AceSpy Computer Monitoring Software for Windows

Overview Features Advantages FAQs Purchase

AceSpy Monitoring Software Overview

AceSpy makes it easy to silently see what others do online. After you install, AceSpy begins SILENTLY recording EVERYTHING that is done on your computer! This easy tool also gives you the power to block activities you choose, such as web sites or programs.

This premium monitoring software will immediately forward all of their emails and chats directly to your personal email address. So when your child gets an email, it will be instantly sent to YOUR address as well. If they reply to that person you'll receive an EXACT COPY of that too.

Here's an overview of AceSpy's main features. Click a feature for more information.

**Email Recording and Forwarding**
View all sent and received emails and have them forwarded to your email.

**Keystrokes Typed**
Every keystroke typed on the computer will be recorded including passwords.

**Chat Recording and Forwarding**
Read complete chat transcripts and have them forwarded to your email.

**Social Media Activity**
Monitor all Internet social media activity, such as MySpace, Facebook, etc.

**Automatic Screenshots**
View captured screenshots of the actual desktop in full size.

**Filtering and Blocking**
Set up user filters and block websites and programs from being accessed.

**Websites Visited**
See every website that was visited through the computer's web browsers.

Software Description

While remaining completely hidden from others, AceSpy silently captures activities like a surveillance camera. Screenshots (pictures of the entire screen) can be captured at any interval you select and viewed separately or through the slide show viewer. Unlike others, you can view activity in full screen mode like a movie.

I have two teenage daughters that are still virgins. I'd really love to keep them that way.
This easy to use software also silently records text logs of emails, chat conversations, web sites visited in any browser, keystrokes typed including passwords inside any window, items sent to clipboard, files printed and more! AceSpy can even record your webcam and microphone!

Check out what this actual customer had to say...
"I have been very happy with the product. Its great and lets me protect my children, and I really dont want to be without it." - Diana Sanderson - New York, USA

All recorded activity can be secretly viewed on your computer by bringing up the AceSpy interface OR you can setup AceSpy to send only the activity reports you need via email! This allows you to monitor your PC from anywhere you can check your email.

Along with recording, you can also block what they do online. Enter a list of programs or web sites that you want blocked. If anything on the list is encountered, AceSpy will immediately close it and can send an alert to your email or mobile phone!

After your purchase you will receive a premium software product with step-by-step instructions, free minor updates and tech support for life. In the extremely rare case of a problem, we will give you easy instructions to correct your issue. 100% Guaranteed

System Requirements

Requirements For the Computer Being Monitored:
Any edition of Windows 7, Windows Vista, Windows XP or Windows 2000. Also available for Mac OS X.

Requirements For Viewing Logs:
View logs within the hidden interface or have automatic reports sent directly to your email address.
