White House quietly updates/releases visitor data
Paula Broadwell (Petraeus Mistress) visited the Old Executive Office Building on June 10, 2009.
She met with John Tien for several hours.
Source Sends - "So to be clear, when did Paula Broadwell visit the White House?
Paula Broadwell visited the OEOB on June 10, 2009. The WH has just now released that information on December 28, 2012. Why her visit in 2009 was left out on the WH visitor logs all these years is a complete mystery.
Source Sends - "So they logged Matt Bissonette's visit to the WH, but they concealed Paula Broadwell's visit to the Executive Building?".
Cryptocomb - That is correct.

Tampa Police Dept releases the entire Kelley residence 911 response reports - Wow!

Tampa, FL Mayor releases his emails pertaining to Jill Kelley. She mentions Petraeus quite a few times.

“Shirtless FBI Agent” - Frederick W. Humphries II

Jill and Scott Kelley have enjoyed consulate vehicle license plates for quite awhile. Police are not supposed to ticket these vehicles, or interfere with the vehicle driver or passengers if the vehicle is being used to conduct "official" business at the time. It's one of the perks given to friends of U.S. Military Officers and FBI Agents. Cryptome posts a list of a few of Jill Kelleys friends here.

Source Sends - If you watch the video closely near the end, you will notice she is carrying a bag with a tag attached. That tag is used to identify the bag and it's contents as private consulate material and cannot be seized or searched. She's very smart.

Source Sends - The license plates are NOT Diplomatic plates, but your average police officer might not know the difference which is the point in this case. According to many news stories, Mrs. Kelley is known to introduce herself as an Ambassador. She may have gotten out of a few speeding tickets and other moving violations with those license plates.

Source Sends - The CIA officer listed as “Officer A” in the John Kiriakou complaint has been revealed to be Thomas Donahue Fletcher. Born in 1953. Fletcher is currently a resident of Vienna, VA.

Further - source states journalists have known identity of this person prior to August 2008, when Kiriakou allegedly confirmed the identity in an email to Matthew Cole, formerly of ABC News.

Source Sends - Thomas Donahue Fletcher was the chief of the Headquarters Based Rendition Group and was personally responsible for the rendition of Abu Zubaydah (as well as other high-value detainees) to the CIA black site in Thailand and witnessed and played a role in Zubaydah’s torture.

“Officer B” is former CIA officer Deuce Martinez.

Shortly after the shooting, major Mexican news organizations identified one of the U.S. officials as Stan D. FBI releases the "Medburg Investigation" Files

In March 1971, an anti-war group that called themselves, "The Citizens Committee to Investigate the FBI" broke into a FBI Office in Media, PA. The group liberated thousands of FBI documents which revealed the FBI's civil liberites violations, which were detailed in the COINTELPRO files. Needless to say this enraged the FBI and a widespread investigation was launched code named "Medburg", to determine who broke into their offices, while the FBI created many suspects, no one has ever been prosecuted for the break-in. The files are broken into four sections due to the file sizes.

Medburg - Section 1

Source Sends Link with further information. What has been learned is that the device is used to decode coded texted messages. This is what has been learned so far - The device features a dipole antenna, monochrome LCD display panel, has a full arabic alphabet keyboard, most likely requires a AC power source, a device of this type could function with as little as 6-7 volts of constant power. Several sources believe that the device is used to decode Numbered Radio Transmissions, See Link to learn more. The device probably operates like a digital one-time pad. The device would be pre-programmed to receive data from a specific radio frequency and send data on a separate radio frequency. Watch Lecture

Cryptocomb is proud to announce the publication of over 10GB's of documents and taped interviews journalist/author Douglas Valentine conducted with more than a dozen CIA and military officers while researching his book The Phoenix Program. The original interviews were recorded in the late 1980s on magnetic tape and, with the help of several volunteers, subsequently converted onto CDs twenty years later. Advances in technology now make it possible to post the interviews on Cryptocomb for everyone to hear. The Phoenix Program, notably, is the template for the targeted killings in the war on terror, and the interviews are invaluable tools for learning about the men who were instrumental in its development and prosecution.

but these folks were everywhere, it’s possible that some spies were caught but their identities were never revealed to the public and they are walking amongst us to this very day.

List of possible Scenarios regarding the SVR/FBI & Stratfor revelations:

1. Stratfor gets “approached” by the USGOV and informs Stratfor that Don Heathfield is a spook, and the USGOV asks for help.
2. Stratfor gets approached by Don Heathfield for “Help” and maybe Stratfor attempts to use him as a source, all the while informing to the FBI.
3. Stratfor bills the USGOV for services rendered as an “informant”.
4. The USGOV has a “understanding” with Stratfor and they have been sharing information for many years, “back scratching”. Maybe the USGOV flipped Don Heathfield and a few of the other spies for a period of time and then sent them back to Russia after they have fulfilled their usefulness, if this proves to be true, Don Heathfield’s Handler in Russia does not know this and they are going to be killed/prosecuted in Russia.
5. Maybe the USGOV flipped Don Heathfield and a few of the other spies for a period of time and then sent them back to Russia after they have fulfilled their usefulness, if this proves to be true, Don Heathfield’s Handler in Russia does not know this and they are going to be killed/prosecuted in Russia.
6. Someone in the USGOV spills the beans to Stratfor about these spies (Professional Chit Chat), and Stratfor used that “chit chat” to make a buck and sold out the USGOV to its foreign govt clients who would pay a tremendous amount of money for that information.
7. Quoting Stratfor “but these folks were everywhere”, it’s possible that some spies were caught but their identities were never revealed to the public and they are walking amongst us to this very day.
8. The USGOV leaves them as “agents in place” and worked them against their own handlers. Stratfor uses this information as a tool against the USGOV and they secure a “back channel” agreement with the USGOV and the USGOV throws Stratfor a bone every now and then.
9. None of the above.
10. None of the above, and some even more evil plot unfolded that we could never have imagined occurred.

Source sends this - Citing a previous Cryptocomb post published early February 2012.

It is now clear that the “Stratfor Leak” is replete with spies. The “Stratfor Leak” needs further intensive review. Cryptocomb has discovered that Ann Foley (Illegal Russian Spy) was a Stratfor Member. She used her real russian name “Elena Vavilova” (Stupid Move) in her registration, and used her cover name (Ann Foley) as her billing name. Her Stratfor password was “heathfield”. Her email address was/was annfoleysvp@hotmail.com

Twin Goals and the Espionage Challenge

One of the Russian operatives, Don Heathfield, once approached a STRATFOR employee in a series of five meetings. There appeared to be no goal of recruitment; rather, the Russian operative tried to get the STRATFOR employee to try out software he said his company had developed. We suspect that had this been done, our servers would be outputting to Moscow. We did not know at the time who he was. (We have since reported the incident to the FBI, but these folks were everywhere, and we were one among many.)

Thus, the group apparently included a man using software sales as cover — or as we suspect, as a way to intrude on computers. As discussed, the group also included talent scouts. We would guess that Anna Chapman was brought in as part of the recruitment phase of talent scouting. No one at STRATFOR ever had a chance to meet her, having apparently failed the first screening.

It will be extremely interesting to read the email correspondence between Don Heathfield and this “Stratfor Employee”, I wonder if Stratfor attempted to “Flip Him”? There will be of course email chatter between Stratfor and the FBI in regards to Don Heathfield, maybe the FBI asked Stratfor to attempt to “Flip Him”. Now that the Stratfor emails are in the wild, I guess everyone will find out soon.
