Audio surveillance equipment and listening devices are now available online. Our Audio surveillance solutions with listening devices for Law Enforcement field operations, investigations, as well as Military and Government level communications intelligence are ready for deployment.

Room Transmitters, Audio Bugs, and Audio Transmitters are discreet.

Spy Phones and GSM Bugs are ingenious.

Who uses audio surveillance listening devices? Just about everyone who needs to secure information.

In addition to listening devices, cellular monitoring systems including passive cellular interceptors are also explained here. Cellular monitoring is a restricted technology, primarily used by government and military sectors. Yet read about our systems and Contact Us with any questions you might have.
