassador to Canada. She previously served as ambassador to Estonia in the George W. Bush administration.

DeJoy has donated more than $157,000 to Republican candidates, committees and super PACs since the start of the year, according to the Center for Responsive Politics.

Duncan, the current chairman of the Postal Service’s board of governors, served as RNC chairman from 2007 to 2009. He was confirmed in 2018 after being appointed by Trump.

DeJoy is the owner of a real estate and consulting firm in North Carolina after having served as chairman and CEO of New Breed Logistics, according to his family’s foundation page. New Breed was sold to XPO Logistics. He is a longtime donor to Republican causes, according to FEC records.
Under the $2 trillion coronavirus stimulus relief passed in March, the Treasury Department was authorized to lend $10 billion to the Postal Service, which says it may not be able to make payroll and continue mail service uninterrupted past September.

Mnuchin rejected a bipartisan Senate proposal to give the Postal Service a bailout amid the negotiations over that legislation.

Brennan, with the consent of the board of governors, went to Congress to ask for a direct bailout of more than $89 billion to stave off pandemic losses and other long-running accumulated debts.

Top Treasury officials were furious at the request, according to a person with knowledge of their frustration.

The coronavirus pandemic has rapidly exacerbated years of revenue losses for the agency as it struggles to adapt to a digital age amid a decline in first-class mail.

Postal officials have said mail volume is down by a third during the pandemic and continuing to decrease as businesses scale back solicitations and advertisements. Package volume is up, but not enough to cover the other losses, the officials say.

Subject: [EXTERNAL] Problems with service at (b)(6), VA/2(b)

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.

Dear Postmaster General,

I write you today as a disgruntled customer of the USPS service at my home in (b)(6), VA. The problems have been addressed to the local postmaster...both in person and by mail...and the postmaster makes excuses in person for the poor service and does not respond to written complaints.

The problems in this neighborhood have been going on for about two years now since our regular carrier, Mr. (b), (b), retired from our route. We have misdelivered mail all of the time. On Monday, my daughter's stimulus check was delivered to the neighbor and she put it in our box the next day. Yesterday, I got THREE first class pieces of mail for another neighbor which I delivered to them in person. I have had package pick-up requests misconstrued as a Hold Mail request! Not only did the carrier not pick up my package or deliver my mail, she marked the package as picked up and I received an email from USPS saying just that. When we do request a Hold Mail, we have to have a neighbor check our box as many times the mail has been delivered even though it should have been held. Our neighborhood Facebook page consistently has people asking about packages that should have been delivered to them and they weren't. Asking if someone else has them. Recently, I was notified by Amazon that a package had been delivered on April 14th. I never got it. I filed a complaint with the USPS and got an email in return stating that they had resolved my problem and had determined that the item had been "miss-delivered" and that I should request another package be sent by Amazon! I don't consider delivering to a wrong address as a resolution and certainly don't think that Amazon should pay for the USPS mistake! When Mr. (b) delivered our mail, we usually received it between 1 and 3 PM. We now get it more like 5 PM or after. We have had our mail delivered many as late as 9:10PM! I could go on and on.

I respectfully request an investigation into these matters at the main post office here in (b)(6) I don't believe that the current postmaster is competent or qualified for the position he fills. I would also like a response from your office as to why these things continue to happen and when we may expect professional service from the USPS again.

AMERICAN OVERSIGHT

Remarks by President Trump in a Presidential Recognition Ceremony: Hard Work, Heroism, and Hope

Issued on: May 1, 2020

________________________________
ALL NEWS<https://www.whitehouse.gov/news/>

Blue Room

4:47 P.M. EDT

THE PRESIDENT: Thank you very much. It’s a great honor to have you all. I know your stories. I got to read about your stories. In some cases, I knew your story without having to read about it — from Staten Island. So, thank you all very much. It’s a great honor to have you.

This afternoon, we’re going to recognize several individuals who have responded to the invisible enemy with courage, determination, and grace. Terrific people. In recent weeks, our nation has endured extraordinary hardships and loss, and we mourn with one heart for every life that’s been taken from us.
In the midst of so much pain, the heroes we honor today are a true source of inspiration for us all. You really are very great inspiration for us all. And the whole country is watching.

With us today is Kyle West from Cincinnati, Ohio. Kyle is 23 years old, and he’s proud to be a mailman in his hometown. I know Cincinnati very well. I actually worked in Cincinnati, and it was a great — the Queen City. I had a great experience. Many of the people on this route are older Americans in a low-income area. And as Kyle says of his job, “We’re not just mailmen, we’re mechanics, movers, and many other things. We’re part of the neighborhood.” That’s true, isn’t it — huh? — for a mailman. Kyle talks to roughly 500 of his customers each day, bringing a cheerful smile and a listening ear to every parcel of mail.

When the pandemic hit, Kyle delivered a note to hundreds of older Americans on his route. It said, “If you are at risk and need help getting essential items, let me know. I will do what I can to help.” That means you get it done, right? That’s what he means. “Sincerely, Mailman Kyle.” Since then, Kyle has received more than 400 responses, and he’s delivered vital groceries to dozens of senior citizens.

Kyle, your love for your neighbors lifts us and the entire nation. Would you come up and say a few words? Please. Thank you, Kyle. It’s terrific. (Applause.)

I’ll move that down for you. Thank you.

MR. WEST: All right. Thank you, Mr. President. I’m greatly honored to be here to represent my fellow postal employees as we continue to provide our essential services to America. Customers often — often tell us during difficult times that seeing us out every day gives them a sense of normalcy in their life.

The gratitude we’re receiving from our customers is greatly inspiring. And the thank-you notes along our routes are helping us get through.

We’re delivering a lot of essential items at this time. The amount of medicine has greatly increased. Customers depend on us for Social Security checks and other financial information: census material, mail-in ballots, and then essential items that they’re ordering online.

At the Postal Service, we’re continuing to follow CDC guidelines to keep ourselves and our customers safe: social distancing, wearing a face mask, lots of hand washing, and the cleaning of our vehicles and facilities. I’m very proud to work for the Postal Service and to deliver for our country. (Applause.)

THE PRESIDENT: Great job, Kyle. Thank you very much.

MR. WEST: Thank you.

THE PRESIDENT: Great job. Thank you very much, Kyle.
Mendonca, Pat - Washington, DC

General Brennan-

Thank you for your time and willingness to work with me. (b)(5)
I can be flexible so we can schedule around your availability. Probably looking for (b)(5). Let me know your thoughts.
Thanks,
Louis
Hi Megan,

I was emailing you to express an idea that hopefully may trigger an idea to save the post office from bankruptcy. I'll keep this short because I'm sure you're very busy. But as I was reading about Canada's Leap manifesto I saw that in their manifesto Post Offices are used as recharging hubs, as local community banking services, and a hub for local green energy and community resources in addition to delivering mail. Also, since the US should be using mail in ballots this would be another large source of revenue for the post office. I've attached a link for further information.

Please let me know if I can help in any way!

Cheers,

---

Subject: [EXTERNAL] Dumped parcel?

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.

Dear Ms. Brennan,

I had ordered something from Amazon for my husband to use for work. The day after ordering the item, the company was dumped from Amazon. I do not know why, but seeing from the tracking, the item was from China, I am thinking that is the reason.

Anyhow, I also had an item come in from Germany. Both items cleared customs in Ny and ended up at the pd&c in <b>(b)(6)>, Fl. Today, I received the item from Germany, but now the item from China is listed as not received, only that the label has been created. Since I do not want anything from China (for reasons beyond Covid), I am going to let it go. But know I am not the only one. This is from my friend "I have a pkg that was not on the truck Friday was to be delivered yesterday...now it's "pending" in Wisconsin". Went from Middleton Pa to Wisconsin overnyte and is now MIA?? Same thing happened to my Covid masks its just nutts out there."

Could you please look into this?

Thank you,

(b)(6)

Aloha Ms. Brennan,
On April 8, 2020 I ordered an item from Amazon.com that I needed for my home business that I use to supplement my family's income since my wife has been laid off due to the COVID-19 pandemic. The item was he be shipped to me via United States Postal Service and I utilized your trucking service to track the package.

The following are the tracking updates I received from the United States Postal Service:

Monday, April 20
7:44 AM
Package arrived at a carrier facility
Chicago IL Network Distribution Center, US
6:29 AM
Package arrived at a carrier facility
Waukegan, IL US
Monday, April 13
3:16 PM
Package has left the carrier facility
Waukegan, IL US
Package has shipped

I also received numerous text messages stating that my package would be delivered on time by 8 PM on several different dates. Since April 25 I have received no new updates from the United States Postal Service. I filed a claim through the United States Postal Service website and received emails from the postmaster general in Hawaii and another representative from the United States Postal Service. Both offered half hearted apologies but no explanations whatsoever for what happened to my $200 item that has still not been delivered to my home. I find it incredibly difficult to believe they did this day and age of advanced technology and computer systems that no one can tell me where my package is. Apparently it made its way to Chicago Illinois and left that city but no one seems to know where it is from there. This is unacceptable on every level. I demand that somebody contact me directly and not through some generated email with no explanations and tell me where my package is.

> THE PRESIDENT: Thank you very much. It’s a great honor to have you all. I know your stories. I got to read about your stories. In some cases, I knew your story without having to read about it — from Staten Island. So, thank you all very much. It’s a great honor to have you.
>
> This afternoon, we’re going to recognize several individuals who have responded to the invisible enemy with courage, determination, and grace. Terrific people. In recent weeks, our nation has endured extraordinary hardships and loss, and we mourn with one heart for every life that’s been taken from us.
>
> In the midst of so much pain, the heroes we honor today are a true source of inspiration for us all. You really are very great inspiration for us all. And the whole country is watching.
>
> With us today is Kyle West from Cincinnati, Ohio. Kyle is 23 years old, and he’s proud to be a mailman in his hometown. I know Cincinnati very well. I actually worked in Cincinnati, and it was a great — the Queen City. I had a great experience. Many of the people on this route are older Americans in a low-income area. And as Kyle says of his job, “We’re not just mailmen, we’re mechanics, movers, and many other things. We’re part of the neighborhood.” That’s true, isn’t it — huh? — for a mailman. Kyle talks to roughly 500 of his customers each day, bringing a cheerful smile and a listening ear to every parcel of mail.
>
> When the pandemic hit, Kyle delivered a note to hundreds of older Americans on his route. It said, “If you are at risk and need help getting essential items, let me know. I will do what I can to help.” That means you get it done, right?
That’s what he means. “Sincerely, Mailman Kyle.” Since then, Kyle has received more than 400 responses, and he’s delivered vital groceries to dozens of senior citizens.

> Kyle, your love for your neighbors lifts us and the entire nation. Would you come up and say a few words? Please. Thank you, Kyle. It’s terrific. (Applause.)

> I’ll move that down for you. Thank you.

> MR. WEST: All right. Thank you, Mr. President. I’m greatly honored to be here to represent my fellow postal employees as we continue to provide our essential services to America. Customers often — often tell us during difficult times that seeing us out every day gives them a sense of normalcy in their life.

> The gratitude we’re receiving from our customers is greatly inspiring. And the thank-you notes along our routes are helping us get through.

> We’re delivering a lot of essential items at this time. The amount of medicine has greatly increased. Customers depend on us for Social Security checks and other financial information: census material, mail-in ballots, and then essential items that they’re ordering online.

> At the Postal Service, we’re continuing to follow CDC guidelines to keep ourselves and our customers safe: social distancing, wearing a face mask, lots of hand washing, and the cleaning of our vehicles and facilities. I’m very proud to work for the Postal Service and to deliver for our country. (Applause.)

> THE PRESIDENT: Great job, Kyle. Thank you very much.

> MR. WEST: Thank you.

> THE PRESIDENT: Great job. Thank you very much, Kyle.

Hello.

This is the message for the United States Postal Service, including postmaster general Megan J. Brennan. This is to inform you that you guys are in great danger because President Donald Trump and the White House is threatening to destroy the United States Postal Service before the month of June this year. If President Donald Trump destroys the United States Postal Service before June comes, there will be no more mail deliveries anywhere in the United States of America in the future; all of the Americans will never pay bills, pay rents, or anything at all; all of the Americans will become homeless and die from hunger; and the United States of America will be no more forever. In order to save the United States Postal Service, you guys must fight back and you must fight back now because you guys must stand for yourselves and you must stand up to President Donald Trump and the rest of the White House in order to fight President Donald Trump and the rest of the White House. I wish I had money to help and support you guys, but I do not have any money at all; I do not even have a credit card. So, I hope you guys become strong, fight back, fight President Donald Trump, fight the White House, and save the United States Postal Service before June comes. Stay safe, stay strong and have a good day!

Sincerely,

(b)(6)

Amazon CEO Jeff Bezos Called to Testify Before Congress Lawmakers want to know if the retailing giant used data about independent sellers on its platform to develop competing products
By: Dana Mattioli and Ryan Tracy
5/1/2020
Wall Street Journal

Lawmakers on the House Judiciary Committee called on Amazon.com Inc. AMZN -6.59% Chairman and CEO Jeff Bezos to testify on its private-label practices, citing a Wall Street Journal investigation that found Amazon AMZN -6.59% employees used data about independent sellers on its platform to develop competing products.

The House panel has been investigating the market power of Amazon and other giant large technology firms.

“On April 23, the Wall Street Journal reported that Amazon employees used sensitive business information from third-party sellers on its platform to develop competing products,” lawmakers from both parties said in a letter to Mr. Bezos on Friday. “The report was based on interviews with over 20 former or current Amazon employees and the company’s internal documents.”

“If these allegations are true, then Amazon exploited its role as the largest online marketplace in the U.S. to appropriate the sensitive commercial data of individual marketplace sellers and then used that data to compete directly with those sellers,” the letter said.
Testimony by Mr. Bezos would give lawmakers a public forum to interrogate him on the private-label practices as well as other subjects. Bipartisan concerns about the company stretch across a range of issues, from its market power and its impact on small businesses to the safety of its workers and sales of counterfeit products on its platforms.
Thanks,

Megan

The USPS is one of the most important agencies we have, and it is under attack by those trying to privatize, eliminate mail in voting, and disband the investigative arm. Not to mention eliminate jobs with good pay and benefits in order to allow some other business to make more money.

You have a lot of support, but there are parts of the USPS that are forward facing and giving you folks a bad name.

One of the worst is - this location has been an issue for years, and has been publicly investigated, but consistently remains an issue.

I know, when you do everything correctly, no one notices - but this location is either very understaffed or very poorly managed, and it might help to see USPS publicly addressing the problems at this facility.

Just an idea...

Postmaster General Megan Brennan,

I am a city carrier in a small town in (b)(6) and I am concerned about the political climate that the USPS finds itself currently in, but I am even more alarmed at the potential lightning rod that the Post Office might become if mail-in ballots during the presidential election become even more politicized than they are now. As such, I would humbly like to make a recommendation that we might employ in order to mitigate some of this potential controversy and preserve the USPS’s trustworthy identity across the nation.
Given the current political climate of polarization in our nation, it is almost a certainty that a close presidential election will find any mail-in ballots in dispute, particularly in light of events concerning the mail-in ballots and the acrimonious statements made by the administration about the potential for mail-in ballot fraud and about the USPS, in general. In order that the USPS does not find itself at the center of additional political controversy, I believe it is imperative that THE BAR CODES ON EVERY MAIL-IN BALLOT NATIONWIDE DURING THE 2020 PRESIDENTIAL ELECTION BE SCANNED AT EVERY POINT ALONG ITS DELIVERY AND RETURN, such that every ballots whereabouts and history are recorded at all times. Additionally, I believe some sort of national pre-test be conducted prior to the election to identify any problems associated with such a tracking enterprise and USPS employees are given clear instructions as to the handling of mail-in ballots.

I recognize that this is an inconvenience and will incur some additional costs at a time when our operating expenses and our business model are under some scrutiny. However, preemptively demonstrating the USPS’s commitment to transparency and political neutrality will help to avoid any charges of political bias and show the American public and the politicians who campaign through the USPS that we are committed to the quick, reliable and non-partisan delivery of the mail.

I hope you take these suggestions into consideration. Should you have any questions or concerns, feel free to have someone contact me.

Sincerely yours,

(b)(6)
Mail Carrier

Hello,

I hope you are both doing well.

I am reaching out because I am working on an hourlong program on how COVID19 will impact the administration of elections. The film will air later this fall.

As part of the program, I am taking a closer look at the USPS since it will be a key player in the successful rollout of a vote-by-mail expansion. I would like to better understand the challenges USPS faces and what the strategies are looking forward. Would you be available for a quick call in the next few days? It can be on background or off the record. Thank you for your time.

Looking forward,

Marcia

Trump Says Internet Retailers That Use 'Laughing Stock' Post Office Must Pay More By Reuters April 29, 2020Updated 7:07 p.m. ET WASHINGTON - President Donald Trump lambasted internet retailers again on Wednesday for taking advantage of the U.S. Postal Service and said those firms needed to pay more for package delivery. "We want our post office to be successful. We don't want it to be a laughing stock and a stupidly run organization the way it's been for so many decades now. It's ridiculous," Trump said during an event at the White House. "We want to stabilize the post office, and the way you do that is these companies are going to have to pay more," Trump said of internet retailers. "The companies are going to have to pay a percentage of that ... loss." Trump threatened last week to block federal aid for the Postal Service unless it raises shipping rates for online companies like Amazon.com Inc, prompting criticism that the move would hurt consumers relying more than usual on packages during the coronavirus outbreak. The Postal Service, which employs more than 600,000 people, has said that it may not be able to continue service past September without help, as the pandemic batters the U.S. economy. Trump has long been critical of Amazon in particular. He did not mention the company by name on Wednesday, but his pique with the online retailer was clear. "We're making a lot of people rich and a lot of companies rich by subsidizing these companies. On top of that, they don't pay the same taxes as a retail store. It's very unfair to the retailers," Trump said. Amazon founder and Chief Executive Jeff Bezos is the richest man in the world, according to Forbes. Bezos owns the Washington Post newspaper, whose coverage of the Trump administration has angered the president. The Package Coalition, whose members include Amazon, eBay Inc and others, has said that raising prices to deliver packages would mean Americans would pay higher prices. The president, a Republican who is running for re-election in November, made clear he wanted to protect postal workers "We want to take care of our taxpayers and we want to take care of, very, very importantly, the people that work at the post office."
(Reporting by Jeff Mason; Editing by Peter Cooney) There was a live roundtable<https://twitter.com/WhiteHouse/status/1255592338908344320>:
Good evening Governors,

(b)(5)

(b)(5)

Thank you
Megan
Over the past month, the men and women of the United States Postal Service have done a heroic job under the most trying of circumstances. Unfortunately, during this same period, they have watched their organization become the centerpiece of a growing partisan battle between policymakers. While a public debate over the needs and role of the Postal Service can certainly be helpful, it is essential that this conversation happen in a spirit of non-partisanship and cooperation.

The Postal Service has always served a non-partisan mission. During my thirty-four year career with the United States Postal Service, the last five as the Postmaster General, it has been my distinct honor to work for an organization that is fully committed to serving all Americans. To achieve that mission, it has been vitally important for there to be no political bias or partiality on the part of the Postal Service.

The Postal Service is led by a Board of Governors, of which I am a member, comprised by law of both Republicans and Democrats who fully share that commitment. Our Governors are appointed by the President and confirmed by the Senate, and the Board takes great pride in operating in a non-partisan manner. Since they took office, I have worked directly with our Governors to take the steps necessary to preserve and protect this great American institution, so that the Postal Service can continue to fulfill its public service mission, both today and in the years to come.

The Postal Service has long served as a source of consistency and reliability for the American people, providing every community in the Nation with prompt, secure, and affordable mail and package delivery services. This mission has never been more important than today, as Americans shelter in place, work from home, or otherwise practice social distancing as a result of the COVID-19 pandemic.

The Postal Service is proud of the tremendous commitment shown by our employees during this pandemic, as they steadfastly continue working every day to provide our essential services to their fellow Americans as part of the nation’s critical infrastructure. Six days per week, and in some instances seven, the 630,000 dedicated men and women of the Postal Service (including nearly 100,000 military veterans) accept, process, transport, and deliver vital mail and packages. This mail includes critical materials such as Census information, absentee ballots, sustaining necessities and prescription medications.

This fundamental service which our employees supply is particularly important in rural and other areas, where the Postal Service may be the only affordable delivery provider available to fulfill the needs of these communities. In addition, the population most at-risk from the coronavirus, people over the age of 65, is also the least likely to be using the internet or other technology to access information important to their health.

The public’s high regard for the essential services we provide is reflected by public opinion surveys, which consistently show that the Postal Service has the highest approval ratings of any entity of the Federal Government. Indeed, a recent survey by the Pew Research Center released on April 9 shows that an overwhelming 91 percent of respondents have a favorable view of the Postal Service. This standing with Americans of all political persuasions is based in no small part on the Postal Service’s nonpolitical nature and universal service mission.

However, as we continue to perform our vital mission, the Postal Service remains saddled with long-standing financial challenges stemming from a broken business model that is imposed upon us by law. We have legally mandated unaffordable costs that we are prohibited from reducing, and yet we also lack the autonomy to diversify our products or to control our pricing.
Now, our fiscal challenges are only growing as mail volumes and revenues decline precipitously in the midst of this pandemic.

Stakeholders across the political spectrum share an interest in preserving and protecting the Postal Service. While different stakeholders will have different ideas about how best to accomplish our shared goal, and reasonable minds may differ, these differing views should not get in the way of what should be a cooperative effort. For our part, we will continue to work in a non-partisan manner with policymakers to achieve this goal and to obtain stabilizing relief from the direct impacts resulting from the pandemic, and we urge all others with an interest in the Postal Service to do the same.
Hi,

I am just a citizen with an idea...but if you already have the delivery infrastructure...

Everyone hates (and loves) Amazon. It's a monopoly. What if USPS created an online marketplace similar to Amazon? It would make billions and you could charge a lot less that what Amazon takes as its platform fees. You could scale it over time.

Just a thought because everyone loves USPS and not everyone loves Donald Trump.

Kind regards,

(b)(6)
Thanks,

Megan
Ron,

I’ll ask you to speak to the invite tomorrow at our briefing please.

Who was the WH contact and what office please?

Thanks,

Megan
Ms. Brennan,

I have gone through all the proper channels to file a complaint with my local post office and to date nothing has been done. I have been living at my current address for 18 months now and I have had nothing but problems with our postal lady delivering certified letters or packages from Amazon, where she has to get out of the car. There was an incident about 2 months ago where my husband was home sick and our postal lady (b)(6) pulled up under our awing and literally blew her horn for almost 5 minutes, now keep in mind my husband was home sick. My husband went outside and asked our postal lady what her problem was and who on earth sets outside someone's house blowing their horn for almost 5 minutes. The postal lady got an attitude with my husband saying she had a certified letter for us and he got an attitude back and stated "instead of sitting in your car blowing the horn, to get out and knock on the door, which is your job", and she got mad.

I called my local post office that afternoon and spoke with (b)(6) supervisor) and made a complaint and (b) tried to get an attitude with me that the postal lady does not have to get out of there car and I threatened to call the headquarters and (b)(6) stated that if I contacted the headquarters she would she would put our mail on hold for us to

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.
come pick it up from the post office. So I filed a complaint with the headquarters and of course I never got a response and now it is starting all over again. I got a notice from amazon on 4/22/20 (attached) stating "Unfortunately, USPS ran into an issue when attempting your delivery. They will try again." I called my local post office and spoke with (b)(6) regarding this notice and she informed me that (b)(6) just received the packages and brought them up to her to put in system showing delivery attempt, which delivery attempt was never made, so I left a message for (b)(6) to return my call since (b)(6) (supervisor) is out of the office. I have been working from home and was home all day. I never received a call back from (b)(6) so once I checked my mail and found the delivery attempt notice (attached) along with another package from amazon in my mailbox (copy attached) I called (b)(6) and spoke with her regarding this matter and she was going to look into it and I also informed her about all the complaints on line about postal lady doing the same things "not delivery items but leaving attempts in mailboxes" (attached). I also called (b) Consumer Affairs PO and spoke with (b)(6) and he was going to look into it and call me back, which he never did. Well today I get another email from Amazon (attached) stating the same thing as what occurred on 4/22/20 "Unfortunately, USPS ran into an issue when attempting your delivery. They will try again." I called my local post office and spoke with (b)(6) which informed me (b)(6) was not in so I called (b) Consumer Affairs PO and spoke with (b)(6) and informed him that my postal lady has refused to deliver another package today without even attempting to deliver and he stated that he has turned this over to my local post office and I informed him that they have not done anything.

This issue has gone unresolved long enough. My postal lady gets paid to do a job that she isn't even doing(numerous complaints attached). I seem to get all my amazon packages delivered that fit in my mailbox but not the ones that she has to get out of the car to deliver. I pay shipping cost for a reason and that isn't for me to have to go out of my way to pick packages up from post office. I pay federal, state and very high (b) County taxes and I should not even have to be taking time out of my day to send this email if my local post office or (b) Consumer Affairs PO would do their job. I am pretty sure that my complaint and the complaints I attached are not the only complaints about our postal lady that have been filed with our local post office, and they haven't done anything. I even heard bad things from our neighbors about our mail lady.

cc. (b) Attorney Generals Office and (b) County Gov.

Look forward to your response.

When I setup my mailbox I followed the guidelines via usps website. I spread a gravel drive for mailman to drive on and boarded it with bricks. I used the dimensions of my 3/4 ton diesel truck to figure out how long and wide to make the small driveway. My mailman insists on driving over the edge of the gravel/bricks and rutting up my yard. I’ve personally called the post master three times, along with my wife who has called another three times to complain and figure out what we could do on our part to resolve this problem. The post master has done absolutely nothing. She insisted on meeting us at our home to find a solution, and she never came. Our mailman has even gone as far as to put our mail on hold for a week without our permission. It was very inconvenient for us.

I am all about safety, and I understand that turning back onto highway is very dangerous, but the next mailbox is a mile away. Our mailbox is located at the top of a hill with clear view of traffic coming from both ways.

I have heard stories about problems with the Tate County mail delivery, but our Mail Lady is wonderful. We live in Arkabutla-she always comes to the door with packages and she is always friendly. Thank you to our Mail Lady!!

Expecting an item from overseas, got a note in my mailbox saying "sorry we missed you" ....??!!?? I was home all morning! No one even came to my door with my package... So I sent my husband to this post office because that's where the note said my package was. No package there and the man in line in front of my husband said he was experiencing the same problem. Your mail carrier needs to get their stuff together and do their job. This is sheer laziness. If they had time to fill out a card with all of our information on it, then they had the time to come to my door, knock, and accept a signature!

I got a notification that my package was undeliverable on my phone and I was here all morning. So I checked my mailbox for the little card that they fill out and it was empty. My wife checked it again when she got in from work from force of habit and brought in mail. They didn't even TRY to deliver my package!!!!

Every time I have mail to be delivered they are too lazy to drive up my driveway and give me my package. I am sick and tired of this. They lie and say they attempted to deliver my package every time they do this I have to wait until Monday to drive to the post office to pick it up because this crappy office closes at 11:00 am on Saturday. They are disrespectful and very inconsiderate of other people. I am just absolutely sick and tired of this they will be hearing from me Monday morning

K.j. Isbell doesn't recommend USPS. 2 years ago.

1 star

I'm going through the stack of "return to sender" invitations, my wife and I sent out weeks ago, and I've typed in numerous addresses into my google maps and each one pulls up an actual, legitimate, physical address. I had family members miss a baby shower bc someone decided the address numbers didn't exist? I've had it up to my ears with you guys.

You guys rut up my yard, my mailman puts my mail on hold for no reason (10 days), my mailman doesn't pickup mail when I raise the flag, and now you can't send my own family their invitations to our baby shower.

Such terrible service.
I have a letter in the box now with the flag up and nobody picked it up and we get everybody's mail on our road and have to deliver it maybe they should pay us!!!
Thank you.

Subject: Letter of Support from New York Delegation

Megan,

(b)(5)

Thanks
Ron
The coronavirus crisis is wreaking havoc on the U.S. Postal Service. Without immediate help, the Postal Service — a vital staple of American society since 1775 — could cease to function by this summer. This crisis is also affecting the State of New York more than any other. There were 287 confirmed cases of coronavirus and 14 deaths among postal workers in New York as of April 20, 2020.¹

As a direct result of the coronavirus crisis, first class and business mail volume across the country has dropped at an alarming rate. Mail volume is down by more than 30% from the same period last year. Over the next ten years, the Postal Service estimates that losses caused by the coronavirus crisis would be $54 billion.²

This is a national emergency. The American people rely on the Postal Service to deliver crucial goods and services every day, including more than a billion life-saving medications last year alone, millions of economic stimulus checks and unemployment benefits to help during this crisis, and 2020 Census forms for every household in America.

In New York, the Postal Service delivers to 7.7 million addresses and has more than 1,800 Post Offices. In our state, the Postal Service employed 44,675 people and paid close to $3
billion in wages in 2018.\(^3\) New York also will rely heavily on the Postal Service to conduct its primary on June 23, 2020, during which no-excuse absentee ballots will be accepted.\(^4\)

The Postal Service is a fundamental component of America’s economic infrastructure, providing affordable, universal delivery of mail and e-commerce packages to more than 160 million households and businesses. The Postal Service propels a $1.6 trillion mailing industry that employs 7.3 million people. It does all of this while operating as a business and receiving next to nothing in taxpayer dollars.\(^5\)

Both Democrats and Republicans supported large infusions of liquidity for other industries and companies that are critical to our nation’s economy, and we must do the same now to save the Postal Service.

The Postal Board of Governors has asked for a package that includes $25 billion in emergency appropriations to offset coronavirus-related losses, $25 billion for “shovel-ready” projects to modernize the Postal Service, and access to $25 billion in unrestricted borrowing authority from the Treasury.\(^6\)

To be clear, these requests were put forth unanimously by a Board of Governors with a Republican majority—all of whom were appointed by President Trump.

The Postal Service is an indispensable component of America’s critical infrastructure, and its workers are on the frontlines every single day delivering information and packages to the American people. We strongly support emergency funding for the Postal Service and urge you to do the same.

Sincerely,

Carolyn B. Maloney
Peter T. King

People receiving stimulus checks get letter signed by President Donald Trump

By Joe Ruiz, Jason Hoffman and Kevin Bohn, CNN
Updated 5:53 PM ET, Sun April 26, 2020

(CNN) — If you're getting money from the federal government as part of the recent stimulus response to the coronavirus, you'll also get a letter from President Donald Trump explaining why.

CNN has obtained a copy of the letter signed by the President and sent to recipients of the stimulus payments.

The one-page letter arrives in an envelope from the IRS as part of the Treasury Department, with both postage and fees paid for by the IRS, according to a notice on the envelope.

The letter reads, in part, "We are fully committed to ensuring that you and your family have the support you need to get through this time," and notifies the recipient exactly how much they would receive and how. On the other side of the letter is a translated Spanish version of the same text.
The letter sent to stimulus payment recipients.

Trump goes on to thank Congress for working with his administration in passing the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), "which I proudly signed into law."

CNN has spoken with recipients in Connecticut, Pennsylvania, New Jersey and Maryland who have received the letters.

During Friday's White House briefing, Trump said the act required the government to "send out a notice of what benefits Americans are receiving; to fulfill the requirement, the Treasury Department is mailing a letter to me."

In the legislation there is a section saying "Not later than 15 days after the date on which the (Treasury) Secretary distributed any payment to an eligible taxpayer pursuant to this subsection, notice shall be sent by mail to such taxpayer's last known address. Such notice shall indicate the method by which such payment was made, the amount of such payment, and a phone number for the appropriate point of contact at the Internal Revenue Service to report any failure to receive such payment."

The Treasury Department said Friday more than 88 million people received stimulus payments in the past week. Approximately 62 million people were still waiting for the payments as of April 17. Individuals who earn less than $99,000 are due up to $1,200, and married couples can receive up to $2,400. The amount falls as income goes up.

A controversy erupted once it was known that the physical checks sent out with the stimulus payments included a note on the bottom left with Trump's name on it. Democrats criticized that inclusion. Treasury Secretary Steve Mnuchin told CNN's "State of the Union" last week it was his idea to put the name on the check.

Trump said earlier this month that adding his name to the checks was not a big deal and it would not delay the process of Americans receiving paper checks.

"Well, I don't know too much about it, but I understand my name is there. I don't know where they're going, how they're going," he said. "I do understand it's not delaying anything. And I'm satisfied. I don't imagine it's a big deal. I'm sure people will be very happy to get a big fat beautiful check and my name is on it."

Regarding who decided the method of notice would be a letter from the President, the White House did not provide a comment. The Treasury Department did not immediately return a request for a comment.

CNN's Sam Feist, Katie Lobosco and Chandelis Duster contributed to this report.

Subject: FW: [EXTERNAL] Support to end Saturday residential delivery

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.

Dear Ms. Brennan,

I have long been in support to end Saturday USPS delivery to residential customers, as a means to trim your agency's expenses. As a customer, I am used to not receiving mail on Sundays, so including the other "weekend day" for non-delivery would take little adjusting.

I think most residential customers would quickly get used to Monday-Friday delivery only. And besides, it would eliminate finding a neighbor to "get my mail" while we're away for a weekend!

For online purchases (via Amazon, for example) I wouldn't mind paying an additional charge for weekend delivery.

I hope these present an option as a way to save the USPS from further debt.

My sincere thanks for all you do. Your letter carriers are the best.

Very respectfully,

(b)(6)

ATTENTION !!!!!!!!!!!!!!!! I NEED YOUR RESPONSE, OR WE CAN SET AN APPOINTMENT AT YOUR OFFICE. EMERGENCY !!!!!!!!!!!!!

Fri, Apr 24, 2020 8:33 pm, REVISED E-MAIL MESSAGE.

FROM: (b)(6)

To Spencer.M.Gibson Spencer.M.Gibson@usps.gov, Heikhali Heikhali@aol.com, Dear Mr. Gibson, I have e-mailed you numerous times this week, and I have received no answer.

1) I am unable to pay for my P.O. Box (b)(6) Post Office. I NEED that corrected, now.

2) The 80219 Post Office is now redirecting my packages, though not my mail, under a "non-existent change of address" (not in my name!) to my home, but NOT delivering the packages. The delivery person keeps the mail for several days, returning it to 80219 Post Office, where I am billed "additional Postage Due"!

3) I instructed the post office the "change of address" on my parcels was an error when you asked me to return to the post office and have Adrian "unclose" my P. O. Box (b)(6) Post Office. THE BOGUS "CHANGE OF ADDRESS" ON MY PACKAGES REMAINS, ALLEGEDLY FILED BY MICHAEL THOMAS. HE IS UNAWARE OF IT, AND DID NOT FILE A "CHANGE OF ADDRESS", NOR DID ANY OTHER FAMILY MEMBER, INCLUDING MYSELF! PLEASE, SHUT THIS "CHANGE OF ADDRESS" ON MY PACKAGES 'OFF'. IT IS A MERE PONZI SCHEME, BECAUSE THE PACKAGE IS SUPPOSED TO BE DELIVERED TO MY PO BOX 19759 AT THE 80219 POST OFFICE, FOR PRICE OF THE SENDER'S POSTAGE. I WANT TO RECEIVE MY PACKAGES AT THE 80219 POST OFFICE. I DO NOT WANT THEM 'FORWARDED'! FURTHER, I SEE NO REASON TO PAY AN ADDITIONAL AMOUNT WHEN THE PACKAGE IS ACTUALLY NOT FORWARDED. DESPITE THE FALSE CLAIM THE PACKAGE IS 'FORWARDED', I STILL RECEIVE THE PACKAGE AT ITS ORIGINAL DELIVERY ADDRESS. PLEASE, SHUT THIS PONZI SCHEME PLEASE, STOP THIS FRAUDULENT MULTIPLE CHARGING FOR UNWARRANTED EXCESS POSTAGE FROM THE CUSTOMER (ME), now!

THIS IS JUST ANOTHER FORM OF MISAPPROPRIATION OF FUNDS THAT ADRIAN SEEMS SO TALENTED AT.

4) PLEASE, E-MAIL ME TO ACKNOWLEDGE YOU HAVE READ THIS E-MAIL, UNDERSTAND IT, AND HAVE CORRECTED THESE PROBLEMS BEFORE MONDAY 04-27-2020. (I AM SORRY, BUT "ENOUGH IS ENOUGH.")

5) I AM SENDING A COPY OF THE E-MAIL TO THE NATIONAL POST MISTRESS, CEO & THE WHITE HOUSE FOR OBSERVATION OF YOUR, ADRIAN'S & THE 8029 POST OFFICE STAFF'S ACTIONS IN RESPONSE TO MY COMPLAINTS.

SINCERELY,
(b)(6)

____________________________

REVISED E-MAIL FROM LEONARD THOMAS TO SPENCER M. GIBSON, USPS. WILL YOU DO SOMETHING THAT IS EFFECTIVE TO FIX THESE PROBLEMS? NOW?
DOWN, AND REFUND MY $9.62 PAID TODAY, Friday, AT 3:17 PM MST, “FORWARDING” IN ORDER TO DEPART WITH MY PACKAGE TRACKING NUMBER (b)(6). PLEASE, STOP THIS FRAUDULENT MULTIPLE CHARGING FOR UNWARRANTED EXCESS POSTAGE FROM THE CUSTOMER (ME), now!

THIS IS JUST ANOTHER FORM OF MISAPPROPRIATION OF FUNDS THAT ADRIAN SEEMS SO TALENTED AT.

4) PLEASE, E-MAIL ME TO ACKNOWLEDGE YOU HAVE READ THIS E-MAIL, UNDERSTAND IT, AND HAVE CORRECTED THESE PROBLEMS BEFORE MONDAY 04-27-2020. (I AM SORRY, BUT “ENOUGH IS ENOUGH.”)

Subject: Trump's Full Commentary re: Postal Service Stimulus Funds

Reporter: "Do you have any money for the Postal Service?" (We are still trying to track down the outlet)

Sec. Mnuchin :"I can comment on that. So we authorized in the last CARES Act over $10B on a loan. My team has worked very actively on that with the Postal Service, if they need the money, and we are dealing with that."

Pres. Trump: "The Postal Service is a joke. Because they are handing out packages for Amazon and other Internet companies and every time they bring a package, they lose money on it. So Amazon and other Internet delivery companies are dropping off all of, well not all of, a big portion of their packages or whatever else into a Post Office. And the Post Office is supposed to deliver their packages and they lose a lot of money.

The Post Office should raise the price of a package by approximately four times because they don't raise them. For some reason, these people have been in there a long time, but for some reason they are cozy with some of these companies, and they don't raise the price of a package. If they raise the price of a package, like they should, four or five times that's what it should be. Or let Amazon build their own post office, which would be an impossible thing to do because the Post Office is massive and it serves every little piece of the country.
The Post Office, if they raise the price of a package by approximately four times, it will be a whole new ballgame. But they don't want to raise because they don't want to insult Amazon and they don't want to insult other companies, perhaps, that they like. The Post Office should raise the price of packages to the companies, not to the people, but to the companies. If they did that, it would be a whole different story. Do you agree with that, Steve?"

Mnuchin: "I do, and we are actually going to put certain criteria for a postal reform program as part of the loan. We are looking forward to the Board [of Governors] recruiting a new Postmaster General and doing postal reform."

Trump: "I will go a step further: if they don't raise the price of the service they give, which is a tremendous service and they do a great job. Postal workers are fantastic, but this thing is losing billions of dollars. It has for years because they don't want to insult, for whatever reason you can imagine, they don't want to insult Amazon and these other groups. If they don't raise the price, I'm not signing anything. So they'll raise the price and maybe become maybe even profitable, but so they lose much less money, ok? If they don't do it, I'm not signing anything. I'm also not authorizing you to do anything, Steve."

Thanks.

Janice

FYI - In his Friday bill signing of a new $500 billion relief package, Trump called the Postal Service "a joke"<https://twitter.com/jeffmason1/status/1253723682595315712> and confirmed the Post's reporting, suggesting that the Postal Service quadruple the rates they charge for shipping packages<https://twitter.com/PhilipRucker/status/1253727138810863616> if they want federal government assistance, the Post's Phil Rucker reported – click on links above as well for twitter mentions.  

Thanks.  

Trump says he will block coronavirus aid for U.S. Postal Service if it doesn't hike prices immediately The president said the postal agency should quadruple its package delivery prices and said he will stop congressionally approved funding By Lisa Rein<https://www.washingtonpost.com/people/lisa-rein/> and Jacob Bogage<https://www.washingtonpost.com/people/jacob-bogage/>  

April 24, 2020 at 1:19 p.m. EDT  

President Trump on Friday said he would not be approving an emergency loan for the U.S. Postal Service if it did not immediately raise its prices for package delivery, confirming a recent Washington Post article that said he planned to exert more control over the agency.  

Trump recently signed a law that allowed the cash-strapped U.S. Postal Service to borrow $10 billion from the Treasury Department. The Post has reported<https://www.washingtonpost.com/business/2020/04/23/10-billion-treasury-loan-usps/?tid=lk_inline_manual_4&itid=lk_inline_manual_4> that the White House wants to force changes at USPS as part
of the terms of the loan. Trump confirmed on Friday that one of those new conditions is a requirement that the Postal Service raise prices.

“If they don’t raise the price, I’m not signing anything.”

He said that he won’t allow Treasury Secretary Steven Mnuchin to approve the loan if prices aren’t raised.

Trump has railed for years against what he seems as mismanagement at the Postal Service, which has been battered by a decline in first-class mail in the Internet age – but which has found profitability with package delivery. The agency’s revenues have plunged about 30 percent during the pandemic, though, as business mail has declined.

Trump and his allies have frequently claimed that higher package rates on Internet shipping companies — Amazon, in particular — could ease the Postal Service’s financial troubles. But higher package rates could hurt the agency by artificially raising its prices above those of United Parcel Service and FedEx, analysts say. Higher prices also could impact Amazon, which acts as both retailer and shipper, by forcing it pass off higher costs on its customers to compete.

The Postal Service repeatedly has defended its arrangement with the e-commerce giant, saying it gets fair rates for the services it provides in a highly competitive environment.

This is a developing story and will be updated.

Megan

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.

Why is the USPS still delivering mail to customers daily? Why not deliver Monday, Wednesday and Friday to half and the other half Tuesday, Thursday and Saturday?

Cut the workforce by at least 30%. (Half of the USPS workforce is probably ready to retire or willing to retire).

The businesses or residential customers who feel they need daily mail can get a P.O. Box!

This easy to implement strategy would save money on both employee costs, but also on delivery trucks, etc.

Keep USPS solvent!
Thanks,

Megan

Trump administration considers leveraging emergency coronavirus loan to force Postal Service changes President Trump has railed for years against what he sees as mismanagement of the agency, which he argues has been exploited by sites such as Amazon By Jacob Bogage<https://www.washingtonpost.com/people/jacob-bogage/> and Lisa Rein<https://www.washingtonpost.com/people/lisa-rein/>

April 23, 2020 at 4:36 p.m. EDT

The Treasury Department is considering taking unprecedented control over key operations of the U.S. Postal Service by imposing tough terms on an emergency coronavirus loan from Congress, which would fulfill President Trump’s longtime goal of changing how the service does business, according to two people familiar with the matter.

 Officials working under Treasury Secretary Steven Mnuchin, who must approve the $10 billion loan, have told senior officials at the USPS in recent weeks that he could use the loan as leverage to give the administration influence over how much the agency charges for delivering packages and how it manages its finances, according to the two people, who spoke on the condition of anonymity because the talks are preliminary.
The discussions began when Trump renewed his attacks on the Postal Service, which he认为 has been exploitable by e-commerce sites such as Amazon, and has sought to change how much the agency charges for delivery packages. (Amazon’s founder and chief executive Jeff Bezos owns The Washington Post.)

Under the $2 trillion coronavirus stimulus relief passed last month=https://www.washingtonpost.com/business/2020/03/25/trump-senate-coronavirus-economic-stimulus-2-trillion/?tid=lk_inline_manual_7&itid=lk_inline_manual_7>, the Treasury was authorized to loan $10 billion to the USPS, which says it may not be able to make payroll and continue mail service uninterrupted past September. Mnuchin rejected a bipartisan Senate proposal to give the Postal Service a bailout amid the negotiations over that legislation, a senior Trump administration official and a congressional official previously told The Post=https://www.washingtonpost.com/business/2020/04/11/post-office-bailout-trump/?tid=lk_inline_manual_7&itid=lk_inline_manual_7>.

The borrowing terms have only been discussed among both agencies’ leadership and have not been made public because the Postal Service hasn’t officially requested the loan, the two people familiar with the matter said. Mnuchin could still decide not to pursue tough terms as the September deadline nears. The Postal Service would not have to use the entire $10 billion loan at one time, but could borrow up to that amount at any given time.

In discussions with senior USPS personnel, Treasury officials have said they are interested in raising rates on the Postal Service’s lucrative package business, its sole area of profitability in recent years. Treasury could also review all large postal contracts with package companies to push for greater margins on deliveries.

Treasury officials have said they may press the agency to demand tougher concessions from its powerful postal unions — among the public-sector unions that still retain significant leverage in negotiations with the government.

The officials have also said Mnuchin wants the authority to review hiring decisions at the agency’s senior levels, including the selection of the next postmaster general, a decision that until now has been left to the Postal Service’s five-member board of governors.

USPS spokesman David Partenheimer confirmed in an email that the agency and Treasury have begun “preliminary discussions” over the loan, but that the Treasury had not yet asked “to impose any of those conditions on that borrowing authority.” He declined to say whether these or any other terms were under discussion.

A Treasury spokesman said the department began preliminary discussions on the terms of the loan, but said it was too early to comment on those conversations. Amazon did not respond to requests for comment.

The Postal Service has repeatedly drawn on an open $15 billion line of credit Congress authorized nearly 30 years ago, as the agency’s finances have been squeezed by the demise of the traditional mail business and rising pension costs. That loan comes without any terms and low interest rates. USPS has paid down the debt in recent years, but has never fully paid off the loan. On April 1, the Postal Service borrowed another $3 billion to help weather the pandemic, bringing the agency up to $14.4 billion from that line of credit.

Usually, the agency’s business decisions are made by its Board of Governors, who are appointed by the president, and an independent entity called the Postal Regulatory Commission, which ensures that the Postal Service charges rates for its services that cover its costs.

If Mnuchin were to gain greater control through the new loan, a slew of Postal Service management decisions, including the terms of major contracts and collective bargaining strategy, could require Treasury’s approval. Hiring and firing of senior executives could be required to be run by Treasury, the two people familiar with the matter said.
Trump has taken aim at the Postal Service since early in his tenure, initially urging the agency to double the rates it charges Amazon and other firms for delivery. The agency has been decimated by the decline in first-class mail over recent decades, but one bright spot has been package delivery. The Postal Service competes vigorously with UPS and FedEx and even Amazon’s own delivery services, and it specializes in the “last mile” delivery to a customer’s home.

Trump frequently repeats the claim that higher package rates on Internet shipping companies — Amazon, in particular — could ease the Postal Service’s financial troubles. The Postal Service has repeatedly defended its arrangement with the e-commerce giant, saying it gets fair rates for the services it provides in a highly competitive environment. Higher Postal Service rates could hurt the USPS by artificially raising its price above those of UPS and FedEx, analysts say. It would also hit Amazon, because the company contracts for “last mile” deliveries more frequently than its competitors.

UPS spokeswoman Kara Gerhardt Ross in an emailed statement called the Postal Service “an important partner for us in delivering to communities,” especially during the pandemic. “At the same time, the USPS would benefit from modernizing both their cost attribution methodologies to reflect the past decade’s growth in the competitive package market,” she said.

FedEx did not respond to a request for comment.

The familiar mail carriers in the USPS’s iconic blue and white trucks have continued delivering mail and packages to a country under quarantine. The Postal Service remains a vital conduit of information for the dwindling proportion of the population that isn’t online.

A Postal Service spokesman said 1,219 workers of the Postal Service’s 630,000-person workforce have tested positive for the coronavirus. Forty-four workers have died, according to the American Postal Workers Union, one of several labor groups that represents USPS employees.

The Postal Service is projecting a $13 billion shortfall this year because of the pandemic, with mail volume down about 30 percent since the virus forced businesses to scale back advertisements, catalogues and other mail. A jump in package deliveries to homebound customers has not fully compensated for those losses.

Postmaster General Megan Brennan asked lawmakers this month for an $89 billion bailout that would include funding to make up for losses because of the pandemic, new money for modernization and $39 billion in restructured debt.

The Postal Service’s plight has recently been attracting the attention of lawmakers in both parties. Sen. Bill Cassidy (R-La.) told donors on a call last week that he would wanted postal unions to make concessions on salaries and benefits to help the Postal Service’s finances. Senate Minority Leader Charles E. Schumer (D-N.Y.) said Tuesday that relief for the Postal Service should be part of a “Phase IV” stimulus package.

At an Oval Office meeting more than a year ago, Trump decried to aides what he viewed as the dysfunction of the Postal Service and reiterated long-standing grievances about the costly effect on American taxpayers, according to one former senior administration official present at the meeting.

Trump has repeatedly demanded changes to the agency’s financial structure. Mnuchin has taken on the cause, and has since been repeatedly briefed on potential solutions, the former official said.
“People around [Mnuchin] thought it was crazy because people have been trying to figure this out for years, and it’s very politically challenging,” the former official said.

But the treasury secretary has so far found a career staff at the Postal Service that has resisted his efforts at change. Mnuchin created a task force that released a 74-page study in 2018 that called for some of the same reforms Treasury may ask for now, namely cutting labor costs, restructuring third-party service agreements and increasing package rates.

“Require price increases, reduce service costs, or exit the business for any mail products that are not deemed an essential service and do not cover their direct costs,” the report recommended.

But the recommendations went nowhere, in part because the agency lacked a quorum on the Board of Governors. They also faced political opposition in Congress and among union ranks to curtailing postal routes and other services.

Last fall, Mnuchin sent his deputies to present a new board largely made of up Trump appointees with a slate of changes that attached terms to the remainder of the Postal Service’s customary $15 billion line of credit, breaking with a nearly five-decade precedent of generous terms of postal borrowing.

But career postal staff balked at the terms and USPS leadership swiftly rejected them.

“Treasury is going to want to see some of these recommendations implemented,” said Paul Steidler, a postal expert at the Lexington Institute, a conservative think tank focused on security-related issues.

Democrats say Mnuchin will be making a mistake if he tries to impose stringent terms on the new loan.

“If Mnuchin wants to play this kind of game with the Postal Service, I think it is time for the Postal Service to tell him they’re not going to agree to unacceptable conditions, and that means Mnuchin will have on his hands the disruption of services this fall,” said Rep. Gerald E. Connolly (D-Va.), who chairs the House subcommittee in charge of postal oversight. “I think it’s time to stare him down and this White House down, and for Congress to decide are we going to stand with the Postal Service as we know it.

“This is an essential service and it needs to be treated as such. My hope would be that the Postal will stare him down. If they don’t, it’s tantamount to handing over day-to-day management to the Treasury Department.”

“We strongly urge you to make this loan to the Postal Service in a timely manner, under fair terms that comply with the intent of the Cares Act,” the letter states. “We expect the Treasury Department to fully comply with federal statutes and refrain from setting any conditions that would infringe on the Postal Service’s statutory authorities.”

Staff writers Josh Dawsey and Jeff Stein contributed to this report.
Thanks,

Megan

Ms. Brennan,

I am a member of the public who finds it shameful that the USPS is being placed in the position to accept forced changes in order to stay afloat or potentially be out of business. Surely there is some way to leverage the fact that USPS has provided essential services during this period and will need to remain fully functional for our Democracy given the likelihood that many States will begin voting by mail in the upcoming elections. Additionally, this pandemic has demonstrated an absolute need for the USPS to provide banking services to ensure delivery of checks such as those provided under the CARES Act to every household. I wish you the best as you move forward during these difficult times and hope you stand firm against this newly proposed shakedown.

Thank you.

Attached to a copy of yesterday’s to you, please find documentation of my claim that the post office illegally CHANGED THE ADDRESS on this shipment from Amazon to me:

This is a photo of the label that clearly shows my correct shipping address while, when contacted by Amazon with me on the phone, your representative insisted that your computer system clearly showed my address as (b)(6) When the Amazon rep requested that the package be re-directed back to my correct shipping address, you representative said, “Amazon knows that we cannot change the address.” This proof clearly shows that you did exactly that before Amazon contacted you. You are in violation of your own rules on this as well as your rule that you cannot hand P.O. Box mail over the counter to box holders. At my local post office you have been doing just that for over two years because you have been using a temporary trailer as a post office until you can build/renovate a new one with real boxes.

I have lived that the address above for over 17 years. I continue to be very unhappy that I cannot get USPS to deliver mail to my house. During the pandemic, your policies and you inferior post office trailer make it impossible for people in my age and health situation to safely get our mail and needed packages. I have related my concerns to my U.S. Senator and the Governor of the State of N.Y. I will be sending a copy of these emails and photo proof to them in an effort for you to change your policies so that I can safely get my mail. Any and all adverse consequences of your policies may be referred by them or I for further action.

I will also be sending a copy of this information to Mr. Jeff Bezos at Amazon.com<http://Amazon.com> because your actions and mis-representations have caused him to lose sales to me and also caused him to have to send me refunds.
Can you keep him as a customer if you don’t provide service?

On Apr 22, 2020, at 5:21 PM, (b)(6) wrote:

Dear General Megan. J. Brennan, U.S. PostMaster General,

Like millions of other residents of the United States of America, my wife and I are not allowed to have home delivery of our mail. We have lived here for 17 years and shortly after we moved we were told that mail delivery was not available to us, but rather we would be given a P.O. Box and have to go to the post office to receive our mail delivery.

That has long been a problem for us because many companies will not deliver to P.O. Boxes and others confuse our physical address and mail address. Over the years, some post office personnel have refused and returned what they deem to be miss addressed mail.

In the last two years or so this has become worse because our local post master had their leased building condemned and replaced it with a “temporary” trailer which can only be accessed by a narrow ramp which requires that customers turn sideways to pass each other on their way into and out of the trailer. And the “temporary” trailer does not have actual boxes. Customers wait at a counter and tell the postal workers their box number and then the mail is handed over the counter to them. I had previously been told that handing mail to P.O. Box holders was not allowed by USPS rules. Apparently you are the only ones able to violate your rules even for older people who can’t access their box directly!

Under Federal and State isolation and self distancing guidelines for people of our age (b) ) and with our underlying health conditions, my wife and I are no longer able to safely access our mail and packages. To do so we would have to wait in a long line of people (both with and without masks and gloves) and then pass those people on the ramp and in the trailer and have our mail handed over the counter by postal employees (both with and without masks and gloves) to get our mail. We have been told not to leave our house for our own protection and to help protect front line critical health care workers.

Recently our local post office shortened its open hours thereby making the problem even worse by increasing the crowd waiting for their turn to get the mail. And when I asked a postal employee if there was another way to get our mail, I was told that I could use your on-line tool to see what was there for me but then I would have to come pick up the mail. Choosing between getting our mail and staying healthy is not fair or safe. I have contacted Kirsten Gillibrand, one of my U.S. Senators and Andrew Cuomo Governor of the State of New York with my complaint.

In addition, I have recently had problems with two Amazon orders related to Covid-19 guidelines. The first was with a package of sterile gloves that I would need for any trips outside my house. Amazon chose to send them to my correct shipping address bu used USPS. When they arrived at the post office, postal employees looked at the correct ship to address of my house and changed it in your computer system to my P.O. Box address instead of the street address which was on the box. In other words, I had to have gloves to get the gloves that I had to have to get the gloves…..

When Amazon contacted their post office representative, she insisted that the address on the box was the P.O. But, when I finally saw the package, the address on it was my street address which was consistent with the ship to address used by Amazon. The Amazon post office representative stated that, “Amazon knows that the post office cannot change an address.” Apparently that is not true if the post office decides to make the change. And, your representative was
apparently not aware that there are so many of us that can’t get USPS delivery to our homes even if we want it. Today USPS did exactly the same thing with another Amazon order for a groomer that was shipped by USPS.

Those actions are both unfair and illegal. We are being asked to accept sub-standard service which threatens our physical well being. I have told Amazon that I will no longer order from them if they cannot insure that I will receive my order at my house. I believe that they will go back to using UPS or FedEx who have been delivering to my home for as long as you have not. Your policies are keeping you from having a level playing field in getting new business from Amazon and other internet vendors. And, your loss of this business accelerates your lack of profitability.

I don’t know if this letter, or the actions of my Governor and/or U.S. Senator, will make any difference to my mail delivery. I would hope that it will, at least, make a difference in your next funding cycle.

Yours truly,

(b)(6)

Megan

Hi there David.

Wanted to see if USPS could comment on what we’re planning to report, which is that the Treasury Dept and Postal officials are now in talks over the terms and conditions of the CARES ACT line of credit, and that Treasury is discussing giving the Secretary have control over/have the right to impose some or all of the following terms and conditions. Thank you so much in advance for helping with this!

1/ Postal Service would raise package rates 2/Treasury would approve big rate contracts with third-party shippers 3/Treasury would review hiring and firing of senior postal executives 4/USPS would have to negotiate tougher labor contracts.

Also these are similar demands to what Mnuchin proposed to the board of governors last fall.

Thanks so much
Best, Lisa

To whom it may concern,

Dear Postmaster General,

The Clifton post office is the most unorganized business I have ever dealt with in my life. We are currently on the third lost package in a two week time period. At first I was very appreciative of Lawrence who is a counter worker in how concerned he was about his customer. However, time changed that thought very quickly. So all three packages had the same conversations and same answers so let me explain.

On the first call about my missing package, the online tracking said unable to get to my driveway/mailbox. My door is right off a main highway! So how?? They put a little package in my mailbox that said "DO NOT BEND" and guess what.. they shoved it in and my prints were ruined. So how do I get one package but the other one said unable to deliver? Ok, so moving on. I called the next day about it and the package had disappeared. We wait three days and the package still has not shown up. Luckily the company sent me another item.

On the second call about missing a package the online with the tracking typed in said “delivered at front door” I asked why is my package missing if it is said to be delivered at front door. The answer I was told time after time was that they have a policy at their post office that when they run end of day it has to be 100% delivered from all of the carriers. I therefore asked ok well what about if you come back with my package and he said well the next morning we just have to
remind each other to unscan and rescan for it to go back out that next day. Well guess what... THEY DO NOT KNOW WHERE THE PACKAGE WENT, and again I should call the company and they can resend me what I ordered. I think that is absolutely absurd and plain out irresponsible.

My thought is does the state or postmaster general give out incentives or awards to post offices that have 100% end of days for a certain amount of days or what? I would love an explanation but nobody at the office in Clifton, Tx can explain that to me. Actually, to the extent of I got told on the phone by Lawrence “I am just speechless” like what you are speechless you cannot even explain to me the reasoning behind how your policy makes you turn in 100% every single day. I know why because you do not want to look bad for losing all of these packages obviously. Luckily my family has always lived outside this beautiful town and I know everyone and my packages are not the only ones lost. One of them was actually told by the clerk that well if it is an amazon package just call them because they will reship or just refund it back to you. How careless about your job can you actually be to say that to someone. This last package I was told it was lost from being scanned in at the dock to being delivered to my house and hmm what did it happen to be make up so yes I am sure it is gone. I was assured that all of my packages made it to the location because it was scanned in and out so where are they going is my question? How am I going to get refunded for this last package because the company is not going to send me another package of makeup already tried. Clifton post office says well sorry about your luck basically because they are “speechless.” I am tired of over and over hearing well wait 2-3 days and hopefully it is going to show up and we will call you. Well it has been three days no word from them so what is my next step?

I appreciate everybody that works and I know that mistakes can be made and that is perfectly fine. I am just tired of the same carelessness excuses time after time. Please have someone look into this location and/or advise me on what my next step should be, thank you!

Regards,

(b)(6)

Hope I see you again soon, Nagisa

Nagisa Manabe, Executive Director NOFA NJ<http://nofanj.org>
Two-thirds of voters in a new poll said they support voting by mail for the November election.

The NBC News-Wall Street Journal poll released Tuesday found that 67 percent of polled registered voters approve of this year’s election being held through the mail.

That includes 58 percent who said voting by mail should be a permanent change and 9 percent who said it should only be allowed this year due to the coronavirus pandemic.

A total of 29 percent of respondents said they are against voting by mail for this and future elections.

A majority of respondents in the poll, 58 percent, said they generally approve of voting by mail, while 39 percent do not.

Voting by mail has seen an uptick in support over the past couple decades, NBC noted.

By comparison, a Pew News Interest Index poll in February 1996 found 48 percent of respondents supported mail-in voting, while 47 percent opposed.

The results of the new poll were split along partisan lines. The poll found that 88 percent of Democrats, 69 percent of independents and 44 percent of Republicans support mail-in voting for this election or generally.
Among those who would support a permanent change, 82 percent are Democrats, 61 percent are independents and 31 percent are Republicans.

This year, more than a dozen states have delayed presidential primary elections or changed to all-mail formats. Five states already conduct elections fully by mail, and more than half allow voters to submit absentee ballots through the mail.

Democrats in Congress have called for a requirement for states to allow mail-in voting and for $4 billion in federal aid to assist in the expected increase in absentee voting in the fall if the coronavirus crisis continues. But Republicans, including President Trump, argue that mail-in voting would increase the likelihood of fraud.

The NBC-Wall Street Journal poll surveyed 900 registered voters April 13-15 and has a margin of error of 3.27 percentage points.

The U.S. has the most coronavirus cases and deaths in the world, with more than 800,000 cases and 43,600 deaths, according to data from Johns Hopkins University.

Thanks,

Megan

The only White House job I would ever take is Postmaster General. This is why Algernon D’Ammassa, Las Cruces Sun-News Published 6:00 a.m. MT April 19, 2020

Like many reading this, I have been working (and spending almost all of my time) at home lately. For me, that means the brisk walks I depend on to clear my mind are around my home in Deming rather than the streets of downtown Las Cruces.

On payday, I took a walk to the post office to fill up on stamps, ambling down sidewalks built during the Great Depression that still bear the stamp of the Roosevelt-era Works Progress Administration.

The Deming, New Mexico post office on Spruce Street, built in 1937, is also a product of that era: A modest brick building with a small footprint in an understated neoclassical style fitting for a government building.

The lobby, that sliver of the facility available for public view, has a tile floor and high ceilings framed by antique post office boxes that are still in service — including the one I rent.

Overhead there still hangs the mural by Kenneth Miller Adams showing Cookes Peak amid a desert landscape, commissioned by the federal government when it was putting artist and artisan alike to work as part of the New Deal.

An unused extension of the federal building dating from the Johnson administration presents, visible through locked glass doors, a tiny lobby where reproductions of the U.S. Constitution are still on display and unused offices serve as default storage areas.

The architecture is prim, sturdy and inviting to the public without being gaudy. Would that our most prominent politicians emulated those features! Meanwhile, the railings show chipped paint, the door sometimes sticks and the roof used to leak in several places before they replaced it last year.

Thanks,

Megan
There is also a stolid, dented beauty in the United States Postal Service vow “to provide the American public with trusted, affordable, universal service,” no matter where they live, with a variety of affordable products and services elevating use over profitability.

Some Americans dream of being a president or perhaps a military commander or attorney general. The only role I could ever stomach in any administration would be U.S. Postmaster General. I would prove a zealous and patriotic advocate, and part of my duty would be to rail against legislative efforts to break the postal service so that its assets can be sold off and the service privatized.

No doubt, I will hear from readers about checks lost in the mail and other imperfections, and even with that, the USPS is a proud rampart for the republican virtue of boring, benevolent governance and community service.

The agency’s role in interstate commerce and communications is not what it was in the 18th century, of course. For the last 50 years it has been a hybrid operation required to be self-funding, and yet for years it was also required to front advance payments to the fed, totaling tens of billions of dollars, for future retirement benefits (for workers not yet born).

Despite efforts by President Donald Trump to portray the USPS as broken and failing, quarterly reports available online indicate there is ample demand for the courier services and the infrastructure built over time by the USPS and which now prove useful for commercial competitors.

The USPS also provided basic banking services, such as simple savings accounts, as recently as the mid-1960s. It is not difficult to imagine additional ways the USPS could provide service and generate revenue, without the need to make a killing on behalf of shareholders.

Instead, more service is being spun out to commercial providers, and classic post offices like our handsome WPA-built facility in Deming are being sold: A giveaway of public wealth to private holders with different vows.

Jim,

Attached is the draft -

It is a lengthy memo however, in my view, better to have more content to start; easier to edit.

Please review & provide feedback.

Please feel free to give me a call if you want to discuss.

Thanks,

Megan

Dear Postmaster General Megan Brennan,

As you are well aware, the US Government has required the funding of the USPS pension and health benefits to 75 years' of funding, which no corporation in the US is required to do.

This requirement was passed under the privatization efforts of President George W. Bush and likely initiated by the corruption of the US Congress with help from the lobbyists of FedEx and UPS.

To save the People's Postal System, this bill of capitalist corruption entitled, "Postal Accountability and Enhancement Act of 2006" needs to be revoked. The bill pulls necessary operating capital for USPS and puts it into a pension fund, which is unnecessarily over-funded. The 2006 "law" has no intent other than the destruction of the USPS to favor the for-profit FedEx and UPS corporations, which will obliterate reasonable and accessible shipping costs for all Americans once the USPS is gone. The money is serving no purpose in this fund other than destroying the operating capital of the USPS, and this is by intent.

This law is not for any benefit but for the for-profit corporations. Where will the $400,000,000,000 after the successful Congress-sponsored destruction of the USPS?

The Democrats are supposed to be the "progressive" and "left-wing" side of the government: the one that is supposed to represent the People of this country in the government. After seeing the trillions of dollars of cash going for the corporations and their oligarchs, with nothing meaningful for the 99%, I am not impressed.
Do something and challenge my view.

Thank you for your time, and I look forward to seeing an Amendment stuffed into a necessary bill next month that will save the People's Postal Service.

Sincerely,

(b)(6)
Tom,

Thanks,

Megan

Subject: [EXTERNAL] Let’s save our Post Office!

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.

Dear Ms. Brennan,

I am very concerned about Trump’s recent threats to do away with our Post Office, saying that it is falling on hard times. It seems to me that this would be the time to support our legendary institution, rather than abandon it, although he may want to abolish the P.O. as a way to suppress mail-in ballots in the fall.

As a way to become more solvent, I would suggest that the USPO raise the cost of stamps. I know you just raised the cost from 0.50 to 0.55, but I would suggest an additional raise to 0.75, or $15.00 per book. This is still a bargain! These are hard times, and I think that the American people would embrace this change. I just mailed a birthday card to my sister in Seattle. Even if the airlines were running normally now, I doubt that I’d be able to fly there and back for 0.75!

Secondly, I would eliminate Saturday mail service. In rural communities across the country, such as my own, think of the savings in gas and vehicle maintenance this change would effect!

As far as package mail, the point could be made that there are millions of Americans without computers, so that Amazon is not an option. Also, there are many people, like me, who don’t want to give out their credit card numbers on-line, nor do they want to support Jeff Bezos, who has no regard for his employees’ health or financial well-being. As far as package mail by FedEx or UPS, I live in the country and have no clue as to the nearest such facility, but I do know where my Post Office is. These points need to be made to the powers-that-be, in order to help justify your continued existence and service.

Sincerely,

(b)(6)
Thank you.

Megan

Thank you for contacting the Postal Service Office of Inspector General Hotline.

Sincerely,
The OIG Hotline Team Submitted On Sunday, March 15, 2020 - 13:27 Submission ID: 25029 I am a...: USPS Customer Do you wish to remain anonymous?: No Do you want confidentiality?: Yes Are you willing to be interviewed?: Yes Full Name: (b)(6) 
(b)(6) 
(b)(6)

When did the misconduct occur?: 2020-03-15 Who committed the alleged misconduct/wrongdoing? USPS employee in a USPS van. Received (2) packages on a Sunday in my mail box from Amazon. This was NOT the normal carrier. The red flag was up and a letter in the box to be taken. Postage prepaid stamp for PVA.org. Carrier shoved (2) packages into the mail box damaging the letter / slammed it shut and FAILED to take the letter. I heard the noise and came to the curb as he was getting into the van. Leaving the flag up and failed to respond when I called to him as he got into the USPS van and slammed that door. I did not get a good look at him. He then left the scene.

What are the facts?
Failed to take postal letter, failed to put flag down, damaged outgoing envelope. Ignored customer and left the scene. This was NOT the regular carrier. UNSAT. Slamming the mail box was unprofessional. I wish to press charges against USPS employee. I have copies of the mail labels from Amazon. Previous incidents with your part timers has caused this situation to escalate. I intend to pursue this further at your 800 number.

Where did the misconduct/wrongdoing occur?
553 Newbury Way mail box by the curb.

How was the misconduct/wrongdoing committed?
Failed to take letter, damaged outgoing letter, slammed mail box lid, and refused to communicate with customer.

Do you have first-hand knowledge of the misconduct/wrongdoing?
Yes

Where can we obtain additional information concerning the misconduct/wrongdoing?
N/A

Who else might be aware of the misconduct/wrongdoing?
The part time USPS employees have a habit of misconduct at (b)(6). Previous incidents not reported.
Thank you.

Megan

The Postal Service Deserves a Permanent Bailout By Eric Levitz

Imagine if the United States had a federal agency so well run that it had maintained a 90 percent approval rating<https://www.people-press.org/2019/10/01/public-expresses-favorable-views-of-a-number-of-federal-agencies/> even as the public’s trust in other institutions had cratered<https://news.gallup.com/poll/1597/confidence-institutions.aspx>. Imagine this entity also created hundreds of thousands of high-quality, middle-class jobs <https://money.cnn.com/2013/02/06/news/economy/postal-worker-jobs/index.html> at a time when such positions were in short supply — while providing a valuable, publicly subsidized service to rural areas in desperate need of federal support<https://www.politico.com/newsletters/morning-agriculture/2019/11/14/the-economic-gap-in-rural-america-782365>.

Now, let’s say that some historic calamity dealt the U.S. a massive economic blow, triggering Great Depression–era levels of joblessness this year<https://nymag.com/intelligencer/2020/04/another-bloodbath-week-for-unemployment.html> and putting America on pace to suffer upwards of 9 percent unemployment through the end of 2021<https://www.cbo.gov/publication/56314>. Let’s further stipulate that this crisis also happened to make the overwhelmingly popular agency’s services indispensable for meeting consumers’ needs<https://www.bostonglobe.com/2020/04/13/opinion/postal-service-has-never-been-more-valuable-or-more-endangered/> and preserving the integrity of U.S. elections<https://nymag.com/intelligencer/2020/04/seven-states-limit-voting-by-mail-to-trump-approved-groups.html>.

Finally, let’s say American taxpayers could fully fund this hypothetical agency for about $14 billion a year<https://www.wsj.com/articles/postal-service-warns-of-22-billion-hole-from-coronavirus-11586463104> — in other words, for about one-tenth of the amount of money<https://nymag.com/intelligencer/2019/12/afghanistan-papers-ndaa-congress-defense-bill.html> Congress has added to the Pentagon’s annual budget since Donald Trump took office.

Would you describe this agency as disastrously unaffordable and demand that it slash jobs, reduce employee benefits, and cut service to low-density areas as soon as possible?

If you are President Trump, a congressional Republican, or a centrist Washington Post columnist<https://www.washingtonpost.com/opinions/a-disaster-brewed-for-years-in-the-postal-service-the-coronavirus-has-engulfed-it-in-crisis/2020/04/13/57ded354-7db0-11ea-9040-68981f488eed_story.html>, then the answer is yes.
The agency I describe is, of course, not some utopian bureaucracy but the actually existing United States Postal Service (USPS). In real life, however, the USPS is not funded by congressional appropriations. Rather, since the 1970s, Congress has required the Postal Service to simultaneously:

- Finance its own operations, as though it were a business.
- Provide mail service to every part of the country — and charge Americans the same (affordable) postal rates no matter where they live, even if such Americans happen to reside in rural hinterlands that private carriers ignore because they cannot be profitably served.

This dual mandate was always a challenge. But as the internet’s growth reduced demand for snail mail, it became nigh impossible for the USPS to meet both of these requirements without cutting jobs and employee compensation. And, in 2006, a Republican Congress deliberately made the agency’s predicament worse by (needlessly) forcing it to prepay all its employees’ pension and retirement health costs decades in advance. All this rendered the Postal Service technically insolvent before COVID-19 made its presence felt in the U.S. Now that the crisis has also drastically reduced America’s overall mail volume, the agency’s revenue is in free fall. According to Postmaster General Megan Brennan, USPS will incur $22 billion in new losses over the next 18 months.

Congressional Democrats would like to help the Postal Service through this troubled time by providing it with a federal bailout. The Trump administration would like to use the agency’s financial crisis to both force through cuts to postal workers’ compensation and (for God knows what reason) screw over its own rural base by allowing the agency to charge low-density parts of the country higher rates. The president, meanwhile, ostensibly wants the USPS to bilk Jeff Bezos until he stops funding journalism critical of Republicans (this might be sound policy for punishing Trump’s personal enemies, but it would not actually solve the Postal Service’s funding woes). Trump may boast the most absurd (and blatantly corrupt) position in this debate. But Beltway centrists who present “structural reforms” to the USPS as an objective, apolitical necessity are arguably more dangerous. In truth, there’s nothing wrong with the Postal Service’s business model that can’t be fixed by ceasing to run this essential government agency as though it were a business. The USPS’ growing crisis of profitability presents America with a choice: It can maintain the Postal Service in its current form by providing the agency with federal funding, or it can force the agency to cut jobs, benefits, and service provision.

The Washington Post’s Charles Lane does not want Americans to understand that the former is an option. Or at least this is what his recent op-ed on the subject would suggest. Observe how the columnist characterizes the Postal Service’s plight to his readers:

For years, experts warned that a disaster was brewing, yet elected officials of both parties took no action.

And so here we are, scrambling to prevent a possible national tragedy, having squandered precious time that could have been spent preparing for the inevitable.

All of the above refers, of course, to the financial crisis engulfing that venerable, and vital, institution known as the U.S. Postal Service. ... [T]he service amassed more than $77 billion in losses over the past 12 years, according to subsequent GAO analysis. “Urgent” change was needed, the GAO said in 2010, to right-size a far-flung network of post offices and other USPS installations, and to reduce labor costs that accounted for 80 percent of spending.
... Nothing fundamental was done, despite repeated legislative efforts, because Congress refused to act. Congress balked because beneficiaries of the status quo — subsidized commercial mailers, rural congressional districts and postal unions — resisted structural change.

Lane eventually allows that, in the present crisis, some federal aid to the USPS is “clearly warranted,” but adds, “the agency cannot survive over the long term without the structural change that has been postponed for too long.” The columnist never acknowledges that the Postal Service was not always expected to cover its own costs, or that requiring it to do so was (and is) a political choice. Instead, he suggests that it is an objective, mathematical fact that the Postal Service “cannot survive” unless it slashes compensation for its workers and service for rural Americans. This rhetoric is not only dishonest but dangerous. The COVID-19 pandemic has provided a harrowing object lesson in the importance of maintaining public faith in expert opinion. Many have rightly criticized the anti-vaxxer movement and right-wing cranks for undermining the trust in authorities on public health. But centrists who disguise advocacy for their tendentious policy preferences in appeals to “expert” opinion also bear some responsibility for the rising tide of anti-intellectualism.

In Lane’s accounting, the Postal Service has lost about $6.4 billion a year over the past decade. Since Trump took office, the Pentagon’s annual budget has grown by $130 billion. In other words, Congress could completely eliminate the Postal Service’s “financial crisis” by (1) reducing the Defense Department’s Trump-era raise by a tiny fraction, or (2) increasing America’s annual deficit spending by a tiny fraction, or (3) raising federal taxes by a tiny fraction. Why, exactly, should these policy options be viewed as so self-evidently absurd that a respected commentator can write as though they do not exist?

After all, America has no crisis of fiscal capacity<https://nymag.com/intelligencer/2020/02/pete-buttigieg-deficit-demagoguery-is-dangerous.html>. In recent weeks, Congress approved $2.2 trillion in deficit spending — and inflation remains undesirably low<https://www.ftadviser.com/investments/2020/04/09/the-outlook-for-inflation/> while the U.S. dollar remains stronger on international markets<https://fortune.com/2020/03/22/king-dollar-headache-global-economy-coronavirus/> than policy-makers would like. Simply put, if we can afford to reward the Pentagon’s calamitous failures with a $130 billion bonus, we can surely afford to solve the Postal Service’s financial problems by printing another $14 billion each year (or whatever single-to-low double-digit billion-dollar sum is required to defray the agency’s losses).

What’s more, if the present crisis has highlighted our country’s immense fiscal capacity, it has also exposed America’s dearth of state capacity<https://nymag.com/intelligencer/2017/05/is-america-becoming-a-failed-state.html>: America is a country that can painlessly inject trillions of dollars into its economy but can’t actually put checks into its citizens’ bank accounts without a few months of advance warning<https://www.cnbc.com/2020/04/02/paper-stimulus-checks-could-be-delayed-by-up-to-5-months.html>. In this context, maintaining a government agency that boasts functioning offices in every corner of the country might be more valuable than avoiding an infinitesimal increase in the federal deficit. For much of its history, the Postal Service provided Americans with a public option for basic banking services.<https://nymag.com/intelligencer/2018/04/kirsten-gillibrand-proposes-public-option-for-banking.html> If Congress gave the USPS the authority to reestablish such services, and offer all Americans a free bank account (as congressional Democrats have proposed), then the federal government would be able to dispense rapid relief to individuals in future crises and recessions, potentially averting many billions of dollars in lost economic activity in the process.

To be sure, one can reasonably argue that America has public needs more pressing than indefinitely maintaining six-day-a-week mail delivery, even as the internet steadily reduces demand for that service. Perhaps, if we could cut mail service to five days a week — and seamlessly transfer the resulting surplus of manpower and resources into green-energy projects or high-quality eldercare — we would be wise to do so. But in the United States we actually live in, a dollar saved on the Postal Service would very likely become a dollar earned for the beneficiaries of regressive tax cuts<https://www.washingtonpost.com/business/2020/04/14/coronavirus-law-congress-tax-change/> or the military-industrial complex.

Regardless, the case for cutting public jobs and restricting mail service in the middle of a pandemic-induced depression seems quite weak — so weak that its centrist proponents would rather deceive the public into believing there is no alternative than argue for their position forthrightly.

Subject: FW: [EXTERNAL] Re: Your Email to the PMG

CAUTION: This email originated from outside USPS. STOP and CONSIDER before responding, clicking on links, or opening attachments.

Thank you for the response to my email.

I did return to work on Saturday April 4, 2020. I was required to give a current Ca17 which I handed (b)(6) a “copy” of my last two CA17’s that morning prior to clocking in for work. The same copies I offered on Saturday March 28th 2020 and was denied to work, sent home, and clocked out without a 1260. I was clocked out after 30 minutes instead of the hour and thirty minutes I was there. This Mafia style management needs to stop. Still at that point I was not offered a job modification, but was allowed to work under the direction of (b)(6) and his determination of what these CA17’s would allow of me. I have yet to see any medical certifications from any member of management in (b)(6) (b)(6) . I reported to work on Monday April 6th, 2020 and again was allowed to work under the direction of Scott Keith with out any offer of a job modification. This day I did my assigned route with under time. I was then directed to go help a new cca that had never done the route he was on and had a vehicle breakdown for more than three and a half hours. I was directed at the same time to go help a full time regular carrier on their route once I completed the first task. In all on April 6th, 2020 I carried the equivalent of two full routes in a single day. I have once again injured myself on this day. I do have an appointment with my MD and orthopedic DR on Wednesday March 15th 2020. With this injury there is great discomfort, sharp shooting pain, numbness in my right hand, and the inability to sleep at night.

The amount of volume in the times that are expected of me are far and beyond any expectation from any other carrier in (b)(6) (injured or not). I am held to standards double than my coworkers, while my coworkers are not held to
any standards at all. This is retaliation, and the supervisors all know that I have three DOL/OWCP approved injuries. I’m constantly harassed about my times and performances.

On September, 2019 I directly reported an injury in text with a picture of the injury to station Manager who was closing the main office that night and directly order me to go assist yet another carrier after doing a piece of a route, my own route, and helping a separate carrier. It took thirty (30) days to get a CA1 for a dislocated index finger on my right hand. I myself after 24 hours put my finger back into the joint.

I can not stress my concerns enough stated in my email to the postmaster general. Everything that employees are told to report I have reported and nothing is being done other than I’m being called a disgruntled employee. I have proof, time and time again of harassment, retaliation, and discrimination. I am in fear of my safety when I’m at work. I’m in fear of my own health when I’m at work.

Retaliation and harassment has become so prevalent that I am in fear of bodily harm including death under the management of, and his Hitler style of management have made it clear that they will NOT stop at nothing “anything” until I’m fired.

I’m in fear of my job as stated in my email to the PMG. I fear more retaliation and harassment from all levels of management in. Despite the 20 or so II interviews I have been given in the last year and a half there is absolutely no discipline in my file.

(b) demanding medical documentation is a violation of my right to privacy under the HIPAA act. I send my documentation to HRM if he needs information then HRM can let him know what restrictions I should have. This entire time under management has lost and misplaced my medic documentation. My medical documentation has been seen on supervisor desk, on the floor, on other carriers’ ledge, thrown into drawers and discussed with other employees.

If there is no resolution the next letter is going to my representative, senator, and the POTUS and will be copied to the PMG FOR FAILURE OF ACTION.

It is appalling and embarrassing to be treated in this manner in front of my colleagues. I have never been told to leave so many times by an employer. This action is disturbing in itself. I hope for prompt action as I have tried to escalate all these behaviors and actions just to be labeled a disgruntled employee. I want to get better and be able to do my job without retaliation and harassment from a Mafia style management likes to dictate.

The 2499 can be emailed to Dr. c/o Dr. for review before I agree and sign it. If there is a problem with my doctor reviewing the job modification please explain in email and copy Dr. in the email.

If you have further questions please feel free to contact me at anytime via email at

This is from DOL

Dear Post Master,

I have a solution for the lost of Revenue, many of the Package Couriers like Amazon, UPS, Etc. are using mailrooms as their drop off, instead of delivering to consumer’s door. Why not make them pay more for their Packages? Sometime the mailroom is so full of packages, you cannot get into your mailbox. I live in a High-rise Building, on the first floor, Amazon will leave my packages in the mailroom instead of delivering to my door. Maybe you can put a Directive out prohibiting these Couriers from using the mailrooms as their drop off. L.A., CA. have a lot of High-Rise Buildings and Apartments, we pay these Couriers to deliver our packages to our door!

The complaints to Amazon Etc. are ignored. Maybe you can stop this practice.

Sincerely

Subject: [EXTERNAL] Trump Stamp idea - to save the Postal Service

Dear PMG,

I love the USPS. It clear the President is determined to put you out of business or privatize you probably all because of some personal problem he has with Amazon and Jeff Bezos. My long shot idea is for USPS to unveil either a Trump Postage stamp or a MAGA stamp or both. Better yet, he keeps calling for higher prices so charge $1.00 or $1.10 for it, but it still is only worth one first class stamp. Announce it now but schedule it to come out in 2021 so as to buy time. Trump’s ego is so huge he very well may want to ensure the Postal Service endures long enough to see this come to fruition. It’s a crazy idea, but he’s a crazy person so it just might work.

I hope you will consider this idea and thank you for all you are doing for to save the Postal Service.

Thanks,

Joe
Thank you.

Begin forwarded message:

recently filed a complaint about this with the USPS, and got NO RESPONSE, NOTHING, NO CALL, NO NOTHING, except a survey was emailed to me asking if I was satisfied with how my complaint was handled. I'll try ONE MORE TIME, before I go to higher authorities.

I recently leased an apartment at (b)(6)_____________________________________, Texas (b)(6)
The USPS has cluster boxes for residents to RECEIVE mail only, but NO BOX FOR OUTGOING LETTERS. Outgoing letters need to be dropped off at apartment leasing office during their normal office hours to be handed off to mailman, or I have to drive to the P.O. to mail a letter.
The large boxes to receive packages are OUT OF SERVICE. Packages are handed over to leasing office personnel and leasing personnel will disburse packages to residents. This is an unsecure area. ..people walking in and out off the street, maintenance people walking in and out ..seems like a very questionable arrangement and out of the ordinary arrangement.

Recently the leasing office shut down because of Coronavirus . ..not receiving anything except rent money, no packages, no outgoing mail.

I was to receive a package of needed essentials from family last Friday. Package was returned to P.O., "attempted to deliver but did not have access to drop off location". My address and apt. number was on the package and nothing blocking path to my apartment, just ask Amazon, UPS, or FedEx . . .they can find me. I'm (b) years old. I don't need to be chasing my mail all over exposing myself to this virus.

In other communities that I've lived in with cluster boxes, if large pkg. boxes were out of service, postal employees delivered packages to each individual address . . .NO, NOT DELIVERED TO BUILDERS SALES OFFICE OR HOA OFFICE. And there was a slotted box for outgoing letters so that people could mail their letters at anytime and not have to wait until sales office opened, or have to drive to P.O.

WHY IS THIS PLACE DIFFERENT??????

White House rejects bailout for U.S. Postal Service battered by coronavirus The pandemic has pushed USPS to the brink, but Trump and Mnuchin shot down emergency aid By Jacob Bogage<https://www.washingtonpost.com/people/jacob-bogage/>
April 11, 2020 at 11:41 a.m. EDT

Through rain, sleet, hail, and even a pandemic, mail carriers serve every address in the United States, but the coronavirus<https://www.washingtonpost.com/health/2020/02/28/what-you-need-know-about-coronavirus/?tid=lk_inline_manual_2&itid=lk_inline_manual_2> crisis is shaking the foundation of the U.S. Postal Service in new and dire ways.

The Postal Service’s decades-long financial troubles have worsened dramatically as the volume of the kind of mail that pays the agency’s bills — first-class and marketing mail — withers during the pandemic. The USPS needs an infusion of money, and President Trump has blocked potential emergency funding for the agency that employs around 600,000 workers, repeating instead the false claim that higher rates for Internet shipping companies Amazon, FedEx and UPS would right the service’s budget.
Trump threatened to veto the $2.2 trillion Coronavirus Aid, Relief, and Economic Security, or Cares, Act if the legislation contained any money directed to bail out the postal agency, according to a senior Trump Administration official and congressional official.

“We told them very clearly that the president was not going to sign the bill if [money for the Postal Service] was in it,” the Trump Administration official said. “I don’t know if we used the v-bomb, but the president was not going to sign it, and we told them that.”

Instead, Sens. Gary Peters (D-Mich.) and Ron Johnson (R-Wis.) added a last minute $10 billion Treasury Department loan to the Cares Act to keep the agency on firmer ground through the spring of 2020, according to a Democratic committee aide.

Lawmakers originally agreed to a $13 billion direct grant the Postal Service would not have to repay. That effort was blocked by Treasury Secretary Steven Mnuchin who warned such a move could blow up the relief bill. A committee aide said Mnuchin told lawmakers during negotiations: “You can have a loan or you can have nothing at all.”

Only the $10 billion loan to the Postal Service made it into law, over Mnuchin’s objections.

Without the loan, which awaits approval by the Treasury Department, USPS would be “financially illiquid” by Sept. 30, according to estimates provided to lawmakers. Advocates for the Postal Service worry the agency is in a vulnerable position. As its main funding source dwindles, the Postal Service could be seen as ripe for a makeover; conservatives have long talked about privatizing the mail delivery in the United States.

The Postal Service projects it will lose $2 billion each month through the coronavirus recession while postal workers maintain the nationwide service of delivering essential mail and parcels, such as prescriptions, food and household necessities.

That work often comes at great personal risk. Nearly 500 postal workers have tested positive for the coronavirus and 462 others are presumptive positives, USPS leaders told lawmakers. Nineteen have died; more than 6,000 are in self-quarantine because of exposure.

While the Trump Administration and Mnuchin pushed through private-sector bailouts in the Cares Act — $350 billion to the Small Business Administration loan program, $29 billion to passenger airlines and air cargo carriers, and economic incentives for the construction, energy and life sciences industries, among others — Mnuchin has signaled any postal relief funds in a “Phase IV” stimulus package under negotiation would amount to a poison pill.

Postmaster General Megan Brennan asked lawmakers Thursday for another $50 billion — $25 billion to offset lost revenue from declining mail volume due to the coronavirus and $25 billion for “modernization” — plus another $25 billion Treasury loan and a mechanism to pay down $14 billion in existing public debt.

House Democrats, led by Virginia Rep. Gerald E. Connolly, cautioned that without the funding, the Postal Service may not make it past September without missing payrolls or service interruptions. Senate Republicans insist the $10 billion loan from the Cares Act provided sufficient short-term liquidity, the staffer said, and the Senate would not vote to extend more money to an agency unlikely to make good on its borrowing.

“I’m so frustrated at how difficult it has been for a long time to galvanize attention and action around an essential service,” Connolly said in a phone interview. “And maybe the pandemic forces us all to refocus on this service and how essential it is and how we need to fix it while we can before it gets into critical condition.”

Trump has long been antagonistic of the post office, calling it once in a tweet Amazon’s “delivery boy<https://twitter.com/realdonaldtrump/status/981168344924536832?lang=en>.” The Postal Service often serves as a
vendor for Amazon, UPS, FedEx and other shipping companies, delivering the “last mile” service to often rural and remote areas. It is a crucial service for the Postal Service, for which package delivery is a growing part of its business.

Much of Trump’s invective on the Postal Service is aimed at Amazon’s founder and chief executive Jeff Bezos, who owns The Washington Post. Trump has advocated for increasing the prices on Amazon deliveries, against the recommendation of shipping experts and the agency’s own Board of Governors, a majority of whom Trump appointed.

“They should raise, they have to raise the prices to these companies that walk in and drop thousands of packages on the floor of the post office and say, ‘Deliver it,’” Trump said at a news conference Wednesday. “And they make money, but the post office gets killed. Okay? So they ought to do that, and we are looking into it, and we’ve been pushing them now for over a year.”

Raising rates too much would lead private-sector competitors to develop their own cheaper methods to deliver packages, said Lori Rectanus, director of physical infrastructure at the Government Accountability Office. Even if a rate increase generates revenue, that money would be marginal to the total U.S. Postal Service debt, almost all of which comes from a congressional requirement to prepay pension and retiree health care costs for all employees, even those who haven’t yet retired.

Under normal market conditions, the Postal Service nearly breaks even, save for the pension account debt, despite cratering volume on deliveries in recent years. In 2010, USPS delivered 77.6 billion items of first-class mail. In 2019, it delivered only 54.9 billion first-class items. The service handled 3.1 billion packages in 2010 and 6.2 billion in 2019, although processing packages doesn’t earn the agency as much revenue as first-class mail delivery.

The coronavirus has completely upended consumer behavior and the quantity of items in the mail. Volume in the first week of March declined 30 percent, postal agency officials told lawmakers. At the end of June, the agency projects volume to be down 50 percent, and it could lose $23 billion over the next 18 months.

“We are at a critical juncture in the life of the Postal Service,” Brennan, the postmaster general, said in a statement. “At a time when America needs the Postal Service more than ever, the reason we are so needed is having a devastating effect on our business.”

The Postal Service has faced financial troubles for more than a decade, as digital communication morphed and took off, giving lawmakers many opportunities to debate its future. The Postal Service is so foundational to the country it’s enumerated in the Constitution.

The agency’s troubles have renewed conservative conversations about structural changes that would force the Postal Service to act more like a corporation, with steps such as eliminating the prepaid pension requirement and easing its universal service obligation to deliver to every address in the United States, including ones so remote.

“If we’re concerned about the Postal Service and its workers,” said Romina Boccia, an economist at the right-leaning Heritage Foundation, “the best thing we can do is to free up the Postal Service to operate like a business so they can try to get back into the black.”
Chairman Duncan,

As information, I was notified Friday that Senators (b)(5) (b)(5) (b)(5) I will keep you informed of what we learn.

Thank you.

Megan
We have a call with Chairman Johnson Tuesday.

Thanks,

- Megan

Subject: [EXTERNAL] USPS- Face masks

Dear Mrs. Brennan,

Hope you and your family are well and staying safe at this time.

My name is (b)(6), and I’m reaching out to you, due to current situation with COVID-19, and wanted to see if you would be interested in face masks for all USPS employees.

My brother and I know the biggest retail owner in US, and right now due to COVID-19 situation, our friend moved all his production to sewing face masks. These face masks are made from cotton/polyester fabric and are intended for general population (please keep in mind these are not medical masks).

Our friend’s company does a weekly production of 100 million masks (human-touch-free production), and they sell a lot.

His clients, to name a few, that purchased his product in millions are: Amazon, CVS, Target, Walmart, Costco, Dollar Tree, Smart &Final, Starbucks, Chipotle, Dallas Cowboys….

If you think that this maybe something that is of an interest to you and your company, I would appreciate if you could reach out to me or my brother; or if you can please direct us to people you think will be interested in. For your convenience I will attach all product details.

Be well and stay safe!

Best regards,

(b)(6)

Subject: [EXTERNAL] Congratulations & Suggestion

Dear Ms. Brennan,

My name is (b)(6) and first of all, I would like to say congratulations on your retirement, whenever that may be.

I do have to say, that working as a Postal Mail Carrier was hectic and lovely at the same time. It was a love\hate relationship.

I worked for the Post Office as a City Carrier Assist from September, 2017 - October, 2019 (2 years, 1 month). I left for another job because the prospect to become a Career Carrier didn’t look like it was going to happen any time soon. As it turned out, I was offered Career Carrier approximately a month after I resigned from the Post Office.

I would love to go back and work as a Carrier at the U.S. Post Office, but because I had already resigned, I cannot return as a Career Carrier and I could not be reinstated with my seniority. I do not want to start over at the bottom of the seniority list.

This is my suggestion: Create a position that, for people like me, would give the branch that I worked at or any branch the flexibility to bring me back as an fill in. With all that is going on now, the virus, prime time beginning, I could go in in extreme circumstances and carry a route. I have the experience and a great record for the 2 years I worked at the Post Office. Or have me come in and deliver Amazon every Sunday. I would be considered a real part timer And I would really enjoy it.

I hope that you consider this suggestion.

Thank you for your attention in this matter, (b)(6)

Sent from my iPad
Good afternoon Governors,

As information, Joe and Tom and several members of their teams (b) (5)

We will be prepared to discuss the situation further (b) (5)

Thank you.

Megan
Thank you.

Presented by America's Health Insurance Plans: A play-by-play preview of the day's congressional news

Apr 10, 2020 View in browser<http://go.politicoemail.com/?qs=da2b481a279307e5dd3121de5d71de5f1cf365285dc052fcd41d5e56aad4b372b1f7f0ff014618efcb529685127a9e7e>

By Melanie Zanona

Presented by America's Health Insurance Plans

with an assist from Heather Caygle and Kyle Cheney

SENATE STALEMATE -- Congress is at an impasse over small business aid. As expected, Senate Democrats blocked an effort by Majority Leader Mitch McConnell to fast-track a vote on legislation providing an extra $250 billion for a small business loans program, which was created by the last economic rescue package and is already on track to run out of money. Democrats are also pushing to include emergency funding for hospitals, states and local governments, but Republicans want to focus on the pots of money that are more immediately in danger of drying up.

So, now what? The Senate has adjourned and won't be back until Monday. But during a Senate GOP conference call yesterday with Vice President Mike Pence, McConnell signaled that he hasn't ruled out cutting a deal with Democrats, report Burgess and Heather. But if an agreement can't be reached over the weekend, McConnell may bring up the bill
again on Monday and once again dare Democrats to vote against it. All the latest:
https://politi.co/2UVn0Us<http://go.politicoemail.com/?qs=da2b481a279307e51c2e0479ac79c37b8709ad34c65802151

A message from America's Health Insurance Plans:

No one should hesitate to get tested or treated for COVID-19 because of concerns about costs. Health insurance providers have proactively eliminated patient cost sharing for COVID-19 testing and treatment - no copay, no coinsurance required. Click here for a one-pager<http://go.politicoemail.com/?qs=9824d31c5eda42053dfc7b1102c26e0b0838e64cf789de912dc1a6d4c79ff7dcde9
12cf676fed49253cb70ed1db3917f> to learn how we're protecting Americans.

AND ACROSS THE CAPITOL ... Speaker Nancy Pelosi said there will not be any fireworks when the House convenes for a pro forma session today, telling Heather and Bres in a half hour interview last night that the negotiations on an interim relief package are essentially on hold over the holiday weekend. The speaker also gave her clearest indication yet that it's unlikely the House returns around April 20 as congressional leaders were initially hoping. "I would never venture a guess. I certainly don't think we should do it sooner than we should," Pelosi said. "This has taken an acceleration from when we started this...Little did we know then that at this point, we'd be further confined."

Pelosi also warned against President Donald Trump rushing to open the country too soon against the advice of health experts. Earlier Thursday, Trump had said he hoped to reopen the country "very, very, very, very soon." Pelosi's response: "I would hope that the scientific community would weigh in and say, 'You can't do this, it is only going to make matters worse if you go out too soon.'" The story:
https://politi.co/2VhK7rn<http://go.politicoemail.com/?qs=da2b481a279307e5603bb57ef859bd7a468308c4c7fd9394a
62ef61e3fc6e1300ae9b22374ff00b55475986dc328192>.

Other highlights from the interview:

-- Pelosi doesn't have time to watch Trump's daily coronavirus briefings: "I just don't have time for that, I am a busy person. I have a day job, and it's not to watch the president contradict himself on TV."
The speaker isn't ruling out coronavirus being the dominating issue at the ballot box in November: "That is the big question of everything. ... This may have an impact in terms of eclipsing any messaging... [but] we will be having an agenda as we go forward that opens up opportunities for people."

She hasn't spoken to Joe Biden yet since Sen. Bernie Sanders suspended his campaign. But that didn't stop her from gushing about the former vice president: "I think he's fabulous. He's a person of great values, great patriotism ... I think he'll be a great nominee, and an even greater president of the United States."

YOU'VE GOT MAIL -- House Minority Leader Kevin McCarthy (R-Calif.) called it "disgusting" that Democrats are trying to expand mail-in voting in the next coronavirus relief bill, dismissing the idea as unnecessary. With coronavirus cases soaring, the issue has become a new political flashpoint — particularly after the electoral mess in Wisconsin this week. "That's disgusting to me," McCarthy told reporters during a press call Thursday. "Stop worrying about politics. Worry about what's in front of us. And that's the health of the nation ... and our economy."

The fierce pushback from McCarthy comes on the heels of Trump urging Republicans to "fight very hard when it comes to statewide mail-in voting." Trump — who has suggested the practice could undermine GOP political prospects — has also claimed that vote-by-mail is "corrupt." Yet there is no evidence to suggest that voter fraud exists on a wide scale anywhere in the election system.

And Democrats argue that mail-in voting is a public health issue: The virus could spread even further if elections are carried out as usual this fall. "We want to remove all obstacles to participation," Pelosi told reporters on her own call later Thursday. "No surprise that [McCarthy] might dismiss opening doors of participation as something that is a plus, especially in a time of pandemic." The story from your Huddle host: https://politico.co/2VnFZ9w<http://go.politicoemail.com/?qs=da2b481a279307e52752a5221c7826f9fdde1a88ba45e8ccc44c74dd26101bab5b3066c4bea3df0305a2fa1b4f1bab6>.

SPEAKING OF MAIL ... Postmaster General Megan Brennan and other Postal Service officials are asking Congress for $75 billion more in aid to prevent a collapse of the massive mail-carrier bureaucracy by the fall. Brennan briefed members of the House Oversight Committee on Thursday, indicating that the postal service is on track to run out of cash before the fiscal year expires on Sept. 30, fueled in part by a $13 billion loss in revenue attributed to coronavirus. That's despite a $10 billion borrowing boost provided in the recently passed $2 trillion coronavirus relief bill.
Now, the Postal Service Board of governors is asking Congress for a $25 billion emergency appropriation, a $25 billion fund for postal service infrastructure modernization projects and an additional $25 billion in borrowing power from the Treasury. The Postal Service has been beset by financial woes for years, but it’s also an enormous employer, with 650,000 workers spread across 31,600 retail locations. Democrats have also worried that the demise of the Postal Service would jeopardize urgent prescription deliveries for millions of Americans.

HAPPY GOOD FRIDAY! Welcome to Huddle, the play-by-play guide to all things Capitol Hill, on this April 10, where your host can't wait to add AOC's appearance on "RuPaul's Drag Race" to tonight's Friday quarantine line-up. Preview pics here.<https://go.politicoemail.com/?qs=da2b481a279307e593b7a7baf05b6c85d3ba4cb1d53d9c68f77a0feed5c978a2e6842b2f5730b8dabdfd8a833d9065e6>

THURSDAY'S MOST CLICKED: Burgess and Heather's report<https://go.politicoemail.com/?qs=da2b481a279307e56139b5faba47ef58f71e6ac68621821a749095a7408610d148723419950685ddbe2a93d27036f92f> on the small business aid showdown was the big winner.

TALK OF THE TOWN -- Trump might be bragging about the ratings of his coronavirus press briefings — but some Republicans don't share his enthusiasm. More from the NYT: "Mr. Trump 'sometimes drowns out his own message,' said Senator Lindsey Graham of South Carolina, who has become one of the president's informal counselors and told him 'a once-a-week show' could be more effective. Representative Susan Brooks of Indiana said 'they're going on too long.' Senator Shelley Moore Capito of West Virginia said the briefings were 'going off the rails a little bit' and suggested that he should 'let the health professionals guide where we're going to go.'

"In interviews, Republican lawmakers, administration officials and members of his re-election campaign said they wanted Mr. Trump to limit his error-filled appearances at the West Wing briefings and move more aggressively to prepare for the looming recession. Some even suggested he summon a broader range of the country's leaders, including former Presidents George W. Bush and Barack Obama, in an all-hands-on-deck moment to respond to the national emergency." The story from Jonathan Martin and Maggie Haberman: https://nyti.ms/2UWiViQ

No one should go hungry during this pandemic. Together, we can make sure no one has to. Please support the Capital Area Food Bank's COVID-19 response today.<http://go.politicoemail.com/?qs=da2b481a279307e5f563f9b2f8c51228714aa128a963d697ac559c108826ff558469ec9b6f6ed793e2186e2e9bf3158a>

WHO'S IN CHARGE -- Republicans are sharpening their criticism of the World Health Organization. Marianne with the latest: "Sen. Todd Young is calling on World Health Organization Director General Dr. Tedros Adhanom Ghebreyesus to appear before a Senate Foreign Relations subcommittee to answer questions about the organization's handling of the coronavirus pandemic. The WHO in recent days has faced heated criticism from Senate Republicans and President Donald Trump, who argue the organization did not do enough to scrutinize China's response to the outbreak.

"In his letter to Tedros, Young criticized the WHO for praising China's initial response to the coronavirus and for relying on data from the Chinese government. ... Young called on Tedros to appear before the Senate Foreign Relations' Subcommittee on Multilateral Institutions for a hearing on how U.S. federal dollars may go to the WHO in the future. Young, in the interview, said he was optimistic Tedros would appear before the committee given that the United States is the organization's largest contributor country." More: https://politi.co/2Vwc3YT<http://go.politicoemail.com/?qs=da2b481a279307e5479ecde199af983b9d0ff58a784d4cbe446160f7d344081611860cc373215299af5e4449063dd>.

IS THERE A DOCTOR IN THE HOUSE? -- Health care workers who are running for Congress are having to balance campaigning with also being on the frontline lines of fighting coronavirus. Roll Call explains: "Both [Christine Mann and Cameron Webb] are also Democrats running for Congress, and they are among the handful of candidates in both parties who are campaigning while working on the front lines of a pandemic.

"Balancing a full-time job with a campaign is a difficult task even in normal times. And these candidates' day jobs are becoming more complicated and potentially more dangerous. But they say the current crisis has only strengthened their resolve to run for office, and it proves why health care professionals are needed in Congress. 'My message has always been: Put a doctor in the House,' Mann said." The dispatch from Bridget Bowman and Stephanie Akin: https://bit.ly/2VfuUjjv<http://go.politicoemail.com/?qs=da2b481a279307e59efb9cf1c3c5cd47c1ce626cdc5f248dc974a3cceba1d6c5959d6390eb13e2fed23082c9581f5c28>.

GET WELL SOON -- Another member of Congress has tested positive for coronavirus. The Tallahassee Democrat with the story: "Florida Congressman Neal Dunn, R-Panama City, has tested positive for the coronavirus, his office announced Thursday. The 67-year old Dunn has represented all or parts of 19 counties, including Northeast Tallahassee, since 2016.

"Reached at his home in Panama City, Dunn said he was tested for exposure purposes and was resting. 'Congress is conducting business by phone and computer. I call it Death-by-Conference-Call,' said Dunn. Dunn went to the hospital Monday night when he began to feel ill but was not admitted. His test for COVID-19 came back positive Thursday. He had quarantined himself while awaiting the results and intends to remain home for at least another two weeks." More from James Call: https://bit.ly/2xIl6j5<http://go.politicoemail.com/?qs=da2b481a279307e51d08a51d2cd7709d9f5a5d3755178342a0b04ab3e2e05bbe9d5f2dee9ff8410fc8a5086be351de05>.

STANDING BY SENATOR LOEFFLER -- The Senate GOP's campaign arm is sticking up for Sen. Kelly Loeffler, who is facing a political firestorm for stock trades during the pandemic. Marianne with more: "Sen. Todd Young, chairman of the
National Republican Senatorial Committee, on Thursday reiterated his confidence in Kelly Loeffler’s election bid, amid controversy over the Georgia Republican’s stock trades. ‘Kelly Loeffler is a strong conservative voice for the people of Georgia,’ Young (R-Ind.) said in an interview. ‘She’s effectively representing them and she will continue to be an effective United States senator for the people of Georgia after November.’

"Loeffler has come under fire over stock trades she made during the early days of the coronavirus outbreak, specifically that she traded millions in stocks after a classified Senate briefing on coronavirus. While Loeffler has defended her actions and said the trades were done by third-party advisers, she announced Wednesday in a Wall Street Journal op-ed that she would liquidate all of her individual stock holdings. Loeffler emphasized she made the move not because of any wrongdoing but to quiet any distractions." The latest: https://politi.co/2JQNUqi

A message from America's Health Insurance Plans:

From expanding public health capacity, to ensuring access to testing, to taking action to mitigate the economic and societal impact, we know these are serious and significant times. Coronavirus Is Threatening One of Government’s Most Ubiquitous Services: The Mail.

The Postal Service needs billions to continue funding its operations and make other payments, the agency told lawmakers.

By Nicholas Fandos and Jim Tankersley
April 9, 2020, 2:16 p.m. ET

WASHINGTON - The coronavirus pandemic is ravaging the United States Postal Service, with mail volume down by nearly a third already compared to same time last year and dropping quickly, as businesses drastically cut back on solicitations, advertisements and all kinds of letters that make up the bulk of mail service's bottom line.

The falloff comes even as package delivery has surged - but not by nearly enough to offset the losses from mail volume.

The result, the Postal Service told Congress on Thursday, is a multibillion-dollar financial shortfall that could cause one of the government's oldest and most reliable entities to run out of cash by the end of September and throw regular delivery into doubt at a time when Americans may still be trapped at home.

Megan J. Brennan, the postmaster general, told lawmakers on the House Oversight and Reform Committee on Thursday that the agency believed it would need $25 billion in federal grants to cover lost revenue from the pandemic, plus an additional $25 billion to update aging infrastructure. Another $14 billion is needed to pay off long-term debt related to the Postal Service's retirement benefits program along with $25 billion in unrestricted borrowing authority to weather the rapidly unfolding crisis, she said, according to officials familiar with the information she shared privately, who described it on condition of anonymity.

Even with an increase in online shopping and package delivery to Americans cooped up at home, the agency could see a 50-percent reduction in total mail volume by the end of June, compared to the same period last year, Ms. Brennan told the lawmakers. Postal officials fear a sizable portion of that lost mail may never return.

In total, the Postal Service anticipates losing $13 billion in revenue this fiscal year because of the pandemic and another $54 billion in losses over 10 years.

"They are chilling numbers," said Representative Gerald E. Connolly, Democrat of Virginia, who leads the House subcommittee responsible for the Postal Service. "The reaction of a lot of my colleagues - their jaws were dropping. It is one thing to say the Postal Service is suffering. It is another to hear these specifics."

As Congress spends trillions of dollars to try to save private businesses with loans and grants, the Postal Service has emerged as an unusual sticking point, bogged down by a long-running debate over its future. The agency does not normally use taxpayer money, but has struggled in recent years under mounting debt.

House Democrats are ready to give the Postal Service most of what it is asking for. But President Trump has so far rejected direct relief, repeatedly saying the Postal Service could solve its own woes simply by raising prices on packages delivered for big online retailers like Amazon.

Steven Mnuchin, the Treasury secretary, squashed a bipartisan attempt to send the agency emergency funds last month, insisting instead that his department be given new authority to lend up to $10 billion to the Postal Service on terms it helps set, other officials familiar with the negotiations said.

Ms. Brennan told lawmakers on Thursday that the agency was already in talks with the Treasury about the potential loan, but its revenue predictions suggest that money would not be enough if the crisis continues.

For now, the mail service, which operates under government-mandated service requirements, has continued uninterrupted. Even as scores of its more than 600,000 person work force have fallen ill and some have died, mail sorters and carriers have continued to walk their routes in every corner of the country, in many cases the only
physical lifeline Americans now have to the outside world. They deliver medicines, election ballots, coronavirus test kits and packages ordered online.

But the administration's position has fanned fears among some lawmakers, postal union representatives and others who rely on the service that Trump administration officials are willing to let the postal network essentially go bankrupt to force its leaders to accept an overhaul to the postal business model that many conservatives have long sought - one that could limit delivery service and aid commercial competitors like FedEx and UPS.

In a statement to The New York Times, Ms. Brennan said the Postal Service was "at a critical juncture," quickly losing revenue because demand for its most profitable postal products was "plummeting as a result of the pandemic."

"At a time when America needs the Postal Service more than ever, the reason we are so needed is having a devastating effect on our business," she said. "The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover."

She called on Congress to "shore up the finances of the Postal Service, and enable us to continue to fulfill our indispensable role during the pandemic, and to play an effective role in the nation's economic recovery."

Negotiators on Capitol Hill had reached a tentative deal last month to provide the Postal Service around $13 billion dollars in direct relief as part of the $2 trillion CARES Act. The figure would have been far below a proposal by House Democrats, but it had the buy-in of a key Republican negotiator: Senator Ron Johnson of Wisconsin, the chairman of the Senate Homeland Security and Governmental Affairs Committee, according to the officials familiar with the talks, where were not authorized to publicly discuss them.

But Mr. Mnuchin said the administration would not have it. The Treasury secretary told lawmakers that a direct infusion of cash was a non-starter, and advocated instead for creating the $10 billion in new lending authority. Department officials did not respond to a request to comment Thursday on postal issues.

Mr. Connolly said Thursday that he would recommend House leadership promptly back the new, higher figures presented by the Postal Service.

"We weren't shooting for the moon. We weren't solving all the problems. We were just trying to get them through," Mr. Connolly said. "The question is, will the Republicans join us?"

Some Republican lawmakers remain open to direct cash payments, as well, under certain circumstances. Historically, the Postal Service has counted on strong support from Republicans representing rural districts, where their service is a lifeline to homes and small businesses. But it is unclear if they would allocate the funds without imposing reform requirements on the agency or if they are willing to overpower Mr. Mnuchin and the White House.

An independent executive agency, the Postal Service has not taken federal funding in decades, running instead off revenue raised from stamps and other postal products. But since the 2008 financial crisis, it has struggled to stay in the black, weighed down largely by a congressional mandate to pre-fund its retirement benefits programs.

The agency has stopped making those payments in recent years, running up billions of dollars in debt, while its mail delivery business has otherwise remained profitable. Lawmakers in both parties have proposed overhauls to the service along the way, but none have stuck.

The postal unions and Democrats fear that the Trump administration is now trying to take advantage of the coronavirus crisis to push through a long-sought overhaul<https://www.nytimes.com/2018/12/04/us/politics/trump-amazon-post-office.html> of the Postal Service that would benefit private package carriers and eliminate certain costly rural delivery routes.

Mr. Trump has frequently criticized the service for not charging higher prices to deliver packages for large online retailers like Amazon - a company he has sometimes singled out<https://www.nytimes.com/2018/04/12/us/politics/trump-postal-service-amazon.html?action=click&module=RelatedCoverage&pgtype=Article&region=Footer> in his Twitter tirades on postal issues. Aides have said the president's criticisms often followed critical stories about his administration published by the Washington Post, which is owned by Amazon founder Jeff Bezos.

He repeated the criticism this week, as he appeared to reject calls for a cash bailout. Asked about Mr. Connolly's proposal, he said the congressman should focus instead on raising package delivery prices.

"Tell your Democrat friend that he ought to focus on that, because if he focused on that, he could truly save the Post Office," the president said.

Mr. Trump ordered a review of the Postal Service and its pricing policies in 2018. His administration published the review<https://home.treasury.gov/system/files/136/USPS_A_Sustainable_Path_Foward_report_12-04-2018.pdf> in December of that year. Its recommendations included steps that could reduce the frequency of mail delivery and
increases in the prices of sending some packages. Online retailers criticized the recommendations, which they said could particularly hurt rural customers.
The report did not spur any action in Congress last year. But a longtime congressional advocate of changes to the service, Mark Meadows of North Carolina, recently took over as Mr. Trump's chief of staff. Critics of the report fear the White House could be trying to use the pandemic as another opening.
"At the end of the day, they have an agenda," said Mark Dimondstein, the president of the American Postal Workers Union, which represents 200,000 postal workers. "Raise prices, reduce worker benefits, and reduce services, make it appear more profitable and set it up for sale."
"The Covid crisis should not be used to achieve political aims," he added.
A lobbying group on postal issues that includes Amazon and other online retailers, the Package Coalition, raised concerns this week that the strings Treasury officials might attach to postal loans could raise prices during a pandemic that has made Americans more dependent on package delivery.
"The Treasury has the Postal Service over a $10-billion barrel, and the Postal Service is on the brink of bankruptcy," said the coalition's chairman, the former Army secretary John M. McHugh. "What do you do? We're worried they'll accept the terms."
Thanks,

Megan

Subject: Fwd: [EXTERNAL] Rufusal to Deliver - Gladwin, MI

Postmaster General Brennan,

I am writing you today to express my concerns with the rural delivery system utilized by the United States Postal Service. This concern is especially acute during this national emergency commonly known as Covid-19.

During this national emergency my wife and daughter took refuge at our summer home in Gladwin, Michigan which is serviced by the Michigan post office. I decided to stay home in suburban Detroit to look after my son who is a firefighter serving on the front line. Michigan is currently under stay-at-home order issued by the Governor which requires all but essential workers to shelter-in-place. To that end my family and I are doing our part. My wife and daughter are hunkered-down and son and I are sheltering-in-place, MI. We are doing what’s required to keep everyone safe. As ordered by the Governor we only leave for the essentials that we need (food) and those trips are made sparingly and efficiently. It is incumbent upon all of us to do what we can to “flatten the curve”.

Last week, I ordered some cleaning supplies for my wife through Amazon and had it delivered to our lake house at Gladwin, MI. Amazon reported that order as “not deliverable.” I contacted the Post Office and was told that since this address does not receive first class mail this package could not be delivered. It was further explained that this is done that way because that is how rural carriers are paid. I was offered the option of pick-up the package at the post office.

How ridiculous is that? A package mailed through our national postal system cannot be delivered since this address did not receive a first class letter first? Many people in Michigan are staying secluded at their summer homes to avoid as much social contact as possible. They are doing the responsible thing, the America thing and yet the postal service is not there to support this effort. Many people don’t commonly receive mail at their summer addresses. They receive their mail at their primary address back in the city, but that luxury is not available to them today as they shelter-in-place. These packages now carry essentials and sometimes life sustaining essentials, yet we are going to enforce some sort of expense saving measure that the Postal Service sues to improve their bottom line.
While I was offered the option to pick-up the package at the post office doing so is a violation of an Executive Order, a criminal offense. When I explained to the Post Master that my wife and daughter would be observing the law she indicated that the post office was packed with people picking-up packages. How can the Post Office let this happen? Barber shops are closed, restaurants are limited to single person pick-up with appropriate social distancing, grocery stores have special hours to protect our seniors yet the post office is packed because they won’t deliver packages.

I find the position of the Postal Service appalling if not disgusting. You have created an expense saving rule that doesn’t belong in a national crisis. Some people desperately need these deliveries. Some packages contain medicine or other lifesaving devises. The people that need these items likely have compromised immune systems, yet they are forced into a dangerous situation visiting the post office to get what they need. This needs to stop immediately and deliveries of all mail items must be made by the Postal Service without prejudice.

I await your reply.

(b)(6)
Jakki,

Thanks,

Megan

And in other news...

Amazon to Suspend Delivery Service That Competes With UPS, FedEx E-commerce giant to halt third-party deliveries to focus on handling the surge in its own customers' orders

By Paul Ziobro
Updated April 7, 2020 6:43 pm ET

Amazon told shippers the service, known as Amazon Shipping, will be paused starting in June. It was available in just a handful of U.S. cities.

Under the program, Amazon drivers would pick up packages from businesses and deliver them to consumers, rather than ship orders from Amazon warehouses.

"We understand this is a change to your business, and we did not take this decision lightly," Amazon said in a note to shippers reviewed by The Wall Street Journal. "We will work with you over the next several weeks so there is as little disruption to your business as possible."
Amazon is suspending the service because it needs its people and capacity to handle a surge in its own customers' orders, according to a person familiar with the matter. The company has said it wants to hire 100,000 warehouse workers and is focusing on shipping essential items during the coronavirus outbreak.

Amazon in the past had sought to woo shippers to the new service by offering simpler rates, including the elimination of many fees and surcharges that other carriers add on to pad their revenues. It tested the program in London and Los Angeles, but didn't make it widely available in the U.S.

Amazon remains a force in the shipping industry, with over 30,000 vehicles, 20,000 trailers and dozens of aircraft that move packages across the country. In addition to its own delivery drivers, Amazon also hands off a significant chunk of its home deliveries to UPS and the U.S. Postal Service.

Amazon last year ended a shipping contract with FedEx, which increasingly viewed the online merchant as a competitive threat because of its growing shipping prowess. FedEx and UPS have experienced a Christmas-like boom in home deliveries in recent weeks as people shop from home, while shipments have deteriorated to stores or businesses that have closed.

Meanwhile, the virus has upended the daily routine of delivering packages. Amazon, FedEx and UPS have each had to implement new safety measures and scramble to provide protective equipment as some workers test positive for the coronavirus.

A UPS spokesman declined to comment.

FedEx said its ground network is well prepared to manage the current surge in e-commerce. "We are continuing to work with our small business customers during this time to support their growth," a FedEx spokeswoman said.
Thank you.

Megan

I think it’s extremely sad that my parents who’ve utilized the SAME post office since I was a kid can’t have the decency during the corona virus pandemic to have items placed on hold. I utilized amazon to send packages which the sellers decided to us USPS to send items to who’ve informed me that putting in a PO Box doesn’t work. I have proof of these conversations which is why I gave a PHYSICAL street address. I sent my family necessary items like a thermometer, hand sanitizer, and alcohol due to lack of supplies and the Post office in south fallsburg manages to send it right back through MORE hands for potential exposure to just have it sent RIGHT back? How is this even human decency? I need YOU or someone you appoint who WILL take care of things to intervene and send these items BACK to the address i included if NEEDED to the PO BOX (b)(6) since that’s ALL that was needed. Which I’m sure is cheaper than having it all delivered to the street address. PLEASE have someone fix this. I am EXTREMELY upset about this situation and lack of empathy that Ezra Heller expressed as if not placing a PO Box was the reason it got returned when it simply could’ve been held so my parents can go pick them up. THIS IS something that can be done. i have not had an appropriate nor satisfactory resolution to this issue. I have more packages coming that seems to have an issue with being delivered and I don’t want to include third party agencies but will have no choice if I do not receive a response. I did not have anyone reach back out to me For this issue. i’m sure you are all backed up but I cannot get any help locally.

Pelosi eyes end of April to bring a fourth coronavirus relief bill to the floor

Speaker Nancy Pelosi (D-Calif.) said in a letter to fellow House lawmakers on Saturday that she wants to bring a second stimulus package to the floor by the end of this month to further relieve the American public during the coronavirus pandemic.

"It is my hope that we will craft this legislation and bring it to the floor later this month," Pelosi said in the letter, according to Bloomberg<https://www.bloomberg.com/news/articles/2020-04-05/speaker-pelosi-aims-to-bring-up-next-virus-stimulus-this-month>, adding that American communities "cannot afford to wait."

Pelosi added that the next stimulus package "must go further in assisting small businesses including farmers, extending and strengthening unemployment benefits and giving families additional direct payments."

The aggressive push from the California lawmaker comes as members of Congress disagree over the next steps to take regarding the economic fallout from the spread of the coronavirus.

Some House Republicans are particularly wary of a fourth coronavirus relief package.

On Friday, a group of GOP lawmakers — led by House Freedom Caucus Chairman Andy Biggs (R-Ariz.) — wrote President Trump <https://www.bloomberg.com/news/articles/2020-04-05/speaker-pelosi-aims-to-bring-up-next-virus-stimulus-this-month> a letter advising against rushing to sign a fourth stimulus bill into law.

"Most of the relief funding from Phase 2 and Phase 3 has not even been distributed yet. We advise caution in considering an additional round of spending outside of the regular process before we have seen the results of the previous three rounds of spending," the group wrote.

The group said the country’s debt stood at $23.6 trillion before the Coronavirus Aid, Relief and Economic Security (CARES) Act was passed and that the mammoth bill was going to add at least $2 trillion to that figure.

"Every dollar we add to the debt today makes it increasingly less likely that we will be able to provide even the basic services our citizens have come to expect in the decades to come,” the group added.

But Pelosi underscored in a statement released Friday that while the first CARES Act provided money to bolster small businesses, their employees and others who are unemployed, there was much more to be done to help the country.

"It is imperative that we go bigger and further assisting small business, to go longer in unemployment benefits and provide additional resources to process [unemployed insurance] claims and to give families additional direct payments,"

She added, "We must also provide the desperately needed resources for our hospitals, community health centers, health systems and health workers on the frontlines of this crisis. We cannot succeed in defeating this virus unless we more strongly support state and local governments with significantly more resources."

Senate Majority Leader Mitch McConnell<people/mitch-mcconnell> (R-Ky.) has said that there will be<https://thehill.com/homenews/senate/491089-mcconnell-says-there-will-be-a-fourth-coronavirus-bill> a fourth bill, this time with a more "targeted response" to "what we got wrong." The bill would also have a further focus on health care, according to an interview the senator did with The Associated Press<https://apnews.com/ade6f4a0853ceb4c3500a8238ad6cd7f>. However, the GOP leader indicated that he was not in any rush to pass the bill.

Pelosi has already scaled back<https://thehill.com/homenews/house/491014-pelosi-scales-back-coronavirus-infrastructure-proposal> her latest ambitions for a coronavirus infrastructure proposal, saying that things such as improvements to drinking water systems and expanded access to broadband may have to wait.

"The acceleration of the coronavirus demands that we double down on the downpayment we made in CARES by passing a CARES 2 package," she continued in the statement. "We must extend and expand this bipartisan legislation to meet the needs of the American people."

The Hill has reached out to Pelosi's office for comment.

Coronavirus payments: IRS to begin issuing checks April 9, but some Americans won’t receive payments until September - The Washington Post

All,

IRS to begin issuing $1,200 coronavirus payments April 9, but some Americans won’t receive checks until September, agency plan says Lisa Rein

[The Internal Revenue Service plans to start electronically sending some payments to Americans, but others will be mailed.] The Internal Revenue Service plans to start electronically sending some payments to Americans, but others will be mailed. (Bill O’Leary/The Washington Post)

The Internal Revenue Service plans to send electronic payments as soon as late next week to millions of Americans as part of the $2 trillion coronavirus law, a week sooner than expected, according to a plan circulated internally on Thursday.

However, $30 million in paper checks for millions of other Americans won’t start being sent out until April 24, as the government lacks their banking information. And some of those checks won’t reach people until September, the document shows, underscoring the reality that many Americans could have to wait five months to receive their checks.

The speed with which the money is disbursed will depend largely on people’s method of filing taxes. Electronic payments can be distributed quickly, whereas the IRS must print paper checks and mail them separately. About eight in 10 taxpayers have signed up for direct deposit payments for their past tax refunds, a number that has grown in recent years.

Calculate how much you’ll get from the $1,200 (or more) coronavirus checks.

Treasury Secretary Steven Mnuchin said on April 2 that Americans with direct deposit information on file should see covid-19 economic relief in two weeks. (The Washington Post)
At a White House press briefing Thursday, Treasury Secretary Steven Mnuchin said these eligible Americans will receive the money within two weeks.

“If we if have your [bank] information you’ll get it within two weeks,” Mnuchin said. “Social Security, you’ll get it very quickly after that. If we don’t have your information you’ll have a simple web portal, we’ll upload it. If we don’t have that, we’ll send you checks in the mail.”

He added that “In this environment, we don’t want to send checks and we want to put money directly into [taxpayers’] accounts.”

Sign up for our Coronavirus Updates newsletter to track the outbreak. All stories linked in the newsletter are free to access.<https://subscribe.washingtonpost.com/newsletters/#/bundle/health?method=SURL&location=ART_IS&tid=lk_interstitial_manual_10&itid=lkInterstitial_manual_10>

Patricia McLaughlin, a spokeswoman for the Treasury Department, the IRS’s parent agency, said in an email that “the overwhelming majority of eligible Americans” will receive stimulus payments within the next three weeks.

She said that Treasury expects 50 million to 70 million Americans to receive checks through direct deposit by April 15, offering a slightly different assessment than the IRS draft plan.

Taxpayers who haven’t provided direct deposit information on their 2018 or 2019 tax returns will be able to enter it in a portal the IRS is setting up to speed up receipt of their checks, McLaughlin said.

The IRS plan would distribute paper checks to the lowest-income Americans first, prioritizing payments for individual taxpayers with incomes of $10,000 or less on April 24.

Checks for earners of $20,000 or less would be in the mail May 1, followed by those with incomes of $30,000 on May 8, $40,000 on May 15, and continuing in income increments of $10,000 each week, according to the plan. The IRS plans to issue about 5 million checks each week.

Stimulus checks would be issued on Sept. 4 to joint taxpayers earning $198,000, the maximum allowed under the stimulus. All others would be sent on Sept. 11, in most cases because the IRS did not have prior tax information for them and they need to apply for the checks.

The tax agency is racing to set up payment systems as millions of Americans have been forced out of the labor force by the pandemic, with jobless claims soaring to a staggering 6.6 million.<https://www.washingtonpost.com/business/2020/04/02/jobless-march-coronavirus/?tid=lk_inlinemanual_21&itid=lk_inlinemanual_21> last week.

The plan is to generate electronic checks on April 9, according to the payment schedule reviewed by The Washington Post. Depending on how quickly banks process the payments, they would be deposited by April 14 at the latest.

“If we know where to put the money, we’re going to press the button and put it there next week,” said an IRS official who was not authorized to speak publicly.

American adults who earned less than $75,000 will receive a $1,200 payment, and an additional $500 per child. The payment will be phased out for Americans who receive more than that, and adults that earned more than $99,000 will not receive the benefit, under the law.

About 145 million Americans are eligible for stimulus checks, depending on their income. Mnuchin had said he expected most Americans to get their payments by April 17. The IRS still has not said publicly how long it would take the agency to issue paper checks, or how it plans to decide who should get them first.
Another 64 million Americans receiving Social Security and disability income will also receive checks, many of them electronically, after the Treasury Department announced Wednesday that they can get payments even if they typically do not file a tax return.

Most taxpayers will not have to file a separate claim with the IRS to receive their checks. The new law directs the Treasury to look at Americans’ 2019 or 2018 tax returns to determine if they are eligible for a payment.

The agency had strongly considered spacing payments out based on $25,000 income brackets but concluded in recent days that it needed to send the checks in smaller batches because its networks do not have the bandwidth to issue so many checks in one week, the IRS official said. A slower ramp seemed more manageable, the official said.

Thank you.

Megan
Well done Tom.

Thank you.

Megan

USPS mail carriers say the service isn't doing enough to protect them from the coronavirus and are mixing DIY sanitizer and buying gloves online to stay safe Business Insider spoke with two US Postal Service mail carriers this week who said their employer was doing too little to protect them during the coronavirus outbreak.

Ashley Collman April 3, 2020
Ashley Collman<https://www.businessinsider.com/author/ashley-collman>

4 hours ago

- They described unsanitary conditions in post offices and mail trucks and said they were not getting protective equipment like gloves and face masks.
- One resorted to making her own sanitizer at home from bleach, while the other has bought gloves and masks at inflated prices online.
- The USPS did not answer the workers' concerns directly but said in a statement that it was taking action to limit the risk of infection among its staff.

With many Americans under orders to stay at home, work has continued as usual for the United States Postal Service, deemed an "essential" business.

But mail carriers are concerned that their working conditions have made them sitting ducks during the coronavirus pandemic.
Business Insider spoke with two mail carriers this week who said social distancing was not being enforced in their workplace, heightening the risk of the infection spreading. They also said that post offices and trucks were not being kept clean and that they had not received protective gear like face masks or gloves. Both were spending their own money on makeshift protection that they argued should be provided universally by their employers.

USPS has said it's enforcing social distancing, enhancing its cleanliness, and giving workers protection — but the mail carriers we spoke with said they hadn't seen any evidence of this.

Both asked to remain anonymous, fearing the loss of their jobs if they spoke publicly.

No protective equipment and unsanitary conditions One mail carrier in the Suncoast region of Florida said the Postal Service hadn't been supplying masks or gloves, or even keeping hand sanitizer in the office and trucks. She said she was instead making a bleach solution at home to clean her truck.

"Given the fact that we see customers every single day, I just feel like they could do a better job in making sure we have safe, sanitized working conditions," she said.

"That's just not happening, largely in part due to a lack of availability" of protective products, she said.

Another mail carrier at a post office outside Stockton, California, said the only protection he was aware of was a big container of hand sanitizer his supervisor keeps on their desk.

A postal worker in California sent us this picture of his dirty mail-carrier van. The two workers we spoke with expressed concern about the hygiene in their workplace.

"They aren't taking this very seriously in my opinion at all," he said. "We don't have masks. There isn't social distancing." He added that in the back of the post office, "you're nearly shoulder to shoulder with everyone all the time."

His position at USPS requires him to fill in where he's needed, which means sharing trucks with other carriers, something he worries about.

Because he hasn't gotten masks or gloves from USPS, he's resorted to buying them on the internet at high prices — $60 for a pack of reusable masks off Etsy, and $50 for rubber gloves, he said.

The public don't take social distancing seriously The California carrier said the thing that worried him the most was how people kept flouting social-distancing measures to interact with him daily.

The Postal Service has discontinued the need for customer signatures and allowed workers to drop items off instead of passing them directly to a recipient. But that doesn't matter if people aren't keeping their distance.

"The public, to be honest, are even more clueless," he said. "I hate to put it that way. Everyone I encounter is nice and friendly.

"But we've been told not to go up to people, and the first thing 50% of the people do as soon as they hear me is walk out of their house — literally up to me — to grab the mail. Maybe because it's something to do. That's the scariest part of my day."

It's only a matter of time

A California postal worker

The California carrier said this picture of a dirty bathroom at his post office was evidence that the agency is not cleaning seriously during the coronavirus outbreak.

Both mail carriers said they felt it was only a matter of time before they get the virus — or, worse, pass it to someone in their family.

The Florida carrier said the threat that she or one of her coworkers could get the virus was "very real" and "just waiting to happen."

"Who's to say someone in our office hasn't already had it?" she said.

"We're short-staffed, which means that those of us who are there are working for roughly 10 hours a day, six days on," she said, adding. "We're more fatigued and more susceptible to the virus."

The California carrier said he thought his chance of getting the virus was "bad."

He said that "as the days go by, I think until we get masks, it's probable" that he will get it.

Both said the USPS should make more of an effort to supply its workers with protective equipment and make hand sanitizer widely available.
More than 250 Postal Service workers have been infected. Both said they didn’t know of any of their coworkers getting sick yet. But the same can’t be said for the Postal Service as a whole. Dave Partenheimer, a USPS spokesman, told Business Insider on Thursday that 259 of the Postal Service’s 630,000 employees had tested positive for COVID-19. Partenheimer did not say how many workers had died of the disease, but unions have reported the deaths of two mail carriers in New York City and Detroit in recent days. There was also a concerning ProPublica report in which two workers said they were pressured to keep delivering mail even after they started to develop symptoms of COVID-19.

Postal workers have raised similar concerns about the coronavirus with The New York Times, NPR, and The New York Times. Berny Sanders, who’s running for president, sent a letter to the USPS demanding answers about how it was protecting its workers.

As of Friday, more than 86,000 people had signed a petition calling for safety guarantees for postal workers, including “basic supplies like gloves, sanitizer spray, and face masks.”

A USPS worker delivers mail in New York City on March 18. Cindy Ord/Getty Images. Meanwhile, there have been concerns about how self-isolation and social-distancing measures could affect the USPS. Two US representatives have said that the Postal Service could close as early as June because of a drop-off in mail volumes. Reps. Carolyn Maloney and Gerry Connolly said they backed a bill that would give $25 billion in emergency funding to the USPS. The stimulus bill enacted last week allowed it to borrow $10 billion and create temporary delivery points to help prevent workers from being exposed to the virus.

What the USPS had to say

Business Insider sent a detailed request for comment to the Postal Service on Thursday. Partenheimer did not directly answer the questions but forwarded a recent USPS statement on the matter.

Partenheimer said he wanted to stress that the safety of our employees and customers is our highest priority. The statement he included broke down the ways that the USPS was addressing the coronavirus outbreak. Here are some actions the service said it was taking:

• "Ensuring millions of masks, gloves and cleaning and sanitizing product are available and distributed to more than 30,000 locations every day."

• Introducing policies in USPS locations "to ensure appropriate social distancing, including through signage, floor tape, and 'cough/sneeze' barriers."

• Encouraging employees to "politely ask" customers to keep their distance so that they may drop off mail safely.

• Updating cleaning policies "in a manner consistent with CDC guidance relating to this pandemic."

• Giving information to employees to help them stay safe.

You can read the statement in full at the USPS’s website.
Thank you.

My husband is a mail carrier. He is now delivering in a very infected area of PA. They currently are now dealing with major increase of Amazon packages due to the infected worked at that HUGE facility! He and all the workers there know what ESSENTIAL means and All are doing their jobs. What I want to know is.... WHY IN GOD’S NAME ARE THEY DELIVERING UNESSSENTIAL MAIL to EVERY HOUSE in a HIGHLY INFECTED AREA!!!! Do you want them to get the coronavirus!! This I ask NATIONALLY!!! Why. MUCH of the mail I’m RECEIVING right now. Is UNESSSENTIAL!!!!! Again. Why!!!!?? So it can be thrown in the garbage. Do you see what is wrong with this picture. Or is it only the customers, employees and family members that see this problem.

Megan. You as post master seem to be the ONLY ONE who can do something about this situation... so DO SOMETHING, before the virus does it for you!

April 2, 2020

Hello USPS –

Two years ago, I moved to another neighborhood in Dallas, Texas. The (b)(6) location on (b)(6) is my assigned post office. In the email below sent on February 26, 2018, I detailed challenges I and many other residents faced at this location. Hours after I sent that email, I received a concerned sounding call from (b)(6). While I was speaking with Ms. (b), I received a frantic sounding call from the location’s Postmaster, (b), Ms. (b), and I spoke 3 times on February 26th. She said she was taking notes and repeatedly assured me that all my concerns would be addressed. I believed her. She put me at ease. For months, I’d not received any professionalism or truth from the staff at (b). To directly speak to USPS Regional Leadership, I felt that finally, I was being heard. The screenshot below details the phone calls between Ms. (b) and I from her desk phone (in red) and when Ms. (b) called me from her car to share her personal cell phone number with me to contact her if anything arises in the coming weeks and months (in purple).

SEE ATTACHED FOR IMAGE

Weeks after Ms. (b) shared with me that staff at the (b) location had been reassigned and better processes were now in place, it was refreshing to visit the location. There was even a greeter at the door helping to move traffic to the clerks. The clerks even thanked customers for their business and asked that the customers complete the survey at the bottom of the receipt. It was a stark contrast to the inferior service we had received months prior to. Sadly, this great customer service did not last very long.

I contacted Ms. (b) on June 25, 2018. She did not answer either call. I sent a text and screenshot of the package in question. The text detailed how the carrier had entered a status that was, once again, untrue. Within the same minute, Ms. (b) sent a text stating, “I can’t talk right now. I’ll call you back shortly.” As of today, 647 days have passed, and Ms. (b) has yet to call me back.
Not feeling confident, I did reach out to Ms. (b) again on December 7, 2019. I left a voicemail. She did not respond to that call either. (see screenshot below) What was the point in Ms. (b)(6) pretending to be so concerned and outraged at this locations’ behavior, when she had no intention of being concerned?

While I was hopeful that by Ms. (b) providing a direct number to contact her if issues continued or new issues developed, the fact that she NOT ONE TIME answered this phone, returned my calls or acknowledged my voicemails is the explanation of why the (b)(6) Post office staff is so comfortable lying to residents about mail and package delivery. The behavior of Ms. (b)(6) is the perfect example of when professionalism, honesty and integrity is absent in the actions of your most senior USPS representation, it will be reflected in the actions of your most junior USPS representation.

Remembered Luxuries

Out for Delivery

Delivery Attempted – No Access to Delivery Location

Much like in 2018, when I visited the (b)(6) post office in January and February, the lobby would quickly fill with residents complaining and frustrated about not receiving mail or inaccurate status about the attempt of their packages. Would someone please explain to me, why are the carriers allowed to update the status about our mail and packages with details that are simply not true? My package that was “Attempted to be Delivered” on April 1, 2020 is another example of your carrier not delivering his/her mail. According to Informed Delivery, on April 1st I was supposed to receive a letter along with a package (b)(6) Neither arrived. I attached a clip from my Nest doorbell camera to this email around the time that the carrier stated he/she attempted to deliver my package. This status is untrue. You carrier never came to my home on April 1st! I also included a picture of my home. Nothing prevents your carrier from accessing my porch or front door. Again, this status is untrue. I started to go to the Joe Pool post office this morning to retrieve my package but decided not to do the job that you’re paying someone else to do. I will wait, until it arrives. If it ever does arrive.

SEE ATTACHED FOR IMAGE

It is my request, that someone please investigate the Joe Pool post office and its carriers. During these very challenging times, the last thing residents should be worried about is whether our mail will arrive when it is supposed to.

Regards,

(b)(6)

To: "Brennan, Megan J - Washington, DC" <(b)(6)>
Subject: [EXTERNAL] Dover Annex / 3rd time Missing package

I am writing you this email because this is beyond ridiculous and possibly criminal. This is the 3rd time I have been waiting for a package, that did not get delivered. The tracking number will say delivered but it never was. The first 2 times I chalked it up to human error. Keeping in mind I got screwed out of my package and the price of it. I never got the refund because the company that I purchase from just says, "The tracking number said it was delivered, sorry."

So I went out and got video cameras covering all of the front and back yard. You can not take 2 steps on my property without the camera's motion sensor recording you.

3rd time. Same song and dance. Tracking number (b)(6) stated my package was delivered on Saturday March 21, 2020 at 10:30 AM. Of course, no package. I retrieved the mail that day, and the only thing I received was a signed signature card for a piece of certified mail that was sent. No Package !!!!

I checked my video cameras and the mail actually came at 11:30 not the 10:30 the tracking stated. The video clearly showed my mail carried with a small green signature card return for a piece of certified mail. The video clearly shows NO PACKAGE.

I went to the Annex to make a complaint. I even asked for the carrier's GPS location for when he checked in the delivered package. I was immediately told the package was mis- delivered to (b)(6) Dover, NJ.

They assured me I have my package tomorrow. NO PACKAGE. I called multiple times and was hung up on, and just basically blown off. Finally 3 days later I got through and spoke to an African American female by the name of Marissa. (Keep in mind she is the person I spoke with, when I went there in person. They also told me she was the post master of the Annex. That was a lie. So she told they can't do anything, and she gave me the phone number to the postmaster, (b)(6) I questioned on who was the postmaster. Of course, I got nothing.

So I called the number (b)(6) This is the number (b)(6) me. Well it turns out she was just playing more games and gave me his personal cell number. Which Mr. (b)(6) was not to happy about.
So he stated he would take care of everything. Nothing happened!!! I was told to make a claim to receive my money back.

I did in fact try to do this. Well I could only make a claim if I was the sender, and I took insurance on the item !!!

I was the receiver from a product I brought on Amazon. Total cost $37.59.

So here are my questions, Why is the mail carrier marking an item delivered, if in fact it is NOT. Are they stealing them ????

Why if they know where it was delivered too, they did not retrieve it !!!

This whole thing is nothing but I leaky bag of crap !!! I am also going to go the local police and file a complaint of theft. I will also be listing your carrier as the actor / suspect.

I want something done about this. I would like to get my money refunded for the mistake of the carrier and the post office. How the hell are you guys stating that a package is delivered when it is not. I was some answers. Thank You.

USPS reports postal employees’ deaths from coronavirus, ‘not immune’ to financial impact By Jory Heckman<https://federalnewsnetwork.com/author/jory-heckman/>
April 1, 2020 4:53 pm

With the Postal Service now tracking the deaths of its employees from the coronavirus pandemic, in addition to a growing list of those who have tested positive for the virus, the agency is doing everything it can to continue normal operations — even in the most extraordinary circumstances.

The USPS Board of Governors held a moment of silence Wednesday for postal employees who have died of complications from COVID-19, the illness caused by the current strain of the virus.

Those include Rakkhon Kim, a 50-year old letter carrier in New York City, who died of complications from the virus last week.

USPS spokesman Dave Partenheimer told Federal News Network that 230 postal employees have tested positive for COVID-19. While the Postal Service can confirm “some deaths,” the agency does not yet have a definitive number.

“This pandemic is an important reminder that the Postal Service provides an essential public service,” Robert Duncan, the board’s chair, said during the remote meeting. “And unfortunately, it’s also a sad and painful reminder that public service can come with a terrible price.”

While the health and safety of its employees remains a top concern, the Postal Service is also taking steps to address its worsening financial situation.

Duncan called the additional $10 billion line of credit in the $2 trillion emergency spending bill<https://federalnewsnetwork.com/legislation/2020/03/what-the-2t-coronavirus-stimulus-means-for-federal-employees-retirees-and-contractors/> President Donald Trump signed last week “a good start” to see the Postal Service
make it through this pandemic, but added USPS will continue to work with Congress on a path forward that addresses its underlying liabilities and its long-term financial health.

“The Postal Service continues to perform its public services [but] have seen that we’re not immune to the financial impacts of this pandemic,” he said. “At a time when we are being asked to do more, we’re generating much less in revenue. A sudden and dramatic drop in economic activity is also leading to a steep and precarious decline in mail volume.”

However, Rep. Gerry Connolly (D-Va.), chair of the House Oversight and Reform Committee’s government operations subcommittee, told Federal News Network that it would be “very unhelpful” for USPS to only borrow more money. “To give it $10 billion of additional credit is, frankly, a meaningless gesture. It’s a slap in the face, and it’s not what they need,” Connolly said in an interview. “They don’t need more debt capacity, they need debt forgiveness.”

Connolly led efforts in the House-version of the emergency spending bill to give the Postal Service $25 billion to spend through September 2022. The bill would have also forgiven USPS’ $11 million debt to the Treasury Department and allowed the agency to borrow another $15 billion. The bill would have also eliminated a $3 billion annual borrowing limit for this line of credit from Treasury.

Connolly said he supports seeking further USPS emergency relief in a fourth round of emergency spending for critical infrastructure once the Senate reconvenes April 20. However, he added that the White House and President Donald Trump personally objected to some of the USPS provisions in the House spending bill.

Connolly also suggested adding the USPS Fairness Act, which passed the House in February, into the next spending bill. The bill would repeal a 2006 congressional mandate for the Postal Service to pre-fund the health benefits of future postal retirees, and would instead amove the agency to a pay-as-you-go model.

The White House’s National Security Council and the Department of Homeland Security consider USPS an “essential service” during the course of the pandemic. However, Connolly said the Trump administration has yet to give postal employees the resources and protections commensurate with this emergency designation.

“Many of them [are] working in risky situations in the midst of this pandemic to ensure Americans have the essential supplies they need in terms of medicine, prescription drugs, equipment, foodstuffs and the like,” he said. “We’re even talking about moving to an all-mail ballot, which, of course, would rely on a Postal Service that continues to do its job.”

Postmaster General Megan Brennan said during the board meeting that USPS does not expect significant disruptions in delivery service, but acknowledged cases where there may be “temporary, localized impacts” to service where the agency will “quickly recover” to resume normal operations.

The New York Post reported disruptions in USPS delivery in the Greenwich Village neighborhood of New York City because of the number of postal employees taking sick leave.

Meanwhile, the Postal Service stood up a COVID-19 Response Command led by Chief Information Officer Kristin Seaver to respond to what Brennan described as front-line conditions changing on a “day-to-day basis.”

“We are aggressively monitoring all aspects of our business operations and functions, and we are confident in our ability to process and deliver the nation’s mail and packages throughout this emergency,” Brennan said.

Several postal employees have told Federal News Network that their local post offices have been slow to provide surgical masks that USPS headquarters said would be available for all workers. Hand sanitizer, they added, has also been in short supply.

“We are continuing to work to overcome gaps in the supply chain to ensure that our employees have access to hand sanitizer, masks and gloves, and other personal protective equipment,” Brennan said.

Meanwhile, the Postal Service has reached agreements with postal unions on a liberal leave policy that would provide additional paid leave time for career employees and non-career city carrier assistants.

“We are promoting healthy behaviors and protocols and encouraging any employee who feels sick to stay home,” Brennan said.

To minimize the risk to customers and employees, USPS management has implemented social distancing protocols at post offices and changed work practices to limit contact when postal employees receive outgoing packages from customers and when they get signatures after making deliveries.
The Postal Service, Brennan said, has issued a “daily cadence” of memos on mandatory stand-up talks, articles, videos and other communications to ensure employees have the latest information and guidance from federal health officials. “The Postal Service is focused on our service mission, processing and delivering the nation’s mail and packages and meeting the immediate and evolving needs of American citizens and businesses,” Brennan said. “We will get through this and the Postal Service will help lead the way.”
Thank you.

Megan

PMG quote from today's Board meeting is included in the article.

How coronavirus could be the 'final straw' for the U.S. Postal Service Ben Werschkul<https://www.yahoo.com/author/ben-werschkul>

Yahoo Finance<http://finance.yahoo.com/>April 1, 2020

The U.S. Postal Service has been in trouble for some time. Now, the coronavirus crisis has come along and made everything much worse.

Mail volume (and the accompanying revenue) could be down 50% this year, according to some estimates. The already teetering Postal Service could run out of money soon. That fear, combined with widespread concerns about letter carriers exposed to the virus, has put some lawmakers into a fatalistic mindset.

Rep. Gerry Connolly (D-Va.) put it bluntly: "We need to start thinking in those apocalyptic terms," he said in an interview with Yahoo Finance Tuesday, "because we are about to face the apocalypse."

The current crisis is "in many ways the final straw," said Connolly, who is chairman of the House subcommittee that oversees the Postal Service. He believes that without some sort of intervention it will run out of cash in June.

'There’s a growing anxiety'

Questions of safety are now dogging the service. "There's a growing anxiety that they're at risk and that there's not sufficient resources to protect them even in the most minimal of ways like hand sanitizers or gloves or the like," Connolly said.
Two weeks ago, ProPublica published a report saying that some postal employees were continuing to work after displaying COVID-19 symptoms, and seemingly healthy employees had insufficient protection against the virus.

Postmaster General Megan J. Brennan responded to some of the concerns on Wednesday during a Board of Governors session. "We are promoting healthy behaviors and protocols and encouraging any employee who feels sick to stay home," she said. "In order to further encourage this behavior, we have updated our leave policies to allow liberal use of leave."

Brennan also acknowledged some supply problems in the recent past saying, "we are continuing to work to overcome gaps in the supply chain to insure that our employees have access to hand sanitizer masks and gloves."

But questions are likely to keep coming. Sen. Cory Booker and other New Jersey Democrats wrote a letter to Postmaster General Brennan last week expressing a series of concerns and questions. On Tuesday, Sen. Bernie Sanders sent another letter raising similar questions.

A spokesperson for Booker told Yahoo Finance that his office has not received an answer but remains hopeful that we can work with the service "to implement stronger workplace protections for the safety and well-being of USPS employees as well as the millions of Americans who depend on their services."

"The health and well-being of our employees is always our first thought in facing the COVID challenge," the Postmaster General said on Wednesday. She also underlined that the CDC, WHO, and Surgeon General all "have all said that there is very low risk that this virus is spread through mail which should be a comfort to us all and to the public."

Connolly agreed the risk of transmission via mail is low, but "if we made sure that all of our postal workers had access to hand sanitizers and gloves, we could come close to eliminating the risk." A lack of guidance or protection for letter carriers "is very imprudent and puts people at some risk. Not a high risk, but a risk."

The USPS has made one change: it no longer requires customer signatures. Letter carriers will instead - from a distance - request the customer's information and enter it themselves.

'They're going to run out of cash in June'
The USPS operates as a self-supporting, independent federal agency - sort of halfway between an independent business and a government agency. It likes to tout that the service "receives no tax dollars," instead paying for itself from the sale of postage, products and services.

During the phase 3 negotiations, Connolly and other House Democrats proposed changing that by eliminating outstanding debt and allotting $25 billion to further shore up USPS finances. They even wrote a letter to Sen. Mitch McConnell "to seek your urgent help."

They also want to repeal a mandate imposed in the Postal Act of 2006, which they say denies the USPS a chance to be profitable, arguing that the rule requires the Postal Service to pre-fund retirement health benefits for its employees. It's a financial burden that puts "the Postal Service in a straight jacket," according to Connolly, and has been the focus of repeal attempts for years.

The push didn't work. The final package, signed into law by President Trump last Friday, included $10 billion in additional borrowing authority with strings attached.

The National Association of Letter Carriers, a union representing postal employees, responded: "That is woefully inadequate."
Connolly says that some of the conditions on the $10 billion (including more of a Treasury role in management) was "an unacceptable condition for everybody," and he still sees the USPS going out of business within months if nothing is done.

Then USPS and 'Phase 4' negotiations
The Postal Service has been gradually shrinking for years as outfits like UPS and Fedex Express (not to mention email) encroach further on its business. Total mail volume has shrunk from 170.9 billion pieces of mail in 2010 to 146.4 billion in 2018.

Yet advocates note the USPS still serves important functions, from delivering prescription drugs to Social Security checks. It also remains the only option in some rural areas where; as the National Association of Letter Carriers points out, "private companies rely on the USPS for last-mile delivery."

The USPS is also how millions of Americans who don't have direct deposit information on file with the IRS will receive their $1,200 stimulus checks.

And then there's perhaps the most politically fraught factor: "We're also counting on the Postal Service to save our election process," Connolly said amid questions about whether November's elections will need to be done through the mail given concerns about voting in person. "What if there's no Postal Service?" he said. "Well, that could affect the outcome of an election."

Trump has not discussed the Postal Service at length since the coronavirus crisis began. On March 23 he thanked "the hardworking men and women of Federal Express, UPS, the United States Postal Service, and the truckers who are maintaining our supply chains and supply lines."

But Connolly claims that, behind the scenes, Trump himself was instrumental in killing aid to the USPS. He said Trump personally axed direct aid to the service. House Speaker Nancy Pelosi "said this came directly from Trump and she has reiterated that more than once," Connolly said.

The White House did not offer comment on Connolly's claim.

On Tuesday, during an appearance on MSNBC, Pelosi reiterated that Postal Service funding is crucial in a phase 4 deal largely to keep voting by mail as a viable option.

"I'm going to continue like a dog and a bone on this issue," said Connolly, "because we won't appreciate the criticality of it until the worst happens, and I'm trying to prevent the worst from happening."

Corporate executives play an outsized role at Trump’s coronavirus briefings

Anne Gearan

[My Pillow CEO Michael Lindell speaks as President Trump listens during the daily coronavirus briefing at the White House Rose Garden on Monday.] My Pillow CEO Michael Lindell speaks as President Trump listens during the daily coronavirus briefing at the White House Rose Garden on Monday. (Tom Brenner/Reuters)

President Trump has lately used Rose Garden appearances to showcase a cast of corporate executives who have joined government efforts to fight the coronavirus pandemic, while sometimes slipping in a few plugs for the home office and, often, praising Trump.

But the laudatory performance Monday from MyPillow founder and TV pitchman Michael J. Lindell seemed to take even Trump a bit aback.

“God gave us grace on November 8, 2016, to change the course we were on,” Lindell said, referring to the date of Trump’s election. “God had been taken out of our schools and lives. A nation had turned its back on God.”

Trump said he had not known that Lindell, a friend and campaign donor, would say that, but the pattern of presidential praise and product placement was already well-established.

“Thank you, Mr. President, for your call to action, which has empowered companies like MyPillow to help our nation win this invisible war,” Lindell said in one of several references to the name of his product and his company, which will be making cotton masks.

Reporters then heard from executives from underwear manufacturer Jockey International Inc., Honeywell International Inc., Procter & Gamble Co. and United Technologies Corp.

Sign up for our Coronavirus Updates newsletter to track the outbreak. All stories linked in the newsletter are free to access. 

“Fantastic,” Trump said. “Those are great companies. Thank you very much.”
The scene was the latest example of what has become a Trump default as he faces the enormity of a health crisis that has grounded a highflying economy while forcing nearly 3 out of every 4 Americans to stay home.

He reaches for the advice and company of companies, from banks to health-care firms to hoteliers to cruise ship operators to shipping companies UPS and FedEx, which sent executives to a similar session Sunday. More than two weeks ago, it was retailers such as Walmart and CVS, two participants in another camera-ready Rose Garden event.

Often, these sessions are part theater and part news conference. Reporters sit, and the television cameras roll as Trump recaps the day’s meetings and invites a series of testimonials. Often, the executives get more airtime than the medical professionals who are part of the White House virus task force.

“Thomas Moriarty, CVS. We all know CVS. Thank you,” Trump said as he welcomed the drugstore executive vice president to step forward at a March 13 event.

After a round of thank-yous, Moriarty gave a mission statement for his company’s participation in what he and other executives said is a critical national mobilization.

“Thank you, Mr. President. We have been focused, since the start, on making sure our patients and the customers we serve have the information they need and the safety they need as well. We are committed to working with the administration and local public health officials to make this work as well. And thank you, sir, for the honor,” Moriarty said.

Although the coronavirus pandemic has hit small businesses, hourly workers and the gig economy especially hard, Trump’s public efforts frequently focus on familiar brand names. Boeing. General Motors. Walgreens.

Trump freely notes that his own business background colors how he views the pandemic and its economic effects.

“Today, we’re glad to be joined by leaders of America’s medical supply and shipping companies. They’re big people. I know their names very well, from watching business and studying business all my life,” Trump said in the Cabinet Room on Sunday.

“We’re waging a war against the invisible enemy. We are grateful for your tremendous partnership — it’s been incredible — and the work you’ve done so far. And I know you’ve not only — so far, you’re geared up. I know that for a fact.”

On Monday, he described the CEOs as “some of the greatest business executives in the world today.”

On Tuesday, Trump spoke by telephone with leaders of U.S. Internet service providers to thank them for keeping Americans connected during this time of social distancing.

Trump has played master of ceremonies at about a half dozen White House events with reporters present where the private sector discussed ways to cooperate with the government in what he and other officials have likened to a wartime national effort. He has also hosted representatives for nursing and other professions heavily affected by the outbreak.

Trump is not the first president to use the media as a backdrop and a command audience. Nor is he unusual in his effort to draw in the private sector as helpmate and adviser. His focus on big companies is nonetheless striking and fits with Trump’s political brand as a wealthy businessman willing to shake up the system.
The private-sector focus may also be a shield against the charge of hypocrisy for massive government spending by a president who rails against “socialism,” but such criticism remains muted.

The $2 trillion emergency aid package that Trump signed into law Friday would help cash-strapped companies. It bars Trump and his children from relief money. So far, Trump hasn’t provided a clear answer on whether his own businesses would seek the financial help.

For the companies involved in the pandemic response, there is both a patriotic call to action and, at Trump’s invitation, a rare opportunity to show it off — a literal moment in the sun at the Rose Garden.

“Great job,” Trump said over and over on Sunday, as he invited executives to the microphone to describe their work.

“Fantastic job,” he said as some of the executives plugged their good works. Some praised Trump; all thanked him.

“Thank you, Mr. President, for the incredible leadership,” Laura Lane, president of global public affairs at UPS, began. “I will share with you that UPS is really proud to be part of this effort,” she said. She pledged the resources of her “Big Brown Army,” a reference to the ubiquitous color of UPS trucks and uniforms.

“Thank you very much. Great job you’re doing,” Trump said, as he brought up the next executive.

In an interview, Lane said it was an “easy decision” to accept the White House invitation and to use the company’s resources to try to move products where they are needed.

“Philosophically, I will tell you for our company it doesn’t matter who’s in the White House. I know there’s a lot of people who love President Trump and a lot of people who probably don’t love President Trump,” Lane said.

“What I tried to do is deliver a message of hope” and rally the company’s employees, she said.

“We have to deliver for the country.”

Trump has remained polarizing despite the moment of national crisis, according to public polling, although he gets better marks for his handling of the pandemic now than he did early on.

Some companies may weigh whether there is a reputational risk for appearing alongside Trump.

“It depends,” said Carol Phillips, who runs a marketing firm called Brand Amplitude and teaches marketing at the University of Notre Dame.

“In general, the rule of thumb is that anything that contributes to positive awareness is a good thing, but in the current polarized and anxious environment, the rules may have changed,” she said.

For salesmen like Lindell or chef and restaurateur Wolfgang Puck, whom Trump said he had consulted Sunday, the presidential mention is probably a boon.

That may be especially true for Puck.
“Wolfgang Puck is a great restaurateur, as you know, as is Jean-Georges and Thomas Keller and Daniel Boulud, and other leaders in the restaurant business, which has been probably one of the hardest-hit industries,” Trump said Sunday. Jean-Georges Vongerichten and the others are all celebrity chefs who have built business empires.

“I’ve directed my staff to use any and all authority available to give restaurants, bars, clubs incentives to stay open. You’re going to lose all these restaurants, and they’re not going to make it back,” Trump said.

He said he is directing his Cabinet to look into restoring a tax deduction for corporate entertainment and restaurant meals.

The president’s uneven performance drew criticism from New York sports broadcaster Mike Francesa, a Trump supporter and hometown booster in the past.

Francesa laced into Trump on Sunday and Monday, saying the president is more interested in his “ratings” than in addressing the shortfall in necessary supplies.

“So, don’t give me the MyPillow guy doing a song and dance up here on a Monday afternoon when people are dying in Queens,” the WFAN host said Monday evening.

Thanks,

Megan
Thanks,

Megan

The new White House press conference now estimates between 100,000 -200,000 dead from the virus. How many are going to be postal workers?

How many postal workers will die because we are delivering useless circulars or Amazon packages that aren't essential?

I delivered a dog hair dryer today...how is that essential?

We know what happened in Santa Fe, we know what is happening in Greenwich Village...we know about the Bronx carrier who died. We ALL know.

And while you and countless other "executives" get to sit at home out of harms way we get to be face to face with people who will eventually infect us. And for what?

Either stop the delivery of 3rd class mail, reduce window hours or even close a certain number of days or more postal workers will get sick and die.

We are scared, and we are all prepared, multiple postal workers throughout the country are ready to call in sick or just quit. I would rather lose my job and benefits then lose my life for you or any of the useless upper management.

I didn't sign up for this to work in a pandemic.

Grow a spine and become a leader.
Janice,

Getting Democrats to the polls is the most effective way to win elections -- and increasing Democratic Voter Turnout is the only way to defeat Donald Trump.

Our country is going through dark times. But we can’t stop fighting for progress when it matters most. We can’t sit idly by while Republicans rip apart our Democracy. We have a moral obligation to fight for ourselves, our grandchildren, and our future.

That’s why we need your help! Passing Medicare for All, saving Social Security, and making Trump a one term President will take a MASSIVE increase in Democratic Voter Turnout.

Donate to Progressive Turnout Project
Our plan? Use data & science to win elections and change the world. We design, test, and execute Voter Turnout campaigns to elect a wave of Democrats nationwide. We’re working around the clock to knock doors, make phone calls, and skyrocket Democratic Voter Turnout to the highest levels ever in 2020.

Dear Postmaster General,

I am a paying customer of The United States Postal Service. I pay not to have my mail delivered to my house, saving you money, by renting a post office box. However paying for a post box has become a liability. The USPS will not deliver packages ordered on Amazon or other retailers to our physical address. Why since we have po box our physical address is not recognized by the USPS. It seems to me that paid for parcel delivery is different than mail. You are not only hurting the retailer but you are hurting the paying customer. We have no way of knowing with whom a retailer ships most of the time. When we do find it is shipped with USPS we move on, hurting a retailer. I understand you not delivering mail. Please review this policy or get out of the shipping business. You are hurting the economy even more during this pandemic. We have had 2 items returned recently. This makes no sense.

Paying Customer

Subject: Fwd: [EXTERNAL] Re: (b)(6) RE volatile unprofessional post person who also leaves mail in dangerous place

ATT endangering the welfare of families by leaving mail in a unsafe place

Hello
Please keep my identity private as in the past when it was shared certain postal drivers and their managers at the (b)(6) Post Office have retaliated and become threatening.

I send you, your family and loved ones much care, be reassured we will get through this crisis.

May you have all you need.

I am writing to you because last February our building were victims most packages stolen whenever our regular carrier (b) left on vacation this was due to the fact that whomever filled in a person named (b)(6) at the time would carelessly toss all packages into the lobby which is public where the would be stolen

we are a 3 story building with an elevator and when packages are brought to unit doors versus being left in the public lobby they never get stolen. The driver subbing for Paul became volatile and threatened tenants when he was politely asked to please bring packages to the door, when many of us from the building called the (b)(6) I Post Office in (b)(6) CA (b)(6) CA (b)(6) we were yelled at by (b)(6) that it is "not their job" to deliver to unit doors even though it is against the law to leave the mail in a unsafe place.

Thankfully after a lot of work I was out in touch with

(b)(6)

United States Postal Service

Government Relations Representative
He fully understood how serious this was and how badly the carrier who was refusing to co-operate acted towards us as well as the manager of consumer affairs and the manager of the Post Office.

He spoke to consumer affairs and the Post Office manager and from that point on packages where delivered to unit doors not left in the lobby and the mail always arrived safely. Now more than ever we need this, Citizens are by law on lock down and even when they do stand in line for hours they are finding stores are not stalked with basic essentials, we are all forced to order basic essentials online.

Due to the crisis there is a high shortage growly daily of what is available on line so when items are stolen now there is no replacement and money is scare with so many by law unable to work.

Yesterday Paul our beloved regular carrier took leave for vacation, today all packages where dangerously left downstairs in the public lobby a good deal where stolen, I am begging you please to reach out to the Post Office in CA and ask them to please ensure drivers deliver packages to unit doors.

Our safety and welfare is counting on this

Hi (b)(6)

a beautiful weekend to you
can you please touch base with me and let me know you got this and what is being done?

On Thu, Feb 6, 2020 at 11:58 AM (b)(6) wrote:

RE

volatile unprofessional post person

who also leaves mail in dangerous place

Dear (b)(6)

Good day to you

I hope this letter finds you well it was very reassuring to hear your care and concern thank you so much. The Post office needs more professional heroic people like you!

I am writing about an on going situation with the (b)(6) Post Office in West Hollywood CA

(b)(6)
We live in a 3 story building (b)(6)

(b)(6)

The main entrance is has no area to safely leave packages, there are tiny mailboxes barely big enough for a envelope. The owners have done all they can by installing cameras, changing the door pass code.

There are huge notices that say to please bring all packages to unit doors of tenants and not leave in the lobby.

All other carries, amazon prime, ups, fed ex and dhl abide by this as does our amazing regular carrier Paul.

Our regular post person Paul is fantastic and professional but when he understandably takes leave the post office puts a horrid individual in charge of deliveries to our building named Christian.

Christian leaves packages in the lobby where they are often stolen, when tenants have politely and calmly tried to talk to Christian about this he becomes threatening and volatile and says he will make sure they need to pick up their mail at the post office if they don’t stop talking to him.

665.24 Violent and/or Threatening Behavior

The Postal Service is committed to the principle that all employees have a basic right to a safe and humane working environment. In order to ensure this right, it is the unequivocal policy of the Postal Service that there must be no tolerance of violence or threats of violence by anyone at any level of the Postal Service. Similarly, there must be no tolerance of harassment, intimidation, threats, or bullying by anyone at any level. Violation of this policy may result in disciplinary action, including removal from the Postal Service.

Over a year ago I reached out to consumer affairs about (b)(6)’s serious misconduct and atrocious unprofessional behavior. Nothing was done accept giving me the run around, I was contacted by the post office who not only sided with (b)(6) but would interrupt me, not allow me to share my concerns and hung up repeatedly on me.

I was shocked to discover that not only was this post person still employed by the Post Office but that the management allows and also mistreats the general public who get mail from them this way.

It takes so little to do the professional safe action of merely working with tenants and safely ensuring they get their packages by leaving them at the door. I understand this not a requirement of the job BUT leaving mail in a SAFE place IS
the law. Universal service obligation states this, and it is essential to ensuring that everyone receives the mail service they need. We are just trying to get our packages safely. We all work and can not take off to go into the pots office to get our mail, not can we afford a PO box, we should not have to do either when all the carrier needs to do is bring packages to the tenants unit door. Paul has already proven this can work easily but leaving packages at the tenants door not in the lobby.

I sincerely hope this can be resolved, no one should be treated this way and we all deserve to get our mail safely. Thank you for your time,

May your day be filled with Deco-dence

a swellagant eve to you

(b)(6)  (b)(6)
Thank you.
Megan

Trump names new Defense Production Act coordinator for coronavirus fight

President Trump said Friday that White House trade adviser Peter Navarro would become the national Defense Production Act policy coordinator for the federal government.

Megan,
During these times has the USPS approached grocery businesses that cannot keep up with the demand for home deliveries?
In some cases time slots are not even possible and deliveries are week+ out. We probably could do very well with partnering with food chains around the Nation. It would keep at home as well as our image once again “It’s what we do- connecting people”.
There could be an established window of operation. We already know how to do that ie Amazon. Trucks could deviate to the stores. We’ve done that with CVS, Staples etc.
I think this would be a very big win for the USPS, proving value and our capabilities to provide value in whatever we do.
I would be happy to help.

POLITICO's must-read briefing on what's driving the afternoon in Washington

Mar 26, 2020 View in browser<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0a1ed6a58024eccb31dae012c5eef06f44f0bb5c8a706bfc6ae730bbe85d51278eb1f5c7a727ba9181>

[POLITICO Playbook PM]

By Jake Sherman(b)(6) Garrett Ross(b)(6) > and Eli Okun(b)(6) >

THE CORONAVIRUS has already cost a record 3.3 million Americans their jobs -- at least, in the last week alone -- ended more than 1,000 American lives and turned a Congress that has excelled at inaction into a rescue squad, intent on battling economic infernos and rebuilding the ruin the disease has left in its path.

THE $2 TRILLION BILL that the House is set to pass Friday might, in retrospect, look like a drop in the bucket for a Washington that's suddenly eager to approve gobs of new spending.

SPEAKER NANCY PELOSI, speaking this morning from the Capitol, said this stage is "emergency mitigation" and the next stage "recovery" -- a signal that the California Democrat is readying for an expansive legislative effort in the coming months. PELOSI said the next round of relief must refresh meal assistance for needy Americans and funnel more cash to states and local governments that will be unable to balance budgets. There may be another round of direct payments to come, she said.

AND, IN A SIGN OF HOW FAR the free-spending feelings extend, PELOSI said<http://go.politicoemail.com/?qs=ac1bdf8d59248fd048c0e902d8df1ac8d6b585cb5a8ad8a2af2dbbeae5de43dac5e6>
Fed Chairman JAY POWELL told her to "think big" because interest rates are low -- in other words, money is cheap, so get ready to spend. PELOSI, speaking on Bloomberg Television<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0455bebebacc122c5065eb406622333ff0ea4c199bcf176cfb3c738f77fa6d290b1a3b1903a16bf40>, said Congress would begin working on creating "good-paying jobs as we go forward, perhaps building the infrastructure of America."

IT IS, PERHAPS, a natural shift for a Congress that has vacillated wildly between fiscal poles in the last 20 years. GEORGE W. BUSH'S presidency was marked by Sept. 11, the ensuing costly incursions into Iraq and Afghanistan, the expansion of Medicare prescription benefits and the beginning of the financial meltdown.

FROM 2008 TO 2010, BARACK OBAMA and a Democratic Congress were forced to resuscitate an economy reeling from the financial crisis with a massive re-regulation of Wall Street, a bailout of the auto industry, a stimulus package and, later, the expansion of the social safety net with the Affordable Care Act.

WITH THAT EXPANSION came contraction. From 2010 to 2016, JOHN BOEHNER and PAUL RYAN'S House shrank government spending, fought tooth and nail to offset any outlays with corresponding budget cuts and played chicken with the nation's creditworthiness.

THE TRUMP ERA will now be marked not only by the large-scale tax cut it passed in 2017 or the deregulation of industry, but by the massive spigot of cash the coronavirus outbreak has opened up.

FWIW: The House GOP leadership says there are some lawmakers who will be in Washington for Friday's vote on the emergency coronavirus bill that passed the Senate last night. They are going to try hard to quash dissent, and any effort to call for a roll call vote on the legislation, and they say they will involve President DONALD TRUMP and senior White House officials should they need to. Republicans have a conference call at 1:30 p.m. today.

Good Thursday afternoon.

THE FED'S POWELL on NBC's "Today" show: "We may well be in a recession, but I would point to the difference between this and a normal recession. There's nothing fundamentally wrong with our economy. Quite the contrary, the economy performed very well right through February ... so we start in a very strong position."

TREASURY SECRETARY STEVEN MNUCHIN told JIM CRAMER on CNBC that money should begin going out within "three weeks." "We are determined to get money in people's pocket immediately."

-- MNUCHIN ON JOBLESS CLAIMS: "I just think these numbers right now are not relevant, and, you know, whether they're bigger or smaller in the short term. Obviously there are people who have jobless claims, and again, the good thing about this bill is the president is protecting these people, so you know, now with these plans, small businesses hopefully will be able to hire back a lot of those people." More on the record claims from Rebecca Rainey and Nolan McCaskill<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0c8f55a30369c72ae999ad138403a4a75483df6c6b77005d791e06ca325ac7c139085a4065e52d30>

-- WSJ: "Mnuchin Indicates U.S. to Take Stakes in Airlines in Exchange for Grants," by Siobhan Hughes, Kate Davidson and Alison Sider: "Treasury Secretary Steven Mnuchin indicated that the U.S. government would take stakes in airline carriers in exchange for billions in direct grants to the companies, part of a $2 trillion economic rescue package, according to people familiar with the matter."

"He detailed his plans during last-minute negotiations when the aid to airlines emerged as a major sticking point. Republicans had rejected providing cash grants to airlines, and an earlier version of the legislation would have provided $50 billion in loans and loan guarantees to passenger airlines and $8 billion to cargo airlines—but no direct aid." WSJ<http://go.politicoemail.com/?qs=ac1bdf8d59248fd023e0225e5f7159df201a2132e12d50e8121d9002c0629ef2cd0611c61b34d04d3d53d56b50800136>

AFTERNOON SNACK -- "Dr. Fauci doughnuts are selling like hotcakes at Donuts Delite,"<http://go.politicoemail.com/?qs=ac1bdf8d59248fd02075089d9b6777a6a25e3a143c812f443e6acff15975f193b6582282f8ce8e19e09a31a68fae44a6> by the Rochester Democrat & Chronicle's Marcia Greenwood

THE TRUMP ADMINISTRATION -- "Job Vacancies and Inexperience Mar Federal Response to Coronavirus," by NYT's Jennifer Steinhauer and Zolan Kanno-Youngs: "Of the 75 senior positions at the Department of Homeland Security, 20 are either vacant or filled by acting officials, including Chad F. Wolf, the acting secretary who recently was unable to tell a Senate committee how many respirators and protective face masks were available in the United States.

"The National Park Service, which like many federal agencies is full of vacancies in key posts, tried this week to fill the job of a director for the national capital region after hordes of visitors flocked to see the cherry blossoms near the National Mall, creating a potential public health hazard as the coronavirus continues to spread. At the Department of Veterans Affairs, workers are scrambling to order medical supplies on Amazon after its leaders, lacking experience in disaster responses, failed to prepare for the onslaught of patients at its medical centers.

"Empty slots and high turnover have left parts of the federal government unprepared and ill equipped for what may be the largest public health crisis in a century, said numerous former and current federal officials and disaster experts." NYT<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0af0bfd59a596a186052012f68379832905547e478e113c2e2dc412dc419c5887ab4762feb8636>

INSIDE ITALY'S LOCKDOWN -- "The Eye of the Storm:"<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0cf497691e0a69e73f7b718bb43bd436addfbc1ef87355c7a257681fa0cb06e5f6eeb2977a67fe7e> With Italy reeling from the COVID-19 pandemic and 60 million people across the nation ordered to remain indoors, a documentary photographer ventured out to record the quiet desolation of a modern plague," with photos by Alex Majoli for Vanity Fair

THE QUESTION EVERYONE IS ASKING -- "No end in sight in Europe," by Sarah Wheaton in Brussels: "As the lockdowns in Europe stretch into their second, third, fourth or even fifth weeks, politicians and policymakers across the Continent are coming under pressure to let people know when the emergency measures will be lifted. It's a question they're not ready to answer, in no small part because there's little agreement in Europe, which started down this road weeks before the U.S., about what social-isolation strategies are intended to accomplish — or what would come afterward.

"That leaves the ultimate goal unclear. In the short term, lockdowns serve a simple function. Evidence from Asia, including a new study from Singapore, suggests they are an effective way to slow the rate of infections and prevent hospitals and health care systems from being overwhelmed. But if the virus is here to stay, when will policymakers consider it safe for people to leave their homes again?"

POLITICO<http://go.politicoemail.com/?qs=ac1bdf8d59248fd01c6f099da03d986c5c03e90e651d7f7b04e792a1291df8560c55a26d505fabb22f6c5595aa90d9e1>
... OK, MAYBE NOT EVERYONE: "Light at the end of the tunnel' becomes a Trump team mantra,"<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0d76eaae6b1a427a97512e604d797e1102b7336b11d029cb7c0339ab4c4e308a2c98f8d995191e723> by Quint Forgey: "President Donald Trump and senior administration officials have begun employing a new turn of phrase to describe America's war against the coronavirus pandemic — insisting that the same social-distancing guidelines the president has suggested rolling back in recent days are in fact revealing a 'light at the end of the tunnel' to the public health crisis."

SIGN OF THINGS TO COME? -- "China Is Open for Business, But the Post-Coronavirus Reboot Looks Slow and Rocky," by WSJ's Mike Bird, Jon Emont and Shan Li: "With new infections dwindling, factories are restarting, stores are reopening, and people are venturing outdoors. In some ways, China is where the U.S. and Europe hope to be within weeks or months. Yet many Chinese factories find demand for their products has evaporated. Consumers in China and elsewhere are reluctant to spend over worries about what they have lost and what lies ahead.

"For U.S. businesses tied to global trade, exporters and multinational companies, China's limited return to normal foreshadows the potential for a sluggish U.S. recovery. Consumption, which makes up more than two-thirds of the American economy, looks to be hobbled by lost jobs, fallen income and diminished confidence for an unknown period. Even countries emerging from national lockdowns later than others will likely see weaker demand among trading partners also hurt."

WSJ<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0d2d1a496110b6628e50235f559ac592b5b2d6c3667d05667a16e6c7e926e601d1dac00cb74d33f>

-- AP: "Many businesses cautious about restarting economy amid virus,"<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0d2d1a496110b6628e50235f559ac592b5b2d6c3667d05667a16e6c7e926e601d1dac00cb74d33f> by Michelle Smith in Providence, R.I., and Dee-Ann Durbin in Ann Arbor, Mich.: "Despite wild swings in financial markets and signs that unemployment is surging — both of which could hurt Trump in an election year — many businesses say it's not clear that reopening will be even an option in a few weeks: They have to follow the orders set in each state, and many of those are open ended or could be extended at any time. They are worried that opening too soon could be seen as irresponsible. And even if they did reopen, would customers come if the virus isn't under control?"

POLITICO Pro COVID-19 Coverage: In order to help you stay ahead of rapid shifts in public policy as the federal government, states, and municipalities adapt and coordinate responses, we are sharing our top COVID-19 coverage here<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0f0209fa6b14d493b7e7c4a2e67f15230101d191c4b74461785a75ba083c33acc0cbcb9f7ec2236> in front of the POLITICO Pro paywall. BEYOND THE BELTWAY -- "A Different Kind of Storm: New Orleans Facing Deadly Virus Outbreak," by NYT's Katy Reckdahl, Campbell Robertson and Richard Fausset in New Orleans: "According to one study, Louisiana, with nearly 1,800 cases as of Thursday morning, is experiencing the fastest growth in new cases in the world; Gov. John Bel Edwards said on Tuesday that the current trajectory of case growth in Louisiana was similar to those in Spain and Italy. This week, President Trump approved the governor's request for a major disaster declaration, which unlocks additional federal funding to combat the outbreak."
"The situation in and around New Orleans is particularly acute, with the city reporting 827 confirmed cases as of Wednesday night, more than the total number of cases in all but 15 states. Hospitals are overwhelmed and critical safety gear is running low."

NYT<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0cc514200ddf744e6489bcb721158e5fbdb514ffbf2c51f0e5d2b5f078137f5d920f0b8b6a7b9f95b5>

-- BAY AREA REPORT: "All eyes on San Francisco Bay Area as nation's social distance bellwether," by Victoria Colliver In Oakland, Calif.: "Besides being the tech capital of the world and home to cutting edge biomedical research, the region of 7 million people has everything from the cosmopolitan high-density city of San Francisco to expansive suburbs and rural enclaves, all in relative proximity.

"But even in a region that prides itself on always being one step ahead, public health officials for now are still forced to rely on insufficient data, experience from other countries and anecdotes to determine if and when the contagion is flattening out." POLITICO
California<http://go.politicoemail.com/?qs=ac1bdf8d59248fd00e00e8b6f0f4ac7ab9d1ddf764fe3910e68887ee007379ba32c4b7aa04bf298d894d10e379cc2b88>

THE IMPACT -- "Surging Traffic Is Slowing Down Our Internet," by NYT's Cecilia Kang, Davey Alba and Adam Satariano: "[L]ast week, as a wave of stay-at-home orders rolled out across the United States, the average time it took to download videos, emails and documents increased as broadband speeds declined 4.9 percent from the previous week, according to Ookla, a broadband speed testing service. Median download speeds dropped 38 percent in San Jose, Calif., and 24 percent in New York, according to Broadband Now, a consumer broadband research site.

"Quarantines around the world have made people more reliant on the internet to communicate, work, learn and stay entertained. But as the use of YouTube, Netflix, Zoom videoconferencing, Facebook calls and videogaming has surged to new highs, the stress on internet infrastructure is starting to show in Europe and the United States — and the traffic is probably far from its peak." NYT<http://go.politicoemail.com/?qs=ac1bdf8d59248fd080e1210f9e725e5a631afa5a9cd12c341f323ebec04e479a9c03dba990c50c59773a31982a048d7b>

WAR REPORT -- "Militants in Iraq Take Covert Approach to Anti-U.S. Campaign," by WSJ's Isabel Coles in Beirut and Ghassan Adnan in Baghdad: "Marking a shift in a campaign the U.S. has blamed on established Iraq-backed militias, an unknown group calling itself the League of Revolutionaries claimed responsibility for the most recent deadly attack, when rockets fired at an Iraqi base on March 11 killed two American troops and a British soldier ...

"By forming new groups, militants can attack U.S. troops while denying the involvement of established groups such as Kataib Hezbollah, which has vowed revenge for the killing of Gen. Soleimani and an Iraqi commander, who together oversaw militia groups in Iraq." WSJ<http://go.politicoemail.com/?qs=ac1bdf8d59248fd03b87372249bcafe6f5ce1f09aed94e57f4af0eaa777cf88930166b50691fd83174f3ef049f45b1721>

IN MEMORIAM -- "Daniel Greenberg, who brought a critical eye to science journalism, dies at 88," by WaPo's Emily Langer: "Mr. Greenberg was best known as the editor and publisher of the newsletter Science & Government Report, which he founded in 1971 and produced for nearly three decades. ... At [the journal] Science and later with his newsletter, Mr. Greenberg distinguished himself with the critical — some detractors said cynical — approach that he brought to the beat, offering what the magazine the Nation once described as 'a square meal for those woozy from the puffery and piety served up by most science journalists.' ...

"His newsletter subscribers never numbered more than 2,000, according to his wife, but they included top scientists and science policymakers in the United States and around the world." WaPo<http://go.politicoemail.com/?qs=ac1bdf8d59248fd0f2b073099d3b9a40cd8048002dc5570765142cba951ad8a4589c189c450c06037b6c55051cf4fc96>

Subject: [EXTERNAL] USPS lack of action to protect the employees.

Dear PMG Brennan,

I send this email as a concerned postal carrier. Like so many others, I am afraid and concerned at this uncertain time pertaining to COVID-19. And I can’t for the life of me understand why the USPS national management hasn’t taken every possible action to not only protect us, but to protect the longevity of continuous service during this period. I’ll start with a couple of simple measures that would help slow this down within our service.

1- Amazon Sunday delivery
This is a no brainer. Currently we have people from 6-7 offices congregate in one location within district. We should have immediately gone to the “holiday procedure” and adjusted logistics with amazon and ups to deliver out of each individual office. This would limit potential spread to multiple offices within me district.

2- plastics
COVID-19 can survive on plastic for 3 days as opposed to cardboard and paper for 24 hours. We should have immediately MANDATED all shippers ship utilizing paper products and eliminate plastics during this period.

3- shorten retail window hours temporarily. Again... unbelievable we haven’t done this.

I am only a lowly shop steward. I’ve stated these thoughts to my postmaster as well as the Union. And I’ve been saying it for two weeks.
I plea to you... protect us more and the service. Please consider these measures to help us remain working to serve the USPS.

Sincerely,

(b)(6)

USPS RCA
Shop steward (b)(6) NJ
(b)(6)
Thanks,

Megan

Subject: [EXTERNAL] COVID-19 out of control

My name is (b)(6) and I am the proud President of the (b)(6) Postal Union APWU. I am sending you what I like to call a love letter on behalf of my membership and quite frankly all postal workers throughout this country.

I asked that you temporarily close all postal facilities because the spread of the COVID-19 virus is getting worse every day and I am simply out of words of comfort and support for my members that are in the eye of this storm.

This temporary closer will allow the postal Service to get the necessary safety supplies and equipment to give the postal workers and the postal service a better chance of survival and victory.

I’m on the frontline and have been given the displeasure of COVID-19’s impact not only on the postal service but on America itself. Postal worker don’t mind fighting but please give us a chance to win. Which we presently don’t have, as I will now explain, why!

I literally was on the phone today with many of my members screaming at me to do something I don’t want to die. How do you respond to a statement like that? The more they hear about their co-workers contracting the virus the more scared they become. This is not just co-worker relationship. Many of your employees are like family and they are watching their family get sick right in front of their eyes. Not just from the Virus but from stress and anxiety and the constant pressure from their management team to work fast instead of safe especially at a time like this.

Miss Brennan the Postal Workers want to hear it come directly from your mouth that there is nothing to fear. In the NY District we currently have 12 confirmed positive cases of the Coronavirus with many more presumed positive diagnosis.
This situation is about to blow up especially in NY City. The White House expert doctors has suggested that everyone in NY City or that has been to NY City needs to self-quarantine themselves for 14 days. You think the Postal workers don’t hear this news.

You cannot expect the unions to convince the employees that if they come to work they have nothing to worry about, they can see what’s going on all around them with the streets of NY practically empty. I cannot and will not lie to my membership.

Management refuses to use common since and chooses to not respond to many of the unions concerns about the hazardous conditions they are asking these employees to endure. Management is trying to act like everything is normal. I believe that if management would drop the phony façade and genuinely admit this is a bad situation and things aren’t ok the employees would be more willing to pull together. Management has created an atmosphere that it’s us against them. Would you want to work for someone that you don’t believe has your back?

If you gave the bargaining unit employees all the safety supplies and equipment they should have readily at their disposal, they would still be working in a very hazardous work environment but when you don’t supply these basic needs now you’re asking them to commit suicide.

The union says the station does not have hand sanitizer and managements reply is then go use soap. There are no gloves, mask or wipes. Managements reply is there on back order or no one can get supplies right now. Unacceptable and instantly kills the bargaining unit employees moral.

When you refuse to temporarily stop all contractor work in the facilities. Management is asking the employees to endure the dust and the dirt as well as their fear of COVID-19. This causes the employee to sneeze and cough releasing the dangerous droplets from your mouth and nose into the work environment. Common since!

You might say, then the employees should wear mask but last week your management team and postal nurse was telling them they didn’t need mask unless they are sick. What is the truth and where is your compassion.

When you refuse to enforce the no more than 10 people congregating in any one place as recommended by the CDC, yet there are 40 people allowed in the lobby of the Post Office giving the employees no chance to practice social distancing. This is not a message that the Post office cares about its employees or that the post office is really following the CDC recommendation. The CDC has become an excuse not to use common sense.

Not staggering the employees BT forces all of the workforce to be at the time clock at the same time social distancing right out the window, CDC regulations right out the window because it’s not covenant. Something this simple to make the Postal workforce feel you care.

When you sign a MOU for dependent care but intimidate anyone who chooses to use it, by requiring them to submit their child’s birth certificate as proof or a note from the school. Really, the employees are going to get a note from a school that is closed? Why isn’t the employees word good enough you want them to take managements word about the security of their work environment, safety and health.

Postmaster Brennan this situation is out of control, I’m asking you to be proactive and not reactive. Here are some very simple ideas since I’m sure you won’t do the most practical thing and temporarily close the post office, even if it was only for three or four days it would show the employees you care.

1. Employees can work on odd and even days this way you can reduce the workforce on any given day allowing the operation to function while allowing social distancing production will be slower but it will be safer.
1. Put out and MOU that no employees should be force to work without gloves, mask hand sanitizer, wipes this will put the responsibility where it belongs on the management team.

Article 14 of the CBA says it is the responsibility of management to provide safe work conditions in all present and future installations. Is it too much to ask you to honor this oath?

1. Make social distancing mandatory and not optional.

1. Solicit volunteers to help with the cleaning temporarily on overtime after maxing out all of the custodians overtime.

I have a lot more ideas and would hope you would want to consider them. This email provides my contact information.

Thanking you in advance for you consideration.

A Man is what he does, not what he says
Thank you.

Megan

The White House and Senate leaders reached a deal early Wednesday morning on a massive stimulus package they hope will keep the nation from falling into a deep recession because of the coronavirus crisis.

The agreement caps five days of intense negotiations that started Friday morning when Senate Majority Leader Mitch McConnell (R-Ky.) convened Republican and Democratic colleagues, and stretched late into the evening Saturday, Sunday and Monday.

"Ladies and gentleman, we're done. We have a deal," White House legislative affairs director Eric Ueland told reporters after one of the final meetings in McConnell's office after midnight Tuesday night.

House Democrats Act Rapidly to Save Postal Service from Bankruptcy As a Result of Coronavirus Crisis

Washington, D.C. (Mar. 23, 2020)—Today, Rep. Carolyn B. Maloney, the Chairwoman of the Committee on Oversight and Reform, and Rep. Gerry Connolly, the Chairman of the Subcommittee on Government Operations, issued the following statement after House Democrats introduced a stimulus package with emergency funds to save the Postal Service from imminent bankruptcy as a result of the coronavirus crisis:
“The Postal Service is in need of urgent help as a direct result of the coronavirus crisis. Based on a number of briefings and warnings this week about a critical fall-off in mail across the country, it has become clear that the Postal Service will not survive the summer without immediate help from Congress and the White House. Every community in America relies on the Postal Service to deliver vital goods and services, including life-saving medications. The Postal Service needs America’s help, and we must answer this call.”

According to the Postal Service, it is facing a potentially drastic direct effect in the near term on mail volumes and could be forced to cease operations as early as June.

A halt in Postal Service operations could have grave consequences across the country. For example, the Postal Service delivered more than a billion shipments of prescription drugs last year, and that number is expected to grow rapidly as a result of the coronavirus crisis.

These negative effects could be even more dire in rural areas, where millions of Americans are sheltering in place and rely on the Postal Service to deliver essential staples.

In addition, more than 25% of votes cast in recent elections are distributed through the mail and are critical to America’s democracy.

The resources included in the Take Responsibility for Workers and Families Act, would:

- provide a $25 billion emergency appropriation;
- eliminate the Postal Service’s current debt; and
- require the Postal Service to prioritize medical deliveries and allow it flexibility to meet crisis conditions.

###

Senate on cusp of coronavirus stimulus deal after agreements in key areas Alexander Bolton

Senate Democratic Leader Charles Schumer and Treasury Secretary Steve Mnuchin are on the cusp of a deal for a massive coronavirus stimulus package after settling disagreements over relief for the airline industry, beefed-up unemployment benefits and money for hospitals.

Democratic senators participated in a briefing call Monday night on the latest developments in the negotiations and a vote is expected as soon as Tuesday.

Schumer provided an optimistic update on the Senate floor after his fourth meeting of the day with Mnuchin, which ended shortly before 9 p.m.

"Secretary Mnuchin just left my office. We have had some very good discussions, and in fact the list of outstanding issues has narrowed significantly," he said, promising to "work on into the night."

In a key concession to the administration, Democrats have agreed to $25 billion in grants to U.S. airlines and $4 billion for cargo air carriers, according to text excerpt of the emerging deal.

Schumer is still waiting on written language from Mnuchin limiting stock buybacks and executive compensation for companies that accept billions of dollars in assistance from U.S. taxpayers.

Republicans want to limit executive compensation based on 2019 earnings, a lucrative year for corporate America, while Democrats want the limit based on a multiple of median worker salaries.

In a significant concession to Democrats, the emerging deal would provide bumped-up unemployment benefits for four months — a substantial increase over the three months of augmented unemployment benefits proposed by Republican negotiators, according to a person familiar with the briefing call.

Republicans have also agreed to provide $100 billion in funding for hospitals, $25 billion more than the proposal drafted in recent days by Republicans on an emergency supplemental spending package, according to the source familiar with the call.

The emerging deal would also provide $30 billion for care of people who fall ill from COVID-19.

The bill is also expected to provide $200 billion for various “domestic priorities.”
Republican scored a major victory by securing at least $500 billion for the Treasury Department to authorize more than $4 trillion in liquidity to distressed industries — which could provide a major boost to corporate balance sheets and financial markets.

The money will be leveraged at a ratio of 10 to 1, giving Fed broad ability to make loans.

Aside from finalizing language on stock buybacks and executive compensation, a few other issues need to be resolved.

Democrats on Monday’s briefing call were not given any update on whether the bill will address their concerns over language that would exclude Planned Parenthood from being eligible from receiving Small Business Administration assistance.

Sen. Tim Kaine (D-Va.) announced on the Senate floor after the call that he believed the negotiators were close to a final agreement.

“I don’t like watching stem-winding speeches from the floor blaming who’s responsible for not being able to pass a vote when I know 20 yards away the White House is sitting down with Democrats and we’re getting closer and closer and closer ... [to] a Package that can gain bipartisan acceptance,” he said.

Thanks,

Megan

"If you see something, say something." (Janet Napolitano, former Secretary, Dept. of Homeland Security)

Dear major stakeholders/decision-makers,

I’m writing to you now to alert you to a major issue affecting our Safety/Health/Well-being. At the time of writing this email (3/22), the (b)(6) (PA) has 40 confirmed coronavirus cases. Unfortunately, the concerns raised by me in Memo emailed on 3/09 & 3/17 are still not being addressed (hence, I’m forced to bring these matters to a wider audience of stakeholders/decision-makers). More specifically:

(1) I was absent 2/28 - 3/04 for a respiratory illness, with a doctor note from an Urgent Care facility. This facility, as well as many Urgent Care providers and E.R utilize a standard pre-printed form with wordings similar to "We urge employers/school treat this as an excused absence" that are accepted by a vast majority of employers in Pittsburgh. Many treating physicians at these facilities would not provide any wordings similar to "incapacity/incapacitated-to-work" because "the standard form is what's being approved by management of these medical facilities."
(2) In my two previous memo (on 3/09 & 3/17) and in my meeting with H.R Manager Lori Price on 3/10, I urgently
implored the local management to remove any/all impediments to employees from "staying home when they're sick"
per guidance by CDC and the Post Master Megan Brennan because:

a) During this exceptional time of coronavirus outbreak, it's hard to get doctor appointments (unless in dire
circumstances requiring visiting ER) and many medical facilities (including ER, Urgent Care) would provide standard-form
doctor's note, but not to the specificity of wordings "incapacity/incapacitated to work."

b) In my own experience, for my absence 2/28-3/04, my doctor's note was rejected by local management
because of the lack of the wordings "incapacity/incapacitated to work." As the result, I was charged LWOP (unpaid) and
may possibly be changed to AWOL eventually. As of today 3/22, no adjustment was made from LWOP for the absence
2/28-3/04 nor there are any indications from managements or my union about any changes are forthcoming.

c) As noted in my two previous memo (on 3/09 & 3/17), being charged unpaid LWOP for legitimate illness
discourages employees from "staying home when you're sick" affecting the employees' financial well-being (with some
 carriers in reserved military positions at risks of losing governmental clearances due to missed loan/child-support
payments caused by being unpaid) and affecting their healing process due to stress/worrying about finances.

d) As noted on 3/09 memo: Congress currently works on providing sick-leave to the most vulnerable group of
workers: Uber/Lyft gig workers and low-paid restaurant workers (busboy, servers, line-cook, dishwashers). While mail-
carriers have sick-leave, being charged LWOP for calling in sick and/or being charged LWOP or AWOL for having doctor's
note not complying to "incapacity/incapacitated to work" wordings requirements would have the effect of discouraging
employees from "staying home when you're sick." Without payment while sick, mail-carriers are treated no better than
Uber/Lyft gig workers and the mentioned restaurant workers.

e) According to 3/13/2020 updated Supervisor & Management Guidance, local supervisors were instructed to
"allow liberal sick leave usage for employees who are sick." However, as noted in my 3/17 memo, I was pressured by my
local management (b)(6)ourd to come back to work even though I was sick and there was no
objective review of my Unscheduled Leave usage between 3/05 - 3/15.

f) Per my discussions with (b)(6) Stewards and union VP (b)(6), my personal experience (as described
above) was hardly unique, many carriers at my stations and many other stations has experienced the similar
impediments to "stay home when you're sick." The guidance for local supervisors of "allow for liberal sick leave" are
being applied unequally -- with some 'favored' employees don't need doctors' note at all while some 'disfavored'
employees are being faced disparate treatment: with many obstacles to "stay home when you're sick" such as: being
charged LWOP upfront (this was a policy by local supervisor at Grant St office as of 3/09), or being requested extra
medical documentation with specific wordings or else being charged LWOP, AWOL and threatened with discipline
without objective investigation.

One important point I’d like to raise to your attention: With more business (restaurants ...) being closed except for
groceries and medical facilities, are there plans by local management/supervisors to ensure all mail-carriers know where
to take comfort stops to ensure mail-carriers stay compliance with CDC guidance of following sanitary/hygienic practices
at all time (including while on street)?

In conclusion, I understand that the "incapacity/incapacitated to work" wordings requirement has a long history, But
this is unprecedented time. We're fighting an unprecedented communicable outbreak that moves at warp speed. For
this reason, I again urgently implore you to remove any/all impediments for employees from "staying home when you're sick" which includes being paid for being home while sick.

I also wish to have my all 3 memos being discussed/reviewed with the Safety/Health committees at the USPS and the
NALC because all issues raised in all 3 memos affect our Safety/Health/Well-being.

Sincerely yours,

(b)(6)  -- a mail carrier at (b)(6), and an assistant to steward (b)(6)

-------- Forwarded message sent on 3/17/2020 --------
Subject: Follow-up-Memo on Coronavirus Response (Previous Memo on this: 3/09/2020)
To: Susan Taylor, Lori Price, David Trainer
CC: [redacted]

Dear Ms. Taylor, Ms. Price and Mr. Trainer,

I'm writing to you now to alert you to a major issue affecting our Safety/Health/Well-being. Despite risks to myself, I have to speak up, in the spirit of See Something, Say Something -- (according to the Department-of-Homeland Security former Secretary Janet Napolitano "If you see something, say something.")

As of today 3/17/2019, the U.S President, the CDC and the Postmaster Megan Brennan all say simply "Stay home when you're sick." Period. No ifs or buts.

However, my own experience show that [redacted], my supervisor [redacted] and manager [redacted] are pressuring me to return to work even though I'm still sick. Here are the facts:

a) Tuesday 3/17/2020, Supervisor [redacted] called me at 6:09 AM (because I called repeatedly to all 3 [redacted] phone numbers 5:45 AM-6:00 AM to call in sick for the day but no Supervisor was there). She told me that I have to bring in doctor note that say "incapacitated to work" because she said that I'm on the "Deems Desirable" list.

b) On Monday 3/16/2020, I asked for clarifications with [redacted] because there seems to be a confusion on: i) whether any documentation, including document signed by me or steward would suffice for people on "Deems Desirable" list and ii) medical documentation, according to the research I conducted, are required only for those on "Restricted Leave" which I'm not on it as of 3/14.

c) On Monday 3/16/2020, [redacted] communicated back to me after calling manager [redacted] said "he said you better return or else he probably putting you on 'deems desirable'"

d) As detailed in the section below my signature below, reviewing all paystubs since 7/01/2019, there were only 3 occurrences of Unscheduled Leave (including the most recently one 2/28/2019-3/03/2010) and there were no mention of me being considered for Restricted Leave/Deems-Desirable between 3/05/2020-3/14/2020.

e) On Tuesday 3/17/2020, I tried my best calling my doctor office, MedExpress UrgentCare, Steel Valley Express Care. As of right now, my situation is not dire to the level of going to the E.R. so, I opted not to go to the E.R (yet). All these medical facilities that I contacted, they're completely booked, so, it will be difficult for me to get a doctor appointment today 3/17/2020.

Although I will try again this afternoon, it's only 2:00 PM of today (3/17), even if I successfully get a doctor appointment, my own past experiences showed that I may not get a doctor who is willing to write the exact words "incapacitated" or "incapacity to work." As you see from the attachment, I have a doctor note from an Urgent Care facility dated 3/02/2020, it said "We (the Urgent Care) urge employers to consider this an excused absence." I checked my paystub today 3/17 and found out that I was charged LWOP for my previous absence 2/28-3/03 (4 days). Similarly, in discussing with stewards and other mail-carriers, wordings such as "doctor order patient XYZ 3 days of rest" or "patient XYZ is unable to work for 3 days" etc ... maybe rejected because of the lack of the specific wording "incapacitated" or "incapacity to work." I found out from my own experience that some physicians offices, including Urgent Care and ER have a standard form of "doctor note" that doesn't say "incapacitated/incapability-to-work" and treating doctor would refuse to write these specific words because "this form is what being approved by corporate office managing these medical facilities".

Thus, if I'm able to get a doctor appointment, which is difficult because of heightened demands from people seeking treatments in the middle of coronavirus outbreaks, I maybe unable to obtain a doctor's note that pass muster of USPS management of having specific keywords "incapacitated/incapacitated." Without a doctor’s note that comply to this specificity, I'm at risk of being denied paid sick-leave, and being charged with "LWOP" or even worse, being charged AWOL.
Hence, even though I'm still sick and/or in possession of a doctor's note, I may still be charged LWOP or even AWOL because the lack of "incapacity/incapacitated to work" wordings. Thus, I'm forced to go back to work, even though, I'm still sick, against the guidance of "stay home when you're sick by the Postmaster Megan Brennan and the CDC.

Call for action: I urgently implore you, the upper managers of the USPS Pittsburgh post-office, to suspend the rule requiring "incapacity/incapacitated" and remove any/all impediments to "stay home when you're sick," including a list of specific concerns listed in my memo on 3/09/2020. What if doctor order me to stay home in order to stop spreading disease, I'm technically still 'able to work' and not qualify for the wording "incapacitated to work", will I be charged AWOL or LWOP?

Additionally, the "p-bottles" unsanitary/unhygienic activities I described in my 3/09 memo still continue, with some mail-carriers described to me seeing actual bottles left behind in the postal vehicles. H.R manager (b)(6), in a 3/10 one-on-one meeting with me, flippantly dismissed such concern with "since you don't have proof, it didn't happen."

During the period of 3/05/2020-3/14/2020, there was no discussions/investigations regarding my Unscheduled Leave record from any management staff, including H.R manager (b)(6) at the 3/10 meeting Price/Tran. As of 3/14/2020, there was no indication that I was on any Restricted Leave list or Deems-Desirable list. Suddenly, I'm informed on 3/17 that I'm on Deems-Desirable list. This maybe a result of me being treated differently for being: a member of Asian American community, a member of LGBTQ community, or being outspoken about coronavirus response/preparedness by the USPS. As summarized in the reviewing of my paystub records 7/01/2019 to 3/14/2020, there are only 3 occurrences of Unscheduled Leave. Thus, what objective investigations had supervisor (b)(6), manager (b)(6) conducted between 3/05/2020 and 3/14/2020 that justify putting me on Deems-Desirable list. If no such justification exist, this is potentially an evidence of discriminatory supervisory/managerial intimidating tactics (for speaking out) which has the effect of discouraging employee to "stay home when you're sick."

==================================
In reviewing my paystubs from 7/01/2019 to 3/14/2020:
My previous Unscheduled Leave since 07/01/2019 include:
  i) one occurrence 2/28/2020 - 3/03/2020.
  ii) one occurrence on 1/15-1/16 (count as one occurrence)

The following were NOT Unscheduled Leave:
  a) one occurrence during Pay Period 15: 7/06/2019-7/19/2019
  b) one occurrence during Pay Period 17: 8/03/2019-8/16/2019 ==----------------------------

I raised many issues in my 3/09/2020 memo. Ms. Lori Price paid lip-service in meeting me on 3/10/2020 but as far I know, nothing happened.

Sincerely yours,

(b)(6)

Attachment are 3 pictures:
  _ Doctor Note dated 3/04/2020 stated "Doctor examined (b)(6) We urge employers to consider this an excused absence."
  _ Virtual TimeCard on 3/17/2020 showed that I'm allowed Sick-Leave for 3/16 and 3/17.
  _ Online Paystub dated 3/17/2020 showed that I'm still charged LWOP for the absences 2/29-3/03

For your convenience, my previous memo on the subject is included here.

A) About the Author:
   Trained at a premier university, prior to joining the USPS in November 2016, through my employment with federal contractor Booz Allen Hamilton in Washington D.C., I worked as a senior technical consultant (for 7+ years) for many federal agencies including FEMA and the FBI Headquarters. There was an attempt in 2018 (by the managerial staff‐members at the office) to smear/besmirch my reputation but I prevailed in the end. Nevertheless, my long tenure working for federal agencies provide credence to my statements here. In my less than 3.5 years with the USPS in Pittsburgh, I was either affiliated and/or worked at 8 different Postal offices: (b)(6). As the result, I've gained many contacts and unique insights of the activities/concerns at quite a large selection of Pittsburgh postal offices -- this memo is the consequence of what I've learned through these contacts.

B) Problem Statements/Scenarios:
   As an Asian American, I'm acutely aware of the coronavirus risks. The good news: Many people who are infected will eventually recover from it. The bad news: Many 80+ years old people died because of it. Indeed, 60+ years old with weak immune system or people with underlying medical conditions are at seriously risks. I myself delivered mails to 5-7 hi‐rise apartments complexes in the office and encountered many elderly/retirees people in the lobby of these apartments. On several occasions (at these locations), while putting mails into cluster‐mailboxes, I sneezed and coughed and attracted stares from the elderly customers. Some even asked loudly: "Where's your mask? Where's your hand‐sanitizer?" In addition, my own mother is 80+ years old.

   Mail‐carriers' exposure to the coronavirus: I myself shop weekly in Asian supermarkets and attend religious buildings frequented by Asian community (Catholic, Buddhism …) which are congregated by many people with travel histories to coronavirus hard‐hit regions of China/South‐Korea. Our office delivers to University and University with a students body with worldwide travel history. Furthermore, many CCAs and fulltime‐carriers at the bottom‐run of the payscale (first year, second year fulltime) supplement their postal incomes with Uber/Lyft gigs which bring additional risks of exposure with infected Uber/Lyft riders from the airport ...

   Bottom‐line: Even though mail‐carriers maybe OK from the virus -- our customers and loved ones at home maybe put at risk through our interactions with them. If several elderly/retirees apartment complexes experienced an explosion number of coronavirus infections and the mail‐carrier is the common link between them -- I'm pretty sure that's an outcome we all want to avoid. because the media will be all over it.

C) USPS follows CDC guidance on Coronavirus:
   According to the "USPS publication" (link: https://link.usps.com/2020/02/11/coronavirus-update ), the USPS follows CDC guidance, which outlined two broad recommendations:
   1) Recommendation 1: Advice on sanitary/hygienic practices: frequent hand‐washing, avoid touching eyes/mouths ...
   2) Recommendation 2: Stay home when you are sick.

   Please note that CDC says simply "stay home when you're sick" because:
   (a) As of 3/8/2020, the test kits for testing coronavirus was slow to be made available widely
   (b) Many symptoms for coronavirus overlap with many other respiratory illness such as: strep‐throat, annual influenza, seasonal allergy and even common cold
   (c) People with coronavirus infection may be asymptomatic (i.e: has no outward symptoms), but are still capable of spreading the virus.
(d) The advice of "stay home when you are sick" -- according to medical experts, are meant to reducing further infection of any respiratory illness at the workplace.

D) Our failures in implementing CDC Recommendation #1:
   i) Lack of hand-sanitizer and mask at our case-station (at the post office) and travel-size hand-sanitizer in our postal vehicles. Mail-carriers want to avoid sneezing/coughing at the letters/magazines/catalogs.
   ii) CDC advises "wash hand regularly" -- we lack alcohol based washing mechanism while on the street (in our postal vehicles).
   iii) The use of "personal bottles" (abbreviated as "p-bottles") by certain segment of mail-carriers, especially among the CCAs (on their regular mail duties as well as Amazon runs on Sunday/holidays). In addition to the cringe-induced reactions, this practice is certain to qualify as "unsanitary and unhygienic," and totally against the CDC-induced recommendations.

Suggested solution to fighting (iii) the usage of "p-bottles": educating the mail-carriers about taking time for comfort-stops (and travel time to find the nearest accommodation), educating the mail-carriers on morning vehicle-inspection to include inspecting the postal vehicle’s interior (with a smell-test). Most importantly, supervisors must be educated on not pushing the CCAs to the point of avoiding comfort-stops and forced them to employ other unsanitary/unhygienic activities. This should continue even after the coronavirus problem is solved.

E) Our failures in implementing CDC Recommendation #2 "stay home when you're sick":
   i) Supervisors charging LWOP "Leave Without Pay" on mail-carriers calling in sick: This happened to me. I called in sick for 4 days, I have a doctor’s note and was not on any Restricted Leave list. I was charged LWOP for my first-day of sickness, automatically, without the supervisor asking whether I would like to use Sick Leave or Annual Leave (which I do have available balance) for it. Two stewards at Grant St that automatic-charging of LWOP on sick-calls automatically has long been a policy at the Grant St station. I commend manager (b)(6) for looking into reviewing it when I brought up the issue to him. However, Union VP Pat Rothwell certified that charging LWOP on sick-calls are going on everywhere in Pittsburgh. It takes up to 2 months for the grievance process for the mail-carrier to be "made-whole" (i.e: changing LWOP to either sick-leave or annual-leave). Meanwhile, the LWOP has the effects of discouraging employees to "stay home when you're sick" per CDC guidance. Manager said that the LWOP was intended for fighting sick-leave abuses but there are other tools to fight that (as described below). Also, 1-2 sick-leave abusers can't be the reason for charging LWOP automatically on anyone calling sick.
   ii) Wrangling over "doctor's note" wordings on "incapacity to work": Upon returning from sickness, I submitted a doctor's note stating "The doctor has examined the patient. The patient is fully able to return to work with no restrictions on date AA/BB/CC. We urge employers to consider this an excused absence" -- I have experienced inconsistencies of acceptance of such doctor's note among supervisors/managers at various postal offices -- even though I submitted same standard-form doctor's note from the same medical provider (an Urgent Care facility). One supervisor claimed "oh, it didn't say incapacitated" Yet, at least 3 different supervisors/managers at different office accepted the form just fine. The standard-form issued by the Urgent Care facility are accepted by employers all over the city yet are rejected by a few supervisors because it didn't say "incapacitated" and require 2-months of wrangling via the grievance process for the doctor's note to be accepted finally. The end-result is the same: discouraging employees from taking sick-leave while the CDC guidance says "stay home when you're sick."

Analysis 1: Financial effects of LWOP on mail-carriers: Many mail-carriers live paycheck-to-paycheck with many financial obligations: House mortgage/rentals, car payments, student loans payments, child-support payments. Many USPS mail-carriers are also active members of the military reserve forces with some require governmental clearances (which are at risk of losing clearances due to missed loan payments). Psychological effects include: Our abilities to heal from illness are reduced by financial concerns and the uncertainties of 2-months grievance-handling process.

Analysis 2: USPS already have other tools to fight fraudulent sick-leave abuse: Utilizing the Postal Inspector, the USPS can document fraudulent sick-leave abuse if someone call sick but go out fishing. The USPS currently employs teams of "watchers" who monitor social networks (Facebook, Instagram, Twitter) to find evidences of abuse.
Analysis 3: USPS already have "claw-back" mechanism for overpaying: If it is decided that a mail-carrier was paid sick-leave/annual-leave improperly, the USPS can always send a "Notice of Demand" to collect overpayments. The USPS should change the policy to allow sickleave/annual-leave as requested by the employee at the time of calling in sick and use claw-back mechanism later if needed.

Analysis 4: Comparison of LWOP and Uber/Lyft workers: Analyzing the media coverage, one major issue is the lack of sick-leave for gig-employees (Uber/Lyft) and employees of the low-wage restaurant industry (food servers, line-cooks, dish-washers ...). Mail-carriers have sick-leave, but unable to be paid immediately due to LWOP and must wait 2 months (for the grievance handling) to be paid -- then, mail-carriers are treated no better than the other workers with no sick-leave benefits at all.

Analysis 5: Conflicts between "Pay For Performance" evaluation of supervisors/managers vs. CDC guideline: Supervisors/managers are evaluated annually for Pay For Performance ratings/rankings. Utilization of Overtime Pay and utilization of Unscheduled Leave are major components of such evaluation. However, as described in this section. Such overemphasis on reducing Overtime Pay and Unscheduled Leave lead to policy implementations (such as charging LWOP for sick-calls and wrangling over doctor’s note) that has an effect of discouraging employees to "stay home when you're sick."

In summary, for all of the foregoing reasons, we are woefully unprepared for the coronavirus. It behooves me that if this is the first time you hear about these concerns, then what’s going on with the Safety & Health Committees at the USPS and at the NALC -- they are the ones who are charged with our Safety& Health. The coronavirus challenge is unprecedented in its speed. We need quick solutions such as: suspending these policies (charging LWOP, wrangling over doctor’s note) that discourage employees from "stay home when you're sick"). The supervisors/managers should be relieved of being evaluated on usage of Overtime/Unscheduled Absence due to the coronavirus challenge. Also, the "p-bottles" unhygienic/unsanitary practices must end ASAP.

Sincerely yours,

(b)(6)

McConnell Update on Coronavirus Aid, Relief, & Economic Security Act ‘I believe Senators on both sides and the Administration have been encouraged by our discussions. Republicans and Democrats have worked together to produce a compromise that should be able to pass the Senate with an overwhelming bipartisan majority.’

WASHINGTON, D.C. – U.S. Senate Majority Leader Mitch McConnell (R-KY) issued the following statement regarding the Coronavirus Aid, Relief, and Economic Security (CARES) Act:

“The past two days of intense bipartisan talks are very close to a resolution. I believe we are poised to deliver the significant relief that Americans need with the speed that this crisis demands.

“The legislation we are finalizing addresses all four of the crucial priorities that Senate Republicans laid out earlier this week. It will send direct relief to the American people, deliver historic assistance to small businesses so workers can keep getting paid, help secure our economic foundations and prevent layoffs, and -surge more resources onto the front lines of our brave healthcare professionals’ fight to defend Americans and defeat the virus.

“I believe Senators on both sides and the Administration have been encouraged by our discussions. Republicans and Democrats have worked together to produce a compromise that should be able to pass the Senate with an overwhelming bipartisan majority.

“I have asked committee chairmen to draft final legislative text that reflects their compromise products and deliver that text later this evening.

“This would allow all Senators to review the complete bipartisan text in advance of our first procedural vote at 3:00pm tomorrow.”

###
“We Need to Finish Up These Negotiations and Move Forward”

‘Senators’ bipartisan discussions continued all day yesterday and through the night. Both sides’ negotiators, with the Administration, are continuing to work toward a bipartisan agreement on major legislation to support American workers and families, protect small businesses, help stabilize our economy, and put more resources on the front lines of our healthcare battle against the coronavirus... It is time to come together, finalize the results of our bipartisan discussions, and then close this out.’

WASHINGTON, D.C. – U.S. Senate Majority Leader Mitch McConnell (R-KY) delivered the following remarks today on the Senate floor regarding the Coronavirus Aid, Relief, and Economic Security (CARES) Act:

“We senators’ bipartisan discussions continued all day yesterday and through the night.

“Both sides’ negotiators, with the Administration, are continuing to work toward a bipartisan agreement on major legislation to support American workers and families, protect small businesses, help stabilize our economy, and put more resources on the front lines of our healthcare battle against the coronavirus.

“As of now, an agreement has yet to be finalized. But our committee chairs, their Democratic counterparts, and President Trump’s representatives are making important progress.

“Yesterday, I took action on the floor to keep this process moving with the urgency that it demands.

“By rule, it set up our first procedural vote for tomorrow. And then on Monday, the Senate will vote on passage.

“It has only been two days since Senate Republicans introduced the Coronavirus Aid, Relief, and Economic Security Act, to give shape and structure to these urgent discussions.

“We put forward four objectives:

1. Put emergency cash in the hands of individuals and families, as quickly as possible...

2. Deliver the major relief that American small businesses need at this unprecedented time, and deliver it fast...

3. Help bring some stability to our economy and prevent as many layoffs as possible...

And 4. Continue to rush resources to the frontline healthcare workers and providers who are treating patients.

“And perhaps most important of all, we looked specifically for policies that could do all of the above as quickly as humanly possible.

“Small businesses across this country have made it clear: If they’re going to keep their lights on and keep their employees on payroll, they need help and they need it now.

“Americans who have already been laid off due to this crisis have made it clear: They need help and they need it now.

“Key national industries, which are hemorrhaging business through no fault of their own but due to the government’s own public health guidance, have made it clear: In order to retain their workers, they need help and they need it now.
“And in particular, every single American who has opened a newspaper or turned on the television in the last week has heard from our brave nurses, doctors, first responders, and public health experts: If our nation is going to punch back and beat this virus, the people on the medical front lines need help and they need it now.

“Senate Republicans put out our starting proposal as fast as we could. Then, I created a structure for bipartisan discussions to begin as fast as they could.

“No legislation will move through the Senate that does not contain ideas from both parties. That is a fact, because of the way this body is designed.

“So these bipartisan talks have been essential. And they are ongoing. But what we need to do now is move forward.

“Two days ago, the press reported that a senior member of House Democratic leadership told his colleagues, quote, “This is a tremendous opportunity to restructure things to fit our vision.”

“Well, let me suggest that is exactly the wrong approach right now. That is exactly the kind of thinking that could bog down these urgent discussions. That is exactly the kind of mindset that the American people cannot afford for their elected representatives to adopt. I hope it does not describe the view of our own Senate Democratic colleagues as we close out these talks.

“More Americans are being laid off every day. More small businesses are being forced to shed payroll every day. Our nurses and doctors are running lower on key supplies every day.

“This is not a political opportunity. This is a national emergency.

“It is time to come together, finalize the results of our bipartisan discussions, and then close this out.

“Earlier this week, I had the Senate move quickly to pass the more modest bill that came over from the Democratic House of Representatives. I didn’t believe it was perfect — far from it.

“But Senate Republicans did not delay it needlessly. We did not try to originate our own version and burn several more days trying to fit them together.

“Instead, we treated that bill with the bipartisanship and the urgency that this crisis requires.

Since then, the situation has only grown more dire. So I hope that our Senate Democratic colleagues, and the Democratic House, will bring equal bipartisanship and equal urgency to this legislation as well.

“In closing, I think that all of us could take a lesson from our constituents. As we finish negotiating and finalize bold legislation, we should look to the American people.

“Everywhere you look, these past days, individuals, families, and organizations are stepping up to the plate and finding creative ways to serve those in need.

“One of my fellow Kentuckians is a woman named Erin Hinson. Erin lives in Louisville. She is someone whom doctors have told to be particularly careful these past few days, so her opportunities to pitch in were somewhat limited, but she was determined to do her part.

“Here’s what she said: “I may never have the capacity to develop a vaccine or a magic pill to get rid of COVID-19..., but I can master a spreadsheet.”
“Erin created a website — Louisville COVID 19 Match dot com. There is one sign-up sheet for neighbors who are older or at heightened risk, and another sign-up sheet for neighbors who are young and healthy. And Erin is performing a kind of match-making service.

“If someone needs a prescription picked up, or some groceries delivered, or even a friendly phone call, she helps make the connection.

“With a little help from local media, Erin is already tracking more than 400 volunteers, from every Louisville ZIP code.

“It’s the perfect manifestation of Kentucky’s state motto: “United we Stand, Divided we Fall.”

“United we stand — even if we have to stand six feet apart for a few weeks. And divided we fall.

“Brave, and generous, and creative Americans all across our nation get it.

“They just need their Congress to get it, too.

“I am impressed and heartened by the speed and bipartisan spirit that has characterized the past day’s discussions. But we need to keep it up. We absolutely cannot let up now.

“We need to finish up these negotiations and move forward.”

###
Rhonda,

Anytime he has tomorrow - day or night - 5 minutes

Pat,

Thanks,

Megan

Kushner coronavirus team sparks confusion, plaudits inside White House response efforts [Jared Kushner listens as President Trump meets with banking executives about coronavirus response in the Cabinet Room at the White House on Wednesday.]Jared Kushner listens as President Trump meets with banking executives about coronavirus response in the Cabinet Room at the White House on Wednesday. (Jabin Botsford/The Washington Post)

Jared Kushner, President Trump’s son-in-law and a senior adviser, has created his own team of government allies and private industry representatives to work alongside the administration’s official coronavirus task force, adding another layer of confusion and conflicting signals within the White House’s disjointed response to the crisis.

Kushner, who joined the administration’s coronavirus efforts last week, is primarily focused on attempting to set up drive-through testing sites with the help of technology and retail executives, as well as experts in health-care delivery. The goal, officials familiar with the work said, is to have limited testing in a handful of cities running by Friday and to expand the project from there.

But Kushner’s team is causing confusion among many officials involved in the response, who say they are unsure who is in charge given Kushner’s dual role as senior adviser and Trump family member. Some have privately dubbed his team a “shadow task force” whose requests they interpret as orders they must balance with regular response efforts.

Some members of Kushner’s team are working out of offices on the seventh floor of Health and Human Services headquarters — one floor above the office of HHS secretary Alex Azar — while others are working out of an office in the West Wing of the White House, officials said.

They include representatives of companies such as UPS, FedEx and Flatiron Health, as well as Kushner allies inside the government such as Brad Smith, director of the Centers for Medicare and Medicaid Innovation.

[Jared Kushner listens as President Trump speaks during a signing ceremony for the United States-Mexico-Canada Trade Agreement on the South Lawn of the White House on Jan. 29.]Jared Kushner listens as President Trump speaks during a
Two senior officials said some government officials have become increasingly confused as they have received emails from private industry employees on Kushner’s team and have been on conference calls with them, unsure what their exact role is in the government response. Several people involved in the response said the involvement of outside advisers — who are emailing large groups of government employees from private email addresses — also raises legitimate security concerns about whether these advisers are following proper government protocols.

Sign up for our Coronavirus Updates newsletter to track the outbreak. All stories linked in the newsletter are free to access.<https://subscribe.washingtonpost.com/newsletters/#/bundle/health?method=SURL&location=ART_IS&tid=lk_interstitial_manual_14&itid=lk_interstitial_manual_14>

“We don’t know who these people are,” one senior official said. “Who is this? We’re all getting these emails.”

Kushner defended his role in an interview, saying his team’s goal was to bring “an entrepreneurial approach” to the crisis.

“We’re getting things done in record speeds and are doing everything possible to avoid damage and mitigate the negative impacts,” Kushner said. “In America, some of our best resources are in our private sector. The federal government is not designed to solve all our problems; a lot of the muscle is in the private sector and there’s also a lot of smart people.”

This account of Kushner’s involvement in the administration’s coronavirus response effort is based on interviews with 10 senior administration officials and people familiar with the effort, most of whom spoke on the condition of anonymity to discuss internal dynamics and speak candidly.

[Kate Miller writes: Vice President Pence and President Trump speak with his coronavirus task force during a briefing at the White House on March 18.] Vice President Pence and President Trump speak with his coronavirus task force during a briefing at the White House on March 18. (Jabin Botsford/The Washington Post)

Katie Miller, a spokeswoman for Vice President Pence, who is heading the official task force, dismissed concerns over Kushner’s growing role.

“For those who are involved in the effort, they aren’t confused,” Miller said. “For those who deal with this day-to-day, the structure is quite clear.”

Kushner said he is “closely collaborating” with Pence, whom he talks to “ten times a day.”

Deborah Birx, the White House coronavirus response coordinator, also praised Kushner’s ability to enlist companies and individuals outside government to help in the response.

“The White House recognizes many solutions we will need today and tomorrow to combat this virus reside in the private sector and Jared has been essential in bringing those insights to critical discussions,” she wrote in an email.

But Kushner operates from a nearly untouchable perch within the White House hierarchy, which has worried some officials. Some aides say that regardless of the official organization chart, they know that Kushner can walk into the Oval Office when he wants or call the president late at night, allowing him a final private word after the routine meetings have ended.

The president has grown frustrated with him at times — including over his widely criticized Oval Office address last week, which Kushner helped write — but he remains family and so far has outlasted and outmaneuvered internal rivals.
Kushner — who already has an overlarge portfolio, which had become the subject of mockery by his critics — did not become involved in the virus response until last week, at the request of Pence’s chief of staff. Kushner had previously counseled the president that the media and some in the administration were overreacting to the threat of the virus.

Infighting, missteps and a son-in-law hungry for results: Inside the Trump administration’s troubled coronavirus response

Kushner helped write Trump’s widely panned prime-time Oval Office address last week that sent markets into a free fall, pushed Trump to ban travel from Europe and orchestrated a Rose Garden news conference last Friday where Trump announced a ramped-up testing effort that turned out to be in only the early stages of development.

Trump announced that Google was developing a website where Americans could provide their symptoms, find out whether they needed to be tested and then be directed to a testing site near their homes that retailers including Target, CVS and Walgreens would help set up. But several of the companies quickly distanced themselves from the claims, and little has come of the efforts so far.

Two officials said Kushner was the one who called the various company executives and convinced them to come to Washington to meet and discuss the initiative. While the announcement was premature, they said getting the president to hold the news conference helped focus attention on the issue.

Kushner’s team is primarily focused on getting the testing project launched by the end of this week in “hot spot” areas with large outbreaks, such as Seattle, the San Francisco Bay area and New York City, officials said. The team is also focused on procurement issues, particularly related to the nasal swabs needed to conduct the diagnostic tests, which officials have warned could face shortages as the number of tests expands.

“The government is designed to do certain things in certain ways, but this is not a usual circumstance,” Kushner said. “I’m just trying to establish a faster decision cadence, so we can empower them to isolate the problems, agree on the proposed solutions and then empower the proper government department to move quickly.”

Ten minutes at the teleprompter: Inside Trump’s failed attempt to calm coronavirus fears

The team includes Kushner allies such as Smith and Adam Bohler, chief executive of the U.S. International Development Finance Corporation, as well as a host of private industry representatives who Kushner believes can more quickly solve the testing issue than the government officials who have been overseeing it for the past two months.

Nat Turner, chief executive of Flatiron Health, a health-care technology company focused on cancer research, as well as some of his employees are key members of Kushner’s team and are working out of HHS, officials said. Flatiron Health confirmed it was working on an HHS project. Kushner also brought in employees from the Federal Emergency Management Agency to embed with his team at HHS, and has called UPS and FedEx to help work on logistics issues, while still working with retail executives who are key to the testing initiative, two administration officials said.

[National security adviser Robert C. O’Brien, Deputy Secretary of State Stephen Biegun and senior adviser Jared Kushner listen as President Trump meets with Colombian President Iván Duque Márquez in the Oval Office on March 2.]National security adviser Robert C. O’Brien, Deputy Secretary of State Stephen Biegun and senior adviser Jared Kushner listen as President Trump meets with Colombian President Iván Duque Márquez in the Oval Office on March 2. (Jabin Botsford/The Washington Post)
Walmart is one of the retailers that plan to participate in providing coronavirus testing, a representative said Wednesday, “working with the federal, state and local officials to finalize operational details of our first pilot sites.”

There have been growing pains within the West Wing and agencies as Kushner largely oversees testing and Pence’s team runs broader aspects of the response, including public relations, public-health guidelines to mitigate the spread of the virus and emergency preparedness to ensure states have the resources they need.

Some officials involved in the coronavirus efforts said they do not know who is in charge and whether Pence’s team has been sidelined. Three senior officials involved in the response said Kushner was generally letting the task force know what he was doing, but that they did not know precisely what he was working on. Kushner regularly briefs the president separately from the rest of the task force, one official said.

How to flatten the coronavirus curve

One potential conflict for Kushner is the fact that Oscar, a health insurance company co-founded by Kushner’s younger brother, Joshua, last week launched its own digital portal that helps direct people to virus testing centers and assess their own risk of becoming infected. A spokeswoman did not respond to a request for comment, including about whether Oscar plans to seek a government contract.

Richard Painter, a law professor at the University of Minnesota and the former chief White House ethics lawyer under President George W. Bush, said one key consideration of involving the private sector in any virus response is ensuring that government officials who own any stock in the companies recuse themselves from decision-making.

“The first concern is to make sure no government officials are participating in those discussions that own stock in any of those companies, because if they do or their spouse do, there’s going to be a lot of trouble,” Painter said.

But, he added, as long as “you clear out the conflicts, then yes, this is something that’s going to happen. This is going to be necessary. On any kind of emergency, we do use the private sector, especially in wartime.”

Thanks,

Megan
Thanks,

Megan

Hello Ms Brennan,

I just wanted to send you an email concerning our USPS. I am very proud and happy working here and I want the post office to thrive. I feel like we are headed in the wrong direction with our system. I do appreciate any time you take to read this. I will keep it short.

1. I believe the Post office needs to change its delivery ideas. We should take our 1st class mail and go back to having it delivered in 1 day. Why would anyone want to wait up to 5 days to get a letter delivered

2. We are a business that has been around a long time and we should strive to be the best in spite of having government thinking. We should try to expedite our shipping to 1 or 2 day standards at a good price. No one can compete with us and I think we would be able to increase our revenue by doing this.

3. We must improve our reliability for delivering our mail. That is a huge flaw. We are a joke in the real world, when someone has something very important they want delivered they go to Fedex or UPS.

4. We should take advantage of our ability to deliver anywhere at a great price. No one can do this.

5. We should advertise on special holidays. When I was a young man I would sometimes get a card from a special female friend with her lipstick and perfume smell on it. It made my day. Can’t do that on the internet. That was awesome. A good advertising campaign with commercials like that I think would give us a boost during special holidays with 1st class mail.

6. The other thing we never advertise is that we are hack proof. When you send important papers or pay your bills through the mail, no one can steal your personal info. I never saw an advertisement like that.

7. We have so much to offer people and instead we are downsizing.
Implementing the above 6 items I think would be huge. We are losing a golden opportunity to use are massive size to expand our operations. Maybe the internet has hurt us some but there is a reason why people pay bills on the internet, because we are not reliable enough. If it is political because powerful people want to privatize the USPS, I guess I have no hope in saving this wonderful institution. I have many more ideas, but I feel you are someone who can make these changes and turn the ship around. There are a lot of good people here and since I have been here all that has been done is downsizing and no one seems to want to change that. When you have a company like this we can make some changes and go back to reliability and something people can count on again. Our image is tarnished. If we don’t try Amazon will take over everything.

Thank you for your time.
Sincerely,

(b)(6)
Thank you.

Megan

FEMA Support to COVID-19 Response

KEY MESSAGES

* The federal government continues to take aggressive and proactive steps to address coronavirus (COVID-19) pandemic as the health and safety of the American people remain a top priority.

* FEMA now leads federal operations on behalf of the White House Coronavirus Task Force; who oversees the whole-of-government response to the pandemic.

o As part of the White House Coronavirus Task Force, HHS will continue to provide their subject matter expertise as the nation's pre-eminent public health responders.
* On March 13, 2020, President Trump took decisive, unprecedented action by declaring a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President’s action cuts red tape and bureaucracy and avoids Governors needing to request individual emergency declarations.

* The nationwide emergency declaration increases federal support to the White House Task Force as it leads the ongoing federal response to the COVID-19 pandemic.

* Pursuant to this declaration, FEMA, in coordination with HHS, will assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public.

* As of March 20, 2020, all 50 states, the District of Columbia, five territories and one tribe are working directly with FEMA under the Nationwide Emergency Declaration for COVID-19.

  o On March 20, 2020, President Trump declared a major disaster declaration for the state of New York making federal funding available for crisis counseling services in addition to emergency protective measures.

* This is a whole of government response. Like all emergencies, response is most successful when it is locally executed, state managed and federally supported.

* To help the American public distinguish between rumors and facts regarding the response to Coronavirus (COVID-19), FEMA has created a Rumor Control page on FEMA.gov - the public can help control the spread of rumors by sharing our page: fema.gov/coronavirus<https://www.fema.gov/coronavirus>.

(b)(5)

Coronavirus can live on surfaces for days. But it can't travel through the mail, experts say N'dea Yancey-Bragg<https://www.usatoday.com/staff/2646700001/ndea-yancey-bragg/>

USA TODAY
7:00 a.m. ET Mar 21, 2020

With stores stripped bare of household essentials, retailers cutting back hours and experts calling for social distancing amid the spread of coronavirus, many people may rely on delivery services to get what they need.

A study published in the New England Journal of Medicine<https://www.usatoday.com/story/news/health/2020/03/18/heres-how-long-coronavirus-can-live-surfaces-and-air-study/2863287001/> on Tuesday found that coronavirus could be detected up to three hours after aerosolization in the air, up to four hours on copper, up to 24 hours on cardboard and up to two to three days on plastic and stainless steel.

This had led some to wonder whether those packages on their front porch could spread coronavirus. The answer seems to be no. The Centers for Disease Control and Prevention said that the virus is spread through respiratory droplets and there is currently no evidence to support the transmission of COVID-19 with imported goods.
"In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from products or packaging that are shipped over a period of days or weeks at ambient temperatures," the CDC said on its website. [https://www.cdc.gov/coronavirus/2019-ncov/faq.html]

The World Health Organization offered similar guidance saying it is safe to receive packages from any area. "The likelihood of an infected person contaminating commercial goods is low and the risk of catching the virus that causes COVID-19 from a package that has been moved, travelled, and exposed to different conditions and temperature is also low," the WHO said in a Q&A about the virus. [https://www.who.int/news-room/q-a-detail/q-a-coronaviruses]

Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, said during a CNN coronavirus town hall [https://www.cnn.com/2020/03/16/us/usps-fedex-coronavirus-mail-deliver-amazon-ups-trnd/index.html] that if the disease were to transfer onto something like mail, it would likely be a low concentration. [https://www.cnn.com/2020/03/16/us/usps-fedex-coronavirus-mail-deliver-amazon-ups-trnd/index.html]

Here’s what you need to know about sending mail during the coronavirus pandemic:

Should I disinfect my mail?
Joseph Vinetz, a professor of medicine at Yale and infectious disease researcher, said that wiping down mail may help with some people’s anxiety, but there’s no evidence that doing so would be useful to protect against coronavirus. "That’s just not a viable way of thinking about this epidemic nor am I taking any special precautions myself personally or for family or my friends based on packages," he said. "Whether it’s a package that comes in the mail delivered by Amazon or a letter from the USPS it’s no different than going to the grocery store or going to get take out food."

Amesh Adalja, a senior scholar at the Johns Hopkins University Center for Health Security, agreed that the risk is theoretical and minimal.

"I will never disinfect my mail," he said. "And I don’t even know how you would disinfect your mail."

What if my postal worker has coronavirus?
Adalja said there’s minimal risk of the virus living on a package for several days, but if someone were to sneeze or cough on a letter before putting it into your mailbox "that’s a different story."

Still, he said the same best practices that work during flu season like washing your hands and not touching your face after you open your mail would solve this problem.

How are postal services dealing with coronavirus?
A spokesperson for USPS, which employs more than 630,000 people, said 13 of its employees have tested positive for COVID-19. The company is closely monitoring the situation and is following strategies recommended by the CDC, according to the statement.

FedEx [https://www.fedex.com/en-us/coronavirus.html] has advised employees who are have flulike symptoms to stay home, and is temporarily suspending signature requirements and regularly disinfecting the equipment used to make deliveries.

Amazon [https://blog.aboutamazon.com/company-news/amazons-actions-to-help-employees-communities-and-customers-affected-by-covid-19] said it is offering flexibility for employees who need to stay home and paid time off for those who are diagnosed with coronavirus. Prime Now, Amazon Fresh, and Whole Foods Market delivery customers also have the option of "unattended delivery" if they want to limit into contact with others.

UPS said in a statement [https://pressroom.ups.com/pressroom/ContentDetailsViewer.page?ConceptType=PressReleases&id=1584390799968-421] Monday that it is temporarily modifying the procedures its drivers use for residential and business deliveries. In order to minimize contact with recipients, UPS drivers will validate and record the name of the recipient of the package instead of obtaining a signature. If an adult signature is requested by a shipper, recipients must present identification with proof of age to the driver.
Thank you.

Sent from my iPhone

Since the USPS stated that the subject items WILL be provided to offices, WHY are these items NOT being shipped to each city/rural post office as USPS knows how many employees at ea office so just send them the necessary quantities. Don’t wait for the office postmaster to request these items. Most offices are old and dirty and lack these items as most local postmasters tell their carriers and clerks to buy their own wipes, hand sanitizer, cleaning supplies, masks, etc. which is the norm. When the clerks & carriers start calling in sick along with the limited RCA’s, the local post office will SHUT DOWN and there will be NO mail delivery or Amazon and USPS pkg delivery. By not doing what’s necessary to keep everyone safe, healthy and the office OPEN, let’s be pro active UPPER MANAGERS, go BIG and do your JOB !!!!!
Thank you.

Megan

ANOTHER FINE EXAMPLE OF OUR USPS SYSTEM.

ORDERED PROBIOTICS FROM AMAZON, TWO DAYS LATE ARRIVING, GOT THEM THIS A.M. IN A SHIPPING BAG.

GO TO OPEN IT AND WHAT?? THE BAG HAD BEEN SLICED OPEN AND CONTENTS INSPECTED AND TAPED SHUT AGAIN. PERHAPS ONE OF THE FINE USPS EMPLOYEES DECIDED TO SEE IF IT WAS ANYTHING THEY NEEDED TO KEEP THEM "GOING".

SAD THAT YOU CAN'T EVEN TRUST YOUR ITEMS TO BE SHIPPED TO YOU WITHOUT SOME JERK THINKING THEY CAN NOT ONLY SCREW OVER THE GOV. AND THE PEOPLE WHO TRUST THEY'RE ITEMS WILL GET TO THEM.

SHTF, Means "Shit Hit The Fan", as in we are now in deepshit!  
A thought, we as a country are in peril! As we as a country should we all now think.  
USPS, Amazon, Fedex, trucking companies and UPS need to come together as an essential part of our society who can deliver to our citizen their daily need.  
I don't mean to tell you your job, "but", we have never been here!  
We could use tech. to keep country in tact. 
Hospitals need supplies, we and other can and should deliver the goods that our people need. 
I wish to ask you Madam Post Master General, please reach out to all to help!  
Please don't wait for instruction from the government! 
You can contact CDC, Army, Nat. Guard and all others!  
We have never been here. 
We deliver, now we need to stand up! If only to help! 
N95 masks are needed all PPE for all First Responders! 
The Military has a Supply Chain, we need it also!  
Please don't wait to be called upon! 
The first two letter of our company, is our country "We the people"!  
You Madam Post Master General, can do so much!  
Only you wear those shoes! 
We should act the the Minuteman of older days. 
And our peoples are in need! 
Thank you all anyone who reads this for the Post Master General.

FYI from today’s WH briefing.

White House Coronavirus Briefing – March 20, 2020

Speakers – Participants
President Donald J. Trump
Vice President Mike Pence
Secretary of State, Mike Pence
Acting HS Secretary, Chris Wolfe
Health Secretary Alex Azar
Coronavirus Task Force Member, Dr. Birks NIH Infectious Disease Director, Anthony Fauci

* Canada and Mexico border closings announcement. Both Secretary of State and DHS Secretary spoke about the importance of this closure. Cross-border trade also will have some limitations and on a prioritized, “essential” basis.
* Tax day is April 15; payments due July 15.
* 60 day break for student loans.
* Seeing increase in activity on hostile disinformation campaigns coming from China and other bad actor governments.
* Call for Americans to be alert to “trusted news outlets.”
* Various attacks and statements about the “bad fake news media.”
* Further discussion about State Department efforts to repatriate Americans where air travel is disrupted currently.

The entire 1:24 briefing is viewable at this link:
Good morning Elizabeth,

Thank you so much for assisting us. I have a call with [REDACTED] at 2pm today.

As an aside, I thoroughly enjoyed meeting with the WH Fellows - such a talented, dedicated and mission centric group. It’s give me great hope for the future.

Stay safe.

All the best,

Megan
Thank you.

Subject: FW: CONCERN, face to face with customer

Good morning, and sorry for the inconvenience. I am writing this because our "first concern" Family, Co-workers, and customers are Asking me and I guess I am asking for all of US. I am a Clerk in the Post Office, and I have a BIG concern about the face to face at our counters with customers.

I know this is a long shot, but when I have tried to talk to others, They tell me to suck it up, that we are over reacting... How can the rest of the World basically shut down, and everything else in my town,( except groceries,) and we just need to be sure we have hand sanitizer, disinfectant, and clean everything good? (Which I am running out of hand sanitizer, and out of disinfectant spray....trying to order and bringing supplies from home,(which is not fair to my family) but supplies are not easy to access) There is so much out there that we promote that we can still deliver to our customers, actually just heard the promotion on the radio. Just Please not the face to face. We can still process and deliver the mail, and we need to prioritize the packages for the PO Box section parcel lockers, if packages don't all fit into the parcel lockers, They can be delivered as our Amazon packages are now. Stamps can be purchased on line or by mail.

Our carrier pick up program can be utilized. I know you know all of this, and we are a "infrastructure industry" but surely can Protect ourselves, customers, and most importantly our Family, by PLEASE not letting us face to face at the counter. As much As I am trying to clean to protect everyone here, I just can't control those coming to the "Open" counter at the Post Office.

The Virus has tested positive in my community, it is here.

I do read and watch the videos sent out, but still think we are taking this too lightly. I am sure a lot is going on, just not communicated to me.

I hope everyone is over reacting, but not looking like that. The post office always says Family first, but doesn't seem like it in this case. I hope We aren't waiting for someone to die of this before we take this more seriously. All the money in the world can't replace your "Family". I am not an Employee that is looking for "Time off", in my 22 years I have never called in sick, and only missed 1 day Because of weather. That is not my intent. I would hate to see the Post Office fail, this is my livelihood. I know my writing is bothersome, maybe stupid, and to you probably petty.

But THANK YOU for your time! PLEASE you are our spokesman, HELP!!!

Sincerely,
Madam Postmaster General,
I am wondering when the BOG or you will determine the safety of the employees and the general public are more important than delivering packages (Amazon) and offices staying open?
Regards,

(b)(6)

If you scroll down slightly, you should see an e-mail with a similar title. I am the son of a mailman. This MAILMAN is my idol. He is the reason I am the person I am today. This MAILMAN is the reason I am NOT a mailman due to his constant love, care and interest in making sure I became a successful person that did not have to be in his current position. This MAILMAN, along with countless letter carriers, are in danger. They are in danger going door to door handing out LAWN MAINTENANCE circulars and packages from AMAZON. More importantly to me however, my father, my idol, is in danger. It is next to impossible for him and the postal service to abide by ANY of the recommendations given by the CDC.

Just like many people across the world, I have made it a point to abide by CDC recommendations and self-quarantine as much as possible. Please, please read this next part carefully. My family is my life. My FATHER, that 60+ year old MAILMAN, is my life. When negligence and lack of care, during an event that will change the course of history, involves MY father and his life, I will not hold back. I will do anything for him and my family. I do not need social media to make a statement, however, a statement will be made if the right thing isn't done.

Do the right thing. To you, he's just a mailman. To me, he's my life. Don't let him be another statistic on the television. Do the right thing.

As a follow-up, I’m taking to Social Media and will be calling the press.
My father’s office doesn’t even have hand sanitizer. They cannot stay 6 feet apart because the cubes are right next to each other. They cannot wash their hands because there is no sink in the truck.

USPS’s lack of precaution will lead to the deaths of not just our carriers, but of the general public as well.

This is appalling. Keep our age and health comprised carriers at home, provide hand sanitizer, limit deliveries to essentials only and limit the amount of delivery days.

Subject: The Mailman’s Daughter

My father has been delivering mail for 36 years. This morning, he has gone in the office, with god knows how many other people, then will proceed to go from door to door. He doesn’t want to catch something and bring it home to his asthmatic 5 year old granddaughter. But if he wants to pay his bills he has no choice. It’s as though the country is
operating on an “essential only” basis, with the exception of our postal workers. They’re out delivering Sephora lipstick and Amazon packages.

Can we consider delivering only essential mail and on a weekly (vs daily) basis? This way, if these men or women decide to self quarantine, they will only use one sick/vacation day a week.

Subject: [EXTERNAL] FW: Carrier safety and the Corona Virus

Good Evening, Postmaster General Brennan,

My name is (b)(6) I have been a city carrier in the USPS for 18 years.

I am writing you today, as I had thought about some ideas on how the USPS can establish a more defensive posture that could be provided to not only carriers, but all USPS employees. Given our current situation, this needs to be addressed immediately, not sometime in the future. Your email address was given to me by a fellow carrier, since all other methods of communication suggested to “write a letter”. We do not have time for that.

The general consensus of carriers is a lack of concern from upper management. We get told daily to wash our hands, keep our “social distance”, and cough in a tissue or sleeve. NONE of this can be applied to actual work practices currently administered by the USPS. With a lot of businesses closed, carriers may not have a place to even use a bathroom, let alone wash their hands. Social distance does not mean standing as a group, in front of a supervisor, for a 5, 10, or 15 minute standup talk, in groups of 60 or more, 2 feet apart. Or having to knock on a door for a signature, or being told you can’t enter a facility until you get screened, answer some questions, and possibly even told you have to get your temperature taken with an oral thermometer.

These are challenging times. But we have no directives or protocol from the upper level of postal management. Some stations are being told they are allowed to sign for items for the customer, I have been told at previous stations a carrier...
is not authorized to sign for the customer. Some stations are being told if a business requires them to go through a health screening process, bring the mail back. Other stations are being told to do what is necessary to deliver the mail.

Infectious disease experts are estimating this virus will effect at least 40% of the population, possibly more. I honestly feel like the post office is on a vacation on the beach, with its head in the sand, awaiting a hurricane. They know it is coming, but instead of boarding the windows and shuttering the doors, they are praying that it changes course.

These are just some suggestions, but they could be implemented almost immediately with no effect on service. I believe the post office will get through this, if they are proactive, instead of trying to clean up “after the hurricane hits”. With all the talk of privatization, this can make the American public realize we still are the backbone of the country. If the Post Office is ordered to shut down, I think our country will be at a point that it will never be the same, and the Post Office will be a relic of the past.

First, limit social distance. A public service announcement from the USPS should be sent to all major media outlets explaining extra precautions that customers can take to avoid exposure. DO NOT open your door to retrieve the mail directly from your carrier. If they need to ask a carrier a question, let him get a safe distance away. Make costumers aware of the Informed Delivery service, so they know they can pre-sign for anything, via online, that needs a signature. There is no need for a carrier to knock on the door, hand a customer their scanner, and have them sign for anything. If a carrier leaves a notice, and the customer is home, a complaint will be made, or they will drive to their local post office to pick it up. Again, there is no directive nationwide, on what is to be expected.

Deviate start times for carriers in 5 min increments. The smaller the group the better.

Stand up talks can be given over the intercom. There is no need for 50, 60, 100 carriers to be confined together to discuss the topic of the day, that may not even be pertinent to the current situation.

If possible, move carrier cases further apart, if stations have space. Although I don’t have consolidated casing, I have heard they are almost stacked on top of each other.

Ensure all routes are staffed. With summer prime time vacation only weeks away, not being proactive could destroy the USPS, especially when carriers and clerks are unable to work, due to being sick. There is not a physician in America that would not give a 2 week medical excuse for anyone who tests positive for Corona, even with mild symptoms. We may see 40% or more, of the USPS workforce out in the summer months. In my state, a lot of businesses were forced to close, and people are desperately looking to work. Why wait with our head in the sand? Get the hiring process going now!!!

This is for the clerks, but it should be addressed. Offer a curbside pickup, or call ahead service. With the weather, there isn’t a reason that a kiosk could be set up outside most post offices in the parking lot. One clerk could be out front, and communicate with other clerks inside, with a two way radio. Having customers come inside to a USPS facility with our current situation is a very bad business model. I have heard clerks complaining of customers coughing, sneezing, and not keeping a “social distance”. It would limit exposure to all front line employees.

As of now, Amazon has instilled limitations on the products they will deliver, as well as hiring 100,000 employees. I have not heard anything from the Post Office other than “wash you hands, sneeze into your arm or tissue, and use hand sanitizer”. Business goes on in the USPS, despite going through what could be one of the worst pandemics modern day America has seen.

Limiting contact between employees and customers, should be a NUMBER ONE PRIORITY as we move forward. Without our employees, we will not survive.

Sincerely,

(b)(6)

Thank you.

Megan

Dale Cabaniss, the director of the government's Office of Personnel Management, has resigned abruptly, effective immediately.

Cabaniss stepped down because of what two people familiar with the matter said was poor treatment from the 29-year-old head of the Presidential Personnel Office, John McEntee, and Paul Dans, the powerful new White House liaison and senior adviser to the director of OPM. It's not clear who will be the acting director of OPM now, a person familiar with Cabaniss's exit said.

FYI below. Will discuss today.

Amazon’s warehouse workers sound alarms about coronavirus spread. Workers call on the ecommerce giant to close and clean warehouses exposed to the coronavirus and to adopt rules that encourage employees to practice sanitary habits.

By Jay Greene and Elizabeth Dwoskin

March 17, 2020 at 8:00 a.m. EDT

As Amazon sales surge from shoppers stocking up on consumer staples, the e-commerce giant’s warehouse workers are raising alarms that the company is not doing enough to protect them from the novel coronavirus.

Warehouse workers in Spain and Italy have tested positive for the virus, while workers in New York and Chicago told The Washington Post that Amazon isn’t taking enough precautions as orders mount. Some said workers were sent home only after they had coughs, and signs were posted advising workers to wash their hands.

But in interviews, warehouse workers in the United States and Europe say they worry their workplaces aren’t safe enough and could contribute to the spread of the virus. More than 1,500 workers from around the world have signed a petition that calls on the company to take additional steps to ensure the safety in their workplace.

A worker at one of the facilities in Spain, where some colleagues have been quarantined with coronavirus-like symptoms and two others have tested positive for covid-19, told The Post he fears the warehouse may be a hot spot and wants it shut down.
“It’s an atmosphere of fear — huge fear right now,” said Luismi Ruiz, who has worked there since November 2012 and is a union representative. Amazon is spraying disinfectant throughout the warehouse and staggering employee breaks so fewer people congregate together, to reduce contagion.

“These measures are totally insufficient,” Ruiz added.

Amazon says it’s taking appropriate precautions to protect workers. The company says it’s following guidance from health officials regarding the operation of its facilities. And it provides workers time to use the restrooms to wash their hands.

“We are going to great lengths to keep the buildings extremely clean and help employees practice important precautions such as social distancing and other measures,” Amazon spokeswoman Kelly Cheeseman said. “Those who don’t want to come to work are welcome to use paid and unpaid time off options and we support them in doing so.”

(Amazon chief executive Jeff Bezos owns The Washington Post.)

Any disruption to Amazon’s ability to deliver goods could affect countless customers, who have turned to the company in recent days to bring canned food, cleaning supplies and more to their homes so they don’t need to venture out to physical retailers and potentially spread the virus. Shoppers have turned to Amazon so frequently since the outbreak of the virus that the company has acknowledged it’s out of stock of some household staples, and its deliveries are taking longer than usual.

It may not just be workers’ safety at stake. Recent research shows <https://www.washingtonpost.com/health/coronavirus-can-stay-infectious-for-days-on-surfaces/2020/03/12/9b54a99e-6472-11ea-845d-e35b0234b136_story.html?tid=lk_inline_manual_20&itid=lk_inline_manual_20> the coronavirus can potentially remain viable — capable of infecting a person — for up to 24 hours on cardboard and up to three days on plastic and stainless steel, though covid-19 has primarily spread through direct person-to-person contact.

Amazon has long had a contentious relationship with some warehouse workers, who have helped fuel its rapid growth. For years, the company, which has nearly 800,000 workers worldwide, most of whom work in its warehouses, has been criticized for what some employees describe as poor working conditions, insufficient bathroom breaks and tough goals. They’ve also complained of the company’s efforts to squash unionization. Democratic presidential candidate Sen. Bernie Sanders (I-Vt.) has denounced the company for paying subsistence wages to its warehouse staff.

Now, workers are calling on the company to better protect them from a virus that’s raced through the country and led several major retailers, including Apple, Patagonia and Nike, to temporarily shut their physical stores to contain the coronavirus.

At a New York delivery center, Jonathan Bailey, a sortation associate, said pressure from Amazon to meet the rate at which it wants workers to fulfill orders could lead workers to ignore safe sanitary practices. If Bailey and his colleagues don’t “make rate,” managers can write that up, a blemish on their record that can make it difficult to advance at the company and can even lead to firings, Bailey said.
So even though Amazon is encouraging workers to wash their hands, it’s not giving them enough time to do so, Bailey said. The nearest bathroom is a two- to three-minute walk in each direction, reducing the amount of time he and his colleagues have to meet company shipping expectations, he said.

“If a worker is to cough or sneeze, there is no way for them to practice good sanitary habits” and run to a restroom to wash hands, said Bailey, who has worked for Amazon since last summer. “It’s going to affect your stow rate.” That’s one reason the worker petition calls for eliminating rate-based write-ups. The petition also demands the company provide paid sick leave even if workers don’t have a covid-19 diagnosis because testing remains difficult to get. And it seeks to make sure warehouses are shut if a worker tests positive for covid-19 and not reopened until it’s been thoroughly cleaned.

To alleviate that strain, Amazon announced plans to Monday to hire 100,000 new warehouse workers in the United States. And the company intends to raise pay by $2 an hour in the U.S., 2 pounds an hour in the UK, and approximately 2 euro an hour in parts of the European Union, a move it expects will cost $350 million.

Amazon made a specific pitch to workers who have been furloughed by current employers who have suspended operations.

“We want those people to know we welcome them on our teams until things return to normal and their past employer is able to bring them back,” Dave Clark, senior vice president of worldwide operations, wrote in a blog post.

The additional jobs come amid growing concern about low-wage workers not having job protections to stay at home or get health coverage if they come down virus.

The spread of the virus is particularly acute in Europe, as is the concern among Amazon warehouse workers there. The company has added workers in Italy recently to meet increased demand, according to Matteo Rossi, who works for Transnational Social Strike, which is trying to organize Amazon workers. He worries that could make social distancing, crucial to helping stop the spread of the disease, more difficult.

“Amazon warehouses are more crowded than before,” Rossi said.

Amazon confirmed that three workers at warehouses outside Madrid and Barcelona tested positive for covid-19, according to a report from the Spanish news site La Información.

A worker at an Italian warehouse in Torrazza also tested positive for the disease, and workers there are also concerned about returning to the facility, according a report from the Italian news site La Stampa. Workers declared a strike Monday at a warehouse in Piacenza over concerns about containing the spread of the virus, La Stampa reported.

Christian Kraehling worries about meetings at the start of every shift, where his colleagues at a warehouse in Bad Hersfeld, Germany, are reminded of safety precautions such as using handrails when going downstairs. Those meetings include scores of workers standing shoulder to shoulder.

“It’s a very bad situation with the coronavirus,” said Kraehling, who has worked for Amazon for 10 years.

How long will you continue to put postal employees at risk?
CDC recommends no gatherings of 50 or more people. Our office has 90 employees in close proximity every single morning. Not all of these employees practice safe hygiene. As this PANDEMIC spreads more of the employees you are responsible for are put at greater risk with each passing day.
The time to act is now. Do the right thing, we are real people with real children and families who care for us.
Please close us down (b)(6)
Thanks,

Megan

The Trump administration is urging people to work from home. What about the federal government?

By Editorial Board [https://www.washingtonpost.com/opinions/the-posts-view/]
March 16, 2020 at 6:58 p.m. EDT

“HUNKER DOWN.” That has been the urgent plea from Dr. Anthony S. Fauci [https://www.washingtonpost.com/politics/fauci-open-to-a-14-day-national-shutdown-to-stem-virus/2020/03/15/fb68cfd0-66e9-11ea-b199-3a9799c54512_story.html?tid=lk_inline_manual_1&itid=lk_inline_manual_1>, director of the National Institute of Allergy and Infectious Diseases, stressing the importance of Americans staying home as much as possible to limit the deadly spread of the novel coronavirus. His words — and those of other public health experts — have been taken to heart by state and local officials who have shut schools [https://www.washingtonpost.com/dc-md-va/2020/03/13/coronavirus-dc-maryland-virginia-updates/?tid=lk_inline_manual_1&itid=lk_inline_manual_1> and businesses. Many of the country’s top companies [https://www.cnn.com/2020/03/10/tech/google-work-from-home-coronavirus/index.html] likewise are encouraging employees to work from home.

Unfortunately, the message has not fully sunk in with the nation’s largest employer: the federal government. Its failure to come up with and communicate a government-wide plan or approach to telework is yet another example of the Trump administration’s lagging response to the escalating pandemic.

“When the Super Bowl was in Atlanta, the entire regional office teleworked for over a week to ease congestion and enhance security. . . . Why will the agency allow telework for the Super Bowl but not when potential lives are on the line?” That query, reported by the Federal News Network, came from a Social Security Administration employee [https://federalnewsnetwork.com/workforce/2020/03/lack-of-transparency-communication-leaving-some-feds-frustrated-over-telework-plans/>. Similarly, a worker at the National Institutes of Health asked, “How many thousands of federal employees are being asked to endanger themselves and their neighbors. . . .?” Their questions embody the fear and frustration of many federal employees over the lack of clear guidance as to whether working from home will put their jobs at risk.

In the days since President Trump’s declaration of a state of national emergency on Friday, confusion has marked the messages from the White House about the nation’s 2.1 million federal workers. At first, the recommendation from the
acting budget director was that limited telework should be made available to the elderly, to those who are pregnant and those with health risks. Mounting criticism resulted in Sunday’s guidance

from the White House asking agencies to offer “maximum telework flexibilities” to all eligible employees and “use all existing authorities to offer telework to additional employees.” But the directive is not mandatory, leaving decisions about teleworking up to each individual agency and resulting in a hodgepodge of policies. “Every agency is scared to death to do anything without getting approval, and they don’t want to be the first,” one senior manager was quoted in a report by The Post’s Lisa Rein, Ian Duncan and Tracy Jan.

Little wonder that managers are hesitant given how Mr. Trump has worked throughout his tenure to limit remote work by federal employees. When he took office in 2017, more than 40 percent of the federal workforce was eligible for telework, but his administration implemented across-the-board cuts that reduced the numbers of those eligible to telecommute. It is unclear how many employees now even have the capabilities or equipment to work remotely. The pushback against the Obama administration’s encouragement of telework never made sense. But this crisis is illuminating its true folly.
Got it.

Thanks,

Megan

WHO FAQ: Is it safe to receive a package from any area where COVID-19 has been reported?
Yes. The likelihood of an infected person contaminating commercial goods is low and the risk of catching the virus that causes COVID-19 from a package that has been moved, travelled, and exposed to different conditions and temperature is also low.
https://www.who.int/news-room/q-a-detail/q-a-coronaviruses

CDC FAQ: Am I at risk for COVID-19 from a package or products shipping from China?
In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from products or packaging that are shipped over a period of days or weeks at ambient temperatures. Coronaviruses are generally thought to be spread most often by respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with imported goods and there have not been any cases of COVID-19 in the United States associated with imported goods.

While we have not had the call with CDC/NIOSH schedule to discuss the study on COVID-19 and surface materials a pertinent finding regarding transmission from a surface of a materials was - “Our results indicate that the greater transmissibility observed for HCoV-19 is unlikely due to greater environmental viability of this virus compared to SARS-CoV-1”. (That is, person-to-person spread is the main mode of transmission.)

Surgeon General Jerome Adams, a member of the Trump administration’s coronavirus task force, reacted on Thursday to the fact that an Amazon employee in Seattle contracted the novel coronavirus, saying: “There is no evidence right now that the coronavirus can be spread through mail.” ... “We heard [National Institute of Allergy and Infectious Diseases Director] Tony Fauci, the world’s expert in this area, comment on this and there is no evidence right now that the coronavirus can be spread through mail, no other coronavirus has been spread through mail,” Adams said on Thursday, responding to fears.

USPS-20-1215-A-000455
In light of the coronavirus, can you waive the federal regulation requiring local post offices to place “Bulk Mail” in the post office boxes? This is for the health of the general public as this virus can stick to paper and cardboard. If not already, postal workers should be handling mail and boxes with latex gloves. Until this virus is under control, the personal mail boxes in the post office should be limited to first class mail only in the p.o. boxes. Bulk mail is not worth the risk.

Top GOP post on Oversight draws stiff competition

Multiple Republican lawmakers are throwing their hats in ring for the top GOP spot on the House Oversight Committee, a powerful position that will soon be vacant with the departure of Rep. Mark Meadows (R-N.C.).

Top contenders to succeed Meadows, who will be President Trump’s new White House chief of staff, include Reps. James Comer (Ky.) and Jody Hice (Ga.), as well as freshmen Reps. Kelly Armstrong (N.D.) and Mark Green (Tenn.).

Rep. Chip Roy (Texas), a firebrand conservative freshman, is also eyeing the role.

But two sources say House GOP leaders are also considering a different route: picking a placeholder who could finish out the year before making a decision on who will hold the spot for the long term.

While Armstrong and Green appear to be widely liked by GOP leadership, there is some reluctance to pick a freshman for such a high-profile role. Picking a ranking member for the short term, however, would give a freshman lawmaker close to a full year under their belt before vying for the post.

Members like Reps. Gary Palmer (R-Ala.) and retiring Rep. Mark Walker (R-N.C.), both of whom are on the GOP leadership team, have been floated as possible picks, but it is unclear whether there is a front-runner for the role.

“The theory would be they either open it up for [Comer, Hice, Armstrong and Green] and let them compete for it now, or put a placeholder in or just let somebody take it now,” said one senior source familiar with the discussions, noting that Palmer could take the helm of the panel.

Whoever lands the role will be taking over a position that Meadows was only recently voted into by the GOP Steering Committee. That move came after Rep. Jim Jordan (R-Ohio) was shifted over to the House Judiciary Committee to serve as ranking member.

Plans for Meadows to lead Republicans on the Oversight Committee, a role he had long eyed, were thrown into a tailspin earlier this month when Trump announced that his House ally would replace Mick Mulvaney and serve as his new chief of staff, just days before the North Carolina Republican was set to start as ranking member on the panel.

That prompted an ambitious group of Oversight members to let it be known that they’re eager for the top role.
Comer told The Hill that he has been “encouraged” to look at the ranking member position and that he is “gauging the level of support” he would have with the Steering Committee, which consists of top Republican lawmakers and is tasked with determining committee assignments.

“I am very interested in it. I'm just going around meeting individually with people on the Steering Committee and leadership to gauge support and we'll make a decision very soon but right now things look good,” Comer said, adding that he is “testing the waters.”

Armstrong, who previously worked as a lawyer and was described by other GOP lawmakers as a bright, up-and-coming member, also said he would be interested if leaders hold an election.

“If we are going to have an election for the position, I will be considering it going forward,” Armstrong told The Hill.

Green, a veteran of the Iraq and Afghanistan wars who is also viewed by leadership as a rising star, told The Hill he is “running” for the post.

In conversations with multiple GOP lawmakers familiar with the discussions, members offered competing views on who could land the role.

“If I were to bet, I'd put money on Comer because he's been a loyal, quiet guy. He got passed over for other stuff, it's his time to take a shot,” one GOP lawmaker said. “And as a freshman, that's too big a job. You’re not gonna give it to them. You'd have revolt,” the member added with a laugh.

But Rep. Patrick McHenry (R-N.C.), a member of the Steering Committee, said freshmen shouldn't be ruled out.

“Lots of interest for the slot, great competition. And the good news about Republicans is that it's not pure seniority,” he said. “I think we’re seeing that we’ve got a lot of talented members that are interested.”

The two top Republicans on the Steering Committee -- Minority Leader Kevin McCarthy (Calif.) and Minority Whip Steve Scalise (La.) -- yield the most power on the panel, with McCarthy receiving four votes and Scalise receiving two. The rest of the 29 members are allotted one vote each.

Multiple sources said that Hice, despite being the most senior member running for the position, could face significant hurdles after voting against McCarthy for Speaker at the start of the 116th Congress, as well as bucking leadership on key issues in the past.

“That doesn't play well when it comes time for these appointments,” one Republican member said.

Hice, who is a member of the House Freedom Caucus, said he doesn’t believe past tensions will be a factor, noting conservatives and leadership have managed to come together in the minority as they work together to defend the president from Democratic attacks.

“That was then, this is now -- [it has] long been water under the bridge. And being in the minority has a way of pulling us all together, we’re rowing together on the same team for the same purpose,” he said.

The Georgia Republican highlighted his experience working with Meadows and Jordan — both founding members of the Freedom Caucus and close allies of the president — on the Oversight Committee, adding that he believes he can bring the same level of vitality to the role.
“That's a committee that Democrats have used to attack the president and impeachment and all this sort of stuff, and we've had incredible leadership with Jim and Mark,” Hice said. “I just think we need to keep that spirit.”

Roy, another Freedom Caucus member who previously worked as chief of staff for Sen. Ted Cruz (R-Texas), has also had his own run-ins with leadership, most notably when he infuriated colleagues by single-handedly blocking a voice vote on a $19 billion disaster aid package last year.

But sources close to Roy highlighted he is interested in the role, noting he is the only freshman to serve as the top Republican on one of the panel’s subcommittees.

The Texas Republican, while expressing interest in the role, has acknowledged he likely faces an uphill climb.

“I've let people know that I'd be happy to do it, but I don't really think I see leadership rushing to get a spirited freshman to be in that role,” he said.

Roy, who said he thinks McCarthy is looking to move in a different direction, added that he will touch base with relevant members during next week’s House recess to gauge their level of support.

Both Meadows and Jordan have shown that despite an initial frosty relationship with McCarthy, a thawing is possible. The two lawmakers, who have established themselves as Trump’s attack dogs on Capitol Hill, managed to secure coveted committee posts under McCarthy's leadership. Many have credited Trump as the uniting factor among previously opposing factions within the GOP.

And one thing GOP leaders are looking for in Meadows’s successor is someone who won’t back down from a confrontation with Democrats.

“It's important that we have somebody fill that role that's going to be aggressive in carrying out the proper job of oversight,” said Scalise. “And we've been in touch -- we've heard from a lot of members that are interested and that's a good thing.”

Thank you.

Megan
Tom,

Thanks,

Megan

Close the postal security loophole
by Juliette Kayyem<https://www.washingtonexaminer.com/author/juliette-kayyem>
| March 10, 2020 12:20 AM

On the surface, counterfeit goods pose a minor nuisance — a cheap bag made of fake leather that falls apart, or a phone charger that only works for a week. But these products, often sold at bargain-basement prices, create a tangible risk for countless Americans every day. While e-commerce has changed the way we shop, it has opened the floodgates for deceptive goods that threaten consumer health and safety — not to mention serious economic damage for American businesses.
The White House recently issued an executive order promising to crack down on international counterfeiting and intellectual property theft. For this commitment to be effective, it is crucial that law enforcement have access to the tools needed to stop these illegal shipments from ever reaching our country in the first place.

Unfortunately, a law designed to stop dangerous material sent through the mail, including counterfeit goods, remains unenforced over one year since President Trump signed it into law.

Congress passed the Synthetics and Trafficking Overdose Prevention or STOP Act with overwhelming bipartisan support, and Trump signed it into law in October 2018. If properly enforced, the law would close a security gap frequently abused by counterfeit goods traffickers. It requires packages sent internationally to the U.S. through the postal system to include advance electronic data, used to screen international packages for illegal opioids, potential terrorist risks, and other dangerous material, as has already been required for packages sent through private carriers for nearly two decades.

At a recent White House press briefing, senior counselor Kellyanne Conway spoke of how this discrepancy creates a security loophole, saying, “our third-party carriers have been [providing security data] for a long time — your UPS, your FedEx, for example. And so, now, our own U.S. Postal Service needs to get on board with that.” And a recent report from the United States Senate Finance Committee specifically highlighted the importance of enforcing the STOP Act to address counterfeits, noting that the data it requires is “useful to target and prevent counterfeit goods.”

Yet although the STOP Act set strict timelines for implementing new standards, more than a year since its passage federal agencies continue to miss its key deadlines. While the U.S. Postal Service and Customs and Border Protection were required to have advance data on all packages from China and on 70% of international packages overall by December 2018, they have repeatedly fallen short. Meanwhile, critical reports to Congress on compliance and progress are not public. In the White House briefing, Conway cited numbers ranging from 35% to 38% compliance — nowhere near what is required nor what is needed to keep the country secure.

That is more serious than a bureaucratic delay. Because of low manufacturing standards or sub-par materials, knock-off products ranging from toys to pharmaceuticals are “putting the health and safety of consumers at direct and significant risk,” according to the Senate Finance Committee. And a report from the U.S. Commission on the Theft of American Intellectual Property estimated counterfeit and pirated goods cost the U.S. economy between $29 and $41 billion per year, with over 60% of these products traveling through the postal service. Those revenues should be going to American businesses and supporting American jobs and innovations, not lining the pockets of criminals.

Consider the New Jersey mother whose garment designs were copied by Chinese counterfeiters who had the gall to use her own daughter’s photos in their advertisements. Or the Virginia inventors who appeared on Shark Tank but were bombarded by negative reviews from consumers who unwittingly bought foreign knock-offs of their car-cleaning innovation. Or the music teacher who patented a device that helps students hold their violin bow properly but then saw foreign counterfeiters steal the idea to profit themselves.

With countless stories like these, it’s unacceptable that fully enforcing the STOP Act is anything but a top priority.

Unless the law is followed, the postal loophole will remain a glaring vulnerability exploited by counterfeiters, drug traffickers fueling the opioid crisis, and other bad actors. The administration’s new executive order is a promising step, but it must be accompanied by accountability from our federal agencies, and from responsible oversight from Congress to ensure laws like the STOP Act are not only signed into law but properly implemented so they can be effective.

Juliette Kayyem, the Belfer Lecturer in International Security at Harvard Kennedy School, served as assistant secretary for intergovernmental affairs at the Department of Homeland Security. She is a senior adviser to Americans for Securing All Packages, a coalition focused on closing the postal security loophole.
Good afternoon Chairman Duncan,

I enjoyed the discussion. They posed thoughtful questions.

I shared with the group that I read their biographies. What an impressive, accomplished group of people. It gives me hope for the future. I also thanked them for their service to our communities and country.

Safe travels.

Megan

Dear Postmaster Brennan,

My name is (b)(6) and I run a mail-based company here in DC called (b)(6). We specialize in storytelling by mail, and greatly appreciate the hard work of the many USPS employees we come into contact with on a weekly basis (and were proud to be featured in USPS link<https://link.usps.com/2019/07/12/sparking-joy/> a few months ago).

That being said, USPS needs a better system for ordering large quantities of stamps. We spend between four and five figures on postage per week. We use, mostly, USPS's 25-cent First-class Presort stamps. The only Post Office I've found that carries it is the Postal store at the National Postal Museum (the customer service there is excellent by the way), and when they run out, it can take them days to get a new shipment. They're not available online, and when I called 1-800-stamp-24, I was told that the only way to order them was to mail or fax in an order form and a check, then wait 2-3 weeks for processing.

No other billion-dollar business that I've encountered has lead times like that, nor ordering processes as antiquated and cumbersome. Amazon could get me a live horse in 48 hours. I understand that this is well below your pay-grade, but please sell these stamps online or by phone, with reasonable fulfillment times (less than 2 weeks). I've bought similarly priced and sized products from USPS.com<http://usps.com/>, so I know it's doable.

P.S. If you're ever up near (b)(6), I'd love to show you our letters, and our little mailing operation. I'm looking forward to hosting another group from USPS later this month.

All the best,

(b)(6)
Pat,

Are you receiving this newsletter?

Thanks,

Megan

Welcome to POLITICO Nightly: Coronavirus Special Edition. We'll provide a nightly intelligence brief from POLITICO's global newsroom on the impact of the coronavirus on our politics and policy, the economy and global health. If you prefer to not receive this newsletter, send us a note at reply@politico.com<mailto:reply@politico.com>.

MARKETS COLLAPSED AROUND THE WORLD and that wasn't even the only big story Monday.

Italy effectively pushed a nation of 60 million people into a lockdown, borrowing a page from China's draconian playbook to contain the coronavirus outbreak. The White House and Congress each launched talks to rescue the U.S. economy<http://go.politicoemail.com/?qs=d08b40b10af31666358d674a658d585fcbd93fef8b65cb6ad3c663c122a36f3ed58515b5fb7c969ebe78e26c90e3427e>, a rush to action not seen since the 2008 financial crisis and 9/11 terrorist attacks. And debate raged among U.S. health officials about which parts of the American economy need to be shuttered on the fly to calm the spread of the virus and stem the panic gripping huge swaths of the nation.
After a dizzying Monday, here are five things to watch tomorrow:

— Shutdowns ahead. Government officials will soon need to decide which industries — or entire communities — go into lockdown. Trump administration officials are debating whether to discourage Americans from boarding cruise ships, POLITICO's Dan Diamond reported exclusively(http://go.politicoemail.com/?qs=d08b40b10af316667dfaf3b9b09cbd19e9b4ca5c4ca29d6b56c46a7e0ccfc
52eb7a550c9a050a434d0279991b8e5d8>, despite the damage it would wreak on Florida in an election year.

— Economic relief ahead — for industries and workers. President Donald Trump announced Monday that he will discuss with lawmakers Tuesday a wide-ranging aid package <http://go.politicoemail.com/?qs=d08b40b10af31666358d674a658d585fcbd93fedf8b65cb6ad3c663c122a36f3ed58515b
5f7c969ebe78e26c90e3427e>, including a payroll tax cut and targeted measures for hourly workers and industries. But some lawmakers are not even sure whether they want to show up to work. POLITICO's Heather Caygle and Kyle Cheney captured the anxiety<http://go.politicoemail.com/?qs=d08b40b10af316666a372b88ed6938ac129d84b842740be5ff731e70f9738ac5d
44b24d2d21a36afc1ae195cf97b1c4a> in a testy Hill meeting with chiefs of staff.

— Don't touch POTUS. The American president interacted with lawmakers and allies who are now self-quarantining<http://go.politicoemail.com/?qs=d08b40b10af316668b0b7c7ac566dd12928d830b92d49c2ffda9d6bdbe
d7228b85e414b94a3f0ca7dadb8e14ab95b8> due to coronavirus concerns. Now he must decide whether to scale back the presidential schedule and change his own way of life. The big question Monday night was whether Trump is getting tested himself. He didn't answer, and his vice president said he didn't know.

— Market mayhem needs a floor. Monday's 8 percent decline in stocks sliced more than 2,000 points off the Dow Jones Industrial Average — after a plunge right out of the gates triggered circuit breakers for a 7 percent drop and halted trading. After markets closed, the Federal Reserve announced cash injections into the financial system and regulators urged banks to work with people hit by the virus fallout. Central bankers can stimulate all they want but they can't stop a virus.

— The Saudi-Russian war on U.S. oil is working — and Trump needs them to back down. Oil traders witnessed the plunge of a lifetime — a 25 percent tumble, the largest in three decades, to around $30 a barrel - thanks to a deadlock between Saudi Arabia and Russia over who should cut oil production. (Their apparent decision: Make the U.S. shale producers do it, a move that could devastate swathes of America's oil industry at a time when the U.S. economy is already expected to struggle.) Trump has courted leaders of both countries but they now seem determined to stick it to the U.S.

The world is drowning itself in hand sanitizer and suffocating itself with fear. Take our tour through the other key stories below.

And listen to our latest coronavirus episodes of POLITICO Dispatch<http://go.politicoemail.com/?qs=d08b40b10af3166675df7930f12ca3c4915a6fecbd80cd3eca85df3091e806f3

Talking to the Experts
As we've entered a new stage of this epidemic, the most important thing to watch from an American health policy perspective is testing, says Joanne Kenen, POLITICO's executive editor for health care. More of what she tells us:

Cases have been identified in more than three dozen states; rising numbers are community spread. Testing has been a pain point: Supplies and procedures have been a moving target on Monday, HHS Secretary Alex Azar couldn’t say how many Americans have been tested.<http://go.politicoemail.com/?qs=d08b40b10af316666e65ececece160540eea823dbb2cd72a14a9686c87cf0d5acbf3b6fa494ba043fe126024a0d3f737> for coronavirus because private labs don’t need to report their numbers to the federal government.

We are tracking how states begin to shape their response<http://go.politicoemail.com/?qs=d08b40b10af316666e65ececece160540eea823dbb2cd72a14a9686c87cf0d5acbf3b6fa494ba043fe126024a0d3f737>, after the faltering and contradictory federal efforts. And whether hospitals, which have had several weeks to prepare, be up to the task? You can find me at JKenen@politico.com or @joannekenen<http://go.politicoemail.com/?qs=d08b40b10af316666e65ececece160540eea823dbb2cd72a14a9686c87cf0d5acbf3b6fa494ba043fe126024a0d3f737>. The Palace Intrigue

The blame game starts: White House officials and staffers are pointing fingers at each other for bungling the response to the fast-moving crisis at the same time they are figuring out what that response should be, reports POLITICO's Nancy Cook<http://go.politicoemail.com/?qs=d08b40b10af316666e65ececece160540eea823dbb2cd72a14a9686c87cf0d5acbf3b6fa494ba043fe126024a0d3f737>. Everyone does agree on one thing — the crisis is someone else's fault. Officials are pointing fingers at national security staff, the vice president's office and the CDC. The back-biting and scramble to head off a precipitous economic slide is a continuation of the administration's early attempts to contain the virus.

Azar is urging the administration to shut down the cruise industry<http://go.politicoemail.com/?qs=d08b40b10af316666e65ececece160540eea823dbb2cd72a14a9686c87cf0d5acbf3b6fa494ba043fe126024a0d3f737>, but the White House is worried that such a move would threaten the Florida economy heading into the 2020 election. Right now the Defense Department is providing four facilities to quarantine about 3,000 Grand Princess cruise ship passengers after a case was found on board. Azar will provide an update on the administration's response Tuesday afternoon<http://go.politicoemail.com/?qs=d08b40b10af316666e65ececece160540eea823dbb2cd72a14a9686c87cf0d5acbf3b6fa494ba043fe126024a0d3f737> at a forum about biosimilars.

Turning to Congress

FIRST IN POLITICO: Democratic senators want answers: Massachusetts Sens. Elizabeth Warren and Ed Markey are asking Vice President Mike Pence to explain Trump's comments at a CDC press conference, in a letter<http://go.politicoemail.com/?qs=d08b40b10af316666e65ececece160540eea823dbb2cd72a14a9686c87cf0d5acbf3b6fa494ba043fe126024a0d3f737> shared first with POLITICO's Dan Diamond. Trump's Friday wide-ranging comments on everything from Fox News ratings to misinformation about testing availability alarmed the Senators, who said that they have deeper questions about Trump's management of the viral outbreak.
"This series of false, politicized, and nonsensical statements by the President are deeply troubling," the Massachusetts Democrats wrote in their letter to Pence. "Friday's press conference was a disservice to the nation and the non-partisan scientists and public health experts at the CDC and across the federal government."

Who to protect first? Congress is dealing with an irreconcilable challenge — figuring out how to protect lawmakers from the virus while plotting a response to deal with fallout from the outbreak. While a growing number of lawmakers self-quarantine, House Speaker Nancy Pelosi met committee chairs this evening<http://go.politicoemail.com/?qs=d08b40b10af316666a372b88ed6938ac129d84b842740be5ff731e70f9738ac5d4b24d2d21a36afca1e195cf97b1c4a> to hammer out a Democratic led response to the outbreak. Paid sick leave is at the top of their wish list. They also want to expand unemployment insurance, bolster food programs and ensure free testing.

At the same time top House aides fumed after a meeting with Congress' top doctor that left them with few concrete answers on how to protect their aging bosses from contracting the virus. They wanted guidance on when to call off large meetings or shut down buildings completely, but got little certainty. Senators offered a frank assessment of their risk: One of them is going to contract the illness<http://go.politicoemail.com/?qs=d08b40b10af316666a372b88ed6938ac129d84b842740be5ff731e70f9738ac5d4b24d2d21a36afca1e195cf97b1c4a> to hammer out a Democratic led response to the outbreak. Paid sick leave is at the top of their wish list. They also want to expand unemployment insurance, bolster food programs and ensure free testing. Forced compromise: The outbreak is revealing how philosophical differences between the two parties translate into practical policy. Much of the Republican response has focused on tax breaks and relief for business owners. Democrats want to bolster safety net programs.

Monday marked the first day newly confirmed cases outside of China (3,949) surpassed the Chinese high-water mark of 3,389. Patterson Clark's graphic<http://go.politicoemail.com/?qs=d08b40b10af316666a372b88ed6938ac129d84b842740be5ff731e70f9738ac5d4b24d2d21a36afca1e195cf97b1c4a> has more on the international case tallies.

[Patterson Clark, POLITICO Pro DataPoint]

The Global Fight

Leaders across Europe hoped coronavirus would be a mere blip, with low economic impact. Instead, Monday showed issues across the continent may just be starting.

Some, like European Commission President Ursula von der Leyen, are operating business as usual<http://go.politicoemail.com/?qs=d08b40b10af316666a372b88ed6938ac129d84b842740be5ff731e70f9738ac5d4b24d2d21a36afca1e195cf97b1c4a> amid the virus' spread. But the real crisis in Europe isn't ending soon<http://go.politicoemail.com/?qs=d08b40b10af316666a372b88ed6938ac129d84b842740be5ff731e70f9738ac5d4b24d2d21a36afca1e195cf97b1c4a>, as already weakened eurozone economies sink further. In the strongest sign of trouble in Europe, Italy is taking the unprecedented step of locking down the entire country<http://go.politicoemail.com/?qs=d08b40b10af316666a372b88ed6938ac129d84b842740be5ff731e70f9738ac5d4b24d2d21a36afca1e195cf97b1c4a> for the next month.
Even as some Italian officials warned that their health system was on the verge of collapse and citizens debated Rome's legal authority to effectively seal off an entire country, von der Leyen expressed satisfaction with the EU's emergency response after what she acknowledged was a rough start.

A) About the Author:
Trained at a premier university, prior to joining the USPS in November 2016, through my employment with federal contractor Booz Allen Hamilton in Washington D.C, I worked as a senior technical consultant (for 7+ years) for many federal agencies including FEMA and the FBI Headquarters. There was an attempt in 2018 (by the managerial staff-memers at the Castle Shannon office) to smear/besmirch my reputation but I prevailed in the end. Nevertheless, my long tenure working for federal agencies provide credence to my statements here. In my less than 3.5 years with the USPS in Pittsburgh, I was either affiliated and/or worked at 8 different Postal offices: (b)

As the result, I've gained many contacts and unique insights of the activities/concerns at quite a large selection of Pittsburgh postal offices -- this memo is the consequence of what I've learned through these contacts.
B) Problem Statements/Scenarios:

As an Asian American, I'm acutely aware of the coronavirus risks. The good news: Many people who are infected will eventually recover from it. The bad news: Many 80+ years old people died because of it. Indeed, 60+ years old with weak immune system or people with underlying medical conditions are at seriously risks. I myself delivered mails to 5-7 hi-rise apartments complexes and encountered many elderly/retirees people in the lobby of these apartments. On several occasions (at these locations), while putting mails into cluster-mailboxes, I sneezed and coughed and attracted stares from the elderly customers. Some even asked loudly: "Where's your mask? Where's your hand-sanitizer?" In addition, my own mother is 80+ years old.

Mail-carriers' exposure to the coronavirus: I myself shop weekly in Asian supermarkets and attend religious buildings frequented by Asian community (Catholic, Buddhism ...) which are congregated by many people with travel histories to coronavirus hard-hit regions of China/South-Korea. Our office delivers to University with a students body with worldwide travel history. Furthermore, many CCAs and fulltime-carriers at the bottom-rung of the payscale (first year, second year fulltime) supplement their postal incomes with Uber/Lyft gigs which bring additional risks of exposure with infected Uber/Lyft riders from the airport ...

Bottom-line: Even though mail-carriers maybe OK from the virus -- our customers and loved ones at home maybe put at risk through our interactions with them. If several elderly/retirees apartment complexes experienced an explosion number of coronavirus infections and the mail-carrier is the common link between them -- I'm pretty sure that's an outcome we all want to avoid. because the media will be all over it.

C) USPS follows CDC guidance on Coronavirus:

According to the "USPS publication" (link: https://link.usps.com/2020/02/11/coronavirus-update ), the USPS follows CDC guidance, which outlined two broad recommendations:

1) Recommendation 1: Advice on sanitary/hygienic practices: frequent hand-washing, avoid touching eyes/mouths ...

2) Recommendation 2: Stay home when you are sick.

Please note that CDC says simply "stay home when you're sick" because:

(a) As of 3/8/2020, the test kits for testing cornavirus was slow to be made available widely
(b) Many symptoms for coronavirus overlap with many other respiratory illness such as: strep-throat, annual influenza, seasonal allergy and even common cold
(c) People with coronavirus infection may be asymptomatic (i.e: has no outward symptoms), but are still capable of spreading the virus.
(d) The advice of "stay home when you are sick" -- according to medical experts, are meant to reducing further infection of any respiratory illness at the workplace.

D) Our failures in implementing CDC Recommendation #1:

i) Lack of hand-sanitizer and mask at our case-station (at the post office) and travel-size hand-sanitizer in our postal vehicles. Mail-carriers want to avoid sneezing/coughing at the letters/magazines/catalogs.

ii) CDC advises "wash hand regularly" -- we lack alcohol based washing mechanism while on the street (in our postal vehicles).

iii) The use of "personal bottles" (abbreviated as "p-bottles") by certain segment of mail-carriers, especially among the CCAs (on their regular mail duties as well as Amazon runs on Sunday/holidays). In addition to the cringe-induced reactions, this practice is certain to qualify as "unsanitary and unhygienic," and totally against the CDC-recommendation.

Suggested solution to fighting (iii) the usage of "p-bottles": educating the mail-carriers about taking time for comfort-stops (and travel time to find the nearest accommodation), educating the mail-carriers on morning vehicle-inspection to include inspecting the postal vehicle's interior (with a smell-test). Most importantly, supervisors must be
educated on not pushing the CCAs to the point of avoiding comfort-stops and forced them to employ other unclean/unhygienic activities. This should continue even after the coronavirus problem is solved.

E) Our failures in implementing CDC Recommendation #2 "stay home when you're sick":

i) Supervisors charging LWOP "Leave Without Pay" on mail-carriers calling in sick: This happened to me. I called in sick for 4 days, I have a doctor's note and was not on any Restricted Leave list. I was charged LWOP for my first-day of sickness, automatically, without the supervisor asking whether I would like to use Sick Leave or Annual Leave (which I do have available balance) for it. Two stewards at Grant St that automatic-charging of LWOP on sick-calls automatically has long been a policy at the(b)(6) station. I commend manager(b)(6) for looking into reviewing it when I brought up the issue to him. However, Union(b)(6) confirmed that charging LWOP on sick-calls are going on everywhere in Pittsburgh. It takes up to 2 months for the grievance process for the mail-carrier to be "made-whole" (i.e: changing LWOP to either sick-leave or annual-leave). Meanwhile, the LWOP has the effects of discouraging employees to "stay home when you're sick" per CDC guidance. Manager said that the LWOP was intended for fighting sick-leave abuses but there are other tools to fight that (as described below). Also, 1-2 sick-leave abusers can't be the reason for charging LWOP automatically on anyone calling sick.

ii) Wrangling over "doctor's note" wordings on "incapacity to work": Upon returning from sickness, I submitted a doctor's note stating "The doctor has examined the patient. The patient is fully able to return to work with no restrictions on date AA/BB/CC. We urge employers to consider this an excused absence" -- I have experienced inconsistencies of acceptance of such doctor's note among supervisors/managers at various postal offices -- even though I submitted same standard-form doctor's note from the same medical provider (an Urgent Care facility). One supervisor claimed "oh, it didn't say incapacitated" Yet, at least 3 different supervisors/managers at different office accepted the form just fine. The standard-form issued by the Urgent Care facility are accepted by employers all over the city yet are rejected by a few supervisors because it didn't say "incapacitated" and require 2-months of wrangling via the grievance process for the doctor's note to be accepted finally. The end-result is the same: discouraging employees from taking sick-leave while the CDC guidance says "stay home when you're sick."

Analysis 1: Financial effects of LWOP on mail-carriers: Many mail-carriers live paycheck-to-paycheck with many financial obligations: House mortgage/rentals, car payments, student loans payments, child-support payments. Many USPS mail-carriers are also active members of the military reserve forces with some require governmental clearances (which are at risk of losing clearances due to missed loan payments). Psychological effects include: Our abilities to heal from illness are reduced by financial concerns and the uncertainties of 2-months grievance-handling process.

Analysis 2: USPS already have other tools to fight fraudulent sick-leave abuse: Utilizing the Postal Inspector, the USPS can document fraudulent sick-leave abuse if someone call sick but go out fishing. The USPS currently employs teams of "watchers" who monitor social networks (Facebook, Instagram, Twitter) to find evidences of abuse.

Analysis 3: USPS already have "claw-back" mechanism for overpaying: If it is decided that a mail-carrier was paid sick-leave/annual-leave improperly, the USPS can always send a "Notice of Demand" to collect overpayments. The USPS should change the policy to allow sickleave/annual-leave as requested by the employee at the time of calling in sick and use claw-back mechanism later if needed.

Analysis 4: Comparison of LWOP and Uber/Lyft workers: Analyzing the media coverage, one major issue is the lack of sick-leave for gig-employees (Uber/Lyft) and employees of the low-wage restaurant industry (food servers, line-cooks, dish-washers...). Mail-carriers have sick-leave, but unable to be paid immediately due to LWOP and must wait 2 months (for the grievance handling) to be paid -- then, mail-carriers are treated no better than the other workers with no sick-leave benefits at all.

Analysis 5: Conflicts between "Pay For Performance" evaluation of supervisors/managers vs. CDC guideline: Supervisors/managers are evaluated annually for Pay For Performance ratings/rankings. Utilization of Overtime Pay and utilization of Unscheduled Leave are major components of such evaluation. However, as described in this section. Such overemphasis on reducing Overtime Pay and Unscheduled Leave lead to policy implementations (such as charging LWOP
for sick-calls and wrangling over doctor's note) that has an effect of discouraging employees to "stay home when you're sick."

In summary, for all of the foregoing reasons, we are woefully unprepared for the coronavirus. It behooves me that if this is the first time you hear about these concerns, then what's going on with the Safety & Health Committees at the USPS and at the NALC -- they are the ones who are charged with our Safety& Health. The coronavirus challenge is unprecedented in its speed. We need quick solutions such as: suspending these policies (charging LWOP, wrangling over doctor's note) that discourage employees from "stay home when you're sick"). The supervisors/managers should be relieved of being evaluated on usage of Overtime/Unscheduled Absence due to the coronavirus challenge. Also, the "p-bottles" unhygienic/unsanitary practices must end ASAP.

Sincerely yours,

(b)(6)
Dear Postmaster General,

My name is (b)(6) and I reside at (b)(6). For almost one year I have been reporting my mail missing through your informed delivery app. I’ve sent reports to the postal inspector. Any important mail is stolen. IE. social security, w-2 s, bank statements, insurance, checks payable to me etc. the culprit is my landlord, (b)(6), a convicted thief and scam artist. He is an Israeli citizen of Russian extraction, and has absolutely zero respect for our laws.

He also steals Amazon packages and resells them on eBay, mailing the stolen merchandise through USPS. I implore you to investigate this man and deal with him forthwith. Thank you in advance for your attention to this matter.

Respectfully yours,

(b)(6)
Thanks,

Megan

Subject: [EXTERNAL] Long Driveway Policy

Ms. Brennan,

I will get right to the point. I am a 20+ year rural carrier in South Jersey. Recently, in the interest of “safety” and to avoid any backing accidents, we have been ordered not to drive our vehicles down ANY long driveways, regardless of ample accommodations to turn around and retrace safely. There is unyieldingly NO EXCEPTIONS. We have been instructed to leave notices for customers to pick up their packages or accountable items at the post office. We are an EXTREMELY rural community with a majority of homes with driveways in excess of 200 feet and/or in secluded wooded lots obscuring our view of the home from the street. Additionally, some homes are located 10-15 miles from their local post office!

This policy, fully implemented a few days ago has begun a huge public outcry of disgust and outright hatred for our already damaged reputation. Customers have begun calling Consumer affairs, their congressmen, and complaining to Amazon that the few packages still entrusted to the USPS care and now not being delivered!

This new policy is completely undermining the purpose of our very existence: to “deliver”. If my customers wanted to drive to pick up their packages they would have gone to Walmart. Some of my elderly and feeble customers order their heavier items to be delivered to their door so as to avoid having to carry the weight themselves. I’m sure UPS, FedEx, and Amazon will be more than willing to pick up our slack!

In a world where people want to get paid for doing nothing, my fellow rural carriers and I are begging You to let us give good customer service, because these are more than customers to us. In many cases, they are our friends and neighbors. This policy not only hurts our brand but also our personal reputations in the communities we serve.

Your prompt attention in this matter is greatly appreciated.

Sincerely,

(b)(6)
Mendonca, Pat - Washington, DC

Thanks,

Megan
Hi, I'm a PTF in Minnesota and I want to tell you one simple way to save $100,000's for the Postal Service. ONLY HAVE CURBSIDE DELIVERY AND ONLY APPROVE THE LARGEST BOXES.

Delivery goes so smoothly and quickly like this. I have spent countless hours FIGHTING with cluster boxes. They WASTE time, they DO NOT save time!!!

They COST the Postal Service money!!

When we have to go up to the door with every small package because either

1. The cluster box is full.
2. We're running Amazon and don't know which address is in which cluster box.
3. The parcels lockers are all used.
4. It's a small package but odd shaped.
5. We're running Amazon and don't have the arrow key for that town.

it WASTES our time!!!

Probably 85-90% of packages will fit in the large mailboxes. That would save us a TON of time and effort and would save the Postal Service $100,000's.

I work seven 13 hour days a week at Christmastime. I DESPISE it and I'm not the only one. We need our time better managed at work, these cluster boxes waste so much of our time thereby costing USPS $100,000's.

It's just common sense to us carriers and we've been SCREAMING it for years but NO-ONE LISTENS! Bluntly, CLUSTER BOXES ARE A PAIN IN THE ASS! They cause us continual problems....frozen shut, don't open, don't lock, don't shut, nothing fits; TOTAL NUISANCE!! Not to mention we freeze to death here in Minnesota delivering to them. And...most CUSTOMERS hate them too!
It would be so simple to just require customers to keep only the LARGEST boxes up. I hope you can see my point and fix the situation. I actually know of carriers who have quit just BECAUSE of the misery cluster boxes cause us!

I know you probably think they save USPS money but believe me, they DON'T AT ALL! They COST USPS money!!

Well, I "said" my piece, hope it doesn't fall on deaf "ears" and something is done about it.

Thanks for your time.🙂
Thank you.

Megan

Hi Megan,

I am so sorry to contact you like this. I wanted to get a CC of the email I sent Jeff Bezos to your hands. I really need your help. See email below please.

We are LOVING our local postmaster (b)(6) WA and Sub Contractor (b)(6) who is picking up our packages for delivery - but I cant support them if we dont get communication or resolve in the next couple of hours. UPS is currently working on stealing your business because I haven't heard from you guys I have to start the negotiation process – please get me an answer soon – USPS is my preferred vendor.

Only way to reach me is my cell (b)(6)

Subject: USPS not communicating with me about ability to supply flat rate packaging envelopes
Importance: High

Hi [b]J[b](b)

Sorry to bother you again. USPS seems to be unable to supply me with communication on flat rate packaging supplies in order to fill my Amazon orders. I ran out of their supplies on flat rate padded last night. They aren’t communicating to their team members trying to support me either (who have been awesome). Victory packaging has been contacted, but at best they will have me a few days of supplies to me by FRIDAY and that’s a MAYBE.

I was promised (as my contact [b](b)) – in copy here -at USPS was) yesterday by 1 PM to have an answer from the Executive team at the USPS (see attached email). We are getting NO ANSWER.

Here is what I need:

1. I will buy the same padded flat rate envelope they use – it will be unprinted plain white (I have these pre-purchased in my warehouse now 10,000 of them). I will still buy flat rate packaging pricing from them – the label will say FLAT RATE PADDED ENVELOPE. Then they ship it.
2. OR – they can communicate with me how many they are shipping to me so I can make sure my supply chain will support me.
3. OR – you can have someone at UPS or FEDEX at the decision making level reach out to me to match the postal flat rate – I will shift the business to them as fast as possible. We are trying to reach them but stuck with account manager that don’t have decision making capabilities.

Using a cubic pricing option from USPS will NOT work for me – in some cases it costs me over $2.50 to ship per package. I have to use flat rate only or I will be paying customers to order from me – we have slim margins.

I DO NOT WANT to raise my prices. I want my company and Amazon to be known for taking care of people trying to supply and NOT price gouging. Jeff – I have my supply chain set up – I will fulfill EVERY order placed thru Amazon – I just need to be able to ship.

I look at myself as a partner extension to you – the decisions I make affect how Amazon is portrayed – is there anyone at the EXECUTIVE USPS level you can lean on to help them make the choice to let me buy the envelope and ship using flat rate?
PS – thanks for approving my second AMAZON Lending request. We are going to use the money to air freight packaging in from my plant overseas to try and stay in stock.

Again – if anyone needs to reach me I am available on my cell at (b)(6)

Thanks,

(b)

As an auditor, I could not let this most recent criminal act go. Multiple neighbors have complained to the Postmaster concerning improper delivery of mail, packages being stuffed improperly in boxes, packages delivered with obviously broken items inside, and mail opened. On multiple occasions, our Amazon USPS delivered packages have been purposefully placed in our neighbors unlatched mailboxes, because the postal delivery person, apparently didn’t want to get out of their vehicle to properly deliver the packages because they were too big to fit in our secure mailbox. (Please notice, we have no gate or animals that would prevent or impede door step delivery.) Most recently, the postal deliverer has now damaged property to avoid delivering our mail properly. We have a lockbox with an open slat/slot for mail delivery. This was purchased by the property owners to avoid mail theft. However, on March 3, 2020, our mail delivery person has now broken our safety latch mail box to stuff Amazon packages in it that wouldn’t fit through the slat/slot. With our mail box latch broken, the door would not close properly, so the mail carrier left the door hanging open with the stuffed Amazon packages exposed and seen from the street. A picture of our damaged property and how it was left was documented.

I am writing and bringing this matter to the attention of you and anyone else that will hear and handle this matter. I am not a lawyer or a postal carrier, but I believe that purposefully misplaced mail and damaged property is federally illegal and against USPS delivery protocol.

Please have someone address this matter and replace our damaged property. This type of delivery service exposes and invites our neighbors to become victims of fraud and theft. Therefore, the DOJ and other federal agencies will be contacted as well concerning this matter and others matters that are and have been of similar concern.
I have had an issue with the Postmaster where we get mail at our PO Box in a different town, Maine and occasionally Amazon or a different company has sent mail to our street address as well as another carrier dropped packages at the post offices do the confusion of who exactly was going to be the carrier for the items and there never was an issue until she took over at that post office as well as when she. Worked in and used to return items and didn’t even call us although a very small town to say we had something before just returning it. She apparently told UPS they couldn’t leave package there and they came to house and told me a few months ago and then called the postmaster in and told them not to call us to get anything there anymore and make extra effort. This I find unbelievable and actually received complaints in the past of even a rug yes a very large item being returned years ago by the Post Office and that person sending it couldn’t believe they just didn’t call us to say it was there rather than sending it back to them as they do at many post offices and now MS think has over stepped her bounds in a power struggle actually calling another Post Master telling them they can’t be polite. There also are many complaints on the Website about MS rude behavior referred to as lady long blonde hair as she always does seem annoyed and not to want to want to bother. Can you please inform me if this is actually a rule that the post office can not call a customer on occasion if a price of mail shows up there rather than refusing it especially in very small towns where there aren’t thousands of small letters and packages as MS she would have if she did this but rather Towns of a few hundred or thousand with less than that in homes getting mail so why would she say she would have thousands of prices of mail in a day to call people in a small town like is beyond me or large packages like rugs she has to return.
And as I said Amazon usually uses UPS but occasionally it’s USPS which we don’t know ahead of time and very rarely a stray letter that’s important and the current postmaster is courteous and went out of her way to call and nod was ordered by MS (b)(6) to return anything she gets or send to (b)(6) which I think is totally uncalled for and I’m wondering if beyond MS (b)(6) duties and something MS (b)(6) should try to do in fact to help her customers out rather than stamping her customers packages return as I hear the PO Box customers complaining there about returned packages to the street address and it’s hard to believe she can’t accept packages using the (b)(6)t per the form and would end up with thousands of packages as she said nor needed to call (b)(6) t and tell them they cannot make a courtesy call nor can she in occasion to be polite rather than rude.
Thanks,

Megan

Ms Brennan,

My name is (b)(6). I have filed several complaints with regards to my packages not being delivered. Today was another day. I was waiting on a package from amazon and around 6:30pm I received notification that there was an attempted delivery at 12:00noon. MY family and I were home all day. The package required no signature and could be left.

I went and chased out going camera's on the house from 10am - 7:00pm. There was not a single attempt nor a single USPS vehicle on our street at all during the day. This has now happened to me 4 times and my neighbors are having the same problem.

The last time it happened I was told by the local USPS office I had to come down and get it they would not try to redeliver it. I went down to pick it up and after the supervisor got done yelling at me she told me it was out for delivery. That was a 1 hour round trip drive for me. When I returned home the package was laying in my driveway right outside my garage soak n wet in the rain. There is a sign asking not to leave packages in front of the garage because twice before they leave packages and I have backed out of my garage and ran them over.

So long story short no attempted deliver yesterday (and 3 times prior win different packages) and no USPS driver on my cameras. No signature required so it should have been left. This means one thing and my neighbors agree the driver is lazy and probably decided not to work that day.

I spoke to amazon and this seems to be a on going problem and getting worse.

Again the supervisor is a pretty mean lady and I normally wont call people out but she is 100% in the wrong and so are the drivers.
Please let me know you received this I would prefer this gets handled through the proper chain instead of on social media. Some of my neighbors are very famous people some of whom I manage.

Thank you
Pat,

(b)(5)

Thanks,

Megan

-Tom
Maloney, Connolly, and King to Hold
Press Conference on Launch of Bipartisan
“Postal Preservation Caucus”

Members to Discuss Legislation to Save the Postal Service

Washington, D.C. (April 30, 2020)—Today, Rep. Carolyn B. Maloney, the Chairwoman of the Committee on Oversight and Reform, Rep. Gerald E. Connolly, the Chairman of the Subcommittee on Government Operations, Rep. Peter King, the Ranking Member of the House Committee on Homeland Security’s Emergency Preparedness Subcommittee, will hold a telephone press conference to announce the launch of the bipartisan “Postal Preservation Caucus” to urge House and Senate leadership to provide emergency funding to save the Postal Service.

Due to the coronavirus crisis, the Postal Service estimates revenue losses of $13 billion by the end of this fiscal year. Over the next ten years, the Postal Service estimates that losses caused by the coronavirus would be $54 billion.

WHO: Reps. Maloney, Connolly, King

WHAT: Press Conference to Save the Postal Service

WHEN: Thursday, April 30, 2020 at 3:00 PM

Media please RSVP to OversightPress@mail.house.gov by 1:00 PM today for dial-in information. Please also provide the number from which you will be calling.
###

**Cosponsor H.R. 6425: The Protect Our Post Offices Act**

**Cosponsors (70):** Reps. Adams, Axne, Beatty, Blumenauer, Blunt Rochester, Bonamici, Boyle, Brownley, Carbajal, Castor, Chu, Cicilline, Clark, Cleaver, Cohen, Costa, Courtney, Dean, DeGette, DelBene, Dingell, Doyle, Escobar, Evans, Gabbard, Garamendi, Garcia (IL), Garcia (TX), Vicente Gonzalez, Grijalva, Haaland, Hastings, Hayes, Heck, Higgins, Horsford, Holmes Norton, Johnson (GA), Kaptur, Keating, Kind, Krishnamoorthi, Langevin, Lee (CA), Lowenthal, Malinowski, McGovern, Meeks, Moulton, Murphy, Omar, Panetta, Pappas, Perlmutter, Peters (CA), Phillips, Pingree, Pocan, Raskin, Ryan, Schiff, Scott (GA), Sewell, Sires, Smith (WA), Swalwell, Takano, Underwood, Wild, Wilson (TX)

**Supported by:** The National Association of Postal Supervisors, The Association of United States Postal Lessors

Dear Colleague,

In this time of crisis, the United States Postal Service is more important than ever. Please join me by cosponsoring H.R. 6425, The Protect Our Post Offices Act, a bill to provide emergency funding for the U.S. Postal Service. For particularly vulnerable individuals, the postal service may be the only way they can receive medications or other critical documents right now. Yet, without assistance from the federal government, this typically self-funding agency may not be able to sustain itself much longer.

The Protect Our Post Offices Act would allocate **$25 billion** in emergency appropriations to the United States Postal Service. These funds can be used by USPS to make up lost revenue, purchase and provide PPE for front-line postal workers, and other purposes that are necessary to support continuing services for USPS.

The USPS employs 620,000 workers, and provides critical services such as delivering prescriptions, the 2020 Census, and mail-in ballots in addition to regular mail delivery. These services become even more crucial in the time of a global pandemic that has greatly limited in-person contact.

Unfortunately, the pandemic has also accelerated financial problems USPS already faced. Officials have warned that because of the decrease in mail volumes, the Postal Service may run out of funding as soon as June of this year.

USPS estimates a net loss of **$22 billion over the next eighteen months**, and over **$54 billion in the long term**, as a result of this pandemic. We must protect our constituents and local postal workers by ensuring the postal service can continue to provide on-time mail delivery and protect front-line workers during the COVID-19 pandemic.

Please join me in ensuring thousands of postal employees can continue to provide us with
essential services during this pandemic and provide emergency funding for USPS.

To become a cosponsor or for more information, please contact Abbie Callahan.

Sincerely,

Joe Neguse

Thomas J. Marshall
General Counsel and Executive Vice President
United States Postal Service

[Image]
WASHINGTON, D.C. (April 30, 2020)-Today, Rep. Carolyn B. Maloney, the Chairwoman of the Committee on Oversight and Reform, Rep. Gerald E. Connolly, the Chairman of the Subcommittee on Government Operations, Rep. Peter King, the Ranking Member of the House Committee on Homeland Security's Emergency Preparedness Subcommittee, will hold a telephone press conference to announce the launch of the bipartisan "Postal Preservation Caucus" to urge House and Senate leadership to provide emergency funding to save the Postal Service.

Due to the coronavirus crisis, the Postal Service estimates revenue losses of $13 billion by the end of this fiscal year. Over the next ten years, the Postal Service estimates that losses caused by the coronavirus would be $54 billion.

WHO: Reps. Maloney, Connolly, King
WHAT: Press Conference to Save the Postal Service
WHEN: Thursday, April 30, 2020 at 3:00 PM

Media please RSVP to OversightPress@mail.house.gov by 1:00 PM today for dial-in information. Please also provide the number from which you will be calling.

###

Cosponsor H.R. 6425: The Protect Our Post Offices Act

Supported by: The National Association of Postal Supervisors, The Association of United States Postal Lessors

Dear Colleague,

In this time of crisis, the United States Postal Service is more important than ever. Please join me by cosponsoring H.R. 6425, The Protect Our Post Offices Act, a bill.
to provide emergency funding for the U.S. Postal Service. For particularly vulnerable individuals, the postal service may be the only way they can receive medications or other critical documents right now. Yet, without assistance from the federal government, this typically self-funding agency may not be able to sustain itself much longer.

The Protect Our Post Offices Act would allocate $25 billion in emergency appropriations to the United States Postal Service. These funds can be used by USPS to make up lost revenue, purchase and provide PPE for front-line postal workers, and other purposes that are necessary to support continuing services for USPS.

The USPS employs 620,000 workers, and provides critical services such as delivering prescriptions, the 2020 Census, and mail-in ballots in addition to regular mail delivery. These services become even more crucial in the time of a global pandemic that has greatly limited in-person contact.

Unfortunately, the pandemic has also accelerated financial problems USPS already faced. Officials have warned that because of the decrease in mail volumes, the Postal Service may run out of funding as soon as June of this year. USPS estimates a net loss of $22 billion over the next eighteen months, and over $54 billion in the long term, as a result of this pandemic. We must protect our constituents and local postal workers by ensuring the postal service can continue to provide on-time mail delivery and protect front-line workers during the COVID-19 pandemic.

Please join me in ensuring thousands of postal employees can continue to provide us with essential services during this pandemic and provide emergency funding for USPS.

To become a cosponsor or for more information, please contact Abbie Callahan.

Sincerely,
Joe Neguse
Member of Congress

Coronavirus Is Threatening One of Government's Most Ubiquitous Services: The Mail.
The Postal Service needs billions to continue funding its operations and make other payments, the agency told lawmakers.
By Nicholas Fandos and Jim Tankersley
* April 9, 2020, 2:16 p.m. ET

WASHINGTON - The coronavirus pandemic is ravaging the United States Postal Service, with mail volume down by nearly a third already compared to same time last year and dropping quickly, as businesses drastically cut back on solicitations, advertisements and all kinds of letters that make up the bulk of mail service's bottom line.
The falloff comes even as package delivery has surged - but not by nearly enough to offset the losses from mail volume.
The result, the Postal Service told Congress on Thursday, is a multibillion-dollar financial shortfall that could cause one of the government's oldest and most reliable entities to run out of cash by the end of September and throw regular delivery into doubt at a time when Americans may still be trapped at home.
Megan J. Brennan, the postmaster general, told lawmakers on the House Oversight and Reform Committee on Thursday that the agency believed it would need $25 billion in federal grants to cover lost revenue from the pandemic, plus an additional $25 billion to update aging infrastructure. Another $14 billion is needed to pay off long-term debt related to the Postal Service's retirement benefits program along with $25 billion in unrestricted borrowing authority to weather the rapidly unfolding crisis, she said, according to officials familiar with the information she shared privately, who described it on condition of anonymity.
Even with an increase in online shopping and package delivery to Americans cooped up at home, the agency could see a 50-percent reduction in total mail volume by the end of June, compared to the same period last year, Ms. Brennan told the lawmakers. Postal officials fear a sizable portion of that lost mail may never return.
In total, the Postal Service anticipates losing $13 billion in revenue this fiscal year because of the pandemic and another $54 billion in losses over 10 years.
"They are chilling numbers," said Representative Gerald E. Connolly, Democrat of Virginia, who leads the House subcommittee responsible for the Postal Service. "The reaction of a lot of my colleagues - their jaws were dropping. It is one thing to say the Postal Service is suffering. It is another to hear these specifics."

As Congress spends trillions of dollars to try to save private businesses with loans and grants, the Postal Service has emerged as an unusual sticking point, bogged down by a long-running debate over its future. The agency does not normally use taxpayer money, but has struggled in recent years under mounting debt.

House Democrats are ready to give the Postal Service most of what it is asking for. But President Trump has so far rejected direct relief, repeatedly saying the Postal Service could solve its own woes simply by raising prices on packages delivered for big online retailers like Amazon.

Steven Mnuchin, the Treasury secretary, squashed a bipartisan attempt to send the agency emergency funds last month, insisting instead that his department be given new authority to lend up to $10 billion to the Postal Service on terms it helps set, other officials familiar with the negotiations said.

Ms. Brennan told lawmakers on Thursday that the agency was already in talks with the Treasury about the potential loan, but its revenue predictions suggest that money would not be enough if the crisis continues.

For now, the mail service, which operates under government-mandated service requirements, has continued uninterrupted. Even as scores of its more than 600,000 person work force have fallen ill and some have died, mail sorters and carriers have continued to walk their routes in every corner of the country, in many cases the only physical lifeline Americans now have to the outside world. They deliver medicines, election ballots, coronavirus test kits and packages ordered online.

But the administration's position has fanned fears among some lawmakers, postal union representatives and others who rely on the service that Trump administration officials are willing to let the postal network essentially go bankrupt to force its leaders to accept an overhaul to the postal business model that many conservatives have long sought - one that could limit delivery service and aid commercial competitors like FedEx and UPS.

In a statement to The New York Times, Ms. Brennan said the Postal Service was "at a critical juncture," quickly losing revenue because demand for its most profitable postal products was "plummeting as a result of the pandemic."

"At a time when America needs the Postal Service more than ever, the reason we are so needed is having a devastating effect on our business," she said. "The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover."

She called on Congress to "shore up the finances of the Postal Service, and enable us to continue to fulfill our indispensable role during the pandemic, and to play an effective role in the nation's economic recovery."

Negotiators on Capitol Hill had reached a tentative deal last month to provide the Postal Service around $13 billion dollars in direct relief as part of the $2 trillion CARES Act. The figure would have been far below a proposal by House Democrats, but it had the buy-in of a key Republican negotiator: Senator Ron Johnson of Wisconsin, the chairman of the Senate Homeland Security and Governmental Affairs Committee, according to the officials familiar with the talks, where were not authorized to publicly discuss them.

But Mr. Mnuchin said the administration would not have it. The Treasury secretary told lawmakers that a direct infusion of cash was a non-starter, and advocated instead for creating the $10 billion in new lending authority. Department officials did not respond to a request to comment Thursday on postal issues.

Mr. Connolly said Thursday that he would recommend House leadership promptly back the new, higher figures presented by the Postal Service.

"We weren't shooting for the moon. We weren't solving all the problems. We were just trying to get them through," Mr. Connolly said. "The question is, will the Republicans join us?"

Some Republican lawmakers remain open to direct cash payments, as well, under certain circumstances. Historically, the Postal Service has counted on strong support from Republicans representing rural districts, where their service is a lifeline to homes and small businesses. But it is unclear if they would allocate the funds without imposing reform requirements on the agency or if they are willing to overpower Mr. Mnuchin and the White House.

An independent executive agency, the Postal Service has not taken federal funding in decades, running instead off revenue raised from stamps and other postal products. But since the 2008 financial crisis, it has struggled to stay in the black, weighed down largely by a congressional mandate to pre-fund its retirement benefits programs.

The agency has stopped making those payments in recent years, running up billions of dollars in debt, while its mail delivery business has otherwise remained profitable. Lawmakers in both parties have proposed overhauls to the service along the way, but none have stuck.

The postal unions and Democrats fear that the Trump administration is now trying to take advantage of the coronavirus crisis to push through a long-sought overhaul of the Postal Service that would benefit private package carriers and eliminate certain
costly rural delivery routes. Mr. Trump has frequently criticized the service for not charging higher prices to deliver packages for large online retailers like Amazon - a company he has sometimes singled out in his Twitter tirades on postal issues. Aides have said the president’s criticisms often followed critical stories about his administration published by the Washington Post, which is owned by Amazon founder Jeff Bezos. He repeated the criticism this week, as he appeared to reject calls for a cash bailout. Asked about Mr. Connolly’s proposal, he said the congressman should focus instead on raising package delivery prices.

"Tell your Democrat friend that he ought to focus on that, because if he focused on that, he could truly save the Post Office," the president said.

Mr. Trump ordered a review of the Postal Service and its pricing policies in 2018. His administration published the review in December of that year. Its recommendations included steps that could reduce the frequency of mail delivery and increases in the prices of sending some packages. Online retailers criticized the recommendations, which they said could particularly hurt rural customers.

The report did not spur any action in Congress last year. But a longtime congressional advocate of changes to the service, Mark Meadows of North Carolina, recently took over as Mr. Trump's chief of staff. Critics of the report fear the White House could be trying to use the pandemic as another opening.

"At the end of the day, they have an agenda," said Mark Dimondstein, the president of the American Postal Workers Union, which represents 200,000 postal workers. "Raise prices, reduce worker benefits, and reduce services, make it appear more profitable and set it up for sale."

"The Covid crisis should not be used to achieve political aims," he added.

A lobbying group on postal issues that includes Amazon and other online retailers, the Package Coalition, raised concerns this week that the strings Treasury officials might attach to postal loans could raise prices during a pandemic that has made Americans more dependent on package delivery.

"The Treasury has the Postal Service over a $10-billion barrel, and the Postal Service is on the brink of bankruptcy," said the coalition’s chairman, the former Army secretary John M. McHugh. "What do you do? We're worried they'll accept the terms."

White House debated halting travel from South Korea, Italy

Why it matters: Senior Trump administration officials ultimately decided against the move because they believe the coronavirus is spreading too quickly to be contained.

Reeling Postal Service Faces Coronavirus Financial Headwinds

April 3, 2020, 9:44 PM
Louis C. LaBrecque
Reporter

- Covid-19 is accelerating decline of first-class, ad mail volume
- Halt in service possible by late June or early July: union chief

The U.S. Postal Service is facing “a rapid drop in mail volumes and a significant loss in needed revenues” because of the novel coronavirus that could lead to a halt in mail delivery. Though the $2 trillion stimulus (Public Law 116-136) signed by President Donald Trump last month included a $10 billion line of credit for the Postal Service, the USPS is concerned this isn’t sufficient “to withstand the significant downturn in our business that could directly result from the pandemic,” spokesman David Partenheimer said Friday.

“Under a worst-case scenario, such a downturn could result in the Postal Service having insufficient liquidity to continue operations,” Partenheimer said. This could affect “access to communications and essential packages such as prescription drugs,” particularly in rural areas, he said.

Without additional funds, the USPS will run out of money by late June or early July, said Ronnie Stutts, president of the National Rural Letter Carriers Association, which represents about 130,000 postal workers. What’s needed is the $25 billion in cash that was stripped from the House version of the stimulus bill when it reached the Senate because of pressure from the White House, Stutts said. House Democrats are looking to again include the money in the next stimulus bill, he said.

With about 634,000 mostly union-represented workers, the service is the hub of the U.S. mailing industry and the roughly 7.5 million jobs it supports. The USPS reported a net loss of $8.8 billion in fiscal 2019 and lost another $748 million during the first quarter of fiscal 2020, which ended Dec. 31. Postmaster General Megan Brennan, who planned to retire Jan. 31 before delaying her retirement to allow the Postal Service to find a new
Chief, told Congress last April that the service will run out of money by 2024 without action from federal lawmakers.

Praise for USPS Response

Stutts and Paul Hogrogian, president of the National Postal Mail Handlers Union, in separate interviews said Brennan and the USPS are working to ensure continued mail delivery and employee safety during the coronavirus crisis.

“They are doing everything they can” to protect employees, including providing protective equipment and allowing employees who are sick or who need to take time away from work to care for family members to stay home, said Hogrogian, whose union represents about 47,000 USPS workers.

The Postal Service has “hundreds of thousands” of bottles of hand sanitizer available now and another 600,000 bottles will be arriving during the first half of April, Stutts said. The USPS also has about 15 million masks on hand to protect employees, he said.

According to information sent to postal unions Friday, 4,420 postal workers have been affected in some way by the coronavirus, including those in self-imposed or mandatory quarantine and 294 employees who tested positive, Stutts said. The Postal Service has about 630,000 employees and the people who tested positive for Covid-19 weren’t necessarily exposed on the job, he said. The numbers for rural letter carriers are much smaller—14 have tested positive, Stutts said.

Though many rural carriers are close to their customers, Stutts implored the public to be safe in their interactions. “That’s what we want to relate to the American people. Please keep your distance from the rural carriers,” he said.

Hi Ron and Mike,

Wanted to share this House Dear Colleague letter being passed around by Rep. Joe Neguse (D-CO) in an effort to get cosponsors for H.R. 6425, The Protect Our Post Offices Act. As you can see, there are already 70 cosponsors and it is supported by the National Association of Postal Supervisors and The Association of United States Postal Lessors.

Thanks,
Kate

Supported by: The National Association of Postal Supervisors, The Association of United States Postal Lessors

Dear Colleague,
In this time of crisis, the United States Postal Service is more important than ever. Please join me by cosponsoring H.R. 6425, The Protect Our Post Offices Act, a bill to provide emergency funding for the U.S. Postal Service. For particularly vulnerable individuals, the postal service may be the only way they can receive medications or other critical documents right now. Yet, without assistance from the federal government, this typically self-funding agency may not be able to sustain itself much longer.

The Protect Our Post Offices Act would allocate $25 billion in emergency appropriations to the United States Postal Service. These funds can be used by USPS to make up lost revenue, purchase and provide PPE for front-line postal workers, and other purposes that are necessary to support continuing services for USPS.

The USPS employs 620,000 workers, and provides critical services such as delivering prescriptions, the 2020 Census, and mail-in ballots in addition to regular mail delivery. These services become even more crucial in the time of a global pandemic that has greatly limited in-person contact.

Unfortunately, the pandemic has also accelerated financial problems USPS already faced. Officials have warned that because of the decrease in mail volumes, the Postal Service may run out of funding as soon as June of this year[1]. USPS estimates a net loss of $22 billion over the next eighteen months, and over $54 billion in the long term, as a result of this pandemic. We must protect our constituents and local postal workers by ensuring the postal service can continue to provide on-time mail delivery and protect front-line workers during the COVID-19 pandemic.

Please join me in ensuring thousands of postal employees can continue to provide us with essential services during this pandemic and provide emergency funding for USPS.

To become a cosponsor or for more information, please contact Abbie Callahan at abbie.callahan@mail.house.gov.

Sincerely,

Joe Neguse
Member of Congress

KATE FOGARTY
Associate

COVID-19 Assistance To The Postal Service: Three Things To Know

At this writing, Congress seems poised to provide billions in financial assistance to the U.S. Postal Service (USPS) to ensure that it will be able to continue to operate amid the COVID-19 pandemic.

The action needs to be taken and is not unexpected. Unlike many entities, however, the USPS’s financial problems started well before COVID-19.

USPS has been on the U.S. Government Accountability Office’s (GAO’s) High-Risk List of government agencies since 2009. The Postal Service had previously warned in a January 2020 report that it could run out of cash as soon as 2021. It has a negative net worth exceeding $65 billion and unfunded liabilities of more than $140 billion.

Congress, which has not taken any action to reform the Postal Service, would be best served to have the following core approaches for the current crisis and beyond.

Provide loans and not grants. The U.S. Treasury already provides $11 billion to USPS in a near-zero interest loan. USPS is limited to borrowing $3 billion annually from Treasury. The borrowing cap should be eliminated, and Treasury should have the discretion about when and how much is provided in additional loans to USPS.

Existing debt should not be forgiven. There is a push to eliminate the $11 billion that USPS owes Treasury, i.e., taxpayers. For at least the foreseeable future, this debt should be kept on the Postal Service’s balance sheet, particularly as liquidity will not be a problem if Treasury has greater authority to make additional loans. Eliminating the debt would saddle taxpayers with this obligation. It would also set a troubling precedent regarding the more than $140 billion in unfunded liabilities USPS now has.
Structural reforms must be implemented by July 1, 2021. For more than a decade, Congress has failed to act on GAO’s warnings about USPS being on the High-Risk List. Keeping the debt on the USPS books makes clear the real scope of USPS challenges and the need for reform. Absent major reform soon, USPS losses will continue to accelerate. While forgiving some debt might be reasonable in a “grand bargain” of Postal Reform, forgiving the debt now just further kicks the can down the road.

(b)(5)
WASHINGTON - The coronavirus pandemic is ravaging the United States Postal Service, with mail volume down by nearly a third already compared to same time last year and dropping quickly, as businesses drastically cut back on solicitations, advertisements and all kinds of letters that make up the bulk of mail service's bottom line. The falloff comes even as package delivery has surged - but not by nearly enough to offset the losses from mail volume.

The result, the Postal Service told Congress on Thursday, is a multibillion-dollar financial shortfall that could cause one of the government's oldest and most reliable entities to run out of cash by the end of September and throw regular delivery into doubt at a time when Americans may still be trapped at home.

Megan J. Brennan, the postmaster general, told lawmakers on the House Oversight and Reform Committee on Thursday that the agency believed it would need $25 billion in federal grants to cover lost revenue from the pandemic, plus an additional $25 billion to update aging infrastructure. Another $14 billion is needed to pay off long-term debt related to the Postal Service's retirement benefits program along with $25 billion in unrestricted

**Coronavirus Is Threatening One of Government's Most Ubiquitous Services: The Mail.**

The Postal Service needs billions to continue funding its operations and make other payments, the agency told lawmakers.

By Nicholas Fandos and Jim Tankersley

* April 9, 2020, 2:16 p.m. ET

WASHINGTON - The coronavirus pandemic is ravaging the United States Postal Service, with mail volume down by nearly a third already compared to same time last year and dropping quickly, as businesses drastically cut back on solicitations, advertisements and all kinds of letters that make up the bulk of mail service's bottom line. The falloff comes even as package delivery has surged - but not by nearly enough to offset the losses from mail volume.

The result, the Postal Service told Congress on Thursday, is a multibillion-dollar financial shortfall that could cause one of the government's oldest and most reliable entities to run out of cash by the end of September and throw regular delivery into doubt at a time when Americans may still be trapped at home.

Megan J. Brennan, the postmaster general, told lawmakers on the House Oversight and Reform Committee on Thursday that the agency believed it would need $25 billion in federal grants to cover lost revenue from the pandemic, plus an additional $25 billion to update aging infrastructure. Another $14 billion is needed to pay off long-term debt related to the Postal Service's retirement benefits program along with $25 billion in unrestricted
borrowing authority to weather the rapidly unfolding crisis, she said, according to officials familiar with the information she shared privately, who described it on condition of anonymity.

Even with an increase in online shopping and package delivery to Americans cooped up at home, the agency could see a 50-percent reduction in total mail volume by the end of June, compared to the same period last year, Ms. Brennan told the lawmakers. Postal officials fear a sizable portion of that lost mail may never return.

In total, the Postal Service anticipates losing $13 billion in revenue this fiscal year because of the pandemic and another $54 billion in losses over 10 years.

"They are chilling numbers," said Representative Gerald E. Connolly, Democrat of Virginia, who leads the House subcommittee responsible for the Postal Service. "The reaction of a lot of my colleagues - their jaws were dropping. It is one thing to say the Postal Service is suffering. It is another to hear these specifics."

As Congress spends trillions of dollars to try to save private businesses with loans and grants, the Postal Service has emerged as an unusual sticking point, bogged down by a long-running debate over its future. The agency does not normally use taxpayer money, but has struggled in recent years under mounting debt.

House Democrats are ready to give the Postal Service most of what it is asking for. But President Trump has so far rejected direct relief, repeatedly saying the Postal Service could solve its own woes simply by raising prices on packages delivered for big online retailers like Amazon.

Steven Mnuchin, the Treasury secretary, squashed a bipartisan attempt to send the agency emergency funds last month, insisting instead that his department be given new authority to lend up to $10 billion to the Postal Service on terms it helps set, other officials familiar with the negotiations said.

Ms. Brennan told lawmakers on Thursday that the agency was already in talks with the Treasury about the potential loan, but its revenue predictions suggest that money would not be enough if the crisis continues.

For now, the mail service, which operates under government-mandated service requirements, has continued uninterrupted. Even as scores of its more than 600,000 person work force have fallen ill and some have died, mail sorters and carriers have continued to walk their routes in every corner of the country, in many cases the only physical lifeline Americans now have to the outside world. They deliver medicines, election ballots, coronavirus test kits and packages ordered online.

But the administration's position has fanned fears among some lawmakers, postal union representatives and others who rely on the service that Trump administration officials are willing to let the postal network essentially go bankrupt to force its leaders to accept an overhaul to the postal business model that many conservatives have long sought - one that could limit delivery service and aid commercial competitors like FedEx and UPS.

In a statement to The New York Times, Ms. Brennan said the Postal Service was "at a critical juncture," quickly losing revenue because demand for its most profitable postal products was "plummeting as a result of the pandemic."

"At a time when America needs the Postal Service more than ever, the reason we are so needed is having a devastating effect on our business," she said. "The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover."

She called on Congress to "shore up the finances of the Postal Service, and enable us to continue to fulfill our indispensable role during the pandemic, and to play an effective role in the nation's economic recovery."

Negotiators on Capitol Hill had reached a tentative deal last month to provide the Postal Service around $13 billion dollars in direct relief as part of the $2 trillion CARES Act. The figure would have been far below a proposal by House Democrats, but it had the buy-in of a key Republican negotiator: Senator Ron Johnson of Wisconsin, the chairman of the Senate Homeland Security and Governmental Affairs Committee, according to the officials familiar with the talks, where were not authorized to publicly discuss them.

But Mr. Mnuchin said the administration would not have it. The Treasury secretary told lawmakers that a direct infusion of cash was a non-starter, and advocated instead for creating the $10 billion in new lending authority. Department officials did not respond to a request to comment Thursday on postal issues.

Mr. Connolly said Thursday that he would recommend House leadership promptly back the new, higher figures presented by the Postal Service.

"We weren't shooting for the moon. We weren't solving all the problems. We were just trying to get them through," Mr. Connolly said. "The question is, will the Republicans join us?"

Some Republican lawmakers remain open to direct cash payments, as well, under certain circumstances.

Historically, the Postal Service has counted on strong support from Republicans representing rural districts, where their service is a lifeline to homes and small businesses. But it is unclear if they would allocate the funds without imposing reform requirements on the agency or if they are willing to overpower Mr. Mnuchin and the White House.

An independent executive agency, the Postal Service has not taken federal funding in decades, running instead off revenue raised from stamps and other postal products. But since the 2008 financial crisis, it has struggled to stay in
The black, weighed down largely by a congressional mandate to pre-fund its retirement benefits programs.
The agency has stopped making those payments in recent years, running up billions of dollars in debt, while its mail
delivery business has otherwise remained profitable. Lawmakers in both parties have proposed overhauls to the
service along the way, but none have stuck.
The postal unions and Democrats fear that the Trump administration is now trying to take advantage of the
coronavirus crisis to push through a long-sought overhaul of the Postal Service that would benefit private package carriers and eliminate certain
costly rural delivery routes.
Mr. Trump has frequently criticized the service for not charging higher prices to deliver packages for large online
retailers like Amazon - a company he has sometimes singled out in his Twitter tirades on postal issues. Aides have said the president's criticisms often followed critical stories about his administration published by the
Washington Post, which is owned by Amazon founder Jeff Bezos.
He repeated the criticism this week, as he appeared to reject calls for a cash bailout. Asked about Mr. Connolly's
proposal, he said the congressman should focus instead on raising package delivery prices.
"Tell your Democrat friend that he ought to focus on that, because if he focused on that, he could truly save the Post Office," the president said.
Mr. Trump ordered a review of the Postal Service and its pricing policies in 2018. His administration published the
review in December of that year. Its recommendations included steps that could reduce the frequency of mail delivery and
increases in the prices of sending some packages. Online retailers criticized the recommendations, which they said
could particularly hurt rural customers.
The report did not spur any action in Congress last year. But a longtime congressional advocate of changes to the
service, Mark Meadows of North Carolina, recently took over as Mr. Trump's chief of staff. Critics of the report fear
the White House could be trying to use the pandemic as another opening.
"At the end of the day, they have an agenda," said Mark Dimondstein, the president of the American Postal Workers
Union, which represents 200,000 postal workers. "Raise prices, reduce worker benefits, and reduce services, make it
appear more profitable and set it up for sale."
"The Covid crisis should not be used to achieve political aims," he added.
A lobbying group on postal issues that includes Amazon and other online retailers, the Package Coalition, raised
concerns this week that the strings Treasury officials might attach to postal loans could raise prices during a
pandemic that has made Americans more dependent on package delivery.
"The Treasury has the Postal Service over a $10-billion barrel, and the Postal Service is on the brink of bankruptcy," said the coalition's chairman, the former Army secretary John M. McHugh. "What do you do? We're worried they'll accept the terms."
Mike,

Good morning,

Thank you kindly
Ellisa
Good Morning Mr. Grossmann and Mr. Marshall,

Attached please find GAO draft report titled: U.S. Postal Service: Congressional Action to Enable a Sustainable Business Model is Essential (GAO-20-385). Also attached is a Technical Comments template to use as a guide if providing technical comments.

Please provide a written response to the report and technical comments, if any, to (b)(6), (b)(3), 410(c)(2) by the April 10th due date.

Thank you kindly,

Ellisa
USPS HQ Corporate Audit Response Management (CARM)
Thank you,
Sally

Trump administration considers leveraging emergency coronavirus loan to force Postal Service changes

President Trump has railed for years against what he sees as mismanagement of the agency, which he argues has been exploited by sites such as Amazon

April 23, 2020 at 4:36 p.m. EDT

The Treasury Department is considering taking unprecedented control over key operations of the U.S. Postal Service by imposing tough terms on an emergency coronavirus loan from Congress, which would fulfill President Trump's longtime goal of changing how the service does business, according to two people familiar with the matter.

Officials working under Treasury Secretary Steven Mnuchin, who must approve the $10 billion loan, have told senior officials at the USPS in recent weeks that he could use the loan as leverage to give the administration influence over how much the agency charges for delivering packages and how it manages its finances, according to the two people, who spoke on the condition of anonymity because the talks are preliminary.

Trump has railed for years against what he sees as mismanagement at the Postal Service, which he argues has been exploited by e-commerce sites such as Amazon, and has sought to change how much the agency charges for delivery packages. (Amazon's founder and chief executive Jeff Bezos owns The Washington Post.)

Under the $2 trillion coronavirus stimulus relief passed last month<https://www.washingtonpost.com/business/2020/03/25/trump-senate-coronavirus-economic-stimulus-2-trillion/> , the Treasury was authorized to loan $10 billion to the USPS, which says it may not be able to make payroll and continue mail service uninterrupted past September. Mnuchin rejected a bipartisan Senate proposal to give the Postal Service a bailout amid the negotiations over that
legislation, a senior Trump administration official and a congressional official previously told The
Post.

The borrowing terms have only been discussed among both agencies' leadership and have not been made public
because the Postal Service hasn't officially requested the loan, the two people familiar with the matter said. Mnuchin
could still decide not to pursue tough terms as the September deadline nears. The Postal Service would not have to
use the entire $10 billion loan at one time, but could borrow up to that amount at any given time.

In discussions with senior USPS personnel, Treasury officials have said they are interested in raising rates on the
Postal Service's lucrative package business, its sole area of profitability in recent years. Treasury could also review
all large postal contracts with package companies to push for greater margins on deliveries.

Treasury officials have said they may press the agency to demand tougher concessions from its powerful postal
unions - among the public-sector unions that still retain significant leverage in negotiations with the government.

The officials have also said Mnuchin wants the authority to review hiring decisions at the agency's senior levels,
including the selection of the next postmaster general, a decision that until now has been left to the Postal Service's
five-member board of governors.

USPS spokesman David Partenheimer confirmed in an email that the agency and Treasury have begun "preliminary
discussions" over the loan, but that the Treasury had not yet asked "to impose any of those conditions on that
borrowing authority." He declined to say whether these or any other terms were under discussion.

A Treasury spokesman said the department began preliminary discussions on the terms of the loan, but said it was
too early to comment on those conversations.

Amazon did not respond to requests for comment.

The Postal Service has repeatedly drawn on an open $15 billion line of credit Congress authorized nearly 30 years
ago, as the agency's finances have been squeezed by the demise of the traditional mail business and rising pension
costs. That loan comes without any terms and low interest rates. USPS has paid down the debt in recent years, but
has never fully paid off the loan. On April 1, the Postal Service borrowed another $3 billion to help weather the
pandemic, bringing the agency up to $14.4 billion from that line of credit.

Usually, the agency's business decisions are made by its Board of Governors, who are appointed by the president,
and an independent entity called the Postal Regulatory Commission, which ensures that the Postal Service charges
rates for its services that cover its costs.

If Mnuchin were to gain greater control through the new loan, a slew of Postal Service management decisions,
including the terms of major contracts and collective bargaining strategy, could require Treasury's approval. Hiring
and firing of senior executives could be required to be run by Treasury, the two people familiar with the matter said.

Trump has taken aim at the Postal Service since early in his tenure, initially urging the
agency to double the rates it charges Amazon and other firms for delivery.

The agency has been decimated by the decline in first-class mail over recent decades, but one bright spot has been
package delivery. The Postal Service competes vigorously with UPS and FedEx and even Amazon's own delivery
services, and it specializes in the "last mile" delivery to a customer's home.

Trump frequently repeats the claim that higher package rates on Internet shipping companies - Amazon, in particular-
could ease the Postal Service's financial troubles. The Postal Service has repeatedly defended its arrangement with
the e-commerce giant, saying it gets fair rates for the services it provides in a highly competitive environment.

Higher Postal Service rates could hurt the USPS by artificially raising its price above those of UPS and FedEx,
analysts say. It would also hit Amazon, because the company contracts for "last mile" deliveries more frequently than its competitors.

UPS spokeswoman Kara Gerhardt Ross in an emailed statement called the Postal Service "an important partner for us in delivering to communities," especially during the pandemic. "At the same time, the USPS would benefit from modernizing both their cost attribution methodologies to reflect the past decade's growth in the competitive package market," she said.

FedEx did not respond to a request for comment.

The familiar mail carriers in the USPS's iconic blue and white trucks have continued delivering mail and packages to a country under quarantine. The Postal Service remains a vital conduit of information for the dwindling proportion of the population that isn't online.

A Postal Service spokesman said 1,219 workers of the Postal Service's 630,000-person workforce have tested positive for the coronavirus. Forty-four workers have died, according to the American Postal Workers Union, one of several labor groups that represents USPS employees.

The Postal Service is projecting a $13 billion shortfall this year because of the pandemic, with mail volume down about 30 percent since the virus forced businesses to scale back advertisements, catalogues and other mail. A jump in package deliveries to homebound customers has not fully compensated for those losses.

Postmaster General Megan Brennan asked lawmakers this month for an $89 billion bailout that would include funding to make up for losses because of the pandemic, new money for modernization and $39 billion in restructured debt.

The Postal Service's plight has recently been attracting the attention of lawmakers in both parties. Sen. Bill Cassidy (R-La.) told donors on a call last week that he would wanted postal unions to make concessions on salaries and benefits to help the Postal Service's finances. Senate Minority Leader Charles E. Schumer (D-N.Y.) said Tuesday that relief for the Postal Service should be part of a "Phase IV" stimulus package.

At an Oval Office meeting more than a year ago, Trump decried to aides what he viewed as the dysfunction of the Postal Service and reiterated long-standing grievances about the costly effect on American taxpayers, according to one former senior administration official present at the meeting.

Trump has repeatedly demanded changes to the agency's financial structure. Mnuchin has taken on the cause, and has since been repeatedly briefed on potential solutions, the former official said.

"People around [Mnuchin] thought it was crazy because people have been trying to figure this out for years, and it's very politically challenging," the former official said.

But the treasury secretary has so far found a career staff at the Postal Service that has resisted his efforts at change. Mnuchin created a task force that released a 74-page study in 2018 that called for some of the same reforms Treasury may ask for now, namely cutting labor costs, restructuring third-party service agreements and increasing package rates.

"Require price increases, reduce service costs, or exit the business for any mail products that are not deemed an essential service and do not cover their direct costs," the report recommended.

But the recommendations went nowhere, in part because the agency lacked a quorum on the Board of Governors. They also faced political opposition in Congress and among union ranks to curtailing postal routes and other services.

Last fall, Mnuchin sent his deputies to present a new board largely made of up Trump appointees with a slate of changes that attached terms to the remainder of the Postal Service's customary $15 billion line of credit, breaking with a nearly five-decade precedent of generous terms of postal borrowing.
But career postal staff balked at the terms and USPS leadership swiftly rejected them.

"Treasury is going to want to see some of these recommendations implemented," said Paul Steidler, a postal expert at the Lexington Institute, a conservative think tank focused on security-related issues.

Democrats say Mnuchin will be making a mistake if he tries to impose stringent terms on the new loan.

"If Mnuchin wants to play this kind of game with the Postal Service, I think it is time for the Postal Service to tell him they're not going to agree to unacceptable conditions, and that means Mnuchin will have on his hands the disruption of services this fall," said Rep. Gerald E. Connolly (D-Va.), who chairs the House subcommittee in charge of postal oversight. "I think it's time to stare him down and this White House down, and for Congress to decide are we going to stand with the Postal Service as we know it.

"This is an essential service and it needs to be treated as such. My hope would be that the Postal will stare him down. If they don't, it's tantamount to handing over day-to-day management to the Treasury Department."

"We strongly urge you to make this loan to the Postal Service in a timely manner, under fair terms that comply with the intent of the Cares Act," the letter states. "We expect the Treasury Department to fully comply with federal statutes and refrain from setting any conditions that would infringe on the Postal Service's statutory authorities."

Staff writers Josh Dawsey and Jeff Stein contributed to this report.

WHITE HOUSE PRESS BRIEFING
April 7, 2020

In attendance:
Pres. Donald J. Trump
Dr. Deborah Birx, White House Coronavirus Response Coordinator
Dr. Anthony Fauci, NIH Director
Seema Verma, Chief Centers for Medicare & Medicaid Services

Underway at 5:45 p.m. I signed off at 7 p.m. Found at this link: https://www.c-span.org/video/?471020-1/white-house-coronavirus-task-force-briefing

President Trump:
Thank the American people for doing their part to stop the spread
Project Air Bridge had five planes with protective equipment land recently with 27 scheduled over the future in the next several weeks
Army corp of engineers building facilities to house thousands of patients
Remind governors sharing real time data is important
Working hard on a vaccine. Great early results
10 drugs in active trials with 15 more to follow
1.87 million tests have been performed to date
Ensure the country can meet the needs of mental health requirements for those under stress at this time
Getting economic relief to citizens. As of today small business has processed $70B in loans
Will ask congress to provide an additional $250B to the paycheck protection
Asking for people to use #americaworkstogether when talking about how we're helping one another
Thanking construction workers and health care workers for their hard work

Vice President Pence:
Number of cases beginning to stabilize
Evidence Americans are social distancing
Take the guidance passed down by your states seriously
Spoke to more than 500 business owners. Enthusiastic about the paycheck protection program
$60 B of forgivable loans have been distributed
Thanked workers in food supply for their hard work (farmers, truckers, grocers, etc.)
Continuing to send ventilators across the country
Correction from yesterday: FEMA update from the State of California made 500 ventilators available

Dr Fauci:
Diseases disproportionately affect POC populations, specifically African American population
Try to give them the best possible care when they arrive at the hospital for care

Dr Birx:
Talking about the latest numbers of victims and how many pieces of equipment is being moved to prevent expansion and spread of the virus

Q&A from media:

Q. asked to Trump - $250B added to the paycheck protection today, for a total of $650B is that enough?
A: Hundreds of thousands of applications are being submitted and we're going to help the little companies

Q: asked to Trump - Economic task force. When will that happen?
A: we may be getting to the top of the curve, and we want to be on the downside and prepare to move forward

Q: 36:39 asked to trump - My second question from a colleague, Congressman Jerry Connelly. A Democrat from Northern Virginia told the local DC CBS station you personally requested the CARES act stimulus bill of $25 billion for the Postal Service. He claims unless the USPS gets that money, they will be out of business by June. He accuses you of hastening the demise of the Postal Service.
A: The Postal Service has lost billions fo dollars a year for many years. I'm not the demise of the Postal Service? I will tell you who it the demise of the Postal Service, these internet companies that give their stuff to the Postal Service, packages. I don't run the Postal Service.

You have a group of people, so-called independent people who run it. But these packages are, they lose money every time they deliver a package for amazon or these other internet companies. These other companies that deliver. They drop everything at the Post Office and say you deliver it. If they would raise the prices by, actually a lot, then you would find out that the Post Office could make money or break even. But they don't do that. I'm trying to figure out why. These are independent boards appointed by other administrations, sort of long-term, there for a long time. I've been talking to them. You can look it up. Take a look.

They should have to raise prices to these companies that walk in and drop thousands of packages on the floor of the Post Office and say deliver it. They make money, but the Post Office gets killed, ok? They ought to do that and we are looking into it and have been pushing them now for over a year, and you know that because you have seen the stories-stories I am pushing on them. It is not fair. He's (?) great, wonderful modern companies walk into these Post Offices with all these routes that could never be built, going to areas you could never do, and they say deliver this.

They lose a lot of money per package and have to raise their prices, but this Postal Commission doesn't do it. We had a chance to appoint a couple people onto the commission, as I understand, and that's good. But they have to raise the prices. Otherwise they will just lose a lot of money, and tell your democrat friend he ought to focus on that. If he focused on that, he could truly save the Post Office. The Post Office has been losing billions of dollars a year for many years. Have him take a look at that, that's the way to solve the problem.

Q: 41:03 - There's voting going on today in Wisconsin, and reports of thousands of people waiting in hours-long line, having to weigh their own personal health and their civic responsibility. Do you think the Supreme Court was right in saying voting should go forward and the absentee extension-(cut off by trump)
A: LOOK, DISCIPLINE COURT, OF COURSE THEY WERE RIGHT -- THE SUPREME COURT, OF COURSE
THEY WERE RIGHT. WHAT THE DEMOCRATS WANTED. I SUPPORTED A GUY NAMED JUSTICE KELLY, A HIGHLY -- JUSTICE KELLY, A HIGHLY RESPECTED JUSTICE. HE'S A FANTASTIC JUDGE, JUSTICE, AND I ENDORSED HIM. AS SOON AS I ENDORSED HIM, THEY WANTED TO MOVE THE ELECTION. THEY DIDN'T WANT TO MOVE THE ELECTION. AS SOON AS I ENDORSED HIM, THE WISCONSIN DEMOCRATS SAID, LET'S MOVE THE ELECTION TO TWO MONTHS LATER. THEY DIDN'T MIND HAVING THE ELECTION UNTIL I ENDORSED HIM, WHICH IS INTERESTING. NOW THEY TALK ABOUT SAFETY. WELL, IT WAS 15 MINUTES AFTER I PUT OUT AN ENDORSEMENT THAT THEY SAID WE HAD TO MOVE THE ELECTION.

THEY DIDN'T WANT TO MOVE THE ELECTION BEFORE THAT. THE OTHER THING THEY WANT TO DO, WHICH IS CRAZY, AT THE END OF THE ELECTION THEY WANTED TO HAVE ONE WEEK FOR PROXIES TO COME IN, OR MAIL BALLOTS. MAIL BALLOTS, THEY CHEAT. MAIL BALLOTS ARE VERY DANGEROUS FOR THIS COUNTRY BECAUSE OF CHEATERS. THEY GO COLLECT THEM. THEY ARE FRAUDULENT IN MANY CASES. THEY HAVE TO VOTE. THEY SHOULD HAVE VOTER ID, BY THE WAY.

BUT THE DEMOCRATS, AND THIS WAS TURNED OVER IN THIS UP IN COURT, I GIVE GREAT CREDIT TO THE COURT, THEY DIDN'T WANT TO HAVE ELECTION DAY. THEY WANTED ELECTION DAY, AND A WEEK AFTER ELECTION DAE THESE BALLOTS COME IN, THESE MAILED BALLOTS. THE MAIL BALLOTS ARE CORRUPT, IN MY OPINION. THEY COLLECT THEM, GET PEOPLE TO GO SIGN THEM. FORGERIES, IN MANY CASES. IT'S A HORRIBLE THING. SO WHAT HAPPENED, THE DEMOCRATS IN WISCONSIN HAD NO PROBLEM WITH THE ELECTION BEING TODAY, UNTIL I ENDORSED THE REPUBLICAN CANDIDATE, JUSTICE DANIEL KELLY.

AS SOON AS I ENDORSED HIM, THEY WENT CRAZY, THEY WENT CRAZY, AND YOU KNOW THAT'S TRUE. GO BACK TWO WEEKS, TWO DAYS. THEY DIDN'T WANT TO MOVE THE ELECTION. THEY WERE HAVING THE ELECTION BECAUSE THEY THOUGHT THEY WOULD WIN THE ELECTION,, AND THEN I ENDORSED HIM AND NOW I UNDERSTAND THERE ARE LINES GOING BACK A LONG WAY. I HOPE THEY WILL VOTE FOR JUSTICE KELLY, OK?

How coronavirus could be the 'final straw' for the U.S Postal Service
Ben Werschkul<https://www.yahoo.com/author/ben-werschkul>
Yahoo Finance<http://finance.yahoo.com/>April 1, 2020

The U.S. Postal Service has been in trouble for some time. Now, the coronavirus crisis has come along and made everything much worse.

Mail volume (and the accompanying revenue) could be down 50% this year, according to some estimates. The already teetering Postal Service could run out of money soon. That fear, combined with widespread concerns about letter carriers exposed to the virus, has put some lawmakers into a fatalistic mindset.

Rep. Gerry Connolly (D-Va.) put it bluntly: "We need to start thinking in those apocalyptic terms," he said in an interview with Yahoo Finance Tuesday, "because we are about to face the apocalypse."

The current crisis is "in many ways the final straw," said Connolly, who is chairman of the House subcommittee that oversees the Postal Service. He believes that without some sort of intervention it will run out of cash in June.

'There's a growing anxiety'
Questions of safety are now dogging the service. "There's a growing anxiety that they're at risk and that there's not sufficient resources to protect them even in the most minimal of ways like hand sanitizers or gloves or the like," Connolly said.

Two weeks ago, ProPublica published a report saying that some postal employees were continuing to work after displaying COVID-19 symptoms, and seemingly healthy employees had insufficient protection against the virus.

Postmaster General Megan J. Brennan responded to some of the concerns on Wednesday during a Board of
Governors session: "We are promoting healthy behaviors and protocols and encouraging any employee who feels sick to stay home," she said. "In order to further encourage this behavior, we have updated our leave policies to allow liberal use of leave."

Brennan also acknowledged some supply problems in the recent past saying, "we are continuing to work to overcome gaps in the supply chain to insure that our employees have access to hand sanitizer masks and gloves."

But questions are likely to keep coming. Sen. Cory Booker and other New Jersey Democrats wrote a letter to Postmaster General Brennan last week expressing a series of concerns and questions. On Tuesday, Sen. Bernie Sanders sent another letter raising similar questions.

A spokesperson for Booker told Yahoo Finance that his office has not received an answer but remains hopeful that we can work with the service "to implement stronger workplace protections for the safety and well-being of USPS employees as well as the millions of Americans who depend on their services."

"The health and well-being of our employees is always our first thought in facing the COVID challenge," the Postmaster General said on Wednesday. She also underlined that the CDC, WHO, and Surgeon General all "have all said that there is very low risk that this virus is spread through mail which should be a comfort to us all and to the public."

Connolly agreed the risk of transmission via mail is low, but "if we made sure that all of our postal workers had access to hand sanitizers and gloves, we could come close to eliminating the risk." A lack of guidance or protection for letter carriers "is very imprudent and puts people at some risk. Not a high risk, but a risk."

The USPS has made one change: it no longer requires customer signatures. Letter carriers will instead - from a distance - request the customer's information and enter it themselves.

'They're going to run out of cash in June'

The USPS operates as a self-supporting, independent federal agency - sort of halfway between an independent business and a government agency. It likes to tout that the service "receives no tax dollars," instead paying for itself from the sale of postage, products and services.

During the phase 3 negotiations, Connolly and other House Democrats proposed changing that by eliminating outstanding debt and allotting $25 billion to further shore up USPS finances. They even wrote a letter to Sen. Mitch McConnell "to seek your urgent help."

They also want to repeal a mandate imposed in the Postal Act of 2006, which they say denies the USPS a chance to be profitable, arguing that the rule requires the Postal Service to pre-fund retirement health benefits for its employees. It's a financial burden that puts "the Postal Service in a straight jacket," according to Connolly, and has been the focus of repeal attempts for years.

The push didn't work. The final package, signed into law by President Trump last Friday, included $10 billion in additional borrowing authority with strings attached.

The National Association of Letter Carriers, a union representing postal employees, responded: "That is woefully inadequate."

Connolly says that some of the conditions on the $10 billion (including more of a Treasury role in management) was "an unacceptable condition for everybody," and he still sees the USPS going out of business within months if nothing is done.

Then USPS and 'Phase 4' negotiations

The Postal Service has been gradually shrinking for years as outfits like UPS and Fedex Express (not to mention email) encroach further on its business. Total mail volume has shrunk from 170.9 billion pieces of mail in 2010 to 146.4 billion in 2018.

Yet advocates note the USPS still serves important functions, from delivering prescription drugs to Social Security
checks. It also remains the only option in some rural areas where; as the National Association of Letter Carriers points out, "private companies rely on the USPS for last-mile delivery."

The USPS is also how millions of Americans who don't have direct deposit information on file with the IRS will receive their $1,200 stimulus checks.

And then there's perhaps the most politically fraught factor: "We're also counting on the Postal Service to save our election process," Connolly said amid questions about whether November's elections will need to be done through the mail given concerns about voting in person. "What if there's no Postal Service?" he said. "Well, that could affect the outcome of an election."

Trump has not discussed the Postal Service at length since the coronavirus crisis began. On March 23 he thanked "the hardworking men and women of Federal Express, UPS, the United States Postal Service, and the truckers who are maintaining our supply chains and supply lines."

But Connolly claims that, behind the scenes, Trump himself was instrumental in killing aid to the USPS. He said Trump personally axed direct aid to the service. House Speaker Nancy Pelosi "said this came directly from Trump and she has reiterated that more than once," Connolly said.

The White House did not offer comment on Connolly's claim.

On Tuesday, during an appearance on MSNBC, Pelosi reiterated that Postal Service funding is crucial in a phase 4 deal largely to keep voting by mail as a viable option.

"I'm going to continue like a dog and a bone on this issue," said Connolly, "because we won't appreciate the criticality of it until the worst happens, and I'm trying to prevent the worst from happening."

Subject: FW: Wash Post: story on Trump USPS comments today

FYI - In his Friday bill signing of a new $500 billion relief package, Trump called the Postal Service "a joke"<https://twitter.com/jeffmason1/status/1253723682595315712> and confirmed the Post's reporting, suggesting that the Postal Service quadruple the rates they charge for shipping packages<https://twitter.com/PhilipRucker/status/1253727138810863616> if they want federal government assistance, the Post's Phil Rucker reported – click on links above as well for twitter mentions.

Thanks.

Trump says he will block coronavirus aid for U.S. Postal Service if it doesn’t hike prices immediately
The president said the postal agency should quadruple its package delivery prices and said he will stop congressionally approved funding
By

April 24, 2020 at 1:19 p.m. EDT

President Trump on Friday said he would not be approving an emergency loan for the U.S. Postal Service if it did not immediately raise its prices for package delivery, confirming a recent Washington Post article that said he planned to exert more control over the agency.

Trump recently signed a law that allowed the cash-strapped U.S. Postal Service to borrow $10 billion from the Treasury Department. The Post has reported<https://www.washingtonpost.com/business/2020/04/23/10-billion-treasury-loan-usps/?tid=lk_inline_manual_4&itid=lk_inline_manual_4> that the White House wants to force changes at USPS as part of the terms of the loan. Trump confirmed on Friday that one of those new conditions is a requirement that the Postal Service raise prices.

“If they don’t raise the price, I’m not signing anything.”
He said that he won’t allow Treasury Secretary Steven Mnuchin to approve the loan if prices aren’t raised.

Trump has railed for years against what he seems as mismanagement at the Postal Service, which has been battered by a decline in first-class mail in the Internet age – but which has found profitability with package delivery. The agency’s revenues have plunged about 30 percent during the pandemic, though, as business mail has declined.

Trump and his allies have frequently claimed that higher package rates on Internet shipping companies — Amazon, in particular — could ease the Postal Service’s financial troubles. But higher package rates could hurt the agency by artificially raising its prices above those of United Parcel Service and FedEx, analysts say. Higher prices also could impact Amazon, which acts as both retailer and shipper, by forcing it pass off higher costs on its customers to compete.

The Postal Service repeatedly has defended its arrangement with the e-commerce giant, saying it gets fair rates for the services it provides in a highly competitive environment.

This is a developing story and will be updated.

Privacy Act Statement: Your information will be used to enable participation in USPS and related events conducted via Zoom meeting and video web conferencing, to enhance your online meeting experience by utilizing enhanced features and functionality that facilitate information sharing and cross-functional participation, such as voluntary polling to gather responses from attendees to generate reports or the chat feature, along with sharing of your personal image via your device camera to enable virtual face-to-face conversations, if you chose to do so. Collection is authorized by 39 USC 401, 403, and 404. Supplying your information is voluntary, but if not provided, you will not be able to access the web conferencing application or participate using all of the features and functionality available through Zoom during the USPS online meeting or event. We do not disclose your information to third parties without your consent, except to act on your behalf or request, or as legally required. This includes the following limited circumstances: to a congressional office on your behalf; to agencies and entities to facilitate or resolve financial transactions; to a U.S. Postal Service auditor; for law enforcement purposes, to labor organizations as required by applicable law; incident to legal proceedings involving the Postal Service; to government agencies in connection with decisions as necessary; to agents or contractors when necessary to fulfill a business function or provide products and services to customers; and for customer service purposes. For more information regarding our privacy policies visit [www.usps.com/privacypolicy](http://www.usps.com/privacypolicy).

Privacy Act Statement: Your information will be used to enable participation in USPS and related events conducted via Zoom meeting and video web conferencing, to enhance your online meeting experience by utilizing enhanced features and functionality that facilitate information sharing and cross-functional participation, such as voluntary polling to gather responses from attendees to generate reports or the chat feature, along with sharing of your personal image via your device camera to enable virtual face-to-face conversations, if you chose to do so. Collection is authorized by 39 USC 401, 403, and 404. Supplying your information is voluntary, but if not provided, you will not be able to access the web conferencing application or participate using all of the features and functionality available through Zoom during the USPS online meeting or event. We do not disclose your information to third parties without your consent, except to act on your behalf or request, or as legally required. This includes the following limited circumstances: to a congressional office on your behalf; to agencies and entities to facilitate or resolve financial transactions; to a U.S. Postal Service auditor; for law enforcement purposes, to labor organizations as required by applicable law; incident to legal proceedings involving the Postal Service; to government agencies in connection with decisions as necessary; to agents or contractors when necessary to fulfill a business function or provide products and services to customers; and for customer service purposes. For more information regarding our privacy policies visit www.usps.com/privacypolicy<http://www.usps.com/privacypolicy>.

Hi Tom,

From: Ariel [b](5)

To: [b](5)

Subject: re: Seattle's Post Office

Hi there,

Ariel from Fight for Reform here. I’m getting ready to send this petition to Congress, but noticed that your digital signature is missing.

The U.S. Postal Service is a vital public resource. But right now, it’s at serious risk of running out of funding. If that happens, millions of people won’t be able to safely cast their mail-in ballots.

That’s why your signature is crucial. As of this afternoon, we’re missing key support from Washington Democrats.

If you have a moment, please sign on to SAVE the USPS: [https://go.fightforreform.org/page/m/702efac8/7e1be755/39acef0b/16660d1/2459390246/VEsE/?g=https%3A%2F%2Ft%3AyDpTv&r=RXB0T5D2B318A]

TELL CONGRESS: SAVE THE USPS <https://go.fightforreform.org/page/m/702efac8/7e1be755/39acef0b/16660d1/2459390246/VEsA/>

Thanks for your support,

Ariel G.

Fight for Reform <https://go.fightforreform.org/page/m/702efac8/7e1be755/39acef0b/16660d1/2459390246/VEsC/>

----Forwarded Message----

From: Fight for Reform

Subject: Elizabeth Warren’s warning: Save the Post Office in Seattle

To: rick@boht.com

*** BREAKING *** [https://go.fightforreform.org/page/m/702efac8/7e1be755/39acef0b/16660d1/2459390246/VEsD/]

TELL CONGRESS: SAVE THE USPS <https://go.fightforreform.org/page/m/702efac8/7e1be755/39acef0b/16660d1/2459390246/VEsB/>

The U.S. Postal Service is a vital public resource that is in serious danger. If it collapses, millions of Americans may not be able to vote in the post office.

That’s why Elizabeth Warren is sounding the alarms and demanding Congress take action to SAVE the USPS: [https://go.fightforreform.org/page/m/702efac8/7e1be755/39acef0b/16660d1/2459390246/VEsV/]

If you’re willing to fight for our elections and protect the USPS, sign on immediately: [https://go.fightforreform.org/page/m/702efac8/7e1be755/39acef0b/16660d1/2459390246/VEsP/]

TELL CONGRESS: SAVE THE USPS <https://go.fightforreform.org/page/m/702efac8/7e1be755/39acef0b/16660d1/2459390246/VEsH/?g=https%3A%2F%2Ft%3AyDpTv&r=RXB0T5D2B318A>

BOG Meets Virtually During COVID-19 Emergency
Governor Robert Duncan devoted his remarks largely to commending the USPS workforce for its work on the front lines delivering essential mail and packages and providing a vital link, particularly to remote communities and vulnerable senior citizens, during the COVID-19 crisis. See Page 2.

Report Calls for Improved Physical Security for Inspection
Forensic Laboratory Services (FLS), which analyzes evidence for the U.S. Postal Inspection Service, has effective controls for receiving, handling, and shipping evidence, although it could better safeguard evidence through improved physical security and consistent safety training. See Page 3.

Postal Notes
Congressman Joe Neguse Introduces Legislation to Protect Front Line Postal Workers and Ensure On-Time Mail Delivery During Coronavirus
Congressman Joe Neguse introduced legislation to provide emergency supplemental appropriations to the U.S. Postal Service amidst the coronavirus pandemic to protect local postal workers and post offices. See Page 3.

Thanks Governor Duncan, and I did eventually get your voice mail. I was on the 10th floor most of the day, and there are certain areas in this building where cell calls are often delayed. You do, however, have the correct number.

Let me know if you would prefer a call back. Otherwise, I will talk with you on Monday, barring any emergencies.

On Mar 27, 2020, at 1:23 PM, Marshall, Thomas J - Washington, DC <thomas.j.marshall@usps.gov> wrote:

Governor Barger, I have been on the run all day, and will call you back as soon as I get a moment to come up for air.

However, after our call yesterday, one additional item that occurred to me was whether we have any argument under the Defense Production Act that the Administrations can provide the Postal Service with personal protection equipment like protective gloves, hand sanitizer, disinfectant wipes, and the like, since we are performing an essential public service as part of the nation's critical infrastructure and this material is necessary to enable our folks to do their jobs safely? As you know some of these items, particularly hand sanitizer, are in short supply.

In any event, we are asking Michael Best to research the issue, and to provide us with their advice and guidance on how we might get this matter in front of the Administration. Given the connections of the Governors, I would also appreciate your thoughts on whether you could facilitate that conversation, once we know the answer if whether this is feasible under the Defense Production Act.

Thank you Tom.

Nothing new here as you know. We’re already doing all that.

Per our discussion this afternoon, are there other emergency measures POTUS has invoked besides the DPA and which could be used as a basis for regulatory relief?

As discussed, beyond funding issues the USPS board of Governors is curious about possible changes to the regulatory framework that can be accomplished by Executive order.

Have the lawyers looked at that?

Thanks,

John M. Barger

On Mar 26, 2020, at 5:35 PM, Marshall, Thomas J - Washington, DC <thomas.j.marshall@usps.gov> wrote:
Governor Barger,

Further to our conversation this evening, I am forwarding the preliminary research I received today from Michael Best. To cut the chase, I have set forth their initial recommendations below:

The USPS should:

1. engage Congress to assure passage of the CARES Act by the House without alteration to the section authorizing $10 Billion in direct loans;
2. immediately upon passage of the CARES Act, work with the Treasury Department to secure favorable terms for funds made available; and
3. continue to engage with Congress to secure additional authority for loans or loan guarantees in excess of the $10 Billion appropriated in the CARES Act if the current national emergency continues.

We will circle back to the firm to expand the scope of their research to add the items we discussed. In the interim, let me know if you have any questions or concerns, and I will talk to you soon.

Absolutely. Is there any chance you have availability in the afternoon? I am in a telephonic board meeting in the morning.

On Mar 27, 2020, at 5:45 PM, Weidner, Keith E - Washington, DC <Keith.E.Weidner@usps.gov> wrote:

Thanks very much, Stefan. I had a conversation with Tom Marshall and wanted to follow-up on a few things.

First, I wanted to see if you (and whoever else from your firm you think should join) are available for a conference call on Monday morning with a few of our Governors, plus Tom and I, to discuss what you have done so far and next steps. Preferably 11:00, but if that doesn’t work please let me know what your availability is.

Second, and in terms of next steps, there are a few additional matters that we would like you to consider that I wanted to put on your radar screen.

--A big pain point for our organization is securing sufficient personal protective supplies for our employees like hand sanitizer, gloves, disinfectant wipes, etc. We would like your guidance on whether there are any legal tools we could use to seek to secure such supplies, considering we are designated as critical infrastructure. If so, we would also like your guidance on the specific steps we should take with the Administration to leverage those tools. It appears from your DPA analysis that Title III might be relevant here; if not, perhaps another statute or Executive Branch tool might be.

--We would also like you to consider whether the Postal Service could be given additional pricing and product flexibility through some sort of executive action. As you may know, the Postal Service is limited in the types of products and services we can provide pursuant to statute and regulation, and is also subject to regulation by the Postal Regulatory Commission concerning our prices and products (see generally chapter 36 of title 39, US Code, and 39 CFR Chapter III). Our Board has been considering whether to pursue certain reforms to this statutory and regulatory construct as part of the legislative process (see attached document), but also wants you to research whether these or similar reforms could be pursued through non-legislative means. Regarding this issue, it might make sense to have a further call early next week so that I can walk you through the issues.
Keith, it was good speaking with you just now and I am glad to hear that our initial work product appeared to be what you were looking for as a first cut. As we discussed, this weekend we are pulling together comprehensive CARES Act analysis as pertains to USPS (both the specific provisions related to USPS and the other general credit facilities available under CARES). We will also be providing you with our analysis of other Executive Branch tools (Executive Orders, regulatory guidance, etc) which, candidly, do not appear as impactful as the CARES Act. In the interim, here is the more generalized CARES Act analysis I described which will form the foundation of our specific analysis tailored to the USPS:

LENDING COVID-19 OPPORTUNITIES
BUSINESS LENDING SUPPORTED BY FEDERAL RESERVE BANK
The Federal Reserve Bank (FRB) has announced a “Main Street Business Lending Program” is intended to provide relief to what the FRB cites as small to midsize businesses. While Congress’s focus has been on small businesses and consumers, FRB’s actions are focused on businesses that are basically healthy but in danger at these times because of the freeze-up in financial markets. Some have been insulated from the outbreak’s effect to this point, but rely on debt as part of their normal operations. Others have lost business because of the virus but could survive if they could borrow to cover their expenses. Several of the FRB’s actions are derived from actions taken 2008-2009 financial crisis. But some are new, like the FRB is considering lending money directly to large corporations, something it has never done before. The FRB has framed the program as “bridge financing” to help otherwise healthy companies keep their doors open and their workers employed during a period of disruption.

The three new programs that FRB announced on March 23, 2020 are:

1. Main Street Business Lending Program: This program is intended to support lending to eligible small and midsize businesses. Such a program is likely to depend on additional money from the Treasury Department. The FRB hasn’t yet provided program details.
2. Term Asset-Backed Securities Loan Facility, or TALF: This facility will mirror one the FRB used in 2008 to support consumer and business credit markets. The FRB has stated that it will use this facility to lend money to investors to buy securities backed by credit card loans and other consumer debt.
3. Support Financing for Corporate Debt Obligations: The FRB announced a new facility to address the lack of new financing in the roughly $6 trillion market for highly rated corporate debt by offering bridge loans for up to four years, which includes limits on the payment of dividends and stock buybacks for firms that defer interest payments on their loans. A facility aimed at unblocking the market for existing corporate debt, allowing the FRB to purchase
bonds already issued by highly rated companies and eligible exchange-traded funds, which have around $147 billion in investment-grade corporate debt.

**SMALL BUSINESS LENDING**

**SBA Economic Injury Disaster Loan Program (PRESIDENT EXECUTIVE ORDER)**

President Trump announced the administration’s action to provide relief to small businesses impacted by the coronavirus (COVID-19) through the Economic Injury Disaster Loan Program [https://www.sba.gov/disaster-assistance/coronavirus-covid-19](https://www.sba.gov/disaster-assistance/coronavirus-covid-19).

The SBA’s Economic Injury Disaster Loan program provides small businesses with targeted, low-interest working capital loans of up to $2 million that can provide economic support to small businesses to help overcome the temporary loss of revenue they are experiencing. These loans may be used to pay fixed debts, payroll, accounts payable and other bills that cannot be paid because of the disaster’s impact. The interest rate is 3.75% for small businesses. The interest rate for non-profits is 2.75%. SBA offers loans with long-term repayments in order to keep payments affordable, up to a maximum of 30 years. Terms are determined on a case-by-case basis, based upon each borrower’s ability to repay.

For any SBA EIDL loans made in response to COVID-19 before December 31, 2020, the SBA shall waive any personal guarantee on advances and loans below $200,000, the requirement that an applicant needs to have been in business for the 1-year period before the disaster, and the credit elsewhere requirement. During the covered period, SBA can approve and offer EIDL loans based solely on an applicant’s credit score, or use an alternative appropriate alternative method for determining applicant’s ability to repay.

The SBA is working with all states and territories to offer these loans. These loans are made available upon a formal request received from a state’s or territory’s Governor. Once a declaration is made for designated areas within a state, small businesses can apply for the disaster relief loan. The information on the application process for the Economic Injury Disaster Loan assistance will be made available to all affected communities as well as updated on SBA’s website [https://disasterloan.sba.gov/ela](https://disasterloan.sba.gov/ela). Here [https://disasterloan.sba.gov/ela/Declarations/Index](https://disasterloan.sba.gov/ela/Declarations/Index) are the states and territories that have Presidential and SBA declared disasters.

SBA spokesperson Carol Chastang has stated that SBA generally approves a state’s request no longer than 48 hours and SBA may take two to three weeks to make a decision once a loan application is submitted by a business. If the loan is approved, disbursement of funds can be made within five days of receiving the loan closing documents. Visit SBA’s webpage [https://disasterloan.sba.gov/ela](https://disasterloan.sba.gov/ela) to learn about eligible disaster areas, to apply online, and to check your application status. Business owners can call the disaster customer service center at 800-659-2955, or email disastercustomerservice@sba.gov [mailto:disastercustomerservice@sba.gov](mailto:disastercustomerservice@sba.gov). The deaf and hearing impaired may call 800-877-8339.

**SBA Paycheck Protection Loans (PPL) (CARES ACT)**

The Paycheck Protection Loan (PPL) is a new loan product within the SBA’s 7a Loan Program authorized for $349 billion. Both existing SBA lenders and new lenders brought into the program with the assistance of the Department of Treasury will be able to offer these loans to eligible small businesses.

The Paycheck Protection Program is 100 percent guaranteed by the SBA with an interest rate of 4%. The maximum loan amount is $10 million or 2.5 times the average monthly payroll based on the prior year’s payroll. The loan covers payroll costs including costs related to the continuation of group health care benefits during periods of paid sick, medical, or family leave, and insurance premiums; employee salaries, commissions, or similar compensations; payments of interest on any mortgage obligation (not to include prepayment of or payment of principal on a mortgage obligation); rent (including rent under a lease agreement); utilities; and interest on any other debt obligations that were incurred before February 15, 2020. Eligible borrowers must make a good faith certification that the loan is necessary due to the uncertainty of current economic conditions caused by COVID-19; they will use the funds to retain workers and maintain payroll, lease, and utility payments; and are not receiving duplicative funds for the same uses from another SBA program.

For eligibility purposes, requires lenders to, instead of determining repayment ability, which is not possible during this crisis, to determine whether a business was operational on February 15, 2020, and had employees for whom it paid salaries and payroll taxes, or a paid independent contractor. Small businesses and certain nonprofits, including 501(c)(3) organizations and 501(c)(19) veteran organizations, and tribal business concerns, with less than 500 employees as well as those that meet the current SBA size standards for the loan are eligible for the loan. Additionally, sole proprietors, independent contractors, federal small business contractors and self-employed individuals will also be eligible. Moreover, small businesses in the hospitality and food industry with more than one location could be eligible at the store and location level if the store employs less than 500 workers; meaning each store location could be eligible. If a franchisor appears in the SBA’s National Franchise Director, assistance will extend down to the franchisee at the store or location level.
To increase speed and turnaround time within this new loan product, more than 800 existing SBA-certified lenders, including banks, credit unions, and other financial institutions, have been delegated authority and SBA would be required to streamline the process to bring additional lenders into the program. Delegated authority allows the lenders to process, close, and service a loan without SBA review. This authority will also extend to lenders who join the program and make these loans.

All borrower and lender fees for the Paycheck Protection Loans are waived. The Credit Elsewhere Test, collateral requirements, and all requirements for personal guarantees under the Paycheck Protection Loans are waived. The loans have automatic deferrals of principal, interest, and fee for six months. Any portion of a loan that is not used for forgiveness purposes will have a maturity of not more than 10 years, and the guarantee for that portion of the loan will remain intact.

Small businesses can obtain both a new Paycheck Protection Loan and an SBA Economic Injury Disaster Loan (EIDL) so long as they cover different items. Flexibility is granted through no repayment penalties on either the Paycheck Protection Loan or the EIDLs and a refinancing option has been included.

1. **PPL Loan Forgiveness**
   As part of the PPL program, a loan forgiveness tool has been developed that allows businesses that maintain payroll continuity from February 15, 2020 through June 30, 2020 as defined by headcount, to request forgiveness on a Paycheck Protection Loan used on payroll costs, mortgage interest, rent, and utility pay over an 8 week period. The amount forgiven will be reduced proportionally by any reduction in employees retained compared to the prior year and reduced by the reduction in pay of any employee beyond 25% of their prior year compensation.
   The loan forgiveness program provides flexibility for businesses that re-hire workers that were previously laid off.
   To receive loan forgiveness, a business will have to work with a lender to justify their payroll was maintained through documentation. Lenders will be held harmless on decisions of eligibility and SBA will purchase the loan after the lender grants approval.

2. **SBA Express Loan Program**
   The maximum loan for a SBA Express loan was increased from $350,000 to $1 million through December 31, 2020, after which point the Express loan will have a maximum of $350,000. It also allows Veteran’s fee waivers for the 7(a) Express loan program to be permanently waived.

3. **Emergency Economic Injury Disaster Grant Program (EIDL) (CARES ACT)**
   An Emergency Grant is established to allow an eligible entity who has applied for an EIDL loan due to COVID-19 to request an advance on that loan, of not more than $10,000, which the SBA must distribute within 3 days.
   Applicants are not required to repay advance payments, even if subsequently denied for an EIDL loan.
   In advance of disbursing the advance payment, the SBA must verify that the entity is an eligible applicant for an EIDL loan. This approval shall take the form of a certification under penalty of perjury by the applicant that they are eligible.
   The advance payment may be used for providing paid sick leave to employees, maintaining payroll, meeting increased costs to obtain materials, making rent or mortgage payments, and repaying obligations that cannot be met due to revenue losses.
   An advance payment must be considered when determining loan forgiveness, if the applicant transfers into a loan made under SBA’s Paycheck Protection Program.
   SBA’s authority to carry out Emergency EIDL Grants expires on December 30, 2020.

4. **Existing 7(a), 504 or Microloan Product**
   SBA is required to pay the principal, interest, and any associated fees that are owed on the covered loans, which includes an existing 7(a) (including Community Advantage), 504 or microloan products, for a six month period starting on the next payment due. Loans that are already on deferment will receive six months of payment by the SBA beginning with the first payment after the deferral period. Loans made up until six months after enactment will also receive a full 6 months of loan payments by the SBA.
   SBA must make payments no later than 30 days after the date on which the first payment is due.
   SBA is required to still make payments even if the loan was sold on the secondary market.
   SBA is to encourage lenders to provide deferments and allows lenders, up until one year after enactment, to extend the maturity of SBA loans in deferment beyond existing statutory limits.
LENDING FOR ALL BUSINESS INCLUDING STATE AND LOCAL GOVERNMENTS (CARES)

Economic Stabilization and Assistance to Severely Distressed Sectors of the United States Economy" (ESF)
Provides for a $500 billion authorization for the Treasury Department to make loans, guarantees and "other investments" to support certain eligible businesses, as well as state and local governments.

1. Direct Lending, including:
   a. $25 billion for passenger air carriers, eligible businesses that are certified under part 145 of title 15, Code of Federal Regulations, and approved to perform inspection, repair, replace, or overhaul services, and ticket agents;
   b. $4 billion for cargo air carriers; and
   c. $17 billion for businesses important to maintaining national security (likely for Boeing).
(2) $454 billion, as well as any amounts available but not used for direct lending, for loans, loan guarantees, and investments in support of the Federal Reserve’s lending facilities to eligible businesses, states, and municipalities. Federal Reserve 13(3) lending is a critical tool that can be used in times of crisis to help mitigate extraordinary pressure in financial markets that would otherwise have severe adverse consequences for households, businesses, and the U.S. economy.

For the entire authorization, the Treasury Secretary would have authority to determine terms and conditions for the program, including the rates—which will be based on the risk and current average yield of Treasuries of comparable maturity.

Terms and Conditions Associated with the Loans:
For the three sector-specific categories, the Treasury Secretary may make loans to businesses that can demonstrate: (1) they are an eligible business to which credit is not reasonably available at the time of the transaction; (2) the intended obligation is prudently incurred; and (3) the loan or guarantee is sufficiently secured or made at a rate that reflects the risk and, to the extent practicable, is not less than an interest rate based on market conditions for comparable obligations prior to the outbreak of COVID-19.

Additional terms require an applicant from these three sectors to: (1) show, to the extent practicable, the duration of the loan or guarantee will not exceed 5 years; (2) forego buying back stock or paying dividends for common stock (except if contractually obligated to do so) for 12 months after the obligation is no longer outstanding; (3) maintain employment levels as of March 24, 2020, to the extent practicable, until September 30, 2020, - and not "in any case" reduce those employment levels by more than 10 percent; (4) certify that the business is "created or organized in the United States or under the laws of the United States and has significant operations in and a majority of its employees based in the United States; and (5) demonstrate that it incurred losses such "that the continued operations of the business are jeopardized."

Many, but not all, of these restrictions also apply to the broader loan category for other eligible businesses or state and local governments. Most important, for example, businesses receiving money from this pool are subject to the same restrictions on stock repurchase and dividend issuance, although the Secretary retains the authority to waive dividend restriction if it is in the interest of the U.S. government to do. (However, the Secretary must be prepared to potentially defend that decision before Congress.) The restriction that recipients be U.S. businesses applies to this pool as well, but the loan duration, employment level, and loss restrictions do not. Allows the U.S. government to share in the gains made pursuant to such loans applies to the three-sector specific industries - but not for the broader general business loan pool. Additionally, the Treasury Department must liquidate its interest in any authorized loan programs in this title as soon as possible to reasonably practical—while maximizing the U.S. government's interest.

Employee/Officer Compensation Provisions limit officers or employees who earned in excess of $3 million in total compensation in calendar year 2019 from earning, in 2020, total compensation more than the sum of $3 million plus 50 percent of the amount over $3 million of the total compensation they received in 2019.

1. Assistance for Mid-Sized Businesses
Within the general business loan program, the final bill emphasizes that the Secretary should "endeavor to" make loans and investments available—to the extent practicable—to midsize businesses (including nonprofit organizations) with between 500 and 10,000 employees at a rate not higher than two percent annualized, and with no principal or interest payable for the first six months of the life of the loan. Entities wishing to take advantage of this program must make a good-faith certification that: (1) economic uncertainty requires those terms; (2) funds received will be used to retain 90 percent of the workforce at full compensation and benefit levels through Sept. 30, 2020; and (3) they intend to restore not less than 90 percent of their workforce level prior to Feb. 1, 2020 while restoring all compensation and benefit levels to workers no later than 4 months after their termination date.
These entities must also certify that they will not "outsource or offshore jobs for the term of the loan or two years after completing repayment of the loan," will not abrogate collective bargaining rights during this time; and will remain neutral in a union organizing effort for the term of the loan.

C. Municipal Prioritization: The final bill requires the Secretary to attempt to provide liquidity to "the financial system that supports lending to States and municipalities."

D. New Administrative Issues of Notes: On the administrative side, the final bill authorizes the Treasury Department to designate financial institutions—including but not limited to depositories, brokers, dealers, and other institutions—as financial agents of the U.S for the purpose of performing the Secretary's duties under this title. Additionally, the Secretary must prescribe regulations or guidance as appropriate to carry out the purpose of the title within 10 days following enactment.

E. New Inspector General: Section 4018 establishes, within the Treasury Department, the Office of the Special Inspector General for Pandemic Recovery who will oversee implementation of the ESF. The President will be responsible for nominating this individual "as soon as practicable after any loan, loan guarantee, or other investment is made" under the program. The Special IG will be subject to the removal provisions in Section 3(b) of Inspector General Act. The Special IG will have authority to conduct, supervise, and coordinate audits and investigations of "the making, purchase, management, and sale of loans, loan guarantees, and other investments made by the Secretary," in addition to the Secretary's management of the program. In doing so, the Special IG will have the authorities provided in section 6 of the Inspector General Act of 1978 and will be considered exempt from termination by the Attorney General. The bill authorizes $25 million to fund the Special IG's activities.

Finally, the bill creates a Congressional Oversight Commission to oversee the execution of the ESF program by the Secretary and the Board of Governors of the Federal Reserve System. The Commission must submit regular reports to Congress and review the implementation of the program. Reports must begin no later than 30 days following the first exercise of the Secretary's authority under the ESF program. Membership in the Commission will consist of one member appointed by each of the Speaker of the House, the House Minority Leader, the Senate Majority Leader, and the Senate Minority Leader. The fifth member, Commission's Chair, will be jointly appointed by the Speaker and the Senate Majority Leader.

Bankruptcy
The Small Business Reorganization Act is amended to increase the eligibility threshold to file under subchapter V of chapter 11 of the U.S. Bankruptcy Code to businesses with less than $7,500,000 of debt. The increase sunsets after one year and the eligibility threshold returns to $2,725,625.

Additionally, the definition of income in the Bankruptcy Code for chapters 7 and 13 is amended to exclude coronavirus-related payments from the federal government from being treated as “income” for purposes of filing bankruptcy. This provision sunsets after one year.

The calculation of disposable income for purposes of confirming a chapter 13 plan shall not include coronavirus-related payments. This provision sunsets after one year.

Individuals and families currently in chapter 13 can seek payment plan modifications if they are experiencing a material financial hardship due to the coronavirus pandemic, including extending their payments for up to seven years after their initial plan payment was due. This provision sunsets after one year.

OTHER LENDING PROGRAMS (CARES)
USDA LENDING
RURAL BUSINESS COOPERATIVE SERVICE – $20.5 million
The bill provides the necessary subsidy to make $1 billion in lending authority available for the Business and Industry loan guarantee program, which provides much-needed financing to business owners that might not be able to qualify for a loan on their own.

COMMODITY CREDIT CORPORATION (CCC)
The CCC is the funding mechanism for agricultural programs such as Price Loss Coverage and Dairy Margin
Coverage. The CCC bolsters commodity and income support programs, natural resources conservation programs, disaster assistance programs and most recently the Market Facilitation Program. The bill includes language that replenishes the CCC borrowing authority by $14 billion. The $14-billion replenishment is for fiscal year 2020, so that’s in addition to the second and third tranche of MFP payments, as well as farm bill payments made last fall. This replenishment will allow USDA to develop new support programs to assist agricultural producers and potentially help agribusinesses such as ethanol plants.

U.S. DEPARTMENT OF AGRICULTURE (USDA)/OFFICE OF THE SECRETARY – $9.5 billion

The bill provides $9.5 billion in emergency COVID-19 response funding to provide financial support for agricultural producers impacted by COVID-19, including producers of specialty crops, producers that supply local food systems, and livestock producers.

Subject: RE: USPS/Michael Best

Keith, attached per your request is a first pass at the high-level analysis of the Defense Production Act of 1950. Note also in this memorandum the discussion regarding the fact that the USPS is addressed in Title VI Section 6001 of the new CARES Act (attached) regarding borrowing and prioritization of USPS delivery of medical products. There is some discussion ongoing but clearly the evolution of this legislation is also something we are watching very closely and will continue to advise on.

Stefan Passantino

Hello Stefan,

I am circling back to get an ETA on when we might get some preliminary talking points regarding the Defense Production Act.

Thanks,
Keith

Keith Weidner

Thanks, Mike.
Stefan, please reach out to me with any questions concerning the legal research we would like your firm to perform. As I am sure has already been discussed, we would like you to examine whether there are any statutes or executive materials that would provide the Postal Service with the ability either to seek financial assistance due to the COVID-19 pandemic, and/or to assist in the response to the pandemic. One statute in particular we would like a better understanding of is the Defense Production Act.

My contact information is below.

Thanks,

Keith

Maloney, Connolly, and King to Hold
Press Conference on Launch of Bipartisan
"Postal Preservation Caucus"

Members to Discuss Legislation to Save the Postal Service

Oversight and Reform, Rep. Gerald E. Connolly, the Chairman of the Subcommittee on Government Operations,
Rep. Peter King, the Ranking Member of the House Committee on Homeland Security's Emergency Preparedness
Subcommittee, will hold a telephone press conference to announce the launch of the bipartisan "Postal Preservation
Caucus" to urge House and Senate leadership to provide emergency funding to save the Postal Service.

Due to the coronavirus crisis, the Postal Service estimates revenue losses of $13 billion by the end of this fiscal
year. Over the next ten years, the Postal Service estimates that losses caused by the coronavirus would be $54
billion

WHO: Reps. Maloney, Connolly, King

WHAT: Press Conference to Save the Postal Service

Cosponsor H.R. 6425: The Protect Our Post Offices Act

Cosponsors (70): Reps. Adams, Axne, Beatty, Blumenauer, Blunt Rochester, Bonamici, Boyle, Brownley, Carbajal,
Castor, Chu, Cicilline, Clark, Cleaver, Cohen, Costa, Courtney, Dean, DeGette, DelBene, Dingell, Doyle, Escobar,
Evans, Gabbard,
Dear Colleague,

In this time of crisis, the United States Postal Service is more important than ever. Please join me by cosponsoring H.R. 6425, The Protect Our Post Offices Act, a bill to provide emergency funding for the U.S. Postal Service.

For particularly vulnerable individuals, the postal service may be the only way they can receive medications or other critical documents right now. Yet, without assistance from the federal government, this typically self-funding agency may not be able to sustain itself much longer.

The Protect Our Post Offices Act would allocate $25 billion in emergency appropriations to the United States Postal Service. These funds can be used by USPS to make up lost revenue, purchase and provide PPE for front-line postal workers, and other purposes that are necessary to support continuing services for USPS.

The USPS employs 620,000 workers, and provides critical services such as delivering prescriptions, the 2020 Census, and mail-in ballots in addition to regular mail delivery. These services become even more crucial in the time of a global pandemic that has greatly limited in-person contact.

Unfortunately, the pandemic has also accelerated financial problems USPS already faced. Officials have warned that because of the decrease in mail volumes, the Postal Service may run out of funding as soon as June of this year.

USPS estimates a net loss of $22 billion over the next eighteen months, and over $54 billion in the long term, as a result of this pandemic. We must protect our constituents and local postal workers by ensuring the postal service can continue to provide on-time mail delivery and protect front-line workers during the COVID-19 pandemic.

Please join me in ensuring thousands of postal employees can continue to provide us with essential services during this pandemic and provide emergency funding for USPS.

To become a cosponsor or for more information, please contact Abbie Callahan.

Sincerely,

Joe Neguse
Member of Congress

Maloney, Connolly, and King to Hold
Press Conference on Launch of Bipartisan
"Postal Preservation Caucus"

Members to Discuss Legislation to Save the Postal Service

Oversight and Reform, Rep. Gerald E. Connolly, the Chairman of the Subcommittee on Government Operations,
Rep. Peter King, the Ranking Member of the House Committee on Homeland Security's Emergency Preparedness
Subcommittee, will hold a telephone press conference to announce the launch of the bipartisan "Postal Preservation
Caucus" to urge House and Senate leadership to provide emergency funding to save the Postal Service.

Due to the coronavirus crisis, the Postal Service estimates revenue losses of $13 billion by the end of this fiscal
year. Over the next ten years, the Postal Service estimates that losses caused by the coronavirus would be $54
billion
WHAT: Press Conference to Save the Postal Service

WHEN: Thursday, April 30, 2020 at 3:00 PM

Media please RSVP to OversightPress@mail.house.gov by 1:00 PM today for dial-in information. Please also provide the number from which you will be calling.

Cosponsor H.R. 6425: The Protect Our Post Offices Act

Supported by: The National Association of Postal Supervisors, The Association of United States Postal Lessors

Dear Colleague,

In this time of crisis, the United States Postal Service is more important than ever. Please join me by cosponsoring H.R. 6425, The Protect Our Post Offices Act, to provide emergency funding for the U.S. Postal Service.

For particularly vulnerable individuals, the postal service may be the only way they can receive medications or other critical documents right now. Yet, without assistance from the federal government, this typically self-funding agency may not be able to sustain itself much longer.

The Protect Our Post Offices Act would allocate $25 billion in emergency appropriations to the United States Postal Service. These funds can be used by USPS to make up lost revenue, purchase and provide PPE for front-line postal workers, and other purposes that are necessary to support continuing services for USPS.

The USPS employs 620,000 workers, and provides critical services such as delivering prescriptions, the 2020 Census, and mail-in ballots in addition to regular mail delivery. These services become even more crucial in the time of a global pandemic that has greatly limited in-person contact.

Unfortunately, the pandemic has also accelerated financial problems USPS already faced. Officials have warned that because of the decrease in mail volumes, the Postal Service may run out of funding as soon as June of this year.

USPS estimates a net loss of $22 billion over the next eighteen months, and over $54 billion in the long term, as a result of this pandemic. We must protect our constituents and local postal workers by ensuring the postal service can continue to provide on-time mail delivery and protect front-line workers during the COVID-19 pandemic.

Please join me in ensuring thousands of postal employees can continue to provide us with essential services during this pandemic and provide emergency funding for USPS.

To become a cosponsor or for more information, please contact Abbie Callahan.

Sincerely,

Joe Neguse
Member of Congress

Hi Miriam,

That is acceptable.

Thanks,
Keith

---

Hi Keith.

I have one more administrative item. Ken and I have specific USPS rates already but Charles Rothfeld does not. We are proposing that his time be billed at $1095 per hour. His law school graduation year is 1980 and his standard rate is $1,090. Please let me know whether that is acceptable.

Thanks.
Miriam

---

Thanks, Miriam.

My view is to move forward with Phase I now. I have a purchase order in the pipeline that accommodates the estimate for that portion of the project. We’ll get that over to you, though in the meantime the CO has authorized you to begin work.

Regarding Phase II, I would like to hold off on a full memo at this point until we get closer to the end of Phase I. Given that this is a fluid situation I want to make sure the work product we are having you do continues to align with what we need, and at this point I can’t say with absolute certainty that we’ll need a full-blown memo when the time comes.

Let me know if that works on your end.

Thanks,
Keith

---

Hi Miriam, do you have an ETA on when you expect to complete the conflicts check and give me an estimate? Just trying to get my ducks in a row from an administrative perspective.

Thanks,
Keith

---

Hi again.

Charles just got back to me, and agrees that the estimate below is reasonable.

Best,
Miriam
For the estimate, should we assume that we will first give an oral report and then prepare a memo? Should we provide a separate estimate for an initial analysis/oral feedback and for a possible memo? I believe you also mentioned the possibility that you would like an oral report from us early next week. When next week do you need it?

Ken Geller, who has previously advised the Postal Service on governance issues, will also be involved at a high level. He will be responsible for reviewing the rate matrix that we provided to the Postal Service and I am working on getting a rate for him that we can propose to you.

Please provide separate estimates for an initial analysis/oral feedback and then a full-blown memo. For the initial analysis/oral feedback, we don't need an estimate for any Congressional work. Could you line up Charles Rothfeld to work on this because he has relevant knowledge and experience (and he is one of the smartest lawyers I know). I am linking to his bio here. https://www.mayerbrown.com/en/people/r/rothfeld-charles-a?

Hi Keith. This will be a fluid situation so at this point we don't need an estimate for any Congressional work. Ultimately I think what is most likely is that we will want to leverage a memo in any dealings we have with public officials on this matter, but I am not sure what approach we will be taking at this time.

Ken

Thanks, Miriam.

Hi Keith. Thanks for sending these materials and for thinking of us for this assignment. I have initiated a rush conflict check. (There should be no conflict but we still have to do it, obviously.)

I have lined up Charles Rothfeld to work on this because he has relevant knowledge and experience (and he is one of the smartest lawyers I know). I am linking to his bio here. https://www.mayerbrown.com/en/people/r/rothfeld-charles-a?

This is my best guess at this time and could change based on developments with the Board. Ultimately I think what is most likely is that we will want to leverage a memo in any dealings we have with public officials on this matter, but I am not sure what approach we will be taking at this time.

Ken

Thanks, Miriam.

Hi Keith. Thanks for sending these materials and for thinking of us for this assignment. I have initiated a rush conflict check. (There should be no conflict but we still have to do it, obviously.)

I have lined up Charles Rothfeld to work on this because he has relevant knowledge and experience (and he is one of the smartest lawyers I know). I am linking to his bio here. https://www.mayerbrown.com/en/people/r/rothfeld-charles-a?

This is my best guess at this time and could change based on developments with the Board. Ultimately I think what is most likely is that we will want to leverage a memo in any dealings we have with public officials on this matter, but I am not sure what approach we will be taking at this time.

Ken

Thanks, Miriam.

Trump says he will block coronavirus aid for U.S. Postal Service if it doesn’t hike prices immediately
The president said the postal agency should quadruple its package delivery prices, otherwise he would block congressionally approved funding
By Lisa Rein<https://www.washingtonpost.com/people/lisa-rein/> and Jacob Bogage<https://www.washingtonpost.com/people/jacob-bogage/> April 24, 2020 at 7:22 p.m. EDT

President Trump on Friday threatened to block an emergency loan to shore up the U.S. Postal Service unless it dramatically raised shipping prices on online retailers, an unprecedented move to seize control of the agency that analysts said could plunge its finances into a deeper hole.

“The Postal Service is a joke,” Trump told reporters in the Oval Office. To obtain a $10 billion line of credit Congress approved this month, “The post office should raise the price of a package by approximately four times,” he said.

Trump for years has alleged the Postal Service has charged too little for packages and personally pushed the head of the agency to charge far more to ship goods for big online retailers. Several administration officials, speaking on
condition of anonymity, have said Trump’s criticism of Postal Service rates is rooted in a desire to hurt Amazon in particular. They have said that he fumes publicly and privately at Amazon’s founder Jeff Bezos, who also owns The Washington Post, for news coverage that Trump believes is unfair.

But raising USPS prices so sharply may not have the impact the president desires, analysts said, as it would put postal services prices far above those of UPS and FedEx, allowing them to raise prices a little and still gain market share, they said.

“This is about as catastrophically stupid an idea that anyone could ever imagine,” said Mark Cohen, director of retail studies at Columbia University Business School. “As if anyone from Amazon to the local mom and pop delivery businesses would ever put up with a rate increase like that when they have alternatives.”

Jon Gold, the vice president of supply chain and customs policy at the National Retail Federation, said in a statement that higher prices would “significantly hurt rural communities and small businesses in addition to USPS.”

“Retailers and consumers are heavily relying on USPS during the pandemic to deliver goods, as bricks-and-mortar stores are temporarily closed,” Gold said.

Trump’s proposal could hit Amazon harder than other shipping companies because it cannot as easily pass costs onto consumers. It also contracts more often with USPS for “last-mile” service — or deliveries between warehouses and homes.

But a dramatic spike in USPS package rates could push the e-commerce giant to do more last-mile shipments on its own. Amazon already delivers close to half of its own shipments. Before the pandemic, it was on pace to deliver more packages annually than either UPS or FedEx by 2022, according to Morgan Stanley.

Such a price increase would also hurt a broad swath of businesses, including brick-and-mortar retailers and other Amazon rivals, which have turned to the Postal Service to get goods to consumers after the pandemic closed down many malls and physical stores.

“Raising rates like that on the post office, which is a thinly veiled attempt to get at Bezos, will merely result in Amazon and other shippers moving their business,” Cohen said. “It will kill the post office.”

The Postal Service has not taken federal funding since 1970, operating instead from revenue it raises from stamp sales and other products. But it has struggled as first-class mail plummeted in the Internet era, and is burdened by a congressional requirement to pre-fund its health benefits for retired employees. The agency has stopped making those payments. As it has run up multibillion-dollar debts, Congress has debated new subsidies and business plans to lessen its financial problems — but never agreed on a solution.

Delivering packages has been a good business for the Postal Service, making up just 5 percent of the Postal Service’s volume, but accounting for 30 percent of its revenue. And package volume jumped 53 percent last week, compared with the same period in 2019, as a homebound nation dives into e-commerce for groceries, prescriptions and household essentials.

But overall, the pandemic has worsened the agency’s finances as catalogues, real estate ads and other business mail have spiraled down. Postal officials say revenue has plunged by almost a third, and growth in package business has not been able to compensate for the other losses.

The Postal Service repeatedly has defended its arrangement with Amazon, saying it gets fair rates for the services it provides in a highly competitive environment. But Trump has doubted those statements.

“They’re handing out packages for Amazon and other Internet companies, and every time they bring a package, they lose money on it,” Trump said on Friday. He also accused post office officials of being “very cozy” with big online merchants.
“If they don’t raise the price of the service they give, which is a tremendous service, and they do a great job and the postal workers are fantastic — but this thing’s losing billions of dollars,” Trump said. “If they don’t raise the price I’m not signing anything, so they’ll raise the price so that they become maybe even profitable but so they lose much less money, okay?”

His comments are drawing the Postal Service into a political showdown. The agency says revenue have dropped down by close to a third during the pandemic.

Lawmakers, postal unions and other entities that rely on the post office accused the president of exploiting the pandemic to punish his enemies.

House Speaker Nancy Pelosi (D-Calif.) said the president was trying to starve the Postal Service so he and his allies can turn it over to a private company.

“Right now, I see a big danger for our country in the form of the administration’s interest in privatizing the post office,” she told reporters. “This is just about somebody on the outside making money off the post office instead of recognizing the important role [it] plays.”

Under the $2.3 trillion coronavirus stimulus relief passed last month, Treasury was authorized to loan $10 billion to the USPS, which says it may not be able to make payroll and continue mail service uninterrupted past September.

Treasury Secretary Steven Mnuchin rejected a bipartisan Senate proposal to give the Postal Service a bailout amid the negotiations over that legislation, a senior Trump administration official and a congressional official previously told The Post.

Any decision on higher package rates as a condition of the Treasury loan would be up to the agency’s board of governors, which currently has five Senate-confirmed members appointed by Trump.

“If you raise prices by 400 percent, people are no longer going to be able to mail packages — or they will move to the Postal Service’s competitors,” said Art Sackler, a longtime lobbyist for mailers, postal shippers and suppliers.

After months of attack on Amazon early in his term, Trump commissioned the Treasury Department to lead a task force on the post office’s financial troubles. In a December 2018 report, the task force concluded that the agency “is on an unsustainable financial path” and recommended restructuring that included higher package prices and labor concessions that called for a shift to nonunion employees in some parts of agency operations.

Since becoming president, Trump has taken an unusual interest in the Postal Service, according to current and former aides. He has asked for detailed briefings on the agency’s finances and operations and has complained repeatedly to senior aides about its status as a financial “loser,” the aides said. Mnuchin, whose agency has provided many loans to the post office as its fortunes sank — loans with no strings attached except interest payments — took on the challenge of getting Trump what he wanted.

“[Trump] is interposing his own flawed judgment for a very complex, technical enterprise that serves at least a $2 trillion industry,” said Rep. Gerald E. Connolly (D-Va.), who chairs the House subcommittee in charge of postal oversight. “It’s one of the most important services in America. It serves every business and every household and it has a workforce of 630,000 people who put themselves at risk every day on behalf of the American population. And he’s willing to risk it all because he’s got a bugaboo in his mind that Jeff Bezos and Amazon are getting a good deal.”

Former Army secretary John McHugh, chairman of the Package Coalition advocacy group, said in a statement that Trump’s proposal would raise prices for consumers, small businesses and rural communities.

“Now, when Americans need affordable and reliable package delivery service more than ever, Congress must fight
to guarantee emergency relief for the Postal Service and stop this package tax,” he said.

Staff writers Philip Rucker, Damian Paletta and Erica Werner contributed to this report.

Hi there David.

Wanted to see if USPS could comment on what we're planning to report, which is that the Treasury Dept and Postal officials are now in talks over the terms and conditions of the CARES ACT line of credit, and that Treasury is discussing giving the Secretary have control over/have the right to impose some or all of the following terms and conditions.
Thank you so much in advance for helping with this!

1/ Postal Service would raise package rates
2/ Treasury would approve big rate contracts with third-party shippers
3/ Treasury would review hiring and firing of senior postal executives
4/ USPS would have to negotiate tougher labor contracts.

Also these are similar demands to what Mnuchin proposed to the board of governors last fall.
Thanks so much
Best, Lisa

We will be done today. Just taking a moment to eat, and to deal with the Board Office.

See attached for a draft letter. This specifically deals with the industry members being used for the WH/CDC mailers.

We are still working through some issues concerning other industry members but are working to complete a draft soon.

The unofficial transcript should be available on https://www.whitehouse.gov/remarks/ by 5/2.

Ladies and Gentlemen, the President of the United States.

President Trump: THANK YOU VERY MUCH. THANK YOU ALL VERY MUCH, IT'S A GREAT HONOR TO HAVE YOU. THIS AFTERNOON, WE GOING TO RECOGNIZE SEVERAL INDIVIDUALS WHO HAVE RESPONDED TO THE INVISIBLE ENEMY WITH COURAGE, DETERMINATION AND GRACE. WE HAVE ENDURED EXTRAORDINARY HARDSHIP AND LOSS AND WE MOURN WITH ONE HEART FOR EVERY LIFE THAT HAS BEEN TAKEN FROM US.

THE HEROES WE ARE TODAY. TRUE SOURCE OF INSPIRATION FOR US ALL, A GREAT INSPIRATION. THE WHOLE COUNTRY IS WATCHING.

WITH US TODAY IS KYLE WEST FROM CINCINNATI. HE IS PROUD TO BE A MAILMAN IN HIS HOMETOWN. I ACTUALLY WORKED IN CINCINNATI AND IT WAS GREAT. THE QUEEN CITY. MANY OF THE PEOPLE ON THIS ROUTE ARE OLDER AMERICANS IN A LOW INCOME AREA. AS KYLE SAYS, WE ARE NOT JUST MAILMAN, WE ARE MANY OTHER THINGS, WE ARE PART OF THE NEIGHBORHOOD. KYLE TALKS TO ROUGHLY 500 CUSTOMERS EACH DAY, BRING A CHEERFUL SMILE AND LISTENING EAR TO EVERY PARCEL OF MAIL. WHEN THE PANDEMIC HIT HE DELIVERED A NOTE TO HUNDREDS OF AMERICANS, SAYING THAT IF YOU ARE AT RISK ADDING ESSENTIAL ITEMS, THAT ME KNOW, AND I WILL HELP. THAT MEANS YOU GET IT DONE. SINCERELY, MAILMAN KYLE. SINCE THEN, KYLE HAS RECEIVED MORE THAN 400 RESPONSES.
AND DELIVERED VITAL GROCERIES TO HUNDREDS. YOU UPLIFT THE ENTIRE NATION. WHEN YOU COME UP AND SAY A FEW WORDS, PLEASE? [APPLAUSE]

Kyle West: THANK YOU, MR. PRESIDENT. I AM GREATLY HONORED TO BE HERE TO REPRESENT MY FELLOW POSTAL EMPLOYEES AS WE CONTINUE TO PROVIDE OUR ESSENTIAL SERVICES TO AMERICA. CUSTOMERS OFTEN TELL US THEY ARE IN DIFFICULT TIMES AND SEEING US OUT EVERY DAY GIVES US A SENSE OF NORMALCY IN THEIR LIFE. THE GRATITUDE WE RECEIVE FROM OUR CUSTOMERS IS GREATLY INSPIRING AND THANK YOU NOTES ALONG OUR ROUTES HELP US GET THROUGH. WE ARE DELIVERING A LOT OF ITEMS AT THIS TIME. THE AMOUNT OF MEDICINE HAS GREATLY INCREASED. CUSTOMERS DEPEND ON US FOR SOCIAL SECURITY AND OTHER INFORMATION, CENSUS MATERIAL, MAIL IN BALLOTS, AND ESSENTIAL ITEMS THEY ORDER ONLINE. AT THE POSTAL SERVICE, WE CONTINUE TO FOLLOW CDC GUIDELINES TO KEEP OURSELVES AND CUSTOMERS SAFE. SOCIAL DISTANCING, WEARING A FACE MASK, AND THE CLEANING OF OUR VEHICLES AND FACILITIES. I AM VERY PROUD FOR THE POSTAL SERVICE AND TO BOLDLY WORK FOR OUR COUNTRY. [APPLAUSE] THANK YOU VERY MUCH

PRES. TRUMP: THANK YOU VERY MUCH. ALSO WITH US ARE WITH GREAT REAL ESTATE AGENTS AND THERE IT WHAT CLIENT TOLD HIM THE RESTAURANT HAD BEEN HIT, THEY DECIDED THEY WANTED TO HELP AND BEGAN RAISING MONEY TO DONATE TO LOCAL HOSPITALS. WITHIN WEEKS, THEY RAISED OVER $6,000, MADE 18 DELIVERIES, AND FED OVER 500 HEALTH-CARE WORKERS. LIBBY AND RAFAEL, I WOULD LIKE TO ACKNOWLEDGE YOU BY HAVING YOU STEP FORWARD AND SAY A FEW WORDS, PLEASE. [APPLAUSE]

Rafael Mellow: THANK YOU, MR. PRESIDENT. WE ARE REAL ESTATE AGENTS IN THE D.C. AREA AND THIS MISSION CAME ABOUT AFTER RECEIVING A PHONE CALL FROM SOME OF OUR CLIENTS IN THE INDUSTRY HERE. THEY GAVE US INSIGHT ON COVID-19 AND THE IMPACT ON OUR BUSINESS AND WE FELT COMPelled TO ACT. HE STARTED A GOFUNDME CAMPAIGN TO GIVE THEM ADDITIONAL BUSINESS, TOOK MONEY, ORDERED CATERING FROM THEIR RESTAURANTS AND DROP IT OFF WITH DIFFERENT STAFF WORKING IN HOSPITALS AROUND THE AREA. THE CAMPAIGN STARTED PICKING UP, SO WE STARTED DOING MORGAN NATIONS AND CAP DROPPING OFF. WE INCREASED OUR GOAL, KEPT DROPPING OFF AT DIFFERENT HOSPITALS AROUND THE AREA. ANOTHER COOL FACTOR WE DID WAS COMPILING VIDEOS OF OUR CONTRIBUTORS EXPRESSING GRATITUDE LIKE THOSE ARE BEING SENT ALONG THE TWO DROP-OFFS.

Libby Bish: YEAH, SO MR. PRESIDENT ADDRESSED MOST OF THIS, WE NAMED OUR CAMPAIGN, RAISED THOUSANDS OF DOLLARS, AND HELPED OVER 18 LOCAL BUSINESSES AND DELIVERED MEALS TO OVER 500 NURSES AND DOCTORS. WE PARTNERED WITH A LOCAL COMPANY THAT PRODUCES HAND SANITIZER TO INCLUDE AS AN ADDED BONUS. OUR MISSION IS SIMPLE, TO HELP LOCAL BUSINESS WHILE ENCOURAGING HEALTH-CARE WORKERS WHO ARE SELFLESSLY WORKING TO ENSURE THE HEALTH OF OUR PEOPLE. THANK YOU, MR. PRESIDENT, FOR THE HONOR TO BE HERE TODAY. [APPLAUSE]

President Trump: THANKS VERY MUCH. GREAT JOB. TALK GUY. HOW TALL ARE YOU? 6"8"? THAT'S A GOOD HEIGHT. I HAVE A SON WHO LOOKS LIKE HE'S GOING TO BE AROUND THAT NUMBER. BEARING -- BARON IS GOING TO BE UP THERE. WE ALSO HONOR TJ KIM, A HIGH SCHOOL SOPHOMORE FROM VIRGINIA. HE HOPES TO SERVE AS A PILOT IN THE NAVY. AT JUST 16 YEARS OLD, HE IS ALREADY TAKING FLIGHT CLASSES TO GET HIS PILOT'S LICENSE. WHEN HE HEARD THAT HOSPITALS NEEDED MORE PERSONAL PROTECTIVE EQUIPMENT, HE LAUNCHED HIS MISSION. HE WORKED TO COLLECT MEDICAL SUPPLIES. WITH THE HELP OF A GOOD FLIGHT INSTRUCTOR, KNOWS HOW TO FLY, BETTER TAKE LESSONS FROM SOMEONE WHO KNOWS HOW TO FLY. HE JOINS US TODAY. MORE THAN 10,000 -- HE HAS FLOWN MORE THAN 10,000 PIECES OF EQUIPMENT AND THERE CAN BE NO BETTER PREPARATION FOR FLYING MILITARY PLANES. HE WENT TO FOR -- FOUR RURAL HOSPITALS IN VIRGINIA. IT'S A GREAT HONOR. THANK YOU.

T.J. Kim: THINK YOU, MR. PRESIDENT. I AM HUMBLED TO BE HERE TODAY. OVER A MONTH AGO, I
TURNED 16 WHEN MY SCHOOL YEAR AND THE CROSS SEASON WERE OVER. ALL I HAD LEFT WAS MY FLIGHT TRAINING. EVER SINCE I WAS NINE, IT HAS BEEN MY DREAM TO ATTEND THE NAVAL ACADEMY BECOME A FIGHTER PILOT. TALKED MY DAD ABOUT WAYS I COULD CONTINUE MY TRAINING WHILE SERVING THE COMMUNITY. CAME UP WITH OPERATION SOS, MUNICH SUPPLIES OVER THE SKIES. -- MEANING SUPPLIES OVER THE SKIES. I LEARNED THERE ARE SEVERAL HOSPITALS SERVING COMMUNITIES, AND WHILE EVERY HOSPITAL IS HURTING, IT IS THE RURAL HOSPITALS THAT WERE OFTEN FORGOTTEN. I HAVE FLOWN FOUR SOS MISSIONS, I HAVE SOURCED AND DELIVERED 8000 MEDICAL GLOVES, 2000 HEAD COVERS, 4000 MASKS AS WELL AS PROTECTIVE GOWNS, AND SANITIZER, AND SPRAYS. GOT MY JOURNEY I HAVE LEARNED TO LESSONS -- THROUGHOUT MY JOURNEY, I HAVE LEARNED TWO LESSONS. I AM BLESSED BY A COMMUNITY THAT INCLUDES MY FAMILY, MY TEACHERS, MY NEIGHBORHOOD, AND MY CHURCH. IT IS THEIR SUPPORT THAT HAS ALLOWED ME TO COMPLETE EACH MISSION SUCCESSFULLY. SECOND, I HAVE LEARNED HOW YOU ARE NEVER TOO YOUNG TO SERVE OTHERS. YOU ONCE SAID THAT AMERICA IS A PLACE WHERE ANYONE CAN RISE, AND TODAY, THERE ARE YOUTH EVERYWHERE RISING UP TO HELP. WHEN I THINK ABOUT THEM I REALIZED JUST HOW UNDESERVING I AM TO BE HERE. I AM SO HONORED BY THIS AWARD AND I DO NOT KNOW HOW TO REPAY YOU. I MAY MAKE YOU THIS PROMISE INSTEAD -- LET ME MAKE YOU THIS PROMISE INSTEAD. AS LONG AS THERE IS A NEED, I AM GOING TO DO IT. I PROMISE TO CONTINUE TO RISE AND SERVE MY IMMUNITY AND COUNTRY. -- COMMUNITY AND COUNTRY. [APPLAUSE]

President Trump: (acknowledging the flight instructor) HOW ABOUT STANDING UP? [APPLAUSE] YOU DID A GOOD JOB. THANKS. THANK YOU.

President Trump: FANTASTIC STORY. A MAN THAT I --I SPEND A LOT OF TIME IN STATEN ISLAND. FRANK FROM STATEN ISLAND, NEW YORK. VERY SPECIAL PLACE. I SPENT MANY AN HOUR AND MANY A DAY WITH MY FATHER THERE OVER THE YEARS. JUST GREAT. NEARLY TWO DECADES AGO, FRANK FOUNDED AN ORGANIZATION CALLED TALL TOWERS, TO SUPPORT FAMILY MEMBERS OF FIRST RESPONDERS. HE BEGAN THIS TO ON A LEGACY OF HIS YOUNG BROTHER, A FIREFIGHTER. STEVEN IS LOOKING DOWN RIGHT NOW AND HE SAYS, MY BROTHER IS IN THE WHITE HOUSE DOING A REAL JOB. HE IS VERY PROUD OF YOU. I KNOW HOW HARD YOU WORK. COMING FROM NEW YORK, ESPECIALLY, FRANK, I KNOW HOW HARD YOU WORK. YOU HAVE DONE A FANTASTIC JOB. WE APPRECIATE IT VERY MUCH. HE IS ONE OF THE IMMORTAL HEROES WHO GAVE HIS LIFE ON SOME NUMBER 11, 2001. AS THE VIRUS BEGAN TO SPREAD IN NEW YORK EARLY THIS YEAR, FRANK LEAPT INTO ACTION. HE HELPED RAISE MONEY TO DELIVER MORE THAN ONE MILLION PIECES OF ARSENAL PROTECTIVE EQUIPMENT -- THAT IS A LOT BEST FOR HOSPITALS IN THE CITY. HE AND HIS ARMY OF VOLUNTEERS DELIVERED FOOD TO FIREHOUSES AND POLICE STATIONS AND ALL SORTS OF PLACES ALL ACROSS NEW YORK AND NEW JERSEY. FRANK ALSO RAISED OVER $5 BILLION TO HELP PAY THE MORTGAGES OF FAMILIES UP WAS TO BEST FAMILIES' HOMES -- PAY THE MORTGAGES OF FAMILIES'HOMES. FIRST RESPONDERS AND CARE WORKERS WHO HAVE TRAGICALLY LOST THEIR LIVES IN THE FIGHT AGAINST THE VIRUS. IT IS A VICIOUS, VICIOUS ENEMY. I WANT TO THANK YOU FOR PRODUCING TO SUPPORT OUR NATION'S HEROES. AGAIN, YOUR FAMILY AND YOUR BROTHER, HE IS VERY PROUD OF YOU LOOKING DOWN. PLEASE COME UP AND SAY A FEW WORDS, FRANK. THANK YOU. [APPLAUSE]

Frank Stiller: THANK YOU, MR. PRESIDENT, FOR INVITING ME HERE TODAY AND HONOR AND LET PEOPLE KNOW THE WORK THAT THE FOUNDATION IS DOING. MY SIBLINGS AND I, WE STARTED THE FOUNDATION IN HONOR OF MY BROTHER, A NEW YORK CITY FIREFIGHTER. ON SEPTEMBER 11, 2001, HE RAN FROM THE BROKEN BATTERY TERMINAL, ALMOST TWO MILES LONG. IT IS ALMOST TWO MILES LONG, HE CAME UP AND WENT INTO THE SOUTH TOWER, THE STAIRS, AND WHILE SAVING PEOPLE'S LIVES, HE GAVE UP HIS OWN. AND THEN, WE HAVE BEEN HONORING OUR MILITARY AND FIRST RESPONDERS EVER SINCE. FOR OUR COUNTRY'S MOST CATASTROPHICALLY INJURED SERVICEMEMBERS. FOR OUR FIRST RESPONDER FAMILIES WHO DIED IN THE LINE OF DUTY AND BELIEVE YOUNG FAMILIES BEHIND. MR. PRESIDENT, WHEN YOU SAID WE ARE AT WAR WITH AN INVISIBLE ENEMY, WE COULDN'T HAVE BEEN MORE PROUD TO KNOW THAT WE ARE DOING OUR JOB AND WHAT WE ARE SUPPOSED TO BE DOING AS A LOCAL FOUNDATION, AS A NATIONAL FOUNDATION, TO MAKE SURE WE TAKE CARE OF THE FRONTLINE HEALTH-CARE WORKERS. WE FOLLOW THE TEACHINGS OF ST. FRANCIS OF ASSISI, WHO SAID,
BROTHERS AND SISTERS, WHILE YOU ARE HERE, WHILE YOU HAVE TIME, LET US DO GOOD. TO KNOW THAT IS OUR GUIDING LIGHT FROM THE FOUNDATION. IS WHAT WE STRIVE TO DO EVERY SINGLE DAY, IS TO DO GOOD, NOT JUST THE MEMORY OF MY BROTHER, BUT ALL THOSE WHO PERISHED FROM 9/11 AND THOSE WHO PASSED EVER SINCE THAT HAVE GIVEN THEIR LIVES TO THIS COUNTRY AND THOSE FRONT-LINE HEALTH-CARE WORKERS WHO WANT TO DIE FOR YOU AND ME TODAY, WHO ARE ON THE FRONT LINES OF THE BATTLEFIELD THAT YOU OFTEN SPEAK ABOUT. WE WANT AMERICA TO MAKE A PROMISE FOR THESE GREAT AMERICANS WHO DIE FOR YOU AND ME, THAT IF THEY GO OUT AND THEY GIVE THEIR KIDS A KISS GOODBYE AND THEY DON'T COME HOME, THAT WE ARE GOING TO TAKE CARE OF THEM. I KNOW WE WILL, BECAUSE WE ARE AND ALWAYS HAVE BEEN THE GREATEST COUNTRY THAT EVER EXISTED. WHY? BECAUSE THE GOODNESS OF THE GENEROSITY OF AMERICA WILL ALWAYS TAKE CARE OF THE GREATNESS OF AMERICA. MR. PRESIDENT, THANK YOU ONCE AGAIN FOR HAVING ME HERE TODAY. GOT BLESS YOU. GOT LESS AMERICA, AND REMEMBER, WE ARE ONLY THE LAND OF THE FREE BECAUSE OF THE BRAVE. THANK YOU. [APPLAUSE]

President Trump: THANK YOU VERY MUCH, FRANK. IN THIS HOUR OF NEED, THE WORLD HAS ONCE AGAIN WITNESSED THE UNBEATABLE STRENGTH OF THE UNITED STATES OF AMERICA. ALL ACROSS OUR LAND, HEROES HAVE RACED INTO ACTION. DOCTORS AND NURSES AND DURING SLEEPLESS NIGHTS TO SAVE EVERY POSSIBLE LIFE. FARMERS, TRUCK DRIVERS AND GROCERS ARE WORKING TO KEEP OUR SHELVES STOCKED AND OUR PEOPLE FED. FAMILIES ARE HELPING PEOPLE IN NEED AND ENTIRE COMMUNITIES ARE RALLYING TOGETHER TO DEFEAT THIS UGLY, HORRIBLE PLAGUE. THE FIVE AMERICANS WE RECOGNIZE TODAY ARE THE FIRST OF A NUMBER OF INDIVIDUALS WE WILL HONOR IN THE COMING WEEKS. WE WILL BE HONORING A NUMBER OF PEOPLE. THE NATION JUST COMPLETED 30 DAYS TO SLOW THE SPREAD DURING WHICH EVERY AMERICAN WAS ASKED TO MAKE SACRIFICES TO HELP DEFEAT THE VIRUS. MODELS PREDICTED BETWEEN 1.5 MILLION AND 2.2 MILLION PEOPLE WOULD HAVE DIED IN THE UNITED STATES WITHOUT THE MITIGATION. THROUGH OUR AGGRESSIVE RESPONSE AND THE REMARKABLE COMMITMENT AND BRAVERY OF AMERICAN PEOPLE, WE HAVE SAVED THOUSANDS AND DOZENS OF LIVES. I CAN EVEN MAKE THAT, IF YOU WANT, HUNDREDS OF THOUSANDS OF LIVES. PEOPLE WERE THINKING IN TERMS OF 1.5 MILLION LIVES LOST TO 2.2 WITHOUT THE MITIGATION. AND HOPEFULLY WE ARE GOING TO COME IN BELOW THAT 100,000 LIVES LOST, WHICH IS A HORRIBLE NUMBER, NEVERTHELESS. IT'S A HORRIBLE THING. COULD HAVE BEEN STOPPED. SHOULD HAVE BEEN STOPPED AT THE SOURCE, THAT IT WASN'T. BUT IT IS A TRIBUTE TO THIS COUNTRY AND THE PEOPLE OF OUR COUNTRY, WHAT YOU HAVE BEEN ABLE TO DO AND THE AMOUNT OF LIVES THAT HAVE BEEN SAVED. BECAUSE WE FLATTENED THE CURVE, SLOWED THE SPREAD AND MASSIVELY EXPANDED OUR HEALTH-CARE CAPACITY, WE ARE IN THE PROCESS OF GRADUALLY REOPENING OUR COUNTRY. IT IS BEING DONE WITH A TREMENDOUS GUSTO AND VIGOR. WE SEE THAT ALL THE TIME, DON'T WE, FRANK? THEY WANT TO GET OUT THERE. THEY WANT THEIR COUNTRY BACK AND WE ARE GETTING IT BACK. WE ARE GETTING IT BACK SAFELY AND QUICKLY. IT IS A STRATEGY GUIDED BY SCIENCE, FACTS AND REASON. THE NEVER ENDING LOCKDOWN WOULD INFLECT COLOSSAL DAMAGE ON THE HEALTH AND LIFE SPAN OF OUR PEOPLE. PUBLIC HEALTH IS CLOSELY TIED TO ECONOMIC HEALTH. OR COUNTRY CAN LONG IGNORE THE FACTS AND THE TRUTH -- NO STATE OR COUNTRY CAN LONG IGNORE THE FACTS AND THE TRUTH. IT LOOKS LIKE WE WILL BE HAVING OUR FINISHED NUMBER, IT SHOULD BE -- THINK OF IT, WE COULD SAVE ANYWHERE FROM ONE MILLION TO EVEN A MILLION FIVE. IF YOU THINK ABOUT IT, WE COULD SAVE 2.1, 2.5 MILLION LIVES DEPENDING ON WHAT HAPPENS. WITH THIS AMAZING ENEMY, NOBODY KNOWS WHAT HAPPENS, BUT WE HAVE LEARNED A LOT IN THE LAST FEW MONTHS. THROUGHOUT OUR HISTORY, IT IS AMERICA'S LOVE AND STRENGTH NOT ITS FEARS AND DOUBTS BUT HAVE PAVED THE ROAD TO VICTORY. TOGETHER WE WILL EMERGE FROM THIS CHAPTER OF HARDSHIP AND ALL THOSE DEATHS OF SUCH GREAT SOULS AND SUCH A GREAT PEOPLE. WITH UNITY AND RESOLVE, OUR PEOPLE WILL THRIVE. OUR INDUSTRIES WILL ROAR. OUR INNOVATORS LAST ANISH. AND AMERICA WILL -- WILL ASTONISH. AND AMERICA WILL THRIVE LIKE NEVER BEFORE. LIKE NEVER BEFORE. WE BUILT THE GREATEST ECONOMY IN THE HISTORY OF THE WORLD. GREATEST STOCK MARKET, GREATEST NUMBER OF JOBS ANYWAY YOU WANT IT. GREATEST INDUSTRIES, LATEST CREATIONS -- GREATEST CREATIONS. AND ONE DAY WE HAD TO CLOSE IT DOWN. THEY SAID, SIR, WE ARE GOING TO HAVE TO CLOSE IT DOWN. WE DID THAT. EVERYBODY
SUFFERED. BUT THEY DID AN INCREDIBLE JOB. BECAUSE OF THAT, WE SAVED MAYBE MILLIONS OF LIVES. AND I JUST WANT TO THANK EVERYBODY. THIS IS A SCORED ALL AROUND THE WORLD. 182 COUNTRIES AS OF A WEEK AGO, SO IT IS PROBABLY HIGHER. 182 COUNTRIES ARE GOING THROUGH RELATIVELY THE SAME THING. IT IS A VERY SAD, A VERY SAD CHAPTER. THERE WAS NO REASON FOR THIS. IT SHOULD HAVE BEEN STOPPED AT THE SOURCE. I WOULD LIKE TO CONGRATULATE THESE INCREDIBLE FIVE AMERICANS. I WOULD LIKE TO ASK THEM TO COME FORWARD AND RECEIVE THEIR AWARD AND THEIR RECOGNITION. THEY DESERVE IT. WE WILL BE WATCHING YOU THROUGHOUT YOUR LIFE. YOU MAY BE AROUND A LITTLE LONGER THAN ME, MR. MEHLMAN, BUT I WILL BE WATCHING YOU AS LONG AS I CAN. I WANT TO THANK YOU VERY MUCH. TO MY HOMETOWN MAYOR, THANK YOU VERY MUCH. THANK YOU, FRANK. PLEASE.

Proclamations handed out:

President Trump: SO THAT WAS GREAT. YOU REPRESENT A VERY IMPORTANT PART OF THIS COUNTRY. WE APPRECIATE IT VERY MUCH. THANK YOU VERY MUCH. HAVE A GOOD DAY. BYE. [APPLAUSE]

Janice
The unofficial transcript is attached and below. (b)(5)

The President of the United States.

President Trump: THANK YOU VERY MUCH. THANK YOU ALL VERY MUCH, IT'S A GREAT HONOR TO HAVE YOU. THIS AFTERNOON, WE GOING TO RECOGNIZE SEVERAL INDIVIDUALS WHO HAVE RESPONDED TO THE INVISIBLE ENEMY WITH COURAGE, DETERMINATION AND GRACE. WE HAVE ENDURED EXTRAORDINARY HARDSHIP AND LOSS AND WE MOURN WITH ONE HEART FOR EVERY LIFE THAT HAS BEEN TAKEN FROM US.

HE IS VERY PROUD OF YOU LOOKING DOWN. PLEASE COME UP AND SAY A FEW WORDS, FRANK.
THANK YOU. [APPLAUSE]

Frank Stiller: THANK YOU, MR. PRESIDENT, FOR INVITING ME HERE TODAY AND HONOR AND LET
PEOPLE KNOW THE WORK THAT THE FOUNDATION IS DOING. MY SIBLINGS AND I, WE STARTED THE
FOUNDATION IN HONOR OF MY BROTHER, A NEW YORK CITY FIREFIGHTER. ON SEPTEMBER 11,
2001, HE RAN FROM THE BROKEN BATTERY TERMINAL, ALMOST TWO MILES LONG. IT IS ALMOST
TWO MILES LONG, HE CAME UP AND WENT INTO THE SOUTH TOWER, THE STAIRS, AND WHILE
SAVING PEOPLE'S LIVES, HE GAVE UP HIS OWN. AND THEN, WE HAVE BEEN HONORING OUR
MILITARY AND FIRST RESPONDERS EVER SINCE. FOR OUR COUNTRY'S MOST CATASTROPHICALLY
INJURED SERVICEMEMBERS. FOR OUR FIRST RESPONDER FAMILIES WHO DIED IN THE LINE OF DUTY
AND BELIEVE YOUNG FAMILIES BEHIND. MR. PRESIDENT, WHEN YOU SAID WE ARE AT WAR WITH AN
INVISIBLE ENEMY, WE COULDN'T HAVE BEEN MORE PROUD TO KNOW THAT WE ARE DOING OUR
JOB AND WHAT WE ARE SUPPOSED TO BE DOING AS A LOCAL FOUNDATION, AS A NATIONAL
FOUNDATION, TO MAKE SURE WE TAKE CARE OF THE FRONTLINE HEALTH-CARE WORKERS. WE
FOLLOW THE TEACHINGS OF ST. FRANCIS OF ASSISI, WHO SAID, BROTHERS AND SISTERS, WHILE YOU
ARE HERE, WHILE YOU HAVE TIME, LET US DO GOOD. TO KNOW THAT IS OUR GUIDING LIGHT FROM
THE FOUNDATION. IS WHAT WE STRIVE TO DO EVERY SINGLE DAY, IS TO DO GOOD, NOT JUST THE
MEMORY OF MY BROTHER, BUT ALL THOSE WHO PERISHED FROM 9/11 AND THOSE WHO PASSED
EVER SINCE THAT HAVE GIVEN THEIR LIVES TO THIS COUNTRY AND THOSE FRONT-LINE HEALTH-
CARE WORKERS WHO WANT TO DIE FOR YOU AND ME TODAY, WHO ARE ON THE FRONT LINES OF
THE BATTLEFIELD THAT YOU OFTEN SPEAK ABOUT. WE WANT AMERICA TO MAKE A PROMISE FOR
THESE GREAT AMERICANS WHO DIE FOR YOU AND ME, THAT IF THEY GO OUT AND THEY GIVE THEIR
KIDS A KISS GOODBYE AND THEY DON'T COME HOME, THAT WE ARE GOING TO TAKE CARE OF
THEM. I KNOW WE WILL, BECAUSE WE ARE AND ALWAYS HAVE BEEN THE GREATEST COUNTRY
THAT EVER EXISTED. WHY? BECAUSE THE GOODNESS OF THE GENEROSITY OF AMERICA WILL
ALWAYS TAKE CARE OF THE GREATNESS OF AMERICA. MR. PRESIDENT, THANK YOU ONCE AGAIN
FOR HAVING ME HERE TODAY. GOT BLESS YOU. GOT LESS AMERICA, AND REMEMBER, WE ARE ONLY

AMERICAN
OVERSIGHT

USPS-20-1215-A-002292
President Trump: THANK YOU VERY MUCH, FRANK. IN THIS HOUR OF NEED, THE WORLD HAS ONCE AGAIN WITNESSED THE UNBEATABLE STRENGTH OF THE UNITED STATES OF AMERICA. ALL ACROSS OUR LAND, HEROES HAVE RACED INTO ACTION. DOCTORS AND NURSES AND DURING SLEEPLESS NIGHTS TO SAVE EVERY POSSIBLE LIFE. FARMERS, TRUCK DRIVERS AND GROCERS ARE WORKING TO KEEP OUR SHELVES STOCKED AND OUR PEOPLE FED. FAMILIES ARE HELPING PEOPLE IN NEED AND ENTIRE COMMUNITIES ARE RALLYING TOGETHER TO DEFEAT THIS UGLY, HORRIBLE PLAGUE. THE FIVE AMERICANS WE RECOGNIZE TODAY ARE THE FIRST OF A NUMBER OF INDIVIDUALS WE WILL HONOR IN THE COMING WEEKS. WE WILL BE HONORING A NUMBER OF PEOPLE. THE NATION JUST COMPLETED 30 DAYS TO SLOW THE SPREAD DURING WHICH EVERY AMERICAN WAS ASKED TO MAKE SACRIFICES TO HELP DEFEAT THE VIRUS. MODELS PREDICTED BETWEEN 1.5 MILLION AND 2.2 MILLION PEOPLE WOULD HAVE DIED IN THE UNITED STATES WITHOUT THE MITIGATION. THROUGH OUR AGGRESSIVE RESPONSE AND THE REMARKABLE COMMITMENT AND BRAVERY OF AMERICAN PEOPLE, WE HAVE SAVED THOUSANDS AND DOZENS OF LIVES. I CAN EVEN MAKE THAT, IF YOU WANT, HUNDREDS OF THOUSANDS OF LIVES. PEOPLE WERE THINKING IN TERMS OF 1.5 MILLION LIVES LOST TO 2.2 WITHOUT THE MITIGATION. AND HOPEFULLY WE ARE GOING TO COME IN BELOW THAT 100,000 LIVES LOST, WHICH IS A HORRIBLE NUMBER, NEVERTHELESS. IT'S A HORRIBLE THING. COULD HAVE BEEN STOPPED. SHOULD HAVE BEEN STOPPED AT THE SOURCE, THAT IT WASN'T. BUT IT IS A TRIBUTE TO THIS COUNTRY AND THE PEOPLE OF OUR COUNTRY, WHAT YOU HAVE BEEN ABLE TO DO AND THE AMOUNT OF LIVES THAT HAVE BEEN SAVED. BECAUSE WE FLATTENED THE CURVE, SLOWED THE SPREAD AND MASSIVELY EXPANDED OUR HEALTH-CARE CAPACITY, WE ARE IN THE PROCESS OF GRADUALLY REOPENING OUR COUNTRY. IT IS BEING DONE WITH A TREMENDOUS GUSTO AND VIGOR. WE SEE THAT ALL THE TIME, DON'T WE, FRANK? THEY WANT TO GET OUT THERE. THEY WANT THEIR COUNTRY BACK AND WE ARE GETTING IT BACK. WE ARE GETTING IT BACK SAFELY AND QUICKLY. IT IS A STRATEGY GUIDED BY SCIENCE, FACTS AND REASON. THE NEVER ENDING LOCKDOWN WOULD INFlict COLOSSAL DAMAGE ON THE HEALTH AND LIFE SPAN OF OUR PEOPLE. PUBLIC HEALTH IS CLOSELY TIED TO ECONOMIC HEALTH. OR COUNTRY CAN LONG IGNORE THE FACTS AND THE TRUTH -- NO STATE OR COUNTRY CAN LONG IGNORE THE FACTS AND THE TRUTH. IT LOOKS LIKE WE WILL BE HAVING OUR FINISHED NUMBER, IT SHOULD BE -- THINK OF IT, WE COULD SAVE ANYWHERE FROM ONE MILLION TO EVEN A MILLION FIVE. IF YOU THINK ABOUT IT, WE COULD SAVE 2.1, 2.5 MILLION LIVES DEPENDING ON WHAT HAPPENS. WITH THIS AMAZING ENEMY, NOBODY KNOWS WHAT HAPPENS, BUT WE HAVE LEARNED A LOT IN THE LAST FEW MONTHS. THROUGHOUT OUR HISTORY, IT IS AMERICA'S LOVE AND STRENGTH NOT ITS FEARS AND DOUBTS BUT HAVE PAVED THE ROAD TO VICTORY. TOGETHER WE WILL EMERGE FROM THIS CHAPTER OF HARDSHIP AND ALL THOSE DEATHS OF SUCH GREAT SOULS AND SUCH A GREAT PEOPLE. WITH UNITY AND RESOLVE, OUR PEOPLE WILL THRIVE. OUR INDUSTRIES WILL ROAR. OUR INNOVATORS LAST ANISH. AND AMERICA WILL -- WILL ASTONISH. AND AMERICA WILL THRIVE LIKE NEVER BEFORE. LIKE NEVER BEFORE. WE BUILT THE GREATEST ECONOMY IN THE HISTORY OF THE WORLD. GREATEST STOCK MARKET, GREATEST NUMBER OF JOBS ANYWAY YOU WANT IT. GREATEST INDUSTRIES, LATEST CREATIONS -- GREATEST CREATIONS. AND ONE DAY WE HAD TO CLOSE IT DOWN. THEY SAID, SIR, WE ARE GOING TO HAVE TO CLOSE IT DOWN. WE DID THAT. EVERYBODY SUFFERED. BUT THEY DID AN INCREDIBLE JOB. BECAUSE OF THAT, WE SAVED MAYBE MILLIONS OF LIVES. AND I JUST WANT TO THANK EVERYBODY. THIS IS A SCORED ALL AROUND THE WORLD. 182 COUNTRIES AS OF A WEEK AGO, SO IT IS PROBABLY HIGHER. 182
COUNTRIES ARE GOING THROUGH RELATIVELY THE SAME THING. IT IS A VERY SAD, A VERY SAD CHAPTER. THERE WAS NO REASON FOR THIS. IT SHOULD HAVE BEEN STOPPED AT THE SOURCE. I WOULD LIKE TO CONGRATULATE THESE INCREDIBLE FIVE AMERICANS. I WOULD LIKE TO ASK THEM TO COME FORWARD AND RECEIVE THEIR AWARD AND THEIR RECOGNITION. THEY DESERVE IT. WE WILL BE WATCHING YOU THROUGHOUT YOUR LIFE. YOU MAY BE AROUND A LITTLE LONGER THAN ME, MR. MEHLMAN, BUT I WILL BE WATCHING YOU AS LONG AS I CAN. I WANT TO THANK YOU VERY MUCH. TO MY HOMETOWN MAYOR, THANK YOU VERY MUCH. THANK YOU, FRANK. PLEASE.

Proclamations handed out:

President Trump: SO THAT WAS GREAT. YOU REPRESENT A VERY IMPORTANT PART OF THIS COUNTRY. WE APPRECIATE IT VERY MUCH. THANK YOU VERY MUCH. HAVE A GOOD DAY. BYE. [APPLAUSE]

Trump Says Internet Retailers That Use 'Laughing Stock' Post Office Must Pay More
By Reuters
April 29, 2020Updated 7:07 p.m. ET
WASHINGTON — President Donald Trump lambasted internet retailers again on Wednesday for taking advantage of the U.S. Postal Service and said those firms needed to pay more for package delivery.
"We want our post office to be successful. We don't want it to be a laughing stock and a stupidly run organization
the way it's been for so many decades now. It's ridiculous," Trump said during an event at the White House. "We want to stabilize the post office, and the way you do that is these companies are going to have to pay more," Trump said of internet retailers. "The companies are going to have to pay a percentage of that ... loss."

Trump threatened last week to block federal aid for the Postal Service unless it raises shipping rates for online companies like Amazon.com<http://Amazon.com> Inc, prompting criticism that the move would hurt consumers relying more than usual on packages during the coronavirus outbreak.

The Postal Service, which employs more than 600,000 people, has said that it may not be able to continue service past September without help, as the pandemic batters the U.S. economy.

Trump has long been critical of Amazon in particular. He did not mention the company by name on Wednesday, but his pique with the online retailer was clear.

"We're making a lot of people rich and a lot of companies rich by subsidizing these companies. On top of that, they don't pay the same taxes as a retail store. It's very unfair to the retailers," Trump said.

Amazon founder and Chief Executive Jeff Bezos is the richest man in the world, according to Forbes. Bezos owns the Washington Post newspaper, whose coverage of the Trump administration has angered the president.

The Package Coalition, whose members include Amazon, eBay Inc and others, has said that raising prices to deliver packages would mean Americans would pay higher prices.

The president, a Republican who is running for re-election in November, made clear he wanted to protect postal workers

"We want to take care of our taxpayers and we want to take care of, very, very importantly, the people that work at the post office."

Trump Says Internet Retailers That Use 'Laughing Stock' Post Office Must Pay More
By Reuters
April 29, 2020Updated 7:07 p.m. ET
WASHINGTON — President Donald Trump lambasted internet retailers again on Wednesday for taking advantage of the U.S. Postal Service and said those firms needed to pay more for package delivery.
"We want our post office to be successful. We don't want it to be a laughing stock and a stupidly run organization the way it's been for so many decades now. It's ridiculous," Trump said during an event at the White House.
"We want to stabilize the post office, and the way you do that is these companies are going to have to pay more," Trump said of internet retailers. "The companies are going to have to pay a percentage of that ... loss."

What's an Essential Service in a Pandemic? The Post Office

From the census to the November election, the Postal Service is critical to American democracy. By The Editorial Board

https://www.nytimes.com/interactive/opinion/editorialboard.html?

* April 14, 2020, 8:24 p.m. ET

America's favorite government agency https://news.politico.com/2020/04/10/partisan-postal-service-americans-favorite-quasi-government-agency.aspx is on the brink of collapse, and Washington policymakers appear too mired in politics to save it. Like so many businesses, the United States Postal Service has been hit hard by the coronavirus. Mail volume is down nearly a third https://www.nytimes.com/2020/04/09/us/politics/coronavirus.html over this past year and continues to fall. The Postal Service is predicting $13 billion in lost revenue this fiscal year as a direct result of the pandemic. In an April 9 telebriefing https://federalnewsnetwork.com/agency-oversight/2020/04/postmaster-general-usps-will-run-out-of-cash-this-fiscal-year-without-more-

pandemic-funding/ to the House Oversight and Reform Committee, the postmaster general, Megan Brennan, warned that without financial assistance the agency could run out of money by the end of September.

The Postal Service cannot be allowed to crumble in the midst of a national emergency. Though organized as a self-sustaining quasi-governmental enterprise, run without taxpayer funding, it is not just another business. Even in an increasingly wired world, the agency's mandate of "universal service" provides a lifeline to remote areas. As this pandemic rages, its 600,000-plus employees are working to ensure that Americans receive their prescriptions and protective equipment and other essential items, no matter where they live. Nearly 500 postal workers have tested positive for the virus, and the Postal Service is also playing an expanded role in sustaining democracy. In the new world of social distancing, mail-in and absentee voting are crucial to ensuring that Americans do not have to risk their lives to cast their votes. If the Postal Service collapses, it will take with it the infrastructure needed for millions of Americans to participate in the most fundamental act of self-government.

Now layer onto this the millions of census forms delivered https://2020census.gov/en/important-dates.html to American households through the mail last month, many of which will be filled out and returned the same way. With all that in mind, one might expect Congress and the White House to be scrambling to throw this vital public institution a lifeline. But, unlike other essential businesses - not to mention favored industries - the Postal Service, in its distress, is facing staunch political resistance that threatens to let it sink.

Part of the problem is longstanding disagreement over the agency's structure and mission. For years, conservatives have been pushing to privatize the service. A more recent threat arises from the president's own task force https://www.nytimes.com/2020/04/14/opinion/usps-coronavirus.html, inserted a provision into that year's budget to block https://about.usps.com/who-we-are/postal-history/first-class-mail-since-1926.htm USPS from providing free service to some salute-name-creators. Absent this burden, the agency would have turned a profit in each of the past six years, according to a report by the Institute for Policy Studies https://ips-dc.org/how-congress-manufactured-a-postal-crisis-and-how-to-fix-it/.

Compounding its current problems, the service is saddled with financial obligations not imposed on other enterprises https://www.nytimes.com/2020/04/14/opinion/usps-free-the-post-office.html to rein in costs by closing offices or cutting service. That's when lawmakers tend to step in, deciding that its mission is too vital to tinker with. In 2013, when the Postal Service announced https://www.nytimes.com/2013/04/11/us/postal-service-halts-push-to-limit-saturday-service.html it would do away with most Saturday delivery, Congress bucked https://www.nytimes.com/2013/04/12/opinion/revert-at-the-post-office.html, inserting a provision into that year's budget to block the move.

Lawmakers know that voters cherish mail service. The Postal Service consistently enjoys the top job rating of any federal agency, according to research by https://www.gallup.com/poll/257510/postal-service-americas-favorite-quasi-government-agency.aspx. Congress has passed a bill requiring the agency to set aside around $5.5 billion per year to prep health care benefits for future retirees. This has put the Postal Service at a competitive disadvantage. Absent this burden, the agency would have turned a profit in each of the past six years, according to a report by the Institute for Policy Studies https://ips-dc.org/how-congress-manufactured-a-postal-crisis-and-how-to-fix-it/.

There are multiple attempts https://www.npr.org/2020/04/08/830942815/putting-health-care-benefits-back-into-the-mail-service to save it, but thus far, none have succeeded.

In its most recent update on the agency, the Government Accountability Office painted a bleak picture: “U.S.P.S.’s overall financial condition is deteriorating and unsustainable. U.S.P.S. has lost $69 billion over the past 11 fiscal years - including $3.9 billion in fiscal year 2018. U.S.P.S.’s total unfunded liabilities and debt ($143 billion at the end of fiscal year 2018) have grown to double its annual revenue.”

In pandemic terms, the Postal Service has several pre-existing conditions that make it vulnerable. Last month, lawmakers sought to include a $13 billion grant for the agency in the $2 trillion coronavirus relief law. The effort was blocked by Treasury Secretary Steven Mnuchin, who warned that it would derail negotiations. Mr. Trump had threatened to reject the bill if it included a postal bailout, according to reporting by The Washington Post. Lawmakers settled for a $10 billion loan - from the Treasury Department. Mr. Mnuchin has warned that any attempt to insert a postal bailout into the next relief package would be a non-starter.

Long term, the Postal Service will need to restructure its debt obligations, among other significant reforms. Short term, Congress must find a way to shore up the agency on behalf of millions of constituents who depend on it. Last Thursday, Ms. Brennan asked lawmakers for $89 billion in assistance. This would include $25 billion in grants to cover losses from the pandemic, $25 billion for infrastructure modernization, $14 billion in debt payments related to retirement benefits and $25 billion in unrestricted borrowing authority, according to The Times. This request seems overly ambitious. But it at least provides a starting point for debate about how Congress can - and must - keep postal carriers on their appointed rounds. This essential institution should not be held hostage to political grudges. Now more than ever, Americans need something they can rely on.

A version of this article appears in print on April 15, 2020, Section A, Page 22 of the New York edition with the headline: The Post Office Is Essential. Help It.
WASHINGTON — The coronavirus pandemic is ravaging the United States Postal Service, with mail volume down by nearly a third already compared to same time last year and dropping quickly, as businesses dependency on on-line sales, advertisements and all kinds of letters but make-up the bulk of mail service's business.

The Postal Service told Congress on Thursday, in a joint hearing held by Republican and Democrat lawmakers, that it could run out of the $10 billion in government revenue and asset values it owes by the end of September unless the post office is granted more than $25 billion in the next round of federal stimulus funding. The resulting government financial aid to the Postal Service could cost taxpayers as much as $100 billion a year in the long-term.

The Trump administration this week floated the idea of increasing the Postal Service’s revenue by raising prices for big online retailers like Amazon and FedEx. The Postal Service is pursuing options to raise prices for bigger online retailers, amid reports that President Trump is pressing Treasury Secretary Steven Mnuchin to make a deal to help the beleaguered post office.

Some Republican lawmakers remain open to direct cash payments, as well, under certain circumstances. Historically, the Postal Service has struggled to turn a profit.

Mr. Connolly said Thursday that he would recommend House leadership promptly back the new, higher figures presented by the Postal Service. But Mr. Mnuchin said the administration would not have it. The Treasury secretary told lawmakers that a direct infusion of cash by the end of September and throw regular delivery into doubt at a time when Americans may still be trapped at home.

Ms. Brennan told lawmakers on Thursday that the agency was already in talks with the Treasury about the potential loan, but its revenue predictions suggest that money would not be enough if the crisis continues.

Security and Governmental Affairs Committee, according to the officials familiar with the talks, who were not authorized to publicly discuss them.

WASHINGTON — The coronavirus pandemic is ravaging the United States Postal Service, with mail volume down by nearly a third already compared to same time last year and dropping quickly, as businesses dependency on on-line sales, advertisements and all kinds of letters but make-up the bulk of mail service's business.

The Postal Service told Congress on Thursday, in a joint hearing held by Republican and Democrat lawmakers, that it could run out of the $10 billion in government revenue and asset values it owes by the end of September unless the post office is granted more than $25 billion in the next round of federal stimulus funding. The resulting government financial aid to the Postal Service could cost taxpayers as much as $100 billion a year in the long-term.

The result, the Postal Service told Congress on Thursday, is a multibillion-dollar financial shortfall that could cause a cash crunch by the end of September and throw regular delivery into doubt at a time when Americans may still be trapped at home.

Ms. Brennan told lawmakers on Thursday that the agency was already in talks with the Treasury about the potential loan, but its revenue predictions suggest that money would not be enough if the crisis continues.

Security and Governmental Affairs Committee, according to the officials familiar with the talks, who were not authorized to publicly discuss them.

She called on Congress to “shore up the finances of the Postal Service, and enable us to continue to fulfill our indispensable role during the pandemic, and to play an effective role in the nation’s economic recovery.”

“At a time when America needs the Postal Service more than ever, the reason we are so needed is having a devastating impact on our revenue stream,” she said. “The sudden drop in mail volumes, our most profitable revenue stream, is steep and may never fully recover.”

Subject: RE: Trump says he will block coronavirus aid for U.S. Postal Service if it doesn't hike prices immediately - The Washington Post
Date: Friday, April 24, 2020 4:38:27 PM
Report: “Do you have any money for the Postal Service?” (We are still trying to track down the outlet)

Sec. Mnuchin: “I can comment on that. So we authorized in the last CARES Act over $10B on a loan. My team has worked very actively on that with the Postal Service, if they need the money, and we are dealing with that.”

Pres. Trump: “The Postal Service is a joke. Because they are handing out packages for Amazon and other Internet companies and every time they bring a package, they lose money on it. So Amazon and other Internet delivery companies are dropping off all of, well not all of, a big portion of their packages or whatever else into a Post Office. And the Post Office is supposed to deliver their packages and they lose a lot of money.

The Post Office should raise the price of a package by approximately four times because they don’t raise them. For some reason, these people have been in there a long time, but for some reason they are cozy with some of these companies, and they don’t raise the price of a package. If they raise the price of a package, like they should, four or five times that’s what it should be. Or let Amazon build their own post office, which would be an impossible thing to do because the Post Office is massive and it serves every little piece of the country.

The Post Office, if they raise the price of a package by approximately four times, it will be a whole new ballgame. But they don’t want to raise because they don’t want to insult Amazon and they don’t want to insult other companies, perhaps, that they like. The Post Office should raise the price of packages to the companies, not to the people, but to the companies. If they did that, it would be a whole different story. Do you agree with that, Steve?”

Mnuchin: “I do, and we are actually going to put certain criteria for a postal reform program as part of the loan. We are looking forward to the Board [of Governors] recruiting a new Postmaster General and doing postal reform.”

Trump: “I will go a step further: if they don’t raise the price of the service they give, which is a tremendous service and they do a great job. Postal workers are fantastic, but this thing is losing billions of dollars. It has for years because they don’t want to insult, for whatever reason
you can imagine, they don’t want to insult Amazon and these other groups. If they don’t raise the price, I’m not signing anything. So they’ll raise the price and maybe become maybe even profitable, but so they lose much less money, ok? If they don’t do it, I’m not signing anything. I’m also not authorizing you to do anything, Steve.”

I will never let our Post Office fail. It has been mismanaged for years, especially since the advent of the internet and modern-day
technology.
The people
that work
there are
great, and
we’re going
to keep
them happy,
healthy, and
well!

We should probably talk before the discussion you reference below. I am thinking it might make sense for me to talk separately to Governor Barger to dill him in on some of our concerns privately, and to get his thoughts about what he is comfortable with us sharing with the consultants. I think we need to fill them in a bit more about what happened with the NPA, and the recent inquiries we have received from Joe Davidson and others, since to me the consultants are operating from a view of the universe that is not tethered to what we know to be the reality.

White House rejects bailout for U.S. Postal Service battered by coronavirus
The pandemic has pushed USPS to the brink, but Trump and Mnuchin shot down emergency aid
By Jacob Bogage<https://www.washingtonpost.com/people/jacob-bogage/>
April 11, 2020 at 11:41 a.m. EDT

Through rain, sleet, hail, and even a pandemic, mail carriers serve every address in the United States, but the coronavirus<https://www.washingtonpost.com/health/2020/02/28/what-you-need-know-about-coronavirus/?tid=lk_inline_manual_2&itid=lk_inline_manual_2> crisis is shaking the foundation of the U.S. Postal Service in
new and dire ways.

The Postal Service’s decades-long financial troubles have worsened dramatically as the volume of the kind of mail that pays the agency’s bills — first-class and marketing mail — withers during the pandemic. The USPS needs an infusion of money, and President Trump has blocked potential emergency funding for the agency that employs around 600,000 workers, repeating instead the false claim that higher rates for Internet shipping companies Amazon, FedEx and UPS would right the service’s budget.

Trump threatened to veto the $2.2 trillion Coronavirus Aid, Relief, and Economic Security, or Cares, Act if the legislation contained any money directed to bail out the postal agency, according to a senior Trump Administration official and congressional official.

“We told them very clearly that the president was not going to sign the bill if [money for the Postal Service] was in it,” the Trump Administration official said. “I don’t know if we used the v-bomb, but the president was not going to sign it, and we told them that.”

Instead, Sens. Gary Peters (D-Mich.) and Ron Johnson (R-Wis.) added a last minute $10 billion Treasury Department loan to the Cares Act to keep the agency on firmer ground through the spring of 2020, according to a Democratic committee aide.

Lawmakers originally agreed to a $13 billion direct grant the Postal Service would not have to repay. That effort was blocked by Treasury Secretary Steven Mnuchin who warned such a move could blow up the relief bill. A committee aide said Mnuchin told lawmakers during negotiations: “You can have a loan or you can have nothing at all.”

Only the $10 billion loan to the Postal Service made it into law, over Mnuchin’s objections.

Without the loan, which awaits approval by the Treasury Department, USPS would be “financially illiquid” by Sept. 30, according to estimates provided to lawmakers. Advocates for the Postal Service worry the agency is in a vulnerable position. As its main funding source dwindles, the Postal Service could be seen as ripe for a makeover; conservatives have long talked about privatizing the mail delivery in the United States.

The Postal Service projects it will lose $2 billion each month through the coronavirus recession while postal workers maintain the nationwide service of delivering essential mail and parcels, such as prescriptions, food and household necessities.

That work often comes at great personal risk. Nearly 500 postal workers have tested positive for the coronavirus and 462 others are presumptive positives, USPS leaders told lawmakers. Nineteen have died; more than 6,000 are in self-quarantine because of exposure.

While the Trump Administration and Mnuchin pushed through private-sector bailouts in the Cares Act — $350 billion to the Small Business Administration loan program, $29 billion to passenger airlines and air cargo carriers, and economic incentives for the construction, energy and life sciences industries, among others — Mnuchin has signaled any postal relief funds in a “Phase IV” stimulus package under negotiation would amount to a poison pill.

Postmaster General Megan Brennan asked lawmakers Thursday for another $50 billion — $25 billion to offset lost revenue from declining mail volume due to the coronavirus and $25 billion for “modernization” — plus another $25 billion Treasury loan and a mechanism to pay down $14 billion in existing public debt.

House Democrats, led by Virginia Rep. Gerald E. Connolly, cautioned that without the funding, the Postal Service may not make it past September without missing payrolls or service interruptions. Senate Republicans insist the $10 billion loan from the Cares Act provided sufficient short-term liquidity, the staffer said, and the Senate would not vote to extend more money to an agency unlikely to make good on its borrowing.

“I’m so frustrated at how difficult it has been for a long time to galvanize attention and action around an essential service,” Connolly said in a phone interview. “And maybe the pandemic forces us all to refocus on this service and how essential it is and how we need to fix it while we can before it gets into critical condition.”
Trump has long been antagonistic of the post office, calling it once in a tweet Amazon’s “delivery boy”[https://twitter.com/realdonaldtrump/status/981168344924536832?lang=en]. The Postal Service often serves as a vendor for Amazon, UPS, FedEx and other shipping companies, delivering the “last mile” service to often rural and remote areas. It is a crucial service for the Postal Service, for which package delivery is a growing part of its business.

Much of Trump’s invective on the Postal Service is aimed at Amazon’s founder and chief executive Jeff Bezos, who owns The Washington Post. Trump has advocated for increasing the prices on Amazon deliveries, against the recommendation of shipping experts and the agency’s own Board of Governors, a majority of whom Trump appointed.

“They should raise, they have to raise the prices to these companies that walk in and drop thousands of packages on the floor of the post office and say, ‘Deliver it,’” Trump said at a news conference Wednesday. “And they make money, but the post office gets killed. Okay? So they ought to do that, and we are looking into it, and we’ve been pushing them now for over a year.”

Raising rates too much would lead private-sector competitors to develop their own cheaper methods to deliver packages, said Lori Rectanus, director of physical infrastructure at the Government Accountability Office. Even if a rate increase generates revenue, that money would be marginal to the total U.S. Postal Service debt, almost all of which comes from a congressional requirement to prepay pension and retiree health care costs for all employees, even those who haven’t yet retired.

Under normal market conditions, the Postal Service nearly breaks even, save for the pension account debt, despite cratering volume on deliveries in recent years. In 2010, USPS delivered 77.6 billion items of first-class mail. In 2019, it delivered only 54.9 billion first-class items. The service handled 3.1 billion packages in 2010 and 6.2 billion in 2019, although processing packages doesn’t earn the agency as much revenue as first-class mail delivery.

The coronavirus has completely upended consumer behavior and the quantity of items in the mail. Volume in the first week of March declined 30 percent, postal agency officials told lawmakers. At the end of June, the agency projects volume to be down 50 percent, and it could lose $23 billion over the next 18 months.

“We are at a critical juncture in the life of the Postal Service,” Brennan, the postmaster general, said in a statement. “At a time when America needs the Postal Service more than ever, the reason we are so needed is having a devastating effect on our business.”

The Postal Service has faced financial troubles for more than a decade, as digital communication morphed and took off, giving lawmakers many opportunities to debate its future. The Postal Service is so foundational to the country it’s enumerated in the Constitution.

The agency’s troubles have renewed conservative conversations about structural changes that would force the Postal Service to act more like a corporation, with steps such as eliminating the prepaid pension requirement and easing its universal service obligation to deliver to every address in the United States, including ones so remote.

“If we’re concerned about the Postal Service and its workers,” said Romina Boccia, an economist at the right-leaning Heritage Foundation, “the best thing we can do is to free up the Postal Service to operate like a business so they can try to get back into the black.”

Through rain, sleet, hail, and even a pandemic, mail carriers serve every address in the United States, but the coronavirus crisis is shaking the foundation of the U.S. Postal Service in new and dire ways.

The Postal Service’s decades-long financial troubles have worsened dramatically as the volume of the kind of mail that pays the agency’s bills — first-class and marketing mail — withers during the pandemic. The USPS needs an
infusion of money, and President Trump has blocked potential emergency funding for the agency that employs around 600,000 workers, repeating instead the false claim that higher rates for Internet shipping companies Amazon, FedEx and UPS would right the service’s budget.

Trump threatened to veto the $2.2 trillion Coronavirus Aid, Relief, and Economic Security, or Cares, Act if the legislation contained any money directed to bail out the postal agency, according to a senior Trump Administration official and congressional official.

“We told them very clearly that the president was not going to sign the bill if [money for the Postal Service] was in it,” the Trump Administration official said. “I don’t know if we used the v-bomb, but the president was not going to sign it, and we told them that.”

Instead, Sens. Gary Peters (D-Mich.) and Ron Johnson (R-Wis.) added a last minute $10 billion Treasury Department loan to the Cares Act to keep the agency on firmer ground through the spring of 2020, according to a Democratic committee aide.

Lawmakers originally agreed to a $13 billion direct grant the Postal Service would not have to repay. That effort was blocked by Treasury Secretary Steven Mnuchin who warned such a move could blow up the relief bill. A committee aide said Mnuchin told lawmakers during negotiations: “You can have a loan or you can have nothing at all.”

Only the $10 billion loan to the Postal Service made it into law, over Mnuchin’s objections.

Without the loan, which awaits approval by the Treasury Department, USPS would be “financially illiquid” by Sept. 30, according to estimates provided to lawmakers. Advocates for the Postal Service worry the agency is in a vulnerable position. As its main funding source dwindles, the Postal Service could be seen as ripe for a makeover; conservatives have long talked about privatizing the mail delivery in the United States.

The Postal Service projects it will lose $2 billion each month through the coronavirus recession while postal workers maintain the nationwide service of delivering essential mail and parcels, such as prescriptions, food and household necessities.

That work often comes at great personal risk. Nearly 500 postal workers have tested positive for the coronavirus and 462 others are presumptive positives, USPS leaders told lawmakers. Nineteen have died; more than 6,000 are in self-quarantine because of exposure.

While the Trump Administration and Mnuchin pushed through private-sector bailouts in the Cares Act — $350 billion to the Small Business Administration loan program, $29 billion to passenger airlines and air cargo carriers, and economic incentives for the construction, energy and life sciences industries, among others — Mnuchin has signaled any postal relief funds in a “Phase IV” stimulus package under negotiation would amount to a poison pill.

Postmaster General Megan Brennan asked lawmakers Thursday for another $50 billion — $25 billion to offset lost revenue from declining mail volume due to the coronavirus and $25 billion for “modernization” — plus another $25 billion Treasury loan and a mechanism to pay down $14 billion in existing public debt.

House Democrats, led by Virginia Rep. Gerald E. Connolly, cautioned that without the funding, the Postal Service may not make it past September without missing payrolls or service interruptions. Senate Republicans insist the $10 billion loan from the Cares Act provided sufficient short-term liquidity, the staffer said, and the Senate would not vote to extend more money to an agency unlikely to make good on its borrowing.

“I’m so frustrated at how difficult it has been for a long time to galvanize attention and action around an essential service,” Connolly said in a phone interview. “And maybe the pandemic forces us all to refocus on this service and how essential it is and how we need to fix it while we can before it gets into critical condition.”

Trump has long been antagonistic of the post office, calling it once in a tweet Amazon’s “delivery boy<https://twitter.com/realdonaldtrump/status/98116834924536832?lang=en>.” The Postal Service often serves as a vendor for Amazon, UPS, FedEx and other shipping companies, delivering the “last mile” service to often rural
and remote areas. It is a crucial service for the Postal Service, for which package delivery is a growing part of its business.

Much of Trump’s invective on the Postal Service is aimed at Amazon’s founder and chief executive Jeff Bezos, who owns The Washington Post. Trump has advocated for increasing the prices on Amazon deliveries, against the recommendation of shipping experts and the agency’s own Board of Governors, a majority of whom Trump appointed.

“They should raise, they have to raise the prices to these companies that walk in and drop thousands of packages on the floor of the post office and say, ‘Deliver it,’” Trump said at a news conference Wednesday. “And they make money, but the post office gets killed. Okay? So they ought to do that, and we’ve been pushing them now for over a year.”

Raising rates too much would lead private-sector competitors to develop their own cheaper methods to deliver packages, said Lori Rectanus, director of physical infrastructure at the Government Accountability Office. Even if a rate increase generates revenue, that money would be marginal to the total U.S. Postal Service debt, almost all of which comes from a congressional requirement to prepay pension and retiree health care costs for all employees, even those who haven’t yet retired.

Under normal market conditions, the Postal Service nearly breaks even, save for the pension account debt, despite cratering volume on deliveries in recent years. In 2010, USPS delivered 77.6 billion items of first-class mail. In 2019, it delivered only 54.9 billion first-class items. The service handled 3.1 billion packages in 2010 and 6.2 billion in 2019, although processing packages doesn’t earn the agency as much revenue as first-class mail delivery.

The coronavirus has completely upended consumer behavior and the quantity of items in the mail. Volume in the first week of March declined 30 percent, postal agency officials told lawmakers. At the end of June, the agency projects volume to be down 50 percent, and it could lose $23 billion over the next 18 months.

“We are at a critical juncture in the life of the Postal Service,” Brennan, the postmaster general, said in a statement. “At a time when America needs the Postal Service more than ever, the reason we are so needed is having a devastating effect on our business.”

The Postal Service has faced financial troubles for more than a decade, as digital communication morphed and took off, giving lawmakers many opportunities to debate its future. The Postal Service is so foundational to the country it’s enumerated in the Constitution.

The agency’s troubles have renewed conservative conversations about structural changes that would force the Postal Service to act more like a corporation, with steps such as eliminating the prepaid pension requirement and easing its universal service obligation to deliver to every address in the United States, including ones so remote.

“If we’re concerned about the Postal Service and its workers,” said Romina Boccia, an economist at the right-leaning Heritage Foundation, “the best thing we can do is to free up the Postal Service to operate like a business so they can try to get back into the black.”

Dave -- The statement does not address any of the questions I asked five hours ago, and it includes no statistics even though you said you were trying to confirm a number. Are you no longer providing the figures that you were planning on providing? Why is the USPS withholding statistics regarding these mailers from being released? How many postcards are being sent and how much is it costing the U.S. government? When you say the USPS "utilized the unrivaled reach of our network," does that mean USPS offered to the CDC to provide these mailers, or was it asked to do so by the CDC or the White House?

Thank you,
Michelle

Michelle, the Postal Service is fully committed to continuing to fulfill our role as a provider of essential government services, and to assisting the Administration in whatever way we can during this national emergency. In this instance we utilized the unrivaled reach of our network, which is a vital part of the nation's critical infrastructure, to...
help the Administrations and the Centers for Disease Control and Prevention to provide important information concerning the COVID-19 virus to every American household.

Best,

Dave

Megan, please see below. Thank you.
Janice,

One more question - did USPS pay for this out of its budget? If not, which agency is reimbursing USPS? Thanks.

I'm a reporter at The Washington Post working on a story today about the attached coronavirus mailer. I understand it was USPS's decision to help spread this information to Americans. Is that correct? How many households is it going to and for how long? What's the rough estimate of the cost of sending this out? Has USPS approached any other health agency about sending out this mailer -- if so, which ones? I'm on deadline today and my cell is (b)(6).

Thank you,
Michelle

Megan,

Nostalgia shouldn't keep alive an agency that is obsolete.

A small blessing of the lockdown is that we've been spared the usual task of throwing half or more of the day's mail into the trash. As advertising dries up, the junk simply doesn't get sent.

Meanwhile in Washington, there are calls to bail out the post office. "We cannot allow Donald Trump to use this horrific pandemic as an opportunity to bankrupt and privatize the Postal Service," said Sen. Bernie Sanders in announcing an April 21 virtual town hall with postal-union leaders. Postmaster General Megan Brennan asked taxpayers for $75 billion. Mr. Trump declined to support such funds in the last stimulus, which included only a loan. But the president insists the USPS raise prices on packages it delivers for Amazon—never mind that package delivery is an intensely price-competitive business, and UPS, FedEx and Amazon itself stand ready to take the business if the USPS is no longer the low bidder.

The post office has made some changes in recent years. Its package business is more competitive with UPS and FedEx and it cooperates with them by assuming some "last mile" deliveries in unprofitable remote areas it is required by law to serve. But first-class mail, the USPS's core business, has been dwindling for years thanks to email and online bill paying. The bottom line: 13 straight years of losses, almost $9 billion in fiscal 2019.

The responsible course is to set the Postal Service on a careful path to liquidation. This can be done in a way that wisely uses USPS assets, such as the 31,000 post offices, most of which are on valuable property in commercial
areas, to wind the business down.

Crucially important would be dealing humanely with the workforce of 600,000—offering early retirement for senior employees and assistance for remaining employees in finding a new job. An experienced outplacement firm could connect employees with new opportunities. In some cases the USPS could pay moving expenses to those who have to relocate to take a new job.

Amazon, FedEx, DHL and UPS would all need to add employees to accommodate the delivery volume now handled by the post office. The government can help with their training. Many would seize the opportunity to advance their careers. Postal-union leaders, junk-mail purveyors and their political allies would complain loudly and keep demanding taxpayer dollars.

The combination of UPS, FedEx, DHL, Amazon and countless local delivery companies would pick up the slack left by the wind-down of the post office. Smaller delivery companies may find an opportunity to expand to handle last-mile delivery in remote areas. If that isn't enough, Amazon and others could charge more for deliveries to extremely remote locations.

Yes, there is nostalgia. I worked as a temporary Christmas mailman when I was in college, and the post office is one of the few government functions mentioned in (though not mandated by) the Constitution. But then many of us look back fondly at iconic businesses like Kodak and Sears, both now shadows of their former selves. Should the taxpayers have bailed them out, too?

Mr. MacDougal has been a partner of McKinsey & Co., a CEO of Mark Controls Corp. and a director of UPS.

Postal Service Is in Financial Peril, Government Watchdog Report Says

GAO says Congress should determine the level of service the nation requires as the coronavirus pandemic hits USPS's business and determine whether the agency should be financially self-sustaining.

U.S. Postal Service officials say the coronavirus pandemic has quickly worsened the agency’s financial problems.

By
Paul Ziobro
May 7, 2020 11:30 am ET

A government watchdog called on Congress to address longstanding structural and financial problems plaguing the U.S. Postal Service, as the political debate intensifies over future federal aid to the service. "Absent congressional action on critical foundational elements of the USPS business model, USPS's mission and financial solvency are increasingly in peril," according to a report from the nonpartisan Government Accountability Office.

The report said that before any postal-reform efforts take place, Congress should determine the level of service the nation requires; whether the agency, which currently isn't funded by tax dollars, should be financially self-sustaining; and what the best structure should be to achieve that. House Democrats plan to include aid for the Postal Service in their next coronavirus stimulus package, but it isn't known whether Republicans will support...
that proposal.

The Postal Service didn't immediately respond to a request for comment on the GAO report. As with many entities, the Postal Service is currently navigating the coronavirus pandemic, which officials say has quickly worsened the agency's financial problems. Postal Service executives have asked Congress for $75 billion in grants and loans to help ride out the economic downturn. That request comes on top of a $10 billion Treasury loan and increased borrowing limit included under the $2 trillion Cares Act passed in March. But President Trump has said he wouldn't authorize the loan unless the Postal Service raised rates on packages. Mr. Trump has complained that the last-mile service it provides to shippers such as Amazon is underpriced and causes the agency to lose money.

Mr. Trump will soon have a supporter in a key Postal Service leadership role. The Postal Service's governance board said Wednesday it would tap Louis DeJoy, the chief executive of a North Carolina consulting and project-management firm, to be the next postmaster general. Mr. DeJoy has donated more than $360,000 to Trump Victory, a joint fundraising committee for the Trump campaign and the Republican National Committee, so far this year, according to Federal Election Commission records.

The Postal Service projects that mailing volume could decline by up to 50% in the fiscal quarter that ends in June. Meanwhile, The Package Coalition, a two-year-old advocacy group funded by e-commerce companies including Amazon, pharmacies such as CVS and small businesses, is spending $2.4 million on ads to promote the Postal Service and argue against a package-rate increase. The ads will run for about two weeks and are aimed at driving up opposition to the increase. The coalition said it is aiming the campaign at Mr. Trump and his supporters. Ads began airing Wednesday night on Fox News's "Hannity" show and will be in rotation on Fox News and Fox Business. There is also a 60-second spot that will air during Rush Limbaugh's radio show.

In communications with large shippers, current Postmaster General Megan Brennan, who is retiring, has laid out the dire picture facing the Postal Service. In the first five weeks after the pandemic brought lockdowns across the U.S., the agency's revenue fell $666 million short of projected estimates, according to people familiar with the matter. The agency projects that mailing volume could decline by up to 50% in the fiscal quarter that ends in June and fall even further in the next period, these people said.

Republicans say the GAO report proves that the Postal Service needs reforms. "This report reiterates what many of us have known for a long time: The Postal Service's business model is failing, and simply throwing more of taxpayer's hard-earned money at them won't fix their problems," said Ohio Rep. Jim Jordan, the top Republican on the House Oversight Committee.

GOP Sen. Ron Johnson, chairman of the Homeland Security and Governmental Affairs committee, said in a letter to Ms. Brennan on Wednesday that Postal Service revenues were down just 5.9% from March 16 through April 19 and that revenue for April was close to the levels from last year. He called on the agency to provide weekly revenue reports. "The significant difference between USPS's worst-case scenario projections and reality illustrates why it is critical that USPS be fully transparent with, and provide weekly data to, policy makers," the Wisconsin Republican said.

Postal Service officials are scheduled to provide an update on its latest quarterly financials on Friday.

# 2020 General Election: Presidential and Congressional

List of when absentee ballots can first be mailed out for the General Election

**Order: Alphabetical by State**

Prepared by: The Hohlt Group
As of 5/8/2020 at 8:30AM

- An individual can request an absentee ballot today in 30 states.
- Voting starts in North Carolina in 119 days!
- By the end of September or in 145 days voting will have started in 27 states including Georgia, Kentucky, Wisconsin, Minnesota, Michigan, Texas, Florida.

# of states that being voting in   Sept: 27   Oct: 21   TBD: PA, RI   Date Varies by County: TN

Total: All 50 states & the District of Columbia
Source: Secretary of State offices & State Board of Elections
Note: Dates are subject to change due to CO-VID 19

Postal Service Governor Appointed to New Position

Postal Service Governor Appointed to New Position
Governor Katherine Tobin to Leave Board at End of Month

WASHINGTON — U.S. Postal Service Governor Katherine Tobin has been appointed Deputy Assistant Secretary for Performance Improvement in the Department of Education's Office of Management and will be leaving the postal governing board effective Aug. 30.

"Katherine has served on the board with great distinction and been a wonderful colleague. We will miss her," said Board of Governors Chairman Carolyn Gallagher, noting that Tobin chaired the Audit and Finance Committee through fiscally challenging times.

With passage of the Postal Accountability and Enhancement Act in 2006 just months after she joined the board, Tobin quickly became well-versed in Sarbanes-Oxley Act compliance, pension liabilities and other complex financial issues. "She addressed all issues with dedication, thoughtful analysis and a steady grasp," said Gallagher.

Postmaster General John Potter said that the three years Tobin has served on the board have been some of the most eventful years in Postal Service history. "Governor Tobin has made her three years count," said Potter. "She made all her decisions based on solid fact and a thorough understanding of the subject, filtered through her business experience and her education in policy analysis."

Tobin has extensive experience in education at the university and college level and is a trained social scientist. She worked as a manager and social scientist in the private sector and created and ran her own company for four years. Tobin earned a Ph.D. and Master of Arts degree from Stanford University's School of Education. She earned a Master of Arts in teaching from the University of Massachusetts' School of Education, and a Bachelor of Arts in English with honors from Skidmore College.

She was appointed to the Board of Governors in August 2006 for a term ending in December 2012. Governors are appointed by the president with the advice and consent of the Senate. The board includes nine governors. More information is available at:

An independent federal agency, the U.S. Postal Service is the only delivery service that reaches every address in the nation, 149 million residences, businesses and Post Office Boxes, six days a week. It has 34,000 retail locations and relies on the sale of postage, products and services, not tax dollars, to pay for operating expenses. Named the Most Trusted Government Agency five consecutive years by the Ponemon Institute, the Postal Service has annual revenue of $75 billion and delivers nearly half the world's mail.

GOVERNORS

SUBJECT: Legal Analysis of White House Task Force Report

This memorandum presents the Law Department’s initial legal analysis of the recommendations in the December 4 report of the Task Force on the United States Postal System (Task Force). This assessment focuses on whether the recommendations are within the Postal Service’s (or Postal Regulatory Commission’s) authority, or instead whether statutory change from Congress is required to implement the recommendations. This memorandum does not analyze the merits of the recommendations from a policy perspective, although it is our intention to work with you and the Executive Leadership Team to develop such analysis based upon your strategic guidance and direction.

Enclosed with this memorandum is a chart that analyzes the legal issues and identifies the responsible parties for implementation of each recommendation (which, in some cases, diverge from the Task Force’s assessment). The chart includes both a summary conclusion and a detailed analysis of each recommendation. This memorandum, on the other hand, focuses on certain broader central themes that cut across multiple recommendations.

I. Reclassification of Services as “Essential” and “Commercial”

The Task Force’s proposal to re-categorize the Postal Service’s product offerings underlies a number of its recommendations. Products would be grouped differently not only for regulatory purposes, but also as a matter of defining the scope of the universal service obligation (USO). This would be a departure from the current statutory framework. The Postal Accountability and Enhancement Act of 2006 (PAEA) made no changes to the statutory provisions governing the USO (except for requiring the Postal Service to establish, in its regulations, specific service standards for market-dominant products). In fact, as discussed in more detail below, Congress deliberately opted not to allow the Postal Regulatory Commission (Commission) to change the USO’s scope. The PAEA’s main regulatory innovations were to prescribe different modes of postal regulation based on whether or not the Postal Service exercises market power (as defined by the statute) over a particular product. Congress did not clarify how this division based on market power affected the USO, but after enactment of the PAEA, the Commission issued a report interpreting the USO as applying to both market-dominant and competitive products.

By contrast, the Task Force proposes a new structure for product regulation, which would also dictate the scope of the USO. Instead of the current division based on market power (market-dominant or competitive), the Task Force would distinguish between products and services deemed “essential” to public policy and those that are “non-essential” and “commercial.” Whatever regulatory framework might protect consumers of “essential” services, the Postal Service would be largely free to choose the appropriate price and terms of service for “commercial” services, so long as prices are “market-based” and aimed at raising revenue to support the USO covering “essential” services. This concept animates Recommendations 1, 7, 9, 10, and 11.
The Task Force designates most of these recommendations as "Administrative," although it also recognizes that the Postal Service may have to seek legislation in order to define the USO in the manner the Task Force suggests. Ultimately, altering the scope of the USO in the fundamental way proposed by the Task Force is a public policy decision reserved to Congress. In the price-regulation context, attempting to effect these changes without statutory reform would raise a number of complications that are more fully described below. Most significantly, because the current market-dominant and competitive groupings are not a proxy for the Task Force's "essential" and "commercial" categories, it does not appear that the Task Force's objectives for that distinction can be achieved without legislative reform.¹

A. Scope of the USO

With respect to the USO, current law contains no basis for an "essential"-"commercial" distinction. The only reference to "essential postal services" is in the broad context of access to postal services, and the USO applies broadly to "written and printed matter, parcels, and like materials," including "business correspondence" as well as other forms of correspondence. 39 U.S.C. §§ 101(a), 403(a) & (b)(3). Therefore, to the extent that certain segments of postal services would be considered "essential" (and hence subject to USO), and others "commercial" (and hence not subject to the USO), this would be predicated not on the current terms of the statute, but on new public policy considerations. However, in developing the PAEA, Congress emphatically reserved to itself the power to change the USO as a matter of public policy, rather than delegating that power to the Commission or the Postal Service:

With steadily declining volumes of First Class mail, it is clear that the nation's correspondence needs are changing. The President's Commission [established by President George W. Bush] recommended, therefore, that an independent entity - the Regulatory Commission - be charged with, "refining key aspects of universal service as circumstances require/permit." . . . From the perspective of the [Senate] Committee, both the postal monopoly and universal service are issues of broad public policy - not regulatory issues. For that reason, the Committee decided that the power to refine either the monopoly or the universal service obligation should remain in the hands of Congress. However, the Committee thought it would be helpful to hear from the Regulatory Commission what potential changes to either the monopoly or the universal service obligation they believed made sense. Congress would then have the option to enact any of the Regulatory Commission's recommendations with which they agreed.

¹ The need for legislative reform to comprehensively implement the Task Force's recommendations regarding the essential-commercial distinction is explained in more detail in the following section. Most fundamentally, because certain mail products that the Task Force would designate as "commercial" must remain on the market-dominant product list under current law, and certain package products that the Task Force would designate as "essential" are properly defined as competitive under the present statute, the current market-dominant and competitive groupings are not a proxy for the Task Force's "essential" and "commercial" categories absent legislative change. The Task Force also recognizes that this approach is a departure from the current structure. For example, when discussing the Postal Service's mission and business model at pages 32-33, the Task Force explains that the Postal Service must adopt a new, more targeted business model, moving from the current "statutory monopoly" to a model based on the provision of "essential services."
In its resulting 2008 report, the Commission concluded that, under current statutes, the USO applies to all products.\(^2\) Postal Regulatory Comm’n, Report on Universal Postal Service and the Postal Monopoly [hereinafter “USO Report”] 4, 23-25 (2008). Even if the Commission could somehow find a rational basis for reconsidering its conclusion that the USO applies to all products, despite the lack of changes in governing law, that reconsideration would have no legal effect without Congressional action.

In its role as operator of the postal network, the Postal Service has some authority to interpret and apply the current USO provisions regarding matters such as service standards, access, and mode of delivery (subject to Commission oversight). The relevant statutes usually set forth subjective standards about the service that the Postal Service must provide, rather than quantitative requirements, and so the Postal Service generally has significant discretion in balancing customer needs with financial considerations. See 39 U.S.C. §§ 403(a)-(b), 3691(b)-(c). Certain Task Force recommendations (such as those focused on delivery mode and service standards) reinforce the current discretion of the Postal Service in these respects and implicate the Postal Service’s administrative authority to make such decisions. Again, however, Congress reserved to itself the power to redefine the USO’s scope. Doing so therefore is beyond the Postal Service’s authority to interpret the current USO terms. As such, only Congress can give effect to the Task Force’s recommendation that the USO’s scope be redefined according to whether postal services are “essential” or “commercial.”

**B. Scope of Product Regulation**

With respect to price regulation, the current statute differentiates between market-dominant and competitive products. The current dividing lines are based on (1) whether a product is subject to the letter monopoly; (2) whether the Postal Service exercises market power in the relevant product market, as defined by the Commission using antitrust standards; and (3) whether a product is subject to statutory “preferred-rate” mandates (or, arguably, is a “benchmark” for those rate preferences). 39 U.S.C. §§ 3626(a)(1) & (g)(4)(B), 3642(b)(1)-(2). If any of those three criteria applies to the product, it must be classified as market-dominant; if none apply, it is eligible to be classified as competitive. None of the current classification criteria correspond to considerations of whether or not a given service is “essential” as a matter of social policy.

Within this framework, the Postal Service and the Commission could move only incrementally in the direction of effectuating the “essential”-“commercial” distinction, to the limited extent that a market power analysis under the current law aligns with a determination of a service’s “essential” nature. For instance, it may be theoretically possible to conduct a market analysis within each competitive product and justify a transfer to the market-dominant side of potentially less price-elastic segments (e.g., Priority Mail offered in rural areas without ready access to competing carriers). This would be similar to the current treatment of Post Office Box service, which is classified under both categories depending on local market conditions. See generally Order No. 473, Order Approving Request to Transfer Selected Post Office Box Service Locations to the Competitive Product List, PRC Docket No. MC2010-20 (June 17, 2010). However, the Postal Service has consistently taken the position that the express delivery and package marketplaces as a whole are properly considered competitive under the governing law, so dividing the market in this manner would be a departure from this position. For its part, the Commission has largely accepted the Postal Service’s position. To effectuate such a transfer, then, the Commission would have to explain its departure from its own (or

\(^2\) In its own submission to the Commission, the Postal Service had taken the position that the USO should not apply to competitive products, owing to the PAEA’s grant of significant flexibility with respect to those products’ pricing and service. U.S. Postal Serv., Report on Universal Postal Service and the Postal Monopoly 3, 11-13, 18, 86 (2008). As explained in the next section, however, the PAEA’s distinction between market-dominant and competitive products is not a proxy for the Task Force’s new, social-policy-based “essential” and “commercial” categories. In any event, the Commission rejected the Postal Service’s proposed limitation of the USO’s scope: a fact that underscores the Postal Service’s inability to redefine the USO on its own.
Congress's) previous determinations that each competitive product as a whole was properly classified as such. See, e.g., 39 U.S.C. § 3631(a) (initially classifying as competitive all of "priority mail," "expedited mail," and other products).

On the market-dominant side, current law would prevent the Commission from approving the transfer of most "commercial" market-dominant mail to the competitive side. Most First-Class Mail and Marketing Mail are subject to the letter monopoly. The statutory preferred-rate rules apply to Within-County Periodicals (and certain other categories of Periodicals), Library Mail, and nonprofit Marketing Mail. As such, these products must be classified as market-dominant under the current governing standards. Arguably, Outside-County Periodicals, Media Mail, and at least some regular-rate Marketing Mail must also be market-dominant, since they are used as benchmarks for preferred rates.

Some market-dominant volume could be transferred, to the extent that it is (or can feasibly be placed) outside the letter monopoly and is not subject to statutory preferred-rate rules. But these opportunities represent a small proportion of market-dominant revenue: regular-rate Marketing Mail delivered on a saturation basis with simplified addressing, Alaska Bypass Service, and certain Bound Printed Matter Flats and Parcels. Under current law, however, the Postal Service would still have to convince the Commission that competing providers constrain the Postal Service's power over pricing and service quality for the relevant products. 39 U.S.C. § 3642(b)(1). That would be a difficult exercise for most of these products.4

Even without transferring market-dominant products, the Commission could theoretically establish a two-tier regulatory system within the market-dominant category through the Ten-Year Review. The Commission would first have to decide that it has the power to change the legacy mail classes, to which at least the initial market-dominant rate-regulation system must apply. 39 U.S.C. § 3622(d)(2)(A). The Postal Service raised this question in the Ten-Year Review, but the Commission has not yet resolved it. Then, and more fundamentally, the Commission would have to establish a non-arbitrary basis for an "essential"-"commercial" distinction and for the regulatory treatment of each category, all of which would have to be consistent with the statutory objectives and factors governing rate regulation. Id. § 3622(b)-(c). Therefore, whether or not this undertaking might be worth attempting, it would significantly delay resolution of the Ten-Year Review. And, in all of this, the Commission would face significant political pressure and litigation from members of the mailing industry.

For all of these reasons, the Commission's current legal powers would appear to be too limited to allow for comprehensive, effective implementation of these Task Force recommendations.

---

3 In theory, the Commission could attempt to narrow the scope of the letter monopoly and thereby expand the range of products potentially eligible for transfer. 39 U.S.C. § 601(c); see 39 C.F.R. § 310.1(a). The Postal Service has taken the position that the Commission cannot fundamentally change the scope of a "letter" for purposes of the monopoly, however, and Congress arguably denied such power to the Commission. See S. Rep. No. 108-318, at 39, 54 (2004) (characterizing Section 601 as delegating to the Commission only the power to administer the monopoly's exceptions, and explaining Congress's intent as reserving to itself the power to redefine the monopoly's scope).

4 For Marketing Mail, it might be easier to demonstrate a lack of pricing power if the Commission were to consider electronic communications as part of the same market. But to do so, the Commission would have to reverse its past refusal to consider electronic substitutes as part of its market-power analysis. See generally Order No. 2306, Order Denying Request, PRC Docket Nos. MC2013-57 & CP2013-75 (Dec. 23, 2014).

5 The Postal Service has proposed a substantially streamlined regulatory model for market-dominant products generally, consistent with the objectives and factors, but it is open to question whether the distinction proposed by the Task Force can be reconciled with those provisions.
II. Competitive Product Pricing and Costing

Recommendations 14, 15, and 16 focus on competitive products, as currently defined, without reference to "essential" or "commercial" services. They set forth a conception of how the Postal Service should participate in the competitive marketplace that is at odds with the PAEA.

A. Pricing Recommendations

The Task Force acknowledges that the Postal Service has aggressively grown competitive-product revenue and contribution since the PAEA, but then asserts, without additional explanation, that competitive products should be priced more aggressively to maximize revenue in connection with Recommendation 14. While current law allows this, the assertion that the Postal Service has not been doing so is unsubstantiated. Indeed, the Task Force does not analyze the degree to which the Postal Service can seek to raise prices more aggressively than it has been doing. By definition, competitive products are relatively price-elastic, meaning that the market constrains the Postal Service’s ability to raise prices without suffering competitive harm. 39 U.S.C. § 3642(b)(1).

As an alternative to that recommendation, the Task Force proposes that the Postal Service’s competitive-product pricing decisions should guard against the risk of driving individual competitors out of the market. (It should be noted that, of the three major express and package delivery carriers, the Postal Service holds the smallest share of the overall market when measured by revenue.) This recommendation appears to suggest that the Postal Service should avoid pricing below its competitors, even if that would cause the Postal Service to sacrifice volume and overall revenue. In addition to seemingly working at cross-purposes with the objective of maximizing revenue generation, this recommendation would appear to recast the Postal Service as responsible for the well-being of its competitors. That would be a significant departure from the current concept of postal market regulation (and market regulation in general), whereby regulation of fairness across the competitive-product market is the responsibility of independent regulators like the Commission, not of the Postal Service or any other market actor. Moreover, the standards of competition law that apply to the Postal Service and its competitors are based on ensuring fair competition to benefit consumers, not on protecting the interests of particular competitors. Requiring that the Postal Service match competitors’ prices due to an artificial sense of parity, rather than to any inherent cost or business rationale, would itself arguably distort the market and harm consumers.

The Task Force also calls for "full price transparency," which could be interpreted to mean publication of negotiated service agreement (NSA) pricing. However, the governing statute requires the Commission’s confidentiality rules to account for the interest in protecting commercial information that would be withheld in good business practice. 39 U.S.C. § 504(g); see also id. § 410(c)(2). This
confidentiality standard enables effective regulation while maintaining a level informational playing field. No Postal Service competitor or customer is required to publish its negotiated pricing, and so a publication requirement that applied only to the Postal Service would distort the market against the Postal Service and would negatively impact the Postal Service's ability to compete. Again, Congress intended the Postal Service to compete on a level playing field, not that it compete with a handicap. See H.R. REP. No. 109-66, pt. 1 at 44; S. REP. No. 108-318 at 14. Implementation of the Task Force's recommendation, through a change to the Commission's confidentiality rules, would therefore be inconsistent with the statute and Congressional intent. Similarly, voluntary disclosure by the Postal Service would also be inconsistent with Congressional intent, and serve only as a unilateral handicap to our efforts—otherwise encouraged by the Task Force—to grow competitive-product revenue and provide an effective market alternative.

B. Costing Recommendations

Fully-distributed costing would require an allocation of costs that are arbitrary from an economic perspective, because they would be based on factors other than causation. As noted earlier in this section, the Supreme Court rejected such economically arbitrary allocations and upheld a causation-based cost-attribution standard. See Nat'l Ass'n of Greeting Card Publishers v. U.S. Postal Serv., 462 U.S. 810 (1983); S. REP. No. 108-318 at 10, 30 (explaining statutory standard as codifying Greeting Card Publishers, and rejecting full cost attribution "or any other arbitrary percentage"). Congress subsequently codified this standard in the current statute. 39 U.S.C. §§ 3622(c)(2), 3631(b). Indeed, Congress was specifically concerned with the effects on the affordability and accessibility of rural services if the Postal Service were "forced to attribute such a large percentage of its costs to competitive products." S. REP. No. 108-318 at 30. In enacting the Postal Reorganization Act that established the modern Postal Service, Congress attributed much of the Postal Service's pricing and cost inefficiency to its previous fully-distributed cost system, and Congress approved the Postal Service's earlier decision to shift away from that system. See, e.g., S. REP. No. 91-912, at 17 (1970).6

As part of the current approach to costing, the Postal Service regularly files proceedings with the Commission to refine its costing methodologies pursuant to the statutory requirement that costs be attributed to products and services on the basis of "reliably identified causal relationships." These proceedings often result in greater levels of cost attribution without resort to arbitrary assumptions or proxies. For example, in one recent case, the Postal Service proposed to update city carrier costs to reflect increases in package delivery, which had the effect of attributing $198.5 million more costs to competitive products and $179.5 million less to market-dominant products. See Order No. 4259, Order on Analytical Principles Used in Periodic Reporting (Proposal Four), PRC Docket No. RM2017-8 (Dec. 1, 2017), at 5, 22 (discussing cost impact and approving change).

Another theoretical avenue for implementation of fully-distributed costing might be through the Commission's determination of the minimum "appropriate share" of institutional (that is, non-attributable) costs that competitive products must cover. The Commission periodically reviews the "appropriate share" level in accordance with statutory criteria about market conditions and the net competitive disadvantage that various Federal laws impose on the Postal Service. 39 U.S.C. § 3633(a)(3), (b); Pub. L. No. 109-435, § 703(d), 120 Stat. 3198, 3244 (2006). In a currently ongoing review proceeding, the Commission rejected proposals to set the 'appropriate share' in a way that would have amounted to fully-distributed costing, holding that the proposed methods failed to meet

---

6 On two recent occasions, the Commission has rejected a competitor's proposals to engage in fully-distributed costing as inconsistent with current statutory standards. Order No. 4402, Notice of Proposed Rulemaking to Evaluate the Institutional Cost Contribution Requirement for Competitive Products, PRC Docket No. RM2017-1 (Feb. 8, 2018), at 81-82; Order No. 3506, Order Concerning United Parcel Service, Inc.'s Proposed Changes to Postal Service Costing Methodologies (UPS Proposals One, Two, and Three), PRC Docket No. RM2016-2 (updated Oct. 19, 2016), at 3, 35, 51-55, 60-62. One of these cases was appealed, and the Commission's ruling was upheld by the court. See generally United Parcel Serv., Inc. v. Postal Regulatory Comm'n, 890 F.3d 1053 (D.C. Cir. 2018).
the statutory criteria and amounted to an end-run around the "reliably identified causal relationships" attribution standard discussed above. Order No. 4402, Notice of Proposed Rulemaking to Evaluate the Institutional Cost Contribution Requirement for Competitive Products, PRC Docket No. RM2017-1 (Feb. 8, 2018), at 81-82. Thus, adoption of fully-distributed costing would run into the same legal and economic-theory obstacles, whether it is attempted through cost attribution or through the "appropriate share."

As a court recently articulated, the Commission's role "is to carry out the particulars of the scheme Congress created, not to engineer specific market outcomes." United Parcel Serv., 890 F.3d at 1067. While the Postal Service has the capability to fully distribute costs, doing so would require an arbitrary allocation of costs, and as such, would be a departure from accepted economic theory and practice. Moreover, a return to fully-distributed costing that was last utilized prior to the creation of the modern Postal Service through the passage of the Postal Reorganization Act would be contrary to the current statutory costing provision. Therefore, it is not within the discretion of the Postal Service or the Commission to do so.

III. Conclusion

I hope you find this material to be useful as you consider the Task Force's recommendations. Based upon my discussion with Governor Duncan after the last Audit & Finance Committee Meeting, we are also preparing a detailed legal analysis of all of the Task Force recommendations that can be shared with the Treasury Department's Office of General Counsel, if a decision is made to do so. In the meantime, if you have any additional questions or concerns, or if you need additional information, then please do not hesitate to let me know.

Thomas J. Marshall

## ANALYSIS OF WHITE HOUSE TASK FORCE RECOMMENDATIONS

### Universal Service Obligation (USO)

<table>
<thead>
<tr>
<th>Recommendation 1</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Definition: Clearly define the USO. Provide a targeted definition of minimum, essential postal services, that due to specific social and economic needs have a basis for government protection.</td>
<td>Administrative</td>
<td>Congress, PRC, USPS</td>
</tr>
</tbody>
</table>

### Notes:
- The Task Force characterizes this recommendation as something for the Board of Governors to do “or [to] seek legislation to do.” To the extent that this redefinition would determine the scope of the USO, the current USO parameters are established by statute. Congress expressly reserved the power to change the USO to itself, as an issue of “broad public policy,” and declined to delegate it to the Postal Regulatory Commission (Commission). S. REP. No. 108-318, at 38-39 (2004); see also H.R. REP. No. 109-66, pt. 1, at 62-63 (2005). Thus, while the Commission might theoretically reconsider its 2008 opinion that the USO applies to all Postal Service products, Postal Regulatory Comm’n, Report on Universal Postal Service and the Postal Monopoly [hereinafter “USO Report”] 4, 23-25 (2008), any attempt to give regulatory or operational effect to that redetermination, without enabling action by Congress, would be subject to legal challenge and likely overturned. (The Commission would also face the challenge of articulating a non-arbitrary basis for revising its 2008 interpretation of the relevant statutes, which have not changed since that time.)
- The current statute’s lack of guidance on an “essential”-“commercial” distinction underscores that such a change would involve a Congressional determination of public policy. The term “essential” appears only once in Title 39 in a manner relevant to the USO, in a broad reference to customers’ access to “essential postal services.” 39 U.S.C. § 403(b)(3). We are unaware of any legislative history limiting the scope of this phrase; to the contrary, the Commission has interpreted it as “rang[ing] from postal products, to mail acceptance points (such as collection boxes), to access to letter carriers who accept mail for posting, to easily accessible information.” USO Report at 19. If anything, the governing statute indicates that the USO applies to “business correspondence” no less than other forms of correspondence. 39 U.S.C. § 101(a); see also id. § 403(a) (defining the USO in terms of “written and printed matter, parcels, and like materials” generally). In enacting the Postal Accountability and Enhancement Act of 2006 (PAEA), Congress not only decided to retain these broad provisions, it also decided to treat advertising mail and other forms of “commercial” mail as equally subject to the protections of the price cap that it enacted. 39 U.S.C. § 3622(d)(2)(A). Since the existing statute demonstrates Congress’s public-policy judgment to apply the USO broadly, a decision to make distinctions between “essential” and “commercial” involves value distinctions that cannot be undertaken using statutory standards, and would likewise be a public-policy question for Congress.
To the extent that the recommendation is aimed at restructuring how products are classified for regulatory purposes, the Governors and Commission can only move incrementally toward the Task Force’s model without legislative changes.

The current governing statute accords different regulatory treatment to postal services based on market power: namely, the scope of the letter monopoly and the Postal Service’s pricing power, as measured by antitrust standards. 39 U.S.C. § 3642(b). The Task Force’s proposed “essential”-“commercial” distinction does not align with the statutory division, and so, unless Congress were to change the law, any attempt to reorganize product regulation would have to conform to the current statutory standards.

One possibility is that the Commission could take a closer look at localized market power within competitive products and, theoretically, could shift certain competitive product volumes (e.g., products sold in rural areas, or consumer-to-consumer shipments) to the market-dominant category. This would approximately resemble the Task Force’s vision of treating certain package-delivery products as “essential” and subject to price-cap regulation. The precedent for such an approach already exists in terms of how Post Office Boxes are classified according to levels of local competition, but the Commission has not yet extended this approach to other products. See generally Order No. 473, Order Approving Request to Transfer Selected Post Office Box Service Locations to the Competitive Product List, PRC Docket No. MC2010-20 (June 17, 2010). In doing so, the Commission would have to explain its departure from its own (or Congress’s) previous determinations that each competitive product as a whole was properly classified as such, and as noted above would have to predicate the decision on the existence of market power, not a consideration that the packages at issue are “essential.” See, e.g., 39 U.S.C. § 3631(a) (initially classifying as competitive all of “priority mail,” “expedited mail,” and other products).

Another possibility is a deregulation of “non-essential/commercial” volume by transferring it from the market-dominant product list to the competitive product list. Current statutory parameters leave little opportunity to do so, however. First, products within the scope of the letter monopoly, such as most First-Class Mail and Marketing Mail, are not eligible for transfer. 39 U.S.C. § 3642(b)(2). Second, products with statutory rate preferences (i.e., certain Periodicals, Library Mail, and nonprofit Marketing Mail) must be regulated as market-dominant; arguably, so, too, must the products against which those preferred rates are benchmarked (Outside-County Periodicals, Media Mail, and at least some regular-rate Marketing Mail). 39 U.S.C. § 3626(a)(1), (g)(4)(B). The only market-dominant mail services that fall outside of these two criteria are Marketing Mail delivered on a saturation basis with simplified addressing, Alaska Bypass Service, and certain Bound Printed Matter Flats and Parcels. In theory, the Commission could expand the range of services eligible for transfer by narrowing the definition of the letter monopoly. 39 U.S.C. § 601(c) (authorizing the Commission to promulgate “[a]ny regulations necessary to carry out” a key letter-monopoly statute); see 39 C.F.R. § 310.1(a). But it is debatable whether such an exercise would be consistent with Congressional intent. See S. REP. NO. 108-318, at 39, 54 (2004) (characterizing Section 601 as delegating to the Commission only the power
to administer the monopoly’s exceptions, and explaining Congress’s intent as reserving to itself the power to redefine the monopoly’s scope). The Postal Service has taken the position that the Commission cannot redefine the scope of the monopoly through a fundamental change to the meaning of the term “letter,” any more than it can redefine the scope of the USO.

For those products that clear the first two hurdles to transfer, the Commission could approve the transfer only if it is convinced that the Postal Service lacks pricing power. 39 U.S.C. § 3642(b)(1). The Postal Service would have to show that competing providers constrain its power over pricing and service quality. That is unlikely for Alaska Bypass Service, which was designed specifically to provide a supply line to remote areas that was otherwise absent. For document-based products like Marketing Mail and Bound Printed Matter Flats, the Commission might have to revisit its past refusal to consider electronic substitutes as part of its market-power analysis. See generally Order No. 2306, Order Denying Request, PRC Docket Nos. MC2013-57 & CP2013-75 (Dec. 23, 2014).

A third possibility is that, in the course of the Ten-Year Review or in another regulatory-review proceeding, the Commission could create an “essential”-“commercial” division within the market-dominant regulatory system, with “essential” market-dominant services subject to some form of price-cap regulation and “commercial” ones freed from price caps. To adopt that approach, the Commission would first have to decide that its review authority under 39 U.S.C. § 3622(d)(3) allows it to restructure the existing mail classes, notwithstanding a provision that ties at least the initial market-dominant rate-regulation system to the mail classes listed in the former Domestic Mail Classification Schedule (DMCS). 39 U.S.C. § 3622(d)(2)(A). (In the Ten-Year Review, we argued that the Commission has such authority. The Commission has not yet ruled on the issue.) Then the Commission would have to articulate a non-arbitrary basis for distinguishing between “essential” and “commercial” services, and for deregulating the latter, all of which would have to be squared with the objectives and factors in 39 U.S.C. § 3622(b)-(c). It is open to question whether such a distinction is consistent with the objectives and factors, given that, as noted above, an “essential”-“commercial” distinction is not reflected in the statute. The Commission would still have to determine the appropriate price-cap design for “essential” services (again based on the Section 3622 criteria), as well as how to administer the statutory rate preferences within or across the “essential” and “commercial” subcategories. These layers of legal determinations raise multiple opportunities for falling short of the Task Force’s vision and/or for legal challenge, and would considerably draw out the Ten-Year Review in any event.

Ultimately, it would be more comprehensive, effective, and certain for Congress to implement this recommendation through reform of the product-classification statutes.
<table>
<thead>
<tr>
<th>Recommendation 2</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Geographic Scope:</strong> Keep current practice, which designates that the USO includes all addresses in the country covering “the United States, its territories and possessions,” irrespective of population density.</td>
<td>Administrative</td>
<td>Congress</td>
</tr>
</tbody>
</table>

**Notes:** Because the Task Force proposes to maintain this aspect of the USO but apply it only to “essential” services, such a redefinition of the USO’s scope would require action by Congress, as discussed in connection with Recommendation 1 above.

At p. 42, the Task Force argues that the prices for “essential services” “should be standard, regardless from where the products are sent or delivered – similar to the current flat postage rate for First-Class Mail.” Such a requirement would actually be more restrictive, on balance, than under current law. At present, uniform-rate requirements apply only to First-Class Mail, Media Mail, and Library Mail, not to all market-dominant services, and certainly not to all services that the Task Force appears to consider “essential.” 39 U.S.C. §§ 404(c), 3683(a). Moreover, flat postage rates are required only for Media Mail and Library Mail; First-Class Mail is not subject to a clear prohibition on distance-variable pricing, although the same price schedule must be uniformly available. See, e.g., 116 CONG. REC. 27,606 (1970) (remarks of Rep. Udall); Tentative Decision Concerning Proposals for Local and Nationwide Subclasses Within First-Class Mail, PRC Docket No. MC76-1, at 3-9 (July 15, 1977); USO Report at 30 n.10, 77-78, 117-18. But see USO Report at 139-41, 185 (assuming, for analytical purposes, that distance-variable pricing is prohibited for First-Class Mail). To be sure, some current First-Class Mail volumes might fit within the Task Force’s proposed “commercial” category and be freed from any uniformity requirements under this recommendation. But to the extent that Congress would be affirmatively prohibiting distance-variable pricing for First-Class Mail and extending that prohibition to “essential services” beyond First-Class Mail, that restriction would sweep more broadly than current requirements.

<table>
<thead>
<tr>
<th>Recommendation 3</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Number and Density of Post Offices and Collection Boxes:</strong> Establish a rule that specifies that access to the postal system must only be sufficient to implement defined USO standards for delivery.</td>
<td>Administrative</td>
<td>USPS, PRC, Congress</td>
</tr>
</tbody>
</table>

**Notes:** The Task Force identifies certain statutory parameters as responsible for the current breadth of the delivery and collection network. As noted in connection with Recommendation 1 above, Congress expressly reserved to itself, not
the Commission, the power to redefine the USO. Within existing statutory parameters, there may be some room for incremental progress toward consolidating the collection network. Any large-scale consolidation would require an advisory opinion from the Commission and, potentially, favorable review of Post Office closing appeals. Ultimately, however, Congress might need to amend the governing statutory standards, such as allowing Post Offices to be closed for operating at a deficit. See 39 U.S.C. § 101(b).

It should be noted that the Task Force does not discuss the “essential”-“commercial” distinction in connection with this USO recommendation; it is thus unclear whether and how such a distinction, if enacted, might translate into different degrees of latitude with respect to access to various postal services.

**Recommendation 4**

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delivery Frequency: Provide greater flexibility to determine mail and package delivery frequency.</td>
<td>Legislative</td>
</tr>
</tbody>
</table>

**Notes:** Congress would have to stop including the six-day-delivery rider in annual appropriations bills. It should also be noted that the Task Force’s vision of how the Postal Service would exercise that flexibility varies according to a product or service’s status as “essential” or “commercial.” Implementation of that underlying distinction is discussed in connection with Recommendation 1 above.

**Recommendation 5**

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mode of Delivery: Maintain current discretion to determine mode of delivery consistent with a financially sustainable business model.</td>
<td>Administrative</td>
</tr>
</tbody>
</table>

**Notes:** This recommendation could be interpreted as saying that the Postal Service should continue exploring opportunities to increase centralized delivery, with attention to both its finances and “customer needs,” and that Congress should not interfere with such efforts. (The Commission would also need to avoid creating political roadblocks in any advisory opinion, which the Postal Service is required to seek under current law for sufficiently large-scale, programmatic changes in service.) That said, a number of considerations have given the Postal Service pause in converting existing addresses to centralized delivery, such as the likelihood of customer and political backlash (as in Canada); the uncertain effect on the perceived value of mail and, correspondingly, on mail volume; and the fact that, over the past several years, Congress has considered several bills on centralized delivery without settling on a coherent message. See Reply Comments of the United States Postal Service, PRC Docket No. R2013-11 (Dec. 6, 2013), at 103-105. And, as noted in a recent submission to the Government Accountability Office, there are a number of
significant legal issues that would arise from any widespread move to centralized delivery, independent of whether it is allowable under the USO standards.

Thus, even though this is technically within our existing legal authority, if the Postal Service decided to implement this recommendation, it would be helpful for Congress to enact legislation expressly endorsing a shift toward centralized delivery, even if it adds some procedural constraints. Indeed, to the extent that the Task Force recommends that the Postal Service “be required” to have a transparent and public process for determining delivery mode, that implies action by Congress.

Like Recommendation 3, this recommendation is not framed in terms of the Task Force’s “essential”-“commercial” service distinction, so it is unclear which products and services would be impacted by this recommendation.

### Recommendation 6

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing Standards: Keep current practices, which allow the USPS to manage processing standards.</td>
<td>Administrative</td>
</tr>
<tr>
<td><strong>Notes:</strong> Like Recommendation 2, this essentially recommends maintenance of the status quo in terms of the Postal Service’s authority. The Postal Service has discretion in this area, subject to certain procedural requirements. In establishing service standards, the Postal Service must account for various objectives and factors, and it must consult with the Commission. 39 U.S.C. § 3691(a)-(c). And pursuant to 39 U.S.C. § 3661, the Postal Service must request an advisory opinion from the Commission before making a change in the nature of postal services on a nationwide or substantially nationwide basis. But note that Recommendation 22 would appear to give the Commission the power to overrule the Postal Service’s establishment of service standards. The Task Force does not reconcile this apparent tension.</td>
<td>N/A</td>
</tr>
</tbody>
</table>

### Recommendation 7

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>USO Funding: Review and determine if income generated by activities defined to be outside of the USO could be optimized to cover the costs of funding the USO.</td>
<td>Administrative</td>
</tr>
<tr>
<td><strong>Notes:</strong> As the letter monopoly’s value has declined, the Postal Service has been aggressive in raising revenue from competitive products to contribute toward the institutional costs of the USO, and in seeking reform of the market-dominant rate-regulation system to provide more revenue-generating authority. The Task Force’s recommendation appears to be tied not to the existing legal framework, however, but to the Task Force’s vision of a redefined USO that</td>
<td>Congress, PRC, USPS</td>
</tr>
</tbody>
</table>
does not apply to “products and activities not deemed essential services.” If postal products were to be reclassified per Recommendation 1, then the Commission would structure the regulatory system for “commercial” services to maximize the Postal Service’s ability to generate revenue, and the Postal Service would be responsible for making full use of that authority (and for controlling “commercial” services’ costs to improve contribution). See Recommendation 1.

Mail and Package Markets

<table>
<thead>
<tr>
<th>Recommendation 8</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Model:</td>
<td>Administrative</td>
<td>PRC</td>
</tr>
<tr>
<td>Develop a new model that can be used to both set rates and control costs to achieve sustainability.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Notes:** The discussion in this portion of the Task Force report (pp. 50-51) is unclear, but it appears that the Task Force is recommending that, until a reclassification along “essential”-“commercial” lines can be conducted (see Recommendation 1), the Commission should do what it can through the Ten-Year Review to allow net-income maximization for “commercial” market-dominant services. The Task Force opines that many market-dominant services – ones that it appears to deem “commercial,” as well as governmental communications (which it elsewhere typifies as “essential”) – are fundamentally price-inelastic and could bear at least “modest price increases” to “boost overall mail revenue” and “increase the USPS’s net income.”

The Task Force does not explain the “control costs” language in the recommendation. To the extent that this can be interpreted as urging the Postal Service and/or Commission to do more to control costs, see Recommendations 21 and 22.

<table>
<thead>
<tr>
<th>Recommendation 9</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Model:</td>
<td>Administrative</td>
<td>Congress, PRC, USPS</td>
</tr>
<tr>
<td>Require price increases, reduce service costs, or exit the business for any mail products that are not deemed an essential service and do not cover their direct costs.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Notes:** The Task Force recommends abolishing the price cap on “non-essential services,” including Marketing Mail, while shifting certain competitive package volumes into the realm of (capped) “essential services.” See Recommendation 1.

The Task Force also recommends that the Postal Service be required to price “non-essential services” at a “market rate” (p. 51). If reclassification were to occur within the market-dominant category, then the Commission might
arguably be able to impose a “market-rate” condition by applying the statutory criteria in 39 U.S.C. § 3622(b) and (c). If reclassification were to occur by transferring “non-essential services” to the competitive product list, then the Governors would be responsible for pricing according to what the market will bear. As noted regarding Recommendation 1, it would likely be more effective and certain for Congress to amend the governing statute accordingly.

<table>
<thead>
<tr>
<th>Recommendation 10</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Product Classes:</strong> Redefine mail classes by creating products defined by the type of sender and the declared purpose of the mail item.</td>
<td>Administrative</td>
<td>Congress, PRC, USPS</td>
</tr>
</tbody>
</table>

**Notes:** The Postal Service has sought more extensive authority from the Commission to redefine market-dominant product classes as part of the 10-Year Review. However, see Recommendation 1 concerning the extent to which such a redefinition could be used to effectuate the Task Force’s “essential”-“commercial” distinction. With respect to competitive products, the Postal Service has broad authority to define and categorize products, subject to Commission review.

<table>
<thead>
<tr>
<th>Recommendation 11</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Product Classes:</strong> Change USPS systems in order to track the purposes and uses of mail, to allow for better cost allocation, targeted pricing, and more business intelligence.</td>
<td>Administrative</td>
<td>USPS</td>
</tr>
</tbody>
</table>

**Notes:** This recommendation aims at mining Household Diary Survey responses to guide business decisions aimed at improving the value that senders and recipients place in the mail. It is not clear what the Task Force’s reference to cost allocation means in this context.
<table>
<thead>
<tr>
<th>Recommendation 12</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Strategic Options:</strong> Evaluate areas of USPS operations where the USPS could expand third party relationships in order to provide services in a more cost efficient manner (e.g., mid-stream logistics and processing).</td>
<td>Administrative</td>
<td>USPS, PRC</td>
</tr>
</tbody>
</table>

**Notes:** The Postal Service could perform this evaluation. If any expansion of third-party relationships involves new workshare discounts or changes to existing workshare discounts, the Commission would need to approve the discount levels. New forms of outsourcing may also require consultation and/or bargaining with postal labor organizations. Even if the Postal Service can manage to scale down its in-house operations, there would be a delay in capturing labor-cost savings, due to the existence (and likely persistence, given the nature of binding arbitration) of no-layoff clauses in collective bargaining agreements and the resulting need to rely on attrition for workforce reduction.

<table>
<thead>
<tr>
<th>Recommendation 13</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Strategic Options:</strong> As a means of generating more income, the mailbox monopoly could be monetized.</td>
<td>Administrative</td>
<td>USPS, PRC</td>
</tr>
</tbody>
</table>

**Notes:** The mailbox monopoly statute, 18 U.S.C. § 1725, requires payment of postage on all mailable items placed in mailboxes. In theory, the Postal Service could establish special “postage” classifications and rates for items delivered by qualifying third-party delivery providers. The Commission would have to approve these classifications and rates. Such a move would affect other public benefits that the mailbox monopoly provides, however, particularly the secure, efficient provision of universal service. The mailbox monopoly does not merely protect revenue to support the USO. By channeling mailbox deliveries to a single universal service provider, it promotes efficient mail delivery: there is room in mailboxes for letter carriers to deliver, and carriers do not need to spend time at each mailbox distinguishing collection mailpieces from alternative-delivery mailpieces. The mailbox monopoly also protects the security of the mails, by giving recipients a stable expectation as to who can legitimately access a mailbox and who might warrant suspicion. That assurance of security, in turn, provides value to the “brand” of the mail. Opening mailbox access, even via franchising, could negatively impact both of these current benefits, as well as delivery costs and revenue. To mitigate these potential harms, the Postal Service could attempt to impose and administer rigorous brand-protection and oversight measures in its franchise agreements. In doing so, however, it could face complaints of unreasonable discrimination under 39 U.S.C. § 403(c) or unfair preclusion of competition under 39 U.S.C. § 404a(1) and/or fair-competition statutes. See 39 U.S.C. §§ 404a(c), 409(d)-(e), 3622(a). The Task Force does not address these potential business and legal impacts, which would require further study before implementing its recommendation.

<tr>
<td><strong>Strategic Options:</strong> Price competitive products in a manner that maximizes revenues and generates income that can be used to fund capital expenditures and long-term liabilities.</td>
<td>Administrative</td>
<td>USPS, PRC</td>
</tr>
</tbody>
</table>

**Notes:** This recommendation is at odds with the Task Force’s acknowledgment of the Postal Service’s competitive-product revenue and contribution growth since the PAEA, consistent with the PAEA’s aim of allowing the Postal Service to compete more effectively in the competitive marketplace and therefore grow competitive-product revenue and retain earnings. Additionally, the Task Force does not explain how competitive products can be priced substantially higher, since, by definition, they are products for which the market constrains the Postal Service’s pricing power. 39 U.S.C. § 3642(b)(1). (The Task Force explains that the Postal Service “has a dominant market position in B2C e-commerce segments” (p. 53), but also recognizes that “there are limits to how much consumers are willing to pay for delivery” and that “e-commerce consumers remain highly sensitive to delivery costs” (p. 50)).

Alternatively, the Task Force recommends that the Postal Service consider, in its pricing decisions, “the potential market distortions that could drive industry participants out of the market” (p. 54). (It should be noted that, of the three major package and express delivery providers, the Postal Service holds the smallest share of the overall market when measured by revenue.) This consideration is not properly aimed at the Postal Service, whose pricing decisions are designed to maximize revenue to support the USO and its other statutory obligations, rather than to preserve its competitors’ market position. Safeguarding the overall health of the market is an object of regulation by the Commission, the Federal Trade Commission, or the Department of Justice’s Antitrust Division.

Moreover, to the extent that this recommendation implies that the Postal Service’s prices should be higher, not for reasons of economic self-interest, but to drive volume to competitors, that sort of artificial price increase would itself distort the market and harm the public policy interests of consumers. Various laws concerning fair competition, which apply to the Postal Service as well as its competitors, protect competition, not particular competitors, and they do not require a firm to make decisions based on ensuring the well-being of existing competitors. Doing so could actually draw antitrust scrutiny.

In theory, Congress could amend the relevant statutes to effectuate the Task Force’s recommendation. However, it is unclear how the Postal Service could practically resolve the internal tension between protecting competitors and maximizing revenue to fund the USO, if artificially raising prices has the effect of driving down volume and overall revenue. Such an amendment would mark a departure from the PAEA’s treatment of the Postal Service as a self-interested business actor on par with its private-sector peers.
It should be noted that this recommendation is framed in terms of the existing competitive-product category. It is unclear how it would bear on a potential future reclassification based on social policy rather than market power.

</thead>
<tbody>
<tr>
<td>Costing Options: Develop a new cost allocation model to establish full price transparency and fully distribute costs.</td>
<td>Administrative</td>
<td>Congress</td>
</tr>
</tbody>
</table>

**Notes:** With respect to cost allocation, the recommendation could theoretically be fulfilled in one of two ways: full attribution of costs to products, or maintenance of some costs as non-attributable (or “institutional”) while apportioning explicit responsibility for covering them to competitive and market-dominant products.

Implementation of fully-distributed costing through cost attribution would require legislative change. Current law requires costs to be attributed on the basis of “reliably identified causal relationships.” 39 U.S.C. §§ 3622(c)(2), 3631(b); see Dep’t of the Treasury, Accounting Principles and Practices for the Operation of the United States Postal Service’s Competitive Products Fund 7 (2007) (“This definition is consistent with the economic costing approach of the current USPS cost system.”). It is well-established in the regulatory, economic, and legal communities that fully-distributed costing is fundamentally arbitrary, meaning that the Commission cannot adopt it in administering its statutory framework. See, e.g., Nat’l Ass’n of Greeting Card Publishers v. U.S. Postal Serv., 462 U.S. 810 (1983); S. REP. No. 108-318, at 10, 30 (2004) (explaining statutory standard as codifying Greeting Card Publishers, and rejecting full cost attribution “or any other arbitrary percentage”). Therefore, fully-distributed costing would require Congress to abolish the current, longstanding, and theoretically sound cost-attribution standard in favor of an arbitrary one. In doing so, Congress would be resurrecting a practice that was identified as a leading cause of inefficient pricing at the time of the Postal Reorganization Act, which rejected the practice. S. REP. No. 91-912, at 17 (1970); see also Towards Postal Excellence: The Report of the President’s Commission on Postal Organization 30-31, 133-35 (1968), available at https://go.usa.gov/xQMHm. As a court recently articulated, the Commission’s role “is to carry out the particulars of the scheme Congress created, not to engineer specific market outcomes.” United Parcel Serv., Inc. v. Postal Regulatory Comm’n, 890 F.3d 1053, 1067 (D.C. Cir. 2018). Contrary to the Task Force’s statements, the current system set forth by the PAEA fully protects against cross-subsidization.

Implementation of fully-distributed costing through apportionment of institutional costs would likewise require statutory change, or a significant departure from recent Commission precedent. The Commission must periodically review the “appropriate share” of institutional costs that competitive products must cover. 39 U.S.C. § 3633(a)(3), (b). In doing so, the Commission must “consider all relevant circumstances, including the prevailing competitive conditions in the market, and the degree to which any costs are uniquely or disproportionately associated with any competitive products.” Id. § 3633(b). The Commission must also consider a 2007 Federal Trade Commission (FTC) report on the
laws that advantage or disadvantage the Postal Service’s offering of competitive products, as well as any subsequent events that affect the validity of the FTC’s estimates. Pub. L. No. 109-435, § 703(d), 120 Stat. 3198, 3244 (2006). The FTC concluded that the Postal Service suffers an enormous net competitive disadvantage. Fed. Trade Comm’n, Accounting for Laws That Apply Differently to the United States Postal Service and Its Private Competitors 64 (2007), https://go.usa.gov/xQMu9. In an ongoing review proceeding, the Commission has rejected a competitor’s proposals that would apportion responsibility for institutional costs according to competitive products’ share of total revenue or total attributable costs, on the basis that such proposals fail to account for competitive conditions, as required by statute, and amount to an effort to implement arbitrary cost attribution notwithstanding the statute’s reliable-causation requirement. Order No. 4402, Notice of Proposed Rulemaking to Evaluate the Institutional Cost Contribution Requirement for Competitive Products, PRC Docket No. RM2017-1 (Feb. 8, 2018), at 81-82. While the Commission might have some leeway to distinguish a future “appropriate share” proposal from the ones that it recently rejected, it might be difficult for it to explain a reversal of its longstanding rejection of fully-distributed costing in a way that would withstand legal challenge. Here, too, legislative change would likely be necessary for the Commission to adopt an arbitrary cost-allocation method.

The Task Force does not explain what it means by “full price transparency.” It is possible that this is simply another way of saying that costs should be fully distributed and “transparently” reflected in prices. However, the Task Force also asserts (p. 54) that negotiated service agreements (NSAs) make unfair distinctions between customers. If the intent is to require the publication of all NSA terms to give customers and competitors more leverage, then that would require a change to the statutory standards that govern confidentiality at the Commission. 39 U.S.C. § 504(g); see also id. § 410(c)(2). Those standards give the Commission discretion to balance commercial injury to the Postal Service against the public interest in disclosure, but they clearly contemplate that some commercially sensitive information be protected from public disclosure. See H.R. Rep. No. 109-66, pt. 1 at 61; S. Rep. No. 108-318, at 20, 47-48. Courts have recognized that negotiated price information warrants this protection, as it would not be disclosed as a matter of good business practice. See generally Wickwire Gavin v. U.S. Postal Serv., 356 F.3d 588 (4th Cir. 2004). Moreover, forcing or encouraging the Postal Service alone to disclose negotiated pricing would itself distort the market, since competitors and customers are not required to make similar disclosures. The current level of protection levels the playing field, while ensuring that the Commission (and counsel and consultants for parties appearing before the Commission) has the necessary information to regulate effectively. A change of the kind that the Task Force appears to advocate would accordingly be inconsistent with the intent of the Congress in the PAEA to enable the Postal Service to compete fairly in the package marketplace. See H.R. Rep. No. 109-66, pt. 1 at 44 (announcing intent to create level playing field, not one tilted against the Postal Service); S. Rep. No. 108-318 at 14 (same).

<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative</td>
<td>Congress, Treasury, PRC</td>
<td></td>
</tr>
</tbody>
</table>

Notes: Current law already separates accounts for competitive products and all other products. 39 U.S.C. §§ 2003, 2011. Historically, the Treasury Department has favored a simplified accounting of competitive-product assets, apportioning total assets by competitive products’ cost of revenue. Dep’t of the Treasury, Accounting Principles and Practices for the Operation of the United States Postal Service’s Competitive Products Fund 25-27, 34 (2007). While a comprehensive study of each asset’s usage and each liability’s origin is theoretically possible, the Treasury Department deemed such an exercise to be unduly complicated. Id.

Before the Commission could adopt a different approach to asset assignment, it would have to determine that that approach would yield a greater allocation of assets to competitive products. 39 U.S.C. § 2011(e)(5). The PAEA does not specify a test for assignment of liabilities, although the 2007 Treasury Department report noted that liabilities would be more complicated to assign than assets. The Commission would also have to ensure that its measurement methodologies and assumptions are not arbitrary. Id. § 503; see 5 U.S.C. § 706(2)(A). Such an exercise would raise similar issues to fully-distributed costing and might ultimately require Congressional action. See Recommendation 15.

The Treasury Department’s statutory role in competitive-product accounting is limited to the issuance of the 2007 report to inform the Commission’s initial accounting rules. 39 U.S.C. § 2011(h)(1), (h)(2)(A)-(B). While the Commission may revisit its rules from time to time, id. § 2011(h)(2)(C)(ii), there is no provision for the Treasury Department to revisit its initial recommendations. That said, there is arguably no bar to the Treasury Department doing so voluntarily, or to the Commission using any new Treasury Department recommendations as a basis for its own consideration of revisions to the rules. The Treasury Department could also, as an “interested party,” petition the Commission to initiate a revisionary rulemaking. Id.
## Recommendation 17

**Policy Action, per Task Force:** Legislative  
**Responsible Party, per Law Department:** Congress, USPS

**Operations:** Align USPS employee rights with other federal employee rights by eliminating collective bargaining over compensation for USPS employees.

**Notes:** The Task Force’s idea is that postal employees should be subject to the General Schedule pay system for Federal employees, and that they would be unable to bargain over compensation. As the Task Force recognizes, Congress would have to make the Postal Service subject to the Federal Service Labor-Management Relations Statute (FSLMRS), rather than the National Labor Relations Act. That step alone would not necessarily end bargaining over compensation, however. Congress would also have to make the General Schedule and related pay rules (or any successor statutes) specifically applicable to the Postal Service. Without that additional step, compensation would qualify, by default, as a condition of employment subject to bargaining. See *Fort Stewart Sch. v. Fed. Labor Relations Auth.*, 495 U.S. 641, 641 (1990). (Despite the general rule that agencies subject to the FSLMRS do not bargain over compensation, at least seven Federal agencies’ employees do bargain over compensation as a result of specific statutory language or a judicial or administrative decision. See Cong. Res. Serv., No. 7-5700, Collective Bargaining and the Federal Service Labor-Management Relations Statute: Selected Legal Issues 3 (2017), [https://fas.org/sgp/crs/misc/R44794.pdf.](https://fas.org/sgp/crs/misc/R44794.pdf.)

In the meantime, the Task Force recommends that the Postal Service do what it can to that effect within its existing authority. With respect to bargaining-unit employees, this would require agreement by the unions or labor arbitrators. With respect to non-bargaining-unit employees, it would require consultation with postmaster/supervisor organizations.

## Recommendation 18

**Policy Action, per Task Force:** Legislative  
**Responsible Party, per Law Department:** Congress, USPS

**Operations:** Pursue reforms to USPS employee wages consistent with those proposed for the broader federal workforce in the President’s Management Agenda.

**Notes:** The President’s Management Agenda proposes enhancement of performance-based pay incentives and a slowing of tenure-based step increases. In theory, the Postal Service could seek similar reforms through collective bargaining. However, any impasse would be resolved through binding arbitration, a process that structurally favors the
precedent of prior arbitral awards and collective bargaining agreements. 39 U.S.C. § 1207. It should be noted that non-bargaining-unit employees are already subject to a performance-based pay system.

<tbody>
<tr>
<td>Operations: Explore and implement new business lines that generate revenue, and that present no balance sheet risk to the USPS.</td>
<td>Legislative</td>
<td>Congress</td>
</tr>
</tbody>
</table>

**Notes:** Congress would have to remove the prohibition on new non-postal services and expand our current ability to partner with Federal agencies to include state, local, and tribal agencies.

<table>
<thead>
<tr>
<th>Recommendation 20</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Governance and Oversight: Strengthen the governance and regulatory oversight of USPS. This could be achieved through reforming, but maintaining, the existing institutional structures or by changing the institutional structures, which would require legislation.</td>
<td>Legislative</td>
<td>USPS, Congress</td>
</tr>
</tbody>
</table>

**Notes:** It is not clear what is intended with this recommendation, as distinct from Recommendations 21 and 22. However, as discussed below, the Board of Governors and the Commission could make strategic decisions within the scope of their existing authority that could be interpreted as strengthening governance and regulatory oversight, respectively. As the recommendation recognizes, any changes to existing institutional structures would require legislation.

<table>
<thead>
<tr>
<th>Recommendation 21</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Governance and Oversight: Institute a new policy mandate for management that sets organizational direction and financial targets, which align with a sustainable business model and establish an enforcement mechanism if the existing Board is unable to meet these targets.</td>
<td>Legislative</td>
<td>USPS, Congress</td>
</tr>
</tbody>
</table>

**Notes:** The Board of Governors could set a new organizational direction and financial targets. (Earlier in the report, the Task Force described creating a new policy mandate as a task for the Board.) Congress could set its own parameters,
although doing so would usurp discretion currently held by the Board. Only Congress can establish an “enforcement mechanism,” in the sense of turning control over to the Commission.

However, the Task Force recognizes elsewhere that legislative and regulatory action is needed to establish a sustainable business model and avoid a liquidity crisis (p. 4; see, e.g., Recommendations 8, 17, 18, 19, 23, 24, and 25). Given the statutory constraints on the Postal Service’s ability to improve its financial health, it is unclear how reasonable or effective sustainability-oriented financial targets can be unless and until legislative and regulatory reforms give the Postal Service more control over costs and revenue.

**Recommendation 22**

<table>
<thead>
<tr>
<th>Governance and Oversight: Strengthen the regulatory oversight role of the PRC, providing the PRC with expanded controls, imposing increased accountability on the USPS.</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Legislative</td>
<td>PRC, Congress</td>
<td></td>
</tr>
</tbody>
</table>

**Notes:** From the discussion at p. 62, it seems that the Task Force envisions allowing the Commission to overturn and dictate Postal Service decisions on service standards, operations, and capital investments. (The Task Force does not explain how this recommendation aligns with Recommendations 3-6, which advocate for preserving or expanding the Postal Service’s operational discretion.)

Existing law may already allow the Commission more authority in these areas than it has historically exercised. The Commission arguably has broad authority to order remedies upon finding a lack of Postal Service compliance with certain statutory requirements, and that authority could be brought to bear on service, operational, and investment decisions. 39 U.S.C. §§ 3653(c), 3662, 3691(d). (However, we would read the scope of the Commission’s remedial authority in a more limited fashion.) To date, the Commission has been reticent to exercise what may arguably be the full extent of that authority, preferring to conduct inquiries and require reporting on the Postal Service’s self-directed remedial efforts. In the Ten-Year Review, the Commission has also proposed to design the rate-regulation system in a way that disincentivizes the Postal Service from downgrading service standards. Order No. 4258, Notice of Proposed Rulemaking for the System for Regulating Rates and Classes for Market Dominant Products, PRC Docket No. RM2017-3 (Dec. 1, 2017), at 70-73. And some commenters have urged the Commission to discount the Postal Service’s rate authority on account of investments that the Commission deems imprudent. While the Commission has historically shied away from using its authority in that fashion, doing so would arguably be within its statutory authority over the rate-regulation system.

Thus, the Task Force recommendation could spur the Commission to use its existing remedial and regulatory authorities more aggressively. If it did not do so, or if some additional enforcement powers were deemed desirable, Congress could amend the statute to that effect.
### Recommendation 23

**Benefits:** Pursue reforms proposed to the Federal Employees Compensation Act that are included in the President’s FY2019 Budget.

**Notes:** The Administration’s proposals are “to provide a single rate of compensation for new injuries at 66 2/3 percent of the injured workers’ pay; convert retirement-age beneficiaries to a retirement annuity-level benefit; establish an up-front waiting period for benefits for all beneficiaries; increase benefits for disfigurement and burial; suspend payments to indicted medical providers; and make other changes to improve the program integrity and reduce improper payments.” Off. of Mgmt. & Budget, Budget of the U.S. Government, Fiscal Year 2019: Major Savings and Reforms 169 (2018) [hereinafter “FY2019 Major Savings & Reforms”], https://go.usa.gov/xPJPZ. OMB estimates that these changes will save only $117 million across the entire Government over the next ten years. *Id.*

</thead>
<tbody>
<tr>
<td>Legislative</td>
<td>Congress</td>
</tr>
</tbody>
</table>

### Recommendation 24

**Benefits:** Pursue reform of the Federal Employee Retirement System (FERS) that would increase employee contributions and move toward a defined contribution system.

**Notes:** Currently, FERS employees contribute 0.8 to 4.4 percent of basic pay, depending on position and time of hire. The Administration has proposed to increase FERS employees’ contribution rates by 1 percentage point per year, until all are contributing half of the normal-cost percentage of their basic pay (i.e., 7.25 percent, under the current normal-cost percentage). The Administration has also proposed reducing FERS’s liability by eliminating annuity supplements and cost-of-living adjustments and basing annuity calculations on employees’ “high-5” average salary, instead of the current “high-3” calculation. See Letter from Jeff T.H. Pon, Director, Office of Personnel Management, to Paul D. Ryan, Speaker, House of Representatives, May 4, 2018, http://tiny.cc/OPM-FERS-proposal-letter; OMB, *FY2019 Major Savings & Reforms* at 181, 183-84.

SUBJECT: Legal Analysis of White House Task Force Report

Dear Steve:

It was great to speak with you this afternoon. As I mentioned to you today, and to other members of your team yesterday, please accept this letter as our effort to provide you with additional information and to express our views concerning certain legal and practical issues implicated by the December 4 report of the Task Force on the United States Postal System (Task Force), and to request the opportunity to discuss these issues with you further. As we discussed, we are very interested in having a broader legal discussion concerning the Task Force recommendations, and in particular regarding your understanding of the available legal paths to implement them in the event that our Governors direct us to do so.

In that regard, the Task Force report makes a number of recommendations that it designates as “Administrative” or “Legislative,” with “Administrative” recommendations directed to the Postal Service or the Postal Regulatory Commission (Commission). In our view, many of those designations are accurate. However, we believe that some of the designations warrant further review or clarification and discussion, as next steps regarding the Task Force report are considered. In particular, certain items designated as “Administrative” seem to us to lie entirely or substantially outside of the control of the Postal Service or the Commission. In addition, it would be useful for us to better understand the perspective of the Task Force with regard to certain of the recommendations as we prepare to advise our clients concerning the “going-forward” strategy of the Postal Service, particularly given the legal issues which we articulate below.

Each recommendation is introduced below as it is framed and designated in Appendix A of the Task Force report. In cases where the text of the report clarifies or expands upon the recommendation as presented in Appendix A, that is noted in the discussion that follows each header.

Recommendation 1

Universal Service Obligation (USO)

Definition. Clearly define the USO. Provide a targeted definition of minimum, essential postal services, that due to specific social and economic needs have a basis for government protection. (Administrative)

The Task Force’s proposal to reclassify postal services as “essential” and “commercial” underlies a number of its recommendations, and it is the focus of Recommendation 1.
This recommendation would redefine the scope of the universal service obligation (USO) and would impact product regulation. Because we believe that altering the scope of the USO in the fundamental way proposed by the Task Force is a public-policy decision reserved to the Congress, we believe it requires legislative change.

The Postal Accountability and Enhancement Act of 2006 (PAEA), Pub. L. No. 109-435, 120 Stat. 3198 (2006), made no changes to the statutory provisions governing the USO (except for requiring the Postal Service to establish, in its regulations, specific service standards for market-dominant products). In fact, as discussed in more detail below, Congress deliberately opted not to allow the Commission to change the USO's scope. The PAEA's main regulatory innovations were to prescribe different modes of postal regulation based on whether or not the Postal Service exercises market power (as defined by the statute) over a particular product. Congress did not clarify how this division based on market power affected the USO, but after enactment of the PAEA, the Commission issued a report interpreting the USO as applying to both market-dominant and competitive products.

By contrast, the Task Force proposes a new structure to define the scope of the USO, as well as for product-regulation purposes. Instead of the current division based on market power (market-dominant or competitive), the Task Force would distinguish between products and services deemed "essential" to public policy and those that are "non-essential" and "commercial." Whatever regulatory framework might protect consumers of "essential" services, the Postal Service would be largely free to choose the appropriate price and terms of service for "commercial" services, so long as prices are "market-based" and aimed at raising revenue to support the USO covering "essential" services. In addition to Recommendation 1, this concept animates Recommendations 7, 8, 9, 10, and 11 and plays a role in Recommendations 2 and 4.

The Task Force designates this recommendation as "Administrative," although it also recognizes that the Postal Service may have to seek legislation in order to define the USO around the Task Force's "essential"-"commercial" distinction. The Task Force is correct in this latter regard because, as explained below, Congress has reserved to itself the public policy decisions concerning the definition of the USO. In the product-regulation context, attempting to make these changes without statutory reform would raise a number of complications. Most significantly, because the current market-dominant and competitive groupings are not a proxy for the Task Force's "essential" and "commercial" categories, it does not appear that the Task Force's objectives for that distinction can be achieved in a comprehensive and coherent fashion without legislative reform.

A. Scope of the USO

With respect to the USO, there does not appear to be a basis for an "essential"-"commercial" distinction in current law. The USO applies broadly to "written and printed matter, parcels, and like materials," including "business correspondence" as well as other forms of correspondence. 39 U.S.C. §§ 101(a), 403(a). The only statutory reference to "essential postal services" is in the broad context of access to postal services in general; there is no indication that the use of the

1 Moreover, attempting to do so without a corresponding statutory change to the USO’s scope would appear to be inconsistent with the Task Force’s intent: at page 32, the Task Force cautions that “[u]pdating some components [of the recommendations] but not others, or updating different components in isolation of others, will not result in a coherent, sustainable strategy.”

2 The need for legislative reform to comprehensively implement the Task Force’s recommendations regarding the “essential” - “commercial” distinction for purposes of product regulation is explained in more detail below. Most fundamentally, because certain mail products that the Task Force would designate as “commercial” must remain on the market-dominant product list under current law, and certain package products that the Task Force would designate as “essential” are properly defined as competitive under the present statute, the current market-dominant and competitive groupings are not a proxy for the Task Force’s “essential” and “commercial” categories. The Task Force itself recognizes that this approach is a departure from the current structure. For example, when discussing the Postal Service’s mission and business model at pages 32-33, the Task Force opines that the Postal Service must adopt a new, more targeted business model, moving from the current “statutory monopoly” to a model based on the provision of “essential services.”
qualifier "essential" in that context was intended as a basis for distinguishing among postal services. Id. § (b) (3). Therefore, to the extent that certain segments of postal services would be considered "essential" (and hence subject to the USO), and others "commercial" (and hence not subject to the USO), this would have to be predicated on new public-policy considerations, not on the current terms of the statute. In developing the PAEA, however, Congress emphatically reserved to itself the power to change the USO as a matter of public policy, rather than delegating that power to the Commission or the Postal Service:

With steadily declining volumes of First Class mail, it is clear that the nation’s correspondence needs are changing. The President’s Commission [established by President George W. Bush] recommended, therefore, that an independent entity – the Regulatory Commission – be charged with, "refining key aspects of universal service as circumstances require/permit."... From the perspective of the [Senate] Committee, both the postal monopoly and universal service are issues of broad public policy – not regulatory issues. For that reason, the Committee decided that the power to refine either the monopoly or the universal service obligation should remain in the hands of Congress. However, the Committee thought it would be helpful to hear from the Regulatory Commission what potential changes to either the monopoly or the universal service obligation they believed made sense. Congress would then have the option to enact any of the Regulatory Commission’s recommendations with which they agreed.

While, as noted above, Congress in the PAEA retained the statutory language setting forth the USO in broad terms, there was a question as to how the new regulatory distinction between market-dominant and competitive products affected the implementation of the USO, in terms of its application to specific products. In its resulting 2008 report, the Commission concluded that, under current statutes, the USO applies to all products.4 Postal Regulatory Comm’n, Report on Universal Postal Service and the Postal Monopoly 4, 23-25 (2008) [hereinafter “USO Report”]. While the Commission could theoretically reconsider its conclusion that the USO applies to all products, it might find it difficult to articulate a rational basis for doing so, given that the relevant statutes have not changed since the 2008 report. In any event, reconsideration of the 2008 report, which was advisory in nature, would have no legal effect without Congressional action, and could not effectuate the "essential"-"commercial" distinction for purposes of the USO, given the language of the current statute.

In its role as operator of the postal network, the Postal Service has some authority to interpret and apply the current USO provisions regarding matters such as service standards, access, and mode of delivery (subject to Commission oversight). The relevant statutes usually set forth qualitative

---

3 We are unaware of any legislative history limiting the scope of the phrase “essential postal services” in 39 U.S.C. § 403(b)(3). To the contrary, in the one instance where we are aware that the Commission has discussed the phrase in the context of this provision, the Commission interpreted the phrase broadly as “ranging from postal products, to mail acceptance points (such as collection boxes), to access to letter carriers who accept mail for posting, to easily accessible information.” Postal Regulatory Comm’n, Report on Universal Postal Service and the Postal Monopoly (2008).

4 In its own submission to the Commission, the Postal Service took the position that the USO should not apply to competitive products, owing, in part, to the PAEA’s grant of significant flexibility with respect to those products’ pricing and service. U.S. Postal Serv., Report on Universal Postal Service and the Postal Monopoly 3, 11-13, 18, 86 (2008). As explained in the next section, however, the PAEA’s distinction between market-dominant and competitive products is not a proxy for the Task Force’s new, social-policy-based “essential” and “commercial” categories. In any event, the Commission rejected the Postal Service’s proposed limitation of the USO’s scope: a fact that underscores the Postal Service’s inability to redefine the USO on its own.
standards about the service that the Postal Service must provide, rather than quantitative requirements, and so the Postal Service generally has discretion in balancing customer needs with financial considerations in deciding how to provide service to the American public. See 39 U.S.C. §§ 403(a)-(b), 3691(b)-(c). Certain Task Force recommendations (such as those focused on delivery mode and service standards) reinforce the current discretion of the Postal Service in these respects and implicate the Postal Service's administrative authority to make such decisions. Again, however, Congress reserved to itself the power to redefine the USC's scope. Doing so therefore is beyond the Postal Service's authority to interpret the current USO terms. As such, only Congress can give effect to the Task Force's recommendation that the USC's scope be redefined according to whether postal services are "essential" or "commercial."

B. Scope of Product Regulation

With respect to price regulation, the current statute differentiates between market-dominant and competitive products. The current dividing lines are based on three criteria:

1) If a product is subject to the Private Express Statutes, 18 U.S.C. §§ 1693-1699; 39 U.S.C. § 601, then it must be classified as market-dominant. 39 U.S.C. § 3642(b)(2). The Private Express Statutes set forth the parameters of the so-called "letter monopoly"; subject to various exceptions, they generally prohibit the private carriage of written materials weighing less than 12.5 ounces or costing less than six times the rate of a one-ounce single-piece First-Class Mail letter (i.e., the price of a regular postage stamp). Because most First-Class Mail and Marketing Mail volume is subject to the Private Express Statutes, this volume cannot be reclassified as competitive.\(^5\)

2) If a product is subject to statutory "preferred-rate" mandates, then it must be regulated as market-dominant. 39 U.S.C. §§ 3626(a)(1) & (g)(4)(B). The preferred-rate statute covers nonprofit Marketing Mail, Library Mail, and various types of Periodicals.

3) Finally, a product must be classified as market-dominant if the Postal Service exercises market power in the relevant product market, as defined by the Commission using antitrust standards. 39 U.S.C. § 3641(b)(1).

If any of those three criteria applies to the product, it must be classified as market-dominant under current law; if none apply, it is eligible to be classified as competitive. None of the current classification criteria directly correspond to considerations of whether or not a given service is "essential" as a matter of social policy.

Within this framework, the Postal Service and the Commission could move only incrementally in the direction of effectuating the "essential"-"commercial" distinction. In particular, to the extent that certain "commercial" market-dominant services could be transferred to the non-price-capped competitive-product category, opportunities for such transfers are few. Only a small portion of market-dominant volume clearly falls outside of the first (letter-monopoly) and second (preferred-rate) criteria outlined above: single-piece First-Class Mail flats in the 12- to 13-ounce range, the Keys and Identification Devices price category of First-Class Mail,\(^6\) Marketing Mail delivered on a

---

\(^5\) Under current law, the scope of the letter monopoly cannot be administratively narrowed to facilitate a greater range of reclassifications. Congress declined to delegate to the Commission the power to redefine the letter monopoly as well as the USO. See S. Rep. No. 108-318 at 39, 54 (characterizing 39 U.S.C. § 601(c) as delegating to the Commission only the power to administer the monopoly's exceptions, and explaining Congress's intent as reserving to itself the power to redefine the monopoly's scope).

\(^6\) In 2016, the Commission rejected, without prejudice, a proposed transfer of Keys and Identification Devices to the competitive product list, based on a lack of evidence in that proceeding as to the existence of competing providers. Order No. 2686, Order Denying Transfer of First-Class Mail Parcels to the Competitive Product Category, PRC Docket No. MC2015-7 (Aug. 26, 2015), at 23-24. (The Postal Service successfully sought judicial review of that Commission decision with respect to
saturation basis with simplified addressing, Alaska Bypass Service, and certain Bound Printed Matter Flats and Parcels. To re-categorize any of those items that might be deemed "commercial, the Postal Service would have to convince the Commission that the Postal Service lacks market power, on the basis of a fact-intensive inquiry that would depend heavily on how the Commission defines the relevant market.\textsuperscript{7} While the Postal Service may be in a position to make such a showing for at least some of these types of mail, the point remains that such reclassifications would, at best, affect a relatively small portion of mail volume and fall far short of the coherent and comprehensive restructuring that the Task Force envisions.

Even without transferring market-dominant products to the competitive-product category, the Commission could theoretically establish a two-tier regulatory system within the market-dominant category through the Ten-Year Review.\textsuperscript{8} The Commission would first have to decide that it has the power to change the legacy mail classes, to which at least the initial market-dominant rate-regulation system must apply. \textsuperscript{141} The Postal Service believes that the Commission has the power to do so and raised this question in the Ten-Year Review, but the Commission has not yet resolved it. Then, and more fundamentally, the Commission would have to establish a non-arbitrary basis for an "essential"-"commercial" distinction and for the regulatory treatment of each category, all of which would have to be consistent with the existing statutory objectives and factors governing rate regulation. However, none of those statutory objectives and factors set forth or clearly support an "essential"-"commercial" distinction for purposes of market-dominant product regulation. \textsuperscript{142} Because of the delay, uncertainty, and likelihood of legal challenge involved if the Commission took this approach, it would be more effective for Congress to specify the terms of any new division of the product-regulation system consistent with any decisions it makes regarding changes to the USO.

With respect to products currently classified as competitive, the Commission has consistently and appropriately recognized that the market for the Postal Service's parcel products is competitive for purposes of \textsuperscript{143} As such, these products are removed from the regulatory framework for market-dominant products, including the current price cap. \textsuperscript{144} For that reason, the existing statutory parameters for competitive products do not allow the Commission to impose a price cap, or to distinguish its mode of regulation in any other way, based on a judgment of whether a service is "essential." \textsuperscript{145} Because of the delay, uncertainty, and likelihood of legal challenge involved if the Commission took this approach, it would be more effective for Congress to specify the terms of any new division of the product-regulation system consistent with any decisions it makes regarding changes to the USO.

For all of these reasons, the current legal powers of the Postal Service and the Commission are too limited to allow for comprehensive, effective implementation of Recommendation 1.

\textsuperscript{7} For example, amid intense controversy, the Commission declined to consider electronic substitutes as part of market-power analyses. Order No. 2306, Order Denying Request, PRC Docket Nos. MC2013-57 & CP2013-75 (Dec. 23, 2014), affd, U.S. Postal Serv. v. Postal Regulatory Comm'n, 816 F.3d 883, 886 (D.C. Cir. 2016). This calls into question the ability to re-categorize any product outside of the parcel- and express-delivery markets traditionally viewed as competitive.

\textsuperscript{8} The Ten-Year Review refers to the Commission's ongoing proceeding to review and modify or replace the initial system for regulating market-dominant rates and classes, in accordance with \textsuperscript{9} The Postal Service has proposed a substantially streamlined regulatory model for all market-dominant products generally, which would be consistent with the current objectives and factors. \textsuperscript{146} But those arguments concern statutory provisions and circumstances pertinent to all market-dominant products, they do not bear on the creation of a new regulatory distinction between "essential" and "commercial" services. It is open to question whether the distinction proposed by the Task Force can be reconciled with the existing statutory criteria.
Recommendation 2

Geographic Scope. Keep current practice, which designates that the USO includes all addresses in the country covering “the United States, its territories and possessions,” irrespective of population density. (Administrative)

With Recommendation 2, the Task Force proposes to maintain the USO’s current geographic scope – all addresses, regardless of population density – for “essential” services. Presumably, the Postal Service would attain new flexibility as to the provision of “commercial” services in different areas.

Although the Task Force designates this recommendation as “Administrative,” only Congress can change the scope of the USO, as described in connection with Recommendation 1 above.

In addition, at page 42, the Task Force report argues that the prices for “essential” services “should be standard, regardless from where the products are sent or delivered – similar to the current flat postage rate for First-Class Mail.” Such a requirement would be more restrictive, on balance, than under current law. At present, uniform-rate requirements apply only to First-Class Mail, Media Mail, and Library Mail, not to all market-dominant services, and certainly not to all services that the Task Force appears to consider “essential.” 39 U.S.C. §§ 404(c), 3683(a). Moreover, the uniform-rate requirement means different things for different products. Media Mail and Library Mail rates are expressly prohibited from varying with distance, while First-Class Mail is not necessarily subject to a similar prohibition on distance-variable pricing. This contrast in statutory text has historically been interpreted to mean that First-Class Mail prices could theoretically vary with distance (e.g., pricing “local” and “non-local” mail differently), so long as the same price schedule is available in every location. See, e.g., 116 CONG. REC. 27,606 (1970) (remarks of Rep. Udall); Tentative Decision Concerning Proposals for Local and Nationwide Subclasses within First-Class Mail, PRC Docket No. MC76-1, at 3-9 (July 15, 1977); USO Report at 30 n.10, 77-78, 117-18. While a “flat postage rate for First-Class Mail” may be a longstanding public expectation for which there are also significant operational and business justifications, it has arguably not been codified into a statutory requirement. To the extent that, under the Task Force’s recommendation, Congress would affirmatively prohibit distance-variable pricing for First-Class Mail and, more critically, extend that prohibition to “essential services” beyond First-Class Mail, that restriction would sweep more broadly than current requirements.

Recommendation 3

Number and Density of Post Offices and Collection Boxes. Establish a rule that specifies that access to the postal system must only be sufficient to implement defined USO standards for delivery. (Administrative)

The Task Force identifies certain qualitative statutory parameters as responsible for the current breadth of the delivery and collection network. It recommends the enactment of a rule to specify quantitative standards for network access, and it designates such action as “Administrative.”

As noted in connection with Recommendation 1 above, Congress expressly reserved to itself, not the Commission or the Postal Service, the power to redefine the USO. To be sure, the Postal Service has discretion under statutory USO parameters to determine the appropriate retail and collection network, and over the past decade has pursued a number of initiatives to right-size its network. But a redefinition of the parameters themselves would require Congressional action. Congress also might need to amend other governing statutory standards, such as to allow Post Offices to be closed for operating at a deficit. See 39 U.S.C. § 101(b).

It should be noted that the Task Force does not discuss the “essential”-“commercial” distinction in connection with this USO recommendation; it is thus unclear whether and how such a distinction, if
enacted, might translate into different degrees of latitude with respect to access to various postal services.

**Recommendation 4**

*Delivery Frequency.* Provide greater flexibility to determine mail and package delivery frequency. *(Legislative)*

The Task Force recommends, as a "Legislative" action, that Congress stop including a rider in appropriations bills that mandates a certain level of six-day delivery. We agree that Congress would need to take that step in order for this recommendation to be implemented. To the extent that the Task Force's vision of how the Postal Service would exercise its resulting flexibility turns on a distinction between "essential" and "commercial" services, see Recommendation 1 above.

**Recommendation 5**

*Mode of Delivery.* Maintain current discretion to determine mode of delivery consistent with a financially sustainable business model. *(Administrative)*

The Task Force recommends, as an "Administrative" action, the maintenance of the Postal Service's current discretion to determine the mode of delivery (that is, to a mailbox at a recipient's door, a curbside mailbox, or a centralized cluster box). The recommendation is generally correct, in that this discretion currently rests with the Postal Service. As a further "Administrative" action, the Commission would need to avoid creating political roadblocks in any advisory opinion, which the Postal Service is required to seek under current law for sufficiently large-scale, programmatic changes in service. See 39 U.S.C. § 3661(b)-(c).

In addition, legislative action would likely be advisable to enable the Postal Service to effectively implement any large-scale change in mode of delivery. For one thing, it would be useful for Congress to endorse the use of Postal Service discretion in this regard to avoid any explicit or implicit Congressional interference with Postal Service efforts. For another, a number of considerations have given the Postal Service pause in converting existing addresses to centralized delivery, such as the likelihood of customer and political backlash; the uncertain effect on the perceived value of mail and, correspondingly, on mail volume (and hence revenue); and the fact that, over the past several years, Congress has considered several bills on centralized delivery without settling on a consistent message. See Reply Comments of the United States Postal Service, PRC Docket No. R2013-11 (Dec. 6, 2013), at 103-105. And, as noted in a recent submission to the Government Accountability Office, there are a number of significant legal issues that would arise from any widespread move toward centralized delivery, independent of whether the USO standards permit it. Thus, even though this recommendation is technically within the Postal Service's existing legal authority from the standpoint of the USO, it would be very challenging to implement, as a practical matter, absent legislation expressly endorsing a shift toward more efficient modes like centralized delivery, even if such legislation might add some procedural constraints.

Like Recommendation 3, this recommendation is not framed in terms of the Task Force's "essential"-"commercial" service distinction, so it is unclear whether this recommendation applies to all products and services or only a subset of them.

---

11 The Postal Service provided this submission to the Task Force on May 22, 2018.
Recommendation 6

Processing Standards. Keep current practices, which allow the USPS to manage processing standards. (Administrative)

Like Recommendation 2, this essentially recommends maintenance of the status quo in terms of the Postal Service’s authority to set service standards and manage its processing network. The Postal Service has broad discretion in this area, subject to certain requirements. See 39 U.S.C. §§ 101(d) & (g), 403(b)(1) & (3), 3652, 3653(b)(2), 3691; Pub. L. No. 109-435, § 302(c)(3)(D) & (c)(5), 120 Stat. 3198, 3220-3221 (2006). This recommendation is “Administrative” or “Legislative” to the extent that it calls upon the Commission or Congress, respectively, to avoid interfering with Postal Service decisions. To the extent that the recommendation envisions an expansion of that discretion, legislative change would be necessary.

We note that Recommendation 22 appears to suggest giving the Commission new power to overrule the Postal Service’s establishment of service standards. It is not clear how this is intended to interact with Recommendation 6.

Recommendation 7

USO Funding. Review and determine if income generated by activities defined to be outside of the USO could be optimized to cover the costs of funding the USO. (Administrative)

The Task Force recommends the maximization of revenue from activities defined to be outside of the USO, in order to support activities within the USO, and designates this recommendation as “Administrative.”

The Task Force’s recommendation appears to be tied not to the existing legal framework, however, but to the Task Force’s vision of a redefined USO that applies only to “essential” services. The predicate step of restructuring the USO and the product-regulation system would require Congressional action, as discussed in connection with Recommendation 1 above. So, too, would any expansion of the Postal Service’s revenue-generating activities, as discussed in connection with Recommendation 19 below. Therefore, this action should be designated as “Legislative” in the first instance.

If Congress allowed for such restructuring per Recommendation 1, only then would implementation of Recommendation 7 hinge on “Administrative” action. At that point, the Commission could structure the regulatory system for “commercial” services to maximize the Postal Service’s ability to generate revenue, and the Postal Service would be responsible for making full use of that authority (and for controlling “commercial” services’ costs to improve contribution).

Recommendation 8

Mail and Package Markets

Business Model. Develop a new model that can be used to both set rates and control costs to achieve sustainability. (Administrative)

The discussion in this portion of the Task Force report (pp. 50-51) is unclear, but the Task Force appears to recommend that, until a reclassification along “essential”-“commercial” lines can be

---

12 We understand “processing standards” to refer to the service standards that determine many aspects of the mail processing network.
conducted (see Recommendation 1), the Commission should do what it can through the Ten-Year Review to allow net-income maximization for "commercial" market-dominant services.

The Postal Service agrees that this can be achieved with "Administrative" action, insofar as the Commission should use its regulatory powers to facilitate revenue maximization from market-dominant products, consistent with objectives of the statute. In the Ten-Year Review, the Postal Service has argued that the Commission can and should, within its existing authority, abolish the price cap in favor of after-the-fact regulatory monitoring. See generally Comments of the United States Postal Service, PRC Docket No. RM2017-3 (Mar. 20, 2017). As noted in footnote 7 above, however, the rationale for doing so applies across all market-dominant products, not just "commercial" ones.

To the extent that this recommendation urges the Commission to create an "essential"-"commercial" distinction through the Ten-Year Review, it would be more effective to do so through legislative action, as discussed in connection with Recommendation 1 above.

The Task Force does not explain the "control costs" language in the recommendation. To the extent that this can be interpreted as urging the Postal Service and/or Commission to do more to control costs, see Recommendations 21 and 22 below.

Recommendation 9

**Business Model.** Require price increases, reduce service costs, or exit the business for any mail products that are not deemed an essential service and do not cover their direct costs. (Administrative)

The Task Force recommends, as an "Administrative" action, price increases, cost reductions, or termination for "non-essential" (i.e., "commercial") services that do not cover their "direct" costs. To the extent that this would be effectuated by redefining the USO, see Recommendation 1, or by abolishing the price cap on "non-essential" services, see Recommendations 1 and 8. As the Postal Service has argued in the Ten-Year Review and elsewhere, a price-cap system provides little incentive to devote limited pricing authority to "underwater" products with rapidly declining volume, as the resulting price increases will not yield as much overall net income as would increases to other, more stable products. Without a price cap, there may be ways to address the situation that do not sacrifice overall remuneration.

The Task Force also recommends that the Postal Service be required to price "non-essential services" at a "market rate" (p. 51). It is not clear what this means, but the Postal Service already sets prices, to the extent possible under current statutory criteria, according to our evaluation of what the market will bear. Where those statutory criteria, such as the current price cap or the statutory objectives and factors, impede the Postal Service's ability to price market-dominant products to the market, reform of these criteria would require Congressional action. To the extent that this aspect of the recommendation seeks prices that are artificially pegged to competitors' prices, rather than reflecting the cost and demand factors for the postal products, see Recommendation 14 below.

Recommendation 10

**Product Classes.** Redefine mail classes by creating products defined by the type of sender and the declared purpose of the mail item. (Administrative)

This recommendation appears to seek the same result as Recommendation 1. As discussed above, a broad redefinition of mail classifications along "essential" and "commercial" lines would most effectively be accomplished by Congress, rather than by any "Administrative" entity. Within the context of existing mail-classification categories, however, it should again be noted that the Postal
Service has asked the Commission, as part of the 10-Year Review, to confirm that the current statute allows for a redefinition of market-dominant product classes.

**Recommendation 11**

*Product Classes.* Change USPS systems in order to track the purposes and uses of mail, to allow for better cost allocation, targeted pricing, and more business intelligence. *(Administrative)*

This recommendation is properly designated as "Administrative" and directed to the Postal Service. That said, we would welcome a chance to discuss the intent behind this recommendation, and your ideas concerning how we might better leverage our Household Diary Surveys.

**Recommendation 12**

*Strategic Options.* Evaluate areas of USPS operations where the USPS could expand third party relationships in order to provide services in a more cost efficient manner (e.g., midstream logistics and processing). *(Administrative)*

The Postal Service has the authority to evaluate opportunities to partner with third-party vendors or to offer new work-sharing incentives. Any new or modified workshare discounts would require Commission approval, and so this recommendation is properly designated as "Administrative" in that regard.

Similarly, the Postal Service has the authority to pursue outsourcing opportunities under certain circumstances, but outsourcing is a mandatory subject of bargaining under the National Labor Relations Act (NLRA), to which the Postal Service is subject. 39 U.S.C. § 1209; see U.S. Postal Serv. v. Am. Postal Workers Union, AFL-CIO, NLRB No. 5-CA-140963, at 19-23, 2016 WL 6610695 (Nov. 8, 2016) (admin. law judge decision) (shifting of work from bargaining unit to workers outside of the bargaining unit is a mandatory subject of bargaining), adopted by Board, 2017 WL 1279607 (Jan. 4, 2017). Under a longstanding provision of its collective bargaining agreements, the Postal Service is required to “give due consideration to public interest, cost, efficiency, availability of equipment, and qualification of employees when evaluating the need to subcontract.” E.g., 2015-2018 Agreement between the United States Postal Service and the American Postal Workers Union, AFL-CIO, art. 32(1)(A) (2016). The Postal Service must also provide affected labor unions with advance notification of, and an opportunity to comment on and discuss, any planned outsourcing that will have “a significant impact on bargaining unit work.” Id. art. 32(1)(B). A labor organization may challenge the Postal Service’s decision to subcontract through binding arbitration if it believes that the appropriate Article 32 procedures were not followed. 39 U.S.C. § 1207. The Postal Service’s ability to reduce labor costs through outsourcing may also be impacted by clauses in its collective bargaining agreements that protect particular categories of employees from layoffs. E.g., id. art. 6.

While the Postal Service could attempt to negotiate different subcontracting provisions, the practical ability to achieve such changes is limited by the statutory backdrop of binding interest arbitration. As discussed further in connection with Recommendation 17 below, the interest arbitration process is structured to favor the status quo. To the extent that the current collective-bargaining and interest arbitration requirements impede the achievement of this recommendation, legislative change would be necessary to alter those requirements.
Recommendation 13

Strategic Options. As a means of generating more income, the mailbox monopoly could be monetized. (Administrative)

The mailbox monopoly statute, 18 U.S.C. § 1725, requires payment of postage on all mailable items placed in mailboxes. In theory, the Postal Service could establish special “postage” classifications and rates for items delivered by qualifying third-party delivery providers into mailboxes. The Commission would have to approve these classifications and rates. Therefore, the Task Force correctly recognized that, as a general matter, this recommendation could be implemented by “Administrative” action.

Such a move would bring other legal and policy complications, however. To begin with, it would affect other public benefits that the mailbox monopoly provides, particularly the secure, efficient provision of universal service. The mailbox monopoly does not merely protect revenue to support the Postal Service's ability to effectively achieve its USO. By channeling mailbox deliveries to a single universal service provider, it promotes efficient mail delivery: there is room in mailboxes for letter carriers to deliver, and carriers do not need to spend time at each mailbox distinguishing collection mailpieces from alternative-delivery mailpieces. The mailbox monopoly also protects mail security, by giving recipients a stable expectation as to who can legitimately access a mailbox and who might warrant suspicion. That assurance of security, in turn, provides value to the “brand” of the mail. Opening mailbox access, even via franchising, should involve consideration of the impact on these current public benefits, as well as delivery costs and revenue.

Recommendation 14

Strategic Options. Price competitive products in a manner that maximizes revenues and generates income that can be used to fund capital expenditures and long-term liabilities. (Administrative)

As an initial note, Recommendations 14, 15, and 16 focus on competitive products, as currently defined, without reference to “essential” or “commercial” services. It is not clear how these recommendations interact with the Task Force’s vision of an “essential”-“commercial” distinction (e.g., in Recommendation 1) or with its reliance on that proposed distinction in other recommendations.

Recommendation 14 urges competitive products to be priced to maximize revenue with which to support the USO. To the extent that this recommendation generally urges revenue maximization as the goal of pricing, the Postal Service agrees that this is appropriately designated as “Administrative,” subject to existing legal and regulatory constraints. Indeed, maximizing revenue and contribution to institutional costs is consistent with the Postal Service’s existing approach to competitive-product pricing. As the Commission recently noted, the Postal Service has strong incentives to maximize contribution from competitive products given the decline in market-dominant volume, and the evidence (in the form of the price increases imposed by the Postal Service since the PAEA and the large increase in competitive product contribution) demonstrates that the Postal Service has been doing so. Order No. 4963, Order Adopting Final Rules Relating to the Institutional Cost Contribution Requirement for Competitive Products, PRC Docket No. RM2017-1 (Jan. 3, 2019), at 60-62. The Task Force also acknowledges elsewhere that the Postal Service has aggressively grown competitive-product revenue and contribution since the PAEA. The Postal Service has done so consistent with the PAEA’s aim, discussed further below, of allowing the Postal Service to compete more effectively in the competitive marketplace and to seek retained earnings.

To the extent that the Task Force suggests that competitive products can and should be priced substantially higher to generate more revenue, this does not appear to account for the fact that, by statutory definition, the Postal Service cannot raise competitive product prices substantially above
costs, or raise them significantly at all, without risking the loss of significant business. 39 U.S.C. § 3642(b)(1). Indeed, the Task Force recognizes that "there are limits to how much consumers are willing to pay for delivery" and that "e-commerce consumers remain highly sensitive to delivery costs" (p. 50), which suggests that these products are competitive and that, accordingly, the Postal Service cannot price them substantially higher without harming its ability to compete effectively in the marketplace. Because of the inconsistencies in the Task Force recommendation in this regard, the Postal Service would welcome the opportunity to discuss it further.

Alternatively, the Task Force recommends that the Postal Service consider, in its pricing decisions, "the potential market distortions that could drive industry participants out of the market" (p. 54). As a factual matter, it should be noted that, of the three major package and express delivery providers, the Postal Service holds the smallest share of the overall market when measured by revenue. The Postal Service's two major competitors are in robust financial health and have made no indication of a fear of being driven from the package-delivery market. As such, it is unclear how the Postal Service's current pricing practices represent any serious threat to these competitors.

As a legal matter, this consideration is not properly aimed at the Postal Service, whose pricing decisions are designed to maximize revenue to support the USO and its other statutory obligations, rather than to preserve its competitors' market position. Guarding against predatory pricing is an object of regulation by the Commission, the Federal Trade Commission, and the Department of Justice's Antitrust Division, not of any individual market participant. Yet even those agencies' role is to protect "competition, not competitors." Brown Shoe Co. v. United States, 370 U.S. 294, 320 (1962); see Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458 (1993) ("The purpose of the [Sherman] Act is not to protect businesses from the working of the market; it is to protect the public from the failure of the market."); Direct Marketing Ass'n v. U.S. Postal Serv., 778 F.2d 96, 105-106 (2d Cir. 1985) (approving the application of antitrust principles and the Brown Shoe dictum in the context of postal regulation); see also Newspaper Ass'n of Am. v. Postal Regulatory Comm'n, 734 F.3d 1208, 1214-15 (D.C. Cir. 2013) (same).

Moreover, a difference in price levels between competitors is not the legal or economic test for an unfair market distortion. It is well-established that, so long as a competitive product covers its marginal and incremental costs, it is not unfairly distortory, regardless of how it compares with competitors' prices.

In the context of pricing practices, only predatory pricing has the requisite anticompetitive effect. See [Phillip] Areeda & [Donald F.] Turner, Predatory Pricing and Related Practices Under Section 2 of the Sherman Act, 88 HARV. L. REV. 697, 697-99 (1975); [John S.] McGee, Predatory Pricing Revisited, 23 J. LAW & ECON. 289, 292-94 (1980). Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. In Cargill, Inc. v. Monfort of Colorado, Inc., . . . [w]e observed that nonpredatory price competition for increased market share, as reflected by prices that are below "market price" or even below the costs of a firm's rivals, "is not activity forbidden by the antitrust laws." 479 U.S. [104.] 116 [(1986)].

Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339-40 (1990) (footnote omitted). Barring predatory below-cost pricing behavior, "[i]t is in the interest of competition to permit dominant firms" – let alone a non-dominant firm, such as the Postal Service in the package-delivery market – "to engage in vigorous competition, including price competition." Id. (quoting Cargill, 479 U.S. at 116). The same principle of relying on cost coverage, rather than price comparison, applies to testing competitive product pricing for unfairness under the PAEA. 39 U.S.C. § 3633; Dep't of the Treasury, Accounting Principles and Practices for Operation of the United States Postal Service's Competitive Products Fund 4-5, 7 (2007) [hereinafter "Treasury Report"].
Even if a simple price comparison were relevant, any analysis would need to consider whether nominal disparities in price might reflect differences in demand. For instance, customers’ willingness to pay may vary across different package-delivery providers’ offerings, based on actual or perceived differences in those products’ features and quality.

To the extent that this recommendation implies that the Postal Service should attempt to match competitors’ prices, not for reasons of rational business self-interest or legal compliance, but to protect competitors of the Postal Service, that sort of artificial price increase would itself distort the market and harm the interests of consumers. As noted above, it is these interests, not those of competitors that are the focus of competition regulation. As such, pricing artificially to protect postal competitors could itself draw antitrust scrutiny.

It is unclear how the Postal Service could practically resolve the internal tension between protecting competitors and maximizing revenue to fund the USO, if artificially raising prices has the effect of driving away volume and reducing cash flow and overall revenue and contribution. It would also force all customers in the market to pay more, both through higher Postal Service prices and through competitors’ abandonment of the pricing restraint that comes from having to compete on price with the Postal Service. Such a strategy would mark a departure from the PAEA’s aims of open, fair competition and of treating the Postal Service as a self-interested business actor on par with its private-sector peers. In the end, it would only serve to benefit certain Postal Service competitors, at the expense not only of the Postal Service, but also of consumers and the market as a whole.

**Recommendation 15**

**Costing Options.** Develop a new cost allocation model to establish full price transparency and fully distribute costs. (Administrative)

Recommendation 15 seeks the adoption of (a) “full price transparency” and (b) fully-distributed costing. Both prongs of this recommendation are inconsistent with the current statutory framework, and for that reason to adopt these changes as a matter of law would require legislative change. During our meeting yesterday your team suggested that, at least with regard to the costing recommendation, your concerns were focused on our internal cost accounting as a tool to better inform our pricing decisions. To the extent the costing recommendation is limited to the administrative practices of the Postal Service, we would agree that it is within our control, though there would still be a tension between such a practice and Congressional intent.

**A. “Full Price Transparency”**

It is not entirely clear what is meant by “full price transparency,” although the discussion at pages 54-55 suggests a belief that negotiated service agreement (NSA) pricing, which is not publicly disclosed, somehow distorts markets. To the extent that this lack of public disclosure of customers’ negotiated pricing is the issue, it should be noted, as an initial matter, that no other delivery provider publicly discloses prices that it negotiates with customers. Thus, requiring the Postal Service but not its competitors to publish negotiated pricing would distort the market and deter customers from dealing with the Postal Service, despite the prospect of lower or more efficient pricing that would benefit the overall market. Yet Congress intended the Postal Service to compete on a level playing field, not that it compete with a handicap. See H.R. REP. No. 109-66, pt. 1 at 44; S. REP. No. 108-318 at 14.

The governing statute reflects Congressional intent with respect to this business reality. Although the Postal Service is generally subject to the Freedom of Information Act, see 39 U.S.C. § 410(b)(1), it is not required to disclose “information of a commercial nature, including trade secrets, whether or not obtained from a person outside the Postal Service, which under good business practice would not be publicly disclosed.” 39 U.S.C. § 410(c)(2). Courts have recognized that negotiated price information warrants this protection, as it would not be disclosed as a matter of good business practice. See generally Wickwire Gavin v. U.S. Postal Serv., 356 F.3d 588 (4th Cir. 2004).
With respect to the confidential treatment of NSAs filed at the Commission, the relevant statute requires the Commission's confidentiality rules to account for the interest in protecting commercial information that would be withheld in good business practice. 39 U.S.C. § 504(g); see also H.R. Rep. No. 109-66, pt. 1 at 61; S. Rep. No. 108-318, at 20, 47-48. The Commission's rules ensure that other interested parties can fully and fairly engage in regulatory proceedings, without unilaterally disadvantaging the Postal Service's commercial interests. See 39 C.F.R. pt. 3007, app. A (allowing access to non-public filings by any person, such as an attorney or consultant, except for a person involved in competitive decision-making for an entity that would gain competitive advantage from the materials). This confidentiality standard enables effective regulation while maintaining a level informational playing field. In that regard, full transparency would appear to work against the recommendation of the Task Force that the Postal Service maximize revenue through its competitive pricing strategy.

Mandatory disclosure of NSA pricing would be a significant departure from Congress's longstanding vision of the Postal Service operating as a business on a level playing field. The current statute places it beyond the discretion of any "Administrative" actor.

B. Fully-Distributed Costing

At pages 54-55, the Task Force report frames fully-distributed costing as a solution for competitors' complaints about supposed unfair cross-subsidization.

To the extent this recommendation is focused on the costing standards as set forth in postal law, this recommendation would concern how costs are to be measured for purposes of the cost-based price floors for competitive products. 39 U.S.C. § 3633(a)(1)-(3). One approach (economic costing) would attribute those costs that are demonstrably caused by a given product, and to allow the remaining costs to be recovered through demand-based pricing. The alternative approach (fully-distributed or fully-allocated costing) would attempt to attribute or assign all costs to products. Where costs are shared across multiple products and product-specific causation cannot be determined, fully-distributed costing would employ assumptions, proxies, and inferences to allocate those costs.

Economists, regulators, policymakers, and businesses have, for decades, rejected fully-distributed costing as inherently arbitrary and an invalid basis for pricing and regulatory decisions. E.g., Order No. 4963 at 32 (noting that fully-distributed costing "has long been rejected by the Commission, economists, and the courts."); United States v. AMR Corp., 335 F.3d 1109, 1117 (10th Cir. 2003) ("[B]ecause [certain proposed predatory-pricing tests] rely on 'arbitrary allocation of costs among different classes of service,' they 'cannot purport to identify those costs which are caused by a product or service, and this is fundamental to economic cost determination.'") (quoting MCI Communs. Corp. v. AT&T, 708 F.2d 1081, 1116 (7th Cir. 1982)); Salvatore Massa et al., Pricing Network Elements Under the Telecommunications Act of 1996: Back to the Future, 23 HASTINGS COMM. & ENT. L.J. 751, 769 & n.97 (2001) (recounting that "[m]any economists have criticized pricing schemes that simply allocate shared, joint and common costs as arbitrary and unlikely to lead to economically efficient prices," and providing numerous scholarly citations); William J. Baumol & J. Gregory Sidak, Toward Competition in Local Telephony 56 (1994) (describing fully-allocated costing as a "traditional" but "admittedly arbitrary rule of thumb" that "is now generally discredited and is increasingly being abandoned in regulatory practice"); Towards Postal Excellence: The Report of the President's Commission on Postal Organization 31 (1968) ("Pricing practices of many corporations (including utilities) have moved away from reliance on such rigid accounting allocations and now take service and market considerations as well as cost into account.").

We would be pleased to provide further background about fully-distributed costing upon request.

13
In postal regulation, Congress explicitly chose to require the use of causation-based, economic costing over fully-distributed costing. When the modern Postal Service was founded in 1970, the blue-ribbon Kappel Commission and Congress welcomed the Postal Service's shift from fully-distributed costing to economic costing, and they rebuffed private delivery companies' calls to maintain fully-distributed costing as a tool to force Postal Service prices higher.

Express companies in the private sector of the economy have expressed their very keen desire to include language in the bill which would require the recovery of fully allocated costs for parcel post [the forerunner of today's competitive products]. The committee rejects the suggestion on the principle that no particular cost accounting system is recommended and no particular classification of mail is required to recover a designated portion of its cost beyond its incremental cost. That decision is for the Postal Rate Commission to determine, in accordance with the general criteria enacted by law. That [sic] criteria for ratemaking include seven specific requirements, among them, the effect of rate increases upon "enterprises in the private sector of the economy engaged in the delivery of mail other than letters." To go beyond that point would simply be to recommend provisions of law protecting a particular economic interest or limiting the availability of a Federal parcel delivery service.

Under the PRA, then, "each class of mail or each type of mail service" was required to "bear the direct and indirect postal costs attributable to that class or type plus that portion of all other costs of the Postal Service reasonably assignable to such class or type." 39 U.S.C. § 3622(b)(3) (2005).

Despite Congress's rejection of fully-distributed costing, certain mailing-industry advocates continued to urge the Postal Rate Commission to adopt it. After multiple proceedings on the issue, the Postal Rate Commission stayed with the economic and legislative consensus. It required individual products to cover their economically-determined attributable costs; the assignment of other costs would have to be based on statutory policy criteria and business judgment, rather than allocated according to some arbitrary algorithm. Nat'l Ass'n of Greeting Card Publishers v. U.S. Postal Serv., 462 U.S. 810, 814-16 (1983) (recounting the relevant regulatory history). In affirming the Postal Rate Commission's approach as consistent with the statute and legislative history (including the Kappel Commission Report), the Supreme Court specifically rejected arguments that fully-distributed costing was necessary or intended as a safeguard against cross-subsidization. Id. at 829 n.24.

In the PAEA, Congress codified the Postal Rate Commission's "reliable causation" standard that the Court had upheld. 39 U.S.C. §§ 3622(c)(2), 3631(b); see S. REP. No. 108-318, at 10 (2004) ("The [NAGCP] Court rejected a contention that it was appropriate to make classes responsible for the recovery of costs for which an extended inference of causation was claimed. It emphasized the

14 It is notable that Congress and the Kappel Commission, in the run-up to the Postal Service's creation, expressly supported postal officials' move away from basing internal accounting and pricing decisions on fully-distributed costing. Thus, even if the statute's preclusion of fully-distributed costing were construed to apply only to regulatory matters, and not necessarily to the Postal Service's internal pricing decisions, a return to fully-distributed costing for internal decisions would also be inconsistent with the intent behind the current Congressional scheme. Moreover, because fully-distributed costing entails a choice among various distribution methods, any such choice by the Postal Service would almost certainly be subject to political (and perhaps legal) challenge as arbitrary by competitors and customers seeking a different result.
need for reliable indicators of causality without specifying any specific method for identifying causality. . . . The Committee finds no reason for changing this standard.

Addressing the longtime argument over whether enough costs were being attributed, Congress declined to pass judgment and committed the question to the Commission’s technical expertise:

While considering this legislation the Committee heard testimony suggesting that currently accepted levels of cost attributions were both too low and too high, and that specific rules for cost attribution should be incorporated into law. The Committee has decided that the technical decision of what cost analysis methodologies are sufficiently reliable at any given time to form the basis for attribution should be left to the Postal Regulatory Commission, acting with benefit of counsel from all interested persons in open public proceedings.

In a study of postal accounting practices commissioned under the PAEA, the Treasury Department likewise recommended the continuation of the Postal Rate Commission’s economic approach to cost attribution. Treasury Report at 3-8.

The second case involved proposals to use non-causal proxies – namely, competitive products’ share of total attributable costs, total revenue, or space on delivery vehicles – to set the “appropriate share” of institutional costs that competitive products must cover.16 The Commission rejected such proposals as, in effect, an attempt to fully distribute the Postal Service’s costs, which would violate the statute’s requirement of causation-based cost attribution. Order No. 4963 at 36-38, 113, 131-32, 146-47, 152; Order No. 4402, Notice of Proposed Rulemaking to Evaluate the Institutional Cost Contribution Requirement for Competitive Products, PRC Docket No. RM2017-1 (Feb. 8, 2018), at 81-82.17

In establishing the statutory standards for postal costing, Congress set the goal as “a technically correct result, placing accuracy above achieving a particular outcome of higher or lower attribution.” H.R. REP. NO. 109-66, pt. 1, at 49. The fact that a substantial portion of Postal Service costs may be institutional does not vitiate Congressional intent. UPS, 890 F.3d at 1063 (noting that Congress had

15 At one point, the PAEA’s framers in the House had considered an “equal cost coverage” rule that would have required an arbitrary allocation of institutional costs, H.R. 22, § 201(a) (1999) (proposed 39 U.S.C. § 3744), but they abandoned it in the next iteration.
16 “Institutional costs” refers to the residual category of costs that cannot be attributed to products. See UPS, 890 F.3d at 1061-63.
17 Congress made market conditions an explicit factor in the “appropriate share” level, but not in cost attribution, which underscores the point that cost attribution must be driven by methodological rigor rather than by policy judgments. UPS, 890 F.3d at 1067. While market conditions are one factor in the “appropriate share” analysis, see 39 U.S.C. § 3633(b), the Commission must analyze those conditions in light of other statutory criteria, the context of the statute as a whole (including the distinct standards governing cost attribution), and its general duties of reasoned decision-making.
codified the longstanding cost-attribution standard at a time when institutional costs “made up ‘40 percent of the Postal Service’s costs’” (quoting S. REP. NO. 108-318 at 9)); Newsweek, Inc. v. U.S. Postal Serv., 663 F.2d 1186, 1200 (2d Cir. 1981) (“There is nothing in the legislative history [of the PRA] to suggest that attribution of fifty percent of postal costs is inadequate.”), aff’d sub nom., NAGCP, 462 U.S. 810. The Commission’s role “is to carry out the particulars of the scheme Congress created, not to engineer specific market outcomes.” UPS, 890 F.3d at 1067. As the statutory text, legislative history, and case-law demonstrate, fully-distributed costing would be contrary to that statutory scheme. Therefore, it is not within the discretion of the Postal Service or the Commission to implement this recommendation.

That is not to say that the current approach to costing does not allow for changes in the economic attribution of costs as circumstances and data evolve. The Postal Service regularly files proceedings with the Commission to refine its costing methodologies pursuant to the statutory requirement of “reliably identified causal relationships.” These proceedings result in differing and often greater levels of cost attribution, while resting on evidence instead of arbitrary assumptions or proxies. For example, in one recent case, the Postal Service proposed to update city carrier costs on the basis of routinely collected data, which showed an increase in packages’ share of total delivery time; this change had the effect of attributing $198.5 million more costs to competitive products and $179.5 million less to market-dominant products. See Order No. 4259, Order on Analytical Principles Used in Periodic Reporting (Proposal Four), PRC Docket No. RM2017-8 (Dec. 1, 2017), at 5, 22 (discussing cost impact and approving change). As it has done for decades, the Postal Service will continue to explore ways in which cost attribution can be improved, consistent with the economically sound statutory standard.

**Recommendation 16**

**Costing Options.** Establish a separate balance sheet for packages to help prevent cross-subsidization between the mail and package business units. (Administrative)

The Task Force recommends, as an “Administrative” action, the establishment of “a separate balance sheet for packages to help prevent cross-subsidization between the mail and package business units.” It is not clear what is intended by this. Rate regulation is not based on the assets and liabilities reflected on a balance sheet. Rather, it turns on costs and revenues. As discussed in connection with Recommendations 14 and 15 above, it is well established that measuring prices against costs is the test for cross-subsidization. It is not clear how balance-sheet separation would serve that goal.

That said, the value of Postal Service assets and liabilities are already reflected in product costs and revenues used for rate regulation. Cash and cash-equivalent assets derive largely from product revenues. The value of property assets translates into depreciation expense. And compensation and benefits liabilities have their own annual-expense counterparts. All of these expenses are attributed to market-dominant and competitive products in accordance with the "reliable causation" standard of 39 U.S.C. §§ 3622(c)(2) and 3631(b), as discussed in connection with Recommendation 15 above.

On a practical level, it is also unclear what this recommendation intends beyond the balance-sheet separation that is already required by the PAEA. The Competitive Products Fund is required to have its own balance sheet, based on the assets and liabilities identified as relevant to competitive products, and separate from the Postal Service Fund. Compare 39 U.S.C. § 2003 with id. § 2011. The Postal Service must transmit the Competitive Products Fund’s balance sheet, along with other financial reports, to the Treasury Department and the Commission each year. Id. § 2011(i)(1)-(2). The Postal Service’s most recent report was filed on December 28, 2018. See, e.g., Library Reference USPS-FY-39, FY 2018 Competitive Products Fund Reporting Materials, PRC Docket No. ACR2018. On the balance sheet, assets and liabilities are allocated to competitive products on the basis of various distribution keys, such as competitive products’ share of total revenue or of certain
attributable costs. Id., Microsoft Excel file “FY18-CP04.xlsx.” This allocation is permissible for the balance sheet, because it is not used for price-setting or rate regulation and therefore not subject to the “reliable causation” standard discussed in connection with Recommendation 15 above.

Without further clarification of whether or to what extent this recommendation seeks a change in the current practice, we are unable to evaluate the accuracy of its designation as “Administrative.”

**Recommendation 17**

**Operating Model Operations.** Align USPS employee rights with other federal employee rights by eliminating collective bargaining over compensation for USPS employees. (Legislative)

The Postal Service agrees with the designation of this recommendation as “Legislative.” Specifically, the Task Force recommends that postal employees be made subject to the General Schedule pay system for Federal employees and unable to bargain over compensation. As the Task Force recognizes, Congress would have to make the Postal Service subject to the Federal Service Labor-Management Relations Statute (FSLMRS), 5 U.S.C. §§ 7101-7135, rather than the National Labor Relations Act, 29 U.S.C. §§ 151-169. See 39 U.S.C. § 1209.

That step alone would not necessarily end bargaining over compensation, however. Congress would also have to make the General Schedule and related pay rules (or any successor statutes) specifically applicable to the Postal Service. Without that additional step to “specifically provide[ ] for [it] by Federal statute,” compensation would qualify, by default, as a “condition of employment” subject to mandatory bargaining. See 5 U.S.C. § 7103(a)(14); Fort Stewart Sch. v. Fed. Labor Relations Auth., 495 U.S. 641 (1990).

In the meantime, the Task Force recommends that the Postal Service do what it can within its existing authority to align employee compensation more closely with general Federal compensation rules. The Postal Service has managed to negotiate collective bargaining agreements in recent years that reduced average hourly compensation, in contrast to the inexorable growth in private-sector compensation since FY2011. The Postal Service intends to continue its aggressive pursuit of cost-reduction flexibilities through labor negotiations, arbitration, and non-bargaining-unit policy changes.

With respect to the bargaining-unit employees that make up the overwhelming majority of the postal workforce, however, the existing legal framework limits the Postal Service’s opportunity to accomplish the recommended change. As this recommendation recognizes, compensation is a mandatory subject of collective bargaining under the NLRA. Any impasse in bargaining must be resolved through a statutorily prescribed dispute-resolution process that usually ends in binding arbitration. 39 U.S.C. § 1207. Interest arbitrators tend to be more conservative in their approach and rarely, if ever, award wholesale changes to the compensation structure of bargaining unit employees. To the extent that the current collective-bargaining and interest arbitration requirements impede the achievement of this recommendation, legislative change would be necessary to alter those requirements.

---

18 Despite the general rule that agencies subject to the FSLMRS do not bargain over compensation, at least eight Federal agencies’ employees do reportedly bargain over compensation as a result of specific statutory language or a judicial or administrative decision. See Cong. Research Serv., No. 7-5700, Collective Bargaining and the Federal Service Labor-Management Relations Statute: Selected Legal Issues 3 (2017), https://fas.org/sgp/crs/misc/R44794.pdf (identifying these agencies as the U.S. Office of Personnel Management, the Bonneville Power Administration, the Federal Aviation Administration, the Federal Deposit Insurance Corporation, the Office of Thrift Supervision, the Office of the Comptroller of the Currency, the Securities and Exchange Commission, the National Credit Union Administration, and, at least with respect to certain employees, the Department of Defense).
Non-bargaining-unit employees of the Postal Service are subject to a pay system that is based on performance, not seniority, and that does not include step increases. In light of Recommendation 18 below, it is not clear whether the Task Force intends a change in that pay system. If so, then such a change is generally within the Postal Service’s discretion. However, for the supervisors, managers, and postmasters that comprise a substantial portion of non-bargaining-unit employees, the Postal Service must by law involve the representative organizations for such employees in the planning and development of pay policies and schedules. 39 U.S.C. § 1004(b)-(h).

**Recommendation 18**

**Operations.** Pursue reforms to USPS employee wages consistent with those proposed for the broader federal workforce in the President’s Management Agenda. (Legislative)

The Task Force frames this recommendation alternately in terms of “wages” and “compensation.” With respect to wages, the President’s Management Agenda (Agenda) proposes a slowing of tenure-based step increases and the replacement of across-the-board raises with performance-based pay incentives. Off. of Mgmt. & Budget, President’s Management Agenda 18-19 (2018), https://go.usa.gov/xEa9Z. In terms of non-wage compensation, the Agenda refers to proposed pension reforms in the President’s Budget; those reforms would reduce benefits expense and increase employees’ share of the funding obligation. *Id.* at 19; Off. of Mgmt. & Budget, Budget of the U.S. Government, Fiscal Year 2019: Major Savings and Reforms 181, 183-84 (2018) [hereinafter “FY2019 Major Savings & Reforms”], https://go.usa.gov/xPJPZ. Assuming that these aspects of the Agenda are those to which the Task Force report refers, the Postal Service agrees that these reforms are “Legislative.”

As noted in connection with Recommendation 17 above, while the Postal Service might theoretically have some ability to seek wage reforms (albeit not pension reforms) through collective bargaining, its practical ability to implement such reforms is constrained by the existing binding interest arbitration system. With respect to non-bargaining-unit employees, those employees are already subject to a performance-based pay system that does not include tenure-based step increases.

**Recommendation 19**

**Operations.** Explore and implement new business lines that generate revenue, and that present no balance sheet risk to the USPS. (Legislative)

The Task Force (at page 61) recommends that the Postal Service be allowed (a) to “explore supplying [certain] services for Federal, State, and local government entities,” (b) to “convert[ ] post offices into contract post offices;” (c) to “co-locat[e] with . . . complementary retail establishments;” and (d) to “rent[ ] space to complementary retail establishments.” The Task Force characterizes this recommendation as “Legislative.” While the Postal Service already has some authority in these areas, it agrees with this designation to the extent that this recommendation calls for expansion of that authority.

With respect to item (a), current law already allows the Postal Service to enter agreements to provide services to other Federal agencies. 39 U.S.C. § 411. The Postal Service pursues such opportunities, and it will continue exploring them. No similar authority exists for partnering with State, local, and tribal governments, however, and so the statute would have to be amended to facilitate such partnerships.

With respect to item (b), the Postal Service is already authorized to dispose of real property (including Post Offices) and to enter into contracts (including for Contract Postal Units). *Id.* § 401(3)-(5). The Postal Service is also authorized to determine the need for Post Offices. *Id.* § 404(a)(3). That authority is subject to procedural and substantive limitations, however. The Postal Service cannot close any Post Office solely for operating at a loss, and, in its closing decisions, it may not
consider compliance with the Occupational Health and Safety Act of 1970. *Id.* §§ 101(d), 404(d)(2)(B). The Postal Service must also comply with public notice requirements, consider certain factors, and ensure that its decision is non-arbitrary and evidence-based. *Id.* § 404(d)(1)-(5). In addition, expansion of outsourcing could require collective bargaining, consultation, and/or binding arbitration with postal labor organizations, as discussed in connection with Recommendation 12 above. To the extent that this recommendation entails expanding the Postal Service’s ability to close Post Offices and outsource bargaining-unit work beyond current legal bounds, such expansion would require legislative change.

Many of the same considerations apply to item (c). The same contracting authority noted above covers the Postal Service’s ability to “co-locate” by leasing space in non-Postal-Service-owned property. 39 U.S.C. § 401(3)-(5). To the extent that the Task Force envisions shifting bargaining-unit work to the business partner’s employees, the same labor considerations would come into play as noted above.

With respect to item (d), the Postal Service already has authority to lease its real property assets to private entities. *Id.*; Order No. 154, Review of Nonpostal Services under the Postal Accountability and Enhancement Act, PRC Docket No. MC2008-1 (Dec. 19, 2008), at 64-68. Indeed, the Postal Service aggressively seeks out-leasing opportunities, when feasible. It should be noted, however, that Postal Service real estate holdings must, in the first instance, be “necessary or convenient in the transaction of its business.” 39 U.S.C. § 401(5). In other words, the Postal Service must generally aim to align space with the operational requirements of offering postal services, with revenue-generating out-leasing relegated to a secondary use of excess space (to the extent that market opportunities exist). See Order No. 154 at 64-68. If the Task Force envisions expanding the Postal Service’s ability to hold real estate with the primary aim of generating revenue from out-leasing, that would likely require legislative change.

**Recommendation 20**

**Governance and Oversight.** Strengthen the governance and regulatory oversight of USPS. This could be achieved through reforming, but maintaining, the existing institutional structures or by changing the institutional structures, which would require legislation. (Legislative)

This recommendation seeks, as a “Legislative” action, reform or change to “existing institutional structures” in order to “[s]trengthen the governance and oversight of” the Postal Service. It is not clear what is intended with this recommendation, as distinct from Recommendations 21 and 22; there is no discrete discussion of the recommendation in the body of the report. The Board of Governors and the Commission have some latitude, within the scope of their existing authority, to make strategic decisions that could be interpreted as strengthening governance and oversight. As the recommendation recognizes, however, any changes to existing institutional structures would require legislation.

To the extent that this recommendation corresponds to the report’s discussion of the currently low complement of sitting Governors (pages 61-62), appointment of additional Governors would require action by both the President and the Senate. 39 U.S.C. § 202(a)(1).

**Recommendation 21**

**Governance and Oversight.** Institute a new policy mandate for management that sets organizational direction and financial targets, which align with a sustainable business model
and establish an enforcement mechanism if the existing Board is unable to meet these targets. (Legislative)

This recommendation consists of two parts. First, at page 62, it seeks the Postal Service’s adoption of “a new policy mandate that resets the USPS’s organizational direction and develops financial targets that move the USPS toward the achievement of a sustainable business model. Governance should be strengthened with expanded Board controls and increased accountability.” Such internal objective-setting is generally within the Postal Service’s existing authority. As the Task Force recognizes elsewhere, however, legislative and regulatory action is needed to establish a sustainable business model and avoid a liquidity crisis (p. 4; see, e.g., Recommendations 8, 17, 18, 19, 23, 24, and 25). Given the statutory constraints on the Postal Service’s ability to improve its financial health, it is unclear how reasonable or effective financial targets can be unless and until legislative and regulatory reforms give the Postal Service more control over costs and revenue.

The second part of this recommendation urges the Commission to “be given stronger regulatory authority to take necessary revenue and expense measures” if the Postal Service “is unable to achieve a sustainable business model and satisfy its financial commitments to other federal agencies.” The Postal Service agrees with this recommendation’s designation as requiring “Legislative” action.

Recommendation 22

Governance and Oversight. Strengthen the regulatory oversight role of the PRC, providing the PRC with expanded controls, imposing increased accountability on the USPS. (Legislative)

The Postal Service agrees that reforming the Commission’s powers is properly designated as “Legislative.” To the extent that page 62 of the report suggests that the Commission should have more power to overturn and dictate the Postal Service’s decisions on service standards, operations, and capital investments, this recommendation appears to be at some tension with Recommendations 3 through 6, which advocate for preserving or expanding the Postal Service’s operational discretion.

Recommendation 23

Benefits. Pursue reforms proposed to the Federal Employees’ Compensation Act that are included in the President’s FY2019 Budget. (Legislative)

The Postal Service agrees that reforming the Federal Employees’ Compensation Act is properly designated as “Legislative.”

Recommendation 24

Benefits. Pursue reform of the Federal Employees’ Retirement System (FERS) that would increase employee contributions and move toward a defined contribution system. (Legislative)

The Postal Service agrees that reforming FERS is properly designated as “Legislative.”
Recommendation 25

Benefits. Maintain but restructure the retiree health benefits liability, including the $43 billion in pre-funding payments that the USPS failed to pay into the Postal Service Retiree Health Benefits Fund (PSRHBF) and the unfunded actuarial liability, with the total liability re-amortized with a new actuarial calculation based on the population of employees at or near retirement age. (Legislative)

The Postal Service agrees that changing how the actuarial liability for the Postal Service's retiree health benefits is calculated would require legislative change. It should be noted that doing so, without more, would not change the actual benefits to which postal annuitants are entitled, the payment of which is ultimately the responsibility of the Postal Service. See 5 U.S.C. §§ 8906(g)(2)(A), 8909a(d)(3).

Conclusion

Thank you once again for our telephone conversation today, and for the opportunity to meet with some of your team yesterday. While we agree with many of the "Administrative" and "Legislative" designations in the recommendations of the Task Force, for the reasons noted above we believe that some of the designations warrant additional review or clarification. We therefore request the opportunity to discuss these items with you further at your convenience. It would be very helpful for us to understand the perspective of the Task Force with regard to its recommendations and its views on implementation as we prepare to advise our clients going forward.

We look forward to discussing these items with you soon.

SUBJECT: Legal Concerns With Regard to the Proposed Term Sheet

Dear Steve:

Thank you for your letter dated May 15, 2019, regarding your office’s views about the Department of the Treasury’s (Treasury’s) authority to purchase Postal Service debt obligations, and for our recent meeting concerning the new terms that the Federal Financing Bank (FFB) recently proposed in connection with the establishment of a new Note Purchase Agreement (NPA). I appreciate your continued willingness to engage in a dialogue with me concerning legal matters, both with respect to this issue as well as with respect to other matters that we have dealt with, so that we can both effectively advise our clients. In furtherance of that dialogue, I am sending this memorandum to address legal concerns that we have with the initial proposed terms and conditions that we recently received from the FFB regarding our NPA.

Specifically, on May 17, we received a proposal from the FFB to subject renewal of our NPA to a number of new conditions. Broadly speaking, the proposed conditions fall into three general categories. Conditions 1-3 are debt security terms that would require the Postal Service to establish an escrow account to cover 15 months of interest. Conditions 4-6 would require the Postal Service to obtain FFB consent in the establishment of postal policy and before engaging in various business activities, such as establishment of annual performance targets, and management of major negotiated service agreements. Condition 7 would require the Postal Service, under certain circumstances, to potentially cede to FFB the decision-making authority for matters concerning pricing, collective bargaining, major contracting, structural organization, and the composition of senior management. Finally, conditions 8-11 are transparency and reporting requirements that would require various reports and briefings to the FFB. (A twelfth condition is a remedy provision that provides that the breach of any other condition would entitle the FFB to refuse to purchase a Postal Service obligation issued under the NPA.)

Based on your May 15 letter, we understand Treasury’s argument in support of these proposed conditions to rest on two basic points. First, whatever statutory restrictions might arguably apply to the Postal Service-Treasury borrowing relationship under the Postal Reorganization Act of 1970 (PRA), Congress’s establishment of the FFB in 1973 created a separate borrowing option free of those restrictions. Second, the borrowing-authority statutes give the FFB and the Postal Service broad authority as to the terms and conditions of borrowing. Further, based on a May 17, 2019, phone conference with our Finance Department as well as our subsequent discussion held with Treasury on May 21, 2019 in which you and I participated, we further understand that the FFB sees these conditions as customary terms that could be imposed on a financially distressed company seeking to borrow money from the market. Finally, from those same discussions on May 21, we understand that you have proposed these terms based on private-sector principles, without consideration of the specific legal issues that are implicated by imposing such terms on the Postal Service, as an entity of the Executive Branch with a specific and unique statute and legal status.
However, and for the reasons explained below, it is our conclusion that Treasury’s view that these terms are appropriate in a commercial context does not adequately address the fundamental constitutional and statutory problems with conditions 4-7, as applied to the Postal Service. Our analysis leads us to conclude that these conditions in particular are legally problematic, and not within the power of the FFB to demand or within the power of the Postal Service to accept. Further, although this document focuses on these particular terms given what we perceive to be their legal infirmities, this should not be interpreted as a concession that the remaining terms, which represent a significant departure from our current agreement, are necessary or appropriate in the context of intergovernmental borrowing.

The remainder of this memorandum discusses why (1) the Postal Service does not believe that it can lawfully agree to essentially cede decision-making authority to the FFB (or, for that matter, to Treasury or private creditors), and (2) why the FFB’s separate statutory authority does not change that conclusion. In this regard, although it may well be correct that a private creditor might customarily impose similar control-oriented conditions on a financially distressed private borrower in the course of a market transaction, such terms are not appropriate given the unique legal status of the Postal Service. The FFB is not a private creditor, and the Postal Service is not a private entity, but an independent establishment of the Executive Branch created and governed by statute. 39 U.S.C. § 201; see U.S. Postal Serv. v. Flamingo Indus. (USA) Ltd., 540 U.S. 736, 740-41 (2004). Title 39 of the United States Code sets forth a carefully constructed governance structure for the Postal Service, in which postal powers are vested in the Board and in the Governors. By instead proposing to potentially vest ultimate control and authority over the Postal Service in the hands of the FFB (and hence Treasury), the FFB’s proposed conditions 4-7 would, if enacted into the NPA, upend the statutory scheme and usurp Congress’s authority over postal organization.

I. THE POSTAL SERVICE CANNOT UNDER CURRENT LAW AGREE TO POTENTIALLY CEDE DECISION-MAKING AUTHORITY TO TREASURY, THE FFB, OR ANY OTHER CREDITOR

Under the Constitution, Congress holds the power to establish the postal system and to make all necessary and proper laws related to that power. U.S. Const. art. I, § 8, cl. 7, 18. It is also Congress’s power to establish "offices" for carrying out the postal laws it enacts. Id. art. II, § 2, cl. 2. Only the President can appoint officers to those Congressionally-established offices: for so-called principal officers, this requires Senate confirmation, whereas Congress can alternatively provide for appointment of inferior officers by the President alone or by a designated principal officer. Id.

To apply these precepts to the situation at hand, Congress established the Postal Service to fulfill the various operational and business functions in Title 39, United States Code. Congress created particular offices in which it vested decision-making powers: specifically, Congress vested the exercise of most of the powers of the Postal Service in the Board, with certain significant powers reserved to the Governors alone. 39 U.S.C. § 202(a)(1), (c)-(e); see id. § 402. Those powers include pricing, product management, control of expenses, collective bargaining, structural organization, and performance planning: the very subjects of the FFB’s proposed conditions 4-7. Id. §§ 205(a), 401, 404, 1206, 2803-2804, 3632. Powers assigned to the Board can be delegated to committees of the Board or to the Postmaster General and can be re-delegated within the Postal Service. Id. § 402. Powers assigned to the Governors cannot under current law be delegated. Id. Congress provided for the Governors, as principal officers, to be appointed by the President with Senate confirmation; inferior officers (including the Postmaster General and Deputy Postmaster General) to be appointed by the Governors; and employees of the Postal Service to be appointed by the inferior officers or other employees. See id. §§ 202, 402, 1001(a).

Congress gave the Governors "ultimate control and authority" over the Postal Service. Silver v. U.S. Postal Serv., 951 F.2d 1033, 1038 (9th Cir. 1991). It might have been constitutionally valid for Congress to place decision-making under Treasury’s control. But that is not what Congress and the President chose in the PRA. Indeed, the legislative history of the PRA attests to Congress’s manifest intent that the Postal Service be removed from direct control by the President or officers.
who serve at the pleasure of the President, such as the Treasury Secretary. See S. REP. NO. 91-912, at 4, 8 (1970); H.R. REP. NO. 91-1104, at 13 (1970); President's Message to Congress Transmitting Postal Reform, H.R. DOC. NO. 91-313, at 51-52 (1970); see also Status of the United States Postal Service as an "Executive Agency" Under Executive Order No. 12,250, 5 Op. Off. Legal Counsel 241 (1981) ("Moreover, both the Act and its history reveal that Congress intended to grant the Service at least some measure of insulation from control by the President and to place the Service in a separate category from the conventional executive departments." (citation omitted)).

Hence, the Governors are subject to Presidential removal only for cause, in the interest of vesting the Governors with the independent ability to determine postal policy, including in the establishment of postal prices and in the selection of senior management. 39 U.S.C. § 202(a); Mail Order Ass'n of Am. v. U.S. Postal Serv., 986 F.2d 509, 519-520 (D.C. Cir. 1993) (noting that the governance structure of the Postal Service is designed to confer "independence from political pressures and independence to manage its operations in a professional, businesslike manner," with the Board exercising "policy control [over postal affairs] with functions similar to a board of directors") (citations omitted); see also Free Enter. Fund v. Pub. Co. Accounting Oversight Bd., 551 U.S. 477, 502 (2010); Buckley v. Valeo, 424 U.S. 1, 133 (1976) ("The Court in [Humphrey's Executor] carefully emphasized that . . . the members of such agencies were to be independent of the Executive in their day-to-day operations[.]"); In re Aiken County, 645 F.3d 428, 442 (D.C. Cir. 2011) (Kavanaugh, J., concurring) ("Because of Humphrey's Executor, the President cannot remove an independent agency's officers when the agency pursues policies or makes decisions the President disagrees with.").

Since it is Congress's prerogative to create Executive Branch entities, define their functions, and designate offices to execute those functions, the Executive Branch cannot transfer functions from one Executive Branch unit to another without Congressional authorization. Centralizing Border Control Policy Under the Supervision of the Attorney General, 26 Op. Off. Legal Counsel 22, 22-24 (2002) ("This Office has long held that transfers of statutory authority from one department to another may normally be accomplished only by legislation or by executive reorganization under the [since-lapsed] Reorganization Act." (citations omitted)). As was noted by the Office of Legal Counsel (OLC):

It has long been established that, if the laws . . . require a particular officer by name to perform a duty, not only is that officer bound to perform it, but no other officer can perform it without a violation of the law; and were the President to perform it, he would not only be not taking care that the laws were faithfully executed, but he would be violating them himself.

Id. (citing The President and Accounting Officers, 1 Op. Att'y Gen. 624, 625 (1823)).

As noted above, Congress designated the officers responsible for postal decision-making. Congress also gave those officers no authority to delegate their authority outside the Postal Service (if at all). The Executive Branch does not have the constitutional power to supersede Congress's choice to delegate the execution of the postal laws to the Postal Service, rather than to Treasury or the FFB.

---

1 Topically, the President and Accounting Officers opinion illustrates the point with a hypothetical about the President appointing a postmaster notwithstanding Congress's vesting of that power in the Postmaster General. Absent some other role in the structure that Congress established, the President's constitutional role is limited to removing and replacing an officer who is not faithfully executing the laws. The President and Accounting Officers, 1 Op. Att'y Gen. at 626.

2 In addition to upending the structure that Congress enacted, there is yet another constitutional problem with Treasury/FFB supervision of the Postal Service. The Constitution gives the President alone the power to supervise principal officers like the Governors, as an incident of his removal power. That constitutional responsibility cannot be delegated to Treasury or FFB, Centralizing Border Control Policy, 26 Op. Off. Legal Counsel at 24-25, let alone assumed by Treasury/FFB amid Presidential silence.
As your May 15 letter points out, the statutory provisions on Postal Service borrowing allow the Postal Service to agree to conditions and covenants in any sale of its obligations. See 39 U.S.C. §§ 2005-2006. Section 2006, for instance, notes that the Postal Service obligations purchased by Treasury may be “under such terms, . . . as [the Treasury Secretary] and the Postal Service may agree.” Your letter suggests that the plain language of these provisions is broad enough to authorize the FFB’s proposed conditions. While it is true that these provisions give the Postal Service discretion regarding the terms it may agree to, that discretion is not limitless. Those statutory provisions cannot be read in isolation; rather, they must be read in the context of the statute as a whole. E.g., Sturgeon v. Frost, 136 S. Ct. 1061, 1070 (2016). As explained above, the same PRA that enacted Sections 2005 and 2006 created the Postal Service as an independent establishment, insulated it from direct political control, and designated the Governors and Board as the officers responsible for making postal policy and business decisions. We do not believe that a provision that simply authorizes the Postal Service to agree to conditions when exercising its borrowing authority can reasonably be construed to allow the Postal Service and another Executive Branch entity to agree to act inconsistently with the governance structure that Congress painstakingly established in the same Act. Whitman v. Am. Trucking Ass’ns, 531 U.S. 457, 468 (2001) (“Congress, we have held, does not alter the fundamental details of a regulatory scheme in vague terms or ancillary provisions – it does not, one might say, hide elephants in mouseholes.” (citations omitted)).

As we noted in a previous letter to you, the legislative history of the PRA supports this understanding of the Postal Service’s borrowing authority. Prior to enactment, Treasury’s Under Secretary for Monetary Affairs explained that, under the PRA provisions concerning borrowing, the Treasury Secretary should neither “assert substantive control over the Postal Service” nor “[e]ver put himself in a position where he is preventing the postal authority from obtaining what financing [the Postal Service] think[s] is necessary.” Postal Modernization: Hearings Before the Senate Comm. on Post Off. & Civil Serv., 91st Cong., at 311-12 (1969) (remarks of Under Secretary Paul A. Volcker); see also id. at 305-06 (“stress[ing]” that the Treasury Secretary’s purchase option would not “interfere[e] with the financing of essential Postal Service activities or arrogat[e] to the Secretary any control over the operations of the Postal Service”); Post Office Reorganization, Part III: Hearings Before the House Comm. on Post Off. & Civil Serv., 91st Cong. 1165 (1969) (statement of Under Secretary

---

3 As noted earlier, Treasury asserts that private lenders would demand a similar cession of control. However, the Postal Service could not accede to such a demand from a private lender under Section 2005, any more than it can accede to transferring control of the Postal Service to another Executive Branch entity. In effect, this scenario would involve the Board and the Governors re-delegating their governmental decision-making authority to a private party. Such a cession would violate another principle of constitutional law. According to the so-called non-delegation doctrine, “Congress may employ private entities for ministerial or advisory roles, but it may not give these entities governmental power over others.” Pittston Co. v. United States, 368 F.3d 385, 395 (4th Cir. 2004) (agreeing with the Third Circuit’s summary of the doctrine in United States v. Frame, 885 F.2d 1119 (1989)) (emphasis omitted); see Am. Ass’n of R.R. v. U.S. Dep’t of Transp., 721 F.3d 666, 670-72 (D.C. Cir. 2013), vacated on other grounds, 135 S. Ct. 1225 (2015); see also Dep’t of Transp. v. Am. Ass’n of R.R., 135 S. Ct. at 1252-53 (Thomas, J., concurring). Where an agency delegates to private individuals its decision-making authority vested by statute, the harm to political accountability “is doubled in degree in the context of a transfer of authority from Congress to an agency and then from agency to private individuals. The vitality of challenges to the former type of transfer is suspect, but to the latter, unquestionable.” Nat’l Ass’n of Regulatory Utility Comm’rs v. FCC, 737 F.2d 1095, 1143 n.41 (D.C. Cir. 1984). This conclusion further demonstrates that, while commercial principles can play a role in the interpretation and application of 39 U.S.C. §§ 2005 and 2006, those principles must be applied within limits imposed by the Constitution and by statute. Cf. Scope of Treasury Department Purchase Rights with Respect to Financing Initiatives of the U.S. Postal Service [hereinafter “Treasury Purchase Rights"], 19 Op. Off. Legal Counsel 238, 245 (1995) (using commercial principles to interpret Section 2006(a) only “[i]n the absence of contrary language in the statute”).
Volcker) (Treasury’s role should be understood as limited, lest “some outsider looking at the bill” might construe it as “giv[ing the Secretary of the Treasury] certain powers over the Post Office Department that he shouldn’t have”); see H.R. REP. No. 91-1104, at 21 (1970). Therefore, the borrowing provisions were intended simply to ensure that Treasury could coordinate overall Government debt issuances (including those of the Postal Service), without in any way suggesting that they could be used to cede to Treasury substantive control of the Postal Service.

Case-law on the analogous relationship between the Postal Service and the Department of Justice (DOJ) further buttresses the analysis here. In at least two cases, DOJ has asserted a prerogative to control the Postal Service’s litigating position, settlement of claims, and ability to represent itself. On both occasions, courts held that, notwithstanding statutory authority for DOJ involvement in Postal Service litigation, DOJ’s assertions of control ran afoul of Congress’s decision to confer independent decision-making authority on the Postal Service. Mail Order Ass’n of Am., 986 F.2d at 522-23 (“Respect for the language of the [PRA] and its underlying purposes simply will not permit the conclusion that Congress intended simultaneously to give the Postal Service such broad and unfettered discretion and to condition its judicial review options on [DOJ’s] – or even the President’s – approval.”); Leonard v. U.S. Postal Serv., 489 F.2d 814, 817-18 (1st Cir. 1974). To paraphrase the court in Leonard, “It was the intent of the Congress to create an independent Postal Service. It would be anomalous to hold that decisions normally committed wholly to the independent discretion of the Service are made subject to [Treasury or FFB] veto power when incident to [borrowing].” Leonard, 489 F.2d at 817-18.

Congress could vest ultimate decision-making powers concerning postal operations in officers outside the Postal Service, if it wished. Indeed, the Postal Service is already subject to final decision-making authority exercised by various other Executive Branch entities, such as the Federal Trade Commission, the Postal Regulatory Commission, and the Equal Employment Opportunity Commission. E.g., 39 U.S.C. §§ 409(d)-(e), 3662(c)-(d); 42 U.S.C. § 2000e-16. In contrast to all of those explicit provisions, however, there is no statutory authority about which we are aware that would allow Treasury to supervise and potentially supersede decisions of the Governors and the Board.5

In summary, Congress did not delegate postal decision-making to Treasury, and we do not believe there is a reasonable basis to construe the borrowing provisions of the Postal Service’s statute as a tacit grant of authority to the Postal Service and Treasury to agree to such a transfer of control. To do so would be contrary to the statutory structure that Congress carefully and deliberately created. Under the Constitution, such choices lie with Congress, not with the Executive Branch.

---

4 OLC expressly relied on this legislative history to interpret the meaning of 39 U.S.C. §§ 2005-2006. See Treasury Purchase Rights, 19 Op. Off. Legal Counsel at 245 n.5; Authority of the Secretary of the Treasury Regarding Postal Service Bond Offering, 17 Op. Off. Legal Counsel 6, 8-10 (1993) (quoting both the House and Senate Hearings in explaining that the statute itself may be ambiguous, but the “legislative purpose” behind the statute is clear).

5 The lack of any such obvious statutory authority is also distinguishable from statutes that have expressly permitted Treasury and other agencies to assume control of an institution. 12 U.S.C. § 1456(f) (providing Treasury with temporary authority to acquire equity in the Federal Home Loan Mortgage Association (Freddie Mac), and authorizing Treasury to consider “[r]estricions on the use of Corporation resources, including limitations on the payment of dividends and executive compensation and any such other terms and conditions as appropriate for those purposes,” among other things); see 12 U.S.C. § 4617 (authorizing the Federal Housing Finance Agency to place Freddie Mac and other housing-finance institutions into conservatorship). In contrast to these clear statutory authorities, the PRA is devoid of any similarly explicit provision allowing Treasury, through its purchase of obligations, to potentially assume control over Postal Service decisions. As noted above, the legislative history of the PRA indicates that quite the opposite is true.
WE CANNOT FIND ANYTHING IN THE FFB'S GOVERNING STATUTE THAT PROVIDES IT WITH AUTHORITY TO POTENTIALLY ASSUME CONTROL OVER THE POSTAL SERVICE

Your May 15 letter also suggests that, whatever limitations Congress imposed on the borrowing relationship between the Postal Service and Treasury, the FFB exists outside those limitations. To the extent that you suggest that Congress implicitly authorized the FFB to exercise substantive control over postal decision-making when it enacted the Federal Financing Bank Act of 1973 (FFBA), such an interpretation appears to run counter to the FFBA's text and legislative history.

As your letter notes, the FFBA was enacted a mere three years after the PRA and created the FFB as "a body corporate" and "an instrumentality of the United States Government" that is "subject to the general supervision and direction of the Secretary of the Treasury." 12 U.S.C. § 2283. The FFB is governed by a five-member Board of Directors with the Treasury Secretary serving as Chairman, and with the other four directors “appointed by the President from among the officers or employees of the Bank or of any Federal agency.” Id. § 2284(a). Currently, the directors are all officials of the Treasury. FFB, 2018 Annual Report 6, https://go.usa.gov/xmyzY. By statute, the FFB is authorized to purchase obligations of any federal agency, and each federal agency that is authorized to sell obligations is authorized to sell such obligations to the FFB. Id. § 2285(a).

As explained in the preceding section, when Congress intends to vest one Executive Branch entity with the power to potentially assume substantive control over a separate entity, Congress says so explicitly. Congress did not do so in the FFBA. Rather, the FFB was created merely to "assure coordination of [Federal financing] programs with the overall economic and fiscal policies of the Government" and to reduce the cost and market disruption of federal borrowings. Id. § 2281. The FFB exercises powers otherwise vested in Treasury and is expressly "subject to the direction and supervision of the Secretary of the Treasury." 31 U.S.C. § 305. For example, the FFB can exercise the powers assigned to Treasury under 39 U.S.C. § 2006. Nothing in the FFBA's language suggests that the FFB's lending powers were designed to be broader than those afforded Treasury as a general matter. Accordingly, while the FFB has the authority to purchase Postal Service obligations "on terms and conditions determined by the [FFB]," 12 U.S.C. § 2285(a), the statute nowhere suggests that such terms and conditions can extend beyond the terms and conditions that the Secretary could otherwise establish. Indeed, the FFB’s purpose of simply coordinating overall Federal financing programs aligns precisely with the role that Congress contemplated for Treasury under 39 U.S.C. § 2006(a), as discussed above.

The FFBA's legislative history confirms that Congress did not intend for the FFB to have any authority to exercise substantive control over the Postal Service's statutory duties or powers. To the contrary, the committee reports accompanying the FFBA explained that the FFB was not authorized to lend money to the Postal Service beyond the scope of Treasury's powers under 39 U.S.C. § 2006(a):

Your committee has reviewed the status of the authorities of the U.S. Postal Service to issue obligations as to whether this authority under the Postal Reorganization Act would be affected by any provision of this bill. Your committee intends that this bill will not impair or diminish the authority of the Postal Service to issue obligations under the financing provisions of the Postal Reorganization Act. Under the Postal Reorganization Act, the Secretary of the Treasury may purchase all Postal Service obligations if he does so within the time period prescribed in 39 U.S.C. 2006(a). The bill would have the effect of giving the Secretary the authority to exercise this right by requiring the Postal Service to sell its securities to the Federal Financing Bank. However, if the Bank or the Secretary did not act to take up a proposed Postal borrowing within the prescribed time limit, the Postal Service could, on its own initiative, borrow in the private market under its independent Postal Reorganization Act authority. Your Committee believes that no specific amendment is required to preserve the independent financing authority of the Postal Service.
As with that follows characterizes entity with any event, Treasury or Treasury's oversight of the Treasury would not unduly impair USPS' existing financing authority under the PRA. The FFB thus was conceived of as an agent for Treasury's exercise of its purchase option under 39 U.S.C. § 2006(a), and not as an entity with an independent purchase option.

As with the PRA, Congress's expression of the FFBA's intent was largely based on the views of Treasury itself. *Federal Financing Bank Act: Hearings Before the House Comm. on Ways & Means,* 93d Cong. at 18 (1973) (remarks of Under Secretary Volcker) ("The principal effect of the Federal Financing Bank in this respect is that the Secretary of the Treasury could say to the postal service that he is going to take that issue [under 39 U.S.C. § 2006(a)] for the Federal Financing Bank rather than for the Treasury itself."); *Federal Financing Bank Act: Hearings Before the House Comm. on Ways & Means,* 92d Cong. at 26 (1972) (remarks of Under Secretary Volcker) (characterizing "the only really essential" effect of the FFBA on Postal Service borrowing as "that the Secretary of the Treasury or the Board of Directors of the Federal Financing Bank would" exercise the right of first purchase).

Moreover, the Administration that proposed the creation of the FFB assured the Postal Service and Congress that the FFBA would not give the FFB or Treasury the power to control Postal Service decision-making. Upon receiving a letter outlining the Postmaster General's concerns about the proposed FFBA, the Office of Management and Budget (OMB) replied that the FFB's role would be limited to coordinating Federal borrowing activities;

the proposed legislation does not require or intend that the Treasury Department have any role in or any veto power over the development or implementation of the programs of the various agencies. Thus, the proposed legislation contemplates no involvement of the Treasury or the Federal Financing Bank in formulating, reviewing, or otherwise affecting the structure or scope of agency programs.

In sum, the provision of the FFBA's statute allowing it to set terms and conditions for the purchase of Postal Service debt cannot reasonably be interpreted as giving FFB the authority to assert substantive control over the Postal Service. A contrary conclusion is not supported by the FFBA's text and inconsistent with the expressed intent of the Congress and Administration that enacted the FFBA.

---

6 As noted in your letter, the 1972 House committee report, at slight variance from the later reports, cast the FFB as "another potential purchaser of postal obligations." H.R. Rep. No. 92-1478 at 7. This stray characterization, however, does not support an inference that the FFB's purchase option is independent from Treasury's, for three reasons. First, the sentence is facially ambiguous: given Treasury's oversight of the FFB, the FFB's separate corporate identity does not necessarily imply separate substantive authority regarding Postal Service borrowing. Second, contrary to any such implication and consistent with the later committee report language excerpted above, the sentence that follows characterizes the FFB or Treasury exercising the purchase option under 39 U.S.C. § 2006(a). Id. Finally, the 1972 committee report was superseded by the 1973 committee reports in any event, and those later reports are unambiguous on this point.

7 The Postal Service expressed its satisfaction with these assurances that the FFBA would not impair its ability to borrow under the PRA. *Federal Financing Bank Act,* 92d Cong. at 40-41.
Finally, even if there were some indication of legislative intent to allow the FFB to assume decision-making powers as a condition of lending (which we cannot find), it would be unconstitutional for the FFB to exercise such powers. As noted in section I above, the Constitution’s Appointments Clause requires each freestanding component of the Executive Branch to be headed by a “principal officer” appointed by the President and confirmed by the Senate. See Free Enter. Fund, 561 U.S. at 511. Because the Postal Service is such a freestanding component, and because the FFB Board of Directors consists predominantly of inferior officers or employees, the Appointments Clause bars the FFB from acting as an agency head and subordinating the Postal Service Governors, whom Title 39 designates as principal officers. See Silver, 951 F.2d at 1038-39.

Even if the FFB were headed by a principal officer, however, it would violate the Constitution’s separation of powers at any rate for the FFB to assume control of the Postal Service without express Congressional authorization.

III. CONCLUSION

In sum, while proposed conditions 4-7 might be customary terms in commercial transactions between private parties, they pose significant constitutional and statutory problems in the context of a transaction between the Postal Service and Treasury (whether acting through FFB or in its own name). For that reason, we do not believe they can lawfully be a part of any Note Purchase Agreement between the Postal Service and FFB.

Please do not hesitate to give me a call if you have any questions or concerns. I hope this information is helpful.

Very truly yours,

Thomas J. Marshall

cc: Mr. Brent McIntosh

---

8 As explained earlier in this section, the FFB is headed by a Board of Directors chaired by the Treasury Secretary, with four other Directors appointed by the President (without Senate confirmation) from the ranks of Executive Branch “officers or employees.” 12 U.S.C. § 2284(a). Because the FFB Directors are not subject to Senate confirmation, they cannot be considered principal officers under the Appointments Clause, except, arguably, for the Treasury Secretary and any other Directors who are principal officers of another agency. At present, however, four of the five current FFB Directors are inferior officers or employees at Treasury. FFB, 2018 Annual Report at 6. The FFB Board makes decisions by majority vote, meaning that those four Directors could override the Treasury Secretary’s vote. Bylaws of the Federal Financing Bank § 3.08 (2006), https://go.usa.gov/xmyGN.

9 Here, too, the situation with Fannie Mae and Freddie Mac is distinguishable. To the extent that Treasury was exercising significant governmental authority to control the institutions (on par with the authority that Congress delegated to the FHFA, see 12 U.S.C. § 4617), it is notable that Congress conferred that authority on the Secretary of the Treasury, a principal officer, and not on the FFB. See 12 U.S.C. § 1455(t). The agreements that resulted were executed by Treasury, and not by the FFB as a delegate. Amended and Restated Senior Preferred Stock Purchase Agreement Between Treasury and Freddie Mac.

SUBJECT: Continuing Legal Concerns Regarding the Federal Financing Bank’s Proposed Lending Conditions

Dear Mr. Laughton:

Thank you for your letter dated June 28, 2019 (June 28 letter), discussing the concerns we expressed in our May 31 letter with the proposal from the Federal Financing Bank (FFB), which would subject renewal of our Note Purchase Agreement (NPA) to a number of new conditions. We did not previously respond to your letter based upon the advice of Gary Grippo, but given the more recent communications between Mr. Grippo and our Chief Financial Officer, it now seems incumbent on us to do so. Unfortunately, as discussed below, your letter does not adequately address the substantial constitutional and statutory issues at stake, and our concerns therefore remain.

There appears to be no dispute between us that Congress vested the exercise of most of the decision-making powers of the Postal Service in the Board of Governors, with certain significant powers reserved to the Governors alone. 39 U.S.C. § 202(a)(1), (c)-(e); see id. § 402. Those powers include pricing, product management, control of expenses, collective bargaining, structural organization, and performance planning. Id. §§ 205(a), 401, 404, 1206, 2803-2804, 3632; accord Silver v. U.S. Postal Serv., 951 F.2d 1033, 1038 (9th Cir. 1991) (Congress gave the Governors “ultimate control and authority” over the Postal Service). There is likewise no dispute between us that these powers are the subject of FFB’s proposed Conditions 4-7. Finally, we both recognize the proposition that, when Congress vests certain decision-making authority and responsibilities in one Executive Branch entity, that entity cannot transfer (or “subdelegate”) such authority and responsibilities to another Executive Branch entity without explicit congressional authorization to that effect. See U.S. Telecom. Ass’n v. FCC, 359 F.3d 554, 565-66 (D.C. Cir. 2004); accord Centralizing Border Control Policy Under the Supervision of the Attorney General, 26 Op. Off. Legal Counsel 22, 22-24 (2002).

Where we diverge is over the issue of whether FFB’s proposal violates that “subdelegation” doctrine. In our letter of May 31, we articulated at length that Congress specifically designated the officers responsible for postal decision-making and gave such officers no authority to transfer their powers outside the Postal Service, and asserted that agreeing to the NPA conditions would accordingly be an impermissible subdelegation. Your June 28 letter appears to be suggesting that the NPA conditions do not even implicate the “subdelegation” doctrine because they would merely give FFB an opportunity to provide “input,” which the Postal Service is free to reject. Alternatively, your letter contends that, even if the NPA conditions would require the Postal Service to cede statutory authority and thereby implicate the subdelegation doctrine, they still do not violate it, either because Congress explicitly authorized the Postal Service to agree to “conditions” on borrowing or because the scope of such subdelegation would be narrow. As discussed below, however, these arguments are based on both an inaccurate summary of the proposed NPA conditions and a misreading of the relevant legal authorities, and do not adequately address (let alone minimize) the concerns we previously raised.
I. FAR FROM MERELY ALLOWING FFB TO PROVIDE "INPUT," THE PROPOSED CONDITIONS WOULD CEDE SIGNIFICANT DECISION-MAKING AUTHORITY TO FFB

Your June 28 letter appears to be asserting that the proposed NPA conditions would not effectuate a transfer of authority in the first place, and that they therefore do not implicate the subdelegation doctrine at all. The central premise for this argument is that, rather than transferring decision-making authority to FFB, the NPA conditions would merely be allowing FFB "to provide input on USPS's activities in exchange for financing, but final decision-making authority would remain in all instances with USPS." June 28 letter at 1; accord id. at 2 (the NPA conditions "would give FFB high-level input").

This premise is undermined by the plain terms of the proposed conditions. Despite your claims to the contrary, such conditions are framed in terms not of "input," but of "consent" (conditions 4-6) and a "right to approve" (condition 7). Those words mean the opposite of "input." "Input" connotes providing advice to a decision-maker, which the decision-maker may consider but is not bound to accept, whereas "consent" or "approval" indicate that the purported decision-maker cannot implement a proposal without the "advising" party's agreement.\(^1\) By their very terms, then, Conditions 4-7 would not allow FFB merely to provide "input" for the Postal Service's Governors and Board to consider in making decisions. To the contrary, the conditions are worded to bar the Governors and Board from making significant decisions without obtaining FFB approval, thereby converting FFB into the ultimate decision-maker.\(^2\)

Your June 28 letter goes on to suggest that the FFB's proposed role would be "modest" and that the Postal Service "would retain substantial authority" and "considerable discretion" even over the activities described in Conditions 4-7. June 28 letter at 2. For example, although FFB's consent would be required for business strategies and performance targets (Conditions 4 and 6), the Postal Service would still be responsible for "draft[ing] these strategies and targets," as well as decisions regarding how to implement FFB-approved strategies and meet FFB-approved targets. Id. Similarly, for major NSAs (Condition 5), FFB's consent role would still leave the Postal Service with discretion "to negotiate [covered] agreements." Id. However, in all respects, the Postal Service's exercise of any such "authority" would be wholly subordinate to FFB's decision-making. In that regard, the proposed Postal Service-FFB relationship would essentially mirror the current relationship between Postal Service management and the Governors or Board, with the former carrying out the strategic decisions of the latter. By substituting FFB for the Governors and Board as the ultimate decision-maker on major Postal Service initiatives, the proposed conditions would strip, not preserve, Postal Service decision-makers' authority.

Finally, your letter asserts that, despite the "consent" and "approve" language in Conditions 4-7, the Postal Service is always free to ignore FFB's wishes and therefore would remain in "full control" over the covered activities, because the only consequence of disobeying FFB's demands is that it would lose "FFB's financial support" and would therefore need to seek alternative financing. June 28 letter

\(^1\) Compare BLACK'S LAW DICTIONARY, "consent" (11th ed. 2019) ("A voluntary yielding to what another proposes or desires; agreement, approval, or permission regarding some act or purpose, esp. given voluntarily by a competent person; legally effective assent.") and id., "approve" ("To give formal sanction to; to confirm authoritatively."); with Merriam-Webster.com, "input," https://www.merriam-webster.com/dictionary/input (last visited July 2, 2019) ("something that is put in: such as: advice, opinion, comment").

\(^2\) See Cooling Water Intake Structure Coalition v. EPA, 905 F.3d 49, 79-80 (2d Cir. 2018) (EPA did not delegate decision-making authority to separate federal agencies by promulgating rule requiring program directors to consult with agencies and allowing them to provide technical assistance, because the rule did not require EPA to accept the agencies' recommendations and clearly contemplated that EPA would independently make a final determination); accord U.S. Telecom. Ass'n, 359 F.3d at 568 ("a federal agency may turn to an outside entity for advice and policy recommendations, provided the agency makes the final decisions itself").
at 1-2. Put differently, you appear to be suggesting that, because the Postal Service could theoretically breach the conditions of the NPA, and because the consequences of such a breach are relatively minor, agreeing to be bound to such conditions cannot really constitute a subdelegation of power to FFB.

This suggestion is incorrect in two fundamental respects. First, it ignores the legal effect of the NPA, which would become a binding legal document through which, pursuant to its terms, the Postal Service would agree to legally transfer decision-making powers to FFB. It therefore ignores the key underpinning of the subdelegation doctrine, which is that a federal entity cannot agree to cede such powers absent congressional authorization. It is no answer that the Postal Service can later undo one legal violation (transferring decision-making powers without congressional authorization) only by committing a separate legal violation (breaching the agreement to transfer those powers). The point of the subdelegation doctrine is that the Postal Service cannot transfer its decision-making powers in the first place.

Second, your letter's suggestion that the consequences of breach are insubstantial stands in stark contrast to the legislative history of the Postal Reorganization Act (PRA), which created the Postal Service and which enacted the borrowing provisions at issue. In crafting the statutory provisions that authorize Treasury-Postal Service lending (including lending from the FFB), Congress was plainly concerned that Treasury's lending power might place the Postal Service in a position where it would have to choose between forgoing the ability to access financing from Treasury and conforming to Treasury's preferences and directives. Treasury explicitly disavowed the notion that it would use the substantial threat of cutting off credit as leverage in an attempt to shape Postal Service decisions, or would otherwise use its lending authority to "arrogate[e] to the Secretary any control over the operations of the Postal Service." *Postal Modernization: Hearings Before the Senate Comm. on Post Off. & Civil Serv.,* 91st Cong., at 305-06 (1969) (remarks of Under Secretary Paul A. Volcker). Yet that is exactly what your letter is proposing here. Treasury is free under the statute to decline to purchase the Postal Service's obligations. 39 U.S.C. § 2006(a). It is not free to elect to purchase the Postal Service's obligations while conditioning the purchase on a surrender to Treasury or FFB of decisions that the Congress vested in the Postal Service.

II. YOUR LETTER DID NOT ADDRESS THE SIGNIFICANT LEGAL PROBLEMS WITH SUCH A CESSION OF CONTROL

Because the proposed NPA conditions would require the Postal Service to transfer to Treasury or FFB powers that Congress vested in the Postal Service, the remaining issue is whether Congress has explicitly authorized such a transfer. In our May 31 letter, we explained that Congress has not authorized the Postal Service to cede to Treasury, FFB, or any other outside party its statutory powers to make decisions concerning prices, agreements, budgets, or the other matters implicated by Conditions 4-7. Your June 28 letter makes three basic points in response, but none of the points comes close to establishing that the transfer of power contemplated by the NPA conditions is legally permissible.

First, your letter reprises the position advanced in your earlier correspondence that FFB and the Postal Service have broad statutory authority to agree on borrowing "terms and conditions," June 28

---

3 As noted in our May 10 and 31 letters, DOJ's Office of Legal Counsel (OLC) has relied on Under Secretary Volcker's statements of "legislative purpose" when interpreting the nature of the Postal Service-Treasury/FFB borrowing relationship. *Authority of the Secretary of the Treasury Regarding Postal Service Bond Offering,* 17 Op. Off. Legal Counsel 6, 8-10 (1993); see *Scope of Treasury Department Purchase Rights with Respect to Financing Initiatives of the U.S. Postal Service,* 19 Op. Off. Legal Counsel 238, 245 n.5 (1995).

4 As we previously noted, the Postal Service's governing statute is distinguishable, in this regard, from statutory schemes that have expressly allowed Treasury to assume control of distressed financial institutions.
letter at 1, 3, such that the Postal Service would be “exercising its own specific statutory authority” by agreeing to the terms and conditions proposed by FFB. Id. at 1 (emphasis in original). In other words, you appear to contend that relinquishment of the Postal Service’s statutory authority to FFB is a valid subject of the “terms and conditions” that the parties can attach to borrowing. As we explained in our May 31 letter, however, that vague “terms and conditions” phrase must be read in the context of the statute as a whole and in light of the legislative history of both the PRA and the Federal Financing Bank Act, which made clear that Congress did not intend to give either Treasury or FFB any power to control Postal Service decision-making through its lending authority. Your June 28 letter does not respond to these points, let alone explain the basis for your departure from the consistent expressions of intent from Congress, the Administration, and Treasury set forth in that legislative history. As we pointed out previously, when read in their full statutory context, vague statutory references to “conditions” of borrowing cannot subvert the clearly expressed Congressional intent to specifically designate the officers responsible for postal decision-making, and to provide them with no authority to delegate or transfer that authority outside the Postal Service.5 For similar reasons, the Postal Service could not cede control to a private lender, and so it is irrelevant whether private lenders might demand such terms of other borrowers or whether such terms are commercially reasonable in other contexts. There is therefore also nothing “surprising” about the fact that Congress did not give FFB and the Postal Service the freedom to “mutually agree on commercially reasonable terms” without regard to the statutory scheme governing both entities.

Second, your June 28 letter notes the absence of any cases “where courts have found that an agency lacks authority to consent to a lending arrangement such as this one.” June 28 letter at 2. That may be true, but there are also no cases holding that an agency has that authority, let alone in this context. The absence of directly relevant case-law proves nothing except that this situation may be unprecedented. Indeed, the case-law on which we both have relied, as well as the OLC opinions that we have cited, clearly support the principle that one agency cannot transfer control of a statutory function to another agency without Congressional authorization, so it should not be surprising that Treasury and other agencies have simply tended to act in cognizance of the Constitution’s separation of powers requirements.

Third, your June 28 letter suggests that, because the NPA conditions would shift only a “limited band” of the Postal Service’s decision-making authority to FFB, and “would also not expressly shift any regulatory authorities,” concerns about improper subdelegation are misplaced. June 28 letter at 2-3. This position is based on a misreading of the cases cited in your letter, which wholly support our position. To be sure, the NPA conditions would not shift all of the Postal Service’s authority to the FFB — as your letter notes, the Postal Service would still retain the power to exercise “other statutory authorities” and to approve negotiated service agreements (NSAs) below the $70 million revenue threshold. Id. at 1, 2. But the issue is not whether one agency has usurped every power that Congress has vested in a different agency, but rather whether one agency has arrogated to itself the decision on how to exercise any of another agency’s powers. That much is clear from U.S. Telecom Ass’n, the leading case on the subdelegation doctrine. There, the D.C. Circuit concluded that the Federal Communications Commission (FCC) had improperly delegated to state commissions the determination of whether “a specific statutory requirement” had been satisfied. 359 F.3d at 567. The fact that the FCC would still have had other statutory duties, arising under different statutory provisions, did not give the court pause: indeed, it was not a factor in the court’s analysis at all.

5 By contrast, in Gentiva Healthcare Corp. v. Sebelius, 723 F.3d 292, 296 (D.C. Cir. 2013), the court found an “affirmative showing” of congressional intent to allow the HHS Secretary to subdelegate decision-making to a private contractor, where a statutory provision granted the Secretary broad power to “perform any of [her] functions under this subchapter directly, or by contract ... , as [she] may deem necessary.” 42 U.S.C. § 1395kk(a) (emphasis added). No similar language appears in Title 39. And as noted in our May 31 letter, Title 39’s “terms and conditions” language is nowhere near as explicit as other statutory provisions that have expressly allowed Treasury to assume decision-making for other Federal entities.
The other cases on which your letter relies also do not support your position. Those cases involve a wholly different factual scenario, in which an agency that possesses the statutory authority to render a multi-factor decision may condition one element of such decision on an outside party’s assessment or approval. See generally La. Forestry Ass’n v. Sec’y, U.S. Dept’ of Labor, 745 F.3d 653, 672-73 (3d Cir. 2014); Fund for Animals v. Kempthorne, 538 F.3d 124, 133-34 (2d Cir. 2008). While there is some (but not unanimous) support for the proposition that such a scenario would not constitute an improper delegation, La. Forestry Ass’n, 745 F.3d at 672-73, that proposition has no utility here. Instead, Conditions 4-7 would have FFB making final decisions that would cover the totality, not merely a discrete factor, of decisions on strategic planning, budgets, pricing, contracts, and structure, and would effectively allow FFB to make the Postal Service’s most significant business decisions for it. As such, the situation is closer to that in Defenders of Wildlife v. Gutierrez, 532 F.3d 913, 926-27 (D.C. Cir. 2008), where the court held the Coast Guard to have impermissibly subdelegated its authority to establish traffic separation schemes when it merely entered into the Code of Federal Regulations schemes dictated by the International Maritime Organization. Nor does the “narrow[] band of discretion” principle announced in Kempthorne apply here: under no condition would the Postal Service exercise ultimate oversight and revocation. See Kempthorne, 538 F.3d at 133-34. Simply put, these cases bolster our point that a shift of decision-making power from the Board or the Governors to FFB, such as the proposed conditions seek to compel, would be unlawful.

III. CONCLUSION AND NEW PROPOSAL

In sum, whether or not terms like proposed Conditions 4-7 might be customary in commercial transactions between private parties, the case-law clearly indicates that the Postal Service cannot cede to Treasury the entirety of significant decisions that Congress vested in the Postal Service. That is precisely what proposed Conditions 4-7 would require. FFB would not merely be submitting input for the Postal Service’s consideration (and possible rejection) or determining one part of a larger decision that would still ultimately be made by the Postal Service. Whatever other “conditions” the Postal Service and FFB might enter into as part of a revised NPA, they cannot include terms that would vitiate Congress’s carefully considered intent and the Constitution’s separation of powers. Accordingly, the Postal Service cannot agree to Conditions 4-7 in FFB’s term sheet in their current form.

In an effort to maintain our longstanding financing relationship and to address your concerns over having adequate input on key postal decisions, but upon terms that are within the bounds of the law, we are prepared to make a counter-proposal to the term sheet you provided. Specifically, our counter-proposal largely memorializes those changes to Conditions 1-3 and 8-12 on which we appear to agree, and would replace Conditions 4-7 with new conditions stating that:

---

6 It should be noted that the holding in Louisiana Forestry Association remains a matter of contention. In that case, the Third Circuit held that the Department of Homeland Security (DHS), which had the authority to administer the H-2B visa program after “consultation” with appropriate agencies, did not impermissibly subdelegate its authority by deciding that one criterion for granting such visas was a petitioner’s receipt of a temporary labor certification from the Department of Labor (DOL). That holding was rejected by the Tenth Circuit, which concluded that the role DHS afforded to DOL exceeded mere “consultation.” See G.H. Daniels III & Assoc’s. v. Perez, 626 Fed. Appx. 205, 210-12 (10th Cir. 2015).

7 Additionally, even where an agency may condition one element of a multi-factor determination on a decision by an outside agency, such condition is permissible only if “there is a reasonable connection between the outside agency’s decision and the federal agency’s determination.” U.S. Telecom Ass’n, 359 F.3d at 567. As noted in the previous footnote, it is arguably reasonable for DHS to condition a grant of an H-2B visa on temporary labor certification from DOL, given DOL’s expertise in labor and employment matters and the long history of its involvement in visa certifications. See La. Forestry Ass’n, 745 F.3d at 673-74. Here, by contrast, Treasury has no particular expertise in such matters as postal operations, pricing, or collective bargaining, and there is no history of conditions like those proposed here.
• The Postal Service shall provide FFB with advance notice of official annual performance goals that it intends to publish in its annual reports that are submitted to Congress and the Postal Regulatory Commission, and shall provide FFB with an opportunity to comment and provide input upon such proposed performance goals before they are published and submitted.

• At least quarterly, the Postal Service shall orally brief the FFB's officers and/or board members on its broad strategy to return the Postal Service to financial stability, and shall provide FFB with an opportunity to comment and provide input upon such strategy. The Postal Service shall also provide FFB with any comprehensive, multi-year business plan that it develops for the purpose of returning the Postal Service to financial stability, and shall provide FFB with an opportunity to comment and provide input on such business plan.

A copy of our counter-proposal is enclosed. I understand that the Postmaster General will be communicating directly with Secretary Mnuchin concerning this matter. In the interim, please do not hesitate to give me a call if you have any questions or concerns. I hope this information is helpful, and that this matter can be brought to a successful resolution.

Very truly yours,

Thomas J. Marshall

Enclosed
GOVERNORS

SUBJECT: Authority to Cede Operational Control to the Federal Financing Bank as a Condition of Borrowing

Last week, we received a proposal from the Federal Financing Bank (FFB) to subject renewal of our Note Purchase Agreement (NPA) to a number of new conditions. Broadly speaking, the proposed conditions fall into three general categories. Conditions 1-3 are debt security terms that would require the Postal Service to establish an escrow account to cover 15 months of interest. Conditions 4-6 would require the Postal Service to obtain FFB consent in the establishment of postal policy and before engaging in various business activities, such as establishment of annual performance targets, and management of major negotiated service agreements. Condition 7 would require the Postal Service, under certain circumstances, to potentially cede to FFB the decision-making authority for matters concerning pricing, collective bargaining, major contracting, structural organization, and the composition of senior management. Finally, conditions 8-11 are transparency and reporting requirements that would require various reports and briefings to the FFB. (A twelfth condition is a remedy provision that provides that the breach of any other condition would entitle the FFB to refuse to purchase a Postal Service obligation issued under the NPA.)

The majority of these proposed conditions—specifically, the escrow and reporting conditions—raise no immediate legal concerns, although they represent a significant departure from our current agreements, and seem unnecessary in the context of intergovernmental borrowing. Whether to accept them or make a counter-offer is a business decision.

By contrast, conditions 4-7 would essentially turn the FFB into a sort of “control board” that supersedes the authority vested by Congress in the Board of Governors (Board) and the Governors. In particular:

- Condition 4 would require the Postal Service to obtain prior written consent from FFB before establishing annual performance goals.

- Condition 5 would require FFB consent before the Postal Service enters into major negotiated service agreements.

- Condition 6 would give the FFB control over the most central aspect of postal policy, by requiring that the FFB consent to a plan to “stabilize and reverse [the Postal Service’s] financial decline.” Moreover, under that plan, the Postal Service has been advised that it could only rely on those powers available to the Postal Service under current law, as Treasury noted in a May 17, 2019 phone conference with Postal Service Finance. In other words, in contrast to the Board’s Ten-Year Business Plan, the FFB would forbid the Postal Service’s plan from relying on legislative changes to the Postal Service’s business model.
If that FFB-approved plan fails to achieve its goals in the eyes of the FFB (as it inevitably would, particularly given the fact that the Postal Service lacks the authority under current law to achieve financial stability), then condition 7 would allow the FFB to assume control over the most central aspects of business decision-making.

Regardless of whether these terms might be appropriate in a commercial transaction between private parties, they pose significant constitutional and statutory problems in the context of a transaction between the Postal Service and Department of the Treasury (Treasury), whether acting through FFB or in its own name. For that reason, they cannot legally be a legitimate part of any covenants or additional provisions to any Note Purchase Agreement between the Postal Service and FFB. Simply put, these conditions are not within the power of the FFB to demand or within the power of the Postal Service to accept.

The remainder of this memo will explain why (1) the Board and the Governors cannot lawfully cede decision-making authority over the Postal Service to the FFB, Treasury, or private creditors, and (2) why the FFB’s separate statutory authority does not change that conclusion. In this regard, it is irrelevant whether a private creditor might customarily impose similar control-oriented conditions on a financially distressed private borrower in the course of a market transaction. The Postal Service is not a private entity, but an independent establishment of the Executive Branch created and governed by statute. 39 U.S.C. § 201; see U.S. Postal Serv. v. Flamingo Indus. (USA) Ltd., 540 U.S. 736, 740-41 (2004). Title 39 of the United States Code sets forth a carefully constructed governance structure for the Postal Service, in which postal powers are vested in the Board and in the Governors. By instead vesting ultimate control and authority over the Postal Service in the hands of the FFB (and hence Treasury), the FFB’s proposed conditions 4-7 would vitiate the statutory scheme and usurp Congress’s authority over postal organization. Treasury officials have clarified that, in proposing these terms, they did not analyze whether they were legally consistent with the Postal Service’s status as an entity of the Executive Branch.

I. THE POSTAL SERVICE CANNOT LAWFULLY CED DECISION-MAKING AUTHORITY TO TREASURY, THE FFB, OR ANY OTHER CREDITOR

Under the Constitution, Congress holds the power to establish the postal system and to make all necessary and proper laws related to that power. U.S. Const. art. I, § 8, cl. 7, 18. It is also Congress’s power to establish “offices” for carrying out the postal laws it enacts. Id. art. II, § 2, cl. 2. Only the President can appoint officers to those Congressionally-established offices: for so-called principal officers, this requires Senate confirmation, whereas Congress can alternatively provide for appointment of inferior officers by the President alone or by a designated principal officer. Id.

To apply these precepts to the situation at hand, Congress established the Postal Service to fulfill the various operational and business functions in Title 39, United States Code. Congress created particular offices in which it vested decision-making powers: specifically, Congress vested the exercise of most of the powers of the Postal Service in the Board, with certain significant powers reserved to the Governors alone. 39 U.S.C. § 202(a)(1), (c)-(e); see id. § 402. Those powers include pricing, product management, control of expenses, collective bargaining, structural

---

1 Based on a May 15, 2019, letter from Stephen Laughton, Assistant General Counsel (Banking and Finance) at Treasury, we understand Treasury’s argument in support of these proposed conditions to rest on two basic points. First, whatever statutory restrictions might arguably apply to the Postal Service-Treasury borrowing relationship under the Postal Reorganization Act of 1970 (PRA), Congress’s establishment of the FFB in 1973 created a separate borrowing option free of those restrictions. Second, the borrowing-authority statutes give the FFB and the Postal Service broad authority as to the terms and conditions of borrowing. Based on the May 17, 2019, phone conference as well as a subsequent discussion held with Treasury officials yesterday, we understand that the FFB sees these conditions as customary terms that would be imposed on a financially distressed company seeking to borrow money from the market.
organization, and performance planning: the very subjects of the FFB’s proposed conditions 4-7. Id. §§ 205(a), 401, 404, 1206, 2803-2804, 3632. Powers assigned to the Board can be delegated to committees of the Board or to the Postmaster General and can be re-delegated within the Postal Service. Id. § 402. Powers assigned to the Governors cannot be delegated. Id. Congress provided for the Governors, as principal officers, to be appointed by the President with Senate confirmation; inferior officers (including the Postmaster General and Deputy Postmaster General) to be appointed by the Governors; and employees of the Postal Service to be appointed by the inferior officers or other employees. See id. §§ 202, 402, 1001(a).

Congress gave the Governors “ultimate control and authority” over the Postal Service. Silver v. U.S. Postal Serv., 951 F.2d 1033, 1038 (9th Cir. 1991). It might have been constitutionally valid for Congress to place postal decision-making under Treasury’s control. But that is not what Congress and the President chose in the PRA. Indeed, the legislative history of the PRA attests to Congress’s manifest intent that the Postal Service be removed from direct control by the President or officers who serve at the pleasure of the President, such as the Treasury Secretary. See S. REP. No. 91-912, at 4, 8 (1970); H.R. REP. No. 91-1104, at 13 (1970); President’s Message to Congress Transmitting Postal Reform, H.R. Doc. No. 91-313, at 51-52 (1970); see also Status of the United States Postal Service as an “Executive Agency” Under Executive Order No. 12,250, 5 Op. Off. Legal Counsel 241 (1981) (“Moreover, both the Act and its history reveal that Congress intended to grant the Service at least some measure of insulation from control by the President and to place the Service in a separate category from the conventional executive departments.” (citation omitted)).

Hence, the Governors are subject to Presidential removal only for cause, in the interest of vesting the Governors with the independent ability to determine postal policy, including in the establishment of postal prices and in the selection of senior management. 39 U.S.C. § 202(a); Mail Order Ass’n of Am. v. U.S. Postal Serv., 986 F.2d 509, 519-520 (D.C. Cir. 1993) (noting that the governance structure of the Postal Service is designed to confer “independence from political pressures and independence to manage its operations in a professional, businesslike manner,” with the Board exercising “policy control [over postal affairs] with functions similar to a board of directors”) (citations omitted); see also Free Enter. Fund v. Pub. Co. Accounting Oversight Bd., 561 U.S. 477, 502 (2010); Buckley v. Valeo, 424 U.S. 1, 133 (1976) (“The Court in [Humphrey’s Executor] carefully emphasized that . . . the members of such agencies were to be independent of the Executive in their day-to-day operations[.]”); In re Aiken County, 645 F.3d 428, 442 (D.C. Cir. 2011) (Kavanaugh, J., concurring) (“Because of Humphrey’s Executor, the President cannot remove an independent agency’s officers when the agency pursues policies or makes decisions the President disagrees with.”).

Within Congressionally-set parameters, the President and his subordinates may only “take care that the laws are faithfully executed”; they cannot themselves remake the laws. U.S. CONST. art. II, § 3; Youngstown Sheet & Tube Co. v. Sawyer, 343 U.S. 579, 587 (1952). Since it is Congress’s prerogative to create Executive Branch entities, define their functions, and designate officers to execute those functions, the President and his subordinates cannot transfer functions from one Executive Branch unit to another without Congressional authorization. Centralizing Border Control Policy Under the Supervision of the Attorney General, 26 Op. Off. Legal Counsel 22, 22-24 (2002) (“This Office has long held that transfers of statutory authority from one department to another ‘may normally be accomplished only by legislation or by executive reorganization under the [since-lapsed] Reorganization Act.’” (citations omitted)). As was noted by the Office of Legal Counsel (OLC):

It has long been established that, if the laws . . . require a particular officer by name to perform a duty, not only is that officer bound to perform it, but no other officer can perform it without a violation of the law; and were the President to perform it, he would not only be not taking care that the laws were faithfully executed, but he would be violating them himself.
As noted above, Congress designated the officers responsible for postal decision-making. Congress also gave those officers no authority to delegate their authority outside the Postal Service (if at all). The Executive Branch does not have the constitutional power to supersede Congress's choice to delegate the execution of the postal laws to the Postal Service, rather than to Treasury or the FFB.\(^2\)

As Mr. Laughton's letter points out, the statutory provisions on Postal Service borrowing allow the Postal Service to agree to conditions and covenants in any sale of its obligations. See 39 U.S.C. §§ 2005-2006. Section 2006, for instance, notes that the Postal Service obligations purchased by Treasury may be “under such terms . . . as [the Treasury Secretary] and the Postal Service may agree.” Mr. Laughton suggests that the plain language of these provisions is broad enough to authorize the FFB’s proposed conditions. While it is true that these provisions give the Postal Service discretion regarding the terms it may agree to, that discretion is not limitless. Those statutory provisions cannot be read in isolation; rather, they must be read in the context of the statute as a whole. E.g., Sturgeon v. Frost, 136 S. Ct. 1061, 1070 (2016). As explained above, the same PRA that enacted Sections 2005 and 2006 created the Postal Service as an independent establishment, insulated it from direct political control, and designated the Governors and Board as the officers responsible for making postal policy and business decisions. A provision that simply authorizes the Postal Service to agree to conditions when exercising its borrowing authority cannot reasonably be construed to allow the Postal Service and another Executive Branch entity to agree to make an end-run around the governance structure that Congress painstakingly established in the same Act. Whitman v. Am. Trucking Ass'ns, 531 U.S. 457, 468 (2001) (“Congress, we have held, does not alter the fundamental details of a regulatory scheme in vague terms or ancillary provisions — it does not, one might say, hide elephants in mouseholes.” (citations omitted)).\(^3\)

As noted earlier, Treasury apparently believes that private lenders would demand a similar cession of control. However, the Postal Service could not accede to such a demand under Section 2005, any more than it can accede to transferring control of the Postal Service to another Executive Branch entity. In effect, this scenario would involve the Board and the Governors re-delegating their governmental decision-making authority to a private party. Such a cession would violate another principle of constitutional law. According to the so-called non-delegation doctrine, “Congress may employ private entities for ministerial or advisory roles, but it may not give these entities governmental power over others.” Pittston Co. v. United States, 368 F.3d 385, 395 (4th Cir. 2004) (agreeing with the Third Circuit’s summary of the doctrine in United States v. Frame, 885 F.2d 1119 (1989)) (emphasis omitted); see Am. Assn of R.R. v. U.S. Dep't of Transp., 721 F.3d 666, 670-72 (D.C. Cir. 2013), vacated on other grounds, 135 S. Ct. 1225 (2015); see also Dep’t of Transp. v. Am. Assn of R.R., 135 S. Ct. at 1252-53 (Thomas, J., concurring). Where an agency delegates to private individuals its decisionmaking authority vested by statute, the harm to political accountability “is doubled in degree in the context of a transfer of authority from Congress to an agency and then from agency to private individuals. The vitality of challenges to the former type of transfer is suspect, but to the latter, unquestionable.” Nat’l Ass’n of Regulatory Utility Comm’rs v. FCC, 737 F.2d 1095, 1104-07 (D.C. Cir. 1984).
The legislative history of the PRA supports this understanding of the Postal Service’s borrowing authority. Prior to enactment, Treasury’s Under Secretary for Monetary Affairs explained that, under the PRA provisions concerning borrowing, the Treasury Secretary should neither “assert substantive control over the Postal Service” nor “[never] put himself in a position where he is preventing the postal authority from obtaining what financing [the Postal Service] think[s] is necessary.” Postal Modernization: Hearings Before the Senate Comm. on Post Off. & Civil Serv., 91st Cong., at 311-12 (1969) (remarks of Under Secretary Paul A. Volcker); see also id. at 305-06 (“stressing” that the Treasury Secretary’s purchase option would not “interfere[e] with the financing of essential Postal Service activities or arrogat[e] to the Secretary any control over the operations of the Postal Service’); Post Office Reorganization, Part III: Hearings Before the House Comm. on Post Off. & Civil Serv., 91st Cong. 1165 (1969) (statement of Under Secretary Volcker) (Treasury’s role should be understood as limited, lest “some outsider looking at the bill” might construe it as “giv[ing the Secretary of the Treasury] certain powers over the Post Office Department that he shouldn’t have”); see H.R. Rep. No. 91-1104, at 21 (1970). Therefore, the borrowing provisions were intended simply to ensure that Treasury could coordinate overall Government debt issuances (including those of the Postal Service), without in any way suggesting that they could be used to cede to Treasury substantive control of the Postal Service.

Case-law on the analogous relationship between the Postal Service and the Department of Justice (DOJ) further buttresses the analysis here. In at least two cases, DOJ has asserted a prerogative to control the Postal Service’s litigating position, settlement of claims, and ability to represent itself. On both occasions, courts held that, notwithstanding statutory authority for DOJ involvement in Postal Service litigation, DOJ’s assertions of control ran afoul of Congress’s decision to confer independent decision-making authority on the Postal Service. Mail Order Ass’n of Am., 986 F.2d at 522-23 (“Respect for the language of the [PRA] and its underlying purposes simply will not permit the conclusion that Congress intended simultaneously to give the Postal Service such broad and unfettered discretion and to condition its judicial review options on [DOJ]’s – or even the President’s – approval.”); Leonard v. U.S. Postal Serv., 489 F.2d 814, 817-18 (1st Cir. 1974). To paraphrase the court in Leonard, "It was the intent of the Congress to create an independent Postal Service. It would be anomalous to hold that decisions normally committed wholly to the independent discretion of the Service are made subject to [Treasury or FFB] veto power when incident to [borrowing]." Leonard, 489 F.2d at 817-18.

To be sure, Congress could vest ultimate decision-making powers concerning postal operations in officers outside the Postal Service, if it wished. Indeed, the Postal Service is already subject to final decision-making authority exercised by various other Executive Branch entities, such as the Federal Trade Commission, the Postal Regulatory Commission, and the Equal Employment Opportunity Commission. E.g., 39 U.S.C. §§ 409(d)-(e), 3662(c)-(d), 42 U.S.C. § 2000e-16. And Congress has considered (but not enacted) legislation to create a “control board” that would assume decision-making powers in a manner similar to those proposed in NPA conditions 4-7. H.R. 2748, 113th

5 OLC expressly relied on this legislative history to interpret the meaning of 39 U.S.C. §§ 2005-2006. See Treasury Purchase Rights, 19 Op. Off. Legal Counsel at 245 n.5. Authority of the Secretary of the Treasury Regarding Postal Service Bond Offering, 17 Op. Off. Legal Counsel 6, 8-10 (1993) (quoting both the House and Senate Hearings in explaining that the statute itself may be ambiguous, but the “legislative purpose” behind the statute is clear).
Congress did not delegate postal decision-making to Treasury, and there is no reasonable basis to construe the borrowing provisions of the Postal Service's statute as a tacit grant of authority to the Postal Service and Treasury to agree to such a transfer of control. To do so would completely subvert the statutory structure that Congress carefully and deliberately created. Under the Constitution, such choices lie with Congress, not with the Executive Branch.

II. THE FFB'S GOVERNING STATUTE DOES NOT PROVIDE IT WITH AUTHORITY TO ESSENTIALLY ASSUME CONTROL OVER THE POSTAL SERVICE

Mr. Laughton's letter also suggests that, whatever limitations Congress imposed on the borrowing relationship between the Postal Service and Treasury, the FFB somehow exists outside those limitations. To the extent Mr. Laughton is suggesting that Congress implicitly authorized the FFB to exercise substantive control over postal decision-making when it enacted the Federal Financing Bank Act of 1973 (FFBA), the statute creating the FFB, such an interpretation finds no support in the FFBA's text or legislative history.

As Mr. Laughton notes, the FFBA was enacted a mere three years after the PRA and created the FFB as "a body corporate" and "an instrumentality of the United States Government" that is "subject to the general supervision and direction of the Secretary of the Treasury." 12 U.S.C. § 2283. The FFB is governed by a five-member Board of Directors with the Treasury Secretary serving as Chairman, and with the other four directors "appointed by the President from among the officers or employees of the Bank or of any Federal agency." Id. § 2284(a). Currently, the directors are all officials of the Treasury. FFB, 2018 Annual Report 6, https://go.usa.gov/xmyzY. By statute, the FFB is authorized to purchase obligations of any federal agency, and each federal agency that is authorized to sell obligations is authorized to sell such obligations to the FFB. Id. § 2285(a).

As explained in the preceding section, when Congress intends to vest one Executive Branch entity with the power to assume substantive control over a separate entity, Congress says so explicitly. Congress did not do so in the FFBA. Rather, the FFB was created merely to "assure coordination of [Federal financing] programs with the overall economic and fiscal policies of the Government" and to reduce the cost and market disruption of federal borrowings. Id. § 2281. The FFB exercises powers otherwise vested in Treasury and is expressly "subject to the direction and supervision of the Secretary of the Treasury." 31 U.S.C. § 305. For example, the FFB can exercise the powers assigned to Treasury under 39 U.S.C. § 2006. Nothing in the FFBA's language suggests that the FFB's lending powers were designed to be broader than those afforded Treasury as a general matter. Accordingly, while FFB has the authority to purchase Postal Service obligations "on terms and conditions determined by the [FFB]," 12 U.S.C. § 2285(a), the statute nowhere suggests that

---

6 The lack of such statutory authority is also distinguishable from statutes that have expressly permitted Treasury and other agencies to assume control of an institution. 12 U.S.C. § 1455(l) (providing Treasury with temporary authority to acquire equity in the Federal Home Loan Mortgage Association (Freddie Mac), and authorizing Treasury to consider "[r]estrictions on the use of Corporation resources, including limitations on the payment of dividends and executive compensation and any such other terms and conditions as appropriate for those purposes," among other things); see 12 U.S.C. § 4617 (authorizing the Federal Housing Finance Agency to place Freddie Mac and other housing-finance institutions into conservatorship). In contrast to these statutory authorities, the PRA is devoid of any similarly explicit provision allowing Treasury, through its purchase of obligations, to assume control over Postal Service decisions. As noted above, the legislative history of the PRA indicates that quite the opposite is true.
such terms and conditions can extend beyond the terms and conditions that the Secretary could otherwise establish. Indeed, the FFB’s purpose of simply coordinating overall Federal financing programs aligns precisely with the role that Congress contemplated for Treasury under 39 U.S.C. § 2006(a), as discussed above.

The FFBA’s legislative history confirms that Congress did not intend for the FFB to have any authority to exercise substantive control over the Postal Service’s statutory duties or powers. To the contrary, the committee reports accompanying the FFBA explained that the FFB was not authorized to lend money to the Postal Service beyond the scope of Treasury’s powers under 39 U.S.C. § 2006(a):

Your committee has reviewed the status of the authorities of the U.S. Postal Service to issue obligations as to whether this authority under the Postal Reorganization Act would be affected by any provision of this bill. Your committee intends that this bill will not impair or diminish the authority of the Postal Service to issue obligations under the financing provisions of the Postal Reorganization Act. Under the Postal Reorganization Act, the Secretary of the Treasury may purchase all Postal Service obligations if he does so within the time period prescribed in 39 U.S.C. 2006(a). The bill would have the effect of giving the Secretary the authority to exercise this right by requiring the Postal Service to sell its securities to the Federal Financing Bank. However, if the Bank or the Secretary did not act to take up a proposed Postal borrowing within the prescribed time limit, the Postal Service could, on its own initiative, borrow in the private market under its independent Postal Reorganization Act authority. Your Committee believes that no specific amendment is required to preserve the independent financing authority of the Postal Service.

H.R. Rep. No. 93-299, at 5 (1973); accord S. Rep. No. 93-166, at 3 (1973); H.R. Rep. No. 92-1478, at 5-7 (1972); see also Treasury Purchase Rights, 19 Op. Off. Legal Counsel at 243 (interpreting the 1973 House committee report as “intended to provide broad assurance that the FFBA would not unduly impair USPS’ existing financing authority under the PRA”). The FFB thus was conceived of as an agent for Treasury’s exercise of its purchase option under 39 U.S.C. § 2006(a), and not as an entity with an independent purchase option.

As with the PRA, Congress’s expression of the FFBA’s intent was largely based on the view of Treasury itself. Federal Financing Bank Act: Hearings Before the House Comm. on Ways & Means, 93d Cong. at 18 (1973) (remarks of Under Secretary Volcker) (“The principal effect of the Federal Financing Bank in this respect is that the Secretary of the Treasury could say to the postal service that he is going to take that issue [under 39 U.S.C. § 2006(a)] for the Federal Financing Bank rather than for the Treasury itself.”); Federal Financing Bank Act: Hearings Before the House Comm. on Ways & Means, 92d Cong. at 26 (1972) (remarks of Under Secretary Volcker) (characterizing “the only really essential” effect of the FFBA on Postal Service borrowing as “that the Secretary of the

7 As noted in Mr. Laughton’s letter, the 1972 House committee report, at slight variance from the later reports, cast the FFB as “another potential purchaser of postal obligations.” H.R. Rep. No. 92-1478 at 7. This stray characterization, however, does not support an inference that the FFB’s purchase option is independent from Treasury’s, for three reasons. First, the sentence is facially ambiguous: given Treasury’s oversight of the FFB, the FFB’s separate corporate identity does not necessarily imply separate substantive authority regarding Postal Service borrowing. Second, contrary to any such implication and consistent with the later committee report language excerpted above, the sentence that follows characterizes the FFB or Treasury exercising the purchase option under 39 U.S.C. § 2006(a). Id. Finally, the 1972 committee report was superseded by the 1973 committee reports in any event, and those later reports are unambiguous on this point.
Treasury or the Board of Directors of the Federal Financing Bank would exercise the right of first purchase).

Moreover, and perhaps most to the point here, the Administration that proposed the creation of the FFB assured the Postal Service and Congress that the FFB would not give the FFB or Treasury the power to control Postal Service decision-making. Upon receiving a letter outlining the Postmaster General’s concerns about the proposed FFBA, the Office of Management and Budget (OMB) replied that the FFB’s role would be limited to coordinating Federal borrowing activities:

The proposed legislation does not require or intend that the Treasury Department have any role in or any veto power over the development or implementation of the programs of the various agencies. Thus, the proposed legislation contemplates no involvement of the Treasury or the Federal Financing Bank in formulating, reviewing, or otherwise affecting the structure or scope of agency programs.

In sum, the provision of the FFB’s statute allowing it to set terms and conditions for the purchase of Postal Service debt cannot reasonably be interpreted as giving FFB the authority to assert substantive control over the Postal Service. A contrary conclusion is unsupported by the FFBA’s text and contrary to the expressed intent of the Congress and Administration that enacted the FFBA.

Of course, even if there were some indication of legislative intent to allow the FFB to assume decision-making powers as a condition of lending (which there clearly is not), it would be unconstitutional for the FFB to exercise such powers. As noted in section I above, the Constitution’s Appointments Clause requires each freestanding component of the Executive Branch to be headed by a “principal officer” appointed by the President and confirmed by the Senate. See Free Enter. Fund, 561 U.S. at 511. Because the Postal Service is such a freestanding component, and because the FFB Board of Directors consists predominantly of inferior officers or employees, the Appointments Clause bars the FFB from acting as an agency head and subordinating the Postal Service Governors, whom Title 39 designates as principal officers. See Silver, 951 F.2d at 1038-39. Even if the FFB were headed by a principal officer, however, it would violate the Constitution’s

---

8 The Postal Service expressed its satisfaction with these assurances that the FFBA would not impair its ability to borrow under the PRA. Federal Financing Bank Act, 92d Cong. at 40-41.

9 As explained earlier in this section, the FFB is headed by a Board of Directors chaired by the Treasury Secretary, with four other Directors appointed by the President (without Senate confirmation) from the ranks of Executive Branch “officers or employees.” 12 U.S.C. § 2284(a). Because the FFB Directors are not subject to Senate confirmation, they cannot be considered principal officers under the Appointments Clause, except, arguably, for the Treasury Secretary and any other Directors who are principal officers of another agency. At present, however, four of the five current FFB Directors are inferior officers or employees at Treasury. FFB, 2018 Annual Report at 6. The FFB Board makes decisions by majority vote, meaning that the four inferior-officer Directors can override the Treasury Secretary’s vote. Bylaws of the Federal Financing Bank § 3.08 (2006), https://go.usa.gov/xmvGN.

10 Here, too, the situation with Fannie Mae and Freddie Mac is distinguishable. To the extent that Treasury was exercising significant governmental authority to control the institutions (on par with the authority that Congress delegated to the FHFA, see 12 U.S.C. § 4617), it is notable that Congress conferred that authority on the Secretary of the Treasury, a principal officer, and not on the FFB. See 12 U.S.C. § 1455(f). The agreements that resulted were executed by Treasury, and not by the FFB as a delegatee. Amended and Restated Senior Preferred Stock Purchase Agreement Between Treasury and Freddie Mac.
separation of powers at any rate for the FFB to assume control of the Postal Service without express Congressional authorization.

For the reasons noted above, constitutional doctrine, the relevant statutory text, and the legislative history, strongly support the conclusion that proposed conditions 4-7 are unlawful.

III. TACTICAL OPTIONS AND CONSIDERATIONS

We believe that the logical next step would be to send a memorandum to Treasury counsel explaining our legal analysis and to see how Treasury/FFB responds. In our view, this type of engagement was effective in obtaining more clarity from Treasury about recommendations in the White House Task Force report. In addition, from discussions that we have had with Treasury, we understand that they have proposed these terms based on private-sector principles; they have not considered the specific legal issues that are implicated by imposing such terms on the Postal Service, as an entity of the Executive Branch with a specific and unique statute. Therefore, we believe this engagement on a lawyer-to-lawyer level could prove effective. A draft letter for this purpose to the Treasury Assistant General Counsel (Banking and Finance) is attached for your review and consideration.

Perhaps after sending the memorandum to Treasury counsel described in the previous paragraph, and receiving a response, the Board may also consider whether to offer a counter-proposal, such as an array of conditions that does not include proposed conditions 4-7, or one that includes proposed conditions that are modified in such a way as to be within lawful bounds (e.g., downgrading them to reporting requirements, or allowing Treasury/FFB to provide input, rather than ceding control). Additionally, the Board should consider briefing the leadership of relevant Congressional committees, either before or after obtaining more clarification about Treasury/FFB’s position.

If Treasury/FFB insists on its proposed conditions notwithstanding our analysis of their unlawfulness, the Postal Service would have at least four options.

First, the Postal Service could request a legal ruling from OLC. For OLC to resolve the dispute, the Postal Service would have to agree to be bound by OLC’s ultimate decision.\(^{11}\)

Second, the Postal Service could refuse to enter into a new NPA. If Treasury continues to insist on unlawful conditions in the context of an individual post-NPA bond issuance, the Postal Service could deem Treasury to have constructively declined to purchase the Postal Service’s obligations within a reasonable period. This would entitle the Postal Service to proceed to a market issuance under 39 U.S.C. § 2005 (if such an issuance is deemed to be feasible). See Treasury Purchase Rights, 19 Op. Off. Legal Counsel at 244-45. If the Postal Service attempts a market issuance without express consent from Treasury, there is some risk that Treasury will seek an OLC ruling (although the Postal Service could block OLC from considering the matter by not agreeing to be bound) or that Treasury could adopt other means of influencing the matter, such as informal pressure on regulated banks or more direct Administration pressure.

\(^{11}\) As an agency subject to Executive Order No. 12,146 whose head (the Governors) does not serve at the pleasure of the President, the Postal Service would have to agree to be bound by OLC’s disposition. Memorandum from David J. Barron, Acting Assistant Attorney General, to OLC Attorneys, Best Practices for OLC Legal Advice and Written Opinions, at 3 (July 16, 2010), https://go.usa.gov/xUwbq. See Treasury Purchase Rights, 19 Op. Off. Legal Counsel at 239 n.2 (noting that the Postal Service, by letter dated March 17, 1995, “consented to be bound by the final opinion to be issued by this Office”). OLC does not require such an agreement of agencies whose heads serve at the pleasure of the President (as the Secretary of the Treasury does), presumably because it trusts that the threat of removal is adequate to ensure compliance.
Third, the Postal Service could forgo further borrowing from Treasury and seek some form of legislative relief from Congress. This could take the form of a measure (or informal pressure) specific to the borrowing relationship, or of a measure offering broader financial relief in light of the diminished capacity for borrowing.

Fourth and finally, the Board could, in theory, decide to accept proposed conditions 4-7 notwithstanding their abrogation of the statutory scheme. Doing so would create a significant risk that any business decisions made as a result of Treasury/FFB influence would be challenged in court — with a strong likelihood of success — by parties affected by those decisions, such as unions, suppliers, or mailers. An unlawful abdication of statutory authority could also serve as “cause” for Presidential removal of the Governors. There could also be negative political consequences, in terms of public reaction and Congressional oversight or action. These risks would apply to any cession of decision-making authority by the Governors, whether to Treasury/FFB or to a private creditor.

As an adjunct to any of these four options, the Postal Service could exercise its statutory right to compel Treasury to purchase up to $2 billion in Postal Service notes (within the annual and aggregate debt ceilings), subject to certain “conditions” of the general Postal Service issuance process. It is clear that these “conditions” include fifteen days’ advance notice to Treasury and consultation with Treasury about the terms. Although there is some ambiguity in the statutory language, there is a strong argument that the Postal Service has ultimate discretion to dictate the terms of notes issued through its “put option”; otherwise, if Treasury had a right to negotiate and veto, the put option would be ineffective. See H.R. REP. No. 91-1104, at 21 (describing the option as “the right of the [Postal] Service to call upon [Treasury] to purchase up to $2 billion of its obligations,” and discussing a number of uses to which the Postal Service can put the option, without any mention of any prerogative on Treasury’s part to affect the terms). The Postal Service has not exercised this put option in its existence; all Treasury purchases have been voluntary ones under Section 2006(a). This means that the put option remains fully available, subject to the limitations imposed by the debt ceiling.

IV. CONCLUSION

I hope you find this material to be useful as you consider ongoing and impending developments in our relationship with Treasury. Of course, if you have any additional questions or concerns, or if you need additional information, then please do not hesitate to let me know.

Thomas J. Marshall

cc: Ms. Brennan
    Mr. Stroman
    Mr. Elston

12 This prospect might appear to be theoretical under the precise circumstances here, where Treasury might have the President’s support. But a subsequent President might have a different view of the situation. And even the current President might have a different perspective if the Postal Service were to agree to similar conditions offered by a private creditor. At any rate, once established, the grounds for removal would remain if this President, or a subsequent one, were later to deem it convenient to replace the Governors.
**ANALYSIS OF WHITE HOUSE TASK FORCE RECOMMENDATIONS**

### Universal Service Obligation (USO)

<table>
<thead>
<tr>
<th>Recommendation 1</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Definition:</strong> Clearly define the USO. Provide a targeted definition of minimum, essential postal services, that due to specific social and economic needs have a basis for government protection.</td>
<td>Administrative</td>
<td>Congress, PRC, USPS</td>
</tr>
</tbody>
</table>

**Notes:** The Task Force characterizes this recommendation as something for the Board of Governors to do “or [to] seek legislation to do.” To the extent that this redefinition would determine the scope of the USO, the current USO parameters are established by statute. Congress expressly reserved the power to change the USO to itself, as an issue of “broad public policy,” and declined to delegate it to the Postal Regulatory Commission (Commission). S. REP. No. 108-318, at 38-39 (2004); see also H.R. REP. No. 109-66, pt. 1, at 62-63 (2005). Thus, while the Commission might theoretically reconsider its 2008 opinion that the USO applies to all Postal Service products, Postal Regulatory Comm’n, Report on Universal Postal Service and the Postal Monopoly [hereinafter “USO Report”] 4, 23-25 (2008), any attempt to give regulatory or operational effect to that redetermination, without enabling action by Congress, would be subject to legal challenge and likely overturned. (The Commission would also face the challenge of articulating a non-arbitrary basis for revising its 2008 interpretation of the relevant statutes, which have not changed since that time.)

The current statute’s lack of guidance on an “essential”-“commercial” distinction underscores that such a change would involve a Congressional determination of public policy. The term “essential” appears only once in Title 39 in a manner relevant to the USO, in a broad reference to customers’ access to “essential postal services.” 39 U.S.C. § 403(b)(3). We are unaware of any legislative history limiting the scope of this phrase; to the contrary, the Commission has interpreted it as “rang[ing] from postal products, to mail acceptance points (such as collection boxes), to access to letter carriers who accept mail for posting, to easily accessible information.” USO Report at 19. If anything, the governing statute indicates that the USO applies to “business correspondence” no less than other forms of correspondence. 39 U.S.C. § 101(a); see also id. § 403(a) (defining the USO in terms of “written and printed matter, parcels, and like materials” generally). In enacting the Postal Accountability and Enhancement Act of 2006 (PAEA), Congress not only decided to retain these broad provisions, it also decided to treat advertising mail and other forms of “commercial” mail as equally subject to the protections of the price cap that it enacted. 39 U.S.C. § 3622(d)(2)(A). Since the existing statute demonstrates Congress’s public-policy judgment to apply the USO broadly, a decision to...
make distinctions between “essential” and “commercial” involves value distinctions that cannot be undertaken using statutory standards, and would likewise be a public-policy question for Congress.

To the extent that the recommendation is aimed at restructuring how products are classified for regulatory purposes, the Governors and Commission can only move incrementally toward the Task Force’s model without legislative changes.

The current governing statute accords different regulatory treatment to postal services based on market power: namely, the scope of the letter monopoly and the Postal Service’s pricing power, as measured by antitrust standards. 39 U.S.C. § 3642(b). The Task Force’s proposed “essential”-“commercial” distinction does not align with the statutory division, and so, unless Congress were to change the law, any attempt to reorganize product regulation would have to conform to the current statutory standards.

One possibility is that the Commission could take a closer look at localized market power within competitive products and, theoretically, could shift certain competitive product volumes (e.g., products sold in rural areas, or consumer-to-consumer shipments) to the market-dominant category. This would approximately resemble the Task Force’s vision of treating certain package-delivery products as “essential” and subject to price-cap regulation. The precedent for such an approach already exists in terms of how Post Office Boxes are classified according to levels of local competition, but the Commission has not yet extended this approach to other products. See generally Order No. 473, Order Approving Request to Transfer Selected Post Office Box Service Locations to the Competitive Product List, PRC Docket No. MC2010-20 (June 17, 2010). In doing so, the Commission would have to explain its departure from its own (or Congress’s) previous determinations that each competitive product as a whole was properly classified as such, and as noted above would have to predicate the decision on the existence of market power, not a consideration that the packages at issue are “essential.” See, e.g., 39 U.S.C. § 3631(a) (initially classifying as competitive all of “priority mail,” “expedited mail,” and other products).

Another possibility is a deregulation of “non-essential/commercial” volume by transferring it from the market-dominant product list to the competitive product list. Current statutory parameters leave little opportunity to do so, however. First, products within the scope of the letter monopoly, such as most First-Class Mail and Marketing Mail, are not eligible for transfer. 39 U.S.C. § 3642(b)(2). Second, products with statutory rate preferences (i.e., certain Periodicals, Library Mail, and nonprofit Marketing Mail) must be regulated as market-dominant; arguably, so, too, must the products against which those preferred rates are benchmarked (Outside-County Periodicals, Media Mail, and at least some regular-rate Marketing Mail). 39 U.S.C. § 3626(a)(1), (g)(4)(B). The only market-dominant mail services that fall outside of these two criteria are Marketing Mail delivered on a saturation basis with simplified addressing, Alaska Bypass Service, and certain Bound Printed Matter Flats and Parcels. In theory, the Commission could expand the range of services eligible for transfer by narrowing the definition of the letter monopoly. 39 U.S.C. § 601(c) (authorizing the Commission to promulgate “[a]ny regulations necessary to carry out” a key letter-monopoly statute);
see 39 C.F.R. § 310.1(a). But it is debatable whether such an exercise would be consistent with Congressional intent. See S. REP. NO. 108-318, at 39, 54 (2004) (characterizing Section 601 as delegating to the Commission only the power to administer the monopoly’s exceptions, and explaining Congress’s intent as reserving to itself the power to redefine the monopoly’s scope). The Postal Service has taken the position that the Commission cannot redefine the scope of the monopoly through a fundamental change to the meaning of the term “letter,” any more than it can redefine the scope of the USO.

For those products that clear the first two hurdles to transfer, the Commission could approve the transfer only if it is convinced that the Postal Service lacks pricing power. 39 U.S.C. § 3642(b)(1). The Postal Service would have to show that competing providers constrain its power over pricing and service quality. That is unlikely for Alaska Bypass Service, which was designed specifically to provide a supply line to remote areas that was otherwise absent. For document-based products like Marketing Mail and Bound Printed Matter Flats, the Commission might have to revisit its past refusal to consider electronic substitutes as part of its market-power analysis. See generally Order No. 2306, Order Denying Request, PRC Docket Nos. MC2013-57 & CP2013-75 (Dec. 23, 2014).

A third possibility is that, in the course of the Ten-Year Review or in another regulatory-review proceeding, the Commission could create an “essential”-“commercial” division within the market-dominant regulatory system, with “essential” market-dominant services subject to some form of price-cap regulation and “commercial” ones freed from price caps. To adopt that approach, the Commission would first have to decide that its review authority under 39 U.S.C. § 3622(d)(3) allows it to restructure the existing mail classes, notwithstanding a provision that ties at least the initial market-dominant rate-regulation system to the mail classes listed in the former Domestic Mail Classification Schedule (DMCS). 39 U.S.C. § 3622(d)(2)(A). (In the Ten-Year Review, we argued that the Commission has such authority. The Commission has not yet ruled on the issue.) Then the Commission would have to articulate a non-arbitrary basis for distinguishing between “essential” and “commercial” services, and for deregulating the latter, all of which would have to be squared with the objectives and factors in 39 U.S.C. § 3622(b)-(c). It is open to question whether such a distinction is consistent with the objectives and factors, given that, as noted above, an “essential”-“commercial” distinction is not reflected in the statute. The Commission would still have to determine the appropriate price-cap design for “essential” services (again based on the Section 3622 criteria), as well as how to administer the statutory rate preferences within or across the “essential” and “commercial” subcategories. These layers of legal determinations raise multiple opportunities for falling short of the Task Force’s vision and/or for legal challenge, and would considerably draw out the Ten-Year Review in any event.

Ultimately, it would be more comprehensive, effective, and certain for Congress to implement this recommendation through reform of the product-classification statutes.
### Recommendation 2

<table>
<thead>
<tr>
<th>Geographic Scope: Keep current practice, which designates that the USO includes all addresses in the country covering “the United States, its territories and possessions,” irrespective of population density.</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative</td>
<td>Congress</td>
<td></td>
</tr>
</tbody>
</table>

**Notes:** Because the Task Force proposes to maintain this aspect of the USO but apply it only to “essential” services, such a redefinition of the USO’s scope would require action by Congress, as discussed in connection with Recommendation 1 above.

At p. 42, the Task Force argues that the prices for “essential services” “should be standard, regardless from where the products are sent or delivered – similar to the current flat postage rate for First-Class Mail.” Such a requirement would actually be more restrictive, on balance, than under current law. At present, uniform-rate requirements apply only to First-Class Mail, Media Mail, and Library Mail, not to all market-dominant services, and certainly not to all services that the Task Force appears to consider “essential.” 39 U.S.C. §§ 404(c), 3683(a).

Moreover, flat postage rates are required only for Media Mail and Library Mail; First-Class Mail is not subject to a clear prohibition on distance-variable pricing, although the same price schedule must be uniformly available. See, e.g., 116 CONG. REC. 27,606 (1970) (remarks of Rep. Udall); Tentative Decision Concerning Proposals for Local and Nationwide Subclasses Within First-Class Mail, PRC Docket No. MC76-1, at 3-9 (July 15, 1977); USO Report at 30 n.10, 77-78, 117-18. But see USO Report at 139-41, 185 (assuming, for analytical purposes, that distance-variable pricing is prohibited for First-Class Mail). To be sure, some current First-Class Mail volumes might fit within the Task Force’s proposed “commercial” category and be freed from any uniformity requirements under this recommendation. But to the extent that Congress would be affirmatively prohibiting distance-variable pricing for First-Class Mail and extending that prohibition to “essential services” beyond First-Class Mail, that restriction would sweep more broadly than current requirements.
### Recommendation 3

Number and Density of Post Offices and Collection Boxes: Establish a rule that specifies that access to the postal system must only be sufficient to implement defined USO standards for delivery.

**Notes:** The Task Force identifies certain statutory parameters as responsible for the current breadth of the delivery and collection network. As noted in connection with Recommendation 1 above, Congress expressly reserved to itself, not the Commission, the power to redefine the USO. Within existing statutory parameters, there may be some room for incremental progress toward consolidating the collection network. Any large-scale consolidation would require an advisory opinion from the Commission and, potentially, favorable review of Post Office closing appeals. Ultimately, however, Congress might need to amend the governing statutory standards, such as allowing Post Offices to be closed for operating at a deficit. See 39 U.S.C. § 101(b).

It should be noted that the Task Force does not discuss the “essential”-“commercial” distinction in connection with this USO recommendation; it is thus unclear whether and how such a distinction, if enacted, might translate into different degrees of latitude with respect to access to various postal services.

### Recommendation 4

Delivery Frequency: Provide greater flexibility to determine mail and package delivery frequency.

**Notes:** Congress would have to stop including the six-day-delivery rider in annual appropriations bills. It should also be noted that the Task Force’s vision of how the Postal Service would exercise that flexibility varies according to a product or service’s status as “essential” or “commercial.” Implementation of that underlying distinction is discussed in connection with Recommendation 1 above.

### Recommendation 5

Mode of Delivery: Maintain current discretion to determine mode of delivery consistent with a financially sustainable business model.

**Notes:** This recommendation could be interpreted as saying that the Postal Service should continue exploring opportunities to increase centralized delivery, with attention to both its finances and “customer needs,” and that Congress should not interfere with such efforts. (The Commission would also need to avoid creating political
roadblocks in any advisory opinion, which the Postal Service is required to seek under current law for sufficiently large-scale, programmatic changes in service.) That said, a number of considerations have given the Postal Service pause in converting existing addresses to centralized delivery, such as the likelihood of customer and political backlash (such as the backlash in Canada that caused Canada Post to halt its own delivery-mode conversion program in 2015); the uncertain effect on the perceived value of mail and, correspondingly, on mail volume; and the fact that, over the past several years, Congress has considered several bills on centralized delivery without settling on a coherent message. See Reply Comments of the United States Postal Service, PRC Docket No. R2013-11 (Dec. 6, 2013), at 103-105. And, as noted in a recent submission to the Government Accountability Office, there are a number of significant legal issues that would arise from any widespread move to centralized delivery, independent of whether it is allowable under the USO standards.

Thus, even though this is technically within our existing legal authority, if the Postal Service decided to implement this recommendation, it would be helpful for Congress to enact legislation expressly endorsing a shift toward centralized delivery, even if it adds some procedural constraints. Indeed, to the extent that the Task Force recommends that the Postal Service “be required” to have a transparent and public process for determining delivery mode, that implies action by Congress.

Like Recommendation 3, this recommendation is not framed in terms of the Task Force’s “essential”-“commercial” service distinction, so it is unclear which products and services would be impacted by this recommendation.

<table>
<thead>
<tr>
<th>Recommendation 6</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing Standards: Keep current practices, which allow the USPS to manage processing standards.</td>
<td>Administrative</td>
<td>N/A</td>
</tr>
</tbody>
</table>

**Notes:** Like Recommendation 2, this essentially recommends maintenance of the status quo in terms of the Postal Service’s authority. The Postal Service has discretion in this area, subject to certain procedural requirements. In establishing service standards, the Postal Service must account for various objectives and factors, and it must consult with the Commission. 39 U.S.C. § 3691(a)-(c). And pursuant to 39 U.S.C. § 3661, the Postal Service must request an advisory opinion from the Commission before making a change in the nature of postal services on a nationwide or substantially nationwide basis.

But note that Recommendation 22 would appear to give the Commission the power to overrule the Postal Service’s establishment of service standards. The Task Force does not reconcile this apparent tension.
Recommendation 7

| USO Funding: Review and determine if income generated by activities defined to be outside of the USO could be optimized to cover the costs of funding the USO. |
|---|---|---|
| Policy Action, per Task Force | Law Department |
| Administrative | Congress, PRC, USPS |

Notes: As the letter monopoly’s value has declined, the Postal Service has been aggressive in raising revenue from competitive products to contribute toward the institutional costs of the USO, and in seeking reform of the market-dominant rate-regulation system to provide more revenue-generating authority. The Task Force’s recommendation appears to be tied not to the existing legal framework, however, but to the Task Force’s vision of a redefined USO that does not apply to “products and activities not deemed essential services.” If postal products were to be reclassified per Recommendation 1 (which we consider to require Congressional action), then the Commission would structure the regulatory system for “commercial” services to maximize the Postal Service’s ability to generate revenue, and the Postal Service would be responsible for making full use of that authority (and for controlling “commercial” services’ costs to improve contribution). See Recommendation 1.

Mail and Package Markets

Recommendation 8

| Business Model: Develop a new model that can be used to both set rates and control costs to achieve sustainability. |
|---|---|---|
| Policy Action, per Task Force | Law Department |
| Administrative | PRC, USPS |

Notes: The discussion in this portion of the Task Force report (pp. 50-51) is unclear, but it appears that the Task Force is recommending that, until a reclassification along “essential”-“commercial” lines can be conducted (see Recommendation 1), the Commission should do what it can through the Ten-Year Review to allow net-income maximization for “commercial” market-dominant services. The Task Force opines that many market-dominant services – ones that it appears to deem “commercial,” as well as governmental communications (which it elsewhere typifies as “essential”) – are fundamentally price-inelastic and could bear at least “modest price increases” to “boost overall mail revenue” and “increase the USPS’s net income.” While we have likewise advocated in the Ten-Year Review that the Commission can and should eliminate the price cap, our position applies to all market-dominant products, not just “commercial” ones. For a discussion of the issues in developing an “essential”-“commercial” distinction via the Ten-Year Review, see the discussion of Recommendation 1 above.
The Task Force does not explain the “control costs” language in the recommendation. To the extent that this can be interpreted as urging the Postal Service and/or Commission to do more to control costs, see Recommendations 21 and 22.

**Recommendation 9**

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative</td>
<td>Congress, PRC, USPS</td>
</tr>
</tbody>
</table>

**Business Model:** Require price increases, reduce service costs, or exit the business for any mail products that are not deemed an essential service and do not cover their direct costs.

**Notes:** The Task Force recommends abolishing the price cap on “non-essential services,” including Marketing Mail, while shifting certain competitive package volumes into the realm of (capped) “essential services.” See Recommendation 1. As the Postal Service has argued in the Ten-Year Review and elsewhere, a price-cap system provides little incentive to devote limited pricing authority to “underwater” products with rapidly declining volume, as the resulting price increases will not yield as much overall net income as would increases to other, more stable products. Without a price cap, there may be ways to address the situation that do not sacrifice overall remuneration.

The Task Force also recommends that the Postal Service be required to price “non-essential services” at a “market rate” (p. 51). It is not apparent that such a requirement would conform to the statutory pricing criteria in 39 U.S.C. §§ 3622(b)-(c) and 3633(a)(1)-(3). Reform of these criteria would require Congressional action. To the extent that this aspect of the recommendation seeks prices that are artificially pegged to competitors’ prices, rather than reflecting intrinsic cost and demand factors, see Recommendation 14 below.

**Recommendation 10**

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative</td>
<td>Congress, PRC, USPS</td>
</tr>
</tbody>
</table>

**Product Classes:** Redefine mail classes by creating products defined by the type of sender and the declared purpose of the mail item.

**Notes:** The Postal Service has sought more extensive authority from the Commission to redefine market-dominant product classes as part of the 10-Year Review. However, see Recommendation 1 concerning the extent to which such a redefinition could be used to effectuate the Task Force’s “essential”-“commercial” distinction. With respect to competitive products, the Postal Service has broad authority to define and categorize products, subject to Commission review.
<table>

<tr>
<th>Recommendation 11</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Product Classes:</strong> Change USPS systems in order to track the purposes and uses of mail, to allow for better cost allocation, targeted pricing, and more business intelligence.</td>
<td>Administrative</td>
<td>USPS</td>
</tr>
</tbody>
</table>

**Notes:** This recommendation aims at mining Household Diary Survey responses to guide business decisions aimed at improving the value that senders and recipients place in the mail. It is not clear what the Task Force’s reference to cost allocation means in this context.

<table>
<thead>
<tr>
<th>Recommendation 12</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Strategic Options:</strong> Evaluate areas of USPS operations where the USPS could expand third party relationships in order to provide services in a more cost efficient manner (e.g., mid-stream logistics and processing).</td>
<td>Administrative</td>
<td>USPS, PRC</td>
</tr>
</tbody>
</table>

**Notes:** The Postal Service could perform this evaluation. If any expansion of third-party relationships involves new workshare discounts or changes to existing workshare discounts, the Commission would need to approve the discount levels. New forms of outsourcing may also require consultation and/or bargaining with postal labor organizations.

Even if the Postal Service can manage to scale down its in-house operations, there would be a delay in capturing labor-cost savings, due to the existence (and likely persistence, given the nature of binding arbitration) of no-layoff clauses in collective bargaining agreements and the resulting need to rely on attrition for workforce reduction.

<thead>
<tr>
<th>Recommendation 13</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Strategic Options:</strong> As a means of generating more income, the mailbox monopoly could be monetized.</td>
<td>Administrative</td>
<td>USPS, PRC</td>
</tr>
</tbody>
</table>

**Notes:** The mailbox monopoly statute, 18 U.S.C. § 1725, requires payment of postage on all mailable items placed in mailboxes. In theory, the Postal Service could establish special “postage” classifications and rates for items delivered by qualifying third-party delivery providers. The Commission would have to approve these classifications and rates.

Such a move would affect other public benefits that the mailbox monopoly provides, however, particularly the secure, efficient provision of universal service. The mailbox monopoly does not merely protect revenue to support the
USO. By channeling mailbox deliveries to a single universal service provider, it promotes efficient mail delivery: there is room in mailboxes for letter carriers to deliver, and carriers do not need to spend time at each mailbox distinguishing collection mailpieces from alternative-delivery mailpieces. The mailbox monopoly also protects the security of the mails, by giving recipients a stable expectation as to who can legitimately access a mailbox and who might warrant suspicion. That assurance of security, in turn, provides value to the “brand” of the mail. Opening mailbox access, even via franchising, could negatively impact both of these current benefits, as well as delivery costs and revenue.

To mitigate these potential harms, the Postal Service could attempt to impose and administer rigorous brand-protection and oversight measures in its franchise agreements. In doing so, however, it could face complaints of unreasonable discrimination under 39 U.S.C. § 403(c) or unfair preclusion of competition under 39 U.S.C. § 404a(1) and/or fair-competition statutes. See 39 U.S.C. §§ 404a(c), 409(d)-(e), 3622(a). The Task Force does not address these potential business and legal impacts, which would require further study before implementing its recommendation.

### Recommendation 14

<table>
<thead>
<tr>
<th>Strategic Options: Price competitive products in a manner that maximizes revenues and generates income that can be used to fund capital expenditures and long-term liabilities.</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative</td>
<td>USPS, PRC</td>
<td></td>
</tr>
</tbody>
</table>

**Notes:** This recommendation is at odds with the Task Force’s acknowledgment of the Postal Service’s competitive-product revenue and contribution growth since the PAEA, consistent with the PAEA’s aim of allowing the Postal Service to compete more effectively in the competitive marketplace and therefore grow competitive-product revenue and retain earnings. Additionally, the Task Force does not explain how competitive products can be priced substantially higher, since, by definition, they are products for which the market constrains the Postal Service’s pricing power. 39 U.S.C. § 3642(b)(1). (The Task Force explains that the Postal Service “has a dominant market position in B2C e-commerce segments” (p. 53), but also recognizes that “there are limits to how much consumers are willing to pay for delivery” and that “e-commerce consumers remain highly sensitive to delivery costs” (p. 50)).

Alternatively, the Task Force recommends that the Postal Service consider, in its pricing decisions, “the potential market distortions that could drive industry participants out of the market” (p. 54). (It should be noted that, of the three major package and express delivery providers, the Postal Service holds the smallest share of the overall market when measured by revenue.) This consideration is not properly aimed at the Postal Service, whose pricing decisions are designed to maximize revenue to support the USO and its other statutory obligations, rather than to preserve its competitors’ market position. Safeguarding the overall health of the market is an object of regulation by the Commission, the Federal Trade Commission, or the Department of Justice’s Antitrust Division. Those authorities would
test for competitive fairness by looking not merely at differing price levels, which may reflect underlying cost or demand factors, but at whether prices cover marginal and incremental costs. See Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339-40 (1990).

Moreover, to the extent that this recommendation implies that the Postal Service’s prices should be higher, not for reasons of economic self-interest, but to protect competitors, that sort of artificial price increase would itself distort the market and harm the public policy interests of consumers. Various laws concerning fair competition, which apply to the Postal Service as well as its competitors, protect competition, not particular competitors, Brown Shoe Co. v. United States, 370 U.S. 294, 320 (1962), and they do not require a firm to make decisions based on ensuring the well-being of existing competitors. Doing so could actually draw antitrust scrutiny.

In theory, Congress could amend the relevant statutes to effectuate the Task Force’s recommendation. However, it is unclear how the Postal Service could practically resolve the internal tension between protecting competitors and maximizing revenue to fund the USO, if artificially raising prices has the effect of driving down volume and overall revenue. Such an amendment would mark a departure from the PAEA’s treatment of the Postal Service as a self-interested business actor on par with its private-sector peers.

It should be noted that this recommendation is framed in terms of the existing competitive-product category. It is unclear how it would bear on a potential future reclassification based on social policy rather than market power.

<table>
<thead>
<tr>
<th>Recommendation 15</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Costing Options: Develop a new cost allocation model to establish full price transparency and fully distribute costs.</td>
<td>Administrative</td>
<td>Congress</td>
</tr>
</tbody>
</table>

Notes: With respect to cost allocation, the recommendation could theoretically be fulfilled in one of two ways: full attribution of costs to products, or maintenance of some costs as non-attributable (or “institutional”) while apportioning explicit responsibility for covering them to competitive and market-dominant products.

Implementation of fully-distributed costing through cost attribution would require legislative change. Current law requires costs to be attributed on the basis of “reliably identified causal relationships.” 39 U.S.C. §§ 3622(c)(2), 3631(b); see Dep’t of the Treasury, Accounting Principles and Practices for the Operation of the United States Postal Service’s Competitive Products Fund 7 (2007) (“This definition is consistent with the economic costing approach of the current USPS cost system.”). It is well-established in the regulatory, economic, and legal communities that fully-distributed costing is fundamentally arbitrary, meaning that the Commission cannot adopt it in administering its statutory framework. See, e.g., Nat’l Ass’n of Greeting Card Publishers v. U.S. Postal Serv., 462 U.S. 810 (1983); S. Rep. No. 108-318, at 10, 30 (2004) (explaining statutory standard as codifying Greeting Card Publishers, and rejecting full cost attribution “or any other arbitrary percentage”). Therefore, fully-distributed costing would require Congress to abolish
the current, longstanding, and theoretically sound cost-attribution standard in favor of an arbitrary one. In doing so, Congress would be resurrecting a practice that was identified as a leading cause of inefficient pricing at the time of the Postal Reorganization Act, which rejected the practice. S. REP. No. 91-912, at 17 (1970); see also Towards Postal Excellence: The Report of the President’s Commission on Postal Organization 30-31, 133-35 (1968), available at https://go.usa.gov/xQMHm. As a court recently articulated, the Commission’s role “is to carry out the particulars of the scheme Congress created, not to engineer specific market outcomes.” United Parcel Serv., Inc. v. Postal Regulatory Comm’n, 890 F.3d 1053, 1067 (D.C. Cir. 2018). Contrary to the Task Force’s statements, the current system set forth by the PAEA fully protects against cross-subsidization.

Implementation of fully-distributed costing through apportionment of institutional costs would likewise require statutory change, or a significant departure from recent Commission precedent. The Commission must periodically review the “appropriate share” of institutional costs that competitive products must cover. 39 U.S.C. § 3633(a)(3), (b). In doing so, the Commission must “consider all relevant circumstances, including the prevailing competitive conditions in the market, and the degree to which any costs are uniquely or disproportionately associated with any competitive products.” Id. § 3633(b). The Commission must also consider a 2007 Federal Trade Commission (FTC) report on the laws that advantage or disadvantage the Postal Service’s offering of competitive products, as well as any subsequent events that affect the validity of the FTC’s estimates. Pub. L. No. 109-435, § 703(d), 120 Stat. 3198, 3244 (2006). The FTC concluded that the Postal Service suffers an enormous net competitive disadvantage. Fed. Trade Comm’n, Accounting for Laws That Apply Differently to the United States Postal Service and Its Private Competitors 64 (2007), https://go.usa.gov/xQMu9. In an ongoing review proceeding, the Commission has rejected a competitor’s proposals that would apportion responsibility for institutional costs according to competitive products’ share of total revenue or total attributable costs, on the basis that such proposals fail to account for competitive conditions, as required by statute, and amount to an effort to implement arbitrary cost attribution notwithstanding the statute’s reliable-causation requirement. Order No. 4402, Notice of Proposed Rulemaking to Evaluate the Institutional Cost Contribution Requirement for Competitive Products, PRC Docket No. RM2017-1 (Feb. 8, 2018), at 81-82. While the Commission might have some leeway to distinguish a future “appropriate share” proposal from the ones that it recently rejected, it might be difficult for it to explain a reversal of its longstanding rejection of fully-distributed costing in a way that would withstand legal challenge. Here, too, legislative change would likely be necessary for the Commission to adopt an arbitrary cost-allocation method.

The Task Force does not explain what it means by “full price transparency.” It is possible that this is simply another way of saying that costs should be fully distributed and “transparently” reflected in prices. However, the Task Force also asserts (p. 54) that negotiated service agreements (NSAs) make unfair distinctions between customers. If the intent is to require the publication of all NSA terms to give customers and competitors more leverage, then that would require a change to the statutory standards that govern confidentiality at the Commission. 39 U.S.C. § 504(g);
see also id. § 410(c)(2). Those standards give the Commission discretion to balance commercial injury to the Postal Service against the public interest in disclosure, but they clearly contemplate that some commercially sensitive information be protected from public disclosure. See H.R. REP. No. 109-66, pt. 1 at 61; S. REP. NO. 108-318, at 20, 47-48. Courts have recognized that negotiated price information warrants this protection, as it would not be disclosed as a matter of good business practice. See generally Wickwire Gavin v. U.S. Postal Serv., 356 F.3d 588 (4th Cir. 2004). Moreover, forcing or encouraging the Postal Service alone to disclose negotiated pricing would itself distort the market, since competitors and customers are not required to make similar disclosures. The current level of protection levels the playing field, while ensuring that the Commission (and counsel and consultants for parties appearing before the Commission) has the necessary information to regulate effectively. A change of the kind that the Task Force appears to advocate would accordingly be inconsistent with the intent of the Congress in the PAEA to enable the Postal Service to compete fairly in the package marketplace. See H.R. REP. No. 109-66, pt. 1 at 44 (announcing intent to create level playing field, not one tilted against the Postal Service); S. REP. NO. 108-318 at 14 (same).

Recommendation 16

Costing Options: Establish a separate balance sheet for packages to help prevent cross-subsidization between the mail and package business units.

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative</td>
<td>Congress, PRC</td>
</tr>
</tbody>
</table>

Notes: It is not clear how this recommendation would “help prevent cross-subsidization.” As explained in connection with Recommendations 14 and 15 above, guarding against cross-subsidies involves measuring prices against costs, not the assets and liabilities reflected on a balance sheet.

Current law already separates accounts for competitive products and all other products. 39 U.S.C. §§ 2003, 2011. Historically, the Treasury Department has favored a simplified accounting of competitive-product assets, apportioning total assets by competitive products’ cost of revenue. Dep’t of the Treasury, Accounting Principles and Practices for the Operation of the United States Postal Service’s Competitive Products Fund 25-27, 34 (2007). While a comprehensive study of each asset’s usage and each liability’s origin is theoretically possible, the Treasury Department deemed such an exercise to be unduly complicated. Id.

Before the Commission could adopt a different approach to asset assignment, it would have to determine that that approach would yield a greater allocation of assets to competitive products. 39 U.S.C. § 2011(e)(5). The PAEA does not specify a test for assignment of liabilities, although the 2007 Treasury Department report noted that liabilities would be more complicated to assign than assets. The Commission would also have to ensure that its measurement methodologies and assumptions are not arbitrary. Id. § 503; see 5 U.S.C. § 706(2)(A). Such an exercise would raise similar issues to fully-distributed costing and might ultimately require Congressional action. See Recommendation 15.
The Treasury Department’s statutory role in competitive-product accounting is limited to the issuance of the 2007 report to inform the Commission’s initial accounting rules. 39 U.S.C. § 2011(h)(1), (h)(2)(A)-(B). While the Commission may revisit its rules from time to time, id. § 2011(h)(2)(C)(ii), there is no provision for the Treasury Department to revisit its initial recommendations. That said, there is arguably no bar to the Treasury Department doing so voluntarily, or to the Commission using any new Treasury Department recommendations as a basis for its own consideration of revisions to the rules. The Treasury Department could also, as an “interested party,” petition the Commission to initiate a revisionary rulemaking. Id.

Operating Model

<table>
<thead>
<tr>
<th>Recommendation 17</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operations: Align USPS employee rights with other federal employee rights by eliminating collective bargaining over compensation for USPS employees.</td>
<td>Legislative</td>
<td>Congress, USPS</td>
</tr>
</tbody>
</table>

Notes: The Task Force’s idea is that postal employees should be subject to the General Schedule pay system for Federal employees, and that they would be unable to bargain over compensation. As the Task Force recognizes, Congress would have to make the Postal Service subject to the Federal Service Labor-Management Relations Statute (FSLMRS), rather than the National Labor Relations Act. That step alone would not necessarily end bargaining over compensation, however. Congress would also have to make the General Schedule and related pay rules (or any successor statutes) specifically applicable to the Postal Service. Without that additional step, compensation would qualify, by default, as a condition of employment subject to bargaining. See Fort Stewart Sch. v. Fed. Labor Relations Auth., 495 U.S. 641, 641 (1990). (Despite the general rule that agencies subject to the FSLMRS do not bargain over compensation, at least seven Federal agencies’ employees do bargain over compensation as a result of specific statutory language or a judicial or administrative decision. See Cong. Res. Serv., No. 7-5700, Collective Bargaining and the Federal Service Labor-Management Relations Statute: Selected Legal Issues 3 (2017), https://fas.org/sgp/crs/misc/R44794.pdf.)

In the meantime, the Task Force recommends that the Postal Service do what it can to that effect within its existing authority. With respect to bargaining-unit employees, this would require agreement by the unions or labor arbitrators. With respect to non-bargaining-unit employees, it would require consultation with postmaster/supervisor organizations.
### Recommendation 18

<table>
<thead>
<tr>
<th>Operations:</th>
<th>Pursue reforms to USPS employee wages consistent with those proposed for the broader federal workforce in the President’s Management Agenda.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Legislative</td>
<td>Congress, USPS</td>
</tr>
</tbody>
</table>

**Notes:** The President’s Management Agenda proposes enhancement of performance-based pay incentives and a slowing of tenure-based step increases. Off. of Mgmt. & Budget, President’s Management Agenda 18-19 (2018), [https://go.usa.gov/xEa9Z](https://go.usa.gov/xEa9Z). In theory, the Postal Service could seek similar reforms through collective bargaining. However, any impasse would be resolved through binding arbitration, a process that structurally favors the precedent of prior arbitral awards and collective bargaining agreements. 39 U.S.C. § 1207. It should be noted that non-bargaining-unit employees are already subject to a performance-based pay system that does not include step increases.

In terms of non-wage compensation (see page 61), the Agenda refers to proposed pension reforms in the President’s Budget, which would reduce benefits expense and increase employees’ share of the funding obligation. Id. at 19; Off. of Mgmt. & Budget, Budget of the U.S. Government, Fiscal Year 2019: Major Savings and Reforms 181, 183-84 (2018) [hereinafter “FY2019 Major Savings & Reforms”], [https://go.usa.gov/xPJPZ](https://go.usa.gov/xPJPZ). These reforms concern structural aspects of the Federal pension system and would require legislative change.

### Recommendation 19

<table>
<thead>
<tr>
<th>Operations:</th>
<th>Explore and implement new business lines that generate revenue, and that present no balance sheet risk to the USPS.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Legislative</td>
<td>Congress, USPS</td>
</tr>
</tbody>
</table>

**Notes:** The Task Force (at page 61) recommends that the Postal Service be allowed (a) to “explore supplying [certain] services for Federal, State, and local government entities,” (b) to “convert[ ] post offices into contract post offices,” (c) to “co-locat[e] with . . . complementary retail establishments,” and (d) to “rent[ ] space to complementary retail establishments.”

Item (a): The Postal Service currently can partner with Federal agencies to offer new services. 39 U.S.C. § 411. An expansion of that authority to include state, local, and tribal agencies would require legislative change.

Item (b): The Postal Service is already authorized to manage its retail network, contracts, and properties. *Id.* §§ 401(3)-(5), 404(a)(3). That authority is subject to procedural and substantive limitations, however. The Postal Service cannot close any Post Office solely for operating at a loss, and, in its closing decisions, it may not consider compliance with the Occupational Health and Safety Act of 1970. *Id.* §§ 101(d), 404(d)(2)(B). The Postal Service must also comply with public notice requirements, consider certain factors, and ensure that its decision is non-arbitrary and
evidence-based. Id. § 404(d)(1)-(5). In addition, expansion of outsourcing could require collective bargaining, consultation, and/or binding arbitration with postal labor organizations, as discussed in connection with Recommendation 12 above. To the extent that this recommendation entails expanding the Postal Service’s ability to close Post Offices and outsource bargaining-unit work beyond current legal bounds, such recommendation would require legislative change.

Item (c): The Postal Service’s existing authority to contract and lease would allow it lease space in non-Postal-Service-owned property. 39 U.S.C. § 401(3)-(5). To the extent that the Task Force envisions shifting bargaining-unit work to the business partner’s employees, the same labor considerations would come into play as for item (b).

Item (d): The Postal Service already has authority to lease its real property assets to private entities. Id.; Order No. 154, Review of Nonpostal Services Under the Postal Accountability and Enhancement Act, PRC Docket No. MC2008-1 (Dec. 19, 2008), at 64-68. Its ability to do so is limited by the fact that Postal Service real estate holdings must, in the first instance, be “necessary or convenient in the transaction of its business.” 39 U.S.C. § 401(5). In other words, the Postal Service must generally aim to align space with the operational requirements of offering postal services, with revenue-generating out-leasing relegated to a secondary use of excess space (to the extent that market opportunities exist). See Order No. 154 at 64-68. If the Task Force envisions expanding the Postal Service’s ability to hold real estate with the primary aim of generating revenue from out-leasing, that would likely require legislative change.

**Recommendation 20**

<table>
<thead>
<tr>
<th>Governance and Oversight: Strengthen the governance and regulatory oversight of USPS. This could be achieved through reforming, but maintaining, the existing institutional structures or by changing the institutional structures, which would require legislation.</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Legislative</td>
<td>USPS, Congress</td>
<td></td>
</tr>
</tbody>
</table>

**Notes:** It is not clear what is intended with this recommendation, as distinct from Recommendations 21 and 22. However, as discussed below, the Board of Governors and the Commission could make strategic decisions within the scope of their existing authority that could be interpreted as strengthening governance and regulatory oversight, respectively. As the recommendation recognizes, any changes to existing institutional structures would require legislation.

To the extent that this recommendation corresponds to the report’s discussion of the currently low complement of sitting Governors (pages 61-62), appointment of additional Governors would require action by both the President and the Senate. 39 U.S.C. § 202(a)(1).
Recommendation 21

Governance and Oversight: Institute a new policy mandate for management that sets organizational direction and financial targets, which align with a sustainable business model and establish an enforcement mechanism if the existing Board is unable to meet these targets.

| Notes: | The Board of Governors could set a new organizational direction and financial targets. (Earlier in the report, the Task Force described creating a new policy mandate as a task for the Board.) Congress could set its own parameters, although doing so would usurp discretion currently held by the Board. Only Congress can establish an “enforcement mechanism,” in the sense of turning control over to the Commission.

However, the Task Force recognizes elsewhere that legislative and regulatory action is needed to establish a sustainable business model and avoid a liquidity crisis (p. 4; see, e.g., Recommendations 8, 17, 18, 19, 23, 24, and 25). Given the statutory constraints on the Postal Service’s ability to improve its financial health, it is unclear how reasonable or effective sustainability-oriented financial targets can be unless and until legislative and regulatory reforms give the Postal Service more control over costs and revenue. |

Recommendation 22

Governance and Oversight: Strengthen the regulatory oversight role of the PRC, providing the PRC with expanded controls, imposing increased accountability on the USPS.

| Notes: | From the discussion at p. 62, it seems that the Task Force envisions allowing the Commission to overturn and dictate Postal Service decisions on service standards, operations, and capital investments. (The Task Force does not explain how this recommendation aligns with Recommendations 3-6, which advocate for preserving or expanding the Postal Service’s operational discretion.)

Existing law may already allow the Commission more authority in these areas than it has historically exercised. The Commission arguably has broad authority to order remedies upon finding a lack of Postal Service compliance with certain statutory requirements, and that authority could be brought to bear on service, operational, and investment decisions. 39 U.S.C. §§ 3653(c), 3662, 3691(d). (However, we would read the scope of the Commission’s remedial |
authority in a more limited fashion.) To date, the Commission has been reticent to exercise what may arguably be the full extent of that authority, preferring to conduct inquiries and require reporting on the Postal Service’s self-directed remedial efforts. In the Ten-Year Review, the Commission has also proposed to design the rate-regulation system in a way that disincentivizes the Postal Service from downgrading service standards. Order No. 4258, Notice of Proposed Rulemaking for the System for Regulating Rates and Classes for Market Dominant Products, PRC Docket No. RM2017-3 (Dec. 1, 2017), at 70-73. And some commenters have urged the Commission to discount the Postal Service’s rate authority on account of investments that the Commission deems imprudent. While the Commission has historically shied away from using its authority in that fashion, doing so would arguably be within its statutory authority over the rate-regulation system.

Thus, the Task Force recommendation could spur the Commission to use its existing remedial and regulatory authorities more aggressively. If it did not do so, or if some additional enforcement powers were deemed desirable, Congress could amend the statute to that effect.

<td><strong>Benefits:</strong> Pursue reform of the Federal Employee Retirement System (FERS) that would increase employee contributions and move toward a defined contribution system.</td>
<td>Legislative</td>
<td>Congress</td>
</tr>
<tr>
<td><strong>Notes:</strong> Currently, FERS employees contribute 0.8 to 4.4 percent of basic pay, depending on position and time of hire. The Administration has proposed to increase FERS employees’ contribution rates by 1 percentage point per year, until</td>
<td>Id.</td>
<td></td>
</tr>
</tbody>
</table>
all are contributing half of the normal-cost percentage of their basic pay (i.e., 7.25 percent, under the current normal-cost percentage). The Administration has also proposed reducing FERS’s liability by eliminating annuity supplements and cost-of-living adjustments and basing annuity calculations on employees’ “high-5” average salary, instead of the current “high-3” calculation. See Letter from Jeff T.H. Pon, Director, Office of Personnel Management, to Paul D. Ryan, Speaker, House of Representatives, May 4, 2018, http://tiny.cc/OPM-FERS-proposal-letter; OMB, FY2019 Major Savings & Reforms at 181, 183-84.

<table>
<thead>
<tr>
<th>Recommendation 25</th>
<th>Policy Action, per Task Force</th>
<th>Responsible Party, per Law Department</th>
</tr>
</thead>
<tbody>
<tr>
<td>Benefits: Maintain but restructure the retiree health benefits liability, including the $43 billion in pre-funding payments that the USPS failed to pay into the Postal Service Retiree Health Benefits Fund (PSRHBF) and the unfunded actuarial liability, with the total liability re-amortized with a new actuarial calculation based on the population of employees at or near retirement age.</td>
<td>Legislative</td>
<td>Congress</td>
</tr>
</tbody>
</table>

**Notes:** The Task Force proposes to change how the actuarial liability is calculated, which would affect the Postal Service’s annual prefunding payments to the (PSRHBF). It would not change the actual benefits that postal annuitants are eligible for, the payment of which are ultimately the responsibility of the Postal Service under the statute, either through payments to the PSRBF or through direct premium payments if the assets in the PSRHBF are exhausted.

8.8% is the appropriate competitive share target for 2019
Part 2
Overview of Postal Service Costing
USPS is a multi-product firm in a network industry and has many common costs

Terms used by Regulatory framework

- **Attributable Costs**
- **Institutional Costs**
- **Contribution**
- **Cost Coverage**

- Attributable Costs represent the costs that would go away if the entire product went away
- Institutional Costs are common costs not caused by individual products (e.g. network costs which arise in delivery, transportation, and retail)
- Contribution is Revenue minus Attributable Costs
- Cost Coverage is Revenue divided by Attributable Costs

Market Dominant – Allocate CPI to products in a class to maximize contribution from growing products
Competitive – Price increase not capped but subject to a floor to cover costs
Part 3

Market Dominant

Overview of Market Dominant Products
First-Class Presort letters accounted for 63% of all domestic FCM volume in FY18. With a total contribution of $9.3B or 30% of institutional costs.

Marketing Mail letters accounted for 60% of all Marketing Mail volume in FY18. With a total contribution of $4.7B or 15% of institutional costs.

Outside County Periodicals made up 90% of all Periodicals volume in FY18. BPM Flats accounted for 41% of all Package Services volume in FY18. With a total contribution of $65M or 0.2% of institutional costs.

P.O. Boxes generated $288M revenue in FY2018 increasing 3.2% over FY17.

CONFIDENTIAL – Not for Distribution
Part 3b
Market Dominant Price Considerations
Market Dominant Price Considerations

Market Dominant pricing requires careful balancing of multiple constraints and inputs which limits flexibility

**Improve revenue and contribution outcome**

- Assign more cap products with lower price elasticity and stronger growth rates
- Design Promotions to enhance value of mail
- Modify signals we send industry relative to value of work-sharing
- Monitor impact on stakeholders, mail service providers, consolidators, catalog mailers, etc.

Mailers can switch between product offerings

Mailers can choose alternate media or transactional alternatives

**Adhere to statutory and regulatory constraints**

- Fair and Equitable
  - Implies one product should not shoulder all of the increase
- Just and Reasonable
  - Changes of unequal magnitude are not prohibited
- No undue or unreasonable discrimination
  - Cannot discriminate without reasonable justification
- Address workshare discounts as directed by the Postal Regulatory Commission (PRC)
- Address Underwater products

Statutory language discourages dramatic departure from norm

**PRC received over 180 responses to USPS petition to change Nonprofit calculation**
Market Dominant Price Cap

- Cannot exceed change in Consumer Price Index – Urban (CPI-U)
- Market Dominant price increases are capped at CLASS LEVEL
- Uses previous 4 quarters of volume to calculate price change

August CPI Available mid-Sept Used for January Adjustment

Available Cap Authority Resets After Filing
STRESS COMMITMENT TO INDUSTRY NEEDED FOR PROGRAMMING CHANGES
Back pocket risks of OCT12 or later bog date
Part 4
Overview of Competitive Products
Priority Mail
- Flagship product for the Postal Service, providing expedited delivery of packages, with a suite of flat rate products
- Provided $9.1B in revenue, $2.1B in contribution, and 1.073B pieces in FY18
- +3.3% CAGR from FY16-FY18.

First-Class Package Service
- Fast growing offering for lightweight (under one pound) parcels, offering expedited, end-to-end service.
- Provided $3.9B in revenue, $1.178B in contribution, and 1.271B pieces in FY18.
- +11.2% CAGR from FY16-FY18

Parcel Select Heavyweight
- Often referred to as the Postal Service’s “last mile” product, often used by competitors and large shippers such as FedEx, UPS and Amazon
- Provided $3.828B in revenue, $2.029B in contribution, and 1.1B pieces in FY18.
- +12.0% CAGR from FY16-FY18

Parcel Select Lightweight
- This product is the lightweight, under one-pound, “last mile” product, also used primarily by competitors and large shippers.
- Provided $2.580B in revenue, $989M in contribution, and 1.183B pieces in FY18.
- +12.9% CAGR from FY16-FY18
Part 4a

Product Comparison

USPS-20-1215-A-003027
Key Point: Prices reflect intensified competition in the marketplace – competitors increased focus on areas of USPS traditional strength

1. FedEx, UPS and Amazon are all expanding delivery – 7 Day, insourcing and expanding reach

3. Competition is more aggressive
   • FedEx One Rate – targeting PM Flat rate
   • DIM factor increase
   • Amazon delivery options

4. USPS access advantage is being challenged
Parcel Select Volume

FY2019 July YTD – 93% of the Postal Service’s Parcel Select volume originated from four companies

CONFIDENTIAL – Not for Distribution
Part 4b
Competitive Pricing Considerations
Competitive Pricing Considerations

Market Scans
- Compare competitor-published rate charts
  - Incorporate market intelligence on discounts and surcharges
  - Anticipate future price increase
- Compare service promise and service performance
- Compare customer perceptions and brand health
- Monitor earnings calls of competitors, large customers, and partners
- Track market share trends

Estimate competitor cost to deliver

Anticipate customer reaction to price increase
- Econometric models to estimate elasticity
- One-on-one discussions
- Market research on value of goods

Leverage competitive advantages
- Every house every day
- Lightweight items
- Economies of delivery density

Consider impact on Negotiated Service Agreements
**Competitive Pricing Timeline**

- **Make Recommendations**: Sept 16, 2019
- **Governors Vote**: Oct 03
- **Expected PRC Decision**: Nov 12*
- **File with PRC**: Oct 09
- **Implementation (Sunday)**: Jan 26, 2020

- Committed to give industry 60 days’ notice
- Mindful of timing of competitor announcements
  - Range from September to October
  - Law requires at least 30 days’ notice
  - PRC usually issues a decision within 30 days
- Expected revenue from price change = ~$500 Million
- Every month delay reduces revenue by ~$40 Million

* Delayed due to holiday

**STRESS NOTICE IS IMPORTANT DUE TO STRUCTURAL CHANGES**
Part 5
Negotiated Service Agreements Overview
Negotiated Service Agreements (NSAs)

Offered to gain new business because of price or other key customer needs, or to preserve existing business facing threat from competitors

- Marketplace expectation ("no one pays published")
- Strategically price to win wanted business, and price out unwanted business
- Bundle products into one agreement (e.g. First-Class Package Service & Priority Mail)
- Create volume commitments
- Value-added insights to the customer through data analytics
- Ability to create solutions
  - Sunday delivery
  - Packaging
  - Deferred payment or payment terms
  - Guarantee – transit time, loss/damage
  - Special services

INDUSTRY NORM
Governors establish all rates not of general applicability, which includes NSAs

Governors’ Decision 19-1 authorizes management to enter into domestic and international competitive product NSAs that:
- Cover their attributable costs and require the CFO or designee to certify each NSA, the cost coverage, and the internal approval process presented to and approved by Governors, has been followed
- Requires all necessary regulatory filings with PRC
- Requires semiannual reporting to Governors of the cost coverage for each NSA authorized under this decision

Management has developed extensive cross-functional process to manage the negotiation, financial certification, and filing of NSAs
Part 6

Universal Postal Union (UPU)
Exit
UPU: Background for Withdrawal

- FY2018 International Mail
  - Volume: 0.9B
  - Revenue: $2.6B
  - Contribution: $589M

- The UPU is a specialized United Nations agency made up of 192 members that facilitates the exchange of international mail.

- Administration announced self-declared rates within the UPU or withdrawal.

- The UPU rate system for small packets creates economic distortions which allow foreign producers to ship goods across USA at a lower price than US domestic postage rates.

- The UPU is currently revisiting and expediting the consideration of a replacement for the Terminal Dues System for small packets.

Significant price increases will materially impact future financial results.
UPU Withdrawal: Pricing Impacts

USPS will charge self-declared rates for import small packets whether we stay in the UPU or whether we exit.

Proposed self-declared rates will:

• Cover their attributable costs
• Be consistent with the policies expressed in and reforms sought by the Presidential Memorandum, to include domestic parity
• Require unprecedented price increases for small packets imports from foreign postal operators: 142% to 251%

Impact of proposed price changes:

• Anticipate significant declines in import volumes
• Import revenue on retained volume increases
• Contribution improves for import
• Assumes USPS can effectively eliminate the costs associated with volume declines
• Contribution declines for Export
• Foreign posts will likely reciprocate and increase their delivery charges for E-Format items in a similarly aggressive fashion
• Costs for USPS export items will increase and contribution will decline significantly
Attributable Costs are Incremental Costs
Represent the cost that would go away if the entire product went away

Direct Labor
Cost of labor handling a product

Indirect Cost
Supervision, vehicle, equipment, and facility-related costs

Product Specific
Advertising
Terminology: Institutional Costs

Institutional costs include:
- Common costs not caused by individual products
- Traditional fixed costs
- Network costs which arise in delivery, transportation, and retail

Delivery
Universal Service Obligations and appropriation rider language requires carriers to traverse core parts of their route daily regardless of volume
Institutional 53% Attributable 47%

Post Office
Maintaining a network of Post Offices in every community regardless of walk-in revenue
Institutional 55% Attributable 45%

Other
PRC, Office of Inspector General (OIG), Federal Employees Retirement System (FERS) Supplemental Liability, Retiree Health Benefit (RHB) Amortization
Institutional 86% Attributable 14%

Total value of promotions (discounts)
Promotions

Earned Value Reply Mail
Encourages mailers to include Business Reply Mail (BRM), Courtesy Reply Mail (CRM) and Shared Mail envelopes and cards by providing a three-cent postage credit for each piece that is placed in the mail stream and scanned during the promotion period.

Personalized Color Transpromo
Encourages First-Class Mail mailers of bills and statements to use color messaging providing an upfront 2 percent postage discount during the promotion period.

Emerging & Advanced Technology
Provides a discount on the qualifying postage for First-Class Mail Marketing Mail letters and flats which either include affixed or embedded technology that allows the recipient to engage in a technological experience, or have been automatically generated by the recipient’s applicable online activities.

Informed Delivery
Aimed to increase the adoption rate of the Postal Service’s Informed Delivery platform, by offering a 2 percent discount off postage for mailings that incorporate Informed Delivery advertising campaigns.

Tactile, Sensory, & Interactive Engagement
Encourages mailers to enhance customer engagement with the mail through the use of advanced print innovations in paper and stock, substrates, inks, and finishing techniques. Regular and nonprofit USPS Marketing Mail letters and flats that meet the promotion requirements are eligible for an upfront 2 percent discount off postage.

Mobile Shopping
Encourages mailers to integrate into their mail pieces mobile technology that connects consumers to an online shopping platform. Regular and nonprofit USPS Marketing Mail letters and flats that meet the promotion requirements are eligible for an upfront 2 percent discount off postage.
## Digital alternatives create significant challenges for mail

<table>
<thead>
<tr>
<th>Established Digital Channels</th>
<th>The Use of Big Data</th>
<th>Consumer Preferences &amp; Demographics</th>
</tr>
</thead>
<tbody>
<tr>
<td>Digital marketing campaigns are cheap, easy to develop, and reach wide audiences on frequently visited platforms</td>
<td>Big Data Analytics are defining the future of advertising, leading to fewer dollars spent but an increase in ROI</td>
<td>Digital communication, such as Online Bill Pay, is preferred over mail by Millennials</td>
</tr>
</tbody>
</table>

**Digital giants steal ad budgets**

25% of global ad spend goes to Google or Facebook and this number continues to rise.

**Automated Direct Mail (ADM)**

ADM sends DM based on a consumer’s digital interactions. Smaller, more targeted lists could result in increased ROI and less mail volume to achieve targets.

**End-consumers prefer digital**

56% of all bills are now paid online. Younger households (ages 25-34) sent/received less than half of the transactional mail/week in 2016 than older households (65+).

**Digital perceived as higher value**

Some larger customers have expressed that digital advertising provides better ROI.

**Marketing Mail user experience drives smaller business customers away**

35% say making the process more convenient would increase their investment.

**In-House Marketing Analytics**

Large financial institutions, including American Express, leverage Big Data to offer customized, microtargeted offers to attract customers, threatening mail volumes.

**Mail is an easy target for budget cuts**

Large customers have mandated reduced spend in response to budget cuts.

**Digital Mail user preferred**

41% of small Finance & Insurance customers have made efforts to shift consumers to paperless.

Traditional Annual Implementation Timeline

Jan. 2019
- Implement last year price filing

Feb./June 2019
- Update Governors on volume/revenue trends and market developments
- Request approval for Market Tests, New Products, and Structural Changes
- Present Market Dominant NSAs
- Discuss Competitive NSAs and Bilateral

June/July 2019
- Share structural changes and pricing strategy
- Collect industry feedback on technical specs

Aug./Sept. 2019
- Detailed pricing review

Oct. 2019
- Request vote on pricing package
- File before CPI is released
- 90-day notice of MD, 60 days for Competitive

Nov. 2019
- Technical development
- Pricing

Dec./Jan. 2020
- Communication
- Expected PRC decision
  - 34 days Market Dominant
  - 30 days Competitive
Parcel Select NSAs are utilized to grow, retain, and maximize profitable revenue from large shippers

- **Profile:** Lightweight packages and most rural routes are not discounted
- **Regulatory Review:** Required annually to determine profitability of each NSA; cannot price below cost
- **Contract durations:** Multi-year agreements
- **Termination notice:** 6-month to one-year notice required
- **Volume:** Increased or sustained volume considered in pricing
- **Pricing:** Annual price increases on NSAs offset by tier-based pricing

Various stages of negotiation
Retailer benefits but contract is with provider
The majority of Parcel Select revenue is earned at published prices and is not discounted

- Rural and lightweight volume is not discounted
- Discounts are applied to locations with greater delivery density to incentivize use of USPS last-mile

FY2019 July YTD - 42% or $2.3B of Parcel Select Revenue is discounted
Parcel Select Pricing Overview:
Published Prices and Discounted

The majority of Parcel Select Volume is sold at published prices and is not discounted
- Rural and lightweight volume is not discounted
- Discounts are applied to locations with greater delivery density to incentivize use of USPS last-mile

FY2019 July YTD - 38% or 0.9B of Parcel Select Volume is discounted
• USPS’s international revenue was $2.6B in FY2018
• USPS is a net exporter, with $1.5B in revenue for FY2018
• Small packet revenue is 50% ($1.306B) of all USPS international revenue (both import and export)

2020 VISION

THE POSTAL SERVICE’S LAW DEPARTMENT IN 10 YEARS

Maureen Briody
Isabelle Dorian
Jacob Howley
Tony Rice
Gillian Steinhauer
David Stanton

October 8, 2010
The Postal Service is preparing itself for the challenges and opportunities that will exist in the year 2020. Similarly, the Law Department needs to develop strategies to address the unique issues that will arise relative to the department in the next decade. Specifically, this paper addresses the following questions:

- What changes in facilities, equipment, and technology are anticipated in 2020?
- What types of legal talent will be needed to meet the Law Department's future needs?
- What changes in work practices and work environment will be required to attract and retain quality professional and administrative employees?

**EXECUTIVE SUMMARY**

- At present, many attorneys are working remotely via a laptop and/or blackberry. This trend towards “mobile lawyering” is expected to continue into the future. Advances in technology will permit attorneys to participate in video-conferences, check e-mail, return calls, upload and download documents, collaborate on projects, conduct research, schedule meetings, scan documents or images, take pictures, and send or receive text, audio and video, all via a single device. As such, attorneys will be less tied to a fixed workspace or office in the future.

- The workplace will become more collaborative based on the popularity of the social media model. Internet sites such as Facebook and YouTube have revolutionized how people communicate and share information. It is likely that the government and private organizations will become more collaborative in nature through the use of more interactive websites, video-conferencing and document sharing.

- The Law Department will benefit from new software advances. Case management software can help track cases, clients and deadlines. Litigation support software is currently being developed that will aid in managing e-discovery. New software such as Adobe Acrobat 8 will make document management easier. Legal research software is also expected to become more user-friendly and less costly in the future.

- The demand for legal work is expected to increase into the future. Along with the trend for flexibility in terms of work schedule, it seems apparent that a variety of alternative flexible staffing options could also be explored.
in order to save on benefits-related costs. The use of part-time employees, whether they are retirees or employees who just want reduced hours for one reason or another, could be explored as a potential way to reduce costs, encourage retention and improve productivity. Tasks currently assigned to attorneys could possibly be shifted to paralegals or outsourced to independent contractors.

- The Postal Service may wish to amend current flexible work arrangement policies to address such issues as greater telecommuting and AWS flexibility and expanding such programs to FLSA non-exempt employees.
- With the trend toward “mobile lawyering” on the rise, it is also expected that the Law Department will explore ways to save on real estate costs by consolidating office space and through the use of office sharing. Other governmental agencies and private companies are exploring the concept of “hoteling”, a policy whereby management could save costs spent in unnecessary office space and utility costs by having employees give up their in-office workspaces in exchange for home offices and a commitment to provide the employee with a temporary office space when needed.
- As a result of technological advances and current trends favoring telecommuting, it is expected that the Law Department will at least study the “results-only work environment” (ROWE) model. ROWE is driven by the principle that it should not matter when or where an employee works, as long as the job gets done. ROWE appears to be gaining support as an alternative option that could expand an employee’s flexibility, and as such, potentially improve employee retention and productivity.

I. TECHNOLOGICAL CHANGES WILL SUPPORT A MORE EFFICIENT AND COLLABORATIVE WORK ENVIRONMENT

In the past ten years, the Law Department has seen tremendous technological advances which have dramatically changed how we work. Due to these advances, attorneys in the Law Department have the ability to work remotely and are less tied to their physical offices. The most significant technological developments have been remote computer access, BlackBerry phones and scanning.

Attorneys working remotely have the option of signing on with their own home computer or postal provided laptop. While many attorneys in Headquarters are still using desktop computers, in the Field it appears most attorneys have chosen to be
assigned laptop computers. Access with a postal laptop is accomplished through the WebVPN portal. If a home computer is used, the Remote Desktop Protocol (RDP) is used and the work computer must be left on and connected to the network. In addition to working from home, attorneys can also sign on directly to another ACE computer with their password when visiting another Postal installation.

BlackBerrys allow attorneys to check their e-mail and keep in touch with clients and co-workers no matter where the attorney is physically located. Productivity is significantly enhanced as moments of “down time” can now be used to respond to e-mails. This is particularly significant given the high percentage of daily business currently conducted via e-mail. Moreover, the Postal Service telephone system provides for simple and seamless call forwarding so that calls that come in can be redirected to the attorney’s BlackBerry when he or she is out of the office.

Finally, in recent years the Law Department has implemented various protocols that have reduced the amount of paperwork and the need to be located in a fixed physical office. Case files and other important documents are now scanned, and an increasing number of administrative agencies and courts are accepting submissions via e-filing. This trend towards a more “mobile” or “virtual” office is expected to continue to expand into the future.

A. The “Virtual Office”

Although the Management Instruction EL-310-2009-8, discussed later in this memorandum, does not require telecommuting employees to work from home per se, it requires that participants work only from an approved alternate worksite. Broadband Internet access is recommended; even though dial-up services may be used, their performance is significantly slower. If the employee uses a home wireless network, it is the employee’s responsibility to ensure that the network is secured to the maximum extent allowed by the wireless device in use, with a preference of Wi-Fi Protected Access (WPA) or a higher security standard. Employees may not use third-party devices, such as public kiosks, which are not always secure.
A “Virtual Workplace” is defined as a workplace that is not located in any one physical space. Rather, several workplaces are technologically connected (via the Internet) without regard to geographic boundaries. Employees are thus able to interface and work with one another in a collaborative environment regardless of where they are in the physical world. In the workplace of the future there may be no commute, no corporate headquarters and perhaps not even an office as many more workers are telecommuting. It is foreseeable that technology will be able to combine the functions of multiple pieces of hardware, such as a personal computer, phone, fax, scanner, electronic organizer, or camera into a single convenient device so the user can use these tools to participate in videoconferences, check e-mail, return calls, upload and download documents, distribute reports, collaborate on projects, conduct research, schedule virtual meetings, scan printed documents or images, and send or receive text, audio and video.

1. Attorneys are increasingly using technology to support mobility.

Smart phones, such as the iPhone, have many different features such as a camera, phone, text-messaging, visual voicemail, portable media player, Internet web browsing and Wi-Fi connectivity. In fact, even laptops may be in danger of becoming outdated as more workers are becoming more comfortable working via smart phone and/or BlackBerry; and as wireless broadband coverage continues to increase. Indeed, the concept of “mobile lawyering” is on the rise. The new high-powered cell phones

---

4 See www.officeofthefuture2020.com, Top Technology Tools (June 25, 2010).
6 Wi-Fi is the most widely used Wireless Local Area Network (WLAN) technology. A Wi-Fi enabled device, such as a smart phone or BlackBerry can connect to the Internet when within a range of a wireless network.
essentially can serve as a portable office in one’s pocket, giving the attorney access to contacts, calendars, calls, e-mails and the Internet all in one place.\textsuperscript{7} The popularity of smart phones has skyrocketed in recent years.\textsuperscript{8} Many attorneys are already using their BlackBerrys and smart phones to email their clients.\textsuperscript{9} Seventy-one percent of ABA members stated that they sometimes telecommute from a variety of places, such as home, hotels, others’ offices, libraries, courthouses, coffee shops and cafes. Many places, including libraries, are now offering free Wireless Internet access, making it even easier to telecommute. Ninety-five percent use computers away from the office, 89 percent use laptops and seventy-nine percent use BlackBerrys or smart phones.\textsuperscript{10} Many applications are being added to these smart phones for the attorney to use in connection with his or her work, such as applications to do legal research, manage documents in Microsoft Word, Excel or PowerPoint formats, and manage tasks and to-do list.\textsuperscript{11}

Another technology that is rising in popularity is the ability to download books to an e-reader or iPad. The iPad is a tablet computer developed by Apple that is marketed as a platform for audio and visual media such as books, periodicals, movies, music and games, as well as web content. Its size and weight are between those of most contemporary smart phones and laptop computers.\textsuperscript{12} A recent study indicated that many more mobile workers planned to purchase an iPad in coming months, rather than

\begin{itemize}
\item \textsuperscript{7} See \url{www.entrepreneur.com}, Plug in or Tune Out? (Jan. 6, 2010).
\item \textsuperscript{8} See \url{www.abanet.org}, Smart Phone Buying Guide (Feb. 2010).
\item \textsuperscript{9} See \url{www.westlaw.com}, Virtual Law Practices: Most Practices are Partly "Virtual" Already, What’s Next? (Aug. 1, 2009).
\item \textsuperscript{10} See \url{www.abajournal.com}, Survey Documents Rise of Telecommuting Lawyers (July 9, 2010); see also \url{www.law.com}, 2008 ABA Tech Survey Sees More Mobility (Nov. 24, 2008).
\item \textsuperscript{11} \url{www.abajournal.com}, 70 Sizzling Apps (Oct. 1, 2009).
\item \textsuperscript{12} \url{www.wikipedia.org}.
\end{itemize}
a traditional PC for work purposes. There is even a new iPad application that helps litigators with jury selection.

Many people are no longer buying books, but are instead downloading them to their e-reader or iPad. As such, it is foreseeable that more businesses, including attorneys, could use e-readers in connection with their work in the future. The use of e-readers would also support the trend of mobility since instead of having to carry around voluminous files; the attorney could download all the information on one device. Instead of printing out transcripts, voluminous discovery, or investigations, it is likely the attorney could use the e-reader in order to prepare witnesses and at hearing. E-readers could also be used in meetings since each participant could download the report and follow along in the meeting on the e-reader.

There are obvious security issues which companies have to consider in line with what is coming in terms of new technology. Laptops, BlackBerrys and smart phones can be easily lost and/or stolen. As a result, the information on these devices is at a significant risk. In light of these risks, the use of encryption software, anti-spyware, anti-virus software and mandatory passwords is also on the increase. With the advent of this new technology and easier access to the Internet, employees also become more able to blur the lines between personal use and work use.

2. The use of video is likely to increase in the legal field.

---

16 See www.abanet.org, The Year of Living Safely: How Lawyers are Securing Their Data (May, 11, 2010).
17 See www.govtech.com, Many Bosses Unaware of Personal Devices' Popularity at Work (July 8, 2010).
Videoconferencing is becoming cheaper and easier to do. As a consequence, it is likely we will be seeing the increased use of video in the legal profession. More attorneys will be taking video depositions and doing witness preparation via video.\textsuperscript{18} The use of video for conferences and hearings is likely to increase. In terms of the legal community in general, the New York State courts have a video conference unit, where attorneys can make video court appearances, conduct attorney-client interviews and set up video conference meetings.\textsuperscript{19} In Michigan, the Supreme Court posts online video of its oral arguments, administrative hearings and administrative conferences to be posted on the State Bar website.\textsuperscript{20} The Seventh Circuit has started an e-mentoring project which permits young attorneys to have video discussions with distinguished jurists and trial lawyers.\textsuperscript{21} The MSPB and EEOC regularly request video hearings in Postal cases, and many of the attorneys have participated in such hearings. As budgets continue to be cut, and videoconferencing becomes cheaper to use, it is likely that the trend towards the use of video in order to defray travel costs will increase in the future.

3. The Law Department could benefit from the new technology.

Attorneys currently rely upon a sometimes overextended remote network infrastructure to access their in-office desktop resources. Before adding new hardware or software, upgrading the WebVPN network should be a priority that would result in immediate productivity improvements. There is significant anecdotal evidence of problems ranging from inability to log on at the start of the work day, to getting kicked off the remote network and slow operation at certain times of the day.

\textsuperscript{18} See \url{www.abanet.org}, Video Depositions: Essential, Resources (April 2010).
\textsuperscript{19} See \url{www.courts.state.ny.us}.
\textsuperscript{20} See \url{www.michbar.org/courts/virtualcourt.cfm}.
\textsuperscript{21} See \url{www.abajournal.com}, Video Mentors (Aug. 1, 2010).
It is foreseeable that the Law Department will invest in laptops or other mobile devices, like e-readers or iPad-like devices, so that attorneys have ready access to files and documents, as well as videoconferencing, wherever they are located. No longer would information access be limited to just the workplace or a home office. Nor would remote employees have to rely on the VPN network for access to files stored on their office hard drives, which would both facilitate employees’ access to these files and reduce the VPN server load for purposes of access to files residing on the Law Department’s shared network. This type of change will be required for the Law Department to bring its remote computing capabilities in line with other government agencies and private law firms as we move into the next decade.

B. Collaboration Based On A Social Media Model

The Law Department has begun to employ technology that permits it to be more collaborative in nature. MeetingPlace is used for teleconferencing, NetMeeting for information sharing and for limited document sharing, and the Law Department website is used exclusively for document sharing. It is not unusual to get a mass e-mail from a Managing Counsel from a Field office or from Headquarters concerning cases of national interest. Many times Headquarters holds information sessions via teleconference and/or web conference. This trend towards information sharing and collaboration in the workplace is expected to continue.

The popularity of social networking sites, online sites where users can interact with each other over the Internet and share ideas, pictures, videos, events and interests within their individual networks, such as Facebook, MySpace, Twitter, Flickr, YouTube,
and LinkedIn is on a constant rise.\textsuperscript{22} As SKYPE, a web service that allows callers to make video telephone calls over the Internet\textsuperscript{23}, is becoming increasingly popular, the increased use of video for further collaboration in the business context is likely.

1. **Using social media to further collaboration and information sharing.**

Private companies and the government are beginning to use social media websites to easily disseminate information and solicit commentary from a wide range of individuals and in a much quicker and more collaborative way through the Internet. “Blogs, microblogs and social networking sites have expanded the ways in which people and organizations communicate.”\textsuperscript{24} Social networking websites have become increasingly popular during the past few years as a way to collaborate and disseminate information among a wide range of people in a quick way.\textsuperscript{25} The Obama Administration has signed an Executive Order calling for all departments and agencies to “establish a system of transparency, public participation and collaboration”.\textsuperscript{26} To date, nearly all major federal agencies are using social media.\textsuperscript{27} As of June 2010, approximately 56 percent of attorneys responded that they maintain a presence in an online community/social network such as Facebook, LinkedIn, LawLink or Legal OnRamp. Respondents in the 30-39 year old age group were most like to maintain a presence (77 percent), with the 40-49 year old age group following closely behind (68 percent). The highest percentage of respondents (83 percent) maintained a presence in LinkedIn.\textsuperscript{28}

\textsuperscript{28} See www.abanet.org, The Linked-in Lawyer: How Lawyers are Using Social Networks (June 22, 2010).
Based on the popularity of social media, it is likely that in coming years we will see the use of social media change from being used in a purely personal way or as a marketing tool, to a collaborative tool to be used internally within the workplace. Younger workers have grown up using the Internet and are comfortable transitioning the use of their social networking tools into the business environment. Indeed, it is already happening. Government agencies and private companies are creating internal networks based on the social media model where employees can share files, individuals can share individual knowledge and experience through the use of blogs, and forums or bulletin boards are created in order to further collaboration and to keep employees better connected. General Electric has created an internal social network called Support Central, which boasts 400,000 users in more than 6,000 locations around the world. NASA has created an internal networking site called Spacebook. It was created because of a need to improve teamwork, communication and access to information across the agency’s diverse projects and centers. The State Department is working on launching a social network called “Statebook” to link diplomats and employees via a Facebook-style system. Just recently, the U.S. Merit Systems Protection Board (MSPB) announced that it has joined the information network Twitter.

30 See www.inc.com, How to Use Internal Collaboration and Social Networking Technology (March 31, 2010).
31 See www.itbusinessedge.com, GE Nails the Internal Social Network (July 21, 2008).
33 See www.socialtimes.com, State Department to Model Internal Social Network After Facebook (April 14, 2010).
The MSPB plans to use the site for new studies or publications, oral arguments, case reports, newsletters, Federal Register notices, or website updates.\textsuperscript{34}

While the social media model is not likely to go away anytime soon, the model has its weaknesses in the business setting. A business site based on such a model would have to address issues concerning appropriate content and use.\textsuperscript{35} Another concern would be whether the data contained on the site would be subject to the FOIA, the Privacy Act, and/or e-discovery.\textsuperscript{36} Since the social media model is Internet-based, there would be security concerns such as data protection and increased risk of cyber threats to consider as well.\textsuperscript{37}

\begin{itemize}
  \item \textbf{2. The use of videoconferencing could support collaboration.}
  
  Videoconferencing and webconferencing are emerging as a cheaper way for employees to share information and to collaborate better on projects. Fewer on-site meetings could mean reduced travel costs, less time wasted on travel and a healthier planet.\textsuperscript{38} In the Law Department, meetings are regularly held via teleconference or via webconferencing. Video conferencing has the potential to establish rapport that can be hard to build without the benefit of face-to-face interaction.\textsuperscript{39} As such, it is another tool the Law Department should consider to increase efficiency and promote a more collaborative environment than teleconferencing alone can promote.
  
  \item \textbf{3. Cloud computing could increase collaboration.}
\end{itemize}

\begin{flushright}

\textsuperscript{36} See Section A.3.
\end{flushright}
Cloud computing, otherwise known as Software as a Service (SaaS), refers to a category of software that is delivered over the Internet to a Web browser (like Internet Explorer) rather than installed directly onto the user’s computer. The Law Department is already using cloud based computing when attorneys and paralegals use Westlaw and LexisNexis. Another example of a cloud-based application would be social networking sites, such as Facebook or MySpace. Google Docs, which is a free, Web-based word processor, spreadsheet, presentation, form and data service offered by Google is also a cloud-based application. It allows users to create and edit documents online while collaborating in real-time with other users.

The cloud computing model holds appeal for attorneys for a variety of reasons. Collaboration in “the cloud” allows individuals to communicate and share information easily since all the applications and data reside on the Internet, any authorized user can view documents, collaborate and generate ideas and provide information. Off-site data storage is the defining characteristic of cloud computing. Instead of being saved to an individual’s computer or server in the office, data would be saved to an off-site location under the administration and control of a SaaS vendor. The benefits of such technology would be increased mobility and decreased need to have large servers to store data. However, there are obvious concerns with the security risks of storing data in “the cloud” where the attorney does not have immediate control over the data. There is also the risk of protecting the data and the increased risk for cyber threats.

company could theoretically set up an “internal or private cloud” structure in order to mitigate some of the potential security risks.\footnote{See www.InformationWeek.com, Why “Private Cloud” Computing is Real—And Worth Considering (April 11, 2009).}

4. **The Law Department could benefit by exploring new collaborative options.**

At this time the Postal Service is developing a Social Media Policy for possible issuance later this year. However, social media, video-conferencing and real-time collaborative tools that permit employees to work on a document from different locations in real-time remain foreign to the Law Department’s work environment. Such tools could help create a more collaborative work environment and more efficient information sharing among the Law Department as a whole.

**C. New Software Programs**

Changes in software have radically changed the way we work and how we can be more efficient in our jobs. In the Law Department, we have seen LawManager software implemented as an update to the old Wildcats system. This software has helped us keep better track of our cases. We have also implemented Litigation Hold software in order to comply with our e-discovery obligations. It is expected that in the next ten years, attorneys will be trying to find better ways for organizing and managing their electronic documents, discovery and files.

1. **Attorneys will better manage their cases and files electronically.**

Case management software can help track cases, clients, and deadlines.\footnote{See www.abanet.org, Practice and Case Management Software: Comparison Chart.} Litigation support software is designed to aid lawyers in the process of litigation, and generally includes databases for organizing, searching, and reviewing discovery
material including deposition transcripts, produced documents, and correspondence.\textsuperscript{49} For litigators, deposition and transcript-review software programs, such as TextMap and Live Note, can be efficiency boosters since the attorney can annotate, bookmark, link and highlight sections of the transcript. The result is a transcript that is easier to search.\textsuperscript{50} This software has the potential to make attorneys more efficient in their jobs.

2. \textit{Adobe Acrobat 8 will make document management easier.}

Adobe Acrobat 8 has significant benefits for attorneys and paralegals. The encryption technology is easy to use. As such, it is easy to protect sensitive information from accidental disclosure. It is also easy to convert documents into a single, polished, searchable Adobe PDF package for e-filing. There is a redaction feature that makes responding to discovery responses and FOIA/Privacy Act cases much faster and easier. Attorneys and paralegals can easily Bates number their documents and combine documents for filing.\textsuperscript{51} All of these benefits assist the Law Department in becoming more efficient.

3. \textit{Legal research software is expected to become more user-friendly and less costly.}

Westlaw and LexisNexis are also planning on creating a legal research experience that users have come to expect from Google.\textsuperscript{52} The new LexisNexis will be more user-friendly and display the results in a variety of intuitive ways. Shepard’s citation service is incorporated into every case and can be viewed graphically. The new LexisNexis also provides tools for collaboration, allowing for storage to work folders for

\textsuperscript{49} See \url{www.abanet.org}, Litigation Support Software Comparison Chart.
\textsuperscript{50} See \url{www.westlaw.com}, Switching Gears? Let Technology Help (January 2010).
\textsuperscript{51} See \url{www.abanet.org}, Adobe Acrobat 8 Professional: Reasons to Put it on your Shopping List (March 2007); \url{www.abajournal.com}, Acrobat 8 Does Flips for Attorneys (March 19, 2007).
\textsuperscript{52} See \url{www.abajournal.com}, Wired (Feb. 1, 2010).
later reference. \textsuperscript{53} WestlawNext will also be aiming to be easier to use and more aesthetically pleasing and promises tools for workflow collaboration. \textsuperscript{54}

In addition to the changes coming to Westlaw and LexisNexis, in recent years we have seen that the ability to do legal research for free has increased and this trend is expected to continue. In 2009, Google came out with a Google Scholar online search where anyone can type in case names, topics or key words to find relevant case law. \textsuperscript{55} We have also seen many agencies that the Law Department deals with regularly, such as the Department of Labor, Equal Opportunity Commission, Merit Systems Protection Board and the National Labor Relations Board post laws, guidance, regulations and in some instances, case law, on their public websites. \textsuperscript{56} The Code of Federal Regulations can also be searched for free online. \textsuperscript{57} All of these changes will likely result in cheaper, more user friendly legal research tools.

4. The Law Department has the potential to become more efficient through the use of new software technology.

As legal software becomes more user-friendly and less costly, it is foreseeable that the Law Department will be looking into purchasing software that will make case management and litigation more efficient. In fact, the IT Department is currently looking into obtaining software in order to better manage its e-discovery obligations in accordance with the Electronic Discovery Reference Model (EDRM) model. The purpose of such software would be to better manage e-discovery in large cases, such as class actions.

\textsuperscript{53} See id.
\textsuperscript{54} See id.
\textsuperscript{55} See www.abajournal.com, Google Offers Legal Research for the Average Citizen—and Lawyers, Too (November 2009).
\textsuperscript{56} See www.dol.gov; www.eeoc.gov; www.mspb.gov; www.nlrb.gov.
\textsuperscript{57} See www.gpoaccess.gov.
As it already has a contract with LexisNexis, it is also likely that the Law Department will benefit from the changes coming in the near future. It also would be helpful to disseminate information as to the free research tools available so they can be used to support the attorneys' and paralegals' legal research efforts and cut costs spent on LexisNexis and other paid legal research web sites.

II. **ANTICIPATED CHANGES IN THE STAFFING PARADIGM**

A. **The Demand For Legal Professionals In The Next Ten Years**

The Bureau of Labor Statistics (BLS) predicts that by 2020 there will be a 13 percent increase in the number of attorneys, a 28 percent increase in the number of paralegals, and an 11 percent increase in the number of administrative assistants. BLS projections are based on growth in the population, growth in legal transactions, and growth in demand for lawyers as a result of legal problems resulting from the downturn in the economy.

As set forth above, the largest predicted increase by far is the increase in paralegals. In the private sector, clients are demanding more efficient, lower cost legal services. One way of accomplishing that objective is further utilization of paralegals. Some activities currently performed by attorneys can be done by paralegals – and more cost effectively. The most frequently mentioned work shifting topics are document review and the preparation of routine documents. Paralegals could also have an expanded role in the Law Department, such as assisting in the preparation of routine filings for the Postal Regulatory Commission, drafting and responding to discovery requests, preparing MSPB Agency Files, interviewing prospective witnesses, and drafting dispositive motions, thereby freeing up attorneys to provide client advice and
handle more complex transactional and litigation-related legal tasks. Work shifting from attorneys to paralegals may, however, be more pronounced in the private sector as the salary gap between the two positions is more pronounced.

The increased need for administrative assistants is in turn driven by the increase in attorneys and paralegals. Although attorneys and paralegals will increasingly perform their own administrative tasks, more administrative assistants will be needed to handle the larger workload and perform tasks such as scanning documents, organizing files, and preparing and mailing documents in electronic format.

**B. Staffing Options**

Managers in the next ten years will need a flexible organization and flexible staffing that can be quickly adjusted to address new problems and challenges. The Postal Service faces the potential for change in the next ten years even more so than most organizations. As the Postal Service’s Chief Human Resources Officer, Anthony Vegliante recently told the *Washington Post*, “we don’t have a continually growing environment, we have a shrinking environment so we ... need to be flexible.”

The current staffing model for the Law Department is comprised almost exclusively of full-time career employees. Since the Postal Service, as an employer, has much in common with other large employers, public and private, the developing staffing trends of such employers can be useful in informing the Law Department as it makes staffing decisions over the next ten years. These trends include the use of part-time employees, retirees and contractors/outsourcing. Although there is some overlap between these categories of employees, they will be discussed separately.

---

1. **The increased use of part-time employees.**

The U.S. Bureau of Labor Statistics considers employees working fewer than 35 hours per week to be part-time employees.⁵⁹ According to the U.S. Bureau of Labor Statistics, part-time employment now accounts for approximately 16 percent of the workforce.⁶⁰ While the recent economic downturn has generated more part-time employment as a matter of economic necessity, there is evidence of a desire among professional employees to elect part-time status.

The use of part-time staffing has obvious economic advantages to an employer, including a reduction in expenditures for wages and benefits and an increase in employee satisfaction. In addition to the tangible economic benefits of part-time employment to the employer’s bottom line, there is at least one study which indicates that implementing staffing flexibility options, such as part-time employment, significantly increases employee engagement and reduces employee turnover.⁶¹ Studies done in the last two years indicate that, among 1,100 employers with more than 50 employees, approximately 40 percent allowed some employees to migrate back and forth between part-time and full-time employment. Additionally, 53 percent of employers allowed some employees to reduce their hours prior to retirement; and 25 percent allowed most or all employees to phase into retirement.⁶²

The use of part-time attorneys is gaining traction in both the private and public sectors. For example, in a study cited by the “Project for Attorney Retention”, the number of part-time partners in private law firms increased from 1.6 percent in 1999 to 3

---

⁶¹ *Id.*

⁶² *Id.*
percent in 2008.\textsuperscript{63} This same study concluded that part-time partners in private law firms made significant contributions as mentors and role models. In the Federal sector, the Department of Justice (DOJ) offers the availability of part-time scheduling for its attorneys and other employees. DOJ’s policy cites “the desirability of making maximum use of available human resources, including those qualified individuals who are available for part-time employment.”\textsuperscript{64} DOJ provides for part-time work opportunities for positions in all grade levels, subject to its resources and mission requirements, and has focused anew on part-time work opportunities in order to respond to increasing numbers of childbearing-age women in the workforce, dual career and single-parent households and an aging workforce supporting elderly parents. In DOJ’s assessment, part-time employment can be another valuable tool to attract and retain well-qualified employees.\textsuperscript{65}

The Postal Service currently discourages the use of part-time employees by counting a part-time employee the same as a full-time employee for purposes of complement control. Using both the public and the private sectors as a model, we recommend that the Law Department consider the possible expanded use of part-time employees, as well as policy changes that would support such expanded use.

2. The increased use of Independent contractors/outsourcing.

The use of independent contractors/outsourcing presents another opportunity for maximum flexibility in adjusting the size and composition of the Law Department’s workforce to changing needs. In the private sector, law firms are taking advantage of

\textsuperscript{63} Cynthia Thomas Calvert, Linda Bray Chanow and Linda Marks, \textit{Reduced Hours, Full Success: Part-Time Partners in U.S. Law Firms}, The Project for Attorney Retention, 2009.  
\textsuperscript{64} See, USDOJ: JMD: \textit{Worklife: Part-Time Employment and Job Sharing Fact Sheet}.  
\textsuperscript{65} Id.
outsourcing, including sending work overseas to countries such as India. In the years between 2002 and 2006, American law firms outsourced more than three million legal jobs to foreign countries. The Bureau of Labor Statistics estimates that by 2015, Indian employees performing outsourced legal work for private sector American law firms will generate $970 million; up from $52 million in 2002. Clearly, outsourcing in the private sector legal environment is a growing trend.

The use of contractors or outsourcing carries with it the advantage of paying only for services actually rendered, without any long-term or collateral obligations for wages or benefits. This approach can also be easily adjusted to meet the current needs of the Law Department, thereby achieving maximum flexibility.

3. The potential for expanded use of retirees.

Hiring retired employees, either as part-time employees or as independent contractors, appears to be an ascending trend in the private sector, and could make good business sense for the Law Department. The Postal Service estimates that up to 300,000 of its employees will become eligible to retire in the next decade. This pool of former workers could be a tremendous asset to the organization. An AARP-sponsored study of 1,500 workers aged 45 to 74 found that 69 percent planned to work in some capacity after their retirement. Retirees typically work after the end of their careers not only for wages or benefits, such as health care, but also for the intangible benefits of enjoyment and a sense of purpose. Even though many want to work, often they do not wish to continue working full-time. Rather, retirees want work that offers flexibility.

---

In February 2009, legislation was introduced in Congress to facilitate the use of part-time employees and the re-employment of retirees by Federal agencies. This legislation was designed to ease the financial complications of returning retired employees, both in terms of eliminating the offset of their retirement annuity and by providing retirement credit for CSRS employees for part-time work performed for their agencies.69

In March 2009, the Office of Personnel Management (OPM) issued directives encouraging Federal agencies to re-employ Federal retirees possessing experience in a number of areas (e.g., human resources, contracting, project management and grants management). While the wages of re-employed retirees are offset by their annuity payments, OPM or the re-employing Federal agency can waive this offset for select returning employees with crucial skills. The Government Accountability Office (GAO), in a February 2009 study involving four Federal government agencies, found that there was a significant pool of highly qualified retired Federal employees available for employment in the Federal sector.70

The knowledge and experience of retired employees can provide real value to the Department as it moves forward in the next decade. Further, there is clear support in Congress for the idea of maximizing the re-employment of retired Federal employees by their former agencies. The feasibility and value of the use of retired employees as independent contractors is already well demonstrated in the Postal Service. The EEO investigation function has been outsourced to contractors, a significant number of whom are retired Postal Service employees. Using retired Law Department employees as

contractors to provide ancillary support service in any number of Law Department functions, such as legal research, document examination in large cases, tort claims processing, or routine motion preparation would provide a clear benefit to the Law Department. There is very little in the way of training cost for retired Law Department employees. Likewise, there is virtually no “ramp up” period for these retirees; they could be ready to fully function immediately upon starting work. PCES Executives in the Law Department have a current average age of 54 and the attorney population is only slight younger at 47. As the Postal Service Law Department workforce continues to age and retire, this avenue of human capital will become more and more available.

III. EXPANSION OF FLEXIBLE WORK ARRANGEMENTS

Telework and other alternative work arrangements comprise another area of office management in which the next decade can be expected to bring changes. The current Presidential administration and Congress have prioritized the expansion of telework in the federal government, and private-sector employers increasingly are making headlines with innovations from customizable staggered schedules to “results-only work environments.” Over the next ten years, we anticipate that the Law Department may need to expand and even rethink its approach to alternative and flexible work arrangements, even beyond the parameters applicable to the Postal Service at large, in order to recruit and retain staff on par with other legal services employers.71

71 As used in this memorandum, “telework” or “telecommuting” refers to an employee’s ability to perform work duties at a site other than his or her work station on Postal Service premises. In Postal Service terminology, “alternative work schedule” means a schedule whereby an employee works extended days during a given period, such that the expected 40-hour work schedule is fulfilled during those days and the employee need not report to duty on the remaining day or days. This memorandum will refer to telework and AWS collectively, as well as any other arrangements that might be relevant to a given context, as “flexible work arrangements.”
A. History Of The Current Postal Service Policy

In 2005, the Law Department began a pilot program to test the feasibility of telework and AWS. Human Resources largely adopted the Law Department’s model when it established the first organization-wide telework and AWS policy on September 1, 2008. Management Instruction EL-310-2008-3 allowed employees exempt from the Fair Labor Standards Act (FLSA) to work up to one day a week at an alternate worksite, subject to management approval and review, attendance and work-suitability considerations, employee certifications, and compliance with information technology (IT) and work station requirements. The 2008 Management Instruction also allowed employees to enter alternative work schedule (AWS) arrangements upon certifications and management approval and review.

The Vice President, Employee Resource Management, updated and expanded Postal Service policy in Management Instruction EL-310-2009-8 (October 9, 2009), which replaced its 2008 counterpart. The 2009 Management Instruction expanded the previous limit of one telework day per week to three days per week and also clarified the options for AWS as follows: (1) one five-day week of eight-hour days and one four-day week of ten-hour days; (2) one five-day week of four nine-hour days and one eight-hour day, and one four-day week of four nine-hour days; or (3) two four-day weeks of ten-hour days. The Law Department expanded its previous two-day-per-week telework limit to a three-days-per-week limit commensurate with the new Management Instruction.

The majority of eligible FLSA-exempt Law Department employees participate in telework arrangements, rather than in AWS arrangements. Although the Management Instruction and the General Counsel’s 2008 email require employees with verbal
managerial approval to enroll via Human Resources’ Flexible Work Arrangement Application website (http://fwaa.usps.gov), anecdotal evidence indicates that at least some managers have preferred to handle telework arrangements less formally, based on week-to-week in-office staffing needs.

B. Rationale And Benefits Of Flexible Work Arrangements

As described in Management Instruction ELM-310-2009-8, the Postal Service established flexible work arrangements are “designed to increase employee morale and efficiency[.]” The Postal Service considers their purpose to be:

to enhance the Postal Service’s efforts to recruit and retain top talent, help conserve energy and reduce CO2 emissions by eliminating up to three commuting days, and to contribute to employee preparedness to work at home during emergency Continuity of Operations Plan (COOP) events.

At least the environmental and commuting-related benefits are borne out by organization-wide data. Based on a combination of Postal Service-specific and general demographic statistics, Human Resources currently estimates that if Headquarters employees spend an average of one day per week telecommuting, the program will have saved 85,804 gallons of gasoline and 839 tons of carbon dioxide emissions per year, equivalent to removing 159 cars from the road each year.72

Personal expense savings for employees are also palpable. According to an August 6, 2010, summary report from the Postal Service’s Flexible Work Arrangement Application, 86.77 percent of the 7,024 participants surveyed primarily commute to work via car, and more than half spend over an hour commuting roundtrip each day.

72 These estimates focus exclusively on the environmental impact of reduced commuting. They do not account for potential inefficiencies such as, for example, the fact that more environmental resources may be spent heating, cooling, and powering the employee’s alternate work site in addition to persistent environmental costs at the (likely more efficient) office worksite. See Brian Palmer, “How Green Is Telecommuting?,” Slate.com, September 7, 2010, available at http://www.slate.com/id/2264177/ (citing Erasmia Kitou and Arpad Horvath, “Energy-Related Emissions from Telework,” 37 ENV. SCI. TECH. 3467 (2003), available at http://pubs.acs.org/doi/abs/10.1021/es025849p).
Although it is not expressly measured, one can easily infer a significant quality-of-life benefit when employees realize an additional measure of personal time that would otherwise be spent commuting.

Telecommuting offers potential to increase employee fitness, with direct and indirect effects on productivity. Less work-related commuting time can translate into more time for exercising, home meal preparation, and sleep, all of which contribute to employee health and productivity. Employees may also choose to telecommute instead of taking leave when they or family members are sick, which both increases their own productivity and reduces their colleagues’ exposure and resultant potential need to take sick leave.73

The Postal Service’s rationale and findings correspond to those cited by other federal agencies. For example, in an August 2009 report to Congress, the Director of the Office of Personnel Management (OPM) praised telework programs’ demonstrated ability “to help individual employees successfully balance the responsibilities of work and family, increase the safety of neighborhoods,74 and reduce pollution.” The Director also described employees’ saved commuter costs, agencies’ emergency-planning needs, and the goal of “green workplaces” as underpinning telework policies.75

Employers can also benefit from reduced real estate and utility costs, increased productivity, and decreased sick leave and workers’ compensation usage.76 As the

73 Of course, managers should not require or induce employees to abstain from sick leave in favor of telecommuting. Nor should employees opt to continue working if their health and productivity would clearly suffer as a result.
74 That is, telecommuting employees can notice, report, and even deter suspicious activity near their residences or other remote worksites during the workday hours, whereas in-office employees cannot.
GAO report points out, employers also benefit indirectly from telework’s direct benefits to employees, because management of commuting costs and other work/life-balance issues can increase employees’ personal happiness and, consequently, their effectiveness and satisfaction in their jobs. The recruitment and retention benefits of telework are especially palpable as new generations of workers “have high expectations of a technologically forward-thinking workplace.” The U.S. Patent and Trademark Office and the Nuclear Regulatory Commission have attributed to their telework programs an essential role in fulfilling their aggressive recruitment goals. A 2007 report by the Office of the Inspector General (OIG) for the Equal Employment Opportunity Commission (EEOC) found that a “frequent telework” pilot program would increase productivity, employee work-life balance, and continuity of operations, while allowing the OIG to capture real estate savings of $2,216 per teleworker, per year, even where the OIG paid for the teleworkers’ home office equipment and Internet connectivity.

This suite of benefits has been recognized across decades of telework innovation. It has also been acknowledged as underlying private firms’ growing offering of telework programs in an effort to cut costs and recruit and retain legal

---

77 Id. at 4.

78 Id.

79 Id. at 5-6.

talent. Perhaps due to the intellectual nature of their work and their drive to maximize client value, private law firms in particular have been aggressive at implementing flexible work arrangements.

C. Limitations of Flexible Work Arrangements

1. In general.

Discussions of telecommuting traditionally note managers’ concerns about the potential for actual or perceived loss of control over employee work activities. One might reason that the home environment presents distractions absent from an office workplace, resulting in diminished productivity. While these concerns may be justified in some cases, an overwhelming majority of employees are likely to have a suitable work ethic, which can be reinforced by effective management and enhanced communication. In the Postal Service’s case, the Management Instruction makes clear that telework participation is a privilege, not a right, and that it is subject to managerial planning, consultation, approval, review, communication, and even revocation. The burgeoning of telework programs in the economy at large is a testament to a growing perception that the overall productivity gains and other benefits outweigh the exceptional instances of

employee exploitation. Nevertheless, the lingering presence of work-ethic concerns can be an obstacle to expansion of telework programs, due both to managerial reluctance and to employees’ own lack of confidence in their productivity as telecommuters. In organizations that have implemented flexible work schedule programs, managers still often thwart participation by refusing to grant approval.

The regularity of out-of-office days under an AWS work schedule can theoretically present a risk that the office will be understaffed on a given day. As with work-ethic concerns about telecommuting, the spread of alternate work schedule programs in the American economy indicates that employers are capable of finding ways to accommodate a need for balanced staffing levels with such programs.

2. **Limitations specific to the Postal Service.**

Other limitations are specific to the Postal Service’s policies and infrastructure. For example, the Management Instruction is limited to FLSA-exempt employees. This means that Law Department attorneys and Business Services staff are eligible for telecommuting and AWS, but paralegals and administrative assistants are not. The Management Instruction also proscribes participants from combining telework and AWS, or from taking personal leave on a day when the participant is telecommuting. As noted above, the Management Instruction sets a limit on the number of days a participant can telecommute or have free due to AWS. Although it is not expressly included in the Management Instruction, it appears that there is a general policy that managers may not engage in AWS and may telecommute only one day per week at most. The basic approach underlying the Management Instruction is that
telecommuting is an exception to the general rule of in-office attendance, and not the other way around.

The Postal Service does not reimburse employees for utility costs incurred while telecommuting, including Internet access, home computers, or work-related telephone usage. Employees are not usually provided with workstations or other equipment in order to enable them to work at an alternate worksite, although some Law Department offices, particularly in the field, have authorized Postal Service-issued laptops at various times in recent history. Employees choosing to participate in the program using non-Postal Service-owned equipment will not receive support or service for that equipment from the Postal Service Help Desk.

D. Alternative Flexible Work Arrangement Models

The history of flexible work arrangements at large suggests that the current interest is no mere fad. If anything, the number of telecommuters is expected to rise within the foreseeable future. As employees’ decisions are expected to revolve increasingly around the flexibility of work-life balance alongside traditional pay and benefits factors, the Law Department should keenly consider whether expansion of its own flexible work arrangements would increase employee retention and recruitment, as well as produce other benefits. Further evolution of flexible work arrangements could take many forms, from incremental adjustments of policy to expansion of their scope of application to wholesale redesign. Because of the ten-year horizon for this paper, this

---

85 See, e.g., Charles Grantham, Jim Ware, and Jennifer E. Swanberg, Flexible Work Arrangements for Nonexempt Employees (2009), at 9 (“More than 17 million employees performed work remotely at least one day per month in 2008. That number is projected to increase to more than 25 million within five years.” (citations omitted)), available at www.worldatwork.org/waw/adimLink?id=33622.
section will examine modest policy changes that focus on practices in widespread use today as well as aggressive flexibility models that may yet develop into best practices.

1. Potential modifications to existing policy.

The most likely scenario for flexible work arrangement changes in the next ten years would involve expansion of already existing postal policies.

   a. Expansion of telecommuting.

      The Law Department could go beyond the Management Instruction by allowing an even greater number of telecommuting days per week or per pay period.

   b. Expansion of personal leave policy.

      Employees could also be permitted to take personal leave on a telecommuting day, subject again to supervisors’ approval. This prospect could aid employer and employee alike: it could accommodate medical and personal appointments close to the employee’s home, which would mean that the employee could request less leave time due to the reduced travel time. A supervisor and employee could also arrange for the employee to exercise personal leave during core office hours but make up for it with additional work time after hours. In principle, this would not represent a major shift from current practice, as attorneys must sometimes spend additional work-hours on deadline assignments while requesting personal leave at other times. The telework-plus-personal-leave approach would simply grant official sanction to the availability of such flexible work-time arrangements during an individual workday.
c. Permit a Telework/AWS combination.

A related option would be to allow deviations from core hours to meet employee needs, or to allow the combination of telework and AWS. Some employees might desire the flexibility of AWS but decide that it is infeasible for them because of the increased in-office hours, combined with commuting time, in “on” days. The former option could be thought of as “AWS light”: an employee could arrange or request a schedule that involves working on each workday but that varies from day to day in its specific parameters. This would allow the employee to have regular personal time on a workday when that would be advantageous, while only requiring a limited increase in compensatory work-hours elsewhere in the week. Combining telework and AWS, would recognize that the lack of commuting time makes telework days a prime candidate for the lengthened “on” days of an AWS schedule. If the Law Department determines this would require additional monitoring of telecommuting employees, this could be accomplished with additional supervisor involvement or record-keeping. Either option would make AWS more desireable for Law Department employees.

d. Permitting FLSA non-exempt employees to participate in the Telecommuting/AWS program.

Another possibility of going beyond the Management Instruction would be to open both telework and AWS arrangements to paralegals and administrative assistants. There is no legal proscription, even from an FLSA standpoint, for those employees to participate in such programs. It would, however, require strict monitoring and adherence to the employee’s agreed-upon schedule (ELM § 444.231). It is the supervisor’s job to ensure that employees do not remain on
the clock unless they are specifically authorized to do so. Nevertheless, there is significant concern that poorly managed non-exempt telecommuting programs can create significant liability.

From a practical standpoint, it is unlikely that most Managing Counsels and Law Department offices would find workable an arrangement whereby, even depending on workload and upon the manager’s discretion, paralegals could participate in telework and AWS, with administrative assistants continuing to carry out their current in-office duties requiring specialized equipment (e.g., high-speed and color scanners). In consulting with the Postal Service’s Agency Telework Coordinator, the Postal Service is considering expanding AWS, but not telework, to non-exempt FLSA employees, the main issue being one of coverage during employees’ “off” days. A cursory inquiry with the Telework Coordinator as to whether other federal agencies allow non-exempt FLSA employees to participate in these type of programs reveals that very few, if any, do.

2. **Office Real Estate: “Hoteling”**.

One of telework and AWS’s cost-savings propositions is the ability to consolidate office space. This concept requires a change in a fundamental premise of the traditional workplace: instead of distributing cubicles and offices among the total employees, the number of cubicles and offices are allocated based on employees’ in-office time. Put another way, instead of time working remotely being seen as a perk, one can view it as the default and in-office time as the exception that requires accommodation. With enough participation in flexible work arrangements, this would allow management to rotate multiple employees at a non-dedicated work station and shed unneeded office space and utility costs.
The U.S. Patent and Trademark Office (USPTO) has made strides in this area, which it calls “hoteling.” Under the USPTO’s Patents Hoteling Program, more than 1,650 patent examiners agreed to give up their in-office workspaces in exchange for home offices and a commitment to reserve two days per pay period at the USPTO’s temporary offices. In addition, 147 trademark examiner staff have participated in a similar program, including legal instrument examiners, paralegals, legal document review clerks, and other non-attorney staff. Even among the USPTO’s Office of the General Counsel (OGC), some OGC employees have given up dedicated offices in order to enable office-sharing, where two employees can share the same office and workstation on alternate days. Although there are times an employee needs to come in on their telework day, there are hoteling offices available that they can use to access their virtual workstations on those days. OGC teleworkers have been able to design their individual telework routines, thus providing them needed flexibility without negatively impacting their coworkers or the OGC business process.

The USPTO’s hoteling programs are intrinsically motivated by the need to reign in real estate costs. In practice, the USPTO credits the programs with enabling it to avoid $11 million in new office space purchases and to hire 1,000 employees per year without adding office or parking space. A similar hoteling program at the Treasury Inspector General for Tax Administration has saved an estimated $1 million per year. In the 1990s, a hoteling program enabled the Federal Railroad Administration to close

---

86 The terms “hot desking,” “free address workstations,” “touchdown workstations,” and “desk sharing” describe minor variations on the same concept. General Services Administration, “Alternative Workplace Solutions,” www.gsa.gov/portal/content/102702 (last visited September 16, 2010).

91 Id. at 7-8.
92 Id. at 8.
18 field offices and consolidate several others, for a total savings of $251,929 (in historical dollars). 93

Over the next ten years, however, it is possible that cost-cutting pressures could lead the Law Department to explore further consolidation within Headquarters or field offices, between offices near to one another, or even between Law Department personnel and client office space. Field personnel could “ride circuit” between local offices in their selection of convenient temporary workstations. Depending on the calculation of estimated real estate savings, it is possible that it could become cheaper to establish “telecenters” with non-dedicated work stations closer to employees’ homes, in lieu of maintaining centralized office space. 94

Apart from the real estate cost savings, it is possible that hoteling could add benefits for employees and the organization beyond those already inherent to telework and AWS. If in-office presence is deemphasized, the Law Department can recruit new employees from within a larger geographical radius, and it can retain existing employees who might be moving farther away. The USPTO recognizes this with its Trademark Geographic Expansion pilot project, whereby trademark examining attorneys with telework experience can move up to 110 miles from headquarters, so long as they report in person twice per biweekly pay period. 95 Although the prospect of a shared office workstation might turn off some employees, many would likely prefer it if it is closer to their residence than their traditional office, and the chance for more at-home

94 The General Services Administration maintains several “telecenters” around the Washington, D.C., commuting area, including one as far away as the eastern panhandle of West Virginia. GSA Telework Centers, www.gstateworkcenters.org (last visited September 16, 2010). See also Joice, The Evolution of Telework in the Federal Government, at 24-30 (describing the establishment of telecenters in response to local emergencies).
95 USPTO, 2009 Telework Annual Report at 6.
time and reduced commutes might outweigh any lingering discomfort for those employees.

Over the next ten years, we expect the Law Department and the Postal Service at large to explore the opportunity for real estate savings from flexible work arrangements. As a starting point for further study, the General Services Administration has compiled research on “alternative officing” in the private and public sectors.96

3. Results Only Work Environment (ROWE).

Perhaps the most extreme cultural change would be to reengineer the workplace, or components of it, as a so-called “Results Only Work Environment” (ROWE). ROWE is driven by a simple principle: it should not matter when or where an employee works, so long as the work gets done. Employees can also choose to work at times when they are most productive as individuals, even when those are outside typical work hours. In lieu of the formal strictures of personal leave and “core hours,” an employee is free to attend to personal or family needs and appointments during the typical workday hours (when many other businesses and government offices are open), while finding other, more convenient times to complete her work assignments.

Instead of indirect proxies for performance like in-office attendance or reported work-hours, a ROWE relies directly on the employee’s ability to meet deadlines, accomplish specified assignments, and achieve high client satisfaction. Supervisors can address productivity gaps through dialogue and workload management, as in a typical full-time office environment, but they otherwise are to let employees distribute their work time according to their own needs and proclivities. Federally-sponsored,

empirical research by University of Minnesota researchers indicates that employees in a ROWE environment continue to work approximately the same amount of time and days per week even as their schedules become more flexible.97 Meanwhile, the same study shows that ROWE employees perceive significantly better work schedule “fit” with their personal needs and less conflict of work matters with family time than non-ROWE employees, without a significant difference in the spillover of family matters into work time.98 Although managers may have reservations about scrapping timeworn work-hours-based models, it appears that ROWE produces a win-win outcome: employers get the same or better performance, and employees get better work-life balance.

ROWE has been claimed to produce many of the same benefits for employers and employees as telecommuting and AWS, albeit at a much greater level. Studies of ROWEs indicate that job satisfaction, productivity, employee health, and cost savings increase drastically in a ROWE as opposed to a traditional workplace.99 Many ROWE employees cite the system as a significant factor in their perspective on retention: for example, one survey respondent at Gap Inc. cited her company’s ROWE as the decisive factor in turning down an otherwise more attractive job offer, and a survey at another employer reported a 121-percent increase in the number of employees unlikely to search for a new job within the following year.100 Voluntary turnover rates reportedly plunge in ROWE workplaces, with a double-digit change in Best Buy’s turnover rates

---

98 Id. at 20-24.
100 Id. at 12, 14.
and a 40-percent drop at one non-profit organization. Greater control over work hours also maximizes environmental benefits: not only can employees telecommute, but even when they come to the office, employees can do so outside of rush hours, trimming greenhouse gas emissions and non-productive time spent in traffic further. ROWE can also allow employees greater flexibility than telecommuting to get more sleep, exercise, and home-prepared meals and to reduce the need for sick leave. Under a ROWE, remote employees can have their children or other dependents around and thereby avoid dependent care costs, so long as performance does not suffer or non-productive work-hours are made up at another time. Thus, ROWE offers the potential to intensify each of the cited benefits of telecommuting and AWS and to add new benefits.

Although ROWE is a new concept, its profile is rising. ROWE originated at Best Buy’s corporate headquarters and has spread throughout the company; it has since been implemented at the corporate offices of Gap Inc., the IT department of Fairview Health Services, J.A. Counter and Associates, the non-profit Girl Scouts of San

---

101 Id. at 6, 14. The University of Minnesota study found that 32.5 percent fewer Best Buy employees reported turnover intentions in a ROWE, compared with only a 20.7-percent drop among employees in a control group. Moen and Kelly, *Flexible Work and Well-Being Study* at 34.

102 After the Girl Scouts of San Gorgonio Council implemented a ROWE, 69 percent of employees shifted their commutes to avoid traffic and 40 percent reported shaving at least 10 minutes off of each direction of their commute. CultureRx, “ROWE Business Case,” at 14.

103 The same survey indicates that the number of employees getting at least 7 hours of sleep a night increased by 112 percent, with 219 percent more reporting at least good-quality sleep. Meanwhile, the number of employees who lost at least 3 work-hours per month due to illness dropped 82 percent, to 7 percent of all employees, and 71 percent reported themselves as less likely to call in sick. Id. at 13. The University of Minnesota study also found statistically significant increases in sleep time, exercise, doctor visits when sick, and energy and decreases in time spent in office when sick. Moen and Kelly, “Flexible Work and Well-Being Study” at 26-30. However, changes in more nebulous factors like employees’ overall assessment of their health, psychological distress or well-being, emotional exhaustion, sense of mastery, or physical symptoms were not found to be statistically significant. Id. at 31.

Gorgonio Council, and the legal services outsourcing company Latitude-South. The Twin Cities Metropolitan Area is encouraging local employers to convert to ROWEs in order to reduce traffic congestion. The Office of Personnel Management (OPM) is currently conducting a pilot to study ROWE’s application in federal workplaces. The OPM study involves nearly 400 union and non-union OPM employees, from claims processors to policy makers, both within and outside of Washington, D.C. Participants were selected so as to reflect the overall federal workforce. All members of participating groups are included in the ROWE pilot; participation is not seen as a perk to grant or deny, although employees whose assignments require in-office presence must commit to a necessary amount of such presence in the interest of getting the work done. OPM’s pilot is currently underway, and its final report is expected in February 2011.

To date, it is unclear if the roster of ROWE workplaces includes law firms or other legal services providers other than the outsourcing firm mentioned above. It is also unclear whether the corporations that have adopted ROWE have applied it to their in-

---

108 Id.
109 Id.
110 Id.
house counsel offices or, if so, how ROWE has been implemented in keeping with attorneys’ internal and external schedule expectations. Finally, we were unable to determine whether OPM’s pilot program includes federal attorneys, although it does include support staff “to the maximum extent possible.”\footnote{OPM, “Frequently Asked Questions for ROWE Employees,” May 21, 2010, at 10. OPM has customized the ROWE model somewhat to account for federal leave, night differential, and general work-hour requirements. See id. at 4-6, 13-14. For example, employees must account for 80 hours every biweekly pay period, without further restriction except for two core hours on each of two designated days per pay period.} Thus, while initial studies indicate that a well-designed ROWE can reap substantial savings and benefits for employer and employees alike, further outreach with other ROWE employers’ law offices would be helpful in assessing the likely impact of a ROWE in the Law Department.

Within the next ten years, we expect that the Law Department will monitor developments on ROWE in other organizations, including OPM, and evaluate whether it could and should be implemented in the Law Department.

**CONCLUSION**

The American white-collar workforce is currently amid a trend that challenges the traditional assumptions that tie work performance to fixed places and hours. In the next ten years, businesses, in general, will need a flexible organization that can be adjusted quickly to address new threats and challenges. Baby boomers comprise the majority of the workforce today. By 2015, however, millennials (those born from 1977 to 1997) will overtake them. In 2020, when five generations are simultaneously employed, baby boomers are not expected to represent even a quarter of working Americans.\footnote{Meryl Davids Landau, “The Retirement of the Future,” U.S. News & World Report (September 14, 2010), available at http://money.usnews.com/money/retirement/articles/2010/09-14/the-retirement-of-the-future.html.} “Millennials have a different way of working, and boomers will have to adapt to stay...
relevant.” In the not too distant future “team leaders will routinely motivate and manage employees across the globe without ever meeting face-to-face – something today’s younger generation knows about from playing online multiplayer computer games.” The millennials want constant feedback, but are perfectly happy to get it online.

Technology increasingly enables real-time collaboration among personnel regardless of their location. Young workers tend to desire a balance between work and personal life that allows them to fulfill personal and family ambitions, and their expectations are framed by their familiarity with the possibilities of virtual communication. Even workers approaching retirement may wish to keep working in a manner that gives them the flexibility to transition toward retirement. Since these trends are not anticipated to abate, one can reasonably expect that the Law Department of 2020 will need to expand its approach to flexible work arrangements and even rethink its approach to the work environment in order to recruit and retain talent in competition with other legal employers. We recommend the Law Department study the options, including promising options outside the current mainstream, and assess carefully the prospective costs, benefits, and possible productivity improvements.

2020 VISION

THE POSTAL SERVICE’S LAW DEPARTMENT IN 10 YEARS

Maureen Briody
Isabelle Dorian
Jacob Howley
Tony Rice
Gillian Steinhauer
David Stanton

October 8, 2010
2020 VISION
THE POSTAL SERVICE’S LAW DEPARTMENT IN 10 YEARS

The Postal Service is preparing itself for the challenges and opportunities that will exist in the year 2020. Similarly, the Law Department needs to develop strategies to address the unique issues that will arise relative to the department in the next decade. Specifically, this paper addresses the following questions:

- What changes in facilities, equipment, and technology are anticipated in 2020?
- What types of legal talent will be needed to meet the Law Department’s future needs?
- What changes in work practices and work environment will be required to attract and retain quality professional and administrative employees?

EXECUTIVE SUMMARY

- At present, many attorneys are working remotely via a laptop and/or blackberry. This trend towards “mobile lawyering” is expected to continue into the future. Advances in technology will permit attorneys to participate in video-conferences, check e-mail, return calls, upload and download documents, collaborate on projects, conduct research, schedule meetings, scan documents or images, take pictures, and send or receive text, audio and video, all via a single device. As such, attorneys will be less tied to a fixed workspace or office in the future.

- The workplace will become more collaborative based on the popularity of the social media model. Internet sites such as Facebook and YouTube have revolutionized how people communicate and share information. It is likely that the government and private organizations will become more collaborative in nature through the use of more interactive websites, video-conferencing and document sharing.

- The Law Department will benefit from new software advances. Case management software can help track cases, clients and deadlines. Litigation support software is currently being developed that will aid in managing e-discovery. New software such as Adobe Acrobat 8 will make document management easier. Legal research software is also expected to become more user-friendly and less costly in the future.

- The demand for legal work is expected to increase into the future. Along with the trend for flexibility in terms of work schedule, it seems apparent that a variety of alternative flexible staffing options could also be explored.
in order to save on benefits-related costs. The use of part-time employees, whether they are retirees or employees who just want reduced hours for one reason or another, could be explored as a potential way to reduce costs, encourage retention and improve productivity. Tasks currently assigned to attorneys could possibly be shifted to paralegals or outsourced to independent contractors

- The Postal Service may wish to amend current flexible work arrangement policies to address such issues as greater telecommuting and AWS flexibility and expanding such programs to FLSA non-exempt employees.

- With the trend toward “mobile lawyering” on the rise, it is also expected that the Law Department will explore ways to save on real estate costs by consolidating office space and through the use office sharing. Other governmental agencies and private companies are exploring the concept of “hoteling”, a policy whereby management could save costs spent in unnecessary office space and utility costs by having employees give up their in-office workspaces in exchange for home offices and a commitment to provide the employee with a temporary office space when needed.

- As a result of technological advances and current trends favoring telecommuting, it is expected that the Law Department will at least study the “results-only work environment” (ROWE) model. ROWE is driven by the principle that it should not matter when or where an employee works, as long as the job gets done. ROWE appears to be gaining support as an alternative option that could expand an employee’s flexibility, and as such, potentially improve employee retention and productivity.

I. TECHNOLOGICAL CHANGES WILL SUPPORT A MORE EFFICIENT AND COLLABORATIVE WORK ENVIRONMENT

In the past ten years, the Law Department has seen tremendous technological advances which have dramatically changed how we work. Due to these advances, attorneys in the Law Department have the ability to work remotely and are less tied to their physical offices. The most significant technological developments have been remote computer access, BlackBerry phones and scanning.

Attorneys working remotely have the option of signing on with their own home computer or postal provided laptop. While many attorneys in Headquarters are still using desktop computers, in the Field it appears most attorneys have chosen to be
assigned laptop computers. Access with a postal laptop is accomplished through the WebVPN portal.\(^1\) If a home computer is used, the Remote Desktop Protocol (RDP) is used and the work computer must be left on and connected to the network. In addition to working from home, attorneys can also sign on directly to another ACE computer with their password when visiting another Postal installation.

BlackBerrys allow attorneys to check their e-mail and keep in touch with clients and co-workers no matter where the attorney is physically located. Productivity is significantly enhanced as moments of “down time” can now be used to respond to e-mails. This is particularly significant given the high percentage of daily business currently conducted via e-mail. Moreover, the Postal Service telephone system provides for simple and seamless call forwarding so that calls that come in can be redirected to the attorney’s BlackBerry when he or she is out of the office.

Finally, in recent years the Law Department has implemented various protocols that have reduced the amount of paperwork and the need to be located in a fixed physical office. Case files and other important documents are now scanned, and an increasing number of administrative agencies and courts are accepting submissions via e-filing. This trend towards a more “mobile” or “virtual” office is expected to continue to expand into the future.

A. The “Virtual Office”

\(^1\) Although the Management Instruction EL-310-2009-8, discussed later in this memorandum, does not require telecommuting employees to work from home \textit{per se}, it requires that participants work only from an approved alternate worksite. Broadband Internet access is recommended; even though dial-up services may be used, their performance is significantly slower. If the employee uses a home wireless network, it is the employee’s responsibility to ensure that the network is secured to the maximum extent allowed by the wireless device in use, with a preference of Wi-Fi Protected Access (WPA) or a higher security standard. Employees may not use third-party devices, such as public kiosks, which are not always secure.
A “Virtual Workplace” is defined as a workplace that is not located in any one physical space. Rather, several workplaces are technologically connected (via the Internet) without regard to geographic boundaries. Employees are thus able to interface and work with one another in a collaborative environment regardless of where they are in the physical world. In the workplace of the future there may be no commute, no corporate headquarters and perhaps not even an office as many more workers are telecommuting. It is foreseeable that technology will be able to combine the functions of multiple pieces of hardware, such as a personal computer, phone, fax, scanner, electronic organizer, or camera into a single convenient device so the user can use these tools to participate in videoconferences, check e-mail, return calls, upload and download documents, distribute reports, collaborate on projects, conduct research, schedule virtual meetings, scan printed documents or images, and send or receive text, audio and video.

1. Attorneys are increasingly using technology to support mobility.

Smart phones, such as the iPhone, have many different features such as a camera, phone, text-messaging, visual voicemail, portable media player, Internet web browsing and Wi-Fi connectivity. In fact, even laptops may be in danger of becoming outdated as more workers are becoming more comfortable working via smart phone and/or BlackBerry; and as wireless broadband coverage continues to increase. Indeed, the concept of “mobile lawyering” is on the rise. The new high-powered cell phones

---

6 Wi-Fi is the most widely used Wireless Local Area Network (WLAN) technology. A Wi-Fi enabled device, such as a smart phone or BlackBerry can connect to the Internet when within a range of a wireless network.
essentially can serve as a portable office in one’s pocket, giving the attorney access to contacts, calendars, calls, e-mails and the Internet all in one place.\(^7\) The popularity of smart phones has skyrocketed in recent years.\(^8\) Many attorneys are already using their BlackBerrys and smart phones to email their clients.\(^9\) Seventy-one percent of ABA members stated that they sometimes telecommute from a variety of places, such as home, hotels, others’ offices, libraries, courthouses, coffee shops and cafes. Many places, including libraries, are now offering free Wireless Internet access, making it even easier to telecommute. Ninety-five percent use computers away from the office, 89 percent use laptops and seventy-nine percent use BlackBerrys or smart phones.\(^10\) Many applications are being added to these smart phones for the attorney to use in connection with his or her work, such as applications to do legal research, manage documents in Microsoft Word, Excel or PowerPoint formats, and manage tasks and to-do list.\(^11\)

Another technology that is rising in popularity is the ability to download books to an e-reader or iPad. The iPad is a tablet computer developed by Apple that is marketed as a platform for audio and visual media such as books, periodicals, movies, music and games, as well as web content. Its size and weight are between those of most contemporary smart phones and laptop computers.\(^12\) A recent study indicated that many more mobile workers planned to purchase an iPad in coming months, rather than

---

\(^7\) See www.entrepreneur.com, Plug in or Tune Out? (Jan. 6, 2010).
\(^8\) See www.abanet.org, Smart Phone Buying Guide (Feb. 2010).
\(^12\) www.wikipedia.org.
a traditional PC for work purposes. There is even a new iPad application that helps litigators with jury selection.

Many people are no longer buying books, but are instead downloading them to their e-reader or iPad. As such, it is foreseeable that more businesses, including attorneys, could use e-readers in connection with their work in the future. The use of e-readers would also support the trend of mobility since instead of having to carry around voluminous files; the attorney could download all the information on one device. Instead of printing out transcripts, voluminous discovery, or investigations, it is likely the attorney could use the e-reader in order to prepare witnesses and at hearing. E-readers could also be used in meetings since each participant could download the report and follow along in the meeting on the e-reader.

There are obvious security issues which companies have to consider in line with what is coming in terms of new technology. Laptops, BlackBerrys and smart phones can be easily lost and/or stolen. As a result, the information on these devices is at a significant risk. In light of these risks, the use of encryption software, anti-spyware, anti-virus software and mandatory passwords is also on the increase. With the advent of this new technology and easier access to the Internet, employees also become more able to blur the lines between personal use and work use.

2. The use of video is likely to increase in the legal field.
Videoconferencing is becoming cheaper and easier to do. As a consequence, it is likely we will be seeing the increased use of video in the legal profession. More attorneys will be taking video depositions and doing witness preparation via video.\textsuperscript{18} The use of video for conferences and hearings is likely to increase. In terms of the legal community in general, the New York State courts have a video conference unit, where attorneys can make video court appearances, conduct attorney-client interviews and set up video conference meetings.\textsuperscript{19} In Michigan, the Supreme Court posts online video of its oral arguments, administrative hearings and administrative conferences to be posted on the State Bar website.\textsuperscript{20} The Seventh Circuit has started an e-mentoring project which permits young attorneys to have video discussions with distinguished jurists and trial lawyers.\textsuperscript{21} The MSPB and EEOC regularly request video hearings in Postal cases, and many of the attorneys have participated in such hearings. As budgets continue to be cut, and videoconferencing becomes cheaper to use, it is likely that the trend towards the use of video in order to defray travel costs will increase in the future.

3. **The Law Department could benefit from the new technology.**

Attorneys currently rely upon a sometimes overextended remote network infrastructure to access their in-office desktop resources. Before adding new hardware or software, upgrading the WebVPN network should be a priority that would result in immediate productivity improvements. There is significant anecdotal evidence of problems ranging from inability to log on at the start of the work day, to getting kicked off the remote network and slow operation at certain times of the day.

\textsuperscript{18} See \url{www.abanet.org}, Video Depositions: Essential, Resources (April 2010).
\textsuperscript{19} See \url{www.courts.state.ny.us}.
\textsuperscript{20} See \url{www.michbar.org/courts/virtualcourt.cfm}.
\textsuperscript{21} See \url{www.abajournal.com}, Video Mentors (Aug. 1, 2010).
It is foreseeable that the Law Department will invest in laptops or other mobile devices, like e-readers or iPad-like devices, so that attorneys to have ready access to files and documents, as well as videoconferencing, wherever they are located. No longer would information access be limited to just the workplace or a home office. Nor would remote employees have to rely on the VPN network for access to files stored on their office hard drives, which would both facilitate employees' access to these files and reduce the VPN server load for purposes of access to files residing on the Law Department’s shared network. This type of change will be required for the Law Department to bring its remote computing capabilities in line with other government agencies and private law firms as we move into the next decade.

B. Collaboration Based On A Social Media Model

The Law Department has begun to employ technology that permits it to be more collaborative in nature. MeetingPlace is used for teleconferencing, NetMeeting for information sharing and for limited document sharing, and the Law Department website is used exclusively for document sharing. It is not unusual to get a mass e-mail from a Managing Counsel from a Field office or from Headquarters concerning cases of national interest. Many times Headquarters holds information sessions via teleconference and/or web conference. This trend towards information sharing and collaboration in the workplace is expected to continue.

The popularity of social networking sites, online sites where users can interact with each other over the Internet and share ideas, pictures, videos, events and interests within their individual networks, such as Facebook, MySpace, Twitter, Flickr, YouTube,
and LinkedIn is on a constant rise.\textsuperscript{22} As SKYPE, a web service that allows callers to make video telephone calls over the Internet\textsuperscript{23}, is becoming increasingly popular, the increased use of video for further collaboration in the business context is likely.

1. Using social media to further collaboration and information sharing.

Private companies and the government are beginning to use social media websites to easily disseminate information and solicit commentary from a wide range of individuals and in a much quicker and more collaborative way through the Internet.

“Blogs, microblogs and social networking sites have expanded the ways in which people and organizations communicate.”\textsuperscript{24} Social networking websites have become increasingly popular during the past few years as a way to collaborate and disseminate information among a wide range of people in a quick way.\textsuperscript{25} The Obama Administration has signed an Executive Order calling for all departments and agencies to “establish a system of transparency, public participation and collaboration”.\textsuperscript{26} To date, nearly all major federal agencies are using social media.\textsuperscript{27} As of June 2010, approximately 56 percent of attorneys responded that they maintain a presence in an online community/social network such as Facebook, LinkedIn, LawLink or Legal OnRamp. Respondents in the 30-39 year old age group were most like to maintain a presence (77 percent), with the 40-49 year old age group following closely behind (68 percent). The highest percentage of respondents (83 percent) maintained a presence in LinkedIn.\textsuperscript{28}

\textsuperscript{28} See www.abanet.org, The Linked-in Lawyer: How Lawyers are Using Social Networks (June 22, 2010).
\end{flushleft}
Based on the popularity of social media, it is likely that in coming years we will see the use of social media change from being used in a purely personal way or as a marketing tool, to a collaborative tool to be used internally within the workplace. Younger workers have grown up using the Internet and are comfortable transitioning the use of their social networking tools into the business environment. Indeed, it is already happening. Government agencies and private companies are creating internal networks based on the social media model where employees can share files, individuals can share individual knowledge and experience through the use of blogs, and forums or bulletin boards are created in order to further collaboration and to keep employees better connected. General Electric has created an internal social network called Support Central, which boasts 400,000 users in more than 6,000 locations around the world. NASA has created an internal networking site called Spacebook. It was created because of a need to improve teamwork, communication and access to information across the agency’s diverse projects and centers. The State Department is working on launching a social network called “Statebook” to link diplomats and employees via a Facebook-style system. Just recently, the U.S. Merit Systems Protection Board (MSPB) announced that it has joined the information network Twitter.

29 See id.
30 See www.inc.com, How to Use Internal Collaboration and Social Networking Technology (March 31, 2010).
31 See www.itbusinessedge.com, GE Nails the Internal Social Network (July 21, 2008).
33 See www.socialtimes.com, State Department to Model Internal Social Network After Facebook (April 14, 2010).
The MSPB plans to use the site for new studies or publications, oral arguments, case reports, newsletters, Federal Register notices, or website updates.  

While the social media model is not likely to go away anytime soon, the model has its weaknesses in the business setting. A business site based on such a model would have to address issues concerning appropriate content and use.  

Another concern would be whether the data contained on the site would be subject to the FOIA, the Privacy Act, and/or e-discovery.  

Since the social media model is Internet-based, there would be security concerns such as data protection and increased risk of cyber threats to consider as well.  

2. The use of videoconferencing could support collaboration.  

Videoconferencing and webconferencing are emerging as a cheaper way for employees to share information and to collaborate better on projects. Fewer on-site meetings could mean reduced travel costs, less time wasted on travel and a healthier planet.  

In the Law Department, meetings are regularly held via teleconference or via webconferencing. Video conferencing has the potential to establish rapport that can be hard to build without the benefit of face-to-face interaction.  

As such, it is another tool the Law Department should consider to increase efficiency and promote a more collaborative environment than teleconferencing alone can promote.  

3. Cloud computing could increase collaboration.

37 See Section A.3.  
39 See id.
Cloud computing, otherwise known as Software as a Service (SaaS), refers to a category of software that is delivered over the Internet to a Web browser (like Internet Explorer) rather than installed directly onto the user’s computer. The Law Department is already using cloud based computing when attorneys and paralegals use Westlaw and LexisNexis.\textsuperscript{40} Another example of a cloud-based application would be social networking sites, such as Facebook or MySpace. Google Docs, which is a free, Web-based word processor, spreadsheet, presentation, form and data service offered by Google is also a cloud-based application. It allows users to create and edit documents online while collaborating in real-time with other users.\textsuperscript{41}

The cloud computing model holds appeal for attorneys for a variety of reasons. Collaboration in “the cloud” allows individuals to communicate and share information easily since all the applications and data reside on the Internet, any authorized user can view documents, collaborate and generate ideas and provide information.\textsuperscript{42} Off-site data storage is the defining characteristic of cloud computing. Instead of being saved to an individual’s computer or server in the office, data would be saved to an off-site location under the administration and control of a SaaS vendor.\textsuperscript{43} The benefits of such technology would be increased mobility and decreased need to have large servers to store data.\textsuperscript{44} However, there are obvious concerns with the security risks of storing data in “the cloud” where the attorney does not have immediate control over the data.\textsuperscript{45} There is also the risk of protecting the data and the increased risk for cyber threats.\textsuperscript{46} A

\textsuperscript{44} See id.
\textsuperscript{45} See id.
\textsuperscript{46} See [www.depo.com](http://www.depo.com), Examining the 4 Areas of Business Social Networking Risk (August 2010).
company could theoretically set up an “internal or private cloud” structure in order to mitigate some of the potential security risks.\(^\text{47}\)

4. The Law Department could benefit by exploring new collaborative options. At this time the Postal Service is developing a Social Media Policy for possible issuance later this year. However, social media, video-conferencing and real-time collaborative tools that permit employees to work on a document from different locations in real-time remain foreign to the Law Department’s work environment. Such tools could help create a more collaborative work environment and more efficient information sharing among the Law Department as a whole.

C. New Software Programs

Changes in software have radically changed the way we work and how we can be more efficient in our jobs. In the Law Department, we have seen LawManager software implemented as an update to the old Wildcats system. This software has helped us keep better track of our cases. We have also implemented Litigation Hold software in order to comply with our e-discovery obligations. It is expected that in the next ten years, attorneys will be trying to find better ways for organizing and managing their electronic documents, discovery and files.

1. Attorneys will better manage their cases and files electronically.

Case management software can help track cases, clients, and deadlines.\(^\text{48}\) Litigation support software is designed to aid lawyers in the process of litigation, and generally includes databases for organizing, searching, and reviewing discovery

\(^\text{48}\) See [www.abanet.org](http://www.abanet.org), Practice and Case Management Software: Comparison Chart.
material including deposition transcripts, produced documents, and correspondence.\textsuperscript{49} For litigators, deposition and transcript-review software programs, such as TextMap and Live Note, can be efficiency boosters since the attorney can annotate, bookmark, link and highlight sections of the transcript. The result is a transcript that is easier to search.\textsuperscript{50} This software has the potential to make attorneys more efficient in their jobs.

2. \textit{Adobe Acrobat 8 will make document management easier.}

Adobe Acrobat 8 has significant benefits for attorneys and paralegals. The encryption technology is easy to use. As such, it is easy to protect sensitive information from accidental disclosure. It is also easy to convert documents into a single, polished, searchable Adobe PDF package for e-filing. There is a redaction feature that makes responding to discovery responses and FOIA/Privacy Act cases much faster and easier. Attorneys and paralegals can easily Bates number their documents and combine documents for filing.\textsuperscript{51} All of these benefits assist the Law Department in becoming more efficient.

3. \textit{Legal research software is expected to become more user-friendly and less costly.}

Westlaw and LexisNexis are also planning on creating a legal research experience that users have come to expect from Google.\textsuperscript{52} The new LexisNexis will be more user-friendly and display the results in a variety of intuitive ways. Shepard’s citation service is incorporated into every case and can be viewed graphically. The new LexisNexis also provides tools for collaboration, allowing for storage to work folders for

\textsuperscript{49} See \url{www.abanet.org}, Litigation Support Software Comparison Chart.
\textsuperscript{50} See \url{www.westlaw.com}, Switching Gears? Let Technology Help (January 2010).
\textsuperscript{51} See \url{www.abanet.org}, Adobe Acrobat 8 Professional: Reasons to Put it on your Shopping List (March 2007); \url{www.abajournal.com}, Acrobat 8 Does Flips for Attorneys (March 19, 2007).
\textsuperscript{52} See \url{www.abajournal.com}, Wired (Feb. 1, 2010).
later reference.\textsuperscript{53} WestlawNext will also be aiming to be easier to use and more aesthetically pleasing and promises tools for workflow collaboration.\textsuperscript{54}

In addition to the changes coming to Westlaw and LexisNexis, in recent years we have seen that the ability to do legal research for free has increased and this trend is expected to continue. In 2009, Google came out with a Google Scholar online search where anyone can type in case names, topics or key words to find relevant case law.\textsuperscript{55} We have also seen many agencies that the Law Department deals with regularly, such as the Department of Labor, Equal Opportunity Commission, Merit Systems Protection Board and the National Labor Relations Board post laws, guidance, regulations and in some instances, case law, on their public websites.\textsuperscript{56} The Code of Federal Regulations can also be searched for free online.\textsuperscript{57} All of these changes will likely result in cheaper, more user friendly legal research tools.

4. \textbf{The Law Department has the potential to become more efficient through the use of new software technology.}

As legal software becomes more user-friendly and less costly, it is foreseeable that the Law Department will be looking into purchasing software that will make case management and litigation more efficient. In fact, the IT Department is currently looking into obtaining software in order to better manage its e-discovery obligations in accordance with the Electronic Discovery Reference Model (EDRM) model. The purpose of such software would be to better manage e-discovery in large cases, such as class actions.

\textsuperscript{53} See id.
\textsuperscript{54} See id.
\textsuperscript{55} See \url{www.abajournal.com}, Google Offers Legal Research for the Average Citizen—and Lawyers, Too (November 2009).
\textsuperscript{56} See \url{www.dol.gov}; \url{www.eeoc.gov}; \url{www.mspb.gov}; \url{www.nlrb.gov}.
\textsuperscript{57} See \url{www.gpoaccess.gov}.
As it already has a contract with LexisNexis, it is also likely that the Law Department will benefit from the changes coming in the near future. It also would be helpful to disseminate information as to the free research tools available so they can be used to support the attorneys’ and paralegals’ legal research efforts and cut costs spent on LexisNexis and other paid legal research web sites.

II. ANTICIPATED CHANGES IN THE STAFFING PARADIGM

A. The Demand For Legal Professionals In The Next Ten Years

The Bureau of Labor Statistics (BLS) predicts that by 2020 there will be a 13 percent increase in the number of attorneys, a 28 percent increase in the number of paralegals, and an 11 percent increase in the number of administrative assistants. BLS projections are based on growth in the population, growth in legal transactions, and growth in demand for lawyers as a result of legal problems resulting from the downturn in the economy.

As set forth above, the largest predicted increase by far is the increase in paralegals. In the private sector, clients are demanding more efficient, lower cost legal services. One way of accomplishing that objective is further utilization of paralegals. Some activities currently performed by attorneys can be done by paralegals – and more cost effectively. The most frequently mentioned work shifting topics are document review and the preparation of routine documents. Paralegals could also have an expanded role in the Law Department, such as assisting in the preparation of routine filings for the Postal Regulatory Commission, drafting and responding to discovery requests, preparing MSPB Agency Files, interviewing prospective witnesses, and drafting dispositive motions, thereby freeing up attorneys to provide client advice and
handle more complex transactional and litigation-related legal tasks. Work shifting from attorneys to paralegals may, however, be more pronounced in the private sector as the salary gap between the two positions is more pronounced.

The increased need for administrative assistants is in turn driven by the increase in attorneys and paralegals. Although attorneys and paralegals will increasingly perform their own administrative tasks, more administrative assistants will be needed to handle the larger workload and perform tasks such as scanning documents, organizing files, and preparing and mailing documents in electronic format.

B. Staffing Options

Managers in the next ten years will need a flexible organization and flexible staffing that can be quickly adjusted to address new problems and challenges. The Postal Service faces the potential for change in the next ten years even more so than most organizations. As the Postal Service’s Chief Human Resources Officer, Anthony Vegliante recently told the Washington Post, “we don’t have a continually growing environment, we have a shrinking environment so we ... need to be flexible.”

The current staffing model for the Law Department is comprised almost exclusively of full-time career employees. Since the Postal Service, as an employer, has much in common with other large employers, public and private, the developing staffing trends of such employers can be useful in informing the Law Department as it makes staffing decisions over the next ten years. These trends include the use of part-time employees, retirees and contractors/outsourcing. Although there is some overlap between these categories of employees, they will be discussed separately.

---

The increased use of part-time employees.

The U.S. Bureau of Labor Statistics considers employees working fewer than 35 hours per week to be part-time employees. According to the U.S. Bureau of Labor Statistics, part-time employment now accounts for approximately 16 percent of the workforce. While the recent economic downturn has generated more part-time employment as a matter of economic necessity, there is evidence of a desire among professional employees to elect part-time status.

The use of part-time staffing has obvious economic advantages to an employer, including a reduction in expenditures for wages and benefits and an increase in employee satisfaction. In addition to the tangible economic benefits of part-time employment to the employer's bottom line, there is at least one study which indicates that implementing staffing flexibility options, such as part-time employment, significantly increases employee engagement and reduces employee turnover. Studies done in the last two years indicate that, among 1,100 employers with more than 50 employees, approximately 40 percent allowed some employees to migrate back and forth between part-time and full-time employment. Additionally, 53 percent of employers allowed some employees to reduce their hours prior to retirement; and 25 percent allowed most or all employees to phase into retirement.

The use of part-time attorneys is gaining traction in both the private and public sectors. For example, in a study cited by the “Project for Attorney Retention”, the number of part-time partners in private law firms increased from 1.6 percent in 1999 to 3

60 Adrienne Fox, Part-Timers Makes People Strategy Whole, HR Magazine, August 2010.
61 Id.
62 Id.
percent in 2008.\textsuperscript{63} This same study concluded that part-time partners in private law firms made significant contributions as mentors and role models. In the Federal sector, the Department of Justice (DOJ) offers the availability of part-time scheduling for its attorneys and other employees. DOJ’s policy cites “the desirability of making maximum use of available human resources, including those qualified individuals who are available for part-time employment.”\textsuperscript{64} DOJ provides for part-time work opportunities for positions in all grade levels, subject to its resources and mission requirements, and has focused anew on part-time work opportunities in order to respond to increasing numbers of childbearing-age women in the workforce, dual career and single-parent households and an aging workforce supporting elderly parents. In DOJ’s assessment, part-time employment can be another valuable tool to attract and retain well-qualified employees.\textsuperscript{65}

The Postal Service currently discourages the use of part-time employees by counting a part-time employee the same as a full-time employee for purposes of complement control. Using both the public and the private sectors as a model, we recommend that the Law Department consider the possible expanded use of part-time employees, as well as policy changes that would support such expanded use.

2. The increased use of Independent contractors/outsourcing.

The use of independent contractors/outsourcing presents another opportunity for maximum flexibility in adjusting the size and composition of the Law Department’s workforce to changing needs. In the private sector, law firms are taking advantage of

\textsuperscript{63} Cynthia Thomas Calvert, Linda Bray Chanow and Linda Marks, \textit{Reduced Hours, Full Success: Part-Time Partners in U.S. Law Firms}, The Project for Attorney Retention, 2009.

\textsuperscript{64} See, USDOJ: JMD: \textit{Worklife: Part-Time Employment and Job Sharing Fact Sheet}.

\textsuperscript{65} Id.
outsourcing, including sending work overseas to countries such as India. In the years between 2002 and 2006, American law firms outsourced more than three million legal jobs to foreign countries. The Bureau of Labor Statistics estimates that by 2015, Indian employees performing outsourced legal work for private sector American law firms will generate $970 million; up from $52 million in 2002. Clearly, outsourcing in the private sector legal environment is a growing trend.

The use of contractors or outsourcing carries with it the advantage of paying only for services actually rendered, without any long-term or collateral obligations for wages or benefits. This approach can also be easily adjusted to meet the current needs of the Law Department, thereby achieving maximum flexibility.

3. The potential for expanded use of retirees.

Hiring retired employees, either as part-time employees or as independent contractors, appears to be an ascending trend in the private sector, and could make good business sense for the Law Department. The Postal Service estimates that up to 300,000 of its employees will become eligible to retire in the next decade. This pool of former workers could be a tremendous asset to the organization. An AARP-sponsored study of 1,500 workers aged 45 to 74 found that 69 percent planned to work in some capacity after their retirement. Retirees typically work after the end of their careers not only for wages or benefits, such as health care, but also for the intangible benefits of enjoyment and a sense of purpose. Even though many want to work, often they do not wish to continue working full-time. Rather, retirees want work that offers flexibility.

---

In February 2009, legislation was introduced in Congress to facilitate the use of part-time employees and the re-employment of retirees by Federal agencies. This legislation was designed to ease the financial complications of returning retired employees, both in terms of eliminating the offset of their retirement annuity and by providing retirement credit for CSRS employees for part-time work performed for their agencies.\(^{69}\)

In March 2009, the Office of Personnel Management (OPM) issued directives encouraging Federal agencies to re-employ Federal retirees possessing experience in a number of areas (e.g., human resources, contracting, project management and grants management). While the wages of re-employed retirees are offset by their annuity payments, OPM or the re-employing Federal agency can waive this offset for select returning employees with crucial skills. The Government Accountability Office (GAO), in a February 2009 study involving four Federal government agencies, found that there was a significant pool of highly qualified retired Federal employees available for employment in the Federal sector.\(^{70}\)

The knowledge and experience of retired employees can provide real value to the Department as it moves forward in the next decade. Further, there is clear support in Congress for the idea of maximizing the re-employment of retired Federal employees by their former agencies. The feasibility and value of the use of retired employees as independent contractors is already well demonstrated in the Postal Service. The EEO investigation function has been outsourced to contractors, a significant number of whom are retired Postal Service employees. Using retired Law Department employees as

---

contractors to provide ancillary support service in any number of Law Department functions, such as legal research, document examination in large cases, tort claims processing, or routine motion preparation would provide a clear benefit to the Law Department. There is very little in the way of training cost for retired Law Department employees. Likewise, there is virtually no “ramp up” period for these retirees; they could be ready to fully function immediately upon starting work. PCES Executives in the Law Department have a current average age of 54 and the attorney population is only slight younger at 47. As the Postal Service Law Department workforce continues to age and retire, this avenue of human capital will become more and more available.

III. EXPANSION OF FLEXIBLE WORK ARRANGEMENTS

Telework and other alternative work arrangements comprise another area of office management in which the next decade can be expected to bring changes. The current Presidential administration and Congress have prioritized the expansion of telework in the federal government, and private-sector employers increasingly are making headlines with innovations from customizable staggered schedules to “results-only work environments.” Over the next ten years, we anticipate that the Law Department may need to expand and even rethink its approach to alternative and flexible work arrangements, even beyond the parameters applicable to the Postal Service at large, in order to recruit and retain staff on par with other legal services employers.71

71 As used in this memorandum, “telework” or “telecommuting” refers to an employee’s ability to perform work duties at a site other than his or her work station on Postal Service premises. In Postal Service terminology, “alternative work schedule” means a schedule whereby an employee works extended days during a given period, such that the expected 40-hour work schedule is fulfilled during those days and the employee need not report to duty on the remaining day or days. This memorandum will refer to telework and AWS collectively, as well as any other arrangements that might be relevant to a given context, as “flexible work arrangements.”
A. History Of The Current Postal Service Policy

In 2005, the Law Department began a pilot program to test the feasibility of telework and AWS. Human Resources largely adopted the Law Department’s model when it established the first organization-wide telework and AWS policy on September 1, 2008. Management Instruction EL-310-2008-3 allowed employees exempt from the Fair Labor Standards Act (FLSA) to work up to one day a week at an alternate worksite, subject to management approval and review, attendance and work-suitability considerations, employee certifications, and compliance with information technology (IT) and work station requirements. The 2008 Management Instruction also allowed employees to enter alternative work schedule (AWS) arrangements upon certifications and management approval and review.

The Vice President, Employee Resource Management, updated and expanded Postal Service policy in Management Instruction EL-310-2009-8 (October 9, 2009), which replaced its 2008 counterpart. The 2009 Management Instruction expanded the previous limit of one telework day per week to three days per week and also clarified the options for AWS as follows: (1) one five-day week of eight-hour days and one four-day week of ten-hour days; (2) one five-day week of four nine-hour days and one eight-hour day, and one four-day week of four nine-hour days; or (3) two four-day weeks of ten-hour days. The Law Department expanded its previous two-day-per-week telework limit to a three-days-per-week limit commensurate with the new Management Instruction.

The majority of eligible FLSA-exempt Law Department employees participate in telework arrangements, rather than in AWS arrangements. Although the Management Instruction and the General Counsel’s 2008 email require employees with verbal
managerial approval to enroll via Human Resources’ Flexible Work Arrangement Application website (http://fwaa.usps.gov), anecdotal evidence indicates that at least some managers have preferred to handle telework arrangements less formally, based on week-to-week in-office staffing needs.

B. Rationale And Benefits Of Flexible Work Arrangements

As described in Management Instruction ELM-310-2009-8, the Postal Service established flexible work arrangements are “designed to increase employee morale and efficiency[.]” The Postal Service considers their purpose to be:

- to enhance the Postal Service’s efforts to recruit and retain top talent, help conserve energy and reduce CO2 emissions by eliminating up to three commuting days, and to contribute to employee preparedness to work at home during emergency Continuity of Operations Plan (COOP) events.

At least the environmental and commuting-related benefits are borne out by organization-wide data. Based on a combination of Postal Service-specific and general demographic statistics, Human Resources currently estimates that if Headquarters employees spend an average of one day per week telecommuting, the program will have saved 85,804 gallons of gasoline and 839 tons of carbon dioxide emissions per year, equivalent to removing 159 cars from the road each year.72

Personal expense savings for employees are also palpable. According to an August 6, 2010, summary report from the Postal Service’s Flexible Work Arrangement Application, 86.77 percent of the 7,024 participants surveyed primarily commute to work via car, and more than half spend over an hour commuting roundtrip each day.

72 These estimates focus exclusively on the environmental impact of reduced commuting. They do not account for potential inefficiencies such as, for example, the fact that more environmental resources may be spent heating, cooling, and powering the employee’s alternate work site in addition to persistent environmental costs at the (likely more efficient) office worksite. See Brian Palmer, “How Green Is Telecommuting?,” Slate.com, September 7, 2010, available at http://www.slate.com/id/2264177/ (citing Erasmia Kitou and Arpad Horvath, “Energy-Related Emissions from Telework,” 37 ENV. SCI. TECH. 3467 (2003), available at http://pubs.acs.org/doi/abs/10.1021/es025849p).
Although it is not expressly measured, one can easily infer a significant quality-of-life benefit when employees realize an additional measure of personal time that would otherwise be spent commuting.

Telecommuting offers potential to increase employee fitness, with direct and indirect effects on productivity. Less work-related commuting time can translate into more time for exercising, home meal preparation, and sleep, all of which contribute to employee health and productivity. Employees may also choose to telecommute instead of taking leave when they or family members are sick, which both increases their own productivity and reduces their colleagues’ exposure and resultant potential need to take sick leave.73

The Postal Service’s rationale and findings correspond to those cited by other federal agencies. For example, in an August 2009 report to Congress, the Director of the Office of Personnel Management (OPM) praised telework programs’ demonstrated ability “to help individual employees successfully balance the responsibilities of work and family, increase the safety of neighborhoods,74 and reduce pollution.” The Director also described employees’ saved commuter costs, agencies’ emergency-planning needs, and the goal of “green workplaces” as underpinning telework policies.75

Employers can also benefit from reduced real estate and utility costs, increased productivity, and decreased sick leave and workers’ compensation usage.76 As the

73 Of course, managers should not require or induce employees to abstain from sick leave in favor of telecommuting. Nor should employees opt to continue working if their health and productivity would clearly suffer as a result.
74 That is, telecommuting employees can notice, report, and even deter suspicious activity near their residences or other remote worksites during the workday hours, whereas in-office employees cannot.
GAO report points out, employers also benefit indirectly from telework’s direct benefits to employees, because management of commuting costs and other work/life-balance issues can increase employees’ personal happiness and, consequently, their effectiveness and satisfaction in their jobs.\textsuperscript{77} The recruitment and retention benefits of telework are especially palpable as new generations of workers “have high expectations of a technologically forward-thinking workplace.”\textsuperscript{78} The U.S. Patent and Trademark Office and the Nuclear Regulatory Commission have attributed to their telework programs an essential role in fulfilling their aggressive recruitment goals.\textsuperscript{79} A 2007 report by the Office of the Inspector General (OIG) for the Equal Employment Opportunity Commission (EEOC) found that a “frequent telework” pilot program would increase productivity, employee work-life balance, and continuity of operations, while allowing the OIG to capture real estate savings of $2,216 \textit{per teleworker, per year}, even where the OIG paid for the teleworkers’ home office equipment and Internet connectivity.\textsuperscript{80}

This suite of benefits has been recognized across decades of telework innovation.\textsuperscript{81} It has also been acknowledged as underlying private firms’ growing offering of telework programs in an effort to cut costs and recruit and retain legal

\textsuperscript{77} Id. at 4.
\textsuperscript{78} Id.
\textsuperscript{79} Id. at 5-6.
Perhaps due to the intellectual nature of their work and their drive to maximize client value, private law firms in particular have been aggressive at implementing flexible work arrangements.83

C. Limitations of Flexible Work Arrangements

1. In general.

Discussions of telecommuting traditionally note managers’ concerns about the potential for actual or perceived loss of control over employee work activities. One might reason that the home environment presents distractions absent from an office workplace, resulting in diminished productivity. While these concerns may be justified in some cases, an overwhelming majority of employees are likely to have a suitable work ethic, which can be reinforced by effective management and enhanced communication. In the Postal Service’s case, the Management Instruction makes clear that telework participation is a privilege, not a right, and that it is subject to managerial planning, consultation, approval, review, communication, and even revocation. The burgeoning of telework programs in the economy at large is a testament to a growing perception that the overall productivity gains and other benefits outweigh the exceptional instances of

employee exploitation. Nevertheless, the lingering presence of work-ethic concerns can be an obstacle to expansion of telework programs, due both to managerial reluctance and to employees’ own lack of confidence in their productivity as telecommuters. In organizations that have implemented flexible work schedule programs, managers still often thwart participation by refusing to grant approval.

The regularity of out-of-office days under an AWS work schedule can theoretically present a risk that the office will be understaffed on a given day. As with work-ethic concerns about telecommuting, the spread of alternate work schedule programs in the American economy indicates that employers are capable of finding ways to accommodate a need for balanced staffing levels with such programs.

2. Limitations specific to the Postal Service.

Other limitations are specific to the Postal Service’s policies and infrastructure. For example, the Management Instruction is limited to FLSA-exempt employees. This means that Law Department attorneys and Business Services staff are eligible for telecommuting and AWS, but paralegals and administrative assistants are not. The Management Instruction also proscribes participants from combining telework and AWS, or from taking personal leave on a day when the participant is telecommuting. As noted above, the Management Instruction sets a limit on the number of days a participant can telecommute or have free due to AWS. Although it is not expressly included in the Management Instruction, it appears that there is a general policy that managers may not engage in AWS and may telecommute only one day per week at most. The basic approach underlying the Management Instruction is that
telecommuting is an exception to the general rule of in-office attendance, and not the other way around.

The Postal Service does not reimburse employees for utility costs incurred while telecommuting, including Internet access, home computers, or work-related telephone usage. Employees are not usually provided with workstations or other equipment in order to enable them to work at an alternate worksite, although some Law Department offices, particularly in the field, have authorized Postal Service-issued laptops at various times in recent history. Employees choosing to participate in the program using non-Postal Service-owned equipment will not receive support or service for that equipment from the Postal Service Help Desk.

D. Alternative Flexible Work Arrangement Models

The history of flexible work arrangements at large suggests that the current interest is no mere fad.84 If anything, the number of telecommuters is expected to rise within the foreseeable future.85 As employees’ decisions are expected to revolve increasingly around the flexibility of work-life balance alongside traditional pay and benefits factors, the Law Department should keenly consider whether expansion of its own flexible work arrangements would increase employee retention and recruitment, as well as produce other benefits. Further evolution of flexible work arrangements could take many forms, from incremental adjustments of policy to expansion of their scope of application to wholesale redesign. Because of the ten-year horizon for this paper, this

85 See, e.g., Charles Grantham, Jim Ware, and Jennifer E. Swanberg, Flexible Work Arrangements for Nonexempt Employees (2009), at 9 (“More than 17 million employees performed work remotely at least one day per month in 2008. That number is projected to increase to more than 25 million within five years.”) (citations omitted), available at www.worldatwork.org/waw/adimLink?id=33622.
section will examine modest policy changes that focus on practices in widespread use today as well as aggressive flexibility models that may yet develop into best practices.

1. **Potential modifications to existing policy.**

   The most likely scenario for flexible work arrangement changes in the next ten years would involve expansion of already existing postal policies.

   a. **Expansion of telecommuting.**

      The Law Department could go beyond the Management Instruction by allowing an even greater number of telecommuting days per week or per pay period.

   b. **Expansion of personal leave policy.**

      Employees could also be permitted to take personal leave on a telecommuting day, subject again to supervisors’ approval. This prospect could aid employer and employee alike: it could accommodate medical and personal appointments close to the employee’s home, which would mean that the employee could request less leave time due to the reduced travel time. A supervisor and employee could also arrange for the employee to exercise personal leave during core office hours but make up for it with additional work time after hours. In principle, this would not represent a major shift from current practice, as attorneys must sometimes spend additional work-hours on deadline assignments while requesting personal leave at other times. The telework-plus-personal-leave approach would simply grant official sanction to the availability of such flexible work-time arrangements during an individual workday.
c. Permit a Telework/AWS combination.

A related option would be to allow deviations from core hours to meet employee needs, or to allow the combination of telework and AWS. Some employees might desire the flexibility of AWS but decide that it is infeasible for them because of the increased in-office hours, combined with commuting time, in “on” days. The former option could be thought of as “AWS light”: an employee could arrange or request a schedule that involves working on each workday but that varies from day to day in its specific parameters. This would allow the employee to have regular personal time on a workday when that would be advantageous, while only requiring a limited increase in compensatory work-hours elsewhere in the week. Combining telework and AWS, would recognize that the lack of commuting time makes telework days a prime candidate for the lengthened “on” days of an AWS schedule. If the Law Department determines this would require additional monitoring of telecommuting employees, this could be accomplished with additional supervisor involvement or record-keeping. Either option would make AWS more desireable for Law Department employees.

d. Permitting FLSA non-exempt employees to participate in the Telecommuting/AWS program.

Another possibility of going beyond the Management Instruction would be to open both telework and AWS arrangements to paralegals and administrative assistants. There is no legal proscription, even from an FLSA standpoint, for those employees to participate in such programs. It would, however, require strict monitoring and adherence to the employee’s agreed-upon schedule (ELM § 444.231). It is the supervisor’s job to ensure that employees do not remain on
the clock unless they are specifically authorized to do so. Nevertheless, there is significant concern that poorly managed non-exempt telecommuting programs can create significant liability.

From a practical standpoint, it is unlikely that most Managing Counsels and Law Department offices would find workable an arrangement whereby, even depending on workload and upon the manager’s discretion, paralegals could participate in telework and AWS, with administrative assistants continuing to carry out their current in-office duties requiring specialized equipment (e.g., high-speed and color scanners). In consulting with the Postal Service’s Agency Telework Coordinator, the Postal Service is considering expanding AWS, but not telework, to non-exempt FLSA employees, the main issue being one of coverage during employees’ “off” days. A cursory inquiry with the Telework Coordinator as to whether other federal agencies allow non-exempt FLSA employees to participate in these type of programs reveals that very few, if any, do.

2. **Office Real Estate: “Hoteling”**.

One of telework and AWS’s cost-savings propositions is the ability to consolidate office space. This concept requires a change in a fundamental premise of the traditional workplace: instead of distributing cubicles and offices among the total employees, the number of cubicles and offices are allocated based on employees’ in-office time. Put another way, instead of time working remotely being seen as a perk, one can view it as the default and in-office time as the exception that requires accommodation. With enough participation in flexible work arrangements, this would allow management to rotate multiple employees at a non-dedicated work station and shed unneeded office space and utility costs.
The U.S. Patent and Trademark Office (USPTO) has made strides in this area, which it calls “hoteling.”86 Under the USPTO’s Patents Hoteling Program, more than 1,650 patent examiners agreed to give up their in-office workspaces in exchange for home offices and a commitment to reserve two days per pay period at the USPTO’s temporary offices.87 In addition, 147 trademark examiner staff have participated in a similar program, including legal instrument examiners, paralegals, legal document review clerks, and other non-attorney staff.88 Even among the USPTO’s Office of the General Counsel (OGC),

[s]ome OGC employees have given up dedicated offices in order to enable office-sharing, where two employees can share the same office and workstation on alternate days. Although there are times an employee needs to come in on their telework day, there are hoteling offices available that they can use to access their virtual workstations on those days. OGC teleworkers have been able to design their individual telework routines, thus providing them needed flexibility without negatively impacting their coworkers or the OGC business process.89

The USPTO’s hoteling programs are intrinsically motivated by the need to reign in real estate costs.90 In practice, the USPTO credits the programs with enabling it to avoid $11 million in new office space purchases and to hire 1,000 employees per year without adding office or parking space.91 A similar hoteling program at the Treasury Inspector General for Tax Administration has saved an estimated $1 million per year.92

In the 1990s, a hoteling program enabled the Federal Railroad Administration to close

86 The terms “hot desking,” “free address workstations,” “touchdown workstations,” and “desk sharing” describe minor variations on the same concept. General Services Administration, “Alternative Workplace Solutions,” www.gsa.gov/portal/content/102702 (last visited September 16, 2010).
88 Id. at 7.
89 Id. at 10.
90 Partnership for Public Service and Booz Allen Hamilton, On Demand Government: Deploying Flexibilities to Ensure Service Continuity (July 2010), at 7.
91 Id. at 7-8.
92 Id. at 8.
18 field offices and consolidate several others, for a total savings of $251,929 (in historical dollars).\textsuperscript{93}

Over the next ten years, however, it is possible that cost-cutting pressures could lead the Law Department to explore further consolidation within Headquarters or field offices, between offices near to one another, or even between Law Department personnel and client office space. Field personnel could “ride circuit” between local offices in their selection of convenient temporary workstations. Depending on the calculation of estimated real estate savings, it is possible that it could become cheaper to establish “telecenters” with non-dedicated work stations closer to employees’ homes, in lieu of maintaining centralized office space.\textsuperscript{94}

Apart from the real estate cost savings, it is possible that hoteling could add benefits for employees and the organization beyond those already inherent to telework and AWS. If in-office presence is deemphasized, the Law Department can recruit new employees from within a larger geographical radius, and it can retain existing employees who might be moving farther away. The USPTO recognizes this with its Trademark Geographic Expansion pilot project, whereby trademark examining attorneys with telework experience can move up to 110 miles from headquarters, so long as they report in person twice per biweekly pay period.\textsuperscript{95} Although the prospect of a shared office workstation might turn off some employees, many would likely prefer it if it is closer to their residence than their traditional office, and the chance for more at-home

\textsuperscript{94} The General Services Administration maintains several “telecenters” around the Washington, D.C., commuting area, including one as far away as the eastern panhandle of West Virginia. GSA Telework Centers, \url{www.gsateleworkcenters.org} (last visited September 16, 2010). See also Joice, \textit{The Evolution of Telework in the Federal Government}, at 24-30 (describing the establishment of telecenters in response to local emergencies).

\textsuperscript{95} USPTO, \textit{2009 Telework Annual Report} at 6.
time and reduced commutes might outweigh any lingering discomfort for those employees.

Over the next ten years, we expect the Law Department and the Postal Service at large to explore the opportunity for real estate savings from flexible work arrangements. As a starting point for further study, the General Services Administration has compiled research on “alternative officing” in the private and public sectors.  

3. **Results Only Work Environment (ROWE).**

Perhaps the most extreme cultural change would be to reengineer the workplace, or components of it, as a so-called “Results Only Work Environment” (ROWE). ROWE is driven by a simple principle: it should not matter when or where an employee works, so long as the work gets done. Employees can also choose to work at times when they are most productive as individuals, even when those are outside typical work hours. In lieu of the formal strictures of personal leave and “core hours,” an employee is free to attend to personal or family needs and appointments during the typical workday hours (when many other businesses and government offices are open), while finding other, more convenient times to complete her work assignments.

Instead of indirect proxies for performance like in-office attendance or reported work-hours, a ROWE relies directly on the employee’s ability to meet deadlines, accomplish specified assignments, and achieve high client satisfaction. Supervisors can address productivity gaps through dialogue and workload management, as in a typical full-time office environment, but they otherwise are to let employees distribute their work time according to their own needs and proclivities. Federally-sponsored,

96 General Services Administration, “Alternative Officing Information,” [www.gsa.gov/portal/content/21270](http://www.gsa.gov/portal/content/21270) (last visited September 16, 2010).
empirical research by University of Minnesota researchers indicates that employees in a ROWE environment continue to work approximately the same amount of time and days per week even as their schedules become more flexible.\textsuperscript{97} Meanwhile, the same study shows that ROWE employees perceive significantly better work schedule “fit” with their personal needs and less conflict of work matters with family time than non-ROWE employees, without a significant difference in the spillover of family matters into work time.\textsuperscript{98} Although managers may have reservations about scrapping timeworn work-hours-based models, it appears that ROWE produces a win-win outcome: employers get the same or better performance, and employees get better work-life balance.

ROWE has been claimed to produce many of the same benefits for employers and employees as telecommuting and AWS, albeit at a much greater level. Studies of ROWEs indicate that job satisfaction, productivity, employee health, and cost savings increase drastically in a ROWE as opposed to a traditional workplace.\textsuperscript{99} Many ROWE employees cite the system as a significant factor in their perspective on retention: for example, one survey respondent at Gap Inc. cited her company’s ROWE as the decisive factor in turning down an otherwise more attractive job offer, and a survey at another employer reported a 121-percent increase in the number of employees unlikely to search for a new job within the following year.\textsuperscript{100} Voluntary turnover rates reportedly plunge in ROWE workplaces, with a double-digit change in Best Buy’s turnover rates

\textsuperscript{98} \textit{Id.} at 20-24.
\textsuperscript{100} \textit{Id.} at 12, 14.
and a 40-percent drop at one non-profit organization. Greater control over work
hours also maximizes environmental benefits: not only can employees telecommute, but
even when they come to the office, employees can do so outside of rush hours,
trimming greenhouse gas emissions and non-productive time spent in traffic further. ROWE can also allow employees greater flexibility than telecommuting to get more
sleep, exercise, and home-prepared meals and to reduce the need for sick leave. Under a ROWE, remote employees can have their children or other dependents around
and thereby avoid dependent care costs, so long as performance does not suffer or
non-productive work-hours are made up at another time. Thus, ROWE offers the
potential to intensify each of the cited benefits of telecommuting and AWS and to add
new benefits.

Although ROWE is a new concept, its profile is rising. ROWE originated at Best
Buy's corporate headquarters and has spread throughout the company; it has since
been implemented at the corporate offices of Gap Inc., the IT department of Fairview
Health Services, J.A. Counter and Associates, the non-profit Girl Scouts of San

101 Id. at 6, 14. The University of Minnesota study found that 32.5 percent fewer Best Buy employees
reported turnover intentions in a ROWE, compared with only a 20.7-percent drop among employees in a
control group. Moen and Kelly, Flexible Work and Well-Being Study at 34.
102 After the Girl Scouts of San Gorgonio Council implemented a ROWE, 69 percent of employees shifted
their commutes to avoid traffic and 40 percent reported shaving at least 10 minutes off of each direction
103 The same survey indicates that the number of employees getting at least 7 hours of sleep a night
increased by 112 percent, with 219 percent more reporting at least good-quality sleep. Meanwhile, the
number of employees who lost at least 3 work-hours per month due to illness dropped 82 percent, to 7
percent of all employees, and 71 percent reported themselves as less likely to call in sick. Id. at 13. The
University of Minnesota study also found statistically significant increases in sleep time, exercise, doctor
visits when sick, and energy and decreases in time spent in office when sick. Moen and Kelly, “Flexible
Work and Well-Being Study” at 26-30. However, changes in more nebulous factors like employees’
overall assessment of their health, psychological distress or well-being, emotional exhaustion, sense of
mastery, or physical symptoms were not found to be statistically significant. Id. at 31.
Gorgonio Council, and the legal services outsourcing company Latitude-South. The Twin Cities Metropolitan Area is encouraging local employers to convert to ROWEs in order to reduce traffic congestion. The Office of Personnel Management (OPM) is currently conducting a pilot to study ROWE’s application in federal workplaces. The OPM study involves nearly 400 union and non-union OPM employees, from claims processors to policy makers, both within and outside of Washington, D.C. Participants were selected so as to reflect the overall federal workforce. All members of participating groups are included in the ROWE pilot; participation is not seen as a perk to grant or deny, although employees whose assignments require in-office presence must commit to a necessary amount of such presence in the interest of getting the work done. OPM’s pilot is currently underway, and its final report is expected in February 2011.

To date, it is unclear if the roster of ROWE workplaces includes law firms or other legal services providers other than the outsourcing firm mentioned above. It is also unclear whether the corporations that have adopted ROWE have applied it to their in-

---

108 Id.

109 Id.

110 Id.
house counsel offices or, if so, how ROWE has been implemented in keeping with attorneys' internal and external schedule expectations. Finally, we were unable to determine whether OPM’s pilot program includes federal attorneys, although it does include support staff "to the maximum extent possible."\textsuperscript{111} Thus, while initial studies indicate that a well-designed ROWE can reap substantial savings and benefits for employer and employees alike, further outreach with other ROWE employers’ law offices would be helpful in assessing the likely impact of a ROWE in the Law Department.

Within the next ten years, we expect that the Law Department will monitor developments on ROWE in other organizations, including OPM, and evaluate whether it could and should be implemented in the Law Department.

**CONCLUSION**

The American white-collar workforce is currently amid a trend that challenges the traditional assumptions that tie work performance to fixed places and hours. In the next ten years, businesses, in general, will need a flexible organization that can be adjusted quickly to address new threats and challenges. Baby boomers comprise the majority of the workforce today. By 2015, however, millennials (those born from 1977 to 1997) will overtake them. In 2020, when five generations are simultaneously employed, baby boomers are not expected to represent even a quarter of working Americans.\textsuperscript{112}

“Millennials have a different way of working, and boomers will have to adapt to stay

\textsuperscript{111} OPM, “Frequently Asked Questions for ROWE Employees,” May 21, 2010, at 10. OPM has customized the ROWE model somewhat to account for federal leave, night differential, and general work-hour requirements. See id. at 4-6, 13-14. For example, employees must account for 80 hours every biweekly pay period, without further restriction except for two core hours on each of two designated days per pay period.

relevant.”113 In the not too distant future “team leaders will routinely motivate and manage employees across the globe without ever meeting face-to-face – something today’s younger generation knows about from playing online multiplayer computer games.”114 The millennials want constant feedback, but are perfectly happy to get it online.

Technology increasingly enables real-time collaboration among personnel regardless of their location. Young workers tend to desire a balance between work and personal life that allows them to fulfill personal and family ambitions, and their expectations are framed by their familiarity with the possibilities of virtual communication. Even workers approaching retirement may wish to keep working in a manner that gives them the flexibility to transition toward retirement. Since these trends are not anticipated to abate, one can reasonably expect that the Law Department of 2020 will need to expand its approach to flexible work arrangements and even rethink its approach to the work environment in order to recruit and retain talent in competition with other legal employers. We recommend the Law Department study the options, including promising options outside the current mainstream, and assess carefully the prospective costs, benefits, and possible productivity improvements.

2020 VISION

THE POSTAL SERVICE’S LAW DEPARTMENT IN 10 YEARS

Maureen Briody
Isabelle Dorian
Jacob Howley
Tony Rice
Gillian Steinhauer
David Stanton

October 8, 2010
The Postal Service is preparing itself for the challenges and opportunities that will exist in the year 2020. Similarly, the Law Department needs to develop strategies to address the unique issues that will arise relative to the department in the next decade. Specifically, this paper addresses the following questions:

- What changes in facilities, equipment, and technology are anticipated in 2020?
- What types of legal talent will be needed to meet the Law Department's future needs?
- What changes in work practices and work environment will be required to attract and retain quality professional and administrative employees?

**EXECUTIVE SUMMARY**

- At present, many attorneys are working remotely via a laptop and/or blackberry. This trend towards “mobile lawyering” is expected to continue into the future. Advances in technology will permit attorneys to participate in video-conferences, check e-mail, return calls, upload and download documents, collaborate on projects, conduct research, schedule meetings, scan documents or images, take pictures, and send or receive text, audio and video, all via a single device. As such, attorneys will be less tied to a fixed workspace or office in the future.

- The workplace will become more collaborative based on the popularity of the social media model. Internet sites such as Facebook and YouTube have revolutionized how people communicate and share information. It is likely that the government and private organizations will become more collaborative in nature through the use of more interactive websites, video-conferencing and document sharing.

- The Law Department will benefit from new software advances. Case management software can help track cases, clients and deadlines. Litigation support software is currently being developed that will aid in managing e-discovery. New software such as Adobe Acrobat 8 will make document management easier. Legal research software is also expected to become more user-friendly and less costly in the future.

- The demand for legal work is expected to increase into the future. Along with the trend for flexibility in terms of work schedule, it seems apparent that a variety of alternative flexible staffing options could also be explored.
in order to save on benefits-related costs. The use of part-time employees, whether they are retirees or employees who just want reduced hours for one reason or another, could be explored as a potential way to reduce costs, encourage retention and improve productivity. Tasks currently assigned to attorneys could possibly be shifted to paralegals or outsourced to independent contractors

• The Postal Service may wish to amend current flexible work arrangement policies to address such issues as greater telecommuting and AWS flexibility and expanding such programs to FLSA non-exempt employees.

• With the trend toward “mobile lawyering” on the rise, it is also expected that the Law Department will explore ways to save on real estate costs by consolidating office space and through the use of office sharing. Other governmental agencies and private companies are exploring the concept of “hoteling”, a policy whereby management could save costs spent in unnecessary office space and utility costs by having employees give up their in-office workspaces in exchange for home offices and a commitment to provide the employee with a temporary office space when needed.

• As a result of technological advances and current trends favoring telecommuting, it is expected that the Law Department will at least study the “results-only work environment” (ROWE) model. ROWE is driven by the principle that it should not matter when or where an employee works, as long as the job gets done. ROWE appears to be gaining support as an alternative option that could expand an employee’s flexibility, and as such, potentially improve employee retention and productivity.

I. TECHNOLOGICAL CHANGES WILL SUPPORT A MORE EFFICIENT AND COLLABORATIVE WORK ENVIRONMENT

In the past ten years, the Law Department has seen tremendous technological advances which have dramatically changed how we work. Due to these advances, attorneys in the Law Department have the ability to work remotely and are less tied to their physical offices. The most significant technological developments have been remote computer access, BlackBerry phones and scanning.

Attorneys working remotely have the option of signing on with their own home computer or postal provided laptop. While many attorneys in Headquarters are still using desktop computers, in the Field it appears most attorneys have chosen to be
assigned laptop computers. Access with a postal laptop is accomplished through the WebVPN portal.¹ If a home computer is used, the Remote Desktop Protocol (RDP) is used and the work computer must be left on and connected to the network. In addition to working from home, attorneys can also sign on directly to another ACE computer with their password when visiting another Postal installation.

BlackBerrys allow attorneys to check their e-mail and keep in touch with clients and co-workers no matter where the attorney is physically located. Productivity is significantly enhanced as moments of “down time” can now be used to respond to e-mails. This is particularly significant given the high percentage of daily business currently conducted via e-mail. Moreover, the Postal Service telephone system provides for simple and seamless call forwarding so that calls that come in can be redirected to the attorney’s BlackBerry when he or she is out of the office.

Finally, in recent years the Law Department has implemented various protocols that have reduced the amount of paperwork and the need to be located in a fixed physical office. Case files and other important documents are now scanned, and an increasing number of administrative agencies and courts are accepting submissions via e-filing. This trend towards a more “mobile” or “virtual” office is expected to continue to expand into the future.

A. The “Virtual Office”

¹ Although the Management Instruction EL-310-2009-8, discussed later in this memorandum, does not require telecommuting employees to work from home per se, it requires that participants work only from an approved alternate worksite. Broadband Internet access is recommended; even though dial-up services may be used, their performance is significantly slower. If the employee uses a home wireless network, it is the employee’s responsibility to ensure that the network is secured to the maximum extent allowed by the wireless device in use, with a preference of Wi-Fi Protected Access (WPA) or a higher security standard. Employees may not use third-party devices, such as public kiosks, which are not always secure.
A “Virtual Workplace” is defined as a workplace that is not located in any one physical space. Rather, several workplaces are technologically connected (via the Internet) without regard to geographic boundaries. Employees are thus able to interface and work with one another in a collaborative environment regardless of where they are in the physical world. In the workplace of the future there may be no commute, no corporate headquarters and perhaps not even an office as many more workers are telecommuting. It is foreseeable that technology will be able to combine the functions of multiple pieces of hardware, such as a personal computer, phone, fax, scanner, electronic organizer, or camera into a single convenient device so the user can use these tools to participate in videoconferences, check e-mail, return calls, upload and download documents, distribute reports, collaborate on projects, conduct research, schedule virtual meetings, scan printed documents or images, and send or receive text, audio and video.

1. Attorneys are increasingly using technology to support mobility.

Smart phones, such as the iPhone, have many different features such as a camera, phone, text-messaging, visual voicemail, portable media player, Internet web browsing and Wi-Fi connectivity. In fact, even laptops may be in danger of becoming outdated as more workers are becoming more comfortable working via smart phone and/or BlackBerry; and as wireless broadband coverage continues to increase. Indeed, the concept of “mobile lawyering” is on the rise. The new high-powered cell phones

---

4 See www.officeofthefuture2020.com, Top Technology Tools (June 25, 2010).
6 Wi-Fi is the most widely used Wireless Local Area Network (WLAN) technology. A Wi-Fi enabled device, such as a smart phone or BlackBerry can connect to the Internet when within a range of a wireless network.
essentially can serve as a portable office in one’s pocket, giving the attorney access to
contacts, calendars, calls, e-mails and the Internet all in one place. The popularity of
smart phones has skyrocketed in recent years. Many attorneys are already using their
BlackBerrys and smart phones to email their clients. Seventy-one percent of ABA
members stated that they sometimes telecommute from a variety of places, such as
home, hotels, others’ offices, libraries, courthouses, coffee shops and cafes. Many
places, including libraries, are now offering free Wireless Internet access, making it
even easier to telecommute. Ninety-five percent use computers away from the office,
89 percent use laptops and seventy-nine percent use BlackBerrys or smart phones.
Many applications are being added to these smart phones for the attorney to use in
connection with his or her work, such as applications to do legal research, manage
documents in Microsoft Word, Excel or PowerPoint formats, and manage tasks and to-
do list.

Another technology that is rising in popularity is the ability to download books to
an e-reader or iPad. The iPad is a tablet computer developed by Apple that is marketed
as a platform for audio and visual media such as books, periodicals, movies, music and
games, as well as web content. Its size and weight are between those of most
contemporary smart phones and laptop computers. A recent study indicated that
many more mobile workers planned to purchase an iPad in coming months, rather than

---

7 See www.entrepreneur.com, Plug in or Tune Out? (Jan. 6, 2010).
8 See www.abanet.org, Smart Phone Buying Guide (Feb. 2010).
a traditional PC for work purposes.\textsuperscript{13} There is even a new iPad application that helps litigators with jury selection.\textsuperscript{14}

Many people are no longer buying books, but are instead downloading them to their e-reader or iPad. As such, it is foreseeable that more businesses, including attorneys, could use e-readers in connection with their work in the future. The use of e-readers would also support the trend of mobility since instead of having to carry around voluminous files; the attorney could download all the information on one device. Instead of printing out transcripts, voluminous discovery, or investigations, it is likely the attorney could use the e-reader in order to prepare witnesses and at hearing. E-readers could also be used in meetings since each participant could download the report and follow along in the meeting on the e-reader.\textsuperscript{15}

There are obvious security issues which companies have to consider in line with what is coming in terms of new technology. Laptops, BlackBerrys and smart phones can be easily lost and/or stolen. As a result, the information on these devices is at a significant risk. In light of these risks, the use of encryption software, anti-spyware, anti-virus software and mandatory passwords is also on the increase.\textsuperscript{16} With the advent of this new technology and easier access to the Internet, employees also become more able to blur the lines between personal use and work use.\textsuperscript{17}

2. The use of video is likely to increase in the legal field.

\textsuperscript{13} See www.gigaom.com, Connected Workers Going iPad for Connectivity (Sept. 2, 2010); www.silicon.com, iPad vs. Laptop: Can Apple’s Tablet be Your Office Computer? (June 16, 2010).

\textsuperscript{16} See www.abanet.org, The Year of Living Safely: How Lawyers are Securing Their Data (May, 11, 2010).

\textsuperscript{17} See www.govtech.com, Many Bosses Unaware of Personal Devices’ Popularity at Work (July 8, 2010).
Videoconferencing is becoming cheaper and easier to do. As a consequence, it is likely we will be seeing the increased use of video in the legal profession. More attorneys will be taking video depositions and doing witness preparation via video.\textsuperscript{18} The use of video for conferences and hearings is likely to increase. In terms of the legal community in general, the New York State courts have a video conference unit, where attorneys can make video court appearances, conduct attorney-client interviews and set up video conference meetings.\textsuperscript{19} In Michigan, the Supreme Court posts online video of its oral arguments, administrative hearings and administrative conferences to be posted on the State Bar website.\textsuperscript{20} The Seventh Circuit has started an e-mentoring project which permits young attorneys to have video discussions with distinguished jurists and trial lawyers.\textsuperscript{21} The MSPB and EEOC regularly request video hearings in Postal cases, and many of the attorneys have participated in such hearings. As budgets continue to be cut, and videoconferencing becomes cheaper to use, it is likely that the trend towards the use of video in order to defray travel costs will increase in the future.

3. The Law Department could benefit from the new technology.

Attorneys currently rely upon a sometimes overextended remote network infrastructure to access their in-office desktop resources. Before adding new hardware or software, upgrading the WebVPN network should be a priority that would result in immediate productivity improvements. There is significant anecdotal evidence of problems ranging from inability to log on at the start of the work day, to getting kicked off the remote network and slow operation at certain times of the day.

\textsuperscript{18} See \url{www.abanet.org}, Video Depositions: Essential, Resources (April 2010).
\textsuperscript{19} See \url{www.courts.state.ny.us}.
\textsuperscript{20} See \url{www.michbar.org/courts/virtualcourt.cfm}.
\textsuperscript{21} See \url{www.abajournal.com}, Video Mentors (Aug. 1, 2010).
It is foreseeable that the Law Department will invest in laptops or other mobile devices, like e-readers or iPad-like devices, so that attorneys have ready access to files and documents, as well as videoconferencing, wherever they are located. No longer would information access be limited to just the workplace or a home office. Nor would remote employees have to rely on the VPN network for access to files stored on their office hard drives, which would both facilitate employees' access to these files and reduce the VPN server load for purposes of access to files residing on the Law Department's shared network. This type of change will be required for the Law Department to bring its remote computing capabilities in line with other government agencies and private law firms as we move into the next decade.

B. Collaboration Based On A Social Media Model

The Law Department has begun to employ technology that permits it to be more collaborative in nature. MeetingPlace is used for teleconferencing, NetMeeting for information sharing and for limited document sharing, and the Law Department website is used exclusively for document sharing. It is not unusual to get a mass e-mail from a Managing Counsel from a Field office or from Headquarters concerning cases of national interest. Many times Headquarters holds information sessions via teleconference and/or web conference. This trend towards information sharing and collaboration in the workplace is expected to continue.

The popularity of social networking sites, online sites where users can interact with each other over the Internet and share ideas, pictures, videos, events and interests within their individual networks, such as Facebook, MySpace, Twitter, Flickr, YouTube,
and LinkedIn is on a constant rise.\textsuperscript{22} As SKYPE, a web service that allows callers to make video telephone calls over the Internet\textsuperscript{23}, is becoming increasingly popular, the increased use of video for further collaboration in the business context is likely.

1. **Using social media to further collaboration and information sharing.**

Private companies and the government are beginning to use social media websites to easily disseminate information and solicit commentary from a wide range of individuals and in a much quicker and more collaborative way through the Internet. “Blogs, microblogs and social networking sites have expanded the ways in which people and organizations communicate.”\textsuperscript{24} Social networking websites have become increasingly popular during the past few years as a way to collaborate and disseminate information among a wide range of people in a quick way.\textsuperscript{25} The Obama Administration has signed an Executive Order calling for all departments and agencies to “establish a system of transparency, public participation and collaboration”.\textsuperscript{26} To date, nearly all major federal agencies are using social media.\textsuperscript{27} As of June 2010, approximately 56 percent of attorneys responded that they maintain a presence in an online community/social network such as Facebook, LinkedIn, LawLink or Legal OnRamp. Respondents in the 30-39 year old age group were most like to maintain a presence (77 percent), with the 40-49 year old age group following closely behind (68 percent). The highest percentage of respondents (83 percent) maintained a presence in LinkedIn.\textsuperscript{28}

\textsuperscript{22} See www.wikipedia.org.
\textsuperscript{23} See id.
\textsuperscript{24} See www.abanet.org, The Good, the Bad and the Ugly of Blogging, Microblogging and Social Networking for Public Lawyers (Summer 2009).
\textsuperscript{25} See www.abanet.org, Social Media: What It Is and Why It Matters (January 2010).
\textsuperscript{26} See www.time.com, Obama and Twitter: White House Social-Networking (May 6, 2009).
\textsuperscript{27} See www.fcw.com, Nearly All Major Federal Agencies Use Social Media (July 22, 2010).
\textsuperscript{28} See www.abanet.org, The Linked-in Lawyer: How Lawyers are Using Social Networks (June 22, 2010).
Based on the popularity of social media, it is likely that in coming years we will see the use of social media change from being used in a purely personal way or as a marketing tool, to a collaborative tool to be used internally within the workplace. Younger workers have grown up using the Internet and are comfortable transitioning the use of their social networking tools into the business environment. Indeed, it is already happening. Government agencies and private companies are creating internal networks based on the social media model where employees can share files, individuals can share individual knowledge and experience through the use of blogs, and forums or bulletin boards are created in order to further collaboration and to keep employees better connected. General Electric has created an internal social network called Support Central, which boasts 400,000 users in more than 6,000 locations around the world. NASA has created an internal networking site called Spacebook. It was created because of a need to improve teamwork, communication and access to information across the agency’s diverse projects and centers. The State Department is working on launching a social network called “Statebook” to link diplomats and employees via a Facebook-style system. Just recently, the U.S. Merit Systems Protection Board (MSPB) announced that it has joined the information network Twitter.

29 See id.
30 See www.inc.com, How to Use Internal Collaboration and Social Networking Technology (March 31, 2010).
31 See www.itbusinessedge.com, GE Nails the Internal Social Network (July 21, 2008).
33 See www.socialtimes.com, State Department to Model Internal Social Network After Facebook (April 14, 2010).
The MSPB plans to use the site for new studies or publications, oral arguments, case reports, newsletters, Federal Register notices, or website updates.34

While the social media model is not likely to go away anytime soon, the model has its weaknesses in the business setting. A business site based on such a model would have to address issues concerning appropriate content and use.35 Another concern would be whether the data contained on the site would be subject to the FOIA, the Privacy Act, and/or e-discovery.36 Since the social media model is Internet-based, there would be security concerns such as data protection and increased risk of cyber threats to consider as well.37

2. The use of videoconferencing could support collaboration.

Videoconferencing and webconferencing are emerging as a cheaper way for employees to share information and to collaborate better on projects. Fewer on-site meetings could mean reduced travel costs, less time wasted on travel and a healthier planet.38 In the Law Department, meetings are regularly held via teleconference or via webconferencing. Video conferencing has the potential to establish rapport that can be hard to build without the benefit of face-to-face interaction.39 As such, it is another tool the Law Department should consider to increase efficiency and promote a more collaborative environment than teleconferencing alone can promote.

3. Cloud computing could increase collaboration.

38 See id.
Cloud computing, otherwise known as Software as a Service (SaaS), refers to a category of software that is delivered over the Internet to a Web browser (like Internet Explorer) rather than installed directly onto the user’s computer. The Law Department is already using cloud based computing when attorneys and paralegals use Westlaw and LexisNexis. Another example of a cloud-based application would be social networking sites, such as Facebook or MySpace. Google Docs, which is a free, Web-based word processor, spreadsheet, presentation, form and data service offered by Google is also a cloud-based application. It allows users to create and edit documents online while collaborating in real-time with other users.

The cloud computing model holds appeal for attorneys for a variety of reasons. Collaboration in “the cloud” allows individuals to communicate and share information easily since all the applications and data reside on the Internet, any authorized user can view documents, collaborate and generate ideas and provide information. Off-site data storage is the defining characteristic of cloud computing. Instead of being saved to an individual’s computer or server in the office, data would be saved to an off-site location under the administration and control of a SaaS vendor. The benefits of such technology would be increased mobility and decreased need to have large servers to store data. However, there are obvious concerns with the security risks of storing data in “the cloud” where the attorney does not have immediate control over the data. There is also the risk of protecting the data and the increased risk for cyber threats.

40 See www.abanet.org, The ABCs of Cloud-Based Practice Tools (Jan. 2010).
41 See www.wikipedia.org.
43 See id.

company could theoretically set up an “internal or private cloud” structure in order to mitigate some of the potential security risks.\textsuperscript{47}

4. The Law Department could benefit by exploring new collaborative options.

At this time the Postal Service is developing a Social Media Policy for possible issuance later this year. However, social media, video-conferencing and real-time collaborative tools that permit employees to work on a document from different locations in real-time remain foreign to the Law Department’s work environment. Such tools could help create a more collaborative work environment and more efficient information sharing among the Law Department as a whole.

C. New Software Programs

Changes in software have radically changed the way we work and how we can be more efficient in our jobs. In the Law Department, we have seen LawManager software implemented as an update to the old Wildcats system. This software has helped us keep better track of our cases. We have also implemented Litigation Hold software in order to comply with our e-discovery obligations. It is expected that in the next ten years, attorneys will be trying to find better ways for organizing and managing their electronic documents, discovery and files.

1. Attorneys will better manage their cases and files electronically.

Case management software can help track cases, clients, and deadlines.\textsuperscript{48} Litigation support software is designed to aid lawyers in the process of litigation, and generally includes databases for organizing, searching, and reviewing discovery

\textsuperscript{47} See \url{www.InformationWeek.com}, Why “Private Cloud” Computing is Real—And Worth Considering (April 11, 2009).

\textsuperscript{48} See \url{www.abanet.org}, Practice and Case Management Software: Comparison Chart.
material including deposition transcripts, produced documents, and correspondence.\textsuperscript{49} For litigators, deposition and transcript-review software programs, such as TextMap and Live Note, can be efficiency boosters since the attorney can annotate, bookmark, link and highlight sections of the transcript. The result is a transcript that is easier to search.\textsuperscript{50} This software has the potential to make attorneys more efficient in their jobs.

2. Adobe Acrobat 8 will make document management easier.

Adobe Acrobat 8 has significant benefits for attorneys and paralegals. The encryption technology is easy to use. As such, it is easy to protect sensitive information from accidental disclosure. It is also easy to convert documents into a single, polished, searchable Adobe PDF package for e-filing. There is a redaction feature that makes responding to discovery responses and FOIA/Privacy Act cases much faster and easier. Attorneys and paralegals can easily Bates number their documents and combine documents for filing.\textsuperscript{51} All of these benefits assist the Law Department in becoming more efficient.

3. Legal research software is expected to become more user-friendly and less costly.

Westlaw and LexisNexis are also planning on creating a legal research experience that users have come to expect from Google.\textsuperscript{52} The new LexisNexis will be more user-friendly and display the results in a variety of intuitive ways. Shepard’s citation service is incorporated into every case and can be viewed graphically. The new LexisNexis also provides tools for collaboration, allowing for storage to work folders for

\textsuperscript{49} See \url{www.abanet.org}, Litigation Support Software Comparison Chart.
\textsuperscript{50} See \url{www.westlaw.com}, Switching Gears? Let Technology Help (January 2010).
\textsuperscript{51} See \url{www.abanet.org}, Adobe Acrobat 8 Professional: Reasons to Put it on your Shopping List (March 2007); \url{www.abajournal.com}, Acrobat 8 Does Flips for Attorneys (March 19, 2007).
\textsuperscript{52} See \url{www.abajournal.com}, Wired (Feb. 1, 2010).
later reference.\textsuperscript{53} WestlawNext will also be aiming to be easier to use and more aesthetically pleasing and promises tools for workflow collaboration.\textsuperscript{54}

In addition to the changes coming to Westlaw and LexisNexis, in recent years we have seen that the ability to do legal research for free has increased and this trend is expected to continue. In 2009, Google came out with a Google Scholar online search where anyone can type in case names, topics or key words to find relevant case law.\textsuperscript{55} We have also seen many agencies that the Law Department deals with regularly, such as the Department of Labor, Equal Opportunity Commission, Merit Systems Protection Board and the National Labor Relations Board post laws, guidance, regulations and in some instances, case law, on their public websites.\textsuperscript{56} The Code of Federal Regulations can also be searched for free online.\textsuperscript{57} All of these changes will likely result in cheaper, more user friendly legal research tools.

4. The Law Department has the potential to become more efficient through the use of new software technology.

As legal software becomes more user-friendly and less costly, it is foreseeable that the Law Department will be looking into purchasing software that will make case management and litigation more efficient. In fact, the IT Department is currently looking into obtaining software in order to better manage its e-discovery obligations in accordance with the Electronic Discovery Reference Model (EDRM) model. The purpose of such software would be to better manage e-discovery in large cases, such as class actions.

\textsuperscript{53} See id.
\textsuperscript{54} See id.
\textsuperscript{55} See \url{www.abajournal.com}, Google Offers Legal Research for the Average Citizen—and Lawyers, Too (November 2009).
\textsuperscript{56} See \url{www.dol.gov}; \url{www.eeoc.gov}; \url{www.mspb.gov}; \url{www.nlrb.gov}.
\textsuperscript{57} See \url{www.gpoaccess.gov}. 
As it already has a contract with LexisNexis, it is also likely that the Law Department will benefit from the changes coming in the near future. It also would be helpful to disseminate information as to the free research tools available so they can be used to support the attorneys’ and paralegals’ legal research efforts and cut costs spent on LexisNexis and other paid legal research web sites.

II. **ANTICIPATED CHANGES IN THE STAFFING PARADIGM**

A. **The Demand For Legal Professionals In The Next Ten Years**

The Bureau of Labor Statistics (BLS) predicts that by 2020 there will be a 13 percent increase in the number of attorneys, a 28 percent increase in the number of paralegals, and an 11 percent increase in the number of administrative assistants. BLS projections are based on growth in the population, growth in legal transactions, and growth in demand for lawyers as a result of legal problems resulting from the downturn in the economy.

As set forth above, the largest predicted increase by far is the increase in paralegals. In the private sector, clients are demanding more efficient, lower cost legal services. One way of accomplishing that objective is further utilization of paralegals. Some activities currently performed by attorneys can be done by paralegals – and more cost effectively. The most frequently mentioned work shifting topics are document review and the preparation of routine documents. Paralegals could also have an expanded role in the Law Department, such as assisting in the preparation of routine filings for the Postal Regulatory Commission, drafting and responding to discovery requests, preparing MSPB Agency Files, interviewing prospective witnesses, and drafting dispositive motions, thereby freeing up attorneys to provide client advice and...
handle more complex transactional and litigation-related legal tasks. Work shifting from attorneys to paralegals may, however, be more pronounced in the private sector as the salary gap between the two positions is more pronounced.

The increased need for administrative assistants is in turn driven by the increase in attorneys and paralegals. Although attorneys and paralegals will increasingly perform their own administrative tasks, more administrative assistants will be needed to handle the larger workload and perform tasks such as scanning documents, organizing files, and preparing and mailing documents in electronic format.

B. Staffing Options

Managers in the next ten years will need a flexible organization and flexible staffing that can be quickly adjusted to address new problems and challenges. The Postal Service faces the potential for change in the next ten years even more so than most organizations. As the Postal Service’s Chief Human Resources Officer, Anthony Vegliante recently told the Washington Post, “we don’t have a continually growing environment, we have a shrinking environment so we ... need to be flexible.”

The current staffing model for the Law Department is comprised almost exclusively of full-time career employees. Since the Postal Service, as an employer, has much in common with other large employers, public and private, the developing staffing trends of such employers can be useful in informing the Law Department as it makes staffing decisions over the next ten years. These trends include the use of part-time employees, retirees and contractors/outsourcing. Although there is some overlap between these categories of employees, they will be discussed separately.

58 See www.washingtonpost.com, “Negotiations start for Postal Service and top unions (9/1/2010).
1. **The increased use of part-time employees.**

The U.S. Bureau of Labor Statistics considers employees working fewer than 35 hours per week to be part-time employees.\(^{59}\) According to the U.S. Bureau of Labor Statistics, part-time employment now accounts for approximately 16 percent of the workforce.\(^{60}\) While the recent economic downturn has generated more part-time employment as a matter of economic necessity, there is evidence of a desire among professional employees to elect part-time status.

The use of part-time staffing has obvious economic advantages to an employer, including a reduction in expenditures for wages and benefits and an increase in employee satisfaction. In addition to the tangible economic benefits of part-time employment to the employer’s bottom line, there is at least one study which indicates that implementing staffing flexibility options, such as part-time employment, significantly increases employee engagement and reduces employee turnover.\(^{61}\) Studies done in the last two years indicate that, among 1,100 employers with more than 50 employees, approximately 40 percent allowed some employees to migrate back and forth between part-time and full-time employment. Additionally, 53 percent of employers allowed some employees to reduce their hours prior to retirement; and 25 percent allowed most or all employees to phase into retirement.\(^{62}\)

The use of part-time attorneys is gaining traction in both the private and public sectors. For example, in a study cited by the “Project for Attorney Retention”, the number of part-time partners in private law firms increased from 1.6 percent in 1999 to 3

\(^{61}\) *Id.*

\(^{62}\) *Id.*
percent in 2008.\textsuperscript{63} This same study concluded that part-time partners in private law firms made significant contributions as mentors and role models. In the Federal sector, the Department of Justice (DOJ) offers the availability of part-time scheduling for its attorneys and other employees. DOJ’s policy cites “the desirability of making maximum use of available human resources, including those qualified individuals who are available for part-time employment.”\textsuperscript{64} DOJ provides for part-time work opportunities for positions in all grade levels, subject to its resources and mission requirements, and has focused anew on part-time work opportunities in order to respond to increasing numbers of childbearing-age women in the workforce, dual career and single-parent households and an aging workforce supporting elderly parents. In DOJ’s assessment, part-time employment can be another valuable tool to attract and retain well-qualified employees.\textsuperscript{65}

The Postal Service currently discourages the use of part-time employees by counting a part-time employee the same as a full-time employee for purposes of complement control. Using both the public and the private sectors as a model, we recommend that the Law Department consider the possible expanded use of part-time employees, as well as policy changes that would support such expanded use.

2. \textbf{The increased use of Independent contractors/outsourcing.}

The use of independent contractors/outsourcing presents another opportunity for maximum flexibility in adjusting the size and composition of the Law Department’s workforce to changing needs. In the private sector, law firms are taking advantage of

\textsuperscript{63} Cynthia Thomas Calvert, Linda Bray Chanow and Linda Marks, \textit{Reduced Hours, Full Success: Part-Time Partners in U.S. Law Firms}, The Project for Attorney Retention, 2009.

\textsuperscript{64} See, USDOJ: JMD: Worklife: Part-Time Employment and Job Sharing Fact Sheet.

\textsuperscript{65} \textit{Id.}
outsourcing, including sending work overseas to countries such as India. In the years between 2002 and 2006, American law firms outsourced more than three million legal jobs to foreign countries. The Bureau of Labor Statistics estimates that by 2015, Indian employees performing outsourced legal work for private sector American law firms will generate $970 million; up from $52 million in 2002.66 Clearly, outsourcing in the private sector legal environment is a growing trend.

The use of contractors or outsourcing carries with it the advantage of paying only for services actually rendered, without any long-term or collateral obligations for wages or benefits. This approach can also be easily adjusted to meet the current needs of the Law Department, thereby achieving maximum flexibility.

3. The potential for expanded use of retirees.

Hiring retired employees, either as part-time employees or as independent contractors, appears to be an ascending trend in the private sector, and could make good business sense for the Law Department. The Postal Service estimates that up to 300,000 of its employees will become eligible to retire in the next decade.67 This pool of former workers could be a tremendous asset to the organization. An AARP-sponsored study of 1,500 workers aged 45 to 74 found that 69 percent planned to work in some capacity after their retirement.68 Retirees typically work after the end of their careers not only for wages or benefits, such as health care, but also for the intangible benefits of enjoyment and a sense of purpose. Even though many want to work, often they do not wish to continue working full-time. Rather, retirees want work that offers flexibility.

In February 2009, legislation was introduced in Congress to facilitate the use of part-time employees and the re-employment of retirees by Federal agencies. This legislation was designed to ease the financial complications of returning retired employees, both in terms of eliminating the offset of their retirement annuity and by providing retirement credit for CSRS employees for part-time work performed for their agencies. 69

In March 2009, the Office of Personnel Management (OPM) issued directives encouraging Federal agencies to re-employ Federal retirees possessing experience in a number of areas (e.g., human resources, contracting, project management and grants management). While the wages of re-employed retirees are offset by their annuity payments, OPM or the re-employing Federal agency can waive this offset for select returning employees with crucial skills. The Government Accountability Office (GAO), in a February 2009 study involving four Federal government agencies, found that there was a significant pool of highly qualified retired Federal employees available for employment in the Federal sector. 70

The knowledge and experience of retired employees can provide real value to the Department as it moves forward in the next decade. Further, there is clear support in Congress for the idea of maximizing the re-employment of retired Federal employees by their former agencies. The feasibility and value of the use of retired employees as independent contractors is already well demonstrated in the Postal Service. The EEO investigation function has been outsourced to contractors, a significant number of whom are retired Postal Service employees. Using retired Law Department employees as

contractors to provide ancillary support service in any number of Law Department functions, such as legal research, document examination in large cases, tort claims processing, or routine motion preparation would provide a clear benefit to the Law Department. There is very little in the way of training cost for retired Law Department employees. Likewise, there is virtually no “ramp up” period for these retirees; they could be ready to fully function immediately upon starting work. PCES Executives in the Law Department have a current average age of 54 and the attorney population is only slight younger at 47. As the Postal Service Law Department workforce continues to age and retire, this avenue of human capital will become more and more available.

III. EXPANSION OF FLEXIBLE WORK ARRANGEMENTS

Telework and other alternative work arrangements comprise another area of office management in which the next decade can be expected to bring changes. The current Presidential administration and Congress have prioritized the expansion of telework in the federal government, and private-sector employers increasingly are making headlines with innovations from customizable staggered schedules to “results-only work environments.” Over the next ten years, we anticipate that the Law Department may need to expand and even rethink its approach to alternative and flexible work arrangements, even beyond the parameters applicable to the Postal Service at large, in order to recruit and retain staff on par with other legal services employers.71

71 As used in this memorandum, “telework” or “telecommuting” refers to an employee’s ability to perform work duties at a site other than his or her work station on Postal Service premises. In Postal Service terminology, “alternative work schedule” means a schedule whereby an employee works extended days during a given period, such that the expected 40-hour work schedule is fulfilled during those days and the employee need not report to duty on the remaining day or days. This memorandum will refer to telework and AWS collectively, as well as any other arrangements that might be relevant to a given context, as “flexible work arrangements.”
A. History Of The Current Postal Service Policy

In 2005, the Law Department began a pilot program to test the feasibility of telework and AWS. Human Resources largely adopted the Law Department’s model when it established the first organization-wide telework and AWS policy on September 1, 2008. Management Instruction EL-310-2008-3 allowed employees exempt from the Fair Labor Standards Act (FLSA) to work up to one day a week at an alternate worksite, subject to management approval and review, attendance and work-suitability considerations, employee certifications, and compliance with information technology (IT) and work station requirements. The 2008 Management Instruction also allowed employees to enter alternative work schedule (AWS) arrangements upon certifications and management approval and review.

The Vice President, Employee Resource Management, updated and expanded Postal Service policy in Management Instruction EL-310-2009-8 (October 9, 2009), which replaced its 2008 counterpart. The 2009 Management Instruction expanded the previous limit of one telework day per week to three days per week and also clarified the options for AWS as follows: (1) one five-day week of eight-hour days and one four-day week of ten-hour days; (2) one five-day week of four nine-hour days and one eight-hour day, and one four-day week of four nine-hour days; or (3) two four-day weeks of ten-hour days. The Law Department expanded its previous two-day-per-week telework limit to a three-days-per-week limit commensurate with the new Management Instruction.

The majority of eligible FLSA-exempt Law Department employees participate in telework arrangements, rather than in AWS arrangements. Although the Management Instruction and the General Counsel’s 2008 email require employees with verbal
managerial approval to enroll via Human Resources’ Flexible Work Arrangement Application website (http://fwaa.usps.gov), anecdotal evidence indicates that at least some managers have preferred to handle telework arrangements less formally, based on week-to-week in-office staffing needs.

B. Rationale And Benefits Of Flexible Work Arrangements

As described in Management Instruction ELM-310-2009-8, the Postal Service established flexible work arrangements are “designed to increase employee morale and efficiency[.]“ The Postal Service considers their purpose to be:

- to enhance the Postal Service’s efforts to recruit and retain top talent, help conserve energy and reduce CO2 emissions by eliminating up to three commuting days, and to contribute to employee preparedness to work at home during emergency Continuity of Operations Plan (COOP) events.

At least the environmental and commuting-related benefits are borne out by organization-wide data. Based on a combination of Postal Service-specific and general demographic statistics, Human Resources currently estimates that if Headquarters employees spend an average of one day per week telecommuting, the program will have saved 85,804 gallons of gasoline and 839 tons of carbon dioxide emissions per year, equivalent to removing 159 cars from the road each year.72

Personal expense savings for employees are also palpable. According to an August 6, 2010, summary report from the Postal Service’s Flexible Work Arrangement Application, 86.77 percent of the 7,024 participants surveyed primarily commute to work via car, and more than half spend over an hour commuting roundtrip each day.

---

72 These estimates focus exclusively on the environmental impact of reduced commuting. They do not account for potential inefficiencies such as, for example, the fact that more environmental resources may be spent heating, cooling, and powering the employee’s alternate work site in addition to persistent environmental costs at the (likely more efficient) office worksite. See Brian Palmer, “How Green Is Telecommuting?,” Slate.com, September 7, 2010, available at http://www.slate.com/id/2264177/ (citing Erasmita Kitou and Arpad Horvath, “Energy-Related Emissions from Telework,” 37 ENV. SCI. TECH. 3467 (2003), available at http://pubs.acs.org/doi/abs/10.1021/es025849p).
Although it is not expressly measured, one can easily infer a significant quality-of-life benefit when employees realize an additional measure of personal time that would otherwise be spent commuting.

Telecommuting offers potential to increase employee fitness, with direct and indirect effects on productivity. Less work-related commuting time can translate into more time for exercising, home meal preparation, and sleep, all of which contribute to employee health and productivity. Employees may also choose to telecommute instead of taking leave when they or family members are sick, which both increases their own productivity and reduces their colleagues’ exposure and resultant potential need to take sick leave.\(^{73}\)

The Postal Service’s rationale and findings correspond to those cited by other federal agencies. For example, in an August 2009 report to Congress, the Director of the Office of Personnel Management (OPM) praised telework programs’ demonstrated ability “to help individual employees successfully balance the responsibilities of work and family, increase the safety of neighborhoods,\(^ {74}\) and reduce pollution.” The Director also described employees’ saved commuter costs, agencies’ emergency-planning needs, and the goal of “green workplaces” as underpinning telework policies.\(^ {75}\)

Employers can also benefit from reduced real estate and utility costs, increased productivity, and decreased sick leave and workers’ compensation usage.\(^ {76}\) As the

\(^{73}\) Of course, managers should not require or induce employees to abstain from sick leave in favor of telecommuting. Nor should employees opt to continue working if their health and productivity would clearly suffer as a result.

\(^{74}\) That is, telecommuting employees can notice, report, and even deter suspicious activity near their residences or other remote worksites during the workday hours, whereas in-office employees cannot.

GAO report points out, employers also benefit indirectly from telework’s direct benefits to employees, because management of commuting costs and other work/life-balance issues can increase employees’ personal happiness and, consequently, their effectiveness and satisfaction in their jobs. The recruitment and retention benefits of telework are especially palpable as new generations of workers “have high expectations of a technologically forward-thinking workplace.” The U.S. Patent and Trademark Office and the Nuclear Regulatory Commission have attributed to their telework programs an essential role in fulfilling their aggressive recruitment goals. A 2007 report by the Office of the Inspector General (OIG) for the Equal Employment Opportunity Commission (EEOC) found that a “frequent telework” pilot program would increase productivity, employee work-life balance, and continuity of operations, while allowing the OIG to capture real estate savings of $2,216 per teleworker, per year, even where the OIG paid for the teleworkers’ home office equipment and Internet connectivity. 

This suite of benefits has been recognized across decades of telework innovation. It has also been acknowledged as underlying private firms’ growing offering of telework programs in an effort to cut costs and recruit and retain legal

---

77 Id. at 4.

78 Id.

79 Id. at 5-6.

Perhaps due to the intellectual nature of their work and their drive to maximize client value, private law firms in particular have been aggressive at implementing flexible work arrangements.\textsuperscript{83}

C. Limitations of Flexible Work Arrangements

1. In general.

Discussions of telecommuting traditionally note managers’ concerns about the potential for actual or perceived loss of control over employee work activities. One might reason that the home environment presents distractions absent from an office workplace, resulting in diminished productivity. While these concerns may be justified in some cases, an overwhelming majority of employees are likely to have a suitable work ethic, which can be reinforced by effective management and enhanced communication. In the Postal Service’s case, the Management Instruction makes clear that telework participation is a privilege, not a right, and that it is subject to managerial planning, consultation, approval, review, communication, and even revocation. The burgeoning of telework programs in the economy at large is a testament to a growing perception that the overall productivity gains and other benefits outweigh the exceptional instances of

employee exploitation. Nevertheless, the lingering presence of work-ethic concerns can be an obstacle to expansion of telework programs, due both to managerial reluctance and to employees’ own lack of confidence in their productivity as telecommuters. In organizations that have implemented flexible work schedule programs, managers still often thwart participation by refusing to grant approval.

The regularity of out-of-office days under an AWS work schedule can theoretically present a risk that the office will be understaffed on a given day. As with work-ethic concerns about telecommuting, the spread of alternate work schedule programs in the American economy indicates that employers are capable of finding ways to accommodate a need for balanced staffing levels with such programs.

2. **Limitations specific to the Postal Service.**

Other limitations are specific to the Postal Service’s policies and infrastructure. For example, the Management Instruction is limited to FLSA-exempt employees. This means that Law Department attorneys and Business Services staff are eligible for telecommuting and AWS, but paralegals and administrative assistants are not. The Management Instruction also proscribes participants from combining telework and AWS, or from taking personal leave on a day when the participant is telecommuting. As noted above, the Management Instruction sets a limit on the number of days a participant can telecommute or have free due to AWS. Although it is not expressly included in the Management Instruction, it appears that there is a general policy that managers may not engage in AWS and may telecommute only one day per week at most. The basic approach underlying the Management Instruction is that
telecommuting is an exception to the general rule of in-office attendance, and not the other way around.

The Postal Service does not reimburse employees for utility costs incurred while telecommuting, including Internet access, home computers, or work-related telephone usage. Employees are not usually provided with workstations or other equipment in order to enable them to work at an alternate worksite, although some Law Department offices, particularly in the field, have authorized Postal Service-issued laptops at various times in recent history. Employees choosing to participate in the program using non-Postal Service-owned equipment will not receive support or service for that equipment from the Postal Service Help Desk.

D. Alternative Flexible Work Arrangement Models

The history of flexible work arrangements at large suggests that the current interest is no mere fad. If anything, the number of telecommuters is expected to rise within the foreseeable future. As employees’ decisions are expected to revolve increasingly around the flexibility of work-life balance alongside traditional pay and benefits factors, the Law Department should keenly consider whether expansion of its own flexible work arrangements would increase employee retention and recruitment, as well as produce other benefits. Further evolution of flexible work arrangements could take many forms, from incremental adjustments of policy to expansion of their scope of application to wholesale redesign. Because of the ten-year horizon for this paper, this

---

85 See, e.g., Charles Grantham, Jim Ware, and Jennifer E. Swanberg, Flexible Work Arrangements for Nonexempt Employees (2009), at 9 (“More than 17 million employees performed work remotely at least one day per month in 2008. That number is projected to increase to more than 25 million within five years.”) (citations omitted)), available at www.worldatwork.org/waw/adimLink?id=33622.
section will examine modest policy changes that focus on practices in widespread use today as well as aggressive flexibility models that may yet develop into best practices.

1. **Potential modifications to existing policy.**

   The most likely scenario for flexible work arrangement changes in the next ten years would involve expansion of already existing postal policies.

   a. **Expansion of telecommuting.**

      The Law Department could go beyond the Management Instruction by allowing an even greater number of telecommuting days per week or per pay period.

   b. **Expansion of personal leave policy.**

      Employees could also be permitted to take personal leave on a telecommuting day, subject again to supervisors’ approval. This prospect could aid employer and employee alike: it could accommodate medical and personal appointments close to the employee’s home, which would mean that the employee could request less leave time due to the reduced travel time. A supervisor and employee could also arrange for the employee to exercise personal leave during core office hours but make up for it with additional work time after hours. In principle, this would not represent a major shift from current practice, as attorneys must sometimes spend additional work-hours on deadline assignments while requesting personal leave at other times. The telework-plus-personal-leave approach would simply grant official sanction to the availability of such flexible work-time arrangements during an individual workday.
c. Permit a Telework/AWS combination.

A related option would be to allow deviations from core hours to meet employee needs, or to allow the combination of telework and AWS. Some employees might desire the flexibility of AWS but decide that it is infeasible for them because of the increased in-office hours, combined with commuting time, in “on” days. The former option could be thought of as “AWS light”: an employee could arrange or request a schedule that involves working on each workday but that varies from day to day in its specific parameters. This would allow the employee to have regular personal time on a workday when that would be advantageous, while only requiring a limited increase in compensatory work-hours elsewhere in the week. Combining telework and AWS, would recognize that the lack of commuting time makes telework days a prime candidate for the lengthened “on” days of an AWS schedule. If the Law Department determines this would require additional monitoring of telecommuting employees, this could be accomplished with additional supervisor involvement or record-keeping. Either option would make AWS more desirable for Law Department employees.

d. Permitting FLSA non-exempt employees to participate in the Telecommuting/AWS program.

Another possibility of going beyond the Management Instruction would be to open both telework and AWS arrangements to paralegals and administrative assistants. There is no legal proscription, even from an FLSA standpoint, for those employees to participate in such programs. It would, however, require strict monitoring and adherence to the employee’s agreed-upon schedule (ELM § 444.231). It is the supervisor’s job to ensure that employees do not remain on
the clock unless they are specifically authorized to do so. Nevertheless, there is significant concern that poorly managed non-exempt telecommuting programs can create significant liability.

From a practical standpoint, it is unlikely that most Managing Counsels and Law Department offices would find workable an arrangement whereby, even depending on workload and upon the manager’s discretion, paralegals could participate in telework and AWS, with administrative assistants continuing to carry out their current in-office duties requiring specialized equipment (e.g., high-speed and color scanners). In consulting with the Postal Service’s Agency Telework Coordinator, the Postal Service is considering expanding AWS, but not telework, to non-exempt FLSA employees, the main issue being one of coverage during employees’ “off” days. A cursory inquiry with the Telework Coordinator as to whether other federal agencies allow non-exempt FLSA employees to participate in these type of programs reveals that very few, if any, do.

2. Office Real Estate: “Hoteling”.

One of telework and AWS’s cost-savings propositions is the ability to consolidate office space. This concept requires a change in a fundamental premise of the traditional workplace: instead of distributing cubicles and offices among the total employees, the number of cubicles and offices are allocated based on employees’ in-office time. Put another way, instead of time working remotely being seen as a perk, one can view it as the default and in-office time as the exception that requires accommodation. With enough participation in flexible work arrangements, this would allow management to rotate multiple employees at a non-dedicated work station and shed unneeded office space and utility costs.
The U.S. Patent and Trademark Office (USPTO) has made strides in this area, which it calls “hoteling.” \(^{86}\) Under the USPTO’s Patents Hoteling Program, more than 1,650 patent examiners agreed to give up their in-office workspaces in exchange for home offices and a commitment to reserve two days per pay period at the USPTO’s temporary offices. \(^{87}\) In addition, 147 trademark examiner staff have participated in a similar program, including legal instrument examiners, paralegals, legal document review clerks, and other non-attorney staff. \(^{88}\) Even among the USPTO’s Office of the General Counsel (OGC), [s]ome OGC employees have given up dedicated offices in order to enable office-sharing, where two employees can share the same office and workstation on alternate days. Although there are times an employee needs to come in on their telework day, there are hoteling offices available that they can use to access their virtual workstations on those days. OGC teleworkers have been able to design their individual telework routines, thus providing them needed flexibility without negatively impacting their coworkers or the OGC business process. \(^{89}\)

The USPTO’s hoteling programs are intrinsically motivated by the need to reign in real estate costs. \(^{90}\) In practice, the USPTO credits the programs with enabling it to avoid $11 million in new office space purchases and to hire 1,000 employees per year without adding office or parking space. \(^{91}\) A similar hoteling program at the Treasury Inspector General for Tax Administration has saved an estimated $1 million per year. \(^{92}\) In the 1990s, a hoteling program enabled the Federal Railroad Administration to close

---

\(^{86}\) The terms “hot desking,” “free address workstations,” “touchdown workstations,” and “desk sharing” describe minor variations on the same concept. General Services Administration, “Alternative Workplace Solutions,” [www.gsa.gov/portal/content/102702](http://www.gsa.gov/portal/content/102702) (last visited September 16, 2010).

\(^{91}\) Id. at 7-8.

\(^{92}\) Id. at 8.
18 field offices and consolidate several others, for a total savings of $251,929 (in historical dollars). 93

Over the next ten years, however, it is possible that cost-cutting pressures could lead the Law Department to explore further consolidation within Headquarters or field offices, between offices near to one another, or even between Law Department personnel and client office space. Field personnel could “ride circuit” between local offices in their selection of convenient temporary workstations. Depending on the calculation of estimated real estate savings, it is possible that it could become cheaper to establish “telecenters” with non-dedicated work stations closer to employees’ homes, in lieu of maintaining centralized office space. 94

Apart from the real estate cost savings, it is possible that hoteling could add benefits for employees and the organization beyond those already inherent to telework and AWS. If in-office presence is deemphasized, the Law Department can recruit new employees from within a larger geographical radius, and it can retain existing employees who might be moving farther away. The USPTO recognizes this with its Trademark Geographic Expansion pilot project, whereby trademark examining attorneys with telework experience can move up to 110 miles from headquarters, so long as they report in person twice per biweekly pay period. 95 Although the prospect of a shared office workstation might turn off some employees, many would likely prefer it if it is closer to their residence than their traditional office, and the chance for more at-home

94 The General Services Administration maintains several “telecenters” around the Washington, D.C., commuting area, including one as far away as the eastern panhandle of West Virginia. GSA Telework Centers, www.gsateleworkcenters.org (last visited September 16, 2010). See also Joice, The Evolution of Telework in the Federal Government, at 24-30 (describing the establishment of telecenters in response to local emergencies).
95 USPTO, 2009 Telework Annual Report at 6.
time and reduced commutes might outweigh any lingering discomfort for those employees.

Over the next ten years, we expect the Law Department and the Postal Service at large to explore the opportunity for real estate savings from flexible work arrangements. As a starting point for further study, the General Services Administration has compiled research on “alternative officing” in the private and public sectors.  

3. Results Only Work Environment (ROWE).

Perhaps the most extreme cultural change would be to reengineer the workplace, or components of it, as a so-called “Results Only Work Environment” (ROWE). ROWE is driven by a simple principle: it should not matter when or where an employee works, so long as the work gets done. Employees can also choose to work at times when they are most productive as individuals, even when those are outside typical work hours. In lieu of the formal strictures of personal leave and “core hours,” an employee is free to attend to personal or family needs and appointments during the typical workday hours (when many other businesses and government offices are open), while finding other, more convenient times to complete her work assignments.

Instead of indirect proxies for performance like in-office attendance or reported work-hours, a ROWE relies directly on the employee’s ability to meet deadlines, accomplish specified assignments, and achieve high client satisfaction. Supervisors can address productivity gaps through dialogue and workload management, as in a typical full-time office environment, but they otherwise are to let employees distribute their work time according to their own needs and proclivities. Federally-sponsored,

empirical research by University of Minnesota researchers indicates that employees in a ROWE environment continue to work approximately the same amount of time and days per week even as their schedules become more flexible. Meanwhile, the same study shows that ROWE employees perceive significantly better work schedule “fit” with their personal needs and less conflict of work matters with family time than non-ROWE employees, without a significant difference in the spillover of family matters into work time. Although managers may have reservations about scrapping timeworn work-hours-based models, it appears that ROWE produces a win-win outcome: employers get the same or better performance, and employees get better work-life balance.

ROWE has been claimed to produce many of the same benefits for employers and employees as telecommuting and AWS, albeit at a much greater level. Studies of ROWEs indicate that job satisfaction, productivity, employee health, and cost savings increase drastically in a ROWE as opposed to a traditional workplace. Many ROWE employees cite the system as a significant factor in their perspective on retention: for example, one survey respondent at Gap Inc. cited her company’s ROWE as the decisive factor in turning down an otherwise more attractive job offer, and a survey at another employer reported a 121-percent increase in the number of employees unlikely to search for a new job within the following year. Voluntary turnover rates reportedly plunge in ROWE workplaces, with a double-digit change in Best Buy’s turnover rates

98 Id. at 20-24.
100 Id. at 12, 14.
and a 40-percent drop at one non-profit organization. Greater control over work hours also maximizes environmental benefits: not only can employees telecommute, but even when they come to the office, employees can do so outside of rush hours, trimming greenhouse gas emissions and non-productive time spent in traffic further. ROWE can also allow employees greater flexibility than telecommuting to get more sleep, exercise, and home-prepared meals and to reduce the need for sick leave. Under a ROWE, remote employees can have their children or other dependents around and thereby avoid dependent care costs, so long as performance does not suffer or non-productive work-hours are made up at another time. Thus, ROWE offers the potential to intensify each of the cited benefits of telecommuting and AWS and to add new benefits.

Although ROWE is a new concept, its profile is rising. ROWE originated at Best Buy’s corporate headquarters and has spread throughout the company; it has since been implemented at the corporate offices of Gap Inc., the IT department of Fairview Health Services, J.A. Counter and Associates, the non-profit Girl Scouts of San

---

101 Id. at 6, 14. The University of Minnesota study found that 32.5 percent fewer Best Buy employees reported turnover intentions in a ROWE, compared with only a 20.7-percent drop among employees in a control group. Moen and Kelly, Flexible Work and Well-Being Study at 34.
102 After the Girl Scouts of San Gorgonio Council implemented a ROWE, 69 percent of employees shifted their commutes to avoid traffic and 40 percent reported shaving at least 10 minutes off of each direction of their commute. CultureRx, “ROWE Business Case,” at 14.
103 The same survey indicates that the number of employees getting at least 7 hours of sleep a night increased by 112 percent, with 219 percent more reporting at least good-quality sleep. Meanwhile, the number of employees who lost at least 3 work-hours per month due to illness dropped 82 percent, to 7 percent of all employees, and 71 percent reported themselves as less likely to call in sick. Id. at 13. The University of Minnesota study also found statistically significant increases in sleep time, exercise, doctor visits when sick, and energy and decreases in time spent in office when sick. Moen and Kelly, “Flexible Work and Well-Being Study” at 26-30. However, changes in more nebulous factors like employees’ overall assessment of their health, psychological distress or well-being, emotional exhaustion, sense of mastery, or physical symptoms were not found to be statistically significant. Id. at 31.
Gorgonio Council, and the legal services outsourcing company Latitude-South.\textsuperscript{105} The Twin Cities Metropolitan Area is encouraging local employers to convert to ROWEs in order to reduce traffic congestion.\textsuperscript{106} The Office of Personnel Management (OPM) is currently conducting a pilot to study ROWE’s application in federal workplaces.\textsuperscript{107} The OPM study involves nearly 400 union and non-union OPM employees, from claims processors to policy makers, both within and outside of Washington, D.C. Participants were selected so as to reflect the overall federal workforce.\textsuperscript{108} All members of participating groups are included in the ROWE pilot; participation is not seen as a perk to grant or deny, although employees whose assignments require in-office presence must commit to a necessary amount of such presence in the interest of getting the work done.\textsuperscript{109} OPM’s pilot is currently underway, and its final report is expected in February 2011.\textsuperscript{110} To date, it is unclear if the roster of ROWE workplaces includes law firms or other legal services providers other than the outsourcing firm mentioned above. It is also unclear whether the corporations that have adopted ROWE have applied it to their in-

\textsuperscript{108} Id.

\textsuperscript{109} Id.

\textsuperscript{110} Id.
house counsel offices or, if so, how ROWE has been implemented in keeping with attorneys’ internal and external schedule expectations. Finally, we were unable to determine whether OPM’s pilot program includes federal attorneys, although it does include support staff “to the maximum extent possible.” Thus, while initial studies indicate that a well-designed ROWE can reap substantial savings and benefits for employer and employees alike, further outreach with other ROWE employers’ law offices would be helpful in assessing the likely impact of a ROWE in the Law Department.

Within the next ten years, we expect that the Law Department will monitor developments on ROWE in other organizations, including OPM, and evaluate whether it could and should be implemented in the Law Department.

CONCLUSION

The American white-collar workforce is currently amid a trend that challenges the traditional assumptions that tie work performance to fixed places and hours. In the next ten years, businesses, in general, will need a flexible organization that can be adjusted quickly to address new threats and challenges. Baby boomers comprise the majority of the workforce today. By 2015, however, millennials (those born from 1977 to 1997) will overtake them. In 2020, when five generations are simultaneously employed, baby boomers are not expected to represent even a quarter of working Americans.112

“Millennials have a different way of working, and boomers will have to adapt to stay

111 OPM, “Frequently Asked Questions for ROWE Employees,” May 21, 2010, at 10. OPM has customized the ROWE model somewhat to account for federal leave, night differential, and general work-hour requirements. See id. at 4-6, 13-14. For example, employees must account for 80 hours every biweekly pay period, without further restriction except for two core hours on each of two designated days per pay period.

relevant.”¹¹³ In the not too distant future “team leaders will routinely motivate and manage employees across the globe without ever meeting face-to-face – something today’s younger generation knows about from playing online multiplayer computer games.”¹¹⁴ The millennials want constant feedback, but are perfectly happy to get it online.

Technology increasingly enables real-time collaboration among personnel regardless of their location. Young workers tend to desire a balance between work and personal life that allows them to fulfill personal and family ambitions, and their expectations are framed by their familiarity with the possibilities of virtual communication. Even workers approaching retirement may wish to keep working in a manner that gives them the flexibility to transition toward retirement. Since these trends are not anticipated to abate, one can reasonably expect that the Law Department of 2020 will need to expand its approach to flexible work arrangements and even rethink its approach to the work environment in order to recruit and retain talent in competition with other legal employers. We recommend the Law Department study the options, including promising options outside the current mainstream, and assess carefully the prospective costs, benefits, and possible productivity improvements.

RE: Essential Public Service Provided by the Postal Service as a Part of the Nation's Critical Infrastructure

Dear Deputy Director Bonner:

As a follow-up from our conversation on March 20, 2020, the Postal Service is committed to continuing to fulfill its role as a provider of essential government services, and to assist the Administration in whatever way we can during this national emergency. We are working closely with federal, state, and local authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public. However, we are concerned that the implementation of state and local government actions restricting commercial and personal activities in response to the Coronavirus Disease 2019 (COVID-19) pandemic will inadvertently interfere with operations. This letter provides information concerning the Postal Service’s status and our exemption from these state and local directives, as we are both a provider of essential services and part of the federal government.

Essential Government Service

The Postal Service’s role as a provider of essential government services under federal law is clear. The postal system is used to deliver, among other things, important governmental information and benefits, mail that is essential to the functioning of our economy, elections materials, and packages containing vital necessities. For instance, the Postal Service assists with elections, the Census, and the provision of government benefits, like social security checks. We deliver transactional mail that is essential to the financial services industry and other commercial firms. We deliver medications and other necessary purchases made online. We consistently and continually fulfill our essential function as set forth by statute and Administration policy.

We are mandated by statute to operate “as a basic and fundamental service provided to the people by the Government of the United States, authorized by the Constitution, created by an Act of Congress, and supported by the people.” 39 U.S.C. §101(a). The Postal Service performs this role as “an independent establishment of the executive branch of the Government of the United States.” 2 Pursuant to our statute, we are mandated to provide prompt, reliable, and efficient universal postal services throughout the United States.

In addition to this statutory mandate, the Postal Service carries out an essential function of the federal government and provides critical government services as part of the National Continuity Policy (established for national emergencies pursuant to Presidential Directive and implemented by

---

2 Id. § 201.
FEMA). Specifically, “the delivery of postal services to the American Public” is defined as a Primary Mission Essential Function necessary for the continuation of critical government services.3

As background, Presidential Policy Directive 40 established that “it is the policy of the United States to maintain a comprehensive and effective continuity capability through Continuity of Operations (COOP), Continuity of Government (COG), and Enduring Constitutional Government (ECG) programs, ensuring the resilience and preservation of government structure under the United States Constitution and the continuous performance of National Essential Functions (NEFs) under all conditions.”4 National Security Presidential Directive 51 then instructed Executive Departments and Agencies to identify and submit a list of Primary Mission Essential Functions (PMEFs) that the Department or Agency plans in support of the NEFs.5 PMEFS are those mission essential government functions that must be continuously performed in order to support or implement the uninterrupted performance of NEFs before, during, and in the aftermath of an emergency.6

In addition to the PMEF designation, “postal and shipping workers” are considered essential critical infrastructure workers, as defined in recent guidance issued by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency (CISA).7 In its guidance materials issued on March 19, 2020, CISA explained that promoting the ability of essential critical infrastructure workers “to continue to work during periods of community restriction, access management, social distancing, or closure orders/directives is crucial to community resilience and continuity of essential functions.”

White House Guidance further provides that if individuals work in a critical infrastructure industry, as defined by the Department of Homeland Security, they have a responsibility to maintain their normal work schedule, while following CDC guidance to protect individuals’ health at work.8

In addition to our employees, the Postal Service relies heavily on our contractors, suppliers, and industry partners. Contractors and suppliers support all aspects of our operations, including in the transportation and delivery of the mail. This network of contractors and suppliers are likewise critical to the provision of this essential function. In addition, our mailing and printing industry partners are vital because they print and mail the critical items that are sent through the mail, and hence ensure that the government and businesses can access the mail. Our industry partners are also important in ensuring the efficiency of our package delivery network, through which we deliver vital necessities, including medicines and other goods. Moreover, the DHS guidance regarding essential critical infrastructure workers is not specific to the Postal Service, but rather extends to postal and shipping

---

3 See List of List of Validated PMEFS by Department/Agency (available at: https://www.dhs.gov/sites/default/files/publications/list_of_validated_pmefs_by_department_v2_fema.pdf).

workers, including those in the private sector. We believe this reasonably includes our contractors, suppliers, and industry partners.

Given all of the above, we believe it is clear that the Postal Service is exempt from state and local ordinances restricting commercial and personal activities, and that this exemption should also apply as a general matter to our contractors and suppliers who are critical for our operations, and our industry partners who are printing, distributing, and entering items into the postal system. We are already seeing, however, that there is some confusion in the implementation of these ordinances. And the text of several such ordinances does not make clear that the Postal Service, and others in our supply chain, are excluded.

**Supremacy Clause**

The above conclusions are further buttressed by the Supremacy Clause of the United States Constitution, which otherwise limits the ability of state and local laws to affect the performance of federal functions. First, the “intergovernmental immunity” doctrine provides that states and localities are not allowed to directly regulate the actions of any arm of the federal government, unless the federal government clearly and unambiguously submits to state regulation. Second, the “preemption” doctrine provides that state and local laws are preempted by federal law if they seek to regulate an activity that is the subject of a comprehensive federal scheme, or would otherwise frustrate the achievement of the purposes and objectives of federal law.

The U.S. Constitution grants to Congress the enumerated power “to establish post offices and post roads,” a power which “embraces the regulation of the entire Postal System of the country.” As noted above, Congress has in turn established the U.S. Postal Service as an “independent establishment of the executive branch of the Government of the United States” to provide postal services throughout the Nation. To support this mission, Congress delegated to the Postal Service the power “to construct, operate, lease, and maintain buildings, facilities, equipment, and any improvements on any property owned or controlled by it.” Postal facilities serve the basic function of providing prompt, reliable, and efficient postal services nationwide, and must be maintained in such character and in such locations, that postal patrons throughout the Nation will, consistent with reasonable economies of postal operations, have ready access to essential postal services. Congress also granted comprehensive powers to the Postal Service to direct and maintain its operations, including the right to enter into contracts, and broad personnel rights to hire its own employees.

---

9 U.S. CONST. art. 6, cl. 2 (“This Constitution, and the laws of the United States which shall be made in pursuance thereof . . . shall be the supreme law of the land; and the judges in every state shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.”); M'Culloch v. Maryland, 17 U.S. (4 Wheat.) 316, 406 (1819) (“The government of the United States, then, though limited in its powers, is supreme; and its laws, when made in pursuance of the constitution, form the supreme law of the land, ‘anything in the constitution or laws of any state to the contrary notwithstanding.’”).

10 Goodyear Atomic Corp. v. Miller, 486 U.S. 174, 180 (1988) (“It is well settled that the activities of federal installations are shielded by the Supremacy Clause from direct state regulation unless Congress provides ‘clear and unambiguous’ authorization for such regulation.”) (citations omitted).

11 U.S. Const. art. I, § 8, cl. 7.

12 Ex parte Jackson, 96 U.S. 727, 732 (1878).

13 39 U.S.C. § 201. See also id. § 101, 403.

15 Id. §§ 101(a), 403(b)(3).

16 Id. § 401(3).
employees and direct the performance of their duties and "to take whatever actions may be necessary to carry out its mission in emergency situations."\(^{17}\)

In light of the clear congressional mandate that the Postal Service provide economical and efficient mail service on a nationwide basis -- including during times of emergency -- courts have consistently found that Congress intended the Postal Service to have broad immunity from state or local regulation.\(^{18}\) Where local regulation affecting Postal Service operations is inconsistent with postal regulations, courts will deem it to be preempted under the Supremacy Clause as "an unconstitutional obstacle to the accomplishment and execution of the full purposes and objectives of Congress."\(^{19}\) Thus, any state or local law purportedly directing postal employees to follow procedures inconsistent with Postal Service authority presents a clear conflict with federal law, which entrusts the Postal Service with the task of maintaining facilities and operations in accordance with federal law: "Where a postal worker is performing duties pursuant to federal law, a state cannot impose requirements that interfere with the performance of those duties."\(^{20}\)

Moreover, the express authority allocated to the Postal Service to "operate" and "maintain" its facilities in the service of providing an efficient network of postal services on a nationwide basis and "to take whatever actions may be necessary to carry out its mission in emergency situations" "leaves no room" for state or local regulatory authority over health or safety matters and evidences a "federal

\(^{17}\) Id. § 1001(e) ("The Postal Service shall have the right, consistent with . . . applicable laws, regulations, and collective-bargaining agreements—(1) to direct officers and employees of the Postal Service in the performance of official duties; . . . (4) to maintain the efficiency of the operations entrusted to it; (5) to determine the methods, means, and personnel by which such operations are to be conducted; . . . and (7) to take whatever actions may be necessary to carry out its mission in emergency situations.").

\(^{19}\) City of Pittsburg, Cal., 661 F.2d at 785 (citing Hines v. Davidowitz, 312 U.S. 52 (1941) (internal quotation marks omitted)). Courts have held this to be true even in the traditionally local area of public safety. City of Hollywood, 974 F.Supp. at 1465 & n.5 (noting in dicta that, public safety concerns being shared equally by both state and federal levels of government, the Postal Service's interest in a uniform system of facility construction and design would be paramount).

\(^{20}\) City of Pittsburg, Cal., at 785-86 (holding that local criminal trespass ordinance conflicted with Postal Service regulations regarding the manner in which delivery employees performed their duties and was thus preempted by the "Congressional mandate to provide efficient mail delivery service"); cf. U.S. v. City of St. Louis, Branch 343, Nat. Ass'n of Letter Carriers, 597 F.2d 121 (8th Cir. 1979) (holding that a municipal ordinance prohibiting letter carriers from crossing the private property of patrons without their express or implied consent was permissible only because it did not conflict with the same Postal Service regulation).
interest... so dominant that the federal system will be assumed to preclude enforcement of state law on the same subject." Furthermore, the constitutional enumeration of the postal powers supports the supremacy of the federal interest in this field. Even where express preemption language is absent, any state or local law which "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress"—such as a local determination to close a postal facility—would be impliedly preempted by conflict.22

While it does not specifically invoke the Supremacy Clause, the Attorney General issued a memorandum to all United States Attorneys on March 20, 2020, in which he requested that they communicate with state and local law enforcement partners "to ensure that local law enforcement officials enforcing travel restrictions are aware of the fact that federal employees must be allowed to travel and commute to perform law enforcement and other functions and should not be prevented from doing so, even when travel restrictions are in place." This is consistent with the fact that the state and local ordinances should not apply to the Postal Service as part of the federal government, even if we were not providing an essential service as defined by the relevant ordinance.

Finally, to the extent that state and local ordinances would impede the Postal Service's functions, those ordinances are subject to the same preemption analysis regardless of whether the functions are performed by postal employees or contractors.23 This principle has already been applied to Postal Service contractors.24

Conclusion

As stated at the outset, we are committed to continuing to fulfill our role as a provider of essential government services, and we appreciate your consideration of this information. Thank you for your time last Friday and for any assistance you can provide to reinforce the conclusions of this memorandum.

In that regard, please let us know if you have any questions or if additional information would be helpful.

Sincerely,

[Signature]

Thomas J. Marshall

23 See, e.g., Goodyear Atomic Corp. v. Miller, 486 U.S. 174, 181 (1988) (analyzing Hancock v. Train, 426 U.S. 167 (1976), as "establish[ing] that a federally owned facility performing a federal function is shielded from direct state regulation, even though the federal function is carried out by a private contractor, unless Congress clearly authorizes such regulation."); United States v. California, 921 F.3d 865, 882 n.7 (9th Cir. 2019) ("For purposes of intergovernmental immunity, federal contractors are treated the same as the federal government itself.") (citing Goodyear).

RE: Essential Public Service Provided by the Postal Service as a Part of the Nation’s Critical Infrastructure

Dear Deputy Director Bonner:

As a follow-up from our conversation on March 20, 2020, the Postal Service is committed to continuing to fulfill its role as a provider of essential government services, and to assist the Administration in whatever way we can during this national emergency. We are working closely with federal, state, and local authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public. However, we are concerned that the implementation of state and local government actions restricting commercial and personal activities in response to the Coronavirus Disease 2019 (COVID-19) pandemic will inadvertently interfere with operations. This letter provides information concerning the Postal Service’s status and our exemption from these state and local directives, as we are both a provider of essential services and part of the federal government.

Essential Government Service

The Postal Service’s role as a provider of essential government services under federal law is clear. The postal system is used to deliver, among other things, important governmental information and benefits, mail that is essential to the functioning of our economy, elections materials, and packages containing vital necessities. For instance, the Postal Service assists with elections, the Census, and the provision of government benefits, like social security checks. We deliver transactional mail that is essential to the financial services industry and other commercial firms. We deliver medications and other necessary purchases made online. We consistently and continually fulfill our essential function as set forth by statute and Administration policy.

We are mandated by statute to operate “as a basic and fundamental service provided to the people by the Government of the United States, authorized by the Constitution, created by an Act of Congress, and supported by the people.” 1 39 U.S.C. §101(a). The Postal Service performs this role as “an independent establishment of the executive branch of the Government of the United States.” 2 Pursuant to our statute, we are mandated to provide prompt, reliable, and efficient universal postal services throughout the United States.

In addition to this statutory mandate, the Postal Service carries out an essential function of the federal government and provides critical government services as part of the National Continuity Policy (established for national emergencies pursuant to Presidential Directive and implemented by

---

2 Id. § 201.
As background, Presidential Policy Directive 40 established that "it is the policy of the United States to maintain a comprehensive and effective continuity capability through Continuity of Operations (COOP), Continuity of Government (COG), and Enduring Constitutional Government (ECG) programs, ensuring the resilience and preservation of government structure under the United States Constitution and the continuous performance of National Essential Functions (NEFs) under all conditions." National Security Presidential Directive 51 then instructed Executive Departments and Agencies to identify and submit a list of Primary Mission Essential Functions (PMEFs) that the Department or Agency plans in support of the NEFs. PMEFS are those mission essential government functions that must be continuously performed in order to support or implement the uninterrupted performance of NEFs before, during, and in the aftermath of an emergency.

In addition to the PMEF designation, "postal and shipping workers" are considered essential critical infrastructure workers, as defined in recent guidance issued by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency (CISA). In its guidance materials issued on March 19, 2020, CISA explained that promoting the ability of essential critical infrastructure workers "to continue to work during periods of community restriction, access management, social distancing, or closure orders/directives is crucial to community resilience and continuity of essential functions.”

White House Guidance further provides that if individuals work in a critical infrastructure industry, as defined by the Department of Homeland Security, they have a responsibility to maintain their normal work schedule, while following CDC guidance to protect individuals’ health at work.

In addition to our employees, the Postal Service relies heavily on our contractors, suppliers, and industry partners. Contractors and suppliers support all aspects of our operations, including in the transportation and delivery of the mail. This network of contractors and suppliers are likewise critical to the provision of this essential function. In addition, our mailing and printing industry partners are vital because they print and mail the critical items that are sent through the mail, and hence ensure that the government and businesses can access the mail. Our industry partners are also important in ensuring the efficiency of our package delivery network, through which we deliver vital necessities, including medicines and other goods. Moreover, the DHS guidance regarding essential critical infrastructure workers is not specific to the Postal Service, but rather extends to postal and shipping

---

3 See List of List of Validated PMEFS by Department/Agency (available at: https://www.dhs.gov/sites/default/files/publications/list_of_validated_pmefs_by_department_v2_fema.pdf).

workers, including those in the private sector. We believe this reasonably includes our contractors, suppliers, and industry partners.

Given all of the above, we believe it is clear that the Postal Service is exempt from state and local ordinances restricting commercial and personal activities, and that this exemption should also apply as a general matter to our contractors and suppliers who are critical for our operations, and our industry partners who are printing, distributing, and entering items into the postal system. We are already seeing, however, that there is some confusion in the implementation of these ordinances. And the text of several such ordinances does not make clear that the Postal Service, and others in our supply chain, are excluded.

Supremacy Clause

The above conclusions are further buttressed by the Supremacy Clause of the United States Constitution, which otherwise limits the ability of state and local laws to affect the performance of federal functions. First, the "intergovernmental immunity" doctrine provides that states and localities are not allowed to directly regulate the actions of any arm of the federal government, unless the federal government clearly and unambiguously submits to state regulation. Second, the "preemption" doctrine provides that state and local laws are preempted by federal law if they seek to regulate an activity that is the subject of a comprehensive federal scheme, or would otherwise frustrate the achievement of the purposes and objectives of federal law.

The U.S. Constitution grants to Congress the enumerated power "to establish post offices and post roads," a power which "embraces the regulation of the entire Postal System of the country." As noted above, Congress has in turn established the U.S. Postal Service as an "independent establishment of the executive branch of the Government of the United States" to provide postal services throughout the Nation. To support this mission, Congress delegated to the Postal Service the power "to construct, operate, lease, and maintain buildings, facilities, equipment, and any improvements on any property owned or controlled by it." Postal facilities serve the basic function of providing prompt, reliable, and efficient postal services nationwide, and must be maintained in such character and in such locations, that postal patrons throughout the Nation will, consistent with reasonable economies of postal operations, have ready access to essential postal services. Congress also granted comprehensive powers to the Postal Service to direct and maintain its operations, including the right to enter into contracts, and broad personnel rights to hire its own employees.

9 U.S. CONST. art. 6, cl. 2 ("This Constitution, and the laws of the United States which shall be made in pursuance thereof... shall be the supreme law of the land; and the judges in every state shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding."); M'Culloch v. Maryland, 17 U.S. (4 Wheat.) 316, 406 (1819) ("The government of the United States, then, though limited in its powers, is supreme; and its laws, when made in pursuance of the constitution, form the supreme law of the land, 'anything in the constitution or laws of any state to the contrary notwithstanding.").

10 Goodyear Atomic Corp. v. Miller, 486 U.S. 174, 180 (1988) ("It is well settled that the activities of federal installations are shielded by the Supremacy Clause from direct state regulation unless Congress provides 'clear and unambiguous' authorization for such regulation.") (citations omitted).

11 U.S. Const. art. I, § 8, cl. 7.

12 Ex parte Jackson, 96 U.S. 727, 732 (1878).

13 39 U.S.C. § 201. See also id. § 101, 403.

15 Id. §§ 101(a), 403(b)(3).

16 Id. § 401(3).
employees and direct the performance of their duties and “to take whatever actions may be necessary to carry out its mission in emergency situations.”17

In light of the clear congressional mandate that the Postal Service provide economical and efficient mail service on a nationwide basis — including during times of emergency — courts have consistently found that Congress intended the Postal Service to have broad immunity from state or local regulation.18 Where local regulation affecting Postal Service operations is inconsistent with postal regulations, courts will deem it to be preempted under the Supremacy Clause as “an unconstitutional obstacle to the accomplishment and execution of the full purposes and objectives of Congress.”19 Thus, any state or local law purportedly directing postal employees to follow procedures inconsistent with Postal Service authority presents a clear conflict with federal law, which entrusts the Postal Service with the task of maintaining facilities and operations in accordance with federal law: “[W]here a postal worker is performing duties pursuant to federal law, a state cannot impose requirements that interfere with the performance of those duties.”20

Moreover, the express authority allocated to the Postal Service to “operate” and “maintain” its facilities in the service of providing an efficient network of postal services on a nationwide basis and “to take whatever actions may be necessary to carry out its mission in emergency situations” “leaves no room” for state or local regulatory authority over health or safety matters and evidences a “federal

17 Id. § 1001(e) (“The Postal Service shall have the right, consistent with . . . applicable laws, regulations, and collective-bargaining agreements—(1) to direct officers and employees of the Postal Service in the performance of official duties; . . . (4) to maintain the efficiency of the operations entrusted to it; (5) to determine the methods, means, and personnel by which such operations are to be conducted; . . . and (7) to take whatever actions may be necessary to carry out its mission in emergency situations.”)

19 City of Pittsburg, Cal., 661 F.2d at 785 (citing Hines v. Davidowitz, 312 U.S. 52 (1941) (internal quotation marks omitted)). Courts have held this to be true even in the traditionally local area of public safety. City of Hollywood, 974 F.Supp. at 1465 & n.5 (noting in dicta that, public safety concerns being shared equally by both state and federal levels of government, the Postal Service’s interest in a uniform system of facility construction and design would be paramount).

20 City of Pittsburg, Cal., at 785-86 (holding that local criminal trespass ordinance conflicted with Postal Service regulations regarding the manner in which delivery employees performed their duties and was thus preempted by the “Congressional mandate to provide efficient mail delivery service”); cf. U.S. v. City of St. Louis, Branch 343, Nat. Ass’n of Letter Carriers, 597 F.2d 121 (8th Cir. 1979) (holding that a municipal ordinance prohibiting letter carriers from crossing the private property of patrons without their express or implied consent was permissible only because it did not conflict with the same Postal Service regulation).
interest . . . so dominant that the federal system will be assumed to preclude enforcement of state law on the same subject."21 Furthermore, the constitutional enumeration of the postal powers supports the supremacy of the federal interest in this field. Even where express preemption language is absent, any state or local law which "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress"—such as a local determination to close a postal facility—would be impliedly preempted by conflict.22

While it does not specifically invoke the Supremacy Clause, the Attorney General issued a memorandum to all United States Attorneys on March 20, 2020, in which he requested that they communicate with state and local law enforcement partners "to ensure that local law enforcement officials enforcing travel restrictions are aware of the fact that federal employees must be allowed to travel and commute to perform law enforcement and other functions and should not be prevented from doing so, even when travel restrictions are in place." This is consistent with the fact that the state and local ordinances should not apply to the Postal Service as part of the federal government, even if we were not providing an essential service as defined by the relevant ordinance.

Finally, to the extent that state and local ordinances would impede the Postal Service's functions, those ordinances are subject to the same preemption analysis regardless of whether the functions are performed by postal employees or contractors.23 This principle has already been applied to Postal Service contractors.24

Conclusion

As stated at the outset, we are committed to continuing to fulfill our role as a provider of essential government services, and we appreciate your consideration of this information. Thank you for your time last Friday and for any assistance you can provide to reinforce the conclusions of this memorandum.

In that regard, please let us know if you have any questions or if additional information would be helpful.

Sincerely,

Thomas J. Marshall

RE: Essential Public Service Provided by the Postal Service as a Part of the Nation's Critical Infrastructure

Dear Deputy Director Bonner:

As a follow-up from our conversation on March 20, 2020, the Postal Service is committed to continuing to fulfill its role as a provider of essential government services, and to assist the Administration in whatever way we can during this national emergency. We are working closely with federal, state, and local authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public. However, we are concerned that the implementation of state and local government actions restricting commercial and personal activities in response to the Coronavirus Disease 2019 (COVID-19) pandemic will inadvertently interfere with operations. This letter provides information concerning the Postal Service’s status and our exemption from these state and local directives, as we are both a provider of essential services and part of the federal government.

**Essential Government Service**

The Postal Service's role as a provider of essential government services under federal law is clear. The postal system is used to deliver, among other things, important governmental information and benefits, mail that is essential to the functioning of our economy, elections materials, and packages containing vital necessities. For instance, the Postal Service assists with elections, the Census, and the provision of government benefits, like social security checks. We deliver transactional mail that is essential to the financial services industry and other commercial firms. We deliver medications and other necessary purchases made online. We consistently and continually fulfill our essential function as set forth by statute and Administration policy.

We are mandated by statute to operate “as a basic and fundamental service provided to the people by the Government of the United States, authorized by the Constitution, created by an Act of Congress, and supported by the people.” 1 39 U.S.C. §101(a). The Postal Service performs this role as “an independent establishment of the executive branch of the Government of the United States.” 2 Pursuant to our statute, we are mandated to provide prompt, reliable, and efficient universal postal services throughout the United States.

In addition to this statutory mandate, the Postal Service carries out an essential function of the federal government and provides critical government services as part of the National Continuity Policy (established for national emergencies pursuant to Presidential Directive and implemented by

---

2 Id. § 201.
FEMA). Specifically, “the delivery of postal services to the American Public” is defined as a Primary Mission Essential Function necessary for the continuation of critical government services.3

As background, Presidential Policy Directive 40 established that “it is the policy of the United States to maintain a comprehensive and effective continuity capability through Continuity of Operations (COOP), Continuity of Government (COG), and Enduring Constitutional Government (ECG) programs, ensuring the resilience and preservation of government structure under the United States Constitution and the continuous performance of National Essential Functions (NEFs) under all conditions.”4 National Security Presidential Directive 51 then instructed Executive Departments and Agencies to identify and submit a list of Primary Mission Essential Functions (PMEFs) that the Department or Agency plans in support of the NEFs.5 PMEFS are those mission essential government functions that must be continuously performed in order to support or implement the uninterrupted performance of NEFs before, during, and in the aftermath of an emergency.6

In addition to the PMEF designation, “postal and shipping workers” are considered essential critical infrastructure workers, as defined in recent guidance issued by the Department of Homeland Security’s Cybersecurity and Infrastructure Security Agency (CISA).7 In its guidance materials issued on March 19, 2020, CISA explained that promoting the ability of essential critical infrastructure workers “to continue to work during periods of community restriction, access management, social distancing, or closure orders/directives is crucial to community resilience and continuity of essential functions.”

White House Guidance further provides that if individuals work in a critical infrastructure industry, as defined by the Department of Homeland Security, they have a responsibility to maintain their normal work schedule, while following CDC guidance to protect individuals’ health at work.8

In addition to our employees, the Postal Service relies heavily on our contractors, suppliers, and industry partners. Contractors and suppliers support all aspects of our operations, including in the transportation and delivery of the mail. This network of contractors and suppliers are likewise critical to the provision of this essential function. In addition, our mailing and printing industry partners are vital because they print and mail the critical items that are sent through the mail, and hence ensure that the government and businesses can access the mail. Our industry partners are also important in ensuring the efficiency of our package delivery network, through which we deliver vital necessities, including medicines and other goods. Moreover, the DHS guidance regarding essential critical infrastructure workers is not specific to the Postal Service, but rather extends to postal and shipping

workers, including those in the private sector. We believe this reasonably includes our contractors, suppliers, and industry partners.

Given all of the above, we believe it is clear that the Postal Service is exempt from state and local ordinances restricting commercial and personal activities, and that this exemption should also apply as a general matter to our contractors and suppliers who are critical for our operations, and our industry partners who are printing, distributing, and entering items into the postal system. We are already seeing, however, that there is some confusion in the implementation of these ordinances. And the text of several such ordinances does not make clear that the Postal Service, and others in our supply chain, are excluded.

Supremacy Clause

The above conclusions are further buttressed by the Supremacy Clause of the United States Constitution, which otherwise limits the ability of state and local laws to affect the performance of federal functions. First, the "intergovernmental immunity" doctrine provides that states and localities are not allowed to directly regulate the actions of any arm of the federal government, unless the federal government clearly and unambiguously submits to state regulation. Second, the "preemption" doctrine provides that state and local laws are preempted by federal law if they seek to regulate an activity that is the subject of a comprehensive federal scheme, or would otherwise frustrate the achievement of the purposes and objectives of federal law.

The U.S. Constitution grants to Congress the enumerated power "to establish post offices and post roads," a power which "embraces the regulation of the entire Postal System of the country." As noted above, Congress has in turn established the U.S. Postal Service as an "independent establishment of the executive branch of the Government of the United States" to provide postal services throughout the Nation. To support this mission, Congress delegated to the Postal Service the power "to construct, operate, lease, and maintain buildings, facilities, equipment, and any improvements on any property owned or controlled by it." Postal facilities serve the basic function of providing prompt, reliable, and efficient postal services nationwide, and must be maintained in "such character and in such locations, that postal patrons throughout the Nation will, consistent with reasonable economies of postal operations, have ready access to essential postal services." Congress also granted comprehensive powers to the Postal Service to direct and maintain its operations, including the right to enter into contracts, and broad personnel rights to hire its own

9 U.S. Const. art. 6, cl. 2 ("This Constitution, and the laws of the United States which shall be made in pursuance thereof . . . shall be the supreme law of the land; and the judges in every state shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding."); M'Culloch v. Maryland, 17 U.S. (4 Wheat.) 316, 406 (1819) ("The government of the United States, then, though limited in its powers, is supreme; and its laws, when made in pursuance of the constitution, form the supreme law of the land, 'anything in the constitution or laws of any state to the contrary notwithstanding.").

10 Goodyear Atomic Corp. v. Miller, 486 U.S. 174, 180 (1988) ("It is well settled that the activities of federal installations are shielded by the Supremacy Clause from direct state regulation unless Congress provides 'clear and unambiguous' authorization for such regulation.") (citations omitted).

11 U.S. Const. art. 1, § 8, cl. 7.

12 Ex parte Jackson, 96 U.S. 727, 732 (1878).

13 39 U.S.C. § 201. See also id. § 101, 403.

15 Id. §§ 101(a), 403(b)(3).

16 Id. § 401(3).
employees and direct the performance of their duties and "to take whatever actions may be necessary to carry out its mission in emergency situations."17

In light of the clear congressional mandate that the Postal Service provide economical and efficient mail service on a nationwide basis – including during times of emergency – courts have consistently found that Congress intended the Postal Service to have broad immunity from state or local regulation.18 Where local regulation affecting Postal Service operations is inconsistent with postal regulations, courts will deem it to be preempted under the Supremacy Clause as "an unconstitutional obstacle to the accomplishment and execution of the full purposes and objectives of Congress."19 Thus, any state or local law purportedly directing postal employees to follow procedures inconsistent with Postal Service authority presents a clear conflict with federal law, which entrusts the Postal Service with the task of maintaining facilities and operations in accordance with federal law: "Where a postal worker is performing duties pursuant to federal law, a state cannot impose requirements that interfere with the performance of those duties."20

Moreover, the express authority allocated to the Postal Service to "operate" and "maintain" its facilities in the service of providing an efficient network of postal services on a nationwide basis and "to take whatever actions may be necessary to carry out its mission in emergency situations" "leaves no room" for state or local regulatory authority over health or safety matters and evidences a "federal

17 Id. § 1001(e) ("The Postal Service shall have the right, consistent with . . . applicable laws, regulations, and collective-bargaining agreements—(1) to direct officers and employees of the Postal Service in the performance of official duties; . . . (4) to maintain the efficiency of the operations entrusted to it; (5) to determine the methods, means, and personnel by which such operations are to be conducted; . . . and (7) to take whatever actions may be necessary to carry out its mission in emergency situations.").

19 City of Pittsburg, Cal., 661 F.2d at 785 (citing Hines v. Davidowitz, 312 U.S. 52 (1941) (internal quotation marks omitted)). Courts have held this to be true even in the traditionally local area of public safety. City of Hollywood, 974 F. Supp. at 1465 & n.5 (noting in dicta that, public safety concerns being shared equally by both state and federal levels of government, the Postal Service’s interest in a uniform system of facility construction and design would be paramount).

20 City of Pittsburg, Cal., at 785-86 (holding that local criminal trespass ordinance conflicted with Postal Service regulations regarding the manner in which delivery employees performed their duties and was thus preempted by the "Congressional mandate to provide efficient mail delivery service"); cf. U.S. v. City of St. Louis, Branch 343, Nat. Ass’n of Letter Carriers, 597 F.2d 121 (8th Cir. 1979) (holding that a municipal ordinance prohibiting letter carriers from crossing the private property of patrons without their express or implied consent was permissible only because it did not conflict with the same Postal Service regulation).
interest . . . so dominant that the federal system will be assumed to preclude enforcement of state law on the same subject.” Furthermore, the constitutional enumeration of the postal powers supports the supremacy of the federal interest in this field. Even where express preemption language is absent, any state or local law which “stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress”—such as a local determination to close a postal facility—would be impliedly preempted by conflict.22

While it does not specifically invoke the Supremacy Clause, the Attorney General issued a memorandum to all United States Attorneys on March 20, 2020, in which he requested that they communicate with state and local law enforcement partners “to ensure that local law enforcement officials enforcing travel restrictions are aware of the fact that federal employees must be allowed to travel and commute to perform law enforcement and other functions and should not be prevented from doing so, even when travel restrictions are in place.” This is consistent with the fact that the state and local ordinances should not apply to the Postal Service as part of the federal government, even if we were not providing an essential service as defined by the relevant ordinance.

Finally, to the extent that state and local ordinances would impede the Postal Service’s functions, those ordinances are subject to the same preemption analysis regardless of whether the functions are performed by postal employees or contractors.23 This principle has already been applied to Postal Service contractors.24

Conclusion

As stated at the outset, we are committed to continuing to fulfill our role as a provider of essential government services, and we appreciate your consideration of this information. Thank you for your time last Friday and for any assistance you can provide to reinforce the conclusions of this memorandum.

In that regard, please let us know if you have any questions or if additional information would be helpful.

Sincerely,

Thomas J. Marshall

Essential Service Provider Letter

Law Enforcement Official: The bearer of this letter with an accompanying U.S. Postal Service identification badge provides essential services of the federal government.

The Postal Service is continuing to fulfill its critical public service mission by accepting and delivering mail and packages in accordance with federal law. The Postal Service’s provision of mail and package delivery services is not affected by State and local government actions that are restricting commercial and personal activities in response to the COVID-19 pandemic, including the recent order or directive issued for the geographic areas under your jurisdiction.

This exemption includes the employees’ and contractors’ time traveling to and from their workplaces.

We are working closely with federal, state, and local health authorities to ensure that our continued operations during this time of national emergency are conducted in a manner that protects the safety of our employees and the public.

Confirmation of this individual’s status as a Postal Service employee or contractor may be received by contacting the employee’s supervisor at [number].

### LEGISLATIVE

- **Medicare Integration**
  - Prospective Medicare Integration / Vested Liability: 40.8 40.8
  - Eliminate RHB normal cost payments if overfunded: 10.0 10.0
  - Immediate refund of RHB fund surplus: 8.0 8.0
  - Normal cost payments required due to lower funding level after refund: (3.6) (3.6)

### Employee Benefits

- Pension benefits payments resumed if funding ≥ federal government: 61.4
- Convert new employees to defined contribution retirement system: 1.2
- Increase legacy employees contribution to FERS defined benefit: 1.2
- Reform workers' compensation system: 4.6
- Leave policy adjustment: 8.5

### USO

- 5 Day delivery frequency with volume trigger and delivery of packages where density supports positive contribution: 10.7

### Investing

- Invest 100% FERS and CSRS in higher yielding securities: 11.3
- Invest 100% of RHB assets in higher yielding securities: 3.4

### Pricing

- Restore half exigent price increase (2.15%): 5.9

### Note: Average bi-weekly payroll ~$2B / Assumes year-end defaults on RHB, CSRS and FERS lump sums.

* Of the $25B modernization grant, $12,500 is assumed to be spent over time on deferred maintenance and sustaining investments within the current capital plan and $12,500 to be spent immediately on projects that will realize a 20% annual ROI. The $25B grows to $31.250B as a result of the ROI on projects.

** The year end payments include RHB Normal Cost, FERS, CSRS, and RHB Amortization payments. If the components of scenario 3 related to Medicare Integration and Pension funding were enacted, these defaults would not be necessary and would be subsumed within the scenario 3 initiative total. The sum of the default on year end payments and scenario 3 initiatives listed above equals the total scenario 3 value of $169.5B.
Approve S&IC recommendation for immediate relief in Stimulus 4:

1. $25B grant to cover COVID losses over the next two year period
2. $25B modernization grant to ensure USPS can maintain and modernize the infrastructure to support the nation
3. Debt forgiveness of the $14.4B in outstanding debt
4. Unrestricted borrowing authority up to $25B
Approve the recommendation of the Strategy & Innovation Committee regarding the 10-Year Strategy, which will include the following elements:

1. The Mission Statement approved on 4/1
2. Revised 10-year forecast based on COVID-19 impact
3. Scenario A (a/k/a Scenario 3)
4. The approved Legislative Request
5. As a contingency, Scenario B (a/k/a Scenario 4) in the event that (a) the gap is larger than anticipated, (b) all or part of Scenario A is not implemented, or (c) all or part of the Legislative Request is not fulfilled.

</thead>
<tbody>
<tr>
<td>Eliminate the price cap and have the PRC engage in after-the-fact regulatory monitoring of Market Dominant prices set by the Governors.</td>
<td>Would implement via statute the Postal Service’s original proposal in the 10-Year Review, which is modeled on the regulatory system in the United Kingdom. It would create a much more flexible pricing system that still enables the PRC to ensure compliance with the law.</td>
<td>&lt;$5B</td>
<td>Mailing industry, competitors, and PRC would be strongly opposed. Unions would likely be in favor of the substance of the proposal, particularly since we would propose to retain the existing workshare discount rules (a particular concern of APWU).</td>
<td>Indirect</td>
</tr>
<tr>
<td>Provide greater flexibility to enter into NSAs for Market Dominant products, by eliminating the requirement in current law that an NSA provide a “net financial benefit”, this standard has been very hard to meet as an evidentiary matter.</td>
<td>The criteria for Market-Dominant NSAs would be streamlined to facilitate the Postal Service’s ability to enter into more such agreements, based on the exercise of its business judgment. The statute would still require that the Postal Service not discriminate among similarly situated customers, and that the NSA not cause unreasonable harm to the marketplace (a standard that the PRC interprets to require that, among other things, an NSA cover its costs).</td>
<td>&lt;$1B-$5B</td>
<td>Mailing industry would generally support. Unclear if the PRC would oppose. Certain mailer groups that have opposed specific NSAs in the past, such as the newspapers, may be opposed, as may interest groups like the Taxpayers Alliance. Unions could oppose if this facilitates more workshare mail.</td>
<td>Indirect</td>
</tr>
<tr>
<td>Eliminate before-the-fact PRC review of Competitive rates, including NSAs. The Commission would engage in after-the-fact review in the Annual Compliance Report and complaint processes.</td>
<td>This would streamline the process for setting Competitive rates, particularly with respect to NSAs.</td>
<td>&lt;$1B-$5B</td>
<td>Customers would be in favor because this would increase ability to enter into agreements with Postal Service. Competitors would be strongly opposed, and PRC would likely be opposed to reduction in its regulatory authority.</td>
<td>Indirect</td>
</tr>
<tr>
<td>Eliminate before-the-fact review by PRC of new postal products, or PRC review of decisions to eliminate products</td>
<td>This proposal would give the Postal Service greater flexibility regarding its portfolio of postal products. The PRC would retain discretion as to how products would be categorized (i.e., either as Market-Dominant or Competitive), and therefore whether to regulate a product from one category to the other.</td>
<td>&lt;$1B</td>
<td>Mailing industry, competitors, and PRC would likely oppose any diminution of the PRC’s regulatory authority.</td>
<td>Indirect</td>
</tr>

<td>----------------------</td>
<td>--------------------------</td>
</tr>
<tr>
<td>Provide greater product freedom to offer nonpostal services and government services</td>
<td>This would allow new nonpostal services that are in the public interest and consistent with the Postal Service’s mission of binding the Nation together. Those services would be authorized by the Governors, and subsequently regulated by the Commission in the same manner as the other nonpostal services. The language also would expand the Postal Service’s authorization to provide government services to state, local, and tribal governments; would specifically authorize the use of “sponsorship agreements”; and would endorse the concept that the Postal Service should be the storefront of the Federal Government.</td>
<td>$1B-$5B, with possible but unknown upside depending on profitability of additional services</td>
<td>There has been broad consensus around the state/local/tribal government language.</td>
<td>Indirect</td>
</tr>
<tr>
<td>Streamline service change process by either eliminating the PRC advisory opinion process entirely, or making the procedures less burdensome.</td>
<td>This would enable the Postal Service to implement service changes approved by the Board without first seeking an advisory opinion from the PRC. Alternatively, the Postal Service could retain the requirement to seek an advisory opinion, but change the statute to ensure a streamlined PRC process.</td>
<td>&lt;$1B</td>
<td>Mailing industry, consumer groups, competitors, unions, and PRC would likely strongly oppose the elimination of this process. The alternative would likely also be opposed by these groups.</td>
<td>Indirect</td>
</tr>
<tr>
<td>Create additional flexibility for workshare discounts within price cap structure.</td>
<td>This would eliminate the PRC proposal to set a floor for workshare discounts, and give the Postal Service greater flexibility to set workshare discounts above the level of avoided costs.</td>
<td>&lt;$1B</td>
<td>Mailing industry would support more flexibility to set workshare discounts above costs, but would oppose eliminating the floor. Unions would oppose giving more flexibility to set workshare discounts above cost. PRC would oppose any diminution of authority over pricing system.</td>
<td>Indirect</td>

COVID-19 Financial Assessment

Long-Term P&L and Cash Flow Statement Impacts

Note: Average bi-weekly payroll ~$2B / Assumes year-end defaults on RHB, CSRS and FERS lump sums.
SEC. 2302. DELAY OF PAYMENT OF EMPLOYER PAYROLL TAXES.

SEC. 2302. DELAY OF PAYMENT OF EMPLOYER PAYROLL TAXES.

(a) IN GENERAL.—

(1) TAXES.—Notwithstanding any other provision of law, the payment for applicable employment taxes for the payroll tax deferral period shall not be due before the applicable date.

(2) DEPOSITS.—Notwithstanding section 6302 of the Internal Revenue Code of 1986, an employer shall be treated as having timely made all deposits of applicable employment taxes that are required to be made (without regard to this section) for such taxes during the payroll tax deferral period if all such deposits are made not later than the applicable date.

(3) EXCEPTION.—This subsection shall not apply to any taxpayer if such taxpayer has had indebtedness forgiven under section 1106 of this Act with respect to a loan under paragraph (3) of section 7(a) of the Small Business Act (15 U.S.C. 636(a)), as added by section 1102 of this Act, or indebtedness forgiven under section 1109 of this Act.

(b) SEC.

(1) IN GENERAL.—Notwithstanding any other provision of law, the payment for 50 percent of the taxes imposed under section 1401(a) of the Internal Revenue Code of 1986 for the payroll tax deferral period shall not be due before the applicable date.

(2) ESTIMATED TAXES.—For purposes of applying section 6654 of the Internal Revenue Code of 1986 to any taxable year which includes any part of the payroll tax deferral period, 50 percent of the taxes imposed under section 1401(a) of such Code for the payroll tax deferral period shall not be treated as taxes to which such section 6654 applies.

(c) LIABILITY OF THIRD PARTIES.—

(1) ACTS TO BE PERFORMED BY AGENTS.—For purposes of section 3504 of the Internal Revenue Code of 1986, in the case of any person designated pursuant to such section (and any regulations or other guidance issued by the Secretary with respect to such section) to perform acts otherwise required to be performed by an employer under such Code, if such employer directs such person to defer payment of any applicable employment taxes during the payroll tax deferral period under this section, such employer shall be solely liable for the payment of such applicable employment taxes before the applicable date for any wages paid by such person on behalf of such employer during such period.

(2) CERTIFIED PROFESSIONAL EMPLOYER ORGANIZATIONS.—For purposes of section 3511, in the case of a certified professional employer organization (as defined in subsection (a) of section 7705 of the Internal Revenue Code of 1986) that has entered into a service contract described in subsection (e)(2) of such section with a customer, if such customer directs such organization to defer payment of any applicable employment taxes during the payroll tax deferral period under this section, such customer shall, notwithstanding subsections (a) and (c) of section 3511, be solely liable for the payment of such applicable employment taxes before the applicable date for any wages paid by such organization to any work site employee performing services for such customer during such period.

(d) DEFINITIONS.—For purposes of this section—

(1) APPLICABLE EMPLOYMENT TAXES.—The term “applicable employment taxes” means the following:

(A) The taxes imposed under section 3111(a) of the Internal Revenue Code of 1986.

(B) So much of the taxes imposed under section 3211(a) of such Code as are attributable to the rate in effect under section 3111(a) of such Code.

(C) So much of the taxes imposed under section 3221(a) of such Code as are attributable to the rate in effect under section 3111(a) of such Code.

(2) PAYROLL TAX DEFERRAL PERIOD.—The term “payroll tax deferral period” means the period beginning on the date of the enactment of this Act and ending before January 1, 2021.

(3) APPLICABLE DATE.—The term “applicable date” means—

(A) December 31, 2021, with respect to 50 percent of the amounts to which subsection (a) or (b), as the case may be, apply, and

(B) December 31, 2022, with respect to the remaining such amounts.

(4) SECRETARY.—The term “Secretary” means the Secretary of the Treasury (or the Secretary’s delegate).

(e) TRUST FUNDS HELD HARMLESS.—There are hereby appropriated (out of any money in the Treasury not otherwise appropriated) for each fiscal year to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund established under section 201 of the Social Security Act (42 U.S.C. 401) and the Social Security Equivalent Benefit Account established under section 15A(a) of the Railroad Retirement Act of 1974 (43 U.S.C. 251a–1) an amount equal to the reduction in the transfers to such Trust Fund for such fiscal year by reason of this section. Amounts appropriated by the preceding sentence shall be transferred from the general fund at such times and in such manner as to replicate to the extent possible the transfers which would have occurred to such Trust Fund had such amendments not been enacted.

(f) REGULATORY AUTHORITY.—The Secretary shall issue such regulations or other guidance as necessary to carry out the purposes of this section, including rules for the administration and enforcement of subsection (c).
Strategies for a Financially Sustainable Postal Service - 10-Year Outlook & Options

Megan J. Brennan
Postmaster General and Chief Executive Officer
Closure of Transcripts of April 8 Meeting

– Vote –
Adjournment
April 14, 2020

GOVERNORS

SUBJECT: Additional Borrowing Authority Under the CARES Act

This memorandum examines the parameters for $10 billion in additional borrowing authority that Congress recently made available to the Postal Service in response to the ongoing Coronavirus Disease 2019 ("COVID-19") outbreak.

EXECUTIVE SUMMARY

- The new borrowing authority can be accessed only if the Postal Service determines that additional liquidity is necessary to fund operating expenses due to the COVID-19 emergency. Various aspects of this threshold requirement are subject to interpretation: "operating expenses," "due to," the degree of necessity, and the timing of the financial need. Because the statute charges the Postal Service with determining necessity, we arguably have primary discretion to interpret and apply this aspect of the statute. In this regard, we have a clear basis to determine, based on our current forecasts concerning the impact of the COVID-19 outbreak on Postal Service volumes, revenues, and liquidity, that receiving this additional $10 billion in full is consistent with the language of the statute; we are therefore legally authorized to request the full amount at any time. Nevertheless, the consent role of the Treasury Department ("Treasury") means that it could seek to hold up borrowing if it disagrees with the Postal Service’s interpretation, or if it questions the assumptions that the Postal Service is using to make our determination.

- Treasury must agree to the terms and conditions of borrowing. In light of recent experience, Treasury could attempt to condition its assent on conditions that enhance its oversight over Postal Service business decisions, and that even intrude upon the Board’s and the Governors’ discretion to lead the Postal Service. We think such an outcome is unlikely, for the reasons noted below, but as we have previously advised, such conditions would violate constitutional and statutory parameters. In this case we believe that the circumstances and scrutiny from Members of Congress and others could lead Treasury to take a more flexible approach, and our preliminary indications are that Treasury will not insist upon consent rights.
• Borrowing is limited to $10 billion. This limitation applies at all times; it cannot be temporarily exceeded so long as outstanding debt is returned to $10 billion later. Although we could attempt to access the borrowing authority repeatedly so long as we remain within the $10 billion limit, and Treasury could agree with that approach, the statutory language could also give Treasury (and other decision-makers) a reasonable basis to view the borrowing authority as being available only once.

• Under a reasonable interpretation of the statutory language, funds borrowed under the CARES Act cannot be used for capital expenses or to pay principal, interest, or fees on obligations issued under Title 39. Although there is no specific accounting or reporting requirement, Treasury or Congressional stakeholders could insist that the Postal Service demonstrate its compliance with the requirement that borrowed funds be used only for operating expenses.

ANALYSIS

On March 27, 2020, Congress enacted the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act"), Pub. L. No. 116-136. Section 6001(b) of the CARES Act permits the Postal Service to borrow up to $10 billion from the Department of the Treasury, separately from the $15 billion of borrowing authority already available to the Postal Service under 39 U.S.C. § 2005. This additional borrowing authority is subject to a number of conditions, however, the precise import of which are not immediately clear from the statutory text.¹

Section 6001(b) provides as follows:

(b) Additional borrowing authority.—Notwithstanding section 2005 of title 39, United States Code, or any other provision of law, if the Postal Service determines that, due to the COVID-19 emergency, the Postal Service will not be able to fund operating expenses without borrowing money—

(1) the Postal Service may borrow money from the Treasury in an amount not to exceed $10,000,000,000—

(A) to be used for such operating expenses; and

(B) which may not be used to pay any outstanding debt of the Postal Service; and

¹ Because the legislation was negotiated largely behind the scenes by Congressional leaders and the Secretary of the Treasury, there are no committee reports or other normal incidents of legislative history to serve as an interpretive aid. The few floor statements by individual Members of Congress that discuss the Postal Service provisions do so only in general terms, and therefore are of no probative value.
(2) the Secretary of the Treasury may lend up to the amount described in paragraph (1) at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

This provision plainly establishes at least four principal conditions: two prior to borrowing, one concerning the amount of borrowing, and one on the use of borrowed funds. The Postal Service must first determine that it needs to borrow money in order to fund operating expenses due to the COVID-19 emergency. And it must reach mutual agreement with Treasury over the terms and conditions of borrowing. The borrowing is limited to “an amount not to exceed” $10 billion. The borrowed moneys must be used only for “operating expenses,” which cannot include “pay[ing] any outstanding debt.” Each condition raises various questions of interpretation.

I. Postal Service Determination of Necessity to Fund Operating Expenses

Under the opening paragraph of Section 6001(b), prior to borrowing any funds, the Postal Service must first determine “that, due to the COVID-19 emergency, the Postal Service will not be able to fund operating expenses without borrowing money.” At least six aspects of this proviso are noteworthy.

First, the term “operating expenses” is not defined, but given the term’s usage in a related context, “operating expenses” should be construed as distinct from “capital expenses.” Specifically, the term “operating expenses” is used in the Postal Service’s longstanding borrowing statute. Currently, that provision caps the net increase in borrowing “for the purpose of capital improvements and . . . for the purpose of defraying operating expenses” at $3 billion per fiscal year. 39 U.S.C. § 2005(a). Prior to the enactment of the Postal Accountability and Enhancement Act of 2006 (PAEA), the same sentence set separate annual caps on borrowing used for capital expenses and for operating expenses ($2 billion and $1 billion, respectively). See 39 U.S.C. § 2005(a) (2005). Because Section 6001(b) of the CARES Act relates to the same subject matter as 39 U.S.C. § 2005(a) – a fact recognized by the express citation of the Title 39 provision in CARES Act Section 6001’s “notwithstanding” clause – it is reasonable to construe the two provisions in pari materia: that is, consonant with one another due to their related subject matter. See, e.g., Pasquantino v. United States, 544 U.S. 349, 355 n.2 (2005) (noting that wire- and mail-fraud statutes have been construed in pari materia); Nat’l Fed’n of Fed. Employees, Local 1309 v. Dep’t of Interior, 526 U.S. 86, 105 (1999); 2B Sutherland Statutes & Statutory Construction §§ 51:1-51:2, 53:2 (7th ed. 2020).

Under pre-PAEA 39 U.S.C. § 2005(a), the term “operating expenses” was understood by the Postal Service to mean all expenses other than capital expenses. “Operating expenses” therefore included not only expenses intuitively viewed as related to operations
(e.g., salaries and supplier costs), but also post-retirement benefits expenses and even interest expense on borrowed funds.\(^2\)

Second, the borrowing of funds is conditioned on the Postal Service "not being able to fund operating expenses without borrowing money." This implies that the additional borrowing authority is a true necessity: that is, the Postal Service must borrow money to continue funding its operating expenses, because the other available means of doing so will come up short. That said, access to the borrowing authority can precede an actual inability to fund operating expenses, as the relevant language is phrased in the future tense ("will not be able to fund").

Third, "due to" is not defined. The plain meaning of this phrase is "because of": there must be a causal relationship between the inability to fund operating expenses and the COVID-19 emergency. See U.S. Postal Serv. v. Postal Regulatory Comm'n, 640 F.3d 1263, 1267 (D.C. Cir. 2011) (construing "due to" in the statute authorizing exigent price increases). What is less clear is how close the causal nexus must be (and hence the level of proof that must be provided to substantiate that causal nexus). On that question, courts have recognized that "the phrase 'due to' is ambiguous. . . . The causal nexus of 'due to' has been given a broad variety of meanings in the law ranging from sole and proximate cause at one end of the spectrum to contributing cause at the other." Id. at 1268 (quoting Kimber v. Thiokol Corp., 196 F.3d 1092, 1100 (10th Cir. 1999)) (brackets, internal quotation marks, and further citation omitted). Thus, it would certainly be possible to read Section 6001(b) as authorizing borrowing to the sole extent that financial strains can be specifically attributed to the COVID-19 emergency and that those strains overrun all other sources of funding. Cf. id. at 1267-68 (describing the Postal Regulatory Commission's (Commission's) initially strict application of "due to" in the exigency statute). But "due to"

- can mean 'due in part to' as well as 'due only to.' A financial crisis can often result from multiple contributing factors[]. It would not be incorrect to say that [a need for relief] is 'due to' [one] factor simply because it is also 'due to' other factors as well.

---

\(^2\) We are aware of at least two alternative uses of "operating expenses" in relation to the Postal Service. First, in the Postal Service's periodic financial reports, "operating expenses" encompass all expenses (including depreciation on capital investments) other than interest expense. E.g., U.S. Postal Serv., FY2019 Form 10-K, at 24-39. Second, under the pre-PAEA provision that governed the Governors' ratemaking authority, rates were required to cover "total estimated costs," the definition of which, in turn, distinguished operating expenses from depreciation on capital investments, interest and other debt-related expense, and an amount for contingencies. 39 U.S.C. § 3621 (2005). Although an argument could be made for applying a different reading, the permanent borrowing statute (39 U.S.C. § 2005(a)) is clearly more directly relevant to the CARES Act's borrowing provision than either periodic financial reporting or ratemaking.
Id. at 1268 (emphasis in original). Hence, in the Section 6001(b) context, it could be enough for the Postal Service to face an inability to fund operating expenses because of the COVID-19 emergency as well as other factors.\(^3\)

Fourth, the inability to fund operating expenses must be "due to the COVID-19 emergency." The "COVID-19 emergency" is expressly defined in relation to the President’s declaration of a national emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. CARES Act § 6001(a)(1). Once the President has rescinded that emergency declaration, then the predicate condition for borrowing could be curtailed. More precisely, to access the CARES Act borrowing authority thereafter, the Postal Service would need to determine that the inability to fund operating expenses remains "due to" emergency conditions prior to rescission.

The Postal Service can certainly argue that, to the extent that mail volumes remain lower and/or costs remain higher at a given point in time than they would have been had the pandemic not occurred, such continuing effects are "due to" the pandemic, even if the emergency declaration has been rescinded. This would justify continued funding under this provision if these continuing effects mean that the Postal Service cannot fund operating expenses without borrowing. That said, assuming that Treasury cooperates in lending money during the COVID-19 emergency, it could decide to stop doing so earlier than the Postal Service believes to be warranted, if Treasury decides that the Postal Service's inability to fund operating expenses is no longer "due to" the emergency. Such a prospect would resemble the Commission’s decision to truncate the amount of Great-Recession-era losses that the Postal Service was able to recover through an above-inflation rate increase. There, the Commission relied on the "due to" language in the exigency statute discussed above to establish a cut-off point, after which it would no longer deem continuing mail-volume losses to be "due to" the Great Recession. The Commission based this cut-off point on a determination of when the Postal Service theoretically entered a "new normal," based on macroeconomic indicators and when the Postal Service began to gain an "ability to adjust" its operations at the depth of the recession's impact. See Order No. 1926, Order

---

\(^3\) In USPS v. PRC, the court remanded the case to the Commission to interpret "due to" in the exigency statute. The Commission subsequently adopted a view close to the stricter end of the interpretive spectrum by requiring the Postal Service to quantify financial impacts attributable to the exigent circumstance (in that case, the Great Recession) rather than to other causes, although it granted that the quantification need not be absolutely precise. See generally Order No. 864, Order Resolving Issues on Remand, PRC Docket No. R2010-4R (Sept. 20, 2011). Key factors in the Commission’s reasoning were the Postal Service’s econometric resources, the scale of relief that it could seek (into the billions of dollars), and the fact that the exigency provision “is not intended as a remedial provision, but rather as a narrow exception to the price cap.” Id. at 44. In the context of borrowing under the CARES Act, the Postal Service’s resources and the scale of relief are comparable to what the Commission considered, and the additional borrowing authority could arguably (albeit not necessarily) be seen as a narrow exception to the Postal Service’s normal borrowing authority. That said, critical differences between the two contexts militate against applying the Commission’s logic here: the CARES Act’s "due to" language is to be applied by the Postal Service itself, not by an external oversight body, and borrowing money that must be repaid (with interest) – unlike a price increase – does not permanently affect any other party’s property interest.

Even if the Postal Service might assert that COVID-19 impacts persist beyond the emergency declaration's rescission, Treasury, taking a page from the Commission's book, could nonetheless point not only to the emergency's formal end, but also impute (however unrealistically) to the Postal Service an "ability to adjust" that renders its inability to fund operating expenses no longer "due to" the emergency.

Fifth, another interpretative ambiguity in the statute is the relationship between the necessity determination and the actual amount of borrowing that the Postal Service may request. In particular, the statute requires that the Postal Service determine that we could not fund operating expenses due to the pandemic "without borrowing money," but does not directly limit the size of the resulting request in any way other than by imposing a $10 billion cap. In this regard, the Postal Service could argue that so long as we demonstrate a need to borrow money, we can borrow the full $10 billion under the statute, and need not justify the precise amount requested within that overall cap. On the other hand, Treasury could argue that while the $10 billion is an overall cap, the statute also is most reasonably read to limit the size of a request to only what is strictly necessary to ensure that operating expenses are funded.

Sixth, all of this analysis is to be conducted as part of a determination by the Postal Service, but the scope of our actual discretion is unspecified. Section 6001(b)(2) provides that Treasury "may" – not "must" – lend money requested by the Postal Service. Cf. 39 U.S.C. § 2006(b) (authorizing the Postal Service to "require the Secretary of the Treasury to purchase" up to $2 billion in Postal Service obligations). Treasury could point to this discretionary language as allowing it to refuse to lend money on the basis that it disagrees with the Postal Service's determination of need. As further support, Treasury could contrast the CARES Act language with an earlier House version of the bill, which would have required Treasury to lend moneys requested by the Postal Service. H.R. 6379, 116th Cong. § 140001(a)(2) (2020) ("T[he] Secretary of the Treasury shall lend up to such amount at the request of the Postal Service."). This mandatory language was abandoned in favor of the discretionary language in the final bill. Given the intense negotiations between Congressional leaders and Treasury that produced the final CARES Act, as well as the attention that the Administration reportedly gave to the postal provisions, this result is almost surely meaningful, rather than accidental. In the end, even if the Postal Service is correct that we have discretion regarding the necessity determination as a legal matter, as a practical matter the Treasury could still refuse to provide the money for other reasons.

---

\(^4\) The Postal Service challenged this cut-off as arbitrary, as macroeconomic indicators did not necessarily correspond to mail-volume trends, and as it made little sense to cut off recovery at the depth of the losses, when the Postal Service had merely begun to adjust but had not yet adequately adjusted. These challenges were unsuccessful. See Alliance for Nonprofit Mailers v. Postal Regulatory Comm'n, 790 F.3d 186, 196 & n.3 (D.C. Cir. 2015); Order No. 2623, Order Resolving Issues on Remand, PRC Docket No. R2013-11R (July 29, 2015) (denying reconsideration), at 15-28, aff'd, U.S. Postal Serv. v. Postal Regulatory Comm'n, 841 F.3d 508 (D.C. Cir. 2016).
In the event that Treasury attempts to second-guess the Postal Service’s determination of need, the Postal Service could point to Congress’s express conferral on the Postal Service of discretion to determine need; if Congress had intended to subject that determination to Treasury’s oversight, it easily could have so provided. Given our recent experience with disagreements over statutory construction, it is possible that we would be unable to persuade Treasury of our interpretation, and resolution of any interagency dispute might ultimately lie with the Office of Legal Counsel (OLC) at the Department of Justice. To minimize the risk of a time-consuming and uncertain dispute, the Postal Service would be well-advised to seek a common understanding with Treasury concerning this aspect of the statute.

While these interpretative issues present room for potential dispute with Treasury, the Postal Service does have a very strong argument that borrowing the full amount of the $10 billion is clearly necessary under the terms of the statute at this time. In this regard, our projections show that the Postal Service will experience a cash shortfall, and hence an inability to fund operating expenses, this calendar year unless the $10 billion is borrowed, and that we will need the full $10 billion to continue operations for as long as possible next fiscal year.\(^5\) This circumstance is a direct result of the precipitous declines in mail volumes that we forecast for Quarter 3 of FY2020, which would not have occurred but for the onset of the pandemic. Therefore, the Postal Service is legally authorized under the statute to request the full $10 billion at this time. While the above-mentioned interpretive issues may complicate our ability to utilize this funding source, we think that such issues are more likely to arise as time passes than they would if we seek these funds now, when the longer-term effects of the pandemic are unclear.

II. Treasury Agreement to Conditions

Under Section 6001(b)(2), any borrowing must be “upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.” As you know, in adopting this language, Congress declined our proposed alternative, which would have allowed for negotiation against a backdrop of default terms from the now-expired note purchase agreement. Without such a backdrop, Treasury could seek to reject our proposed terms and to propose terms that we would view as unlawful, inappropriate, or otherwise undesirable. (Indeed, Treasury’s insistence on such terms is what led to the expiration, rather than the renewal, of the note purchase agreement last year.)

Treasury might argue that, regardless of any disagreement concerning the appropriate terms and conditions of borrowing under Title 39, it has freer rein to propose such conditions under the CARES Act. As OLC has recognized, the legislative history of the

---

5 The projections show the potential for a cash shortfall by October. However, as noted above, the statute arguably requires capital expenses to be excluded from the determination of necessity. The Postal Service’s projection assumes capital expenses of $2.0 billion over the rest of this fiscal year, and $2.5 billion for next fiscal year. If these capital expenses are excluded, the Postal Service would still likely experience a cash shortfall this calendar year, or early next calendar year.
Title 39 borrowing provision, as well as legislation establishing the Federal Financing Bank enacted shortly thereafter, is replete with Treasury’s disavowals of any intent to interfere with the Postal Service’s operational and business decisions. See Scope of Treasury Department Purchase Rights with Respect to Financing Initiatives of the U.S. Postal Service, 19 Op. Off. Legal Counsel 238, 245 n.5 (1995); Authority of the Secretary of the Treasury Regarding Postal Service Bond Offering, 17 Op. Off. Legal Counsel 6, 8-10 (1993). By contrast, the CARES Act contains no such legislative history, and its additional borrowing authority is expressly distinguished from, rather than subordinate to, the Title 39 borrowing provision. If anything, the contrast between the final CARES Act and the House bill demonstrates that the “mutual agreement” requirement was intentionally added. See H.R. 6379, 116th Cong. § 140001(a)(2) (containing no language about terms and conditions).

That said, any attempt by Treasury to use even this borrowing authority to oversee or second-guess the Governors’ and Board’s decisions would still vitiate Congress’s intent in creating the Postal Service to be insulated from direct political control, and hence would violate constitutional and statutory parameters in the same manner as its prior attempt to impose such terms on our Title 39 borrowing. In this regard, the absence of any direct legislative history is simply not a material legal consideration. Let me know if you would like me to send to you our prior memorandum to the Board explaining these constitutional and statutory issues.

Our experience with non-renewal of the note purchase agreement shows that Treasury may not be swayed by the legal bona fides of our position and may insist on inappropriate terms regardless. In such an event, we may be able to seek a legal opinion from OLC supporting our view. Alternatively, Congress clearly expected that Treasury would facilitate borrowing under Section 6001(b), and any significant delay or lack of cooperation by Treasury could become a subject of Congressional inquiry and oversight. As noted above, at present Treasury has advised us that it does not intend to seek to impose “consent” rights.

III. Amount of Borrowing

Section 6001(b)(1) provides that the borrowing shall be “in an amount not to exceed” $10 billion. In contrast to the Title 39 borrowing provisions, this language does not specify whether the $10 billion limit applies to the amount of CARES Act borrowing “outstanding at any one time” or only as of a certain point in time (e.g., the end of a fiscal year), such that greater amounts can be borrowed so long as the outstanding amount is reduced by the cutoff time. See 39 U.S.C. § 2005(a)(1) (containing both types of cap). Without further qualification, however, a plain reading of “not to exceed” indicates that the $10 billion limit applies at all times; the limit cannot be exceeded temporarily so long as it is met later.

A related question concerns whether the $10 billion is a cap similar to the $15 billion cap on Title 39 borrowing, meaning that the Postal Service may access the borrowing authority multiple times (with aggregate borrowing at any one time remaining within the limit), or
whether the statute only authorizes the provision of $10 billion in total. If the latter is true, another question is whether this borrowing authority can only be accessed in a one-time loan, or if multiple loans are allowed.

Based on existing practice and the uncertain duration of the current emergency, the Postal Service could reasonably take the view that it can repeatedly borrow money within the $10 billion limit. It is possible, however, that Treasury (or OLC, in the event of a dispute) could interpret the CARES Act as providing for a provision of $10 billion in total. A contrast with the Title 39 provision shows that Congress had a template for making the limit apply to an aggregate amount of borrowing “outstanding at any time,” id., which was not used in the CARES Act. This, coupled with the plain meaning of the CARES Act language, arguably indicates that Congress did not intend for the CARES Act borrowing limit to operate in the same manner as the $15 billion borrowing cap. It is also conceivable that Treasury could assert that the statute only authorizes a single loan, based on the fact that the statute refers to a singular “amount” of borrowing, and not a multiple “amount of obligations,” as in Section 2005, though this argument would be weaker.

Ultimately, this question only becomes relevant if we attempt to access the CARES Act borrowing authority a second time. Because of the possibility that we could be denied a second round of borrowing, it would be advisable to seek to borrow the maximum amount available ($10 billion) at the outset, which is advisable in any event given all of the interpretative issues concerning the “due to” language. In addition, it might also be advisable to seek to secure as long of a maturity as is feasible.

IV. Restrictions on the Use of Borrowed Funds

Section 6001(b)(1)(A) and (B) provide that borrowed funds can only be used to fund operating expenses and cannot be used to pay outstanding debt.

As discussed in section I above, it would be consistent with the history of the Postal Service’s permanent borrowing statute to construe the reference to “operating expenses” as excluding capital expenses.

In addition, we think it evident that “debt” means liabilities from borrowing. See 39 U.S.C. § 2001(3) (referring to “debt instruments” in the context of the Title 39 borrowing provisions). However, the limitation on using these additional funds to “pay any outstanding debt” is ambiguous in several respects.

One definition of “debt” refers broadly to any “liability” or “specific sum of money due by agreement or otherwise,” such as payments to a supplier or employee for services rendered. See BLACK’S LAW DICTIONARY, “debt” (11th ed. 2019). However, as noted above, it is appropriate to read the terms of the CARES Act consistently with the terms of Title 39’s borrowing provisions. In addition, it is functionally implausible to believe that Congress intended “debt” to refer to the Postal Service’s liabilities generally, since that would mean that the funds borrowed under the CARES Act could be used only to provide liquidity for future operating expenses, and not for expenses already incurred (and thus “outstanding”).
First, it is unclear whether "outstanding debt" includes all payments on borrowed debt, or only payments on principal. On the one hand, to "pay [down] debt" might generally connote payment that has the effect of reducing or eliminating the principal owed. Perhaps for this reason, the Postal Service reports interest expense as a distinct line item in its periodic financial reports. On the other hand, a debt has not been repaid if accrued interest or prepayment fees remain outstanding. Indeed, the statutory language here does not distinguish between principal and other debt, and contextual definitions are broad enough to encompass any amounts (including interest and fees) that are owed under a loan agreement. See 39 U.S.C. § 2001(3); BLACK’S LAW DICTIONARY, "debt." In our view, the more reasonable construction is that "outstanding debt" includes principal, interest, and any fees arising under a loan agreement.

Second, it is unclear whether "outstanding debt" refers to debt outstanding when the newly borrowed moneys are spent, or only to debt outstanding at the time of enactment. The former reading is more plausible. Other CARES Act provisions, as well as the Title 39 borrowing provisions, use "outstanding" in ways that appear clearly to connote "outstanding at the time of the relevant event," and in no case "outstanding at the time of enactment." See CARES Act, Pub. L. No. 116-136, § 4003(c)(1)(A) (requiring rates for certain Treasury loans to be based on "the current average yield on outstanding marketable obligations of the United States of comparable maturity"); 39 U.S.C. § 2006(a) (same).

On a functional level, Congress placed specific conditions on borrowing under the CARES Act that do not apply to borrowing under Title 39, and so a broader reading of CARES Act’s "outstanding debt" preclusion makes sense as an anti-circumvention measure. Otherwise, the Postal Service could borrow under the CARES Act (while eligible) to pay down Title 39 loans, with the newly liberated Title 39 borrowing authority remaining available even after the COVID-19 emergency had ended. To the extent that Congress was seeking to foreclose that possibility, as the language of the statute indicates that it was, the concern applies equally whether moneys are borrowed under Title 39 before or after the date of enactment.

Third, it is unclear whether "any outstanding debt" means only debt acquired under other authorities (i.e., the Title 39 borrowing provisions), or whether it also precludes using CARES Act borrowing to retire and renew earlier CARES Act debt. Under either reading, the CARES Act would preclude borrowing to repay funds borrowed under Title 39. That much would be consistent with Congress’s apparent concern that the CARES Act borrowing authority remain distinct from Title 39 borrowing. The additional question is whether the preclusion extends to repayment of earlier CARES Act debt. On a formal level, the statutory text – "any outstanding debt of the Postal Service," without further qualification

---

7 That much is evident from Congress’s decision not to adopt the House’s proposal to cancel all Title 39 debt outstanding on the date of enactment. See H.R. 6379, 116th Cong. § 140001(a)(1). The House bill would then have authorized the Postal Service to borrow $15 billion from Treasury. H.R. 6379, 116th Cong. § 140001(a)(2). In light of the bill’s resetting of outstanding debt to zero, it is unclear whether this additional borrowing authority would have been coextensive with or additional to the $15 billion debt ceiling in 39 U.S.C. § 2005(a).
would plainly include CARES Act debt. Therefore, it arguably would be most prudent for the Postal Service to not use these borrowed funds in such a manner. However, on a functional level, we could argue that precluding the use of these funds to pay outstanding CARES Act debt would make little sense. So long as all relevant borrowing meets the CARES Act criteria, using new borrowing to repay old debt merely consolidates (a) the use of cash to repay an old loan and (b) attainment of new cash by acquiring a new loan. If emergency circumstances remain such that repayment of the old loan would deprive the Postal Service of cash needed to fund operating expenses, then we would immediately qualify for a new loan under the CARES Act. Neither activity would be inconsistent with the CARES Act’s purposes on its own, and so there is no apparent reason why they should be precluded in combination. Therefore, despite the facial breadth of “any outstanding debt,” it would be reasonable to construe the preclusion as limited to borrowing under Title 39, not under the CARES Act.

In sum, it is reasonable to construe the CARES Act as prohibiting borrowed funds from being used for either capital expenses or the payment of any principal, interest, or fees arising from obligations issued under Title 39. As noted earlier, however, the CARES Act gives Treasury the discretion to refuse to lend, or to limit its lending, to the Postal Service if it disagrees with the Postal Service’s interpretation of the law. It would be advisable to seek a common understanding with Treasury about these legal questions, to the extent possible.

Finally, the statute does not explicitly specify any accountability for the use of borrowed funds. It is unclear at this time whether current Treasury leadership (or Congress) will insist on such an accounting.\(^8\)

**CONCLUSION**

On its face, the statute imposes conditions on borrowing but gives the Postal Service discretion to determine when and to what extent additional borrowing is needed. But given Treasury’s discretion and the requirement to attain Treasury’s agreement on borrowing terms, Treasury could simply refuse to lend if it disagrees with the Postal Service’s interpretation, desires accountability for the use of funds, or insists on terms of its choosing (regardless of their legality or acceptability to the Postal Service). The only checks on Treasury are Congressional oversight and potential OLC resolution of a legal dispute.

Please let me know if you have any questions or concerns. Of course, the situation regarding our financial situation is very fluid, so if conditions change in a way that warrants

\(^8\) According to the Corporate Treasury office, Treasury historically did not insist on a rigid accounting of the Postal Service’s use of pre-PAEA borrowing authority, and the Postal Service thus had a fairly free hand to characterize the use of borrowed funds vis-à-vis the statute’s distinct annual caps. However, Treasury might require clearer requirements in this circumstance.
material revision of the analysis in this memorandum, we will reexamine our analysis and advise you accordingly.

GOVERNORS

SUBJECT: Additional Borrowing Authority Under the CARES Act

This memorandum examines the parameters for $10 billion in additional borrowing authority that Congress recently made available to the Postal Service in response to the ongoing Coronavirus Disease 2019 ("COVID-19") outbreak.

EXECUTIVE SUMMARY

- The new borrowing authority can be accessed only if the Postal Service determines that additional liquidity is necessary to fund operating expenses due to the COVID-19 emergency. Various aspects of this threshold requirement are subject to interpretation: "operating expenses," "due to," the degree of necessity, and the timing of the financial need. Because the statute charges the Postal Service with determining necessity, we arguably have primary discretion to interpret and apply this aspect of the statute. In this regard, we have a clear basis to determine, based on our current forecasts concerning the impact of the COVID-19 outbreak on Postal Service volumes, revenues, and liquidity, that receiving this additional $10 billion in full is consistent with the language of the statute; we are therefore legally authorized to request the full amount at any time. Nevertheless, the consent role of the Treasury Department ("Treasury") means that it could seek to hold up borrowing if it disagrees with the Postal Service's interpretation, or if it questions the assumptions that the Postal Service is using to make our determination.

- Treasury must agree to the terms and conditions of borrowing. In light of recent experience, Treasury could attempt to condition its assent on conditions that enhance its oversight over Postal Service business decisions, and that even intrude upon the Board's and the Governors' discretion to lead the Postal Service. We think such an outcome is unlikely, for the reasons noted below, but as we have previously advised, such conditions would violate constitutional and statutory parameters. In this case we believe that the circumstances and scrutiny from Members of Congress and others could lead Treasury to take a more flexible approach, and our preliminary indications are that Treasury will not insist upon consent rights.
Borrowing is limited to $10 billion. This limitation applies at all times; it cannot be temporarily exceeded so long as outstanding debt is returned to $10 billion later. Although we could attempt to access the borrowing authority repeatedly so long as we remain within the $10 billion limit, and Treasury could agree with that approach, the statutory language could also give Treasury (and other decision-makers) a reasonable basis to view the borrowing authority as being available only once.

Under a reasonable interpretation of the statutory language, funds borrowed under the CARES Act cannot be used for capital expenses or to pay principal, interest, or fees on obligations issued under Title 39. Although there is no specific accounting or reporting requirement, Treasury or Congressional stakeholders could insist that the Postal Service demonstrate its compliance with the requirement that borrowed funds be used only for operating expenses.

ANALYSIS

On March 27, 2020, Congress enacted the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act"), Pub. L. No. 116-136. Section 6001(b) of the CARES Act permits the Postal Service to borrow up to $10 billion from the Department of the Treasury, separately from the $15 billion of borrowing authority already available to the Postal Service under 39 U.S.C. § 2005. This additional borrowing authority is subject to a number of conditions, however, the precise import of which are not immediately clear from the statutory text.

Section 6001(b) provides as follows:

(b) Additional borrowing authority.—Notwithstanding section 2005 of title 39, United States Code, or any other provision of law, if the Postal Service determines that, due to the COVID-19 emergency, the Postal Service will not be able to fund operating expenses without borrowing money—

(1) the Postal Service may borrow money from the Treasury in an amount not to exceed $10,000,000,000—

(A) to be used for such operating expenses; and

(B) which may not be used to pay any outstanding debt of the Postal Service; and

Because the legislation was negotiated largely behind the scenes by Congressional leaders and the Secretary of the Treasury, there are no committee reports or other normal incidents of legislative history to serve as an interpretive aid. The few floor statements by individual Members of Congress that discuss the Postal Service provisions do so only in general terms, and therefore are of no probative value.
(2) the Secretary of the Treasury may lend up to the amount described in paragraph (1) at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

This provision plainly establishes at least four principal conditions: two prior to borrowing, one concerning the amount of borrowing, and one on the use of borrowed funds. The Postal Service must first determine that it needs to borrow money in order to fund operating expenses due to the COVID-19 emergency. And it must reach mutual agreement with Treasury over the terms and conditions of borrowing. The borrowing is limited to “an amount not to exceed” $10 billion. The borrowed moneys must be used only for “operating expenses,” which cannot include “pay[ing] any outstanding debt.” Each condition raises various questions of interpretation.

I. Postal Service Determination of Necessity to Fund Operating Expenses

Under the opening paragraph of Section 6001(b), prior to borrowing any funds, the Postal Service must first determine “that, due to the COVID-19 emergency, the Postal Service will not be able to fund operating expenses without borrowing money.” At least six aspects of this proviso are noteworthy.

First, the term “operating expenses” is not defined, but given the term’s usage in a related context, “operating expenses” should be construed as distinct from “capital expenses.” Specifically, the term “operating expenses” is used in the Postal Service’s longstanding borrowing statute. Currently, that provision caps the net increase in borrowing “for the purpose of capital improvements and . . . for the purpose of defraying operating expenses” at $3 billion per fiscal year. 39 U.S.C. § 2005(a). Prior to the enactment of the Postal Accountability and Enhancement Act of 2006 (PAEA), the same sentence set separate annual caps on borrowing used for capital expenses and for operating expenses ($2 billion and $1 billion, respectively). See 39 U.S.C. § 2005(a) (2005). Because Section 6001(b) of the CARES Act relates to the same subject matter as 39 U.S.C. § 2005(a) – a fact recognized by the express citation of the Title 39 provision in CARES Act Section 6001’s “notwithstanding” clause – it is reasonable to construe the two provisions in pari materia: that is, consonant with one another due to their related subject matter. See, e.g., Pasquantino v. United States, 544 U.S. 349, 355 n.2 (2005) (noting that wire- and mail-fraud statutes have been construed in pari materia); Nat’l Fed’n of Fed. Employees, Local 1309 v. Dep’t of Interior, 526 U.S. 86, 105 (1999); 2B Sutherland Statutes & Statutory Construction §§ 51:1-51:2, 53:2 (7th ed. 2020).

Under pre-PAEA 39 U.S.C. § 2005(a), the term “operating expenses” was understood by the Postal Service to mean all expenses other than capital expenses. “Operating expenses” therefore included not only expenses intuitively viewed as related to operations
(e.g., salaries and supplier costs), but also post-retirement benefits expenses and even interest expense on borrowed funds.²

Second, the borrowing of funds is conditioned on the Postal Service "not be[jing] able to fund operating expenses without borrowing money." This implies that the additional borrowing authority is a true necessity: that is, the Postal Service must borrow money to continue funding its operating expenses, because the other available means of doing so will come up short. That said, access to the borrowing authority can precede an actual inability to fund operating expenses, as the relevant language is phrased in the future tense ("will not be able to fund").

Third, "due to" is not defined. The plain meaning of this phrase is "because of": there must be a causal relationship between the inability to fund operating expenses and the COVID-19 emergency. See U.S. Postal Serv. v. Postal Regulatory Comm'n, 640 F.3d 1263, 1267 (D.C. Cir. 2011) (construing "due to" in the statute authorizing exigent price increases). What is less clear is how close the causal nexus must be (and hence the level of proof that must be provided to substantiate that causal nexus). On that question, courts have recognized that the phrase 'due to' is ambiguous. . . . The causal nexus of ‘due to’ has been given a broad variety of meanings in the law ranging from sole and proximate cause at one end of the spectrum to contributing cause at the other." Id. at 1268 (quoting Kimber v. Thiokol Corp., 196 F.3d 1092, 1100 (10th Cir. 1999)) (brackets, internal quotation marks, and further citation omitted). Thus, it would certainly be possible to read Section 6001(b) as authorizing borrowing to the sole extent that financial strains can be specifically attributed to the COVID-19 emergency and that those strains overrun all other sources of funding. Cf. id. at 1267-68 (describing the Postal Regulatory Commission's (Commission's) initially strict application of "due to" in the exigency statute). But "due to"

  can mean 'due in part to' as well as 'due only to.' A financial crisis can often result from multiple contributing factors.] It would not be incorrect to say that [a need for relief] is 'due to' [one] factor simply because it is also 'due to' other factors as well.

² We are aware of at least two alternative uses of "operating expenses" in relation to the Postal Service. First, in the Postal Service's periodic financial reports, "operating expenses" encompass all expenses (including depreciation on capital investments) other than interest expense. E.g., U.S. Postal Serv., FY2019 Form 10-K, at 24-39. Second, under the pre-PAEA provision that governed the Governors' ratemaking authority, rates were required to cover "total estimated costs," the definition of which, in turn, distinguished operating expenses from depreciation on capital investments, interest and other debt-related expense, and an amount for contingencies. 39 U.S.C. § 3621 (2005). Although an argument could be made for applying a different reading, the permanent borrowing statute (39 U.S.C. § 2005(a)) is clearly more directly relevant to the CARES Act's borrowing provision than either periodic financial reporting or ratemaking.
Id. at 1268 (emphasis in original). Hence, in the Section 6001(b) context, it could be enough for the Postal Service to face an inability to fund operating expenses because of the COVID-19 emergency as well as other factors.\(^3\)

Fourth, the inability to fund operating expenses must be "due to the COVID-19 emergency." The "COVID-19 emergency" is expressly defined in relation to the President’s declaration of a national emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. CARES Act § 6001(a)(1). Once the President has rescinded that emergency declaration, then the predicate condition for borrowing could be curtailed. More precisely, to access the CARES Act borrowing authority thereafter, the Postal Service would need to determine that the inability to fund operating expenses remains "due to" emergency conditions prior to rescission.

The Postal Service can certainly argue that, to the extent that mail volumes remain lower and/or costs remain higher at a given point in time than they would have been had the pandemic not occurred, such continuing effects are "due to" the pandemic, even if the emergency declaration has been rescinded. This would justify continued funding under this provision if these continuing effects mean that the Postal Service cannot fund operating expenses without borrowing. That said, assuming that Treasury cooperates in lending money during the COVID-19 emergency, it could decide to stop doing so earlier than the Postal Service believes to be warranted, if Treasury decides that the Postal Service's inability to fund operating expenses is no longer "due to" the emergency. Such a prospect would resemble the Commission’s decision to truncate the amount of Great-Recession-era losses that the Postal Service was able to recover through an above-inflation rate increase. There, the Commission relied on the "due to" language in the exigency statute discussed above to establish a cut-off point, after which it would no longer deem continuing mail-volume losses to be "due to" the Great Recession. The Commission based this cut-off point on a determination of when the Postal Service theoretically entered a "new normal," based on macroeconomic indicators and when the Postal Service began to gain an "ability to adjust" its operations at the depth of the recession's impact. See Order No. 1926, Order

---

\(^3\) In USPS v. PRC, the court remanded the case to the Commission to interpret "due to" in the exigency statute. The Commission subsequently adopted a view close to the stricter end of the interpretive spectrum by requiring the Postal Service to quantify financial impacts attributable to the exigent circumstance (in that case, the Great Recession) rather than to other causes, although it granted that the quantification need not be absolutely precise. See generally Order No. 864, Order Resolving Issues on Remand, PRC Docket No. R2010-4R (Sept. 20, 2011). Key factors in the Commission’s reasoning were the Postal Service’s econometric resources, the scale of relief that it could seek (into the billions of dollars), and the fact that the exigency provision "is not intended as a remedial provision, but rather as a narrow exception to the price cap." Id. at 44. In the context of borrowing under the CARES Act, the Postal Service’s resources and the scale of relief are comparable to what the Commission considered, and the additional borrowing authority could arguably (albeit not necessarily) be seen as a narrow exception to the Postal Service’s normal borrowing authority. That said, critical differences between the two contexts militate against applying the Commission’s logic here: the CARES Act’s "due to" language is to be applied by the Postal Service itself, not by an external oversight body, and borrowing money that must be repaid (with interest) – unlike a price increase – does not permanently affect any other party’s property interest.
Granting Exigent Price Increase, PRC Docket No. R2013-11 (Dec. 24, 2013), at 83-94. Even if the Postal Service might assert that COVID-19 impacts persist beyond the emergency declaration’s rescission, Treasury, taking a page from the Commission’s book, could nonetheless point not only to the emergency’s formal end, but also impute (however unrealistically) to the Postal Service an “ability to adjust” that renders its inability to fund operating expenses no longer “due to” the emergency.

Fifth, another interpretative ambiguity in the statute is the relationship between the necessity determination and the actual amount of borrowing that the Postal Service may request. In particular, the statute requires that the Postal Service determine that we could not fund operating expenses due to the pandemic “without borrowing money,” but does not directly limit the size of the resulting request in any way other than by imposing a $10 billion cap. In this regard, the Postal Service could argue that so long as we demonstrate a need to borrow money, we can borrow the full $10 billion under the statute, and need not justify the precise amount requested within that overall cap. On the other hand, Treasury could argue that while the $10 billion is an overall cap, the statute also is most reasonably read to limit the size of a request to only what is strictly necessary to ensure that operating expenses are funded.

Sixth, all of this analysis is to be conducted as part of a determination by the Postal Service, but the scope of our actual discretion is unspecified. Section 6001(b)(2) provides that Treasury “may” – not “must” – lend money requested by the Postal Service. Cf. 39 U.S.C. § 2006(b) (authorizing the Postal Service to “require the Secretary of the Treasury to purchase” up to $2 billion in Postal Service obligations). Treasury could point to this discretionary language as allowing it to refuse to lend money on the basis that it disagrees with the Postal Service’s determination of need. As further support, Treasury could contrast the CARES Act language with an earlier House version of the bill, which would have required Treasury to lend moneys requested by the Postal Service. H.R. 6379, 116th Cong. § 140001(a)(2) (2020) (“[T]he Secretary of the Treasury shall lend up to such amount at the request of the Postal Service.”). This mandatory language was abandoned in favor of the discretionary language in the final bill. Given the intense negotiations between Congressional leaders and Treasury that produced the final CARES Act, as well as the attention that the Administration reportedly gave to the postal provisions, this result is almost surely meaningful, rather than accidental. In the end, even if the Postal Service is correct that we have discretion regarding the necessity determination as a legal matter, as a practical matter the Treasury could still refuse to provide the money for other reasons.

---

4 The Postal Service challenged this cut-off as arbitrary, as macroeconomic indicators did not necessarily correspond to mail-volume trends, and as it made little sense to cut off recovery at the depth of the losses, when the Postal Service had merely begun to adjust but had not yet adequately adjusted. These challenges were unsuccessful. See Alliance for Nonprofit Mailers v. Postal Regulatory Comm’n, 790 F.3d 186, 196 & n.3 (D.C. Cir. 2015); Order No. 2623, Order Resolving Issues on Remand, PRC Docket No. R2013-11R (July 29, 2015) (denying reconsideration), at 15-28, aff’d, U.S. Postal Serv. v. Postal Regulatory Comm’n, 841 F.3d 508 (D.C. Cir. 2016).
In the event that Treasury attempts to second-guess the Postal Service’s determination of need, the Postal Service could point to Congress’s express conferral on the Postal Service of discretion to determine need; if Congress had intended to subject that determination to Treasury’s oversight, it easily could have so provided. Given our recent experience with disagreements over statutory construction, it is possible that we would be unable to persuade Treasury of our interpretation, and resolution of any interagency dispute might ultimately lie with the Office of Legal Counsel (OLC) at the Department of Justice. To minimize the risk of a time-consuming and uncertain dispute, the Postal Service would be well-advised to seek a common understanding with Treasury concerning this aspect of the statute.

While these interpretative issues present room for potential dispute with Treasury, the Postal Service does have a very strong argument that borrowing the full amount of the $10 billion is clearly necessary under the terms of the statute at this time. In this regard, our projections show that the Postal Service will experience a cash shortfall, and hence an inability to fund operating expenses, this calendar year unless the $10 billion is borrowed, and that we will need the full $10 billion to continue operations for as long as possible next fiscal year. This circumstance is a direct result of the precipitous declines in mail volumes that we forecast for Quarter 3 of FY2020, which would not have occurred but for the onset of the pandemic. Therefore, the Postal Service is legally authorized under the statute to request the full $10 billion at this time. While the above-mentioned interpretive issues may complicate our ability to utilize this funding source, we think that such issues are more likely to arise as time passes than they would if we seek these funds now, when the longer-term effects of the pandemic are unclear.

II. Treasury Agreement to Conditions

Under Section 6001(b)(2), any borrowing must be “upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.” As you know, in adopting this language, Congress declined our proposed alternative, which would have allowed for negotiation against a backdrop of default terms from the now-expired note purchase agreement. Without such a backdrop, Treasury could seek to reject our proposed terms and to propose terms that we would view as unlawful, inappropriate, or otherwise undesirable. (Indeed, Treasury’s insistence on such terms is what led to the expiration, rather than the renewal, of the note purchase agreement last year.)

Treasury might argue that, regardless of any disagreement concerning the appropriate terms and conditions of borrowing under Title 39, it has freer rein to propose such conditions under the CARES Act. As OLC has recognized, the legislative history of the

---

5 The projections show the potential for a cash shortfall by October. However, as noted above, the statute arguably requires capital expenses to be excluded from the determination of necessity. The Postal Service’s projection assumes capital expenses of $2.0 billion over the rest of this fiscal year, and $2.5 billion for next fiscal year. If these capital expenses are excluded, the Postal Service would still likely experience a cash shortfall this calendar year, or early next calendar year.
Title 39 borrowing provision, as well as legislation establishing the Federal Financing Bank enacted shortly thereafter, is replete with Treasury's disavowals of any intent to interfere with the Postal Service's operational and business decisions. See Scope of Treasury Department Purchase Rights with Respect to Financing Initiatives of the U.S. Postal Service, 19 Op. Off. Legal Counsel 238, 245 n.5 (1995); Authority of the Secretary of the Treasury Regarding Postal Service Bond Offering, 17 Op. Off. Legal Counsel 6, 8-10 (1993). By contrast, the CARES Act contains no such legislative history, and its additional borrowing authority is expressly distinguished from, rather than subordinate to, the Title 39 borrowing provision. If anything, the contrast between the final CARES Act and the House bill demonstrates that the "mutual agreement" requirement was intentionally added. See H.R. 6379, 116th Cong. § 140001(a)(2) (containing no language about terms and conditions).

That said, any attempt by Treasury to use even this borrowing authority to oversee or second-guess the Governors' and Board's decisions would still vitiate Congress's intent in creating the Postal Service to be insulated from direct political control, and hence would violate constitutional and statutory parameters in the same manner as its prior attempt to impose such terms on our Title 39 borrowing. In this regard, the absence of any direct legislative history is simply not a material legal consideration. Let me know if you would like me to send to you our prior memorandum to the Board explaining these constitutional and statutory issues.

Our experience with non-renewal of the note purchase agreement shows that Treasury may not be swayed by the legal bona fides of our position and may insist on inappropriate terms regardless. In such an event, we may be able to seek a legal opinion from OLC supporting our view. Alternatively, Congress clearly expected that Treasury would facilitate borrowing under Section 6001(b), and any significant delay or lack of cooperation by Treasury could become a subject of Congressional inquiry and oversight. As noted above, at present Treasury has advised us that it does not intend to seek to impose "consent" rights.

III. Amount of Borrowing

Section 6001(b)(1) provides that the borrowing shall be "in an amount not to exceed" $10 billion. In contrast to the Title 39 borrowing provisions, this language does not specify whether the $10 billion limit applies to the amount of CARES Act borrowing "outstanding at any one time" or only as of a certain point in time (e.g., the end of a fiscal year), such that greater amounts can be borrowed so long as the outstanding amount is reduced by the cut-off time. See 39 U.S.C. § 2005(a)(1) (containing both types of cap). Without further qualification, however, a plain reading of "not to exceed" indicates that the $10 billion limit applies at all times; the limit cannot be exceeded temporarily so long as it is met later.

A related question concerns whether the $10 billion is a cap similar to the $15 billion cap on Title 39 borrowing, meaning that the Postal Service may access the borrowing authority multiple times (with aggregate borrowing at any one time remaining within the limit), or
whether the statute only authorizes the provision of $10 billion in total. If the latter is true, another question is whether this borrowing authority can only be accessed in a one-time loan, or if multiple loans are allowed.

Based on existing practice and the uncertain duration of the current emergency, the Postal Service could reasonably take the view that it can repeatedly borrow money within the $10 billion limit. It is possible, however, that Treasury (or OLC, in the event of a dispute) could interpret the CARES Act as providing for a provision of $10 billion in total. A contrast with the Title 39 provision shows that Congress had a template for making the limit apply to an aggregate amount of borrowing “outstanding at any time,” id., which was not used in the CARES Act. This, coupled with the plain meaning of the CARES Act language, arguably indicates that Congress did not intend for the CARES Act borrowing limit to operate in the same manner as the $15 billion borrowing cap. It is also conceivable that Treasury could assert that the statute only authorizes a single loan, based on the fact that the statute refers to a singular “amount” of borrowing, and not a multiple “amount of obligations,” as in Section 2005, though this argument would be weaker.

Ultimately, this question only becomes relevant if we attempt to access the CARES Act borrowing authority a second time. Because of the possibility that we could be denied a second round of borrowing, it would be advisable to seek to borrow the maximum amount available ($10 billion) at the outset, which is advisable in any event given all of the interpretative issues concerning the “due to” language. In addition, it might also be advisable to seek to secure as long of a maturity as is feasible.

IV. Restrictions on the Use of Borrowed Funds

Section 6001(b)(1)(A) and (B) provide that borrowed funds can only be used to fund operating expenses and cannot be used to pay outstanding debt.

As discussed in section I above, it would be consistent with the history of the Postal Service's permanent borrowing statute to construe the reference to “operating expenses” as excluding capital expenses.

In addition, we think it evident that “debt” means liabilities from borrowing. See 39 U.S.C. § 2001(3) (referring to “debt instruments” in the context of the Title 39 borrowing provisions). However, the limitation on using these additional funds to “pay any outstanding debt” is ambiguous in several respects.

---

6 One definition of “debt” refers broadly to any “liability” or “specific sum of money due by agreement or otherwise,” such as payments to a supplier or employee for services rendered. See BLACK'S LAW DICTIONARY, “debt” (11th ed. 2019). However, as noted above, it is appropriate to read the terms of the CARES Act consistently with the terms of Title 39’s borrowing provisions. In addition, it is functionally implausible to believe that Congress intended “debt” to refer to the Postal Service’s liabilities generally, since that would mean that the funds borrowed under the CARES Act could be used only to provide liquidity for future operating expenses, and not for expenses already incurred (and thus “outstanding”).
First, it is unclear whether "outstanding debt" includes all payments on borrowed debt, or only payments on principal. On the one hand, to "pay [down] debt" might generally connote payment that has the effect of reducing or eliminating the principal owed. Perhaps for this reason, the Postal Service reports interest expense as a distinct line item in its periodic financial reports. On the other hand, a debt has not been repaid if accrued interest or prepayment fees remain outstanding. Indeed, the statutory language here does not distinguish between principal and other debt, and contextual definitions are broad enough to encompass any amounts (including interest and fees) that are owed under a loan agreement. See 39 U.S.C. § 2001(3); BLACK’S LAW DICTIONARY, "debt." In our view, the more reasonable construction is that "outstanding debt" includes principal, interest, and any fees arising under a loan agreement.

Second, it is unclear whether "outstanding debt" refers to debt outstanding when the newly borrowed moneys are spent, or only to debt outstanding at the time of enactment. The former reading is more plausible. Other CARES Act provisions, as well as the Title 39 borrowing provisions, use "outstanding" in ways that appear clearly to connote "outstanding at the time of the relevant event," and in no case "outstanding at the time of enactment." See CARES Act, Pub. L. No. 116-136, § 4003(c)(1)(A) (requiring rates for certain Treasury loans to be based on "the current average yield on outstanding marketable obligations of the United States of comparable maturity"); 39 U.S.C. § 2006(a) (same).

On a functional level, Congress placed specific conditions on borrowing under the CARES Act that do not apply to borrowing under Title 39, and so a broader reading of CARES Act’s "outstanding debt" preclusion makes sense as an anti-circumvention measure. Otherwise, the Postal Service could borrow under the CARES Act (while eligible) to pay down Title 39 loans, with the newly liberated Title 39 borrowing authority remaining available even after the COVID-19 emergency had ended. To the extent that Congress was seeking to foreclose that possibility, as the language of the statute indicates that it was, the concern applies equally whether moneys are borrowed under Title 39 before or after the date of enactment.

Third, it is unclear whether "any outstanding debt" means only debt acquired under other authorities (i.e., the Title 39 borrowing provisions), or whether it also precludes using CARES Act borrowing to retire and renew earlier CARES Act debt. Under either reading, the CARES Act would preclude borrowing to repay funds borrowed under Title 39. That much would be consistent with Congress’s apparent concern that the CARES Act borrowing authority remain distinct from Title 39 borrowing.\(^7\) The additional question is whether the preclusion extends to repayment of earlier CARES Act debt. On a formal level, the statutory text -- "any outstanding debt of the Postal Service," without further qualification

\(^7\) That much is evident from Congress’s decision not to adopt the House’s proposal to cancel all Title 39 debt outstanding on the date of enactment. See H.R. 6379, 116th Cong. § 140001(a)(1). The House bill would then have authorized the Postal Service to borrow $15 billion from Treasury. H.R. 6379, 116th Cong. § 140001(a)(2). In light of the bill’s resetting of outstanding debt to zero, it is unclear whether this additional borrowing authority would have been coextensive with or additional to the $15 billion debt ceiling in 39 U.S.C. § 2005(a).
would plainly include CARES Act debt. Therefore, it arguably would be most prudent for the Postal Service to not use these borrowed funds in such a manner. However, on a functional level, we could argue that precluding the use of these funds to pay outstanding CARES Act debt would make little sense. So long as all relevant borrowing meets the CARES Act criteria, using new borrowing to repay old debt merely consolidates (a) the use of cash to repay an old loan and (b) attainment of new cash by acquiring a new loan. If emergency circumstances remain such that repayment of the old loan would deprive the Postal Service of cash needed to fund operating expenses, then we would immediately qualify for a new loan under the CARES Act. Neither activity would be inconsistent with the CARES Act's purposes on its own, and so there is no apparent reason why they should be precluded in combination. Therefore, despite the facial breadth of "any outstanding debt," it would be reasonable to construe the preclusion as limited to borrowing under Title 39, not under the CARES Act.

In sum, it is reasonable to construe the CARES Act as prohibiting borrowed funds from being used for either capital expenses or the payment of any principal, interest, or fees arising from obligations issued under Title 39. As noted earlier, however, the CARES Act gives Treasury the discretion to refuse to lend, or to limit its lending, to the Postal Service if it disagrees with the Postal Service's interpretation of the law. It would be advisable to seek a common understanding with Treasury about these legal questions, to the extent possible.

Finally, the statute does not explicitly specify any accountability for the use of borrowed funds. It is unclear at this time whether current Treasury leadership (or Congress) will insist on such an accounting.\footnote{According to the Corporate Treasury office, Treasury historically did not insist on a rigid accounting of the Postal Service's use of pre-PAEA borrowing authority, and the Postal Service thus had a fairly free hand to characterize the use of borrowed funds vis-à-vis the statute's distinct annual caps. However, Treasury might require clearer requirements in this circumstance.}

**CONCLUSION**

On its face, the statute imposes conditions on borrowing but gives the Postal Service discretion to determine when and to what extent additional borrowing is needed. But given Treasury's discretion and the requirement to attain Treasury's agreement on borrowing terms, Treasury could simply refuse to lend if it disagrees with the Postal Service's interpretation, desires accountability for the use of funds, or insists on terms of its choosing (regardless of their legality or acceptability to the Postal Service). The only checks on Treasury are Congressional oversight and potential OLC resolution of a legal dispute.

Please let me know if you have any questions or concerns. Of course, the situation regarding our financial situation is very fluid, so if conditions change in a way that warrants
material revision of the analysis in this memorandum, we will reexamine our analysis and advise you accordingly.

PRIVILEGED AND CONFIDENTIAL
ATTORNEY-CLIENT COMMUNICATION

GOVERNORS

SUBJECT: Additional Borrowing Authority Under the CARES Act

This memorandum examines the parameters for $10 billion in additional borrowing authority that Congress recently made available to the Postal Service in response to the ongoing Coronavirus Disease 2019 ("COVID-19") outbreak.

EXECUTIVE SUMMARY

- The new borrowing authority can be accessed only if the Postal Service determines that additional liquidity is necessary to fund operating expenses due to the COVID-19 emergency. Various aspects of this threshold requirement are subject to interpretation: "operating expenses," "due to," the degree of necessity, and the timing of the financial need. Because the statute charges the Postal Service with determining necessity, we arguably have primary discretion to interpret and apply this aspect of the statute. In this regard, we have a clear basis to determine, based on our current forecasts concerning the impact of the COVID-19 outbreak on Postal Service volumes, revenues, and liquidity, that receiving this additional $10 billion in full is consistent with the language of the statute; we are therefore legally authorized to request the full amount at any time. Nevertheless, the consent role of the Treasury Department ("Treasury") means that it could seek to hold up borrowing if it disagrees with the Postal Service's interpretation, or if it questions the assumptions that the Postal Service is using to make our determination.

- Treasury must agree to the terms and conditions of borrowing. In light of recent experience, Treasury could attempt to condition its assent on conditions that enhance its oversight over Postal Service business decisions, and that even intrude upon the Board's and the Governors' discretion to lead the Postal Service. We think such an outcome is unlikely, for the reasons noted below, but as we have previously advised, such conditions would violate constitutional and statutory parameters. In this case we believe that the circumstances and scrutiny from Members of Congress and others could lead Treasury to take a more flexible approach, and our preliminary indications are that Treasury will not insist upon consent rights.

USPS-20-1215-A-003250
- Borrowing is limited to $10 billion. This limitation applies at all times; it cannot be temporarily exceeded so long as outstanding debt is returned to $10 billion later. Although we could attempt to access the borrowing authority repeatedly so long as we remain within the $10 billion limit, and Treasury could agree with that approach, the statutory language could also give Treasury (and other decision-makers) a reasonable basis to view the borrowing authority as being available only once.

- Under a reasonable interpretation of the statutory language, funds borrowed under the CARES Act cannot be used for capital expenses or to pay principal, interest, or fees on obligations issued under Title 39. Although there is no specific accounting or reporting requirement, Treasury or Congressional stakeholders could insist that the Postal Service demonstrate its compliance with the requirement that borrowed funds be used only for operating expenses.

**ANALYSIS**

On March 27, 2020, Congress enacted the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act"), Pub. L. No. 116-136. Section 6001(b) of the CARES Act permits the Postal Service to borrow up to $10 billion from the Department of the Treasury, separately from the $15 billion of borrowing authority already available to the Postal Service under 39 U.S.C. § 2005. This additional borrowing authority is subject to a number of conditions, however, the precise import of which are not immediately clear from the statutory text.¹

Section 6001(b) provides as follows:

(b) Additional borrowing authority.—Notwithstanding section 2005 of title 39, United States Code, or any other provision of law, if the Postal Service determines that, due to the COVID-19 emergency, the Postal Service will not be able to fund operating expenses without borrowing money—

(1) the Postal Service may borrow money from the Treasury in an amount not to exceed $10,000,000,000—

(A) to be used for such operating expenses; and

(B) which may not be used to pay any outstanding debt of the Postal Service; and

---

¹ Because the legislation was negotiated largely behind the scenes by Congressional leaders and the Secretary of the Treasury, there are no committee reports or other normal incidents of legislative history to serve as an interpretive aid. The few floor statements by individual Members of Congress that discuss the Postal Service provisions do so only in general terms, and therefore are of no probative value.
(2) the Secretary of the Treasury may lend up to the amount described in paragraph (1) at the request of the Postal Service, upon terms and conditions mutually agreed upon by the Secretary and the Postal Service.

This provision plainly establishes at least four principal conditions: two prior to borrowing, one concerning the amount of borrowing, and one on the use of borrowed funds. The Postal Service must first determine that it needs to borrow money in order to fund operating expenses due to the COVID-19 emergency. And it must reach mutual agreement with Treasury over the terms and conditions of borrowing. The borrowing is limited to "an amount not to exceed" $10 billion. The borrowed moneys must be used only for "operating expenses," which cannot include "pay[ing] any outstanding debt." Each condition raises various questions of interpretation.

I. Postal Service Determination of Necessity to Fund Operating Expenses

Under the opening paragraph of Section 6001(b), prior to borrowing any funds, the Postal Service must first determine "that, due to the COVID-19 emergency, the Postal Service will not be able to fund operating expenses without borrowing money." At least six aspects of this proviso are noteworthy.

First, the term "operating expenses" is not defined, but given the term's usage in a related context, "operating expenses" should be construed as distinct from "capital expenses." Specifically, the term "operating expenses" is used in the Postal Service's longstanding borrowing statute. Currently, that provision caps the net increase in borrowing "for the purpose of capital improvements and . . . for the purpose of defraying operating expenses" at $3 billion per fiscal year. 39 U.S.C. § 2005(a). Prior to the enactment of the Postal Accountability and Enhancement Act of 2006 (PAEA), the same sentence set separate annual caps on borrowing used for capital expenses and for operating expenses ($2 billion and $1 billion, respectively). See 39 U.S.C. § 2005(a) (2005). Because Section 6001(b) of the CARES Act relates to the same subject matter as 39 U.S.C. § 2005(a) – a fact recognized by the express citation of the Title 39 provision in CARES Act Section 6001's "notwithstanding" clause – it is reasonable to construe the two provisions in pari materia: that is, consonant with one another due to their related subject matter. See, e.g., Pasquantino v. United States, 544 U.S. 349, 355 n.2 (2005) (noting that wire- and mail-fraud statutes have been construed in pari materia); Nat'l Fed'n of Fed. Employees, Local 1309 v. Dept' of Interior, 526 U.S. 86, 105 (1999); 2B Sutherland Statutes & Statutory Construction §§ 51:1-51:2, 53:2 (7th ed. 2020).

Under pre-PAEA 39 U.S.C. § 2005(a), the term "operating expenses" was understood by the Postal Service to mean all expenses other than capital expenses. "Operating expenses" therefore included not only expenses intuitively viewed as related to operations.
(e.g., salaries and supplier costs), but also post-retirement benefits expenses and even interest expense on borrowed funds.2

Second, the borrowing of funds is conditioned on the Postal Service "not be[jing] able to fund operating expenses without borrowing money." This implies that the additional borrowing authority is a true necessity: that is, the Postal Service must borrow money to continue funding its operating expenses, because the other available means of doing so will come up short. That said, access to the borrowing authority can precede an actual inability to fund operating expenses, as the relevant language is phrased in the future tense ("will not be able to fund").
